## 1943

## THE

AIKEN NURSERIES

PUTNEY，VERMONT

# These Two Pages Are Important To You! 

## Your 1943 Catalog

This is your catalog. These nurseries exist only to grow the plants you want in your gardens. Because plants grow slowly we have to guess what you will be wanting in from two to ten years. If we fail to guess right. we appreciate being told. Since we work with plants all the time, we can often help you with advice as to varieties and suggestions regarding culture. We are always glad to receive and answer your letters. but please, in these days when labor, materials and tools are nearly non-existent, try to ask the hard questions and the involved ones before or after rush periods.

If you know of friends who might enjoy a copy of the catalog, will you send us their names and addresses? You'll be helping them, us and yourself, for the more we sell the lower we can set the prices.

Specialties this year, in addition to our well-known native Wildflowers and Ferns, are Fruit Trees, Berry Plants and Herbs. There is also a good buy in Roses listed at the back of the catalog.

A new feature of the catalog is the convenient price chart on page 3 . which tells the cost of two or more at a glance.

With a few evident exceptions, plants are listed alphabetically by their Latin names under the various headings.

Remember our slogan:
"Grown in Vermont, It's Hardy"

## $10 \%$ DISCOUNT UNTIL MARCH 18

In order to avoid delay and confusion at the peak of the Spring planting season, we are offering you our usual incentive to send your orders early. On all orders received after this catalog is mailed and before March 18th, a discount of $10 \%$ will be given. Payment must be included with orders.
TRANSPORTATION: The customer pays all transportation charese from Putney. We pack the plants and deliver them to the local Post Office or Fixpress Station without charge. They are sent by parcel post or railway express. whichever is (1) quicker and (2) more economical, unless you expressly indicate your preference. If parcel post shipment C. O. D. for postage only would not be convenient for you. please ask us to prepay shipment. We will bill you for the amount of the postage.

PLANTING AND WATERING: Please unwrap the plants as soon as they arrive. Set them out at once or, for second best, heel them in. Fruit trees and dormant slarubs may be left in ordinary cellar storage for a few days if roots are kept moist in the facking material. Never wet the tons of strawberry plants; it rots the crowns. When the ground is dry during the first season, water thoroughly twice a week. "Sprinkling" does more harm than good.

GUARANTEE: All stock is guaranteed true to name and free from disease. Certificate of inspection accompanies each shipment. Since we have no control over transportation facilities, planting or care of stock after it leaves our hands. we make no guarantee as to growth. but-

CLAIMS: If any stock reaches you in unsatisfactory or danaged condition, slease notify us at once. We must insist that this be done within 5 days of receipt of goods. Should you receise a shipment damaged in transportation. BE SURE to secure the bad order receipt from the carrier's agent before accepting delivery. This will substantiate the claim for damages you make to the carrier. Dried out plants can often be saved by an over-night soaking in a pail of water.

HOW TO SAVE MONEY: The following Price Chart shows how. If you are ordering more than one of the SAME VARIETY of plant to be sent to one address, you are entitled to a sasing. If, for example, you are ordering 9 plants of Ajuga reptans, which is listed at 35 c each. find that price in the left-hand vertical column and follow it across to the " 9 " column where you find $\$ 2.25$ to be the price of the plants.

For quantities of 13 through 25 , the 25 rate applies. Example: Suppose 20 plants of Ajuga reptans to be ordered. Find the price of 25 plants as above. Divide this price by 25 and multiply by 20. $\$ 6.00 \div 25=\$ 0.24 ; \$ 0.24 \times 20=\$ 4.80$, which is the price to pay.)

Twenty-six or more ylants of the same rariety take the 100 rate.

PRICE CHART

| Quantity of plants of same variety and size |  |  |  |  |  |  |  |  |  |  |  |  |  |

CARAWAY, Carum curvi. Seeds used to flawor hread. pastry. dieese, sauces, etc.

Read some of the many good herb books at your mublic library. We especially like Helen Morgenthan Fur" "Gardening with Herbs."

## IRIS CRISTATA

## AMERICAN WILDFLOWERS

CLAIBERING MONKSHOOD, Acanitum Uncinatnm. Slate blue. July. Partial shade in rich garden soil. $5-7 \mathrm{lt}$.

SWEETFLAG, Acarns Culamas. Brownisly yellowv. Rhizome very framrant commonly used for making c.andy.

WHITE BANEBERRY' or DOLL'S EYES, Actapa Alba. Crem-white feathery flowers in May followed hy show-white clnsters of glossy berries each tipped with a dot of black. Dense or light shade in rich leaf mold.

RED BANEBERRY, Ictaea Rubra. Fluffy white flower heads in May. Intense red clusters of berrie, in July and . Iugust. Shade and leaf mold.
WINIFFLOWER, Auemane Ouinquefolia. Tiny white fairy drinking cups in Nay. Partial shade. Wood soil with leaf mold. Four to seven inches. These completely disappear after flowering so be careful not to disturb their bed.
RUE ANEMONE, Anemumella Thalictraides. lacy dark green foliage. White flowers on airy steml in Nay not unlike strawberry blossoms. Partial shade. Rich wood soil. 4-7 in.
AMERICAN COLUMBINE, Aquilegia Canadensis. Bell-shaped long-spurred flowers in May and lune. Bright red outside and clear yellow within. Filled. with nectar beloved of the hamming birds and bumblebees. Sumny or shady rock cliffs or wild garden. Any good soil. I-2 It.
SANDWORT, Arenaria Stricta, I rate Sandwont with a fountain of myriad white, starry flowers for sumy oraks and cliffs. May into July.
GREEN IDRAGON, Arisaemu Dracontiam. Inique. I little latet flowering than Jack-in-the I'ulpit. If you have Jack you should have a Green Dragon to guand him.
IACK-IN-THE-PULPIT, Arisama Triphyllum. Remembered by all who have spent their dhildhond in Vermont. Moist woodsy soil in partial shade. Brown ereen-striped hooded flowers in May followed by tight clusters of red berries in late Summer. 12 -18 in.
COMMON GOATSBEARD, Aruncus Sylvester. Creamy, white downy spikes spraying down over the lithe green foliage. July. Quite dense shade. Heavy wood soil. $3-4$ It.
WILI GINGER, GINGER ROOT, Asarum Canadeuse. lleart shaped fuzzy gray-green leaves. Tiny deep maroon three-petaled flowers resting un the ground in late . Ipril and May. Partial shade. Rich wood soil. $3-41 \mathrm{t}$.
SWAMP MILKWEED, Asclepias Iucarmata. Deep rosy red flower lieads on three- to five-foot stalks. Late June and July. Sun or only light shade. Noist loamy soil or bogs.
BUTTERFLYWEED, Asclepias Tuberasa. Flower heads of lemon yellow varying to dark flame. July and August. Full sun. Good garden soil. Well drained sitnation. From the time this flower starts to bloom it is a host to myriads of gaily marked b-itterflies.

Prices on Wildflowers except as noted, are 35 c each.
See Price Chart on page 3 if you are ordering more than one plant of a variety.

IIEATH ASTER, Aster Ericoides. Sprays of misty white as beautiful as Gypsophila. September and October. Full sun. Dry soil. 2-3 ft.
NEW ENGLAND ASTER, Aster Novae-Augliae. Deep blue flowers on four- to six-foot stalks. Florets an inch across. September. Full sun. Rich garden soil. For backgrounds of the garden, open sunny glades or borders of the woodland or shrubbery.
PINK NEW ENGLAND ASTER, Aster NovaeAngliae Rosea. Like the above except that the flowers are rose color. It is not so tall a grower.
WILD CALLA, Calla Palustris. Waxy white flowers in June like the old fashioned indoor Calla Lily only smaller. Five to nine inches. Cardinal red fruit follows the blossoms. For the shady bog or border of your pool.
MARSH MARIGOLD, Caltha Palustris. A dash of gold for your sunny bog. Brilliant yellow wide open flowers in May and early June. Rich glossy green leaves. Easy as grass to grow and very hardy.
WILD HYACINTH, Camassia Esculenta. The Camassias are excellent for mass planting in moist or semi-shady locations. The bulbs were a favorite food of the Indians. The plants grow to about two feet in height and the flowers vary from cream to blue.

## BLUE WILD HYACINTH, Camassia Leicholini.

This is a taller growing, rare variety, usually in deep blue. The Camassias blossom in May with us.

## BLUEBELLS OF SCOTLAND, Campanula Ro-

 turdifolia. No flower has more grace than this one as it clings, dancing in the breeze on a dry cliff. The small blue bells are borne on delicate stems nine to twelve inches high. Blooms from June until frost, preferring fairly rich dry soil and full sun or very light slade.WILD SENNA, Cassia Marilandica. Clusters of clear yellow flowers with small black stamens borne on stalks often five feet high. Prefers full sun, but will grow in either dry or wet soil. July and August. The individual flowers are not unlike those of the Canary bird. vine and are beautiful in a bouquet with white phlox.
BLUE COHOSH, Caulophyllnm Thalictroides. A native of the rich woods, making an attractive plant two feet high. The small, yellow flowers with purple sepals are attractive in early Spring and are followed in late Summer by clusters of intensely blue berries.
TURTLEHEAD, Chelane Glabra. White spikes on two-foot stems similar to Physostegia except for larger individual flowers. Easily naturalized in rich soil around the garden pool. September.
SPOTTED PIPSISSEWA, Chimaphila Macnlata. A splendid ground cover with notched green leaves mottled cream. Dainty bell-shaped flowers on sixinch stems in June. Prefers a dry situation, acid soil, and thus the shade of fir or oak trees.
PIPSISSEWA, Chimaphila Umbellata. Like the above except that the leaves are plain, smooth green -like Japanese lacquer.

## CREEPING SNOWBERRY, Chiagenes Hispidxla.

I trailing vine demanding pure leaf mold and dense shade. White berries lasting throughout the Summer. The leaves are glossy green, small and round. Potted plants.

BLACK COHOSH, Cimicifuga Racemosa. Thrives in rich soil and rather dense shade. Grows to five feet with fluffy white spikes of flowers beginning in July.
SPRINGBEAUTY, Claytonia Virginica. A most -delicate early Spring wildflower, white with pink markings. Easily grown in partial shade and leal mold from the hard woods. After blossoming. this four- to six-inch plant disappears througli the Summer.
BLUEBEADS, Clintonia Borealis. Broad, shiny;, green Ladyslipper-like leaves. The prinırose yellow flowers similar to those of the Shootingstar cummence the last of May. Three blue beads are found on the top of the flower stem in September. Acid soil. Quite dense shade.
SPECKLED CLINTONIA, Clintonia Umbellulata. Slightly acid soil. Partial shade. This Clintonia has three leaves, while the former has only two. Loose clusters of very lovely white flowers in July. Black berries in late Summer.
GOLDTHREAD, Coptis Trifalia. A creeper preferring very moist acid soil and light shade. The name Goldthread aptly describes the root which has medicinal qualities. The plants have a delicate. tiny, white, sharp petaled blossom in Midsummer. A lover of sour leaf mold.
BUNCHBERRY, Carnus Canadensis: An outstanding ground cover. Ideal for use in repairing hurricane devastation in soft woods.
PALE CORYDALIS, Corydalis Glanca. Finely cut blue-green foliage. Minute sprays of pink flowers with yellow centers, shaped like bleeding heart. May and June. Twelve to eighteen inches. Full sun. Rich dry soil. A biennial resowing itself.
SMIALL YELLOW LADYSLIPPER, Cypripedism Parvifarsm. Small bright yellow flowers.
YELLOW LADYSLIPPER, Cypripediam Pubescens. The common yellow Ladyslipper blossoming in May. Most easily domesticated in either sun or shade. Clear yellow slippers with brown ribbons and very fragrant. $12-18$ in. 40 e each.
SHOWY LADYSLIPPER, Cypripedium Spectabile. Not so hard to grow after all. We have seen it thriving under an old pear tree in ordinary garden soil. Lovely eggshel! white flowers flushed with rose. 50 e each.
CREEPING DALIBARDA, Dalibarda Repens. Good ground cover in acid soil and partial shade. White flowers shaped a little like Woodsorrel. June and July.
ROCK LARKSPUR, Delphinium Tricorne. Deep blue flowers about the color of Spark's Aconitc. Twelve to eighteen inches. Early June. Prefers a dry, sunny rock garden situation. Becomes dormant in NIidsummer.
SQUIRREL CORN, Dicentra Canadensis. The low growing Dicentras are all excellent subjects for the sliady wild garden. They prefer a rock pocket filled with leaf mold. Appealing feathery foliage. This one las white drooping flowers sometimes flushed pink. April and May, 6-9 in.
DUTCHMAN'S•BREECHES, Jirentra Cucullaria. Pale yellow drooping flowers tipped deeper yellow in the center. April and May. 6-9 in.

Prices on Wildflowers except as noted, are 35c each.
See Price Chart on page 3 if you are ordering more than one plant of a variety.

TRAILING ARBUTUS

TRAILING ARBUTUS, Epigaea Repeas. Deliciously fragrant pink and white flowers. Sumewhat shy and elusive, but not too difficult to frow if you have our compact little plants each dug with a ball of earth and wrapped in burlap. 60e eaeh.

I-IREWEEI), Epilobinm Augnstifoliunt. Giay spikes of pastel pink on two-foot stems in June and Tuly. Full sum. Dry soil. The separate florets are a bit like those of Cassia.
WHITE TROUTLILY, Eryshrouium Albidum. A suow-white drooping flower.
COMMON TROUTLILY, Erythronium Americauma. TYpical of the New Fneland woods. Bright yellow flowers, an inch across.
GLACIERLILY, Erythroaiua Grandiflornm. Forsythia yellow throughout. I'lain leaves.
HENDERSON TROUTLILY, Erythroninm Headersoni. Velvet wine color on the reflex part of the petals, large white center, and a deeper wine eye.
THOROUGHWORT, Enpatorinu Perfoliatum. Flat dusky white flower heads on four-foot stems. Full sun. Swamp location. Thoroughwert tea made from the leaves of this plant was famous as an herb tonic when our mrandmothers were children. Late Iuly through September.

JOE-PYEWEED, Eupatorium Purpurem. Huge wine purple flower heads on four- to five-foot stems in late July through September. Full sun. Swamps and brooksides. Especially fond of this wildflower are the butterflies, particularly the Monarchs.
SNOW THOROUGHWORT, Eupatorium Urticaefoliun. Perhaps the most beautiful of the family. Rich moist soil, somewhat drier than for the other two. Partial shade. August and September. Two feet. The flower clusters are as white as swan's down and contrast well with the dark green notched leaves.
GALAX, Galax Aphylla. Lustrous leathery leaves. Ground cover. Saluable for use as foreground under broad-leaved evergreens. Acid soil. Native in the South, but perfectly hardy here.

## CHECKERBERRY - WINTERGREEN, Gaul-

 theria Procuabens. The thick glossy leaves on a creeping plant with white bell-like blossoms of waxy texture, sometimes tinged pink. . .cid soil. Excellent for growing in light shade under pine trees. Bright red berries in Nutumn.BLIND GENTIAN, Gentiana Andrewsi. Groups of vivid cobalt blue in late July and August. Light shade. Damp, moist soil. 12-18 in.
NARROW-LEAVED GENTIAN, Gentiaa Liaearis. Tubular flowers of lavender blue in clusters of five. Moist situation. Partial shade. July.
WILD GERANIUM, Gerawino Maculatnu. Deep lavender flowers an inch across in late May and June. Loves the shade of bushes around rail fences. $12-18$ in.

## Prices on Wildflowers except as noted, are 35c each.

See Price Chart on page 3 if you are ordering more than one plant of a variety.

MARSH MARIGOLD
HERB ROBERT, Geranium Robertianum. Minute pink blossoms on nine- to twelve-inch stalks. Partial to crevices of rich soil in the rocks. Of altogether dainty appearance. June until frost. No better subject for the shady wild garden.
HOWMANSROOT, Gillenia Trifaliata. Snowwhite flowers similar to the Canada Violet only larger on two- to three-foot stems. Good garden soil. Lends itself wonderfully to naturalizing in sunny locations. June.
RATTLESNAKE.PLANTAIN. Gaadyera rubes. cens. An interesting plant with oval green leaves motted white which grow close to the ground. Piney soil. Spikes of flowers like Ladies Tresses in July.

## CREEPING RATTLESNAKE - PLANTAIN,

 Gaadyero Repens var. Ophioides. Leaves smoother than the former and paler green. Both the Rattle-snake-plantains are pretty for dish gardens.YELLOW FRINGE-ORCHID, Habenario Ciliaris. In August, the orange-yellow flowers rise on one- to two-foot flower stalks from the wet meadows and bogs. 60e each.
LARGE PURPLE FRINGE-ORCHID, Habe naria Fimbriata. This seems to be our most desirable Orchid, due to its delightful fragrance and lavendar piak color. A native of the bogs. growing to he two feet tall. 40 c each.
SIIALL PURPLE FRINGE-ORCHID, Habenaria Psycades. Is somewhat smaller and earlier than the fimhriata, and with a most elusive fragrance. 40 e each.
SHARPLOBE IIEPATICA, Hepatica Acutilaba. Associated with maple sugaring time here in Vermont. Delicate flowers sometimes tinted blush, and pate blue on slender stems two to four inches high. lbowe last year's reddish-brown threc-hobed leaves these diminutive blossoms quiver in the Aprit wind. Veutral woodsy soil or leaf mold. Partial shade.

ROUNDLOBE HEPATICA, Hepatica Triluba. Leaves not so sharp as the ahove. Flowers brighet blue.
QUAKER LADHES, Haustoniu Cuerulea. Mimute four-petaled, pastel blue blossoms on thread-like stems. Awakened to life by the singing of the robins in April. More or less continuous bloomer. Naturalizes readily in short pasture grass. Full sun. Di.e. best in clay suit. 25e each.
GOLDENSEAL, Hydrastis Conadensis. Wide. wrinkled, thick leathery preen leaves five-parted. Belones in the shady nook of every herb garden for the yellow roots are used in medicine. Ricl. moist soil. Flowers in June made up of white stamens on stems about one foot ligh. Dark red berries in late Summer and Autumn.

THE IELLOW STARGRASS, Hypoxis Hirsuta. Tiny, round gleaming yellow flowers in very dwar! iris-like foliage. Fult sun. Wet or dry location. Commencing in late May the flowers often continue into August.
ELECAMPANE, Inula Helenium. Sunflower-lihe blossoms, one to two inches across during August and September. Long, broad, plush-like. gray-greels leaves. Two to four feet. Full sun. Ordinary snil. Dry or moist situation.
CRESTED IRIS, Iris Cristata, No early flowering plant is more desirable for the lightly shaded rack garden. Sky blue, flat blossoms cover the plant in May.

WHITE CRESTED IRIS, Iris Cristata Alba. Magnificent, smooth. white flowers tipped gold on the inner edges. Same culture as above. Four to sir inches. 50e each.
CUBESEED IRIS, Iris Prismatica. Slender alid comely. Grows one foot high in an ordinary garden situation. Taller under more moist conditions. Like sun. A beautiful blue in late Spring.
VERNAL IRIS, Iris Verua, Charmingly mondes? the orange crested shy blue flowers of the Iris Vern.t are most at home in the dry woods or in the shads rockery. It grows four inches tall.
BLUEFLAG, Iris Yersicalor. For sunny swamps or marsly spots. Rich light blue flowers. Two t. three feet high. June.
COLORADO SANDLHLY, Leucocrinum Montanum. I tiny blue litte plant whose fragraut waxy: white clusters are borne early in the Spring on stem: a few inches tall.
NHEABOW LILY, I.jlium Conadense. Native Lily: that prefers moist sandy location. Stalks thare to five feet tall yield un to fifteen dainty yellow or orange colored blossoms in July. Full sun, or only. lisht shade. Plant six inches deep.
WOOb LILY, Lilium Philadelphicum. Brillant native Lity useful for naturalizing or in the garde: Two to three feet tall with upright red or oranse flowers. July-August. Prefers acid ssil. Plant foitr incher deep.
TURKSCAP LILY, Lilium Superbum. Native Lily of easiest culture four to six feet tall with mans flowers of rich orange with recurved petals. 11 : summer. Plant six inches deep.

## Prices on Wildflowers except as noted, are 35 c each.

See Price Chart on page 3 if you are ordering more than one plant of a variety.

TWIN-FLOWER, Linnaea Americana. Potgrown. 'iwn dainty pink bells on slender stems abont three inches high. A charming creeper. I'ractically an all Summer bloomer. Prefers dense shade in the acid swil of pines and hemlocks.
IALY TWAYBLADE, Liparis Lilifolia. A yellow Howering orchid. Moist leaf mold. Partial shade. l.ate May and June.

IUCCOON, Lithospermum Canescens. Bright vellow flower gromp shaped like miniature Wiegela flowsoms. May and Jane. Fiull sun. Any good suil.
CARDINAL-FLOWER, Lobelia Cardinnlis. Twofoot pikes of intensely scarlet blossoms in Angust. Fors nituralizing along streams of pools.
LARGE BLUE LOBELIA, Lobelia Syphilitca. Two to three feet. Like the above eacept the flowers are larger and are heavenly blue. If you itse one Lobelia you shorld surely have the other. MONEYWORT, I.ysimachin Nummularia. Nu indispensable ground cover for either sun or shade. 1. beantiful hanging down over a gray wall. Tiny, cup-shaped yellow flower. For use on banks or mader trees when grass will not grow.
SWAMP CANDLE, Lysimachia Terrestris. The name Swamp Candle exactly describes this plant. The llowers are closer together and much nearer the thalh than are those of the Whorled Loosestrife. Nimnte greenish brown petals form a second star inside the larger yellow one. Jnly and August. Two to two and one-half incles. Excellent for sunny bog and marshes.
PURPLE LOOSESTRHFE, Lythram Salicarium Raseum. Perhaps our most conspicuous carly July diswer. Compact dark pithk racemes. Full sun. Slishtly moist common soil. Three to four feet.
CANADIAN MAYFLOWER or WH.D LHLY: OF•THE-VALLEY, Maianthemum Canadensis. A wee, fluffy, white flower cluster with a shiny, ovate leaf at its back. Loves to grow in rich wood soil at the foot of great trees. Partial shade. Late May. Three to four inches.
VIRGINIA BLUEBELL, Mertensia Virginica. Bells of rose pink or sky blue. light shade. One (1) iwo feet. Good garden soil.

MONKEY-FLOWER, Mimalus Ringens. Snap iragon flower of a particularly lovely orchid hue. Most content in the sunny bog. July. 12-18 in.
PARTRIDGEBERRY, Mitchella Repens. A be:tutiful wax-like, round-leaf tailing vine with tiny, fragrant four-petaled white blossoms often flushed pink. June flowering. The cheerful red berries beeinning in late Summer are held through the Winter into the following Spring.
MITREWORT, Mitella Diphy/fa. Pencil thin tlower spikes. May. One foot. Rich shaley soil. Partial shade.
WHLDBERGAMOT, Manarda Fistulasa. Outurling flower petals of lavender. July. Good garden soil. Two to three feet. Full sun or light hade.
ONE-FLOWERED PYROLA, Maneses Uniflora. Whe delicate waxy white drooping flower on a stem witally six inches high. One of the sweetest wildHower odors. Round, pale green leaves nearly flat 1.31 the ground. Junc. Piney soil. Light shade.

TRUE FORGET-XHE-NOT, Myosotis Scarpiaides. No better flower for naturatraing alongside your tiny brook or around your pool. Much senti ment is always attached to this dainty, tender blue cluster of flowers. Full sun or light shade. Rich, d.ark soil. June until frost.

WhITE WATERIILY, Nymphaea Odorata. One of the purest, most fraprant of flowers. White petal and conspichous golden tamens. Blossom some times sic inclies across. June and July. Full :mat Happy in calm pools.
WIIITE EVENING IRRIMROSE, Oenothera Speciosa. Frugile white flower, two inches broad on delicate stems sometimes one foot high. Delicate foliage. June and July, Full sun. Rich, well drained soil.
SHOWY ORCHIS. Orchis Spectabilis. One of the loveliest, most modest of wildflowers. A white lower petal ussully overhung with three orchid parple ones. Several blossoms on earh stem. IIad wood leaf mold. l'artial shade. 40 c each.
TRUE WOOßSORREL, Oxalis Acetosella. Delicate white live-petaled flowers with a multitude of pink lines. Shamrock leaves. Flower stems two to four inches high. Quite demse shade. l.eaf nodd.
GRASS OF PARNASSUS, P'arnassia Caraliniaua. 1 solitary white flower shaped a little like that of a buttercup on a slender stem usnally one foot tall. ()yate pale green leaves. Light shade. Moist buggy soil. July and August.
EASTERN PENSTEMION, Pensteman IIirsufus. Spikes of white flowers with lilac shadings.

DICENTRA CUCULAARIA

Prices on Wildflowers except as noted, are 35c each.
See Price Chart on page 3 if you are ordering more than one plant of a variety.

PHLOX DIVARICATA
AMOENA PHLOX, Phlox Amoena. Rose pink clusters of flowers on six-inch stems. Florets an inch across. A living color in late April and May. Dry soil. Full sun.
CLEFT PHLOX, Phlox Bifida. The first of the Spring phlox to bloom. A shimmering assembly of pastel blue flowers. The florets are three-quarters of an inch across and much frilled. Full sun. Dry soil.
BLUE PHLOX, Phlox Divaricata. Varying shades of soft blue or lavender flowers an inch across on nine- to twelve-inch stems. Individual blossoms are blunt five-pointed stars. Light shade. Rich woodsy soil. May. One of the very best wildflowers for naturalizing.
SMOOTH PHLOX, Phlox Glaberrima. Pale lavender pink clusters of flowers on stems ten to twelve inches tall. Full sun. Dry soil. A steadfast bloomer beginning fate in June and continuing sometimes into September.
MOUNTAIN PHLOX, Phlox Ovata. The best of its color. Deep rose. A profusion of blooms in late May and early June. 8-12 in. Full sun. Dry soil.
DOWNY PHLOX, Phlox Pilosa. Airy foliage. Dainty flowers. Art shades of pink and blue with deeply, cut petals. Once in a while a pure white form is found. $8-10 \mathrm{in}$.
CREEPING PHLOX, Phlox Replans. This one is like Phlox Imoinn except that it prefers acid soil and partial shade and blossoms about two weeks Jater. Rose pink.

FALSE-1)RAGONHEAI), Physostegia Speciosa. Two-foot spikes of snapdragon-like flowers in July. Dry or moist situation. Full sun. Rich lilac rose.
MAYAPPLE, Podophyllnm. Peltatum. Ivory white flowers one and one-half inclies across in May. Glaucous umbrella-like leaves. Yellow fruit in dutumn. Very light shade. Rich loam.
AMERICAN JACOB'S LADDER. Polemonium IVan Bruntiae. Tall-growing and large-flowering. The color is rich blue. Moist, rich soil. Partial shade. July.
SOLOMONSEAL, Polygonatum Biflorym. Small green bells on gracefully overhanging leaf fronds sometimes eighteen inches long. Soil from the hardwoods. Dense shade. May and June. Blue berries in Autumn.
GREAT SOLOMONSEAL, Polygomatnm Commotatnm. $3-4 \mathrm{ft}$. Giant yellow bells in May and June. Light shade. Plant in rich soil.
BLOODROOT, Sangninaria Casadensis. Plant these snow-white starry flowers in great masses under your Flowering Crabs and Hawthorns and alorg your shady paths, where they can bloom with the Primoses and Violets in earliest Sprims.
BIRDSEIE PRIMROSE, Primula Farinosa. One of the daintiest of all primroses. Pale lavender flower heads. Dull silver leaves. Xative to tle Northwest and to Europe. Wood soil. Light shade.
SHINLEAF, Pyrola Elliptica. Fragrant, waxywhite, bellshaped flowers in June and July. Light, neutral soil. Shade.
TRUMPET PITCHERPLANT, Sarracenia flava. Tall. yellow trumpets reaching a height of two feet.
PITCHER-PLANT, Sarracenia Purpurea. 1 ft . June. Reddish green. A very curious plant found in swamps. It thrives on the insects which it catches in its pitcher-shaped leaves.
SWAMP SAXIFRAGE, Saxifraga Penasylvanicum. "Imagine Mignonette blossoms growing up three-foot hollow stems in the swamps in late May and you have a picture of the Swamp Saxifrace, ${ }^{\text {. }}$ from "Pioneering with Wildflowers" by George D. Aiken.
MOUNTAIN SAXIFRAGE, Saxifraga Virkini. ensis. Small clusters of white flowers on threeto six-inch stems. They like best some cleft in the high rocks. Rich, dry soil. Full sun or light shade.

## MOUNTAIN STONE CROP, Sednm Ternatmm.

 The most adaptable Sedum for the wild garden. Misty white flower leads in June. Smooth, deen green leaves. Prefers rich wood soil. Equally at home in ether full sun or very light shade. $3-6 \mathrm{in}$,OCONEE-13ELLS, Shoria Galacifolia. A prince among the wildlings. Large reddish green glossy leaves which last the year ronnd. White mallow-like blossoms on stems six incles high. Light shade. . Icid soil. May.
BLUE-EYES-GRASS. Sisyrinchinm Augusifo. limm. Circular blue llowers one-half inch across on minute iris-like foliage six inches high. Fairly moist soil. Sunny situation. May and June.
THREE-LEAVED FALSE SOIOMONSEAL. Smilacina Trifolia. 5-S in. Airy white flowel heads in June. Shade.

Prices on Wildflowers except as noted, are 35 c each.
See Price Chart on page 3 if you are ordering more than one plant of a variety.

FRAGRANT GOLDENROD, Solidago Odora. Fragrant yellow flowers. Open fields or borders.
LADIES TRESSES, Spirauthes Ceruaa. Fragrant waxy, white orchid flowers on a six- to eight-inch stem. One of the daintiest of wild plants. Rich, moist soil in the sunny bog. August and September.

TWISTED STALK, Streptopus Amplexifolium. Very much like Solomonseal having white bells. May. Red berries in Autumn. Soil from the hardwoorls. Partial shade.
ROSY TWISTED STALKS, Streptopus Roseus. Like the above except that the dainty bells are rose colored. Same cultural direction.
EARI.Y MEADOWRUE, Thalictrum Dioicum. 3 ft . Rich woods. Misty purplish flowers in May. Attractive, finely cut foliage.

TALL MEADOWRUE, Thalictrum Polyganam. t-6 ft. A late Summer native at home near brooks and pools. Feathery flowers of pure white. Fine cut flowers. Thrives in the garden border.

FOAMFLOWER, Tiarella Cordifolia. Fluffy white flowers on stems sometimes eight inches high. May. Hardwood soil. Especially suited to the shady rock garden. Wonderful ground cover.
NODDING TRILLIUM, Trillium Ceruuum. A nodding Trillium not too common, with blossoms of white. From the moist woods of the Central West, blooming in May.

WAKEROBIN, Trillium Erectuin. Our own native Trillium of deep red, at home in the rich woods, blossoming in May and about a foot tall.
SNOW TRILLIUM, Trillium Grondifloram. Great snow-white flowers often three to four inches across. A beautiful plant for a semi-shady spot in the garden or for naturalizing under tree.

DWARF WHITE TRILLIUM, Trillium Nivale. This six-inch variety comes from the Central West and is almost the earliest wildflower to blossom. It blooms with the Hepaticas and early yellow Violets and should be a wonderfully good rock garden plant.
PRAIRIE TRILLIUM, Trillium Recurvatum. Rich deep brownish red flowers of peculiar formation, with recurved petals.
CALIFORNIA TRILLIUM, Trillium Sessile Californicum. A western stemless Trillium a foot tall with very large leaves and long petals. The flowers are ivory white and fragrant.
ROSE TRILLIUM, Trillium Stylosum. This rose pink Trillium comes from the southern mountains. The last of the Trilliuns to bloom.

PAINTED TRILLIUM, Trillium Undulatum. Blooms in late May, the flowers being white with a red center and red veining in the petals. One of the most beautiful of the Trilliums. Should be planted in an acid soil in partial shade.
TROLLIUS LAXA. Soft luminous yellow cups. A most lovely and delicate shade. Extremely rare globeflower native to the East.
MERRY BELLS, Uvuloria Perfoliata. Cream white bells after the drooping stalks in early May. Favorite companion of the Snow Trillium.

CULVERS-ROOT, Veronico Virginico. Tall ivory white flower spikes in August. Open sun.
SWEET WHITE VIOLET, Jiolo Blanda. Tiny white fragrant Violet for boggy places.
CANADA VIOLET, V'iola Conadensis. Grows to a foot tall with lavender and white flowers for shady corner or woolland planting.
BLUE MARSH VIOLET, Violo Cucullata. Long stemmed deep blue flowers.
BIRDSFOOT VIOLET, V'iolo Pedata. A rich purple with fincly cut foliage. Grows to ten inches in partial shade.
TWO COLOR BIRDSFOOT VIOLET, Violo Pedata Bicolor. Perhaps the showiest Violet, the upper petals being royal purple and lower ones rich blue.
LILAC BIRDSFOOT VIOLET, Jiola Pedata Lineariloba. The eastern form of Birdsfoot Violet, with very large blue flowers. Plants only grow four to six inches.
DOWNY YELLOW VIOLET, Viola Pubescers, Easily naturalized in any shady rather dry spot with Hepaticas and Bloodroot.
BARREN STRAWBERRY, Woldsfeinia Fragarioides. A splendid ground cover. Rich glossy foliage and yellow strawberry-like blossoms.

PURPLE FRINGE ORCHID

Prices on Wildflowers except as noted, are 35c each.
See Price Chart on page 3 if you are ordering more than one plant of a variety.

## The Hardy Ferns

One of the most uncful of all groups of plants is the Hardy Ferms. Their value is beine recognized more each year. There are many places which may be enhanced by their grace and beauty. The rockery, the woodland pathway. the brookside or border of the pond. or the north side of a building where little else will grow. All these places may be mase more attractive by the beauty of Hardy Ferns.

See page 3 for reduced prices of quantities of the same variets.

MAIDENHAIR FERN, Adiantum Pedatutu. The slender wiry black stems. crowned with indescribably beautiful spreading fronds, mingle with the Bloodroot. the Baneberries and Jack-in-the-Pulpit of the rich hardwoods. Two feet tall. 30e each.
EBONY SPLEENWORT, Aspleniuin Plotyueuran. Ebony stems, slender and graceful, grows six to twelve inches tall among the moist shaded rocks or glades in the woodland. 40c each.
MAIDENHAIR SPLEENWORT, Asplenium Trichamaues. Daintiest of all with clumps of slender fronds four to six inches tall growing in clefts of the rocks. Minst liave some shade. 40e each.
LADY FERN, Athyrium Felixfoemina. An easily grown species two to three feet tall and at home in partial or full shade. A good fern for the anateur. 30 e each.
SILVERY SPLEENWORT, Athyriutt Thelyptroides. A fern similar to the Lady fern, but with silvery fruit dots. For moist shade. 40e each.
NARROWLEAF SPLEENWORT, Athyriut Pycnacarpan, Large vigorous fronds to three feet with rich green, ripply pinnae of most unusual sppearance. For rich woodlands. 40e each.
BROADLEAF GRAPEFERN, Botrychium Matricariae. A tiny species only six inches tall from open woods or gravelly pastures. One small frond growing from the side of the fruit stalk. Rare. 60c each.
TERNATE GRAPEFERN, Batrychium Obliquum. To one foot with a rich leathery frond which lives through the Winter and becomes dormant in early Summer. Open gravelly soil. Most unusual. 40 e each.
RATTLESNAKE FERN, Batrychiutn Virginianuin. From the dry open woods. One to two feet. A single spreading frond laalf the height of the fruit stalks. 30e each.
BERRY BLADDERFEKN, Cystapteris Bulbifera. Supinely graceful slender frond to three feet. A semiprostrate species delighting in the companionship of small tumbling brooks of the woodland. where they are moistened by the spray. 30e each.
BRITTLE FERN, Cystopteris Fragilis. Slighty. less than a foot tall and often mistaken for a Woodsia. Becomes dormant in Anguse, but sends up new shoots during early Fall. 30e each.

CIIMBING FERN

HAYSCENTED FERN, Deunstedfia Puncrilo. bula. For sun or open shade. Graceful twelve. inch fronds which form dense mats as the speciespreads from the roots. Fragrant when cruslici. Small clumps. 30c each. Sods about ten inclica square. 80 c each.
CLINTON WOODIEERN, Dryapteris Clinsaniana. A splendid moist wrods specics with broas three-foot fronds. Oue of the best. 40 c each.
CRESTEI) WOODFERN, Dryapteris Crisiata. I small comterpart of Clinton W'oodfern usually on huamocks in semi-sbaded bogs. Tn eieliteer: inclies. 30 c each.

See Price Chart on page 3 if you are ordering more than one plant of a variety.

GOLDIE FERN, Dryopteris Goldiona. The largest of the wond-ferns, attainink four feet and heing nearly evergreen. For rich moint woods. 50c each.
WINGED WOODFERN, Dryopteris Hexogoneptera. Grows to eighteen inches with fronds nearly as broad as tall. Fasily cuhtivated and increased rapidly, bust rare in the wilds. Dry wonds. 40e "ach.

FANCY FERN, Dryopteris Intermedia. A nearly ewergreen fern with lovely fronds welve to eighteen inches tong. The fern used by florists in a Heat extent. 30e eaeh.

OAKFERN, Dryopteris Linneana. I tiny little four- to six-inch fellow with triangular fronds. (omtimually sending up new fronds all Summer and -preading from the roots. Moist woodland. 30e cach.
IEATIIER or EVERGREEN WOODFERN, Dryopteris Marginalis. I true evergteen frond. thick and dark green and twelve to eishteen inches long. Onc of the best woodferns. 30e each.
NEW YORK FERN, Dryopteris Noveboracencis. 1 twelve- to eighteen-inch fern of the marshy woods. 30e each.

NARROW BEECHFERN, Dryopteris Ihegopseris. In eight-inch heart-shaped frond of the drier "onats. Grows ako with Oakfern in moister soil. 30e each.

IARSHFERN, Dryopteris Thelypteris. A small eisht- in twelve-inch slender species of the marshes, -rn or hatle. 30e each.
CLIMBING FERN, Lygodixm Palmatam. I rate - himbing species which in rich acid soil, well sup plied with husmus grows three to four feet. Ronghly maple-shaped leases. 50c each.
SİNSITIVE FERN, Ouoclea Sensibilis. While this species grows only a few inches tall in open meddows, yet it attains a size of two to three feet in the bogs and assumes at rather tropical appear. mice. 25 e each.

ADDERTONGUE FERN, Ophioglossum Vulgotum. I rare and curious fern with a single lanceolate leaf. Grows in either boes or dry soil. Rare rather than beatuliful. 40 e each.

CINNAMION FERN, Osmanda Cimuamomea. In open or shaded bogs this attains four feet. Ntso brows in dry soil. Our most cosmopolitan species. 30e each.

## INTERRUPTED FERN, Osmanda Claytonia.

 Probably our largest species, in rich woods or bogs making nearly six feet. 35 c each.ROYAL, FERN, Osmunda Regalis. Wide spread ink kracefol fronds. it grows to three feet in the - lated buss and to a smaller size in the open fields. 35e cach.
CONIMON POI, YPODY, Polypodium Vulgure. Six to eight inches tall. it grows in mats on bichs, and ledges. For shate. Fivergreen. 25e eael.

BRAUN HOLLXIERN, Polystichum Brauni. A native of the deep, rich, rocky woods shere it Hrows two feet tilh. Vixtremely glossy deep green fronds and with chafly stems. 50e each.
BRACKEN, Pseridium Aquilinku. I spreading partect frond atop a two- to three-foot stalk. The Bracken erows in full sun in rather dry pastures. $25 e$ each.

OSTRICH FERN, Peteretis Nodulosa. I giant fern that grows atong the banks of stie.mis and ponds. Of a gracefut. plumy growth to six feet. Sun or shatle. 30c each.
RUSTY WOODSIA, W'oodsia Ilvensis. It home in rock crevices in fult sun. Pretty woolly fronds four to eight inches tall. Often becomes dormant in August, refoliating in September. 30c each.

COMMON WOOISIA, Hoodsia Obensa. A dainty species a few inches tall for the shaded rocks. 30c each.
CHAINFERN. Hoodwardia Areolata. I one- to two-foot fern for swamps. So-called Chainfern berame the spores resemble chain links. 30e each.
VIRGINIA CIIAINFERN, Hoodwardia Virginica. Inother swamp species prowing to thirty inches. Spreads from the roots. 30 e each.

MAIDENHAIR FERN

See Price Chart on page 3 if you are ordering more than one plant of a variety.

## FRUIT TREES AND BERRY PLANTS FOR VICTORY GARDENS

We have a job thead of us fceding a large part of the world. Food grown at home saves labor, handling and transportation. It looks better, tastes better and is better than market produce.

DELAWARE. Red. In old favorite. Bunche. and grapes are small but sweet and deliciou. Early October.
CACO. Red. I new, wine-red. larke. sweet grape. Nid-Septeniber.
NIAGARA. White. The must pupular white grape. Vigorous and prodnctive. I.ate September. PORTI.ANID. Greenish-white. large bunches and berries. llardy. Very early.

RED HASPRERRIES

## RASPBERRY PLANTS

Not only are Raspberries one of the most delicious berries for lome use. but they are also one of the safest to plant commercially. In more than twenty years of srowing Raspberries. we have always had a market for all we produced.

Plant on good, well drained soil, on a slope if possible. and cultivate freely. Fertilize with chemicals and wood ashes rather than manure. except that poultry manure is good ii you have it. Of the red varieties from 2. (1)0 to 3.000 plants per acre are required. planted 21/2 to 3 feet apart in rows 6 feet apart. The black and purple varieties. planted 3 feet apart in rows 7 feet apart. require about 2.000 plants per acre.
N. B.-Price Chart does not apply on Raspberries.
LATHAM (Red). The leading commercial variets: brect canes. very hardy, a heasy yielder and good thipper. Fair quality. 75 c per $12 ; \$ 1.50$ per 25 ; $\$ \$ .50$ per $\$ 100 ; \$ 35.00$ per 1,000 .
NEWBURGH (Red). The heaviest yielding and hardiest of all raspberries. Bears heayy crops of inmence berrics in mid-season. Fruit is good ullality and very firm, making a good shipper. Disense-resistant. Medium height. 75 c per 12; $\$ 1.50$ per 25; $\$ 5.00$ per 100 .
TAYLOR (Red). A new, early, extremely delicinus raspberry. High quality. Huge berries thrmighout the season. Excellent for home use and loxat sale. 75 c per $12 ; \$ 1.50$ per $25 ; \$ 4.50$ per 100: $\$ 35.00$ per 1,000 .
PLUM FARMER (Black). Our finest "black"ap" ra-pherry, ripening early. Tip-plants, 75c per 12; $\$ 1.50$ per $25 ; \$ 4.50$ per 100 .
COLUMBIAN (Purple). Tip-plants, 75 c per 12; 51.50 per 25: $\$ 5.00$ per 100 .

## STRAWBERRY PLANTS

N. B.-Price Chart does not apply on Strawberries.

HOWARD 17 (Premier). Farly: Pinduces large quantities of large. alractive. luscious bersies. Grows well on light soils and stands dry weather better than some. This is the variety most planted. $\$ 1.00$ per $50 ; \$ 1.50$ per $100 ; \$ 12.00$ per 1.000 .
CATSKILL. Midseason. Immense quantities of fine fruit on large, vigorous plants. Widely adapted 11) soil and climate. Catskill is a sure cropper. $\$ 1.00$ per $50 ; \$ 1.50$ per $100 ; \$ 12.00$ per 1,000 . GREEN MOUNTAIN EVERBEARING (Patented.) (Originated at these nurseries. Inder the patent you are permitted to grow as many new plants as you wish for your own use. Before growing plants to sell or otherwise distribute, arrangements must be made with us.) This finest of all the fall-bearing varieties we have tried produces large, firm, bright red frut of extra quality. The plants which are vigorous and extremely resistant 10 disease. do better in fairly heavy soils than in light ones. Pick off blossoms the first Summer until Dugnat first. Runner plants, $\$ 2.00$ per $50 ; \$ 3.50$ per $100 ; \$ 20.00$ per 1,000 .

## BLACKBERRY PLANTS

SNYDER. 75 c per $12 ; \$ 1.50$ per 25; $\$ 4.00$ per 40.

## NUT TREE

BUTTERNUT. The well-kiown northern nue tree from which many thousands of rich nuts are gathered every year. Entirely hardy. They require a long time to come into bearing, but are worth writing for.

4 ft. trees. $\$ 1.50$ each.

## PERENNIALS FOR COLOR

## PIONEERING WITH FRUITS AND BERRIES

By GEORGE D. AIKEN

Pionecring with Fruits and Berries deals in simple facts concerning Fruit Trees, Raspberries, Aparagus, Grapes, what to do, how to do it and when. 1 farmer and a nurseryman, Mr. Aiken is well capacitated to handle this large subject in the understandable way in which it is done. He has told you what to do with the trees as they come from the nursery, how to care for thens during the firt, very important year on your land. He tells of the pirates, the insect pests, which will come sneaking in to destroy and how to make them walk their own planks.
We can unlesitatingly reconmend Pioneerink with Fruits and Berries as being exactly as important and unique in its field as has been Pionecring seith Hildfozers. The price is $\$ 2.00$ postpaid anywhere.

## ANNUAL AND BEDDING FLOWER. ING PLANTS
