DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

April 25, 1949.

TO: Headquarters Shiga Military Government Team
(Thru Shiga Pref. Gov't)

FROM: Mitsui Seiki Kogyo K.K., Seta Works (35-1)
No.1234, Ohe, Seta-cho, Kurita-gun,
Shiga-ken.

SUBJECT: Application for releasing land and buildings not required for custody and control of reparation machines.

Sirs;

We sincerely thank you for your kind consideration upon our application dated Mar. 25, 1949 regarding the exemption from reparations of the electric sub-station, air conditioning, boiler and water supply equipments in our plant.

We fully recognize that it is the absolute decree imposed upon us to keep the reparation machines (735 units) under perfect custody and control.

As previously reported, we have closed down the operation of our plant after Mar. 31, 1949. We, therefore, submitted an application for removing and assembling the reparation machines to two sections of the plant buildings in order to effect more efficient custody and control, for which your approval was granted on April 14, 1949. So we started the removing work in accordance with your instruction, and the work is duly progressing in our best care.

After the removal of the reparation machines we pledge that we will fulfil the responsibility of keeping them in perfect custody and control without fail. Therefore we wish to ask you for releasing the land and buildings (as illustrated on the attached drawing) which will become unnecessary for the custody and control of the reparation machines as a result of removal.

As we previously applied (dated April 1, 1949) we wish to sell the plant to Toyo Rayon K.K., who was the original owner, if we are favored with your permission.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Toyo Rayon K.K. desires to utilize this plant again as a spinning mill as before. The GHQ Textile Division and Ministry of Commerce and Industry instruct them to rehabilitate their staple fibre spinning urgently and they planned at first to reconstruct and utilize their closed rayon mill in Nagoya as a spinning mill. But viewing from various points, for instance as our plant has all of the necessary equipments, it is easily reconverted with little repair and a short length of time, for its prospective development, etc., they earnestly desire to change the plan and utilize our plant as soon as possible.

We wish to ask for your kind consideration upon this matter and the permission for releasing land and buildings may be granted at your earliest convenience from the point of view that the reconversion of our plant to the textile industry will contribute to the economical recovery of Japan.

Yours truly,

H. Nakagami

HEADQUARTERS
SHIGA MILITARY GOVERNMENT TEAM
APO 25, Unit 3, (Otsu, Honshu)

611

387.6

14 April 1949

SUBJECT: Release of Reparation Equipment

THRU: Kinki Mil Govt Region, APO 25

TO: Supreme Commander Allied Powers, GHQ, APO 500

1. Forwarded herewith is application of Mitsui Seiki Kogyo KK Seta Works (35-1), for the exemption from reparations of certain machines.

2. The equipment included in this request has never been inventoried for reparations, inasmuch as prior Economic Officer did not consider that it came within the scope of O.D. 5 1946. Not until the visit of Gordon T. Yamada, REP GHQ SCAP 13 November 1948 was the decision of the local Mil Govt Team questioned. Following the instructions of Mr. Yamada, inventory sheets covering twenty-five (25) items of the sub-station were forwarded to SCAP.

3. It is requested that a review of the items listed in the request for exemption from reparations be made. Consideration should include the following:

a. The plant was established in 1937 by Toyo Rayon KK for spinning and weaving. Although 50,000 spindles were the maximum in operation, the plant was designed for an eventual 100,000 spindle capacity.

b. Likewise the boilers, air conditioning and water supply equipment were installed for spinning.

c. The plant was purchased in 1943 by Mitsui Seiki Kogyo KK, including the above mentioned items of equipment, and converted to machinery manufacture. The actual use of the installed equipment during the war was very small for sub-station and water supply systems, and nil for the air conditioning equipment.

4. At the present time Mitsui Seiki is closing down operation of its Seta works, and has the opportunity to sell the plant back to Toyo Rayon to be used again in spinning and weaving. Unless the sub-station, water system and air conditioning system can be exempted from reparation, the plant is of little value for spinning and weaving.

SUBJECT: Release of Reparation Equipment (14 Apr 1949)

Headquarters Eighth Army, APO 343

TO: Supreme Commander for the Allied Powers, APO 500
(Attn: ESS/IN)

1. The petition being forwarded herewith points out that the equipment for which exemption is requested was originally installed to meet the requirements for textile production and its capacity far exceeds that needed after conversion of the plant to war production. Therefore most of the equipment was used only to a small fraction of its capacity and can be classed as having retained its identity as textile equipment. The equipment is really part of the fixed installation, originally designed and built for textile production, consequently it is subject to release from reparations custody.

2. In the interest of rehabilitating the textile industry which is considered of major importance, it is recommended that the equipment indicated on inclosure 1 be released from reparation custody.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

April 1, 1949.

TO: Headquarters Shiga Military Government Team
(Thru Shiga Pref. Gov'nt)

FROM: Mitsui Seiki Kogyo K.K., Seta Works (35-1)

SUBJECT: Application for moving reparation machines to effect more efficient custody and control, for reducing the area under custody and for releasing the land and buildings.

Sirs;

Our plant was originally established as a staple fibre spinning mill by Toyo Rayon K.K. in 1937. We purchased it from Toyo Rayon K.K. in 1943 and manufactured air craft parts during the war with the machine tools purchased from others.

After the war we have manufactured precision measuring machine, measuring tools, rolling stock parts, etc., by getting the conversion permission in December, 1945. The plant was designated for reparation in January, 1946 (O.D.-8) and the number of reparation machines claimed are 735 units.

Meanwhile, we were forced to suspend the operation of the plant after March 31, 1949 on account of intense difficulties in management of business since last year.

As aforesaid, our plant was established as a staple fibre spinning mill and buildings and installations necessary for a spinning mill remains unchanged as they were, except machines for spinning and weaving.

As for these spinning mill installations, i.e. electric sub-station, air conditioning, boiler and water supply equipment, we have asked for your kind consideration to be recognized as "X" equipment.

Such being the status, if the reparation machines, which we have kept in custody and partly used heretofore, were assembled adequately in the plant building and kept in perfect custody and control, the plant might be fully utilized as a spinning mill as it was.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

On the other hand Toyo Rayon K.K. is necessitated to establish a spinning mill urgently in accordance with the instruction for rehabilitating the staple fibre spinning mill, which is one of the most important matter for the economical recovery of Japan. As they are earnestly desiring to contribute to the recovery of economy and export of Japan through the staple fibre spinning as soon as possible by utilizing this plant, we have deliberated with them and agreed upon selling the plant to Toyo Rayon K.K., if we were fortunately granted permission of your Headquarters.

Therefore we wish to move reparation machines to effect more efficient custody and control and consequently reduce the area under custody, as per attached drawing, through your permission and instruction so that we may fulfill the responsibility for perfect custody and control. So we would ask for your kind consideration for releasing the land and buildings not required for the custody and control of the reparation machines of our plant.

In regard to this matter, GHQ Textile Division, Ministry of Commerce and Industry, and Shiga Prefectural Government are upholding our plan viewing from the point of recovering industry and promoting export of Japan.

It is the problem, after all, that a nice and most useful spinning mill, which was converted to a munition plant during the war, is required to be utilized again for the original purpose by the former owner who established the plant. We deem this is the natural course for rehabilitating the Japanese industry to the pre-war status and the real recovery of Japanese economy and industry, for which the United State of America is kindly helping, will be attained by this way.

We wish to ask for your kind consideration upon the aforesaid state of things and we earnestly desire that this plant will be fully utilized as a spinning mill.

Yours truly,

S. Yamanaka

March 31, 1949.

TO: Headquarters Shiga Military Government Team
(Thru Shiga Pref. Gov't)

FROM: Mitsui Seiki Kogyo K.K., Seta Works (35-1)

SUBJECT: Report for suspending the operation of the reparation plant.

Sirs;

Please be informed that we will suspend the operation of the plant after March 31, 1949 for the reasons mentioned below.

Our plant was designated for reparations on Jan. 20, 1946 (O.D.-5) and has manufactured precision measuring machine, measuring tools, diecast, rolling stock parts and automobile parts under the conversion permission as follows:

A. Dec. 1, 1945 MG-167 ---------- by 6th Army
B. June 24,1946 MG-167(revised)-- by 1 Corps.

Our company has three (3) plants i.e. Tokyo Plant in Tokyo, Okegawa Plant in Saitama-Ken and Seta Plant in Shiga-Ken. However, as the company has been beset with financial embarrassment since last year, they have decided to suspend the operation of Seta Plant, under the agreement with the labor union, for the purpose of recovering the business of the company. And out of 490 employees of Seta Plant 420 persons will resign and some of the remaining 70 persons will be transfered to our Okegawa Plant and the others will remain for the maintenance of the reparation machines.

We wish to ask for your instruction and permission, later, regarding the way of custody and control of reparation machines, and for releasing the land and buildings which will become unnecessary as the result of assembling and arrangement of the reparation machines.

Yours truly,

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

MITSUI SEIKI KOGYO KAISHA, LTD.

March 25, 1949.

TO: Headquarters Shiga Military Government Team.
(Thru Shiga Pref. Government).

FROM: Mitsui Seiki Kogyo K.K., Seta Works (35-1)
No.1234, Ohe, Seta-Cho, Kurita-Gun, Shiga-Ken.

SUBJECT: The Application for Recognition of Electric Sub-station, Boiler, Water Supply and Air Conditioning Installation as "EX" Equipments.

The Electric Sub-station, Boiler, Water Supply and Air Conditioning Installation of our plant were established as the spinning mill equipments (capacity: 100,000 spindles) by Toyo Rayon K.K. in 1937, and they all had a large capacity.

We bought all of these together with the plant-building, but as such vast spinning mill equipments were unnecessary for the machinery industry, the actual application of them during the war was unquestionably very little as shown below.

1. Electric Sub-station.

Although this is a large installation with the capacity of 3,000 K.W., the electricity consumed by us during the war was not more than 340 K.W. at the maximum peak load, including supply for the boarding house. (Please refer to Certificate of Kansai Electric Supply Company). As to the application of the facilities, only two of the seven transformers were actually used, and this shows only one third of the equipments were really utilized for the work.

2. Boilers.

We have two boilers, Babcock Type and Takuma Type, but as steam is quite unnecessary for the machinery works, we used these boilers only for a very short part of the war time for cooking and bathing purposes, and soon gave up using it because of the shortage of coal. As for the steam drain returning valves, we left it quite untouched.

3. Water Supply Installation.

This consists of a Centrifugal Pumps with Motors, Water Filter Tanks and the transformers belonging to them. As water is not used in the machinery works, it was only for drinking, cooking, bathing and the like that we made use of these facilities. Moreover, though their water-supplying capacity was 70,000 koku per day, the quantity used in the wartime was only about 1,000 koku per day.

Encl #1

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

4. Air-conditioning Apparatus.

They are Carrier Blowers, Root's Blowers, Variable Motors, Transformers and Centrifugal Pumps. As these are all special equipments for the spinning mill and quite useless for our industry, we did not make any use of them at all.

Our plant was designated for reparation in January, 1946. But for the abovementioned reasons, these equipments have been recognized as "EX" by Shiga Military Government Team.

However, after the inspection of Mr. Yamada, REP Section, G.H.Q., the Electric Sub-station was pointed out to be inventoried for reparation claim. As this was, we believe, due to our insufficient explanation of the real state of things, we would ask you to reconsider the foregoing facts and recognize all of these facilities, as "EX" equipments.

Thanking you in anticipate for your kind consideration,

Yours truly,

S. Yamanaka

COPY

CERTIFICATE OF ELECTRIC POWER CONSUMPTION

March 14, 1949.

1.	Name of Factory	Mitsui Seiki Kogyo K.K., Seta Works.
2.	Location	No.1234, Ohe, Seta-Cho, Kurita-Gun, Shiga-Ken.
3.	Capacity of Sub-station	3,000 K.W.
4.	Contract of Electric Power Supply (From Aug., 1943 to Aug., 1945.)	690 K.W.
5.	Peak Consumption during the period from Aug., 1943 to Aug., 1945.	340 K.W. (Covering whole factory both for power and, light. Refer to attached specification.
6.	Date of Peak Consumption	July 8, 1945.

We certify that the above statements are true and correct.

H. Tsuji (Signed)
Manager,
Kansai Electric Supply Co.,Ltd.,
Shiga Branch.

REMARKS: (A) - Those are spinning mill installations bought from Toyo Rayon K.K. en block with buildings and have never been used during the war.

(B) - Those are spinning mill installations bought from Toyo Rayon K.K. together with buildings and were used as welfare facilities but never for production during the war.

On account of the aforesaid reason, those of (A) and (B) were exempted in accordance with the indication of the military government officer in August, 1946, when the inventory was made.

(C) - Those motors under 5 H.P. and not attached to machines were released in accordance with the SCAP Instruction in April, 1947.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

REMARKS: (A) - Those are spinning mill installations bought from Toyo Rayon K.K. en block with buildings and have never been used during the war.

(B) - Those are spinning mill installations bought from Toyo Rayon K.K. together with buildings and were used as welfare facilities but never for production during the war.

On account of the aforesaid reason, those of (A) and (B) were exempted in accordance with the indication of the military government officer in August, 1946, when the inventory was made.

(C) - Those motors under 5 H.P. and not attached to machines were released in accordance with the SCAP Instruction in April, 1947.

(D) - The electric sub-station, which was originally established as a spinning mill installation, has such a large capacity as 3,000 K.W.

We bought this equipment from Toyo Rayon K.K. in 1943 with buildings and other installations of this plant. Although this equipment has such a large capacity, the electric power that we consumed during the war was 540 K.W. at the maximum peak load - as per attached certificate (copy) of Kansai Electric Supply Co. - and the proportion we have actually used of this equipment is no more than one third.

Therefore, we believe that this equipment ought to be "EX" as was recognized until last November by Shiga Military Government Team and same with other spinning mill installation in this list - such as boiler, carrier blower, root's blower, etc.

I CERTIFY THAT ABOVE IS TRUE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF.

CERTIFICATE OF ELECTRIC POWER CONSUMPTION

March 14, 1949

1.	Name of Factory	Mitsui Seiki Kogyo K.K., Seta Works.
2.	Location	No.1234, Ohe, Seta-Cho, Kurita-Gun, Shiga-Ken.
3.	Capacity of Sub-station	3,000 K.W.
4.	Contract of Electric Power Supply (From Aug., 1943 to Aug., 1945)	690 K.W.
5.	Peak Consumption during the period from Aug., 1943 to Aug., 1945.	340 K.W. (Covering whole factory both for power and light. Refer to attached specification.
6.	Date of Peak Consumption	July 8, 1945.

We certify that the above statements are true and correct.

H. Tsuji (Signed)
Manager,
Kansai Electric Supply Co.,Ltd.,

REMARKS: (A) - Those are spinning mill installations bought from Toyo Rayon K.K. together with buildings and were used as welfare facilities but never for production during the war.

(B) - Those motors under 5 H.P. and not attached to machines were released in accordance with the SCAP Instruction in April, 1947.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

To: Headquarters Shiga Civil Affairs Team.

Thru: Shiga Prefectural Government.

From: Mitsui Seiki Kogyo K.K., Seta Works (35-1)

Subject: Report on removal of released machine and "EX" machine.

Sirs;

Please be informed that, as we have closed down the operation of our plant after last March, some of Released Machines (released from reparation on Feb. 20, 1948) and "EX" machines (exempted from reparation on May 5, 1949) were transfered to our sister plant or sold off to others as follows;

1. Among 320 released machines

a. Transfered to our Okegawa Plant (Saitama-Ken)	143 units
b. Sold off to others	68
Total removed	211 units
c. Remaining 109 units are now under custody in our plant.	

2. Among 43 "EX" machines

a. Transfered to our Okegawa Plant (Saitama-Ken)	7 units
b. Sold off to others	10
Total removed	17 units
c. Remaining 26 units are now under custody in our plant.	

Enclosed herewith please find the detailed list of removed machines.

Yours truly,

H. Nakagami

H. Nakagami,

COPY

February 26, 1949.

TO: Head Quarters Shiga Military Government Team
(Thru Shiga Pref. Government)

FROM: Mitsui Seiki Kogyo K.K., Seta Works. (35-1)
No.1234, Oho, Seta-cho, Kurita-gun,
Shiga-ken.

SUBJECT: Application for getting back the inventoried electric Sub-Station to "EX" Equipments.

The electric sub-station of our plant was originally the spinning mill installation established by Toyo Rayon K.K. in 1937 and has a large capacity of 3,000 K.W.

Since our company bought the plant from Toyo Rayon K.K. in 1943, we have used a part of the electric sub-station. After the war our plant has been designated for reparation in 1946, but the electric sub-station was recognized by your Head Quarters as "EX" equipment and exempted from reparation claim.

Meanwhile, after Mr. Yamada, REP Section, G.H.Q. inspected our plant last November, this equipment has been inventoried for reparation claim from the date of Dec. 10, 1948.

However, although this equipment has the capacity of 3,000 K.V., as mentioned above, the largest amperage of electric power that our plant consumed during the war was less than 400 K.W. at the maximum and only about one third of the equipment was actually used as described on the attached list of the equipment.

In spite of the fact as mentioned above, this equipment has been inventoried for reparation claim chiefly due to our insufficient explanation to G.H.Q. inspector.

In view of the foregoing reason, we wish to ask your kind consideration on putting back this inventoried electric sub-station to "EX" equipment.

By the way, please be informed that we have explained these facts to Mr. Roller, REP Section, G.H.Q., and asked to postpone a while to take up the inventory sheets.

Thanking in anticipation for your deep consideration upon this matter.

Yours truly,

H. Komori,
MANAGER,
MITSUI SEIKI KOGYO K.K.,

Plant file

LRH

Feb 9th 1949

To : Shiga Military Government Team.

From : Chief of Com. and Ind. Section, Shiga Ken.

Subject : Additional Application to convert a Designated Reparation Plant.

Regarding as above subject we receipt the application as annexed papers from Mitsui Seiki Kogyo K.K. Seta Factory by Mr. Ludis's inspection beforeday.

Therefore we send the application to G.H.Q. through Ministry of Com. & Ind.

And hereby we submit to you two copy of the application to certify this.

R Kitagawa

RIKIO KITAGAWA

Chief of Com. and Ind. Sect.,
Shiga Ken.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Additional Application to Convert a Designated Reparation Plant

February 5, 1949

To : General Head Quarters,
Supreme Commander for Allied Powers

From : Mitsui Seiki Kogyo K.K., Seta Works, (Code No.35-1)
No.1234, Oho, Seta-cho, Kurita-gun,
Shiga-ken.

1) Name of plant: Mitsui Seiki Kogyo K.K., Seta Works.

2) Location of Plant: No.1234, Oho, Seta-cho, Kurita-gun, Shiga-ken.

3) Name of product planned:

A. Textile machine parts.

1. Needle & parts of warp knitting loom.
2. Rayon spinning pump (Manufacturing & Repairing).

B. Automatic Lathe for watch parts.

Length - 0.800 M, Width - 0.560 M, Height - 1.135 M,
Weight - 300 Kgs, Motor Driven 1 HP,
Cutting Capacity - 0.5 - 7 m.m. dia.

4) Experience of the production:

The mechanical engineers of this works are in an attempt to manufacture the items applied as mentioned above by means of operating the present unique machines and equipment with their skilled faculty on this opportunity as they enjoyed high reputation in their products of excellent tools such as precision thread cutting lathe, cutter relieving lathe or other precision machineries that they had manufactured at Tokyo works before they moved here.

5) 1939 - 1945 production:

1943 (beginning Sept.)	Aircraft parts	730 pcs.	¥1,412,000.-
1944	-"-	2,194 "	4,236,000.-
1945 (up to August)	-"-	1,460 "	2,824,000.-
Total		4,384 pcs.	¥8,472,000.-

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

6) Scale of production planned by months for period on this a

	1st 3 month	2nd 3 month	after 6 months
A. Textile machine parts			
Needle and parts of warp knitting loom	70,000 pcs.	100,000 pcs.	300,000 pcs.
Spinning pump for rayon machine	300 units	500 units	700 units
B. Automatic lathe for watch parts	3 units	5 units	5 units

7) Period of desired permission: 7 years for each item.

8) Plan and location to continue the production after reparations removal:

This works can continue the production at the present location in utilizing 320 units of principal machines and equipment as basic facilities that had been released from the reparation and we are holding now, and by means of supplementing some wanted machines and equipment additionally even though 760 units of the present designated machines and equipment for reparation would be removed.

9) Scale of proposed changes in physical facilities:

No change will be made in physical facilities as it is planned that the production of the applied items will be operated in the way of using the present machines and equipment principally or our own ones which will be manufactured by ourselves, and by obtaining new ones from others as the provision of some wanted ones.

10) Intended expense for conversion:

No funds are required particularly except about ¥100,000.00 that is the cost of our own machines and equipment that will be manufactured by ourselves as well as that of purchasing new ones from others.

11) Name or location to which products are to be delivered:

A. Textile machine parts.

Needle and parts of warp knitting loom	- Our Okegawa works (Saitama-ken) and warp knitting manufacturers.
Rayon spinning pump	- Toyo Rayon K.K. (Shiga-ken) and other rayon manufacturers.
B. Automatic lathe for watch parts.	- Fuji Watch Mf'g Co. (Shizuoka-shi) and other watch manufacturers.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Remarks: We are now manufacturing precision measuring machine measuring tools, rolling stock parts, automobile parts and diecasting products under the conversion permit (as per the attached copy) granted by the Allied Powers.

However, we beg to hereby submit you our application for the permission by relating the following reasons as we are desirous to manufacture the above mentioned new items which are greatly demanded in our industrial spheres at present.

A) Textile machine parts.

1. Needle and parts of warp knitting loom.
As it has been very difficult to manufacture needles of warp knitting loom in the phase of material and also technically weaving warp knitting fabric which are very important export item of our country, perfect products have not been manufactured yet in our country. We are, therefore, very desirous to contribute to the development of our export industry by manufacturing the aforesaid needles and specific parts at this plant which are available to the warp knitting loom, and also to meet the general demands as our Okegawa plant (Saitama-ken) are manufacturing the warp knitting looms.

2. Rayon spinning pump.
This production and repairing is the biggest obstruction in the way of recovery of rayon industry. But, being desired by Toyo Rayon Company as well as various others, we would wish to accomplish this difficult works perfectly as there are few excellent makers of this type.

B) Automatic lathe for watch parts.

Precision machine tools with capacity of automatic mass-production of such precision parts as precision screws, pins and others, are indispensable for manufacturing watches which are very important industry either for export or domestic demands in Japan. But, there are few makers who are capable to manufacture precision machine of this kind in our country. We are, therefore, strongly desired by watch makers to manufacture and supply this item, believing our excellent technical works and experience for the past many years. As the Commercial and Industrial Ministry also recommends us to realize this plan, we wish to contribute to the rehabilitation of our industry by means of completing this work.

H. Komori

H. Komori, Manager,
MITSUI SEIKI KOGYO K.K.,
SETA WORKS.

Supreme Commander for Allied Powers

From : Mitsui Seiki Kogyo K.K., Seta Works, (Code No.35-1)
No.1234, Oaz, Seta-cho, Kurita-gun,
Shiga-ken.

1) Name of plant: Mitsui Seiki Kogyo K.K., Seta Works.

2) Location of Plant: No.1234, Oaz, Seta-cho, Kurita-gun, Shiga-ken.

3) Name of product planned:

A. Textile machine parts.

1. Heddle & parts of warp knitting loom.
2. Rayon spinning pump (Manufacturing & Repairing).

B. Automatic Lathe for watch parts.

Length - 0.800 M, Width - 0.860 M, Height - 1.135 M,
Weight - 300 Kgs, Motor Driven 1 HP,
Cutting Capacity - 0.5 - 7 m.m. dia.

4) Experience of the production:

The mechanical engineers of this works are in an attempt to manufacture the items applied as mentioned above by means of operating the present unique machines and equipment with their skilled faculty on this opportunity as they enjoyed high reputation in their products of excellent tools such as precision turret cutting lathe, cutter relieving lathe or other precision machineries that they had manufactured at Tokyo works before they moved here.

5) 1939 - 1945 production:

1943 (beginning Sept.)	Aircraft parts	780 pcs.	¥1,412,000.-
1944	-"-	2,194 "	4,236,000.-
1945 (up to August)	-"-	1,460 "	8,824,000.-
Total		4,384 pcs.	28,472,000.-

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

6) Scale of production planned by months for period on this application:

	1st 3 month	2nd 3 month	after 6 months
A. Textile machine parts			
Needle and parts of warp knitting loom	70,000 pcs.	100,000 pcs.	300,000 pcs.
Spinning pump for rayon machine	300 units	500 units	700 units
B. Automatic lathe for watch parts	3 units	6 units	5 units

7) Period of desired permission: 7 years for each item.

8) Plan and location to continue the production after reparations removal:

This works can continue the production at the present location in utilizing 320 units of principal machines and equipment as basic facilities that had been released from the reparation and we are holding now, and by means of supplementing some wanted machines and equipment additionally even though 760 units of the present designated machines and equipment for reparation would be removed.

9) Scale of proposed changes in physical facilities:

No change will be made in physical facilities as it is planned that the production of the applied items will be operated in the way of using the present machines and equipment principally or our own ones which will be manufactured by ourselves, and by obtaining new ones from others as the provision of some wanted ones.

10) Intended expense for conversion:

No funds are required particularly except about ¥100,000.- that is the cost of our own machines and equipment that will be manufactured by ourselves as well as that of purchasing new ones from others.

11) Name or location to which products are to be delivered:

A. Textile machine parts.	
Needle and parts of warp knitting loom	- our Okegawa works (Saitama-ken) and warp knitting manufacturers.
Rayon spinning pump	- Toyo Rayon K.K. (Shiga-ken) and other rayon manufacturers.
B. Automatic lathe for watch parts.	- Suji Watch Mf'g Co. (Shizuoka-shi) and other watch manufacturers.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Remarks: We are now manufacturing precision measuring machine, measuring tools, rolling stock parts, automobile parts and diecasting products under the conversion permit (as per the attached copy) granted by the Allied Powers.

However, we beg to hereby submit you our application for the permission by relating the following reasons as we are desirous to manufacture the above mentioned new items which are greatly demanded in our industrial spheres at present.

A) Textile machine parts.

1. Needle and parts of warp knitting loom.
As it has been very difficult to manufacture needles of warp knitting loom in the phase of material and also technically weaving warp knitting fabric which are very important export item of our country, perfect products have not been manufactured yet in our country. We are, therefore, very desirous to contribute to the development of our export industry by manufacturing the aforesaid needles and specific parts at this plant which are available to the warp knitting loom, and also to meet the general demands as our Okegawa plant (Saitama-ken) are manufacturing the warp knitting looms.

2. Rayon spinning pump.
This production and repairing is the biggest obstruction in the way of recovery of rayon industry. But being desired by Toyo Rayon Company as well as various others, we would wish to accomplish this difficult works perfectly as there are few excellent makers of this type.

B) Automatic lathe for watch parts.

Precision machine tools with capacity of automatic mass-production of such precision parts as precision screws, pins and others, are indispensable for manufacturing watches which are very important industry either for export or domestic demands in Japan. But, there are few makers who are capable to manufacture precision machine of this kind in our country. We are, therefore, strongly desired by watch makers to manufacture and supply this item, believing our excellent technical works and experience for the past many years. As the Commercial and Industrial Ministry also recommends us to realize this plan, we wish to contribute to the rehabilitation of our industry by means of completing this work.

H. Komori

H. Komori, Manager
MITSUI SEIKI KOGYO K.K.,
TOKYO JAPAN.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

COPY

HEADQUARTERS I CORPS
APO 301 (Kyoto, Honshu)

Ref: MG - 167 (REVISED)

AG 004 - BA

SUBJECT: Permit for Reconversion from War Production and for Resumption of Production of Essential Civilian Commodities.

TO: Mitsui Seiki Kogyo Kabushiki Kaisha, Seta Works.

1604, Oaze, Seta-machi, Yurite-gun, Shiga-ken.

1. a. In accord with paragraph 3, b, Directive Number Three (3) from the Supreme Commander to the Imperial Japanese Government, dated 22 September 1945, the Mitsui Seiki Kogyo K.K., Seta Works, is permitted to immediately start production of a. Precise measuring equipment. b. Watches. c. Clocks. d. Die casting. e. Headlights for rolling stock. f. Sewing machine parts. g. Automobile parts. h. Printing machines. i. Repairing of automobiles. (NOTHING FOLLOWS)

b. Maximum production currently authorized is a,b,c,d,- as previously authorized e. 500 f. 450 g. 1,000 h. 20 i.10

2. The acquisition of material, parts and sub-assemblies as well as the disposition of finished products, and the establishment of sales prices will be in accord with the regulations of the Imperial Japanese Government.

3. Until otherwise directed by this headquarters, a monthly report in English of each item, by name, type and quantity produced by each factory, sub-contractor subsidiary within this factory's control will be delivered to this office by the fifteenth (15) day of the following month.

4. It is understood that this permit for reconversion is issued subject to any and all directives affecting reconversion, ultimate disposition or otherwise, which have been issued or may hereafter be issued by the Supreme Commander for the Allied Powers or by this headquarters.

BY COMMAND OF MAJOR GENERAL MUDGETT:

(Illegible)

PAUL SIBERT
Colonel, AGD,
Adjutant General

REMARKS:

(A) -----Those are spinning mill installations bought from Toyo Rayon K.K. en block with buildings and have never been used during the war.

(B) -----Those are spinning mill installations bought from Toyo Rayon K.K. together with buildings and were used as wellfare facilities but never for production during the war.

On account of the aforesaid reason, those of (A) and (B) were exempted in accordance with the indication of the military government officer in August, 1946, when the inventory was made.

(C) -----Those motors under 5 H.P. and not attached to machines were released in accordance with the SCAP Instruction in April, 1947.

I CERTIFY THAT ABOVE IS TRUE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF.
