*Offered under the title of
A. B. C. "DE LUXE"*

FOR FIFTY YEARS or more flower-seed specialists have tried by every possible device and experiment to obtain a double Petunia that would reproduce more than 50 per cent of double flowers, but their efforts have been of no avail.

It gives us great pleasure, therefore, to be able to introduce to our customers a strain giving practically 100 per cent of fully duplexed and beautifully fringed flowers of supreme value for pot plants, window boxes and general bedding work. We offer this strain with every confidence.

Firstly, we call special attention to our 1934 introduction.

Petunia A. B. C. "De Luxe" Tall Double Mixture

"WORLD BEAUTY"

Illustrated on front cover of this catalogue. It produces large double fringed flowers of the most beautiful rosy carmine color, plants of dwarf compact growth and which makes this grand new sort particularly desirable for pot plants as well as bedding. Petunia growers will, we believe, do well to culture "World Beauty" in a large way.

WHOLESALE PRICE LIST SPRING EDITION 1934

"QUALITY" and THE FUTURE of FLORISTS' INDUSTRY

GROWERS who have "kept their ears close to the ground" during the past few years have, we believe, come to the firm conclusion that a "HEALTHY PROFIT" will only be obtained in future time through the production of

"QUALITY FLOWERS AND PLANTS"

as against the principle of providing volume without giving serious thought as to grade. Market reports from the larger cities, especially during the past year, have sharply stressed the fact that the so-called "PRIME GRADES" generally obtained outlet at figures fairly consistent with the cost of production of such, while inferior quality was frequently found difficult of movement at quotations that allowed of a profit margin.

THE AMERICAN BULB CO. WILL DO THEIR PART in supplying basic material to the end that growers, under reasonably normal conditions, can qualify for a fair return on their output; furthermore, with a desire to assist the trade in every way to a return of more prosperous times. We have SHARPLY CONSIDERED PRICES, and quotations contained in this catalogue will be found to conform to EXISTING CONDITIONS IN THE FLORISTS' INDUSTRY.

Your continued patronage has, we are glad to say, enabled us to carry on during the stressful past years, for which we are most thankful, and we shall hope to deserve a continuance of your favors.

Awaiting your valued commands, we are,

Yours faithfully,

AMERICAN BULB COMPANY,

Per A. Miller, President.

TERMS OF BUSINESS

ROUTING: Please give explicit shipping directions with each order, giving name of Freight, Express and Post Office stations. If no directions are given, we will use our best judgment, but all goods travel at purchaser's risk.

DISCLAIMER: The American Bulb Company gives no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds (bulbs or plants) it sells and will not be responsible for the crop.

If the customer does not accept the goods on above terms, he must return them at once, and money will be refunded or proper credit given. We exercise, however, the greatest care to fill our orders with the highest quality possible, as it is our constant aim to give our customers fullest satisfaction.

DISCOUNTS: On bills for Flower Seeds, Bulbs and Plants a discount of 2 per cent for payment 10 days from date of bill may be deducted; 5 per cent cash discount is allowed on all orders of Flower Seeds; 3 per cent on Bulbs when remittance accompanies

the order, except items specially quoted or priced. All other goods are strictly net, as are also bills for goods supplied under special quotations unless otherwise agreed upon.

WHAT CAUSES "DAMPING-OFF"

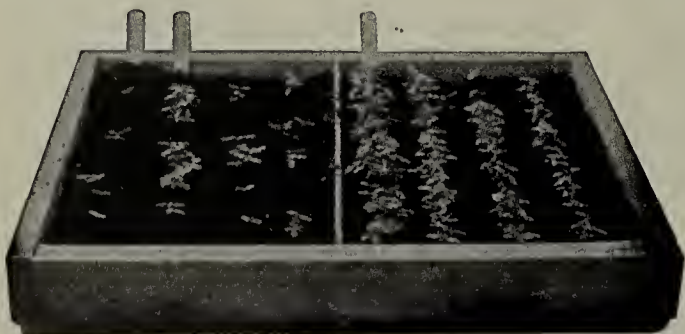

Few growers realize that such diseases as "Damping-Off" and rots of seedlings are caused by living germs. Too frequently such troubles are attributed to poor seed, poisoned soil or the weather. Disease producing germs live normally in the soil and on seeds. They are spread about by water, air currents and dead or decaying parts of diseased plants. When seeds are planted in soil containing disease germs, the germs become parasites and attack the young roots, often as soon as the seed sprouts. If the seedling is not killed before it emerges, the parasite makes another attack, just at the soil level, and the seedling topples over.

The only successful way of preventing these diseases is to sterilize the soil and disinfect the seed. The easiest, safest and most economic treatment is by the use of **Ansul Dust**.

The best of seed planted in soil containing an abundance of these germs will germinate poorly and show poor stands. The following photograph is of *Clarkia* seedlings. Note almost perfect germination in the treated soil and practically all plants gone in the untreated section.

Florists' Flower Seeds!

Special Note: 5% discount on all orders for flower seed when accompanied by cash

DOUBLY IMPORTANT

Since Flower Seeds are, these days more than ever, depended upon to produce **Cut Flower Crops of Quality** that will possibly furnish revenue to enable the grower to carry on under the existing economic conditions, it is **doubly important** that florists choose with the utmost care their source of supply of such seeds.

Specializing exclusively in this line to the florist grower from coast to coast, we devote our energies to the furnishing of

FLOWER SEEDS

to the **Discriminating Florist Grower**, and are justly proud of the esteem and favor our stocks of same have attained. Close contact with both American and European seed grower specialists and continued sharp observation of American cut-flower markets enable us to offer only "up-to-the-minute" kinds for "The Particular Grower," and at prices consistent with the quality you need for "RESULTS THAT COUNT."

Soliciting your valued commands, we remain,

Yours very truly,
AMERICAN BULB COMPANY.

UNSOLICITED TESTIMONIALS

January 6, 1932.

"We have used your Petunia seed in competition with other seed houses and find them always best."

(Signed) W. H. Gray Dundas, Ontario, Canada.

July 6, 1933.

"The plants from seed of A. B. C. Petunia show an unusually high percentage of double flowers of large size and fine assortment of colors. I have a very select trade and your strain has added considerably to my collection."

NOVELTIES! Recent Novelties and Specialties for the Florist Grower

AMARANTHUS

Stately annuals with showy, brilliant colored foliage.

Molten Fire. Finest and showiest of all Amaranthus with bronze foliage crowned with a head of glowing fiery scarlet. Introduced by the late Luther Burbank. Truly a most outstanding ornamental plant. Tr. Pkt.....50c ¼ oz.....\$1.00

NEW ANTIRRHINUM (Snapdragon) MAJUS (Tall Flowering) Autumn Glow

Autumn Glow is a lovely new Snapdragon and highly recommended for outdoor culture. Autumn Glow can be best described as a beautiful old rose, strongly shaded terra cotta, with a golden lip. The general color giving the effect of soft autumn tones. Tr. Pkt.....50c ¼ oz.....\$2.00

ANTIRRHINUM—Tom Thumb “Pinkie”

In this delightful little plant the charming bright rosy pink flowers are larger than in most Tom Thumb varieties and the plant being of very even habit renders it excellent for bedding and edging. In height it does not exceed 6 to 7 inches and is extremely free-blooming. In our experience it comes exceptionally true from seed. Tr. Pkt.....35c

Ageratum “Blue Cap”

AGERATUM “BLUE CAP”

(See illustration above.)

Undoubtedly the best dwarf Ageratum yet offered. The flowers are much larger than those of Little Blue Star and of a deeper and richer color. The foliage is small and the plants have the appearance of miniature domes so that it is quite the beautiful ideal for edgings to flower borders. Tr. Pkt...25c ¼ oz...60c Oz...\$2.00

AGERATUM “LITTLE SILVER STAR”

This charming counterpart of the popular variety Little Blue Star denotes a valuable addition to the Ageratum assortments. Little Silver Star is distinguished for its compact, close habit and is, therefore, specially recommended for edgings. The even, round, cushion-shaped plants, which are only from 4 to 5 inches high, measure from 8 to 10 inches across. When flowering, they are so thickly covered with silver grey star-like flowers that the small light green leaves are practically hidden. Tr. Pkt.....25c

ANTIRRHINUM MAXIMUM (Super Giant Sorts)

NEW ASTER, NEW MAMMOTH, "SNOWDON"

(See illustration opposite.)

Following is English grower's description:

This remarkable new Aster, which we have raised in our trial and selecting grounds, produces pure white flowers of large size, 4 to 5 inches across and of very bold and striking character, almost globe-shaped, with the upper petals imbricated, and the lower ones more curled and twisted towards the circumference. It is the fullest centered Aster that we have seen, with a depth of bloom of at least 2½ inches when fully developed. The plant is about 18 inches in height with a length of stalk of 14 to 15 inches. "Snowdon" will therefore be of excellent service for cutting, as well as being a splendid subject for late summer decoration in the garden.

Tr. Pkt. 50c

NEW ASTER "COVENT GARDEN WHITE"

This strain is of a robustness and vigor hitherto unknown in Asters. It is of tall growth, producing thick stems of about 20 inches in length. The plants are about 3 feet high and the flower stems commence to branch about 8 inches from the ground and at an early stage of growth.

The flowers are of enormous size, larger than "Giants of California" and very double. "Covent Garden White" is an ideal florist's variety. It is about a fortnight earlier than "Giants of California." Tr. Pkt..... 35c 3 Tr. Pkts..... \$1.00

SURPRISE ASTER "GOLDEN SALMON"

Pure salmon-yellow, becoming a brilliant salmon-rose when full grown. Flowers measure 3 inches across and will remain fresh for two weeks after cutting. Blooms resemble Paeony flowering types, begin to bloom in July and continue until late fall. Tr. Pkt..... 50c 3 Tr. Pkts..... \$1.25

*ASTER SUBCOERULEUS—Wartburg Star

A new giant-flowering race of these popular single-flowered Spring Asters. The bright lavender-blue (12 ga) marguerites with yellow centers measuring more than 4 inches across, are borne on stalks 28 inches long and appear in flower even earlier than those of the well-known varieties Artemis, Apollo, floribundus, etc., at the same time as the Aster alpinus superbus. Used alone or with white marguerites and Gailardias in flower at the same time, this giant light blue Aster is extraordinarily effective for vases and table decorations, etc., and is especially acceptable during the end of May and June, when other long stalked cutting flowers are scarce. Tr. Pkt..... 35c

ASTER (Improved) IMBRICATED POMPON

(Illustration opposite)

These small Pompon Asters have the past few years had great vogue with California growers and the past season were introduced to Eastern retailers with the result that they are now generally acceptable and highly thought of as cut flowers.

NOVELTIES! Recent Novelties and Specialties for the Florist Grower

ASTER IMPROVED NEW GIANT CALIFORNIA "SUNSHINE"

Aster Giant California Sunshine, originated by Howard & Smith, of Los Angeles, last season, undoubtedly is the finest cut flower Aster novelty introduced for many years. It is a cross between California Giant and the dwarf Sunshine Aster. Plants of this new race grow three feet high and bear blossoms on long stems, making them fine for cutting. Individual blooms are enormous, four and five inches across. In color the lovely dual-tone effect is wonderful, with the disk a lovely light yellow and the encircling guard petals varying shades of pink, apple blossom, deep rose, blue and lavender, producing most beautiful color contrasts.

One will be at once impressed and delighted with the striking beauty of this new Aster. The flowers exhibit all the grace and beauty of the single Aster, greatly enhanced by a cushion center of tiny quills of a contrasting color. The delicate beauty and high value of this Aster is hard to describe. Pure white, pink, lavender, blue, purple or mixed. Tr. Pkt. .50c 1/4 oz. .85c Oz. . \$2.50

ASTER "HERCULES"

A NEW COLOR IN DOUBLE FLOWERED CUT FLOWER ASTERS

Bright Blue. A color seldom seen. By far the finest blue yet produced in Asters. Of this splendid mid-season type everybody will be surprised at the lovely color of which no flower establishment can do without. Tr. Pkt.35c

BEGONIA SEMPERFLORENS "LIGHTNING"

"Lightning" is the darkest and most brilliant of all known red semperflorens and gracilis varieties. The remarkably large buds, measuring as much as an inch across, which form loose bunches of 10 or 12, are a deep blood red and the flowers, 2 by 1 inches, a deep carmine scarlet. These two shades blending so well together, both of extraordinary brilliance, make this variety a jewel for bedding purposes. The color effect is always striking, whether on dull or bright days, in the early morning or late evening. The foliage is dark green, edged with light brown. Begonia "Lightning" branches freely and grows only 9 inches high, thus filling the gap between the dwarf and tall varieties. We can highly recommend this profusely-flowering sunproof Begonia, which comes true from seed.

Tr. Pkt.50c

New Cut Flower Aster,
Improved New Giant California—"Sunshine"

BEGONIA "ENCHANTRESS"

A new Begonia of great value to the florist. Of compact growing habit; pale green foliage; flowers large and of bright pink color. Unusually free flowering. Tr. Pkt.75c

BEGONIA GRACILIS LUMINOSA COMPACTA

This is the first dwarf variety of the gracilis type. The plants grow only 5 inches high and produce a large number of thin stems. They are remarkable for their extremely regular growth and for a marvelous richness of blooms, such as is not attained by any other variety. From the middle of July onwards the small dark brown foliage is hidden by the mass of medium sized bright scarlet blossoms. This new variety, coming true from seed, is very useful for beds, borders, edgings and also as pot plants. Tr. Pkt.50c

CALLIOPSIS (Coreopsis) "MAYFIELD GIANT"

This very fine perennial Calliopsis, of Australian origin, is a considerable advance on any strain yet introduced of this highly ornamental and very useful flower. It produces a taller and more vigorous plant than the type, with longer and firmer stems and larger individual blooms, of which the ray petals are broader and form a more perfect corolla. The color is the same familiar yellow, if anything a shade more intense. Both for the border and for cutting we can strongly recommend this excellent new strain.

NOVELTIES! Recent Novelties and Specialties for the Florist Grower

Calceolaria Hybrida—"Multiflora Nana"

**OSTRICH-PLUME CELOSIA,
HEATHERDELL (Annual)**

Great trusses of elegantly feathered and handsomely interlaced plumes, so strikingly beautiful that they compel immediate and lasting admiration whether you grow them outdoors or in pots.

This exceptional new variety made quite a "hit" in the New York cut flower market and the Century of Progress Exposition, Chicago, in 1933, especially as a pot plant. Much appreciated as a cut flower, too. Red and pink or yellow shades. Also "Henna" colors. Tr. Pkt.....50c

**CHRYSANTHEMUM TRICOLOR
"WHITE QUEEN"**

A pure white form of the carinatum (Tricolor) type, this variety carries, instead of the crimson zone of carinatum type, an almost invisible band of pale lemon.

A novelty that should prove popular as a cut flower, for many market growers have placed orders for seed with us after seeing our beds. Tr. Pkt.35c

CREMER'S PRIZE CINERARIAS

(Excerpt from The Florists' Review, April 27, 1933)

"For seven years F. E. Cremer, Hanover, Pa., has been developing an improved strain of cinerarias, a specimen plant of which is shown in an accompanying illustration. The plant is in a 7-inch pot. That the strain is a superior one is indicated by the fact that Mr. Cremer has been awarded the first prize for his cinerarias for the past three years at the Philadelphia flower show. In addition to that, some plants shown at a recent meeting of the New York Florists' Club by Mr. Cremer received a certificate of merit.

The petals in most of the blooms of this strain are wide, numerous and overlap well to form attractive heads. The plants can be finished in smaller pots, too, making extremely shapely specimens covered with masses of blooms."

The old large "Pumpkin Leaf" has been entirely eliminated and is now practically wilt proof.

CALCEOLARIA HYBRIDA—"Multiflora Nana"

(See illustration opposite.)

Modern fashion often prefers small and richly flowering plants to those with larger blooms—Cineraria Nana Multiflora swept all before it and there is no reason why Calceolaria Multiflora should not do likewise. The average size of the blooms is only 1½ inches, but the amount of flowers produced is unsurpassed. The color scheme is extraordinarily gay and full of contrast. The yellow shades—lemon, gold, orange—are adorned with fine brown spots; the brown, orange-copper, copper-brown, copper-scarlet, crimson, scarlet are very striking. An assorted group of these shades is most effective, while a single specimen, 10 to 12 inches high, makes an ideal market plant. Tr. Pkt.....\$1.00

**NEW CALCEOLARIA MULTIFLORA NANA
"GOLDEN TIGER"**

The profuse, tiny flowered Calceolaria hybrida multiflora nana splendid mixed introduced two years ago, very quickly came to the fore on account of its many excellent qualities. The demand for separate colors from this brilliant and gaily colored mixture has been fulfilled by "Golden Tiger." Bright golden yellow flowers with dark brownish red dots are spread in plenty above the foliage. This variety is of very lively appearance; possessing at the same time all the qualities of C. hybrida multiflora nana. Owing to the masses of small, substantial blooms on a single plant, 10 to 12 inches high, this Calceolaria may be put to various uses. Tr. Pkt.....\$1.00 3 Tr. Pkts.....\$2.50

NEW "ANNUAL" CANTERBURY BELLS

Seed Planted in February Blooms in July

Many years of careful selection have at last given us an Annual Canterbury Bell which blooms from seed in less than six months. It should now be possible to have this beautiful flower in bloom at almost any time of the year. The plant grows from two to two and a half feet tall, each plant having from six to eight spikes of blooms. We offer this in mixture, containing the following colors: dark blue, light blue, pink, rose and white. We believe this to be a very fine novelty and that it will fill a long-felt want.

EXACUM AFFINE

Provides a most useful pot plant. Numerous small light mauve flowers with golden yellow stamens contrast wonderfully with the light green leaves. Seed sown January or February flower in June and continue uninterruptedly until the autumn. To obtain the best results, plant two plants in each pot. Rich soil of leaf mould and turfy loam in equal parts with some sand added is most suitable for its cultivation, which from the end of March must be carried out either in a cold frame or a well ventilated greenhouse with the minimum of shade. Exacum Affine is a fragrant and charming indoor plant. As a cheap market plant, it is worthy of notice. Tr. Pkt.50c

FUCHSIA HYBRIDA

Double Dwarf Early Flowering Mixed

The seeds have been gathered from compact, early, richly flowering varieties which have been crossed with one another. Seed sown in January or February will flower at the end of June and continue until the autumn. The plants produce from 85 to 90 per cent double blooms with white, lilac, pink, light and dark blue corollas. Raising these Fuchsias from seed gives very good results and is to be highly recommended. Tr. Pkt.50c

**GAILLARDIA GRANDIFLORA
"TORCHLIGHT"**

Few plants can rival the perennial Gaillardia for gorgeous effect in the border from midsummer onwards, the main drawback being a somewhat loose and untidy habit. In "Torchlight," however, the stems are much stronger and stiffer than in any variety hitherto produced, making the habit much more compact, and they attain a length of 2 to 2½ feet. The flowers are golden yellow with a rich maroon red center and often measure as much as 5 inches across. Both for the border and for cutting this new Gaillardia will be found of the greatest value. Tr. Pkt.....35c

New Cut Flower Gaillardia "Torchlight"

HOLLYHOCK—DOUBLE "IMPERATOR"

The coloring includes various tints of great beauty, such as cerise-salmon with center of cream reflecting rose; delicate pink with center of rose flushed yellow; light yellow flushed rose with canary yellow center; but there are many other charming combinations of different tints. The plant branches from the base, forming a majestic clump, and the lateral stems can be utilized in vases for decorative purposes. This splendid new Hollyhock can be relied on to come quite 80 per cent true from seed. Tr. Pkt.....50c Oz.....\$1.75

GAILLARDIA GRANDIFLORA — "Burgundy" (Perennial)

(See illustration opposite.)

The shining wine-red blooms (about 2 1/2 inches in diameter) are produced liberally on long stems by the bushy plants 2 1/2 feet high. They flower from June until the autumn and if sown in March blooms will appear the same year; an autumn sowing produces abundantly flowering plants next summer. 60 to 70 per cent pure red flowering plants can be counted on. Burgundy Gaillardia is most effective both in the perennial borders and when cut. "Burgundy" is a most agreeable addition to the Gaillardia family.

NEW SWEET SCENTED NASTURTIUM BODGER'S "GOLDEN GLEAM"

(Illustrated and described below.)

You will be pleased with this new Sweet-Scented Nasturtium as a cut flower when grown under glass.

(A very worth-while novelty) Bodger's New Double-Flowered Sweet-Scented Nasturtium "Golden Gleam." The plant forms a vigorous, large bush which throws out short runners, averaging 18 inches. The large, golden-yellow flowers average two and one-half to three inches across. They are borne on erect, stiff stems six inches in length.

When well-grown these flowers have the appearance of a fully double flower, and are most attractive. An ordinary sized bouquet, when allowed to remain in a room for a short period of time will fill the room with fragrance.

Equally desirable for greenhouse or open ground culture.

MECONOPSIS BETONICIFOLIA "BAILEYI"

(See illustration opposite.)

One of the finest introductions of recent years. This beautiful blue perennial Poppy, brought over from Tibet by Captain Kingdon Ward, throws up from its root-stock half a dozen leafy stems 3 to 5 ft. high, well furnished with broad sea-green leaves and bearing freely at their heads large 4-petalled blooms of a glorious sky-blue color, the effect of which is enhanced by a central zone of golden-yellow anthers. This superb plant has been accorded by the Royal Horticultural Society a First Class Certificate and an Award of Merit. It is hardy and should soon become one of the most popular plants in cultivation.

New Petunia "Lace-Veil"

PETUNIA FIMBRIATA NANA.
ERFURT DWARF
"LACE-VEIL"

(Illustrated opposite.)

European Specialist Grower's Description (Note: This particular grower has originated many of the choicest varieties of Petunias that are now in commerce):

Year by year the value of the large flowering dwarf Petunias for beds, borders, window boxes, etc., is more fully realized. A white fringed variety "Lace-Veil" has now joined the other fringed members of this group, the brilliant rose "Setting Sun" and the bright amaranth red "Gottfried Michaelis." The bushy plants about 1 foot high are thickly covered with white flowers measuring about 2 1/2 inches across. The finely fringed and sometimes waved edges of these flowers give the impression of a dainty lace gown. A very effective counterpart to any colored Petunia. Tr. Pkt. 50c

American Bulb Co.,
 Gentleman:

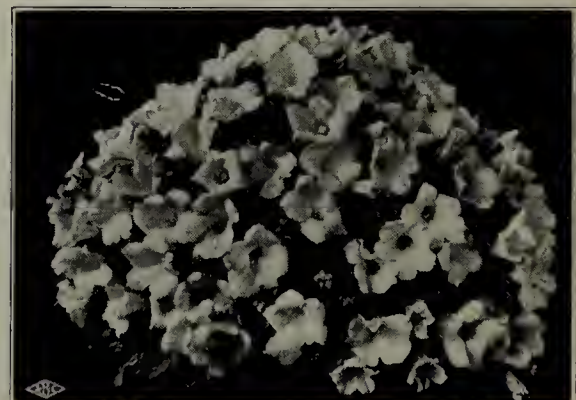

Our petunias this season, "Ruffled and Theodosia," from your seed, were a sight to see — consequence, could have easily sold as many more.

 Dear Sirs:

Your petunias are certainly a knock-out, especially "Theodosia." We had over three thousand petunias all from A. B. C. seed, and at this date, May 24th, we have not a single one left for Memorial Day. The retail price these petunias are bringing is 35c from 4-inch pots, which beats geraniums to a standstill. Petunia seed from A. B. C. for me always.

Yours truly,
 (Signed) JOHN HAUPRICHT.

New Miniature Petunia "Pink Gem"

"PINK GEM"

A New Race of Miniature Petunias
 (Illustrated below.)

This is the first of a charming new race of miniature Petunias. (Awarded gold medal by the American Seed Trade Association.) It forms a neat compact plant 5 to 6 inches high, literally smothered with deep pink blooms. A plant 8 inches in diameter will carry as many as twenty-five to thirty blooms in flower at one time. Individual blooms are 2 inches in diameter. This miniature Petunia will be indispensable for borders, window boxes, pots, rock gardens and for bedding. Planted with a dwarf blue Ageratum the effect is most charming. Tr. Pkt. 35c

A very free flowering single Petunia of unusually rich blue shade, which comes practically 100 per cent true. Furthermore, "Chicago Blue" withstands bad weather admirably, making it exceptionally valuable for bedding. Tr. Pkt. . . . 50c

PETUNIA "ERIKSSON'S
PRIVATE STOCK"

A new strain of "hand pollinated" large flowering dwarf Petunias, produced under glass by that eminent florist-grower, Mr. Ernst Eriksson, Riverside, Ill. (originator of "Primula Malacoides Erikssonii"). The large supply of plants produced from this strain last year in the Chicago market was not equal to the demand. If you grow pot plants you will surely want some of this outstanding new strain, exceptional for pot plants, bedding, window boxes, etc. Fancy mixed colors.

PRIMULA MALACOIDES "ERIKSSONII"

Originator's True Stock—Introduced to the Trade by A. B. C.

New crop seeds now ready for delivery.

We consider this the de luxe plant novelty and do not believe any grower of pot plants can afford to be without a good supply of the different kinds offered.

Complete cultural directions compiled by Mr. Eriksson furnished free with each order.

"Wonder Baby." A most beautiful pink.

"Baby Rose." Very deep pink, some almost red.

"New Baby." Near lavender-pink, the strongest grower with the largest flowers.

The originator, Mr. Ernst Eriksson, has added this year, two new varieties to his selection. These are real novelties (quantity limited):

"Baby Doll." A new deep pink with frilled flowers, very stiff stem, real fancy. Large lasting blooms.

"Baby Alba." A pure white beauty—the first white sport from Primula Erikssonii in 18 years. Exceptional for use in combination work.

Complete cultural directions furnished free when requested.

This new variety of the lovely "Usambara Violet" Saintpaulia ionantha, is distinguished by its very dark, cordated leaves, strong growth and large flowers of a deep lavender color.

Not only are these Saintpaulias very free flowering indoor plants, but they commence blooming while the plants are quite young—when sown in January they bloom in July and continue their display almost uninterruptedly; the contrast between the wealth of graceful flowers and the dark green shining foliage gives the plants an indescribable charm.

STATICE DUMOSA

The finest Statice for drying.

Of great value to the florist, in fact the most valuable of all Statice. In general appearance it resembles the well known Incana Nana variety, which, when dried, is being imported from Germany and here used in immense quantities in wreaths and other floral work. Dumosa differs from Incana Nana in having larger individual florets, much brighter in color, clear silvery white when dry and lavender when fresh. The branched stalks are more than twice the size of Incana, the main stems twice as stout.

For these reasons Dumosa is a highly valuable new variety. Height, 20 inches. Perfectly hardy without protection anywhere. Tr. Pkt. 35c

Salvia "Harbinger"

NEW DWARF SALVIA "HARBINGER"

Plants raised from seed sown at the end of February commence to produce in profusion their long spikes of dazzling bright scarlet flowers early in June, and maintain a blaze of color until the frosts. A more magnificent article for summer bedding can hardly be imagined. The plants are dwarf and compact in habit and the strong, dark foliage forms an effective foil to the vivid hue of the flowers. We consider this one of the finest novelties of present introduction. Tr. Pkt. 50c Oz. \$3.00

For additional varieties of SALVIA please refer to alphabetically arranged pages in this book.

STATICE SINUATA ATROCOERULEA "KAMPF'S TALL IMPROVED"

The annual varieties of Statice have been greatly improved during latter years, and, therefore, have become much more popular; and quite rightly, too, since there are few of the everlasting to equal them. Especially the blue variety, formerly somewhat pale and dirty-looking, has now attained a deep shining shade combined with size and substance of inflorescence. It only remained to establish a dwarf variety more suitable for bedding purposes and a tall variety producing the most valuable long-stemmed cutting flowers. Both are now here. "Kampf's tall improved" is unsurpassed for cutting and indoor winter decorations. It produces most brilliant, deep blue, dense blooms on stalks three feet long. Tr. Pkt. 35c

TAGETES (Marigold) "GUINEA GOLD" (See illustration opposite)

Distinctly new in type, of graceful pyramidal habit, Guinea Gold produces a neat, compact plant, about 2½ inches across, are semi-double in character, and loosely ruffled. The color is a brilliant golden orange or California gold, the color so much in demand by florists. When first introduced in England, it was offered as a bedding plant, but in the United States it quickly became known as a florists' cut flower, and its success has been phenomenal. The absence of the characteristic marigold odor has been in its favor, as well as its excellent keeping qualities when used as a cut flower.

NOTE: We have found that various types of "Guinea Gold" are being offered (some of them not so good). Our supply of seed of this valuable cut flower is exclusively from the original English introducers.—A. B. C.

NEW VERBENA HYBRIDA GRANDIFLORA SPECTRUM RED

As its name implies, this magnificent Verbena is an intense bright red, brighter than any other Verbena yet introduced. According to Ridgway, it is classified between Spectrum Red and Scarlet Red. Having absolutely no eye, the color is intensified, and its brilliance is quite dazzling.

It is much brighter and larger than Lucifer and is comparable only to Etna, but without Etna's yellow eye. Individual florets are one and one-fourth inches in diameter. We strongly recommend this as the brightest Verbena in existence. Tr. Pkt.....50c ¼ oz.....\$1.25 Oz.....\$4.00

NEW VERBENA VENOSA "LILACINA"

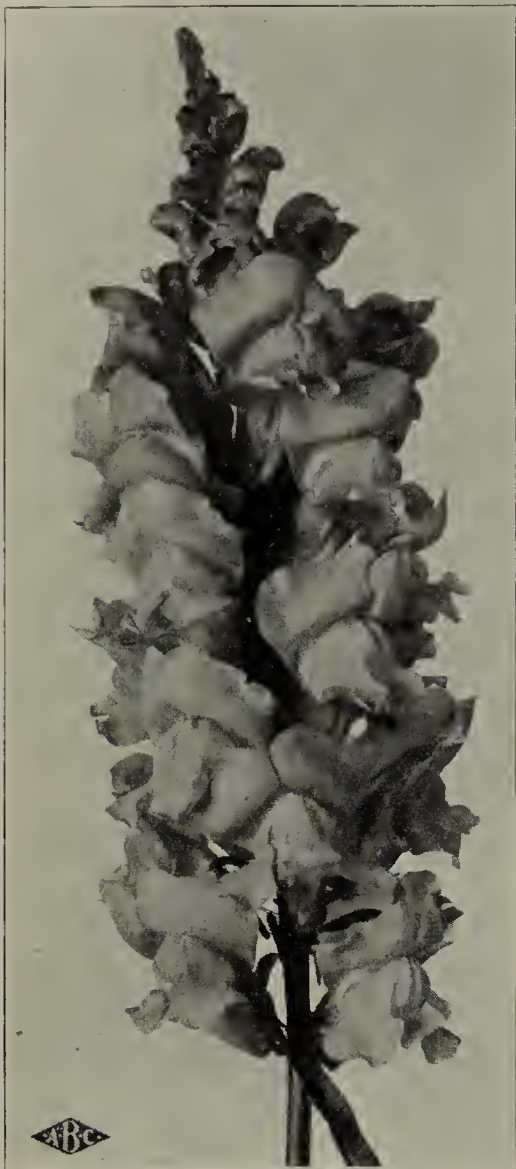

A new variety with delicate lavender-blue flowers has now been added to the well-known favorite purple and the silver form of Verbena Venosa. Like the original variety it is excellent for carpet bedding and borders, it grows 1 foot high. The mass of flowers which hides all the foliage shows off the color to the best advantage. Verbena Venosa Lilacina, in conjunction with the dark type, is therefore a valuable and dependable material for color schemes and effects in general bedding work. It is also most useful for cutting. Tr. Pkt.....50c

NEW DOUBLE ANNUAL WALLFLOWER "EARLY WONDER VIOLET"

In the assortment of annual double Early Wonder Wallflowers there has been so far no violet similar to that of the old biennial Wallflower. The long strong central spike of this new variety is thickly covered with large double violet blooms. The ruby violet of the young flowers takes on a blue tinge as they become older. These dark violet spikes next to the yellow varieties excite just admiration. Early Wonder Wallflower sown in March will flower from August until the frost comes. It is also advantageous to continue sowing at intervals of a few weeks from June to September in order to obtain a continuation of richly flowering, sweetly smelling plants in the open during autumn and winter and early spring in the greenhouse or cold frame. Thus during a season when flowers are scarce it is possible to have splendid material for pots and cutting purposes. Tr. Pkt.....50c

PLANT FREELY OF TAGETES "GUINEA GOLD" FOR SUMMER CUT FLOWERS

Aster, New Super Giant "Los Angeles"
(One-half natural size)

New ASTER "Los Angeles"

Characterized by the long, heavy stems and large fully double flowers so in demand by florists.

The color is an exquisite shade of pure shell pink. The flowers are borne singly on long non-lateral stems, which require no disbudding.

Among the many fine novelties in Asters that it has been our privilege to offer to the trade, we regard this as one of the most outstanding introductions of the decade, and predict a bright future for it. Tr. Pkt. . . . 50c 1/4 oz. . . . \$1.00 Oz. . . . \$3.50

ASTER—Daybreak

Plants 2 1/2 feet high, erect and robust habit. Flowers large, very double, recurved, closely imbricated, making it one of the best for decorative purposes.

Shell Pink or White. Tr. Pkt. . . . 35c 1/4 oz. . . . 75c Oz. . . . \$2.50

ASTER—Improved Giants of California Curled and Interlaced

(Also known on the Chicago Cut Flower Market as "Chicago Giant Beauty")

This new Aster is somewhat of the Crego and Beauty type, but is practically non-lateral, producing flowers of immense size without disbudding and of wonderful substance on strong, stiff stems 20 to 24 inches long, acclaimed by wholesale and retail florists as the ideal of cut flower Asters.

White, Peach Blossom, Deep Rose, Light Blue, Light Purple, Dark Purple, Carmine-Rose.

Each of above—Tr. Pkt. . . . 35c 1/4 oz. . . . 75c Oz. . . . \$2.50

HARDY CARNATION "IMPROVED CRIMSON KING" EXCEPTIONAL FOR CUT FLOWERS AND ROCK GARDENS

New Double-Flowered Cyclamen

The development into flower of a Cyclamen as a commercial plant is no "child's play," and florist growers "who understand" will not speculate with so-called "bargain priced" seeds. The planting of "true Ferd. Fischer Strain" is not a speculation under reasonably normal culture.

DOUBLE ROSY MORN

This beautiful small flowered double pink Petunia has come into the greatest favor, especially as a pot plant. However, since seed produces only a nominal number of double flowers, it is well to sow early and take cuttings from the true double. The single flowers produced from this strain are, however, equal to the highest type of Rosy Morn and all available.

A. B. C. "DE LUXE"

Double Tall or Dwarf Fringed Mixed

(Illustrated and described on inside front cover.)
 Like "World Beauty" described above, was also tested approximately 100 per cent exceptionally fine large double flowers, in a choice range of colors and shades. We consider this new strain a wonderful advance in double Petunias from seed. The "Dwarf Mixed" is particularly recommended for pot plants.
 Tr. Pkt. \$2.00 3 Tr. Pkts. \$5.00

"MARVELOUS" DOUBLE MIXED

A good average strain of double fringed large flowering Petunias with a fine range of colors and shades, producing approximately 40% double and the balance in valuable single blooms.

Exceptional

New Verbena Hybrida Grandiflora "SPECTRUM RED"

(See illustration above.)

As its name implies, this magnificent Verbena is an intense bright red, brighter than any other Verbena yet introduced. Having absolutely no eye, the color is intensified, and its brilliance is quite dazzling. Individual florets are one and one-fourth inches in diameter. We strongly recommend this as the brightest Verbena in existence. Tr. Pkt. 50c 1/4 oz. \$1.25 Oz. \$4.00

New Verbena Hybrida Grandiflora "CERISE QUEEN"

A beautiful shade of soft salmon-cerise, quite new in Verbenas, making a charming addition to this group. It has immense individual flowers one and one-fourth inches in diameter on giant trusses, with fairly long stems, making this Verbena suitable for cutting. It is recommended to all who want a lively new color in Verbenas. Tr. Pkt. 50c 1/4 oz. \$1.25 Oz. \$4.00

A. B. C. GIANT FLOWERING VERBENAS

A magnificent new strain of Verbenas of robust compact habit and free blooming. The trusses are immense, the individual florets measuring fully an inch in diameter.

DIENER'S NEW BLIGHT-RESISTING TOMATO

"VENTURA"
(Diener's Description)
"Ventura" is the most perfect Tomato produced so far, as it is very early. The fruit is as smooth as an apple, having a weight of four to eight ounces. Its flesh is of a fine tomato color and is very solid when ripe, so much so that it keeps solid for several weeks without spoiling or rotting, being immune from Fungi. It can be shipped in a ripe condition to very long distances. "Ventura" has a very delicious taste, it being a seedling of the Diener tomato, which is known for its wonderful flavor when canned. It is extremely free bearing.

HARDY PERENNIAL PLANTS

Perennials are a real need for the average florist, blooming at a time when greenhouse stock is scarce, and by growing a collection of cut flower kinds you are assured of flowers for a job which must be turned out in a limited time. We have grown on contract all **Perennial and Rock Plants** that are worth-while and we are in position to supply practically all kinds in commerce at low market values. Please write us about your perennial needs.

SPECIAL NOTE: Lack of space in this catalogue prevents listing our complete line (the product of over 100 acres). However, after February 15, 1934, we will publish a complete catalogue of all worth-while kinds, including rock plants in great variety. Copy mailed free.

King Humbert. This remarkable Gold Medal Canna has been the sensation of the past ten years and is the greatest favorite today. It is a cross between the orchid-flowering and the French or Crozy type, combining the large flowers of the one with the free-blooming character of the other, with handsome, broad, tropical foliage. Scarlet flowers; bronze leaves. 4 feet. 100....\$3.75 1,000....\$32.00

King Midas. Clear yellow, green foliage. The finest and largest yellow Canna in existence. 100.....\$4.50 1,000.....\$40.00

Mrs. Alfred Conard. One of the very best Cannas in commerce today. Large, exquisitely shaded salmon-pink flowers are produced in great abundance on robust, upright stalks. We consider this as superior to all pink flowered Cannas. 4 feet. 100....\$5.00 1,000....\$40.00

The President. 4 feet. This immense new flaming scarlet has come into wider use more quickly than any other Canna. It is an off-spring of the famous Firebird. The President leads the red varieties in the quality and also the quantity of its bloom. The flowers are 7 inches across; the individual petals are firm and long standing, and do not burn, and the trusses stand up stiff on strong stems. The foliage is rich green and burn-proof in the hottest weather. 100.....\$3.75 1,000.....\$32.00

Yellow King Humbert. 4 feet. An orchid-flowering sport of the well-known King Humbert. Has the same habit of growth as its parent; foliage a very dark green, with flowers measuring 5 to 7 inches across; individual petals measuring 3 to 3½ inches in diameter. Flower a deep, rich yellow, softly spotted and blotched with bright red. Some plants occasionally give a scarlet or scarlet striped flower, which we consider an improvement rather than a detriment. 100.....\$3.75 1,000.....\$32.00

A. B. C. "SUPREME" QUALITY GLADIOLUS

We are producers of high quality, healthy bulbs in large volume, and shall be glad to have you write us at any time about your Gladiolus problems. No flowers are cut from the plants, allowing all vigor and strength to revert back to the bulb to insure good results. This is important. Bulbs are produced in Northern Indiana in a good sandy loam, and are thoroughly cured. Our growers hold an Indiana Agricultural State Inspection Certificate certifying all bulbs free from thrip and other diseases.

Varieties of recent introduction which were merchandised two years ago at from \$5.00 to \$10.00 each, are now available to the florist at prices that suggest a reasonable profit in their culture. The kinds listed in these pages will, we believe, qualify with the varieties that you will need for success. We particularly recommend the following as being outstanding, for cut flowers especially:

Aflame	Highland Laddie	Mrs. Von Konynenberg
Betty Nuthall	Joerg's White	Mrs. W. P. Sisson
Chas. Dickens	Marmora	Odin
Commander Koehl	Marnia	Picardy (The Sensation of the Gladiolus World)
Dr. Bennett	Minuet	Pride of Wanakah
Dr. Van Fleet	Mrs. F. C. Hornsberger	W. H. Phipps
Giant Nymph	Mrs. Leon Douglass	

For complete description and prices of above see listing in these pages.

Gladiolus
"Early Sunrise"
A desirable forcing variety

IMPORTANT TO THE FORCER

Please bear in mind the fact that Gladiolus Bulbs which we supply for forcing under glass have been especially cultured and scientifically treated for that purpose. Under reasonably normal conditions growers should obtain worthwhile results from such stock.

Polyanthus Narcissus

TRUE TEXAS GROWN—"Lone Star" Brand

We call your particular attention to our "Paper Whites" and "Soleil D'Or" grown in Texas. They are equal to the French (flowers above the foliage, no grass). As Mr. Bernard, a prominent French Narcissus grower, stated, when he was here a few years ago (having had more than forty years' experience in the growing and handling of French Narcissi), in order to grow good "Paper Whites" you must produce bulbs in one season's growth. Our climate in northeastern Texas is adapted for the culture of "Paper Whites." We have cool autumns, slight snows in the wintertime, as in southern France, and we have a long spring of good growing weather, which gives us that one season's growth. Since growing "Paper Whites" in Texas we have delivered up to ten million without complaint.

Every case is marked "Texas-grown," and with a government certificate showing where they were produced. Therefore, buyers are assured of the genuine product.

PAPER WHITES—"Lone Star" Brand

For November, December and January Blooming

- 12 ctm., for late forcing—1,250 to case.
- 13 to 14 ctm., fine for forcing—1,250 to case.

- 15 to 16 ctm., fine for forcing— 900 to case.
- 16 to 17 ctm., fine for forcing— 800 to case.

GRAND SOLEIL D'OR

So-Called "Yellow Paper White"

The true French type. Large-flowering clusters.

- 14 to 15 ctm.—1,000 to case. 16 to 17 ctm.—750 to case.
- 15 to 16 ctm.— 900 to case. 17 to 18 ctm.—600 to case.

Prices on all of above quoted on application.

Early purchase of Polyanthus Narcissus (Texas Grown) will, we believe, result in your favor, especially the larger sizes.

Narcissus

TEXAS-GROWN NARCISSUS (DAFFODIL) BULBS
LEAD THEM ALL FOR EARLY BLOOMING

110 acres in the leading commercial varieties—King Alfred, Sir Watkin, Henry Ford (Improved Emperor), Laurens Koster, Horace and Grand Soleil d'Or—and 10 million Paper Whites. Our Paper Whites are equally as good as the French-grown (flowers above the foliage). You can plant early or late and obtain the same good results. Our prices are very much reduced. Paper Whites and Soleil d'Or are as a rule quite profitable.

PLANT A. B. C. TEXAS-GROWN NARCISSI FOR LATE

THE FLORISTS' REVIEW

"The result of an unusual achievement in growing was seen last week at the greenhouses of W. A. Rowe Floral Co., Kirkwood, Mo., where King Alfred Narcissi were already in bloom. The photograph reproduced on this page was taken December 15, and the flowers were on that day on sale in wholesale houses in St. Louis and Chicago.

"This stock was grown from Texas bulbs shipped to the grower in September from the Chicago warehouses of the American Bulb Co., and this is said to be the earliest known date that King Alfred Narcissi have been brought into flower. It is pointed out that the record contrasts with the record of foreign-grown bulbs, which used to come into flower in February. At the Rowe establishment the growers expected to cut from the entire planting 25,000 bulbs by Christmas time."

The lady in the picture is Miss La Verne Rowe, daughter of the proprietor.

The Sensational
NEW WHITE CARNATION
"JOAN MARIE"

(Plant Patent No. 3—October 20, 1931)

Statement of Introdurers, The Florex Gardens,
North Wales, Pa.:

SIZE OF FLOWER

JOAN MARIE'S average size for a fully developed flower during the entire season from November 1st to June 20th was between 4¼ inches and 5 inches across the flower.

PRODUCTION RECORD—Flowers per Plant

It is an acknowledged fact that of all the varieties of commercial carnations grown today Ivory and Pink Abundance are the greatest producers. We grow both in quantity, yet JOAN MARIE PRODUCED MORE FLOWERS PER PLANT THAN EITHER IVORY OR PINK ABUNDANCE.

JOAN MARIE Produced:

- 12.93% more than Ivory.
- 8.12% more than Pink Abundance.
- 36.16% more than Spectrum Supreme.
- 59.65% more than Boston Ward
- 127.95% more than Radiolite

This beautiful Hardy Carnation made a "big hit" at the Century of Progress Exposition in Chicago the past summer and fall.

"IMPROVED CRIMSON KING"

will be much appreciated by your garden clients.

New Hardy Carnation "Improved Crimson King"

(Excerpt from the Florists' Review)

"A CENTURY OF PROGRESS NOTES
Novelty Shown

"A number of novelties have been shown at the various exhibitions at the Horticultural building at A Century of Progress, Chicago, during the past few months. One of the recent ones was the hardy Carnation, Improved Crimson King. Several vases of the novelty, shown in the illustration on this page, have been on exhibition during the past few weeks."

A New Hardy Carnation that was Most Highly Acclaimed at the Recent Century of Progress Exposition, Chicago, where it was displayed for several weeks.

"IMPROVED CRIMSON KING"

(See Illustration Opposite)

The Truest Hardy Outdoor Carnation. A beautiful strain of hardy pink, which resembles most of all the indoor Carnation, blooming in great abundance all summer, flowers full double and of brilliant crimson color. Excellent for cutting, very hardy and extremely fragrant.

Particularly Desirable for Bouquets and Basket Work

This new introduction is, we believe, of great value to the trade not only as a cut-flower but as well for garden show and particularly in connection with rock garden planting. Rock Gardens are of great interest today and here is a plant that will surely please your clients—a spray of these hardy Carnations intermingled with Gypsophila Ehrlei and ferns is very effective.

By wiring four or five of the smaller blooms together, five or six dozen of these flowers will make a large spray. A small outdoor planting furnishes enough flowers for many such pieces. The plants do better if flowers are all cut as they come into bloom.

“Pep Up” Your “Mum” Production
with “NEW BLOOD”

Through contract arrangement with one of the largest producers in the United States, we are prepared to supply in good season every worth-while “Mum” in commerce in units of 100 to 100,000 (or even as small as 25 of a variety), as all cuttings are propagated from “GUARANTEED HEALTHY PLANTS.” This is a real opportunity to “CHANGE YOUR MUM BLOOD” and at prices in conformity with the times. We issue a special catalogue of this line containing all of the older kinds of value, as well as novelties of merit which will enable you to keep “on top” with your Mum production.

This special “Mum” catalogue indicates date of blooming of the various sorts and will be mailed free for the asking.

N. B.: This catalogue will likewise contain our listing of Carnations, rooted cuttings, new and standard varieties.

Begonia “Gloria,” Vivid Rose-Pink Sport of Melior

New Begonia “GLORIA”

(Following is excerpt from Florists’ Review, Nov. 30, 1933, issue)

NEW HOLIDAY BEGONIA “GLORIA”

“A new winter-flowering Begonia that will undoubtedly prove of great value for Christmas sales is Gloria. It is a sport of Melior, being characterized by more compact growth, smaller leaves and a much deeper and richer color. The last-named can be described as a brilliant or vivid glowing rose-pink, the flowers having an iridescent sheen that gives great life to the mass of blooms, but which is lost in the accompanying reproduction. Most of the flowers are male, so that they hold on longer and better than do those of other varieties of this type.

“The compact dense growth of Gloria makes less tying and fewer supports necessary, which factor saves much time for the grower. For the same reason, the plants can be shipped with less danger of damage in transit. The plants are vigorous and practically immune to fungous diseases when properly grown.

“In the four years of its existence, Gloria has shown no tendency whatever to revert to type or vary from the standard of its type, according to its originator.”

"The Florist-Grower's Book of the Hour"

FRITZ BAHR'S "COMMERCIAL FLORICULTURE"

It's a book every beginner should read and study, for him it means obtaining information vital toward success.

It's of equal value to the experienced grower, as it contains the best, most up-to-date cultural methods for plant and cut flower crops for both under glass and outdoors.

IF YOU ARE IN THE RETAIL GROWING BUSINESS, or if you have any idea of ever getting into it, you can make no better investment than to buy a copy of Fritz Bahr's Commercial Floriculture.

The price is \$5.50 per copy, postpaid for cash with order or postage extra on charge orders.
