SUBJECT: Reparations Machines of Former Japanese Arsenals

TO : Custodian of Reparations Machines of Former Japanese Arsenals

THROUGH: Japanese Liaison Office, Ehime Ken

1. Recent inspection by this office has indicated that reparations machines of former Japanese Arsenals are not being maintained satisfactorily.

2. It is hereby requested that a full explanation be given as to why certain corrections have not been made which were pointed out in specific cases and why it is necessary for this office to continuously remind you that this machinery must be maintained as outlined in SCAPIN 1219.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115013

Mar. 8, 1947.

TO : Commanding Officer, Ehime Mil. Govt. Team.

FROM : Chief of Cormerce and Industry Section.

SUBJECT: Recommendation re application for permission for transfer of unrepairable machinery.

1. This is in connection with the application filed by the Imabari Plant, Kurashiki Spinning Co., Imabarishi.

2. As a result of our investigation the subject machine (bench lathe) is proposed to be transferred from Imabari Plant to Hojo, Where it is scheduled to manufacture cheese bobbins for cotton spinning operation to produce export goods.

3. Though the Kurashiki Spinning Co. is a controlled concern, the removal of the bench lathe from Imabari to ~~Saijo~~ Hojo would be carried out amoung the plants attached to the same company, and it does not meen selling the machine to other firms.

4. Such being the case your permission for the transfer is requested.

M. Tokuno

Chief of Cormerce and
Industry Sect. Ehime

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

Application for Permission

for Transfer of Non-reparation Machinery

28 February 1947.

To: Matsuyama Military Government Team.
(Matsuyama, Shikoku)

Applicant: Imabari Factory, Kurashiki
Cotton Spinning Co., Ltd.
142 Dai-shinden, Imabari-shi, Ehime-ken.

(1) Location of Machinery.
Imabari Factory, Kurashiki Cotton Spinning Co., Ltd.
142 Dai-shinden, Imabari-shi, Ehime-ken.

(2) The Place to Where Machinery are to be Transferred.
Hojyo Mill, Kurashiki Cotton Spinning Co., Ltd.
1005 Hojyo-cho, Onsen-gun, Ehime-ken.

(3) Description of Machinery.

Name	Size	Maker	Quantity
Bench Lathe	2'-3"	Nihon Jukogyo	1
"	2'-7"	Ishijima	1
		Total	2

(4) Owner of Machinery.
Kurashiki Cotton Spinning Co., Ltd.
4/497 Kurashiki-shi, Okayama-ken.

(5) Reason for Application.
The above-mentioned machinery are not marked for reparations, and are urgently required in Hojyo Mill for the manufacture of wood cheese bobbins which will be used in connection with the cotton spinning operation. We respectfully beg to ask, therefore, your kind consideration for giving us a permit for transferring them.

Imabari Factory,

Yasuji Suzuki

1. In Basic Ltr. Headquarters Eighth Army, dated 20 September 1946, subject: "Requests for Numbers of Reparations Plants". The machinery dispersed in the Kure Naval Arsenal, Armour Plate Branch, Matsuyama City, Ehime Ken was erroneously listed as machinery formerly belonging to the 11th Naval Arsenal, Hiroshima Ken, and in error was given Code No. 05-5.

2. The parenthetical number 05-5(21) of Kure Naval Arsenal, Matsuyama has been changed to 05-6(6) which was formerly the Code Number of Nippon Hatch Board K.K., Iyo-gun.

3. The Reparations Machinery of the Nippon Hatch Board K.K., 05-6(5) No. Mach. 2, Iyo-gun, Myozeki Hanagatsuo Kojo, 05-6(29) No. Mach. 1, Gunchu-cho and Nagoshi Tekkosho, 05-6(26) No. Mach. 2, Gunchu-cho were moved to Kure Naval Arsenal Matsuyama, to facilitate better custody and control. The latter two Code Numbers have been delated and machinery coded 05-6(6).

4. Submitted herewith is one Plant Cover Sheet and Verification Report of machinery dispersed in Kure Naval Arsenal, Matsuyama, Ehime Ken.

GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERS

AC 387.6 (31 Jan 47) ESS/ST

APO 500
31 January 1947

SUBJECT: Reparations Targets

TO: Military Government Team, Ehime Prefecture, APO 317

1. References are the following:

a. Memoranda for the Imperial Japanese Government from General Headquarters, Supreme Commander for the Allied Powers.

(1) File AG 004 (11 Oct 46) ESS/IN, (SCAPIN 1263), dated 11 October 1946, subject: Revised List No. 2 Aircraft Factories, Military and Naval Arsenals and Research Laboratories.

(2) File AG 004 (10 Oct 46) ESS/IN, (SCAPIN 1258), dated 10 October 1946, subject: Revised Listing of Reparations Selections Within Privately-Owned Munitions Plants.

b. Letter to the Commanding General, Eighth Army from General Headquarters, Supreme Commander for the Allied Powers, File AG 444.5 (21 Aug 46), ESS/ST/IN, dated 21 August 1946, subject: Removal of Laboratory Equipment to Tokyo First Arsenal pending final disposition.

2. 5250 Technical Intelligence Company has been requested to inventory scientific equipment at reparations targets listed in references 1a(1) and 1a(2) above. In planning field trips by members of 5250 Technical Intelligence Company, it would be helpful if it could be determined at this time, which of the reparation targets listed in references 1a(1) and 1a(2) above contain appreciable scientific equipment which has not previously been inventoried.

3. Therefore, it is desired that a line be drawn through those targets on the attached copy of list of reparations targets in Ehime Prefecture, which contain very little or no scientific equipment and through those targets in which the scientific equipment has previously been inventoried by military government personnel. Thus, the targets not lined out will be those that contain appreciable scientific equipment or contain equipment so technical in nature, that scientific personnel are required to inventory it correctly. It is further desired that

THROUGH: Commanding Officer, Shikoku Military Government Region, Hqs & Hqs Detachment, APO 317

1. As per memorandum SCAPIN 1134 dated 13 August 1946, subject: "Reparations Selections within Privately Owned Munitions Plants", the Shikoku Seisakusho K.K. Plant was designated and selected for reparations.

2. Inclosed herewith are reports on the above mentioned plant submitted by Eiichi Murata, Director of the Shikoku Mfg. Works Ltd., M. Tokuno, Chief of Commerce & Industry Section, Ehime Ken, and S. Teshima, Governer of Ehime Ken, with requests that said plant be removed from the reparations list.

3. In accordance with paragraph 2 f, Section III, Operational Directive Number 5/5, Headquarters Eighth Army, dated 24 September 1946, the inclosed reports are forwarded for review, and consideration for deletion as a reparations installation. This plant was throughly inspected by this office in view of the definitions and critera for selection of privately owned munitions plants for reparations, and recommend that said plant should be removed from the reparations list.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175613

Sept. 17, 1946

TO : Commander of Ehime Military Government Team.

FROM : Director of the Shikoku Manufacturing Works, Ltd.

SUBJECT : Report of the Factory.

We hereby report the status of our factory as follows.

1. History of the Company

(A) Amalgamation of iron works.

There had been no big iron works in this city and small works with one foreman and several apprentices competed each other in procuring profits from small jobs. The following five iron works were among them (afterwards amalgamated into the Shikoku Mfg. Company)

Name of the Works	Proprietor	Location	Products
Kinuyama Faundry	Eiichi Murata	Kinuyama-cho, Matsuyama-shi.	Pipe joints
Ogame "	Sotaro Ogame	Oguri-cho, "	Casting of machines, marine motors
Norimatsu "	Kisaku Norimatsu	" "	Casting of machines
Fujita Iron Works	Masao Fujita	Tokiwa-cho, "	Machine repair
Kan Iron "	Seiichi Kan	Kajiya-cho, "	Machine repair

Incl. #1

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

With the progress of the China Incident the demand for munitions grew bigger and materials hitherto allotted for peace time production were assigned to munitions. In iron works the materials decreased and hands began to go out to munitions factories. So these small factories could not carry on their work if they were not to amalgamate into larger ones, gathering their machines and equipments, and do the subcontracted jobs of munitions production (which work was encouraged by the Government). Accordingly in August 1941 the above-mentioned iron works (with Kinuyama Foundry as promoter) gathered their machines and equipments at Kinuyama Foundry and amalgamated into the Shikoku Mfg. Company Ltd., and began to do the subcontracted jobs for the Kure Navy Arsenal through the intercession of the prefectural authorities and Iron Works' Association.

Why did they amalgate? Most iron works were unaccustomed to munitions production; it needed some special technical skill. They didn't like the conversion but otherwise they were unable to carry on their business and fe feed the workmen. So they amalgamated into one Company large enough to produce munitions.

(B) Capital to date: 195,000 yen

(C) Type of Company: Dimited liablity Company

(D) Number of Staff-members: 5

2. Changes of production.

(A) Before the war.

Peace-time production of the said iron works was: The Kinuyama Foundry manufactured cast iron pipe joints and sold them to commission merchants in Osaka and Kobe. Ogame and Norimatsu Foundries did casting for various machines and marine motors by order of the iron works of the city. Fujita and Kan Iron works were engaged in repairing of various machines.

(B) The time we began munitions production and the reason.

The reason of the conversion into munitions factory was given above; We were not allotted no materials for production of civilian goods. The military and the people at large didn't allow us to keep on the production of articles not for the War. The public opinion was that if we had a lathe we must use it for the production of munitions.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115013

T Thus we were compelled to convert into a munitions factory by reason of shortage of hands and materials and also the treand of public opinion.

In the mean time the above-said five iron works had began to do the subcontracted jobs for the military on small scale before they were amalgamated (about July 1939) because otherwise the owner of the factory and the factory hand could not earn their living. Since they were amalgamated in August 1941 we were engaged chiefly in munitions production. But in some part of the factory the production of civilians goods was also kept on.

(C) Comparison of production of munitions with production of non-military goods during the War.

	Munitions	Non-military
Average production during the war	70 %	30 %
At the time of maximum munitions pruduction	80 %	20 %

(D) Date of permission of conversion and permitted articles.

(1) Date of permission: March 21, 1946

(2) Authorized production:

Hand-threshers	Ploughshares
hoes	pumps
pots	kettles
Repair of Machines	

(E) Staus of production after the War.

(1) Just at the end of the War.

In August 1945 we discussed what would be most wanted inx the future and what we should manufacture in consideration of the equipments and technical conditions of this factory and finally we decided to manufacture agricultural tools, especially hand-threshers. Ust at the time Japan was very short of food

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

food and agricultural tools necessary to the production of food had not been allotted to the farmers for a long time owing to the War. So we set about to manufacture agricultural tools to solve the food problem, encouraged by the prefectural authorities and Agricultural Association. So as to be available to the farmers in the harvest-time of 1945, 390 spades and 150 sets of man-powered threshing machines were manufactured and delivered to the Agricultural Association. Besides, repairs on the machinery with had been damaged by the air-raid, were made to bring forth a revenue of ¥ 36,000.

(2) Production Status in 1946.

Since the beginning of 1946, all kinds of items necessary to civilians' every day-life have been manufactured besides the above-mentioned farm implements. Those articles of life's necessities are pans, kettles, blowers, and wood-work machines, which are indispensable for rehabilitaion. The total production by the end of August is as follows.

Item	Unit	Cost
Treadle Threshing Machine	883	¥ 451,160
Hoe	580	11,600
Pan	1,125	22,500
Kettle	230	27,900
Wood-work Machine	12	52,500
Blower	320	62,040
Repairs		432,180

Designated by the Governor for a farm implement manufacturing company on April 1, 1946.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

(3) Production Programme.

Stress will be put on farm-implement manufacture: man-powered threshing machines spades and weeders. The predicted products in 1947 weeders.

Item	Monthly Production
Treadle threshing machine	200
Spade	700
Weeder	500
Wood-work machine	5
Blower	200
Repairs	Some

The expectation will only be met when cokes be available, the cokes for irommeulding process being one of the toughest obstacles to surmount.

(4) Reason for the pre-war items' production suspended.

Unavailable coal is one of the chief reasons for stoppage of pre-war articles' manufacture.
m The malleable cast-iron tube joints, for example, are made of iron forged pliable by dint of much coal of good quality.
Such an effective inflammable articles have been hardly obtainable during and after the war.
Besides, a plant building collapsed to damage the furmace almost irrecoverable last fall when the flood submerged the Ehime area.
Moreover, the increased production of farm implements is presumably far mare imperative than that of tube joints to meet the pressing situation of Japan.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

. Machinery .

(A) Reconversion of the prohibited munition production apparatus.

The ~~gneter~~ part of the torpedo-parts manufactured in this factory was produced by dint of several lathes and other machines, which had been made in our factory.

Although these machines were by no means of precise capacity, man-power or Japanese dexterity carried out the makeshift work.

The following machinery has been installed additionally:

Item	Unit	Cost
Milling machine	1	¥ 7,500
Shaper	1	2,440
Slotter	1	4,950
Forging presser	1	13,000
Electric motors	3	770

(B) Machine Installation Status.

Item	Unit	Remarks
Drilling machines	7 (Other two machines borrowed from the Kure Arsenal)	Not operated because of the lack of parts
Gear cutting machine	2	
Lathes (Incl. Turret)	37 (Other three ~~mxx~~ machines borrowed from the Kure Arsenal)	Not operated because of the lack of parts.
Milling machines	3	
Planer	1	
Shapers	3	

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115015

Slotter	1
Metal saw	1
Miscellaneous machine Tools	3
Forging presser	1
Electric motors	10
Compressor	1
Cupolas	1

(C) Machines installed but not operated.

Of the machines installed in this factory, 23 sets are not operated because of:

a) lack of parts
b) work out gears

If only coal be available other machinery will be operated to produce cast-iron articles.

4. Employees.

E-ichi Murata

Director of the Shikoku Mfg. Works Ltd.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

Oct. 1, 1946

TO : Commanding Officer, Ehime Military Government Team.

FROM : Chief of the Commerce and Industry Section.

SUBJECT : Reparation, Shikoku Manufacturing Co.

1. I beg leave to express my opinion to the effect that the following plant scheduled to be turned over to the Allied Powers as a part of reparations will be excepted from the list because of the reasons mentioned below.

2. a) Name of the plant: The Shikoku Seisakusho (The Shikoku Manufacturing Co.)

b) Location: No.276, Kinuyama, Matsuyama-shi.

c) Operator: Eiichi Murata.

3. Reasons :

a) Shikoku, an island separated from Honshu and Kyushu by a channel, the Seto Inland Sea, has rather poor industrial capacity. There are few big factories in Ehime prefecture, especially in Matsuyama. Even such a minor factory as the Shikoku Mfg. Co., therefore, cannot be removed without putting the people to inconvenience.

b) The three main cities in Ehime-ken suffered air-raid in July last year, and ~~munition~~ factories at Uwajima, Matsuyama, and Imabari have entirely stopped production to lower the prefectural productivity immensely.

c) Owing to the war, the minor iron works consolidated themselves into one plant, "the Shikoku Manufacturing Co.", which has been operated by dint of the comparatively small capital.

d) The Shikoku Seisakusho, an amalgamated weak concerns, had been engaged in production of artiales for civilians' use, while the outbreak of China Incident compelled the operator to convert the plant into a munition manufacturing factory, because the greater part of materials for

ncl. #2

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

for production were distributed among the munition manufactureres only, and there were unsurmountable difficulties in labor power acquisition as well as in capital fund procurement.

e) The machines installed in this factory belong to "the 3rd standard type" authorized by the Government and are rather of old type.

f) At present, man-powered threshing machines are being manufactured, which are indispensable for the increased foodstuff production and are in great demand because of the dearth of the similar machinery.

Accordingly, the continuous manufacturing must be kept on.

M. Tokuno

M. Tokuno

Chief of Commerce & Industry Section.

I discussed with Mr. Tokuno and proprieters of the factory and found out that the plant was run on a small scale and that the machines were old fashioned. Moreover the plant is now producing farming tools which are essential for the increase of foodstuff production.

So I beg your kind consideration for exclusion of the firm from the reparation list.

S. Teshima

A STATEMENT OF A REQUEST
ON OUR PLANT'S MATERIALS

After the materials of our plant was investigated by members of the reparations committee on 26th of Dec. 1946, the investigation list was drawn up such as in another list of the sheets, and they are essential to manufacture the goods in our plant.

FOR EXAMPLES

Steel, Round $\frac{3}{8}$" ; $\frac{1}{2}$" :, $\frac{3}{4}$"	Use for man power threshing-machine.
" $\frac{7}{8}$"; 1"	Ditto, and rope making-machine.
Steel, square $\frac{3}{8}$"	Use for man power threshing-machine
Pipe	" "
Steel, plate	Use for barley presser machine, rope making machine and threshing machine.
Anchor bolt	Use for man power threshing m.
Steel, bar, flat	Use for rope making m. weeder, & hoe.
Nail	Use for man power threshing machine, rope making machine and for packing.
Brick; fire brick	Use for repairing a smelthing furnance.
Cement	Use for setting up a saw-mill machine.

Theough the above-mentioned materials were very hard to get at that time, we got them after a great trouble, and we are spending them every day in our plant so we have to supply a great deal of materials not to cose our plant.

We made about 2,000 man power threshing-machine in our plant right after the war was over last year, and supply to the farmers through agriculture association.

We are planning to make double quantity or more in this year, and now we are manufacturing a part of articles and rope making machine, weeder, and wood-work machine.

As the state of matters are above-mentioned, weentreat you to let us use the materials in our plant by all means.

Ehime-Ken.

OPINIONS UPON REPARATION PLANT INVESTIGATION.

1. NAME AND LOCATION OF THE PLANT:

Shikoku Sesakusho (Shikoku Iron Works), No. 276 Kinuyama-cho, Matsuyama-shi, Ehime-Ken.

2. DATE OF INVESTIGATION:

December 26, 1946.

3. ATTENDANT OFFICIAL:

Michikazu Ohara, Secretary of Local Govt., at Commerce and Industry Sec., Ehime-Ken.

4. OPINIONS ON INVESTIGATION:

An inventory as is attached has been drawn up by the Reparation Plant Inquiry Committee on investigation. The plant's reconversion to produce civil public's commodities was authorized on March 21, 1946. Keeping in touch with the Prefectural Agricultural Association, the operator has been managing to manufacture such machines as man-powe threshers, rope twisters, farming tools and woodwork machines for the repabilitation of the prefectural populace as well as the increased food production.

All the materials placed on the list are slated to be manufactured into those machines and tools. If they be taken away as reparations, the operation of this plant will be dwindled against the principle of the reconversion authorization.

The exemption of the plant's materials from your collection program is solicited.

T. Ogawa
