Archias' Hay and Pasture Grasses

Field of Archias' Alfalfa

Archias' Northern Grown Alfalfa or Lucerne (Medicago Sativa)

"There is no state in the Union in which Alfalfa cannot be successfully grown."

Alfalfa produces 3 to 7 tons of hay to the acre. Its long, branching roots penetrate far down, push and crowd the earth this way and that, and thus constitute a gigantic subsoiler. These become an immense magazine of fertility. As soon as cut they begin to decay and liberate the vast reservoir of fertilizing matter below the plow, to be drawn upon by other crops for years to come."

Prepare the land thoroughly and sow seed at the rate of 15 to 20 pounds per acre, with a broadcaster or grass seeder. Cover with a brush or light harrow. Young plants are quite tender, and the land must be free from weeds until they become established. Lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.85. See page 18 for Nitragin for Inoculating.

Medium Red Clover

Also called Small Red June Clover

This is considered the most valuable of all the Clovers and is known to every farmer. It makes two crops each year. It may be sown either in the spring or fall, and if no other grasses are used, at the rate of 8 to 12 pounds per acre. We are in position to supply the finest quality seed. 60c per lb., postpaid. Write for special prices in peck or bushel lots.

Grimm Alfalfa

The Genuine Minnesota "Lyman" Strain

Originated in Minnesota by Wendelin Grimm many years ago—selected from the hardiest plants year after year until it is a fixed type of extreme vigor. The crown of the plant is receding, so is protected by the surface of the soil and is very heavily stooling, one root often producing 300 to 400 shoots. Roots are fibrous and branching, instead of the long tap root. The flowers are variegated—purple predominating. Some growers report larger yields of Grimm than other strains, giving a leafier, finer hay. Our seed is guaranteed genuine. Archias' "Sure Brand" quality, lb., 55c; 5 lbs., \$2.50; 10 lbs., \$4.75, postpaid.
