Dear Customer:

There is nothing quite so satisfying as a well planned, vigorous growing productive flower or vegetable garden. The seeds that you plant have a lot to do with your garden success. This is why so many people are so partial to DIAMOND QUALITY seeds. They produce bountiful crops.

In sending you this our 40th Annual Catalog, we do so with the wish that you will again select the seed and plan your garden from its pages. This year you will find prices lower, many 5c packets, which we know will be good news to our thousands of customers. We have added many seed dealers to our list so that perhaps your local dealer will have DIAMOND QUALITY seeds displayed as shown on our back cover. His seeds are fresh, his prices are right. Of course if he hasn't DIAMOND QUALITY seeds, we will be glad to have you send your list direct to us as you have in the past. We will do our part by filling your order the same day it is received. Send Money Order if possible. Application blanks and envelopes enclosed for your convenience.

Yours truly,
PORTLAND SEED COMPANY

"BETTER BE SAFE THAN SORRY" is a thought that should govern you in selecting your seeds for your 1933 plantings.

Your investment in land, preparing seed bed, fertilizer and later cultivation is large in comparison to your seed cost, therefore, plant only seeds that your past experience has proven to be satisfactory.

Here are some of the reasons why we think you should continue planting Diamond Quality seeds.

They are selected from crops grown from parent stocks of proven pure bred quality.

These crops are grown under ideal conditions for producing hardy, vigorous growing seed.

Men with many years of practical experience "who know their stuff" watch the growth and "rogue" out every plant that shows the least "off color." When the harvest time comes none but pure stock seeds are left for the harvester.

They are then sent through our modern cleaning plant with the result that your Diamond Quality seeds will come to you with an assurance back of them that they will produce a bountiful crop for you if other conditions are favorable.

PORTLAND SEED COMPANY'S GUARANTEE

Diamond Quality Seeds, bulbs and nursery stocks are guaranteed as to vitality and purity, but we give no warranty, expressed or implied, as to description or productiveness, neither will we be held responsible for the crop nor liable for more than the amount paid us for the seeds, bulbs or nursery stock should they fail to grow, we to replace or refund at our option.

After plants are well up, thin to 4 or 5 inches apart, draw soil around them until trench is filled above the level. This gives depth to the roots, preserving moisture. Keep ground well worked and water if needed, an occasional thorough soaking being better than a daily sprinkling. Keep flowers cut close. Pruning tips of vines will aid in prolonging the season of bloom and insure better flowers.

Dated fresh each year. The original soil inoculator.

BENEFITS OF INOCULATION. All legumes form a partnership at the roots with certain kinds of helpful bacteria called Legume Germs that are able to pump or draw nitrogen from the air and give it to the plant. They form on the roots in colonies looking like lumps, called nodules, which are really nitrogen storehouses. Without these germs, legumes would rob the soil for nourishment and have a sickly growth, for few soils contain a natural supply. It is therefore necessary to "inoculate", apply these nitrogen-gathering germs directly to the seed. All agricultural authorities advise this.

You cannot afford NOT to inoculate.

A NEW POLICY

We have arranged to display Diamond Quality seeds put up in 5c and 10c packets in nearly every local store in Oregon and Washington.

If your local merchant has this display of Diamond Quality seeds, we invite you to make your selections from his seed case.

You will find the same fresh seeds in this case as we send out to our mail order customers. Each year these cases are returned to us and all old seeds removed and destroyed so that your local store will always have fresh Diamond Quality seeds.

If your local store does not have Diamond Quality seeds displayed take no chances on other seeds but send us your mail order and we will give you quick satisfactory service.

WHAT IS HOME WITHOUT A GARDEN?

THE MAN WITH THE HOE SAYS—A ROW EACH OF CARROTS, BEETS, SPINACH AND RADISHES WILL PROVIDE FRESH VEGETABLES FOR THE TABLE AT LITTLE COST.

To sow small flower seeds, mix them with sand, saves much thinning.

When fall rains begin, sow wild flower seeds and poppies.

Spade in plenty of Diamond Quality sheep manure. It will repay you with fine flowers.

To prolong the blooming season cut sweet peas every day. Do not allow any pods to form.

For your green onions plant sets early thick in the row.

Do not burn the garden refuse. Bury it or spade it in for humus.

Renovate the lawn in the fall after the first rains, rake thoroughly, reseed and mulch with sheep guano.

Snails are very fond of young green plants, poison them with Snarol.

Plant a few freesias in pots in the fall for porch plants.

Spray peaches, prunes, plums with lime sulphur in December and February for curl leaf and fungus.

Know your planting seasons and ascertain the condition of your soil.

Good garden soil must contain plenty of humus to get best results.
