Inspection of Reparation Factory

12th Oct 1948

By S. Lts
K. Murata

Factory Code No. 35-3

No. of Machines 110

Class
I 37 II 56 III 17

A. Operated and Non operated machines
1. "O" machines (in operation) 13
2. NON-operated machine 97
3. NON REPARATION Machine (EX. M.) — 0

B. Kind of industry factory engages.
staple industry
No. of factory workers 2500

C. Condition of Custody
(1) No. of workers tend to the up keep of the reparation machines — 15
(2) Due to the increase production of the staple industry by this factory, the factory space, where the reparation machines are kept is gradually crowded with the setting up of staple machines. At present the staple machines are being run close to the reparation machine. The closeness of staple operation coupled with the nature of the materials they work on, the whole place is flying with dust, and keeping the reparation machines from dust falling is very hard. Told the custodian to take measures to prevent dust from flying over the machines.
(3) There are some motors and parts of machine unnumbered. -- told custodian to fix the numbers corresponding with the numbers of main machines

D. Care and Conditions
Caring of machine was satisfactory as a whole with the following exceptions.
(1) Oil for prevention of rust on machines was lacking on some parts
(2) Two or three machines lacked the care of gear change

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(3) Some devices for important parts were missing when said machines were over hauled

(4) "Reparation Sign" are too small told custodian to put up another sign with proper size

(5) Machines are well guarded.

Remarks; As this factory is staple factory "A" machines are used mostly for repairing staple machines used in this factory and maximum utility of "A" machine can not be expected.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

REPORT ON THE NO. 2 FACTORY OF OMI KOKU CO.

1. Degree to which other firms producing same products can satisfy civilian needs.

2. Estimate and recommendation of Liaison Office as to whether or not the firm must continue in operation in order to satisfy minimum civilian needs.

1. How to utilize this works

As this company required a wide space, from the nature of the business (framing the fuse-lages and planes of aircraft), they divided the factory into two places, and the second factory used a part of Hikone works of Omi Silk spinning Co. Which are under same capitalistic routes. While now that the works have been converted to the peacetime industry, there is no more necessity of having such a wide space. So that it is supposed that to transfer the equipments of this works to the 1st works and let the latter fully engaged in the production of agricultural implements and fabric machines, upon unification of two works is the most rational and efficient manner of utilization.

Therefore, the building of this works is to be returned to Omi Silk spinning Co. above stated and restore the pre-war business, i, e, spinning of silk, rayon, pongee thread. It is the best plan to let the works devote to the fabric industry, which produces the only returned-goods of our country, keeping in step with the establishment of our peaceful industry.

2. Plan after the return of this works to Omi Silk spinning Co. Up to the beginning of 1943 Omi Silk Spinning Co. held 18,600 sui in spinning dept, 60188 sui in rayon dept, 1696 sui in pongee dept, but on account of the adjustment of enterprise, in fabric line of business, the company sold 23,458 sui in rayon dept. to the Government, Therefore, the company had a surplus space in the compound, on account of which they could lend to O.A.M. Co., While 2,000 tsubo or so of the silk spinning works were burnt down by the air raid, on July 28, 1945, and the co-mpanys space of operation was reduced to a large extent.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Thus, since that time the company has been making its efforts to the repair and recovery of the damaged part. Such being the case, they are now in need of that part they lent once to Omi air craft Co.

Upon recovery of the above stated part of the works the company will be able to install 36,730 sui of rayon spinning machines, 18,600 sui of silk spinning machines, and 1,696 sui of pongee spinning machines, by which the company will be sure to in crease the production as follows.

Silk spun thread	60,000 kan	per month
rayon	500,000 lbs	per month
Pongee	2,000 kan	per month

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

APPLICATION FOR DEPRECIATION OF REPARATION MACHINES

Location : 104 Nishibamba-cho,Hikone,Shiga Pref.

Name of Co.: Omi Industry Co.,Ltd. Hikone 2nd Works.

Date : January 20th, 1949

To : Shiga Military Government Team.

Subject: re application for depreciation of Reparation Machines.

We wish that the Military Government Team be good enough to give favourable consideration to our application concerning to the depreciation of reparation Machines from the 1st class to the 3rdclass for the following reasons.

Number of machines	Name of machines	Present class	Reasons of Depreciation intended
35-3-85	Air-Compressor	1	This machine was moved from Mitsubishi Heavy Industry Co. to this company during the War. And it has never been used until the end of the War,and it has never been used thereafter. It was classified as the 1st class by mistake,but it was certified afterwars by the close examination thet it lacks in many parts of the machines and its function is indistinct. Moreover, it is imposible to get the lost parts now. Such being the case,it can not be operated in the status quo.
35-3-86	Heat Treatment Furnace	1	~~These machines were bought at second~~ hand during the War,and used by repairing all the time. And they have no parts but furnaces. These parts were lost in the confusion of the surrender, and it is impossible to get the lost parts now. Considering their construction, these furnaces will be useless if they are removed. These machines were classified as the 1st class by mistake, but they should be classified as the 3rd, as a matter of couse.
35-3-87	as above	1	
35-3-88	as above	1	

Thanking you in anticipation of your kind attention to this matter, we remain.
