## Wikipedia:WikiProject Women scientists

From Wikipedia, the free encyclopedia

Welcome to **WikiProject Women Scientists**, a WikiProject dedicated to ensuring quality and coverage of biographies of women scientists. Unfortunately, part of Wikipedia's [systemic bias](#) is that women in science are woefully underrepresented. Let's change that!

**Let's begin!**

# Step 1: Research

**WikiProject X** is an initiative to improve [WikiProjects](#) and other subject-area [collaborations](#) on Wikipedia through research, design, and experimentation. This project is a community initiative led by [Harej](#) and [Isarra](#) and funded by the Wikimedia Foundation through an Individual Engagement Grant.

**Shortcut:**  
[WP:WPX](#)

In the project's first phase, we are focusing on research, including the different ways current WikiProjects operate and the way different sub-communities on Wikipedia use WikiProjects. Here is how you can help:

- **Share your WikiProject story**, good, bad or neutral. How have WikiProjects helped you? How have they frustrated you? Your feedback will help us during our design process.
- **Become a pilot tester**. Are you part of a WikiProject that needs help getting organized? Want to get more people involved? Sign yourself (or your WikiProject) up for pilot testing, to begin in the spring.
- **Sign up for our newsletter** for occasional updates from the WikiProject X Team. You can also follow us on [Facebook](#) and [Twitter](#).
- **Join the project** – become a member of WikiProject X!

 About this discussion 

 Edit description

The **Article Request Workshop** is a board to develop ideas for Wikipedia articles before they get created. The goal is to unite the different lists of requested articles, missing topics, and WikiProject-specific missing article lists into a single list shared between projects and groups so that no effort is wasted on duplicated work.

**Shortcut:**  
**WP:ARW**

**It does not replace anything.** Other pages, such as [Wikipedia:Requested articles](#), will stay exactly as they are (except where [consensus](#) emerges on a case-by-case basis). If you like the Workshop, continue using it! If you don't like it, you can recommend changes on the [talk page](#) or contribute your suggestions for
