REPORT.

The President and Directors of the LAKE SHORE & MICHIGAN SOUTHERN RAILWAY COMPANY submit to the Stockholders the following Report for the fiscal year ending December 31, 1875 :

ROAD OPERATED.

The number of miles of Road operated in 1875 was the same as in 1874—1,175.39 miles—of which 540.37 are Main Line, and 635.02 miles are branches and tributary Roads. This Company owns 1,024.71 miles of Railroad, (although 160.11 miles are embraced in three other organizations), and leases 150.68 miles.

Of the 540.37 miles of Main Line, 230.80 miles are double track, making the Main Line, reduced to single track, equal to 770.45 miles ; and two branches—203.66 miles—are so situated that they, with the Main Line, form a double line of Road between Cleveland, Ohio, and Elkhart, Indiana, (101 miles east of Chicago), making, together, 974.11 miles of Railroad, of which 604 miles are laid with

steel rail. Contracts have been made for substituting 14,000 tons (150 miles) of steel rails for iron, during the coming year.

The side tracks were increased in 1875 by 17.48 miles, and now amount to 446.70 miles.

The total number of miles of track to be maintained amounts to 1,852.89, the details of which, location by States, etc., will be found in the usual place in this Report.

CONSTRUCTION.

This account for 1875 amounted to \$275,481.25, as follows :

EQUIPMENT.

But little change was made in the equipment of the Road in 1875. Two engines were sold, reducing the number from 497 to 495. Ninety-five cars of various classes were added, increasing the number from 10,442 to 10,537. The amount of this account for 1875 was \$95,238.02. For six years, 1870 to 1875, inclusive, \$5,904,087.09, for 223 locomotives and 4,739 cars.

The Road is equipped sufficiently for a much larger volume of business than it is now doing.

The balance against this Company for car service was reduced, as predicted in the last Report, from \$614,315.86 in 1874, to \$428,807.03 in 1875, and a further reduction will be made in 1876.

CAPITAL STOCK.

The Capital Stock of the Company is \$50,000,000, to wit:

Guaranteed (10 per cent.).....	5,335 Shares—\$100.....	\$ 533,500
Ordinary.....	494,665 Shares— 100.....	49,466,500
	500,000 Shares—\$100.....	\$50,000,000

Of the Guaranteed Stock, the claim for dividends between 1857 and 1863 has been settled by compromise on \$350,600, leaving \$182,900 still unsettled. Dividends of 5 per cent. February 1, and 5 per cent. August 1, have been regularly paid on this stock since August 1, 1863, the date of the first dividend.

Of the ordinary stock, the Company owns 2,514 shares, (\$251,400,) which appears among its assets in the balance sheet.

BONDED DEBT.

The Bonded Debt of the Company stood—

December 31, 1874.....	\$36,511,000
December 31, 1875.....	36,250,000
DECREASE.....	\$ 261,000

This decrease was accomplished by providing for the arrearages of the Sinking Fund of the First General Consolidated Mortgage of \$25,000,000. This mortgage provides for a sinking fund of one per cent., or \$250,000 per year. This obligation has run for five years, amounting to \$1,250,000, and is now entirely fulfilled. This leaves outstanding \$23,750,000 of the First General Mortgage debt—including the divisional—or bonds of the different companies embraced in the consolidation, which, at maturity, are to be merged into this debt.

Of the Second General Mortgage of \$25,000,000, there are outstanding, including the bonds of 1882, \$12,500,000. The entire debt of the Company bears interest at the rate of seven per cent. (currency).

The usual table giving details of each class of bonds now outstanding, will be found on a subsequent page.

An analysis of the decrease in Freight Earnings, 1875, shows as follows :

Decrease from reduced rates.....	\$1,603,501 47 or 13.45 per cent.
Decrease from reduced business.....	675,810 17 or 5.67 per cent.
TOTAL DECREASE.....	\$2,279,311 64 or 10.12 per cent.

The average rates per ton per mile for the past six years have been as follows :

	EAST-BOUND.	WEST-BOUND.	BOTH WAYS.
1870.....	Cent, 1.356	Cent, 1.882	Cent, 1.504
1871.....	Cent, 1.357	Cent, 1.478	Cent, 1.391
1872.....	Cent, 1.272	Cent, 1.638	Cent, 1.374
1873.....	Cent, 1.297	Cent, 1.437	Cent, 1.335
1874.....	Cent, 1.098	Cent, 1.432	Cent, 1.180
1875.....	Cent, .954	Cent, 1.155	Cent, 1.010

The bitter conflict with each other, inaugurated by other Lines in 1874, extended through three-quarters of the year 1875. Into the sharp competition resulting from this conflict, this Company was unavoidably drawn; and to this mainly, aided, however, by the general depression of business, especially the great prostration of the iron and coal business, causes beyond the control of its management, may be attributed the fact that this Company earned but \$2.20 per share of stock, against \$6.25 per share in 1874.

The average rate per ton per mile in 1875 was, on its entire business, through and local, but one and one-hundredth cents, which is fourteen and one-half per cent. below the very low rate of 1874, (1.18.) This difference— $\frac{17}{100}$ of one cent—on the large tonnage moved, resulted in a loss in Net Earnings of \$1,603,501, which is equal to $3\frac{1}{4}$ per cent. upon the Capital Stock.

No more effective illustration of the excessive depression of the rates of transportation could be given than the following comparison:

Average rate per ton per mile, all freight, 1860.....	Cents, 2.292 (gold.)
Average rate per ton per mile, all freight, 1875.....	Cents, 1.010 (currency.)
REDUCTION.....	Cents, 1.282 (56 per cent.)

On the other hand, taxes in 1875 have averaged 400 per cent. more than in 1860—in some localities as much as 1000 per cent.—while the cost of supplies and labor used in operating railroads was no less.

An average rate of one and one-quarter cents per ton per mile—but little more than half (54 per cent.) the rate of 1860—in connection with the rigid economy enforced in every department of the Road, would give the stockholders of this Company dividends at the rate of seven per cent. per annum.

The Earnings from Passengers, as compared with the two preceding years, show the following results:

1875—Moved 3,170,234 passengers, an average distance of 52 miles, at an average rate of 2.38 cents per mile, earning.....	\$3,922,797 88
1874—Moved 3,096,263 passengers, an average of 56 miles, at an average rate of 2.45 cents per mile, earning.....	4,249,022 37
1873—Moved 2,845,163 passengers, an average of 63 miles, at an average rate of 2.55 cents per mile, earning.....	4,569,729 74

Decrease in 1875, as compared with 1874, is caused by—

Slightly diminished average rate, (7-10 of one mill).....	\$115,465 60
Less miles traveled—4 miles per passenger.....	210,758 89
TOTAL DECREASE.....	\$326,224 49

It is a gratifying fact that the *local* business of the road was larger in 1875 than ever before—showing an increase of 67,109 tons freight and 79,328 passengers, in both cases 2.6 per cent. over the previous year.

The reduction in Earnings from “all other sources,” \$106,395.87, is more apparent than real, the most of it caused by the receipt, in 1874, of back pay for increased mail service, unduly swelling the mail earnings of that year.

OPERATING EXPENSES.

Operating Expenses and Taxes, 1875, including 105 miles steel rail.....	\$10,531,500 88
Operating Expenses and Taxes, 1874, including 78 miles steel rail.....	11,152,371 56
Operating Expenses and Taxes, 1873, including 141 miles steel rail.....	13,746,598 54
REDUCTION, 1875, as compared with 1874.....	\$ 620,870 68—5.57 per cent.
REDUCTION, 1875, as compared with 1873.....	3,215,097 66—23.4 per cent.

It is expected that 1876 will show a further large reduction in this account, the first quarter of the year being over \$600,000 less than the same quarter of 1875.

The expenses for 1875 include the entire cost of 9,962 tons (105 miles) of steel rails. 522,753 cross-ties—185 miles—were renewed. 157 cars of various classes were built and purchased to replace a like number worn out or destroyed.

The Road and Equipment have been maintained in all respects, and emerge from the mild winter in excellent condition.

GENERAL REMARKS.

Upon reference to the "Income Account" on a subsequent page, it will be found that the two items, "Discount on Bonds" and "Interest on Floating Debt," which have appeared in that account, in each preceding annual report of this Company, and have absorbed so much money, are not there; they have disappeared never to return, it is hoped.

The sale of bonds and increase of debt came to a full stop in 1874. No increase in the aggregate funded debt has been made since the troublesome floating debt, inherited from the previous administration, was extinguished; not only so, but a movement has been made in the opposite direction, by providing for the sinking fund, thus reducing the funded debt.

A noticeable fact shown by this report, is, that after paying every charge against the year 1875, including (by anticipation) the dividend payable February 1, 1876, and satisfying the sinking fund, there remained in the treasury a very considerable balance, applicable to the future. This is the first time that this result has been attained.

The fixed charges against Net Earnings, which take precedence of dividends upon the Capital Stock, will be, in 1876, as follows:

Interest on L. S. & M. S. R'y debt, \$36,250,000 at 7 per cent.....	\$2,537,500
Interest on D., M & T. " 924,000 at 7 "	64,680
Interest on K. & W. P. " 600,000 at 7 & 8 "	44,000
Dividend on Guaranteed Stock, \$533,500, at 10 per cent.....	53,350
Rental four branch roads—partly estimated.....	275,000
	<u>\$2,974,530</u>
Less interest and dividends on assets.....	225,000
TOTAL.....	\$2,749,530
Equal to \$229,000 per month.	

Mr. Amasa Stone, your Managing Director, resigned July 1, 1875, on account of ill health and private business. Mr. John Newell, formerly President of the Cleveland & Toledo Railroad

Company, (now a part of this Road), and later President of the Illinois Central Railroad Company, was, upon Mr. Stone's resignation, appointed General Manager of the line. Great credit is due these gentlemen and their subordinates, for efficiency and economy in operating the Road and managing its affairs.

The proportions of Freight Movement this year were—East-bound, 71.9 per cent.; West-bound, 28.1 per cent.
 The average haul for each ton carried was—East-bound, 200.5 miles; West-bound, 161.7 miles; Total, East and West, 187.8 miles.
 The reduction in the average Rate for East-bound freight was 144-1000 of a cent (13.1 per cent.); West-bound, 277-1000 (19.3 per cent.); for all freight, 170-1000 of a cent, or 14.4 per cent.

The decrease in our Freight Earnings is as follows:

Decrease from reduced average rate per ton per mile.....	\$1,603,501 47—	or	13.45 per cent.
Decrease from reduced average distance moved, and tonnage carried.....	658,072 27—	or	5.52 per cent.
Decrease in Earnings from E. & P. R. freight, etc.....	17,737 90—	or	0.15 per cent.
Total decrease in freight Earnings.....	\$2,279,311 64—	or	19.12 per cent.
