The Way to the East

California is the most delightful of lands. One leaves it with sincere regrets, always intending to soon return.

But the East, too, has many charms, even when zero

weather prevails.

For the pleasure-loving there are in winter long sleigh rides and merry skating parties, ending with the evening dance, cosy fireside chats, or a box at the theatre.

For the business man there is the thrill of crowds and the alluring atmosphere of great wealth. The busy, eager life of a metropolis like Chicago or New York stirs the blood and clears the brain. Magnificent art collections, libraries and churches appeal to the reflective visitor.

The East has much of interest for the Westerner.

When you do go East, the long journey involved should lead you to select the most comfortable way.

Of the several transcontinental routes, there is one

best of all. That road is the Santa Fe.

It begins at Los Angeles, San Diego and San Francisco and ends at Chicago — under one management all the way.

It is the shortest from Southern California.

Crossing Arizona and New Mexico a mile above the sea, it avoids excessive

snows in winter and excessive heat in summer.
Scenery the finest in the world. The Grand Canyon of Arizona its crowning

glory.

In Western Arizona and California the track is oil-sprinkled and engines burn oil.

"Night reading made easy by electric berth lights"

The Start Eastward

Early in the evening of a winter's day, yet the red walls of La Grande station, Los Angeles, are beautified by blooming roses, and in the miniature park are calla lilies and geraniums, fragrant and lovely. Graceful palms bend over the driveways. The air is balmy, like summer.

Cabs whirl up to the curb and travelers descend, hurry across the sidewalk, and enter the station—stopping, perhaps, to buy tickets and have their baggage checked—then passing to the platform, where a long train is waiting.

At San Francisco, in the morning, other travelers were

likewise leaving California for the East.

Ahead may be heard the impatient engine, anxious to begin its relay contest with mountain grades and prairie winds. This luxurious train is certainly inviting—so warm, so full of light and color! It is to be a home on wheels for many travelers during the next three days en route from sunland to snowland.

Congenial persons — educated, refined, and well dressed — are the kind one meets here; hence the journey is sure to be pleasant socially, a point worth considering.

The train? The California Limited, noted among transcontinental travelers as absolutely the finest, recently built at heavy expense for this

service; everything up-to-date.

The route? Santa Fe, of course. Experienced travelers take no other.

To-morrow night this scene will be repeated, and the night following, and so on until Spring.

"The compartment car provides grateful seclusion"

Concerning the Train

The train is limited to seven cars, all wide vestibuled, comfortably heated, and electric lighted.

There are:

Observation Pullman, Los Angeles to Chicago, attached to rear of train.

Drawing-room Pullman, San Diego and Los Angeles to Chicago.

Drawing-room Pullman, San Francisco to Chicago.

Compartment Pullman, Los Angeles to Chicago.

Through Dining Car.

Buffet-Smoking Car, Los Angeles to Chicago, with duplicate car San Francisco to Barstow.

Mail Car.

The Drawing-room Pullmans contain ten sections and two drawing-rooms each; the Observation Car contains ten sections in forward half and observation parlor in rear; the Compartment Car contains seven staterooms and two drawing-rooms.

Leaving San Francisco 9.30 a.m., and Los Angeles 6.15 p.m., you are in Chicago the third day following—a noteworthy speed for such a long distance, made possible by perfect roadway and powerful engines.

On this line the famous Lowe Special made the record-

breaking time of 2 1/6 days, Chicago to Los Angeles,

2,265 miles.

No extra fare is charged on The California Limited, beyond the cost of regular first-class one-way or round-trip tickets, except that if one person occupies a drawing-room alone, two first-class tickets will be required; also, one and a half tickets for a state-room similarly occupied.

"You always dine well on the Santa Fe"

The Dining Car

When the first call for breakfast comes the Limited has left the California boundary and is hurrying eastward through Arizona.

The thirty dining car seats are quickly occupied.

The chef and his two cooks are soon busy preparing juicy steaks, rare omelets, fragrant coffee, hot muffins and other items on the varied menu.

From the kitchen mysteriously emerge dusky waiters,

bearing appetizing delicacies from many lands.

The tables are very inviting, with their snowy linen, glistening silver, and cut-glass. Ferns and flowers adorn side alcoves. Electric lights gleam from the top and sides. A device in ceiling of kitchen removes any odor of cooking.

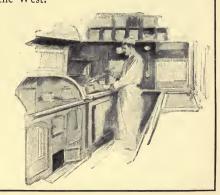

All the meals to follow are equally enjoyable.

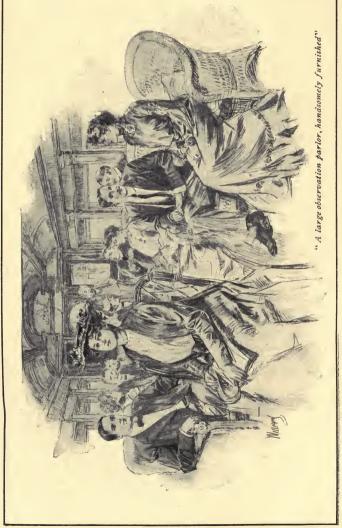

On The California Limited one may leisurely partake of repasts duplicated only in the best metropolitan clubs and hotels. Dining car is carried through. Breakfast and luncheon are served à la carte; dinner, table d'hôte.

The Santa Fe meal service, under management or Mr. Harvey, has a national reputation. Not an idle boast, but plain truth, to say it is the best in the world.

Some comments by pleased passengers: "Meals well cooked and well served." "Superb dining cars." "Quality of meals unsurpassed." "A perfect dinner." "Finest cuisine in the West."

To dine well is half the joy of a trip to California. You always dine well on the Santa Fe.

The Observation Car

Has ten sections of two double berths each. gers may easily sit up in the lower berth. Night reading and disrobing are made easy by two electric side lights conveniently placed in each section. Similar berth illumination is provided in the other sleeping cars.

The rear half is a large observation parlor, handsomely furnished with velvet-cushioned rattan easy chairs, a thick brussels carpet and heavy curtains - all in quiet tones.

Two end windows, reaching to the floor, and half a dozen wide plate-glass double side windows, afford unobstructed views of the receding landscape.

There are numerous ground-glass electric lights in ceiling and on sides. Electricity is further availed of for push buttons and ceiling fans.

A writing desk in the corner

contains modish stationery. Near by is a well-stocked library of books, mainly devoted to Western topics. Current daily papers, illustrated weeklies and magazines are furnished.

Locked mail boxes are placed in this and the buffet-smoking car for reception of letters written on the train, to be

mailed en route.

Those who enjoy being out doors - and who does not love the "open"? — will find camp chairs on the protected rear platform.

All privileges of the Observation Car are free to every passenger on the train. Particularly desirable for ladies and

children.

The Buffet-Smoking Car

A spacious smoking and reading room for gentlemen, with carefully-stocked buffet, is a feature of this car.

Club comforts greet the city man.

Seated on plush or leather, after-dinner cigars may be leisurely enjoyed. The day's market report, hot from the wires, keeps investors in touch with Wall Street.

A skillful barber will hair-cut you, singe you, shave

you, shampoo you.

There is a well-stocked writing desk, for business cor-

respondence, and a mail box.

Daily papers, bearing news of the busy world you left yesterday and the one you will greet to-morrow, jostle the latest products of the joke mills and the finished articles of the literary magazines.

The porter in charge will, on request, neatly press your clothes — an innovation introduced this season for the

benefit of fastidious dressers.

It's a place in which to take one's ease, to forget all worries, and be genuinely comfortable.

Rather pleasant, isn't it, when evening comes, to sit here in the warmth and glow and watch the night outside?

The Compartment Car

Adds the finishing touch to a superb train. Provides grateful seclusion and privacy for those who wish it. Contains seven state rooms and two drawing-rooms.

Family parties, ladies without escort, and invalids will

find this style of sleeper very desirable.

Each state room has two double berths, also lavatory and toilet. Ventilation is perfect. In the ceiling are several electric lights. Ladies will find the electric curling-iron heater a great convenience. Ample baggage racks are provided. Doors lead to adjacent rooms; when open the rooms may be thrown together, free from observation by passers-by in the long side aisles.

Attractive color schemes are used: green, red, blue and pink upholstering in connection with old oak,

mahogany and curled maple woods.

In the drawing-rooms will be found two double berths and a seat. Wide windows admit an abundance of sun and air from both sides.

Additional California Trains

There are two additional daily California through trains via the Santa Fe on which all classes of tickets are honored; they carry standard and tourist sleepers and chair cars.
