CAMPBELL

(THE ORCHARD CITY)

Lies 50 miles south of San Francisco on the Santa Cruz division of the Southern Pacific Railway, 5 miles from San Jose, in the famous Santa Clara Valley, the garden spot of the State.

SCENERY SUPERB

With the Santa Cruz Mountains to the west and south and the Coast Range on the east, a majestic amphitheatre is formed, the beauty of which can not be excelled anywhere. Campbell has an altitude of 195 feet. The cool breezes from San Francisco bay, at the north insure an even and comfortable temperature throughout the summer months, while the winters are warm and pleasant. Flowers bloom out of doors the year around.

EDUCATIONAL ADVANTAGES

Campbell has a population of about 600. It maintains a (third class) post-office which distributes mail to 3,000 patrons, covering over 30 square miles of orchard homes. There are two churches—Methodist and Congregational—a first class High School and Graded School, and within a few miles are two Universities, two Colleges, a State Normal School and several Business Colleges and private schools.

The Stanford University with its marvelous architecture is only 20 miles away.

NO SALOONS

Campbell has a complete water system of its own. It has electric lights and power for mechanical purposes, which is distributed throughout the orchard district. A telephone exchange serves over 40,000 people. A prohibitory clause in all deeds to property within the town limits, prevents the saloon from being established.

FINE ROADS AND RESORTS

The Santa Clara Valley boasts of the finest roads to be found in the State. It has over 350 miles of sprinkled rural highways. In attractions for tourists the Santa Clara Valley can not be surpassed. Thirty-two miles eastward over a magnificent mountain road is the famous Lick Observatory on Mt. Hamilton, 4,444 feet above sea level. There are numerous mountain retreats within two hours' drive for those who love the camp and sparkling brook. The sea beach to the southward 27 miles by rail or carriage drive, and through the most beautiful mountain scenery in the world.

A trip to the Big Trees, twenty feet in diameter and two thousand years old, will furnish a delightful day's outing.

MINERAL SPRINGS

The hot springs of Alum Rock Canyon and Congress Mineral Springs are within two hours' drive, giving a panoramic view of the entire valley.

The Almaden Quicksilver Mines, the largest in the world are within easy access by rail or team.

The largest seed farms in the world only 10 miles distant.

FRUIT CENTER

Campbell's mammoth fruit dryer and packing house is the largest in the world. It has a capacity of over 10,000,000 lbs.

The Campbell Orchard District is noted for the quality of its fruits. For delicacy of flavor and beauty and perfection of color, its cherries, apricots, peaches, apples, plums, grapes and pears, have no equal in their fresh state, and command the highest market price. As cured or dried fruit the Campbell prune, apricot, and peach is shipped to every civilized country on the globe. Nearly one-half of all the prunes grown on the continent are from Campbell orchards. One and a half million cans of fresh fruits are packed in Campbell every season.

The demand for intelligent labor is increasing every year. Families desiring profitable employment in orchards, packing houses and canneries find this an ideal home.

LAND VALUES MODERATE

Land values are very moderate—bare land brings from \$100 to \$300 per acre and when set to trees sells from \$200 to \$1,000 per acre, according to location and age of orchard. Ten to fifteen per cent is an average net income, while many places yield a much higher rate.

In short a Campbell home is one surrounded with HEALTH, WEALTH AND PLEASURE.

Bishop Charles Henry Fowler of Buffalo, generally regarded as perhaps the most eloquent of the Board of Methodist Episcopal Bishops, is to deliver the Baccalaureate Sermon to the class of 1904. Bishop Fowler's career has been most interesting. As a missionary of the Methodist church he has labored in South America, Japan, Korea, China, Russia and India. For a number of years he was President of Northwestern University. He has been prominent in the founding of a number of churches and educational institutions, among them the first Methodist church in St. Petersburg, Pekin University and Nankin University in China, Nebraska Wesleyan University at Lincoln, Nebraska, and the Maclay College of Theology in Southern California. After the great Chicago fire in 1871 he proposed to the Methodist Episcopal Conference a plan to pool the interests of the Methodist churches destroyed by fire. Bishop Fowler is to be one of the leaders in the missionary conference of the Methodist church to be held in San Francisco in the near future, and also in the General Conference of the Methodist church, which is to be held in Los Angeles during May.

The Story of New Zealand.

By Prof. Frank Parsons, Ph. D.; edited and published by C. F. Taylor, "Equity Series" 1520 Chestnut street, Philadelphia; 860 pp., over 170 illustrations; \$3 net.

"The Yankees of the South Pacific" as Professor Parsons calls the people of New Zealand, have established a trust by the side of which the Standard Oil, the United States steel, the beef combine, the coal trust or any other of our combinations, fades into utter insignificance. This trust of southern Yankeedom owns and controls all the telegraphs and telephones in the country, practically all the railroads and banks, and a large part of the farms and forests. It also owns and operates coal mines, steamships, factories and hotels. It does the biggest insurance business, and is the largest employer of labor in the commonwealth. It has resulted in vast economies, and has made New Zealand in fact the richest country per head in the world. It has vast political power also as well as industrial power. For it controls absolutely the making and enforcement of law.

This bears a striking resemblance to the condition towards which our own trusts have been working. Each controls large industrial interests and a large section of governmental power. If the telegraphs, telephones, railroads and banks should unite in a single trust with big blocks of farming land, mines, factories, etc., it is not unlikely that complete control of the government would go with this gigantic industrial sway. This result has already been attained in New Zealand. There is, however, this vital difference between the New Zealand trust and a trust evolved in this country by the merger of our railway, bank, insurance, telegraph and telephone companies, viz: that the New Zealand trust belongs to the people while the American trust, if formed on our present lines of trust development, would belong to a few multi-millionaires. Such a trust would concentrate wealth and power in the hands of a little group of industrial potentates, and destroy democratic government and free institutions. The New Zealand trust on the contrary, diffuses wealth and power among all the people and is the acme of democracy both political and industrial.

No more important movement has occurred in the last decade than that in which New Zealand liberals have shown the world how, by the application of co-operative principals and public control, the most gigantic industrial combinations may be made to enure to the benefit of the whole community. And "The Story of New Zealand" contains by far the best and fullest account yet published of this great movement in the little America of Australia. Though many previous writers devoted themselves more or less to New Zealand, they left practically untouched one most important field of research, viz: the order, causes, consequences and fundamental meaning of the politico-economic development of the island commonwealth that leads the world to-day in political and industrial progress. SILVER BELLS

Revolution in Bread-Making

We have found the flour that is going to make a revolution in Bread Making.

WHY?

It is made from Blue Stem Wheat and Hard Wheat from Minnesota, and it is blended in such proportions as to produce flour for bread making that has never before been offered in this community.

Silver Bell Flour, the miller tells us, contains 28 per cent gluten.

Housekeepers coming here from the East ask why they can not obtain flour equal in quality to Pillsbury's Minnesota Flour.

The answer is that most California flour is made from Australian Wheat, while Minnesota's best Patent Flour is made from Hard Wheat.

SILVER BELL FLOUR is put on the market with the assurance that it is not excelled in quality by any flour whether made here or in the East. We claim for Silver Bell Flour that it will make from eight to ten more loaves of bread to the barrel than flour made from Australian Wheat and we are going to offer this carload of Silver Bell Flour at the regular prices for our local flour:

Barrel.....	\$5.10
100-pounds.....	\$2.55
50 pounds.....	\$1.30

It is our expectation that every bread maker in Santa Clara county will not rest satisfied with her bread until she has given the Silver Bell Flour a trial.

FARMERS UNION

CAMPBELL, CAL.

this Professor Parsons has devoted himself with the force and clearness, analytic power and constructive vigor that characterizes all his writings. The Story of New Zealand is unquestionably one of the most important studies now before the American people. The thanks of the public are due to the public spirited editor and publisher who gave the order for the work, made many valuable suggestions during its progress, and put it on market at a very moderate price, and to the author whose able and impartial research, keen analysis and luminous English have made the work a remarkable success.—W. J. Bryan in The Commoner.

SANTA CLARA COUNTY is preparing to make an extensive demonstration at the World's Fair along the line of cooked prunes, in all their various phases. To this end a sum of money is being raised to properly carry out the project for the six months during the fair. It is a big undertaking, but one that should be carried to success. In this way the multitudes visiting our exhibit can see what fine fruit the prune really is when properly prepared. Let all of our people aid financially in this matter. The different Granges and fruit associations and individuals are contributing to the fund and such a worthy object should not be let to suffer for want of funds.

THE primary election for Santa Clara County will be held next Tuesday. Campbell precinct voting place will be at Campbell hall.

There may be two opinions as to the right or wrong of dancing. There cannot possibly be two opinions as to the unwholesomeness of the late hours and indiscriminate company of public dances. The youngest girl who attends them, and some of them are pitifully young, knows the effect upon herself is anything but beneficial. The only question is, how great is the harm and who will be injured most. This only time can tell. Some will lose their health, through carelessness after the vigorous exercise. Some of the foolish damsels will wreck their lives by marrying the worthless youths who are always present in profusion at such functions. As ninety-nine girls out of a hundred make good wives no matter how silly they may have been, the counter danger to the boys is not worth mentioning. No single habitual attendant at these affairs will escape some harm, mental, moral or physical. Their minds do not need convincing. Their consciences do need convicting. It does seem a pity that so many children are left to decide these matters for themselves at an age when they should still be guided by their parents' judgment.

Pacific Coast Exposition.

Lewis and Clark Centennial at Portland, Oregon, Next Year.

International scope is assured to the Lewis and Clark Exposition to be held at Portland, Oregon, from June 1st to October 15th, 1905, by President Roosevelt's approval of the act of Congress making an appropriation for the Exposition, and his invitation to foreign countries to participate. Portland's Exposition will represent a total outlay of over \$5,000,000. Though covering 405 acres of land and natural lake, it will be compact in form, and the average person will be able to see and comprehend it all in a few days at moderate cost. The cream of the foreign and domestic exhibits to be made at St. Louis this year will be transferred to Portland at the close of the Louisiana Purchase Exposition. The United States exhibit will be moved entire to Portland and installed in buildings to be especially erected. This exhibit will be worth \$800,000. In addition, Portland will have many features which will not be seen at St. Louis, such as exhibits demonstrating the life, customs and industries of China, Japan, Hawaii, Siberia, Russia, Alaska, Australia, New Zealand, the Philippines and India.

The Lewis and Clark Centennial will be the first international exposition under government patronage ever held on the Pacific Coast. It will be in every way a Western Exposition. The railroads will make low rates from Missouri and Mississippi River points to Portland, and exceptionally low rates will be in effect between Portland and the Rocky Mountain region.

Curtis Hanger sold his ranch in the Santa Cruz mountains to Rufus Preston this week. Mr. Preston has been for a year or so in Oregon, but his family being dissatisfied there he came back and has been looking for a suitable location. His family will soon join him here.

Mrs. Bartlett has for sale cheap an old open buggy, 1 set of single harness, 1 set of truck harness, a good chain, shovels, kit of carpenter's tools, several farming implements, one block and tackle. Apply at 593 Bird Ave. San Jose.

A Tour of Europe.

Prof. J. A. Foshay, Supt. of Schools, Los Angeles, is organizing a party to leave the Pacific coast on June 11th for a tour of Europe including England, Scotland, Holland, the Rhine, Germany, Italy, Switzerland and France, with a six-days stop-over at St. Louis to see the Exposition. This will be a fine opportunity, especially for school teachers in the long vacation, to visit such historic spots as Stratford-on-Avon, Edinburgh, The Hague, Cologne, Frankfurt, Venice, Geneva and Paris, whilst many more of equal interest, will be on the itinerary of the fortunate members of Prof. Foshay's party. Write Prof. Foshay for particulars.

Tabby Again.

"I stretched a claw into the air,
It scratched, alas! I knew not where."

Several times have I been asked to direct a scratch at the dances so numerous and popular at present. This I have not found it in my heart to do. Where else will be found an amusement which gives the mind such complete rest—which in fact renders the possession of a mind entirely superfluous. In which, as its devotees claim, grace and ease of movement are so effectually promoted. (To be sure, this grace is reserved especially for use in the ball room, and seldom by any chance displayed on the common highways.) Then the exercise is so beneficial—really, in the case of some young men I have seen enjoying the pastime, quite equal to a thermal bath. It is sometimes objected by carping critics that nice girls are brought into association with young men of questionable character at these dances, which is of course liable to happen when the only qualification for admission is the possession of the necessary coin; also that sometimes they have been drinking more or less. Now all such critics should remember there are two sides to every case. Consider how much better company these young men are in than is sometimes their lot, and also how strictly limited must be the quantity of liquor consumed since it is necessary that a dancer be able to stand on his feet. Viewed in this light, a dance might be considered a reformatory measure for wild young men.

Once I had the privilege of knowing a girl who was a finished product of the dance. She was a sweet and amiable young lady too, with many excellent qualities beside the transcendent one of being the most graceful dancer of her set. She wore a gold medal as a testimonial to that fact, won in a competitive examination. At first I marveled much at that, as she was not exactly my ideal in the matter of grace. But I perceived in time that I was not judging her fairly. She was not all there, so to speak—she was rightfully half of a couple, and in her detached state as incomplete as an oyster on the half shell. She subsisted on tea and cake and often was obliged by her delicate health to remain in bed between dances. But was it not well worth while?

Let the gold medal answer.

No, never ask me to scratch at a dance. I have heard the artless prattle of dear young things on last night's dance and tomorrow night's dance and the one on Fourth of July and Washington's birthday and can I lift a claw to deprive them of what seems to be the highest enjoyment of which they are capable?

MRS. CECELIA STOWE,
Orator, Entre Nous Club.

176 Warren Avenue,
CHICAGO, ILL., Oct. 22, 1902.

For nearly four years I suffered from ovarian troubles. The doctor insisted on an operation as the only way to get well. I, however, strongly objected to an operation. My husband felt disheartened as well as I, for home with a sick woman is a disconsolate place at best. A friendly druggist advised him to get a bottle of Wine of Cardui for me to try, and he did so. I began to improve in a few days and my recovery was very rapid. Within eighteen weeks I was another being.
