Read the Following Carefully

HOW TO ORDER Be sure to sign your name, Post-office, County and State, and if possible, use one of our order sheets and envelopes. Cash must accompany all orders, and money should be sent by Post-office order, Bank draft, Express order or Registered letter; small amounts will be accepted in postage stamps, providing you cannot send anything else. Do not send money loose in a letter without registering. It is not safe and, if lost, we are not responsible for it. Silver coin should be sewed or pasted in cloth or pasteboard to prevent its breaking through the envelope.

FREE BY MAIL We pay the postage on all orders sent by mail, at the prices named in the catalog. This brings them to the door of our customers, without trouble or expense.

EXPRESS AND FREIGHT On articles ordered sent by Express or Freight, the transportation charges must be paid by the customer, on receipt of the goods; when ordering always say whether goods shall be sent by Express or Freight and give plain shipping directions. Seeds are carried by express companies at 20% less than merchandise. When seeds catalogued at postpaid prices are sent with an express or freight shipment, we deduct the postage, which will reduce the cost of packets 1c; oz. 1c; ½ lb. 4c; lb. 8c; pts. 8c; qts. 15c.

TESTED SEEDS All our seed is thoroughly tested and nothing sent out which we do not believe to be of good quality.

OUR GUARANTEE We guarantee that all seeds and other goods sent out by us will be fresh and of good quality, and if, upon arrival, they are not satisfactory, they are to be returned to us at once. We cannot guarantee crops and will not be held responsible for them or for any liability except as stated in this paragraph.

TO SEED BUYERS EVERYWHERE:

A Personal Statement:—Ten years ago I started the Zimmerman Seed Company in one room of the house where I lived. The business has shown a steady growth until today I occupy two entire floors at 623-25 Quincy Street in the heart of the business district of the Capital City of Kansas

I believe I have the largest mail-order seed house selling direct to planters in the entire West. Every year I have had the pleasure of adding thousands and thousands of customers to my list. Last year was the best year of our history, and I hope to make a still better record this year.

This business has been built up on the square deal principle—a dollar's worth of tested and guaranteed seed for every dollar we receive. I have never dealt in high-sounding "novelties" of any description, believing that in the end RIGHT DEALINGS and seed of true merit will be appreciated. I believe I hold a greater per cent of customers from one year to another than any other seedman, and I believe my records prove it.

Since I started this business I have made many radical departures from the path taken by the seed tradé generally, and this year sees another change.

I have decided to get away from the expensive catalogue, which benefits no one except the printer, and issue a plain, common-sense book, which I want you to read from cover to cover. Instead of devoting a large amount of space to old and well-known varieties, I have simply listed them with prices and you can find what you want in a moment's time. The DIFFERENCE in the cost of the catalogues I propose to give to YOU by paying the cost of the money order that you use in making remittance.

I have also eliminated the field seed from this book, and you will find them described and priced on a separate circular which we enclose herewith.

My one endeavor has been to make this a plain, honest book—free from flashy-colored pictures and exaggerated descriptions of impossible vegetables.

I ask your orders for 1912 on the promise of the BEST QUALITY of goods at the LOWEST POSSIBLE prices. I intend to give each order as nearly as possible my personal attention, and will see that you are perfectly satisfied. I also promise that each and every order, whether for five cents or five hundred dollars, will get the same prompt and careful attention.

I will appreciate your business, whether your orders are large or small, and I will be glad to give you any special information or answer any questions you may desire to ask me that in any way relate to the seed business. It will be a pleasure to me to be of help to you in any way.

Yours sincerely,

J. S. Zimmerman.

ZIMMERMAN'S EARLY-BIRD COLLECTION

7 PACKETS FOR 25c, POSTPAID

My early-bird collection, comprising as it does 7 of the earliest vegetables, has proven the best feature of my catalogue. I have made it a rule to change the varieties as new ones of special merit suggests an improvement. Each and every one of the varieties have been selected with the best of care as to earliness and quality. I am especially desirous that you try this collection this year. I will send 7 packets to your address postpaid for only 25c.

ZIMMERMAN'S STRINGLESS WAX BEANS

These are the best of all wax beans. The pods are round and absolutely stringless, very tender and of fine flavor. While the seed of this bean costs me more than any other, I have made the price low and as a special inducement have placed it in the Early-Bird Collection. Pkt. 5c; ½ pt. 15c; pt. 25c; qt. 40c; postpaid. By express or freight, 4 qts. 80c; pk. \$1.50.

EARLY JEWEL BEET

I offered the earliest Jewel Beet for the first time last season and it more than came up to my expectation. The trouble with most early beets is their small size and pale color. This is entirely overcome in my "Early Jewel." While it comes with the very earliest, it is also of fine size, rich dark blood color and the flavor is all that could be desired, being crisp, tender and very sweet. Pkt. 10c; oz. 15c; ¼ lb. 45c; ½ lb. 60c; postpaid.

EARLY MAMMOTH SWEET CORN

This is the earliest extra large sweet corn on the market. Produces fine ears 8 to 10 inches long and ready for the market. The earliest of the early offered by the majority of seedmen. I have had this for a leader for a good many years and have found nothing to equal it in the early market. I know you will be pleased with it. Pkt. 5c; ½ pt. 15c; pt. 25c; qt. 45c; postpaid. By express or freight, pk. \$1.50.

EARLY PERFECTION CUCUMBER

The extreme earliness and great productiveness of this cucumber makes it one of the best varieties ever offered. The vines are of vigorous growth and produce their fine fruit in great abundance. They grow from 3 to 6 inches and are equally good for pickling or slicing. Pkt. 5c; oz. 12c; ¼ lb. 40c; ½ lb. 70c; lb. \$1.25; postpaid.

NEW EARLY CRISP LETTUCE

I consider this one of the best varieties in this list, and offered it the first time last year. What other vegetable can fill the place of a good early lettuce, and this one is the **Earliest of the Early**; the most **DELICIOUS OF DELICIOUS**, and one of the best all-season varieties ever offered. Pkt. 5c; ¼ lb. 50c; ½ lb. 80c; 1 lb. \$1.50; postpaid.

NEW EARLY GIANT RADISH

I offered this radish for the first time last season. It is almost as early as the earliest and twice the size, but notwithstanding its large size it never gets strong or pithy. In fact, I believe it to be the best radish on the market. It is round turnip-shaped and grows from 6 to 8 inches in circumference. Skin a rich crimson, flesh pure white and never **HOLLOW OR PITHY**. Pkt. 5c; oz. 10c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 75c; postpaid.

CRIMSON BALL TOMATO

This is the first season I have offered this tomato in my catalogue. I secured the seed too late for the catalogue last season, and as I only had a light stock, offered it on a special circular. If you were fortunate enough to have secured some of the seed last year you know what it is. If you did not, I want you to get it this year. It is a very light seeder, and grows perfectly round, smooth as an apple, a crimson color, and hence it was named **Crimson Ball**. Pkt. 10c; ½ oz. 20c; 1 oz. 40c; ¼ lb. \$1.40; postpaid.

I will allow you a Special Discount of 10 Per Cent

If you will send me your order AT ONCE. It must be mailed to me on or before January 15, 1912. After that date this offer is cancelled.

Why not sit down right now and make out your order and **save 10 per cent.**

J. S. Zimmerman.

Zimmerman's Best Musk Melon.

Zimmerman's Genuine Rocky Ford—My Rocky Ford seed is planted in every state and territory where melons can be grown, and have never received a single complaint. Leading market gardeners send to me every year for seed of this variety rather than save their own seed, because they know that my seed, saved from carefully selected melons of uniform size, will produce the very finest melons. The seed I offer is selected from choice melons only and I guarantee it to have been grown at Rocky Ford, Colo. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. 90c; postpaid.

I have here a seed corn which is the purest and finest in the world. This is a strong statement, but the facts merit the statement. The original seed from which my "Grand Champion" seed was grown was shown in the world's contest at the National Corn Exposition, Omaha, Neb., was awarded the first prize and was purchased after the show by Mr. Arthur Capper, the Topeka publisher, for \$280.

My grower secured some of the seed from Mr. Capper and the seed I offer was grown from this stock, and you will find it the equal of the original bushel, which brought perhaps the highest price ever paid for a bushel of seed corn. It was grown for me by Mr. Cochran under a special contract.

The corn is a large pure white, deep grain; matures in less than 100 days and is an extra heavy yielder. If you want a seed corn of the finest possible type, do not fail to order some of this seed. Herewith you will find a statement from Mr. Capper, verifying the price paid for the seed. Also one from Mr. Cochran.

Price of this extra selected seed, tipped, butted and graded, is as follows: Pkt. 10c; pt. 25c; qt. 40c; postpaid. By express or freight, peck \$1.00; ½ bu. \$1.90; bu. \$3.75; two or more bushels at \$3.50 per bu.

want. A load of this corn is always attractive and brings top prices on the market. Pkt. 5c; pt. 15c; qt. 25c; postpaid. By express or freight, selected, tipped, and graded, pk. 60c; $\frac{1}{2}$ bu. \$1.05; bu. \$2.00; four or more bushels at \$1.80 per bu.

Improved Reid's Yellow Dent—You will find my improved strain larger and heavier than the old ordinary, and it is equally as early, ears from 8 to 11 inches in length and filled with deep yellow grains, and it is a fine producer. Pkt. 5c; pt. 15c; qt. 25c; postpaid. By express or freight, selected, tipped and graded, pk. 60c; $\frac{1}{2}$ bu. \$1.05; bu. \$2.00; 4 or more bushels at \$1.80 per bu.

Improved Leaming—This is one of the earliest yellow dent corns in cultivation, ripening in 90 to 100 days from planting. The ears are large and handsome, with deep, large grains; orange yellow color and red cob. Stalks produce two good ears each, which husk and shell very early. Pkt. 5c; pt. 15c; qt. 25c; postpaid. By express or freight, selected, tipped and graded, pk. 60c; $\frac{1}{2}$ bu. \$1.05; bu. \$2.00; 4 or more bushels at \$1.80 per bu.

Zimmerman's 80-Day Corn—Early as the Pride of the North, but much larger eared and will yield with Reid's Yellow Dent, and other late varieties. I have been selling this corn the last few years all over the country and I have never received a single complaint. I planted this corn myself and harvested corn fully matured in less than 85 days. If you want early feed you will find this corn most valuable. Ears run 8 to 10 inches in length, kernels of medium size, a rich yellow color and fill the cob to the very tip. It is not a big corn, but is perfectly reliable. Pkt. 5c; pt. 15c; qt. 25c; postpaid. By express or freight, $\frac{1}{2}$ pk. 50c; pk. 90c; $\frac{1}{2}$ bu. \$1.30; bu. \$2.50. Four or more bu. at \$2.25 per bu.

Zimmerman's Perfected Golden Beauty—My Perfected Golden Beauty produces larger and heavier ears than the old Early strain. Ears that run from 10 to 14 inches in length and filled to the very tip with big, solid grains. My Perfected Golden Beauty is just what you

Seed Corn—Continued

Boone County White.

Premium Strain Boone County White.

Boone County White—My strain of this favorite corn is furnished me by one of the very best seed corn growers in Kansas. This corn has never been defeated in a contest the last few years. It was awarded first prize at the State Fair of Topeka; first at Manhattan, Kan., in state contest; awarded diploma in National contest, Columbus, O. Other prizes too numerous to mention. The seed I offer is pure and sack after sack will show the same uniformity of kernels, the same color of grain. Boone County White is a well known standard variety which runs 12 to 18 inches in length. This corn is also grown for me by Mr. H. B. Cochran, the grower of the Johnson County White, above mentioned. Pkt. 5c; pt. 15c; qt. 25c; postpaid. By express or freight, selected, tipped and graded, $\frac{1}{2}$ pk. 40c; pk. 60c; $\frac{1}{2}$ bu. \$1.05; bu. \$2.00; four or more bushels at \$1.90 per bu.

Silver Mine—One of the very earliest White Corns. It is a heavy yielder, producing ears of good size, containing 16 to 20 rows of deep, white grains. Pkt. 5c; pt. 15c; qt. 25c; postpaid. By express or freight, $\frac{1}{2}$ pk. 40c; pk. 60c; $\frac{1}{2}$ bu. \$1.05; bu. \$2.00. Four or more bus. \$1.75 per bu.

VEILCHENBLAU OR BLUE ROSE.

15c each; postpaid.

(Violet-blue seedling from Crimson Rambler.)

After years of effort rosarians have been rewarded by the production of a blue rose, which will be welcomed with the greatest interest by all lovers of the garden. This new climbing rose surpasses all others of recent introduction in having a pure blue color. The flowers appear in large clusters, after the manner of the Crimson Rambler, and semi-double and of medium size. Upon first opening, the color is partly bright red and partly bright rose, turning soon to a steel blue. The color is best described by saying that it resembles the color of early violets. This variety is a strong grower, has shining green foliage and few thorns. Be the first in your neighborhood to show this grand new novelty.

"FLOWER OF FAIRFIELD," THE EVERBLOOMING CRIMSON RAMBLER.

For many years past it has been the endeavor of every rose grower to produce a climbing variety that would be of perpetual flowering habit. The many beautiful varieties of Rambler Roses were valuable acquisitions, but none of them could be called perpetual or everblooming, they producing only one crop of flowers during the season. It is a sport from the famous Crimson Rambler; it is of the same color if not a shade more brilliant, and has better resisting power to the sun. Flower of Fairfield blooms very profusely on young wood the first year after planting. It is very effective for covering walls, trellises or arches, and is equally attractive for table decoration or other use as cut flowers.

BABY RAMBLER—The everblooming Dwarf Crimson Rambler, in bloom continuously. This rose begins to bloom when very small, forming clusters of flowers as large as the Crimson Rambler. It is a brilliant red, of bushy habit, compact growth, forming plants 1½ ft. high in a 6-inch pot. This rose bids fair to be the most popular for bedding, for it will bloom all summer.

The following varieties are valued for training over arbors, trellises and verandas, etc. Price 12c each; 3 for 30c; postpaid.

Crimson Rambler—This is a splendid rose, and another year's trial proves that it is perfectly hardy, making shoots 10 to 12 ft. in a season. Produces 25 to 30 flowers in cluster, entirely covering the plant from the ground to the top with a mass of bright, glowing crimson. It has been very largely advertised and is very popular.

The White Rambler—Pure white, small double flowers. It is a fitting companion for

the Pink Rambler, closely resembling it in foliage as well as in the great cluster of pure white flowers.

Dorothy Perkins—A grand new sort remarkably like Crimson Rambler, but the flowers are more double and of a beautiful shell pink color. Very hardy.
