Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

- Coloured covers/
Couvercle de couleur
- Covers damaged/
Couvercle endommagée
- Covers restored and/or laminated/
Couvercle restaurée et/ou pelliculée
- Cover title missing/
Le titre de couverture manque
- Coloured maps/
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/
Planches et/ou illustrations en couleur
- Bound with other material/
Relié avec d'autres documents
- Tight binding may cause shadows or distortion
along interior margin/
La reliure serrée peut causer de l'ombre ou de la
distortion le long de la marge intérieure
- Blank leaves added during restoration may
appear within the text. Whenever possible, these
have been omitted from filming/
Il se peut que certaines pages blanches ajoutées
lors d'une restauration apparaissent dans le texte,
mais, lorsque cela était possible, ces pages n'ont
pas été filmées.
- Additional comments:/
Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages/
Pages de couleur
- Pages damaged/
Pages endommagées
- Pages restored and/or laminated/
Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed/
Pages décolorées, tachetées ou piquées
- Pages detached/
Pages détachées
- Showthrough/
Transparence
- Quality of print varies/
Qualité inégale de l'impression
- Includes supplementary material/
Comprend du matériel supplémentaire
- Only edition available/
Seule édition disponible
- Pages wholly or partially obscured by errata
slips, tissues, etc., have been refilmed to
ensure the best possible image/
Les pages totalement ou partiellement
obscures par un feuillet d'errata, une peiture,
etc., ont été filmées à nouveau de façon à
obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

12X 16X 20X 24X 28X 32X

The copy filmed here has been reproduced thanks to the generosity of:

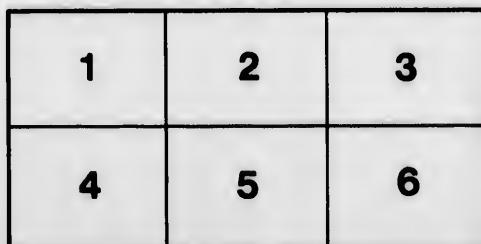

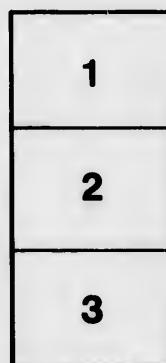

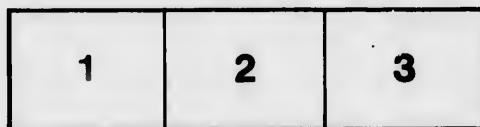

Library of the Public Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

The

Price

Ward's ALMANACK,

FOR THE YEAR OF OUR LORD

1823.

Being the Third after Bisextile, or Leap Year.

CALCULATED FOR THE MERIDIAN OF HALIFAX IN NOVA SCOTIA,

And will serve for any part

AND CONTAINING A MONTHLY TABLE

A TIDE TABLE.

By means of which, the time of High Water at any given port in America and in the Bay of Fundy, may be ascertained with accuracy.

ALSO

The Rising and Setting of the Sun—Length of Day and Night—Tide in hours and minutes—Exposition of the Moon—Moon's Sighting—Moon's Age, and time of rising and setting—High Water at Halifax—Specs. Holidays and Weather—Almanac—Calendar and the Eclipses for the present year.

1823.

HALIFAX.

For Sale at the Free Press Office, Wholesale and Retail.
Price Six pence each, 12 dollars a Gross; and Seven pence half penny single.

Directions for Halifax Harbour, taken from the printed Directions in
Custom-House at Halifax.

SAMBRO island and light house is in latitude 44 deg. 30 min. N.
longitude 63 deg. 32 min. W.

From the westward, bring the light to bear N. E. if it bears more
easterly, stretch to the southward till it bears N. E. and as much more no-
rtherly as you please, there being no shoal or ledge to the southward; then
it open on your larboard bow; give it more than a mile and a half, but
much more as you please.

Note.—The western ledges lie from the light S W. distant two miles,
abber W. S W. about one league; the eastern ledges lie in a range ne-
some above water; the outermost one mile and a half from the light
ing from it E. N. E.

When the light bears north-distant about 2 miles, run N E 4 miles,
north will carry you to Chedabucto Head at a proper distance clear of
danger.

When abreast of Chedabucto Head, run N. $\frac{1}{2}$ W for the south point
George's Island.

When within $\frac{1}{2}$ a mile of George's island you may enter the harbour
of it in 18 fathoms, or east of it in 15.

In passing between Sandwich point and Meagher's beach run nearest
point to shun a shoal which runs off S W from the beach.

There is also a shoal lying one mile south of Sandwich point.

Coming from the eastward, run for the light and you cannot fail to see
Chedabucto Head as you open Halifax Harbour; the light being 4 m
distant from the Head to the S W.

Signals made at Fort George when vessels are coming into harbour.

One ball close for one square rigged vessel.	A do under a ball for six do
One ball half hoisted for two do	A do over a do half hoisted for 7
Two balls close for three do	A do under 2 do close for 8 do
Two balls separated for four do	A do between 2 do separated for
A pendant of any colour for five do	A flag of any colour for 10 or more

[The above are hoisted at the east or west yard arm; according to the qua-
ter the vessel first appears in, with the addition of a ball at the centre of
yard until the vessel can be seen, when one or more of the following des-
criptive colours will be hoisted at the mast heads.]

An Union for a Flag-Ship, with or without a Squadron.	A blue Pendant for a Merchant Ship
Do. with a Red Pendant over it, for a Two decker.	A red Pendant for a Merchant Ship
Do. with a blue Pendant over it for a Frigate.	A white Pendant for a Topsail Schooner or Sloop.
Do. with a white Pendant over it for a small armed Vessel.	A blue and white flag horizontally divided Neutral Fleet.
A red flag pieced white for a Packet	White and blue Pendant Neutral Man of War

JANUARY hath XXXI Days.

Fine sense is not half so good as common sense.

Nothing is more silly than an ill-timed laugh.

The most expensive luxuries are not always the most pleasant.

Our reputation ought to be dearer to us than life.

Ostentation takes from the merit of any action.

Beauty is no longer amiable than whilst virtue adorns it.

FARMER'S CALENDAR.

The Editor having undertaken the publication of this Almanack at a very advanced period, in consequence of the sudden death of the enterprising and public spirited gentleman who had hitherto published it, is well aware that much has been omitted which might have been inserted had more time been allowed. He trusts however that his banding will experience that indulgent consideration, which all in infancy require.—Obtaining that he will feel content, and be prompted to make such exertions as will render his future productions more useful and interesting.

Speaking of infancy furnishes him with a clear moral; and he will use it for the edification of those who are in the highday and morn of life. He will tell them, that that morn is most invaluable, and that its hours if wasted or mispent, will entail almost invariably, remorse and suffering upon such as have misapplied them; and that consequently they should avail themselves of every opportunity to cultivate their minds; they should form temperate, virtuous and industrious habits; and endeavour to secure a retreat for the evening of their days; when, no longer able to engage in the busy pursuits of active life, they may have no resource remaining except that which is to be derived from the contemplation of a life we spent.

FEBRUARY hath XXVIII Days.

Vice is universally the bane of happiness.

It is much easier to debase others, than to raise ourselves.

Dreams, like notorious liars, are generally false.

The most effectual antidote against sorrow, is employment.

Those who give nobody a good word, deserve any body's good word.

What is fixed in our hearts is seldom out of our heads.

Only the good and wise can be friends; others are but companions.

Idleness has many friends, but no advocates.

Hasty resolutions are seldom fortunate.

Last Quarter, 2d Day, 6 hours 24 m. Evening.

New Moon, 10th Day, 10 hours 53 m. Evening.

First Quarter, 18th Day, 6 hours 50 m. Morning.

Full Moon, 25th Day, 1 hour 56 m. Morning.

Prometheus struck fire from flints about 1715 years before Christ he being the first is said to have stolen it from heaven; and became author of all the arts among the Greeks.

FARMER'S CALENDAR.

JOWLER.

"I suppose I must save a piece for Jowler," said poor Mrs. Needy, while crumbing her children's supper. Yes, good woman, save a piece for your dog, but when you give it him, be sure to load it with ratsbane. But stop! I think Dr. Chymical says that this will not answer the purpose, for he will throw it up the moment it begins to sicken him. Then take your fowling-piece and despatch him without ceremony. It is surprising that a poor man who can but just rub and go, and has to scratch hard to find bread for his numerous little ones, must also keep a great lazy beef-eating dog in his house. Once in a great while this animal may be of some use, but no one half pays his living.

Away with your Jowers and Towlers, your Whitefoots and Lighttoots—I had rather have one length of good fence to keep cattle out of mischief, than all the dogs in the universe."

MARCH hath XXXI Days.

Poverty is the natural offspring of idleness.

There are but few things wanting to make a wise man happy; nothing can make a fool contented.

The most common things are the most useful.
Ignorance is the source of vanity and folly,

FARMER'S CALENDAR.

Take good care of your sheep. This is the best direction for the preservation and management of weak lambs that can possibly be given; for the best nursing for such lambs is to keep the ewes well, either upon your best English hay or red clover, with potatoes, carrots or white beans. Such feeding will ensure you strong lambs, with plenty of milk and save all the trouble of nursing. If any one lack these means or others equally proper (for even barley, oats and corn will answer as substitutes for the potatos, carrots or white beans, if given in small quantities, so as not to excite fever, and thereby cause ticks and the shedding of the wool) or if he neglect to use them, let him remember that such weak lambs should be treated in all respects as if they had been drowned and he would restore them to life. Apply gentle and regular warmth; give them warm milk frequently in small quantities (the milk of the sheep is best,) and if the ewe has milk sufficient for its support, you may generally raise them; but if not they commonly die. It is more work to nurse one such lamb for 24 hours, than to feed regularly one hundred sheep for the same time — Take your choice..

He that would live at peace and rest,
Must hear, and see, and say the best.

APRIL hath XXX Days.

Marriage has many pains, but celibacy has few pleasures.
 That should always be well taken that is well meant.
 Time is a friend to the mind though an enemy to the person.
 Hope and sound sleep are two of the greatest comforts of life.
 Few things are impossible to industry and skill.
 Some people are always busy, and yet do nothing.
 Confidence is a plant of slow growth in an aged bosom.

Last Quarter, 3d Day, 10 hours 58 m. Morning.

New Moon, 11th Day, 2 hours 36 m. Morning.

First Quarter, 17th Day, 8 hours 37 m Evening.

Full Moon, 25th Day, 2 hours 47 m. Morning.

FARMER'S CALENDAR.

Repair your fences ; plough for your spring grains; and for your flax, do it repeatedly. Prepare your pea ground as soon as the frost is out, by digging and raking, until it is completely pulverized. If your soil is weak, manure with live or leached ashes, or chip dung, and rake it in ; then plant your early hotspurs in double rows, 4 or 5 or even 6 inches apart, and set your peas by hand, about half an inch distance in the rows; cover lightly, and press down the surface of the earth upon the rows with the hoe. Be sure to select for this crop the driest and warmest soil in your garden, especially such as is secured from the north winds, by a tight fence or wall. Select from your cellar the best of your cabbages with heads, and set in some secure place, to stand for seed ; set different kinds remote from each other, to prevent their seed mixing at the time of blossoming. Set, at the same time, your best cabbage-stumps for early salad and greens. If your ground is moist set but just below the surface ; if dry set deep—say six inches or more.

Look to your water-courses and change their direction, to receive the benefit of the spring rains. The frequent changing of your water courses, will render your mowing even, and prevent one part from becoming too rank.

MAY, hath XXXI Days,

Most men are the reverse of what they appear to be.

Form is good but not formality..

The vices of age are worse than those of youth..

It is not genius, but perseverance, which brings things to perfection..

Domestic comforts are the principal source of human happiness..

You may plant cucumbers to advantage the first of next month. They will often be as early as those planted in May, and generally bear better. Nurse your plants with your hoe often. Remove the dry earth, and

JUNE hath XXX Days.

The itch of knowing secrets, is naturally accompanied by the itch of telling them.

To know and to do, is the compendium of our duty.

Every deviation from the path of rectitude, is adverse to happiness.

He that values his time, is select of his company.

Evil communications corrupt the good and make the bad worse.

Whatever is violent, is seldom lasting.

--------------	------------	------------------------------------	--------------------

0 58			give them fresh earth, especially if the season be dry. The best time is early in the morning. Continue to hoe and weed out your onions, and all other plants, even before the weeds appear, if possible. Hoe and bush your late peas. Plant more potatoes; sow more turnips. Continue to plant cucumbers for pickling. Top all such bush beans as are in blossom, by cutting off the top of the vines near to the blossom: they will be earlier and bear better. Thin out, and earth up all your plants. Remember that frequent hoeing is both rain and manure to your plants, especially in dry weather, if done in the morning. Plant out your cabbages, catliflowers, &c. in moist or cloudy weather, but not when the ground is wet and heavy. Thin out your beets, carrots and parsnips, and fill up the rows that may be vacant. Cut your sage, mint, &c, when they begin to flower, and spread them to dry in an airy place.

AUGUST hath XXXI Days.

Ill-habits are more easily conquered to day than to-morrow.

That which is known to three persons is no secret.

Nothing is more fatal to health than an over care of it.

A good example is a lesson which all can read and ought to imitate.

Liberality makes friends of enemies, and pride makes enemies of friends.

quarts of salt be applied to every ton of it. It is found that hay thus salted can be well saved in a much greener state; and at the same time the benefit which the hay derives from the salt, is more than fourfold its cost.

Dont delay hilling your corn until haying, to husband time: It is the worst calculation signs possible. There is damage to your corn by much delay; to hoe or hill when your land is heavy or wet is bad; it leaves your land tight

excludes the Free circulation of air to the roots of your corn, and is waste in the delay of hoeing both in time and strength. 'Tis all bad. Select therefore the finest weather for your several hoeings—your land will then plough easy hoe easy, your weeds will wilt and die in the sun, and your corn will be refreshed with a warm loose or light earth, which will readily receive the air and moisture to nourish the corn

The earlier your wheat and rye are harvested the better. Do it before the grain becomes hard; it will then have a thinner skin and produce whiter flour, although the whole weight of the grain will be rather less than if harvested later.

Soon as the morn illumines the east,
The reapers in the field are seen;
The golden sheaves are soon increas'd,
And joy attends the splendid scene.

SEPTEMBER hath XXX Days,

A useful profession is better than a thousand patrons.

Nothing disconcerts self-sufficiency so much as neglect.

No man can answer for his courage who has never been in danger.

He that loses his conscience, has nothing left worth keeping.

A man, like a watch, is to be valued by his goings.

Where there is much discernment, there is generally much candour.

New Moon, 4th Day, 6 hours 7 m. Evening.

First Quarter, 12th Day, 6 hours 33 m. Morning.

Full Moon, 20th Day, 4 hours 49 m. Morning.

Last Quarter, 27th Day, 8 hours 44 m. Morning.

FARMER'S CALENDAR.

Stay at home and mind your business, and leave litigation and the lawyers to those who have less sense and more money. I never view the crowds that repair to our Court-houses in the Country, and spend day after-day during term time in gazing at each other; without regretting that they are not at home attending to affairs which will be more productive of pleasure and advantage. Nor do I ever observe their unfortunate horses tied to fences and famishing through want of food, but I think how many industrious and deserving men, are pining in obscurity because they do not possess the means which these spendthrifts of time are so criminally neglecting.

I recollect in one of my excursions through the country, to have observed a hale-hearty looking young man arrive every day while the Court was sitting, and after waiting nearly a couple of hours for an interview with his lawyer, would proceed to the Court house where he would remain until the rising of the Court, then return to the tavern, procure what is generally termed refreshment, and having done so, would mount his jaded horse and set off for home.

I was struck with this persons appearance, and having occasion to visit the same place about a year after; I found the him occupied

OCTOBER, hath XXXI Days

Much tongue and much judgment never go together.
 We please more by never offending, than by giving a great deal of delight.
 A man without a secret is an open letter for every one to read.
 Friendship, when sincere, ever smoothes the path of life.
 Nature never said one thing, and wisdom another.

FARMERS' CALENDAR.

in a similar manner. But he no longer exhibited the same ruddy appearance; his face was fine bloated, his figure emaciated, and his speech days hesitating and tremulous. It appeared that the object which he had engaged in a law suit to obtain had eluded his grasp, and that he had reduced himself to wretchedness and want by the expences which had been incurred in the pursuit.

He no longer met with the same attention at the tavern as formerly. His enquiries if the tavern keeper did not say he should have dinner; if it obtained an answer was one abrupt and rude, as the servants turned away to attend to the commands of a new or more profitable customer.

It was after one of these rebuffs that, as I sat at my window, I observed him walk out of the house, with a countenance in which shame and hunger strove for the mastery; and meeting at the door with a wealthy gentleman, I heard him bargaining for the sale of what appeared to me to be his last ox; this animal, after some difficulty, he sold at a reduced price, and was to be paid for, partly by a note, drawn in favour of a neighbour who had made him advances, and partly in goods out of the store.

With a heartless and dejected demeanour, he then bestrode his miserable steed, and again retraced his steps towards his desolate

NOVEMBER hath XXX Days.

The greatest of all evils is a usurious disposition.

He who gives to be seen, will never relieve a man in the dark.

Tempers like faces often appear best at a distance.

The virtuous man may date his destruction by giving way to the first temptation.

FARMER'S CALENDAR.

and cheerless habitation. Reader if such a picture has ever fallen beneath your notice; think not it is one of a solitary nature, and take warning from the example it affords.

Dry your seeds well before you put them up; and when put up, let the air have access to them. It is best to put them into drawers, or partitions of drawers, kept part way open. Gather from your gardens all winter vegetables, before the hard frosts commence, especially winter squashes; dry and house them carefully. If you do not select your seed-corn, before gathering, from the hills, do it as you are husking, selecting the fairest and ripest ears, and such as have the smallest cob, and are best filled out at the ends; though the kernels near the end should never be reserved for seed.

Now is the time to improve your next crop. By pure seed, and by selecting the earliest or the ripest, you may bring forward your succeeding crops 10, 15 or 20 days earlier, and thus enable you to improve your late sowing.

Nor need the improvement stop here. By for selecting your seed-corn from your field, taking the ripest ears, (at different stages of the rain corn, and beginning early in Sept.) and from the most thrifty stalks, you may bring forward your next crop still earlier. And moreover if you select this seed from such stalks only,

FARMER'S CALENDAR.

produce two or more ears, you may by adhering to this practice, double or even treble your quantity of corn upon the same grounds, with only the same tillage.

Now picking winter apples, carting corn, throwing up gardens into ridges, digging potatoes, &c. &c. keep all hands busy by day; while husking, eating baked puddings, applepies, &c. and telling a merry tale, or singing a humorous song, make a long evening speed swiftly and pleasantly away.

Industry may now relax a little from her annual toils and look around her on her comforts and enjoyments, with a brightening countenance, while the warm aspirations of gratitude issuing from her heart ascend to the Giver of all Good, from whom those comforts and enjoyments are all derived.

Securely house your carts harrows ploughs and all the implements of the summer's labours. Improve the first spell of sledding to renew your stock of wood. See that your fences be in good repair, to prevent the cattle, &c. from injuring your crops of winter grain, meadows, &c. in case of an open winter. Hogs for home use may now be killed as it is the best time for making good bacon.

Feed not only your cattle but also the houseless foodless child of want: so will the prayers of the poor call down blessings on you and yours.

TIDE TABLE for the American Coast.

The times in the above Table are to be added to or subtracted from the time of high water at Halifax, according to the directions there given. Example—To find the time of highwater at Quebec May 1 1823. The time of highwater at Halifax May 1 by the Almanack is 0h 4m. To this add 30m (the time set against Quebec in the Table) and you have the time of high water at Quebec 0h 34m.

Eclipses for 1823.

There will be Six Eclipses this year; four of the SUN, and two of the MOON, in the manner following:—

I. The first will be of the Sun, January 12th day, 4h 42m in the morning; of course invisible here.

II. The second will be of the Moon, January 26th day, 0h 59m in the evening; of course invisible here.

III. The third will be of the Sun, February 10th day, 10h 52m in the evening; consequently invisible to us.

IV. The fourth will be of the Sun, July 8th day, 2h 28m in the morning; of course invisible to us.

V. The fifth will be of the Moon, beginning on the 22d and ending on the 23d of July, visible and total as follows:

Beginning	9h 18m	Appar. time even.
Middle	14h 14	
End	1h 10	Appar. time morn.
Duration	3h 52	

Digits eclipsed, 18° 11' on the Moon's Southern Limb.

VI. The sixth will be of the Sun, August 6th day, 9h 41m in the morning, but invisible to us.—Moon's lat. 1° 24' South.

Where there is no difficulty, there can be no just claim to praise, Poverty is more to be dreaded than riches are to be desired.

Time of going through the Falls.

THE Falls are level (or still water) about three hours and an half on the Flood and about two hours and an half on the ebb, which makes it passable four times in 24 hours about 10 or 15 minutes each time.—No other rule can be given, as much depends on the floods in the River St. John and the time of high water or full sea, which is often hastened by winds, and in proportion to the height of them.

TO TRAVELLERS.

For the information of Travellers between Windsor and Parrsborough &c.

THE Parrsborough Packet sails regularly between Windsor and Parrsborough every week, from the 1st April to Christmas, viz.—leaves Parrsborough on Monday, wind and weather permitting so as to be at Windsor on Tuesday; and will sail from thence the first high water that happens after eight o'clock in the morning of that day; the Packet frequently sails twice or three times a week when business requires it.

The Praise of Potatoes.

Hail rare Potatoes! hot or cold all hail!
O quickly come mine appetites delight!
Whether in ovens fiery concave closed
By Bakers art, delicious thou'rt embrown'd
While rills of purple gravy from the pores
Of mighty beef improve the luscious fare.
Whether the dame of culinary skill
Have rudely scalp'd thee o'er, and to the rage
Of warring elements consign'd thee deep
Beneath the cope of air excluding lid
In humid durance plung'd; or when with steaks
Of marbled vein, from rump of stall fed steer
Disparted late—sliced in the shallow pan
I view thee kindly stew'd how joys my heart!
How flash with eager glance my longing eyes!
Or in the tedious eve when nipping frost
Reigns Potent; mid the smouldring embers roast
(From sulterranean store selected) those
Of amplest size rotund, of native coal.
Yet unbereft; and if my homely board
Penurious, add but few salubrious grains
Of humble salt, I bless the cheap repast.
