Official position *Health Officer*

Date of issue of permit *1/4/22*

Permit No. *376*

N. B. - WHITE PLAIN, WITH UNFADING BLACK INK THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIAN should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colon mill*, (c) *Salesman*, (b) *Grocery*; (a) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*, *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *20 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Assthenia," "Anemia" (merely symptomatoic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascribed as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIAN should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Example: *Meningis* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely sym. tomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Erbility," "Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Miasmatus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "TERMINAL septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 83, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 83, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatic (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," "Congestive," "Sault," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committees on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death. Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or the agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .
— *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.**

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to **disease**, specify: (1) Under **cause**, its known or presumable nature; and (2) under **manner**, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death)."

DESCRIPTION (for unknown person)

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

20 UNDERTAKER **F. J. Crosby**
ADDRESS **12 Warren St Boston**

Official position **Health Officer** Date of issue **1/31/22** Permit No. **379**

PHYSICIANS should state CAUSE OF DEATH EXACTLY. AGE should be stated EXACTLY. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g. *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Garlic canner*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages; as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphenteric* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Menses* (disease causing death), *39 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Coma," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Pneumopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information, as the give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, neurosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief of the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. *Revised Laws, Chap. 29, Secs. 10 and 11, as amended by Acts of 1910, Chap. 822.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 58.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

21 I HEREBY CERTIFY that a satisfactory standard certificate of death was filed with me BEFORE the burial or transit permit was issued. S. A. Mowry

Official position Health Officer Date of issue of permit 2/1/22 Permit No. 1380

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Approved by U. S. Census and American Public Health Association!

Jan 31 1922

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or *At home*, and children, not gainfully employed as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meningis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meningis* (disease causing death), 29 da.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestional," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 89, Secs. 10 and 11, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 79, Sec. 33.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 74, Sec. 8.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there be no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Cool room*, etc. Women at home, who are engaged in the duties of the housewife, etc. Women at home, who receive a definite salary, may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelicate); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name definite, if possible; avoid use of "Tumor" for malignant neoplasms); *Mesenteric Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Mesles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Hemorrhagic," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PERIPERAL septicemia," "PERIPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committees on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 89, Secs. 10 and 11, as amended by Acts of 1910, Chap. 822.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectman for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 84, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Example: *Meningis* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Scall," "Lapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 40, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons) thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of.....* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), 39 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia," (merely sym.omatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Heart failure," "Hemorrhage," "Ins-etc.," "Droopy," "Exhaustion," "Heart failure," "Hemorrhage," "Ins-etc.," "Marsasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Corticarcs will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscar-riage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or ••• from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory cer-tificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such cer-tificate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; other-wise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness of disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without request medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths sup-possibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

BOARD OF HEALTH PHYSICIAN'S CERTIFICATE OF DEATH

To be used only in case there is no attending physician or if for sufficient reason the attending physician's certificate cannot be obtained early enough for the purpose of granting a burial permit, as provided by Revised Laws, Chapter 78, Section 38.

GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died [defined so that it can be classified under the international classification of causes of death, where contracted, the duration of his last illness, when last seen alive by the physician and the date of his death. . . .]—*Revised Laws, Chap. 29, Sects. 10 and 1, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or if is insufficient, the chairman of the board of health, or a physician or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, . . . medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner of cause of the death, which the clerk or registrar may require.—*Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon and view of the dead bodies of only such persons as are supposed to have come to their death by violence.—*Revised Laws, Chap. 24, Sec. 8.*

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposedly due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the sudden deaths of persons not disabled by recognized disease, and those of persons **found dead**.

Substitute for Undertakers: No embalming fluid, or any person supposed to have come to his death by violence, until a permit in writing, signed by the Medical Examiner, has first been obtained.—*Revised Laws, Chap. 24, Sec. 20.*

Statement of Cause of Death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc.*, *Carcinoma, Sarcoma, etc.*, of . . . (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Ashtema," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Exhaustion," "Heart failure," "Senile," etc.); "Dropsy," "Marasmus," "Old age," "Hemorrhage," "Hemiplegia," "Hysteria," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc. State cause for a job surgical operation when undertaken. For violent deaths state means or injury and quality as accidental, suicidal, or homicidal, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*), may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Chief engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprinter*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Packer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Typhoid cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name of organ); "Cancer" is less definite; avoid use of "Tumor" for malignant origin; "Chronic interstitial nephritis" etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *99 ds.*; *Bronchopneumonia* (secondary); *Chronic interstitial nephritis* etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *99 ds.*; *Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Senile lapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicæmia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 4f.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphenteria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Mesles*; *Whooping cough*, *Chronic nodular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mesles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.*. Never report more symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Comatose"), "Senile," "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insufficiency," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on a statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death.—*Revised Laws, Chap. 89, Secs. 10 and 11, as amended by Acts of 1910, Chap. 522.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certifying physician, if there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained or early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereat furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Revised Laws, Chap. 78, Sec. 58.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence.—*Revised Laws, Chap. 84, Sec. 8.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not formally employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc.*, *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less defining; avoid use of "Tumor" for malignant neoplasms); *Meningis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Meningis* (disease causing death), *89 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Senile," "lapse," "Coma," "Convulsions," "Heart failure," "Hemorrhage," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EPI TA C I U S
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereat furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

726.12.1922

Approved by U. S. Census and American Public Health Association

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Cart engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Synthetic*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Declarer," etc., without more precise specification, as *Dog laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housewife*, *Housework*, or *At home* and child, not gainfully entered as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never mention "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 da.; *Bronchopneumonia* (secondary), as 10 da. Never report mere symptoms or terminal conditions, such as "Anemia," "Anoxia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.
(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gonorrhea, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 11, as amended by Acts of 1910, Chap. 522.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certifying physician, if there is no attending physician, . . . or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectman for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonæum, etc., Carcinoma, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Assthenia," "Anemia" (merely symptomatic), "Atrophy," "Stale," "Lapse," "Coma," "Convulsions," "Delirium" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Industrial engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Cool mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scullion, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Cervicoma, Sarcoma*, etc., etc. (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meesles; Whooping cough; Chronic indolent heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Meesles* (disease causing death), *99 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Influenza," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.
(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)
Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*
. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Feb. 17, 1922

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill; (a) Salesman, (b) Gracey; (a) Foreman, (b) Automobile factory, etc. The material worked on may form part of the second statement. Never return (a) Laborer, (b) Foreman, (c) Manager, (d) Dealer, etc., without more precise specification, as Day laborer, Farm laborer, Laborer — Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as Servant, Cook, Housemaid, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: Former (retired, 6 yrs.). For persons who have no occupation whatever, write None.

Statement of cause of death. — Name, first, the disease causing DEATH, the primary affection with respect to time and causation, using always the same accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid pneumonia"); Labor pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meningitis, peritonitis, etc. Carcinoma, Sarcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); Measles; Whooping cough; Chronic tubular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: Measles (disease causing death), 99 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Scarla," "Lapse," "Coma," "Convulsions," "Delirium" ("Congenital," "Infantile," "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)
Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — Revised Laws, Chap. 29, Secs. 10 and 11, as amended by Acts of 1910, Chap. 522.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until these shall have been delivered to such board, agent or clerk. . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certifying certificate as hereinafter provided. If there is no attending physician or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — Revised Laws, Chap. 78, Sec. 33.

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — Revised Laws, Chap. 24, Sec. 8.

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness of disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is made.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Always qualify all diseases resulting from childbirth or miscarriage, as "PERIPARTAL septicæmia," "POSTPARTAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician. If any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Dr. Mahoney

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprayer, (b) Cotton mill; (a) Salesman, (b) Grocer; (a) Foreman, (b) Automobile factory, mill; (a) Laborer, (b) Foreman; (a) Manager, (b) Dealer, etc.*, without return "Laborer," "Foreman," "Manager," "Dealer," etc., without return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never mention "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc.*, of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meningis: Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meningis* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility," "Congestive," "Senile," "Exhaustion," "Heart failure," "Hemorrhage," "Icterus," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene gastritis, erysipelas, meningitis, miscar-rage, necrosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certi-ficate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

—*Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; other-wise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths sup-posedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement. It should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Anemia," "Anuria" (merely symptomatic), "Atrophy," "Senile," "Asphemia," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insultion," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal," *septicemia*, "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 49, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

—*Gen. Laws, Chap. 38, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereupon furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . I shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bed-side care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *89 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphæmia," "Anæmia" (merely sym-tomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Lebility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hæmorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hæmorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc.; *Carcinoma*, *Sarcoma*, etc., of _____ (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphyxia," "Anemia" (merely symptomatic), "Atrophy," "Colic," "Coma," "Convulsions," "Debility," ("Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Traumatic," *septicemia*, "Puerperal," *peritonitis*, etc. State cause for which surgical operation was undertaken. For violent deaths state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver aimed at head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated

under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)
Cases for the Medical Examiners.—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:
1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *Gas poisoning*, *Suicide*, *Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Starvation*, *Self-poisoning*, *Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street*, or *one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

BOARD OF HEALTH PHYSICIAN'S CERTIFICATE OF DEATH

To be used only in case there is no attending physician or if for sufficient reason the attending physician's certificate cannot be obtained early enough for the purpose of granting a burial permit, as provided by Revised Laws, Chapter 78, Section 38.

N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died [defined so that it can be classified under the international classification of causes of death, where contracted, the duration of his last illness, when last seen alive by the physician and the date of his death. . . . — *Revised Laws, Chap. 29, Sects. 10 and 1, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner of cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septemias), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the sudden deaths of persons not disabled by recognized disease, and those of persons **found dead**.

Notice to Undertakers: NO embalming, mummification, or any substitute therefor, shall be injected into the body of any person supposed to have come to his death by violence, until a permit in writing, signed by the Medical Examiner, has first been obtained. — *Revised Laws, Chap. 24, Sec. 20.*

Statement of Cause of Death.—Name, **first**, the disease **causing death** (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc.; *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Mastitis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Mastitis* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report more symptoms or terminal conditions, such as "Asphyxia," "Aemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," ("Congestional," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc. State cause for a rich surgical operation was undertaken. For violent deaths state means of injury and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train*; *accident*; *Knife wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *Septicemia, tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Cart engineer*, *Stationery fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprinter*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Aluminum fabricator*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been occupied or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never mention "Typhoid pneumonia"); *Labor pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., etc. (name origin: "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Hypopert. cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *92 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 89, Secs. 10 and 1, as amended by Acts of 1910, Chap. 382.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died. . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for this purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 84, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purposes of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonaeum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Sailie," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (Retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonem, etc., Carcinoma, Sarcoma, etc., of* (name origin, "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 da.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Assthemia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile" etc.). "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intuition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reason, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it, or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. If or many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Artist, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia?"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *89 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestral," "Sable," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Purpura septicæmia," "Purpura peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his section one, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the misadventure near, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile" etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

302
 CAREFULLY SUPPLIED. AGE SHOULD BE STATED EXACTLY. PHYSICIANS SHOULD STATE CAUSE OF DEATH IN PLAIN TERMS, SO THAT IT MAY BE PROPERLY CLASSIFIED. EXACT STATEMENT OF OCCUPATION IS VERY IMPORTANT. SEE INSTRUCTIONS ON BACK OF CERTIFICATE.

ADDRESS

Chelsea

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationery fremen*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Farmer*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, and causation CAUSING DEATH (the primary affection with respect to time and season), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely sym-tomatic), "Atrophy," "Collapse," "Convulsions," "Lability," "Congestive," "Senile," etc.), "Dropsy," "Edema," "Heart failure," "Hemorrhage," "Insultion," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Purpura septicæmia," "Purpura peritonialis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicæmia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forth with, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . The shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia", unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin. "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *99 da.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Ictericity" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childhood, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 98, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Greenery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper* or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," "Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phloetis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting sopificonia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (c) *Salesman*, (b) *Grocery*; (d) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not finally employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (Name first); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Mesles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Mesles* (disease causing death), 29 da.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Assthema," "Anoxia" (merely symptomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Delirium," "Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemiplegia," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "P^{er}-ip^{er}al septicemia," "P^{er}ip^{er}al peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. *Revised Laws, Chap. 29, Secs. 10 and 1, as amended by Acts of 1910, Chap. 822.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician. If any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectman for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 88.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 84, Sec. 8.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Artist, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.; Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Assthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Infarction," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give the cause of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the certificate is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purposes of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonaeum*, etc., *Carcinoma*, *Sarcoma*, etc., of _____ (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asphyxia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For violent DEATHS STATE MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated

under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners.—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *Gas poisoning*, *Suicide*, *Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Starvation*, *Suffocation*, *Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street*, or *one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

In plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.— Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary steamman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocer*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housework*, or *At home*, and children, not gainfully employed, as *Housewife, Housework*, or *At home*, and children, not gainfully employed, the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.— Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonaeum*, etc. *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant origin; "Neuritis, Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *99 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 1, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 28, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

R-302
 N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.
 20,000.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person. Inexpensive of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *89 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Asbestia," "Anemia" (merely sym.omatic), "Atrophy," "Colicagee," "Coma," "Convulsions," "Lebilia" ("Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PERIPERAL *septicemia*," "PERIPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectman for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The presence of the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH EXACTLY. AGE should be stated EXACTLY. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

21 I HEREBY CERTIFY that a satisfactory standard certificate of death was filed with me BEFORE the burial or transit permit was issued. *St. Mowry* Official position _____ Date of issue *March 27* Permit No. *413*

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.— Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Former* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationery firmman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Dog laborer*, *Farm laborer*, *Laborer—Cool mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report officially the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If relieved from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.— Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never meninges?); *Typhoid pneumonia*?; *Labor pneumonia*; *Bronchopneumonia* (report "Typhoid pneumonia," if indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Coremia*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meninges*; *Whooping cough*; *Chronic solitary heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Meninges* (disease causing death), 29 da.; *Bronchopneumonia* (secondary), 10 da. Never report mere symptoms or terminal conditions, such as "Colic," "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Hemorrhage," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Influenza," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.
 (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
 FROM THE LAWS OF THE
 COMMONWEALTH OF MASSACHUSETTS
 GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 89, Secs. 10 and 1, as amended by Acts of 1910, Chap. 752.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or if he thereto certifies as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 84, Sec. 8.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Permit No.

412

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housewife*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never "meningitis"); "unqualifies"; *Lobar pneumonia*; *Bronchopneumonia* report "Typhoid pneumonia"; *Tuberculosis of lungs, meningis, peritonaeum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name); "Cancer" is less definite; avoid use of "Tumor" for malignant origin; "Gonorrhea" is less definite; avoid use of "Tumor" for malignant origin; "Menses" is less definite; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or indirect) affection need not be stated unless important. Example: current) affection need not be stated unless important. Example: *Menses* (disease causing death), *99 ds.*; *Bronchopneumonia* (secondary), such as *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtonia," "Anemia," "Debility" ("Congenital," "Senile," "Coma," "Convulsions," "Heart failure," "Hemorrhage," "Impares," "Exhaustion," "Old age," "Shock," "Uremia," "Weakness," "nition," "Marasmus," "Old age," "Stroke," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal *septicemia*," "Prenatal *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia. If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 146, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, shall be issued until there shall have been delivered to such board, the facts required by law to be returned and recorded, which shall be accompanied, in case of an original internment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make up the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness of disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or the agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, by the agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certi-ficate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; oth-erwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths sup-posedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

R-301 should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Plowder, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Strimmer, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory, The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household, are entered as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or even up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever write *None.**

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds., Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia," "Convulsions," "Heart failure," "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as: "Prenatal septicaemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the settlement for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Dwight D. Wickham 30 1922

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Springer*, (b) *Collon mill*, (c) *Salesman*, (d) *Gracery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *Name*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebral meningitis*, *fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin, *pertussis*, *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *neoplasms*); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mesles* (disease causing death), *29 da.*; *Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Assthemia," "Anæmia" (merely symptomatic), "Atrophy," "Colic," "Coma," "Convulsions," "Delirium" ("Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hæmorrhage," "Icterus," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.

The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 43.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

—*Gen. Laws, Chap. 38, Sec. 6.*
He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupations is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Dog laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scullery*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never "typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* report "'Typhoid pneumonia"; *Tubercle*; *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name organ, *peritoneum*, etc., avoid use of "Tumor" for malignant neoplasms); *Mesles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Mesles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtania," "Anemia" (merely symptomatic), "Atrophy," "Colicaps," "Coma," "Convulsions," "Debility" ("Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken. (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 49, Sec. 2.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, and those of persons found dead.

RETURN OF CERTIFICATES OF DEATH

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprinter*, (b) *Colon*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*, (a) *Foreman*, (b) *Manager*, "Dealer," etc., without return "Laborer," "Foreman," "Manager," "Dealer," etc., without return "Laborer," as *Day laborer*, *Farm laborer*, *Laborer* — *Cool* more precise specification, as *Wagoner*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Necrosis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Necrosis* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asbestia," "Anemia" (merely symptomatic), "Atrophy," "Colic," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Keratitis," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken. (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 49, Sec. 9*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until these shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45*.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6*.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7*.

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g. *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Ironman," "Manager," "Declarer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be held only (not paid *Housework*, or *At home*, and children, not gainfully entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scrubber*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *pertussis*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatous), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebotis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Former or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery, (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Cool mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housewife, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meninges, peritonaeum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasm); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 da.; Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely syn tomatia), "Atrophy," "Collapse," "Coma," "Convulsions," "Erbility," "Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Infarction," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "P^{ER}PERAL septicaemia," "P^{ER}PERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committees on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

ENACTED BY THE
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 53, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

MARGIN RESERVED FOR BINDING

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .
— *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposedly due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person)

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

Official Health Officer Date of issue 4/18/22 Permit No. 423

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colon mill*, (c) *Salesman*, (d) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked out may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer — Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indistinct); *Tuberculosis of lungs, meningis, peritonium, etc.*, *Carcinoma, Sarcoma, etc.*, of (name origin, "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," "Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inflammation," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information on which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (delineed so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 1, as amended by Acts of 1910, Chap. 822.*

No undertaker or other person shall bury a human body until he has received a permit from the board of health or its agent, from the clerk of the city or town in which the person died; no such permit shall be issued until there shall have been delivered to such board, agent or clerk, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. The person to whom the permit is so given and the physician who certifies to the cause of death shall thereat furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 28, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 3.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Leocomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not finally employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or served up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestial," "Senile," "Infantile," "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 58, Sec. 6.*

. . . . It shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicaemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer"; "Foreman"; "Manager"; "Dealer"; etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not habitually employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., etc., etc., (name origin; "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestive," "Colic," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Hemiplegia," "Hiccups," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 49, Sec. 2.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .
— *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

DESCRIPTION (for unknown person)

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under **cause**, the nature of an injury and of its consequences; and (2) under **manner**, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under **cause**, its known or presumable nature; and (2) under **manner**, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

[Approved by U. S. Census and American Public Health Association]

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 11, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposable due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Pioneer*; *Physician*, *Composer*, *Artist*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or to receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scrub*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (Retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the name accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelicate); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meselas*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meselas* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Assthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Dehility" ("Congestive," "Senile" etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia. If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Chalklayer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housewife, or At home*, and children, not gainfully employed as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congestive"), "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insultion," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 145.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 88, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease *causum deam*, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *If whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtania," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUPERAL septicemia," "PUPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contrived, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 88, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Assthemia," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intubition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, erysipelas, childbirth, convulsions, hemorrhage, gangrene, gascolitis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . We shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.**

(2) **Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.**

(3) **Medical examiners will investigate and certify to all deaths supposedly due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.— Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colon mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.— Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indomitable); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc.; *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on a statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as for the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

may 1 1922

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphentria* (avoid use of "Cramp"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *19 ds*. Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anomia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of.....* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, where same was given by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 49, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . Its shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not faintly employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc., of _____ (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meningis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Meningis* (disease causing death), 29 cs.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congital," "Senile" etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For violent deaths state means of injury and qualify as ACCIDENTAL, SUICIDE, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated

under the head of "Concomitant" (under "Cause of death" on Statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners.—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *Gas poisoning*, *Suicide*, *Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Starvation*, *Suffocation*, *Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street*, or *one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (c) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia?"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Cerebrum, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Purpura *septicaemia*," "Purpura *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicaemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defamed as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. . . . If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereat furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purposes of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicaemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Artistical*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Printer*, (b) *Color mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing nears (the primary affection with respect to time and causation), using always the name accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Anemia," "Anemia" (merely sym. tomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purposes of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of cause of death.—Name, first, the disease causing nearest the primary affection with respect to time and causation,) using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc.*, *Carcinoma, Sarcoma, etc.*, of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant origin; *Mesites*; *Whooping cough*; *Chronic valvular heart disease*; *neoplasms*; *Mesites*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mesites* (disease causing death), *90 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asbestia," "Arenia's" (merely sym tomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Lobility" ("Congestial"), "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "In-fluence," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Weakness, quality all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory cer-tificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such cer-tificate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereatof furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

—*Gen. Laws, Chap. 93, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence. If known; oth-erwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 93, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths sup-posedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

WinthropOfficial Health Officer J. A. Murray Date of issue of permit 5/17/22 Permit No. 437

N. B. WHITE PLAIN, WITH UNFADING BLACK INK THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery, (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Dog laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asbemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "P^{ER}NATAL septicemia," "P^{ER}NATAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall buy a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*, *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely syn. *hæmic*), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congenital," "Colic," etc.), "Dropsy," "Expansion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicæmia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall, forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate as hereinafter provided. . . . If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereat furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 48, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Leocomotive engineer, Coal engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc.; *Carcinoma, Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Infantile," "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 49, Sec. 9.*

No undertaker or other person shall buy a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women of home, who are engaged in the duties of the household only (*Not paid Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (void use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs* (name *lung*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely sym.omatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Lebility" ("Congestive," "Semile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.
 (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
 COMMONWEALTH OF MASSACHUSETTS
 GOVERNING THE
 RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

20 UNDERTAKER ADDRESS

W. V. Graham
BostonOfficial position Health Officer 6/8/22 44-2

This is a FEMALE RECORD. Every item of information should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The maker worked on many form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mining*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonaeum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Colic," "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until these shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupation of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former* (*retired*, 6 yrs.). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "tumor" for malignant neoplasms); *Necrosis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Necrosis* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtonia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Colic," "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc.), when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Purpura *septicaemia*," "Puerperal *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (c) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, pericereum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Pancr." is less definite; avoid use of "Tumor," for malignant neoplasms); *Malaria*: *Worshipping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the board of health, or employed by it or by a selectman who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall hereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certi-ficate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certi-ficate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as for the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; other-wise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths sup-posedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles: Whooping cough, Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *89 ds.; Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestional," "Saddle," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PERIPERAL septicemia," "PERIPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

19 UNDERTAKER B R Bennett ADDRESS Wintthrop Mass

Official Health Officer J. A. Mowry Date of issue of permit 6/22/22 Permit No. 478

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocer; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer retired, 6 yrs.* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia?"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *10 ds. Never report mere symptoms or terminal conditions, such as Menses (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Hemiplegia," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septemia," "Puerperal peritonitis," etc.*

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which solve any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereat furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indented); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc.; *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Anemia," "Anemia" (merely symptomatic), "Atrophy," "Coma," "Convulsions," "Delirium," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 89, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given shall certify the cause of death shall therefore furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.**

(2) **Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.**

(3) **Medical examiners will investigate and certify to all deaths supposedly due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, coliculis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phibolitis, pyemia, septicaemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person in whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

Statement of occupation.— Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Leominster engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry; and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Cool mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disaster causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.— Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the name accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc.; *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic nodular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashenia," "Anæmia" (merely sym:tomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Lebidity," "Congestial," "Senile," etc.); "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease to be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died! . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician. If any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 14.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Permit

No. 453

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Stryker*, (b) *Coal mine*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Doctor," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonymy is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthmia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on a statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the solo cause of death: Abortion, coliculis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 89, Secs. 10 and 11, as amended by Acts of 1910, Chap. 822.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or from the clerk of the city or town in which the person died. . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 79, Sec. 33.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 84, Sec. 8.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

MARGIN RESERVED FOR BINDING

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposedly due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.**

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the **cause and manner** thereof, and will specify: (1) Under **cause**, the nature of an injury and of its consequences; and (2) under **manner**, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to **disease**, specify: (1) Under **cause**, its known or presumable nature; and (2) under **manner**, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person)

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

THIS CERTIFICATE CONSTITUTES SUCH PERMIT

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Archivist, Locomotive engineer, Gift engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children not gainfully employed as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia" unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Oma," "Convulsions," "Debility" ("Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or misadventure, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendation on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus,

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original informant, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 84, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 84, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.**

(2) **Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.**

(3) **Medical examiners will investigate and certify to all deaths supposedly due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fitter, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Cool mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia; Bronchopneumonia* ("Pneumonia," unqualified is indefinite); *Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Examples: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asbhenia," "Anemia" (merely sym. tomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Lebility," ("Congenital," "Senile," etc.), "Dropy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUPERAL septicemia," "PUPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.
(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall for that, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . The shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

20 UNDERTAKER

ADDRESS

Arthur A. Marshall & Son
Lexington,

N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, *first*, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc., of _____ (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Conjunctival," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For violent deaths STATE MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated

under the head of *Contributory*, on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners.—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *gas poisoning*, *Suicide*, *Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Strangulation*, *Suffocation*, *Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street*, or *one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

N. B.—WRITE PLAINLY, WITH UNFADING INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Artistical, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service, for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia," *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria: Malarial fever; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on a statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths, only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposed to be due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only, need not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite; *Tuberculosis of lungs, meningitis, peritonitis*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Malaria*; *Whooping cough, Chronic tubular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Hemorrhage," "Sanda," etc.), "Dropsy," "Exhaustion," "Heart failure," "Congestive," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purposes of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mining*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), 29 da.; *Bronchopneumonia* (secondary), 10 da. Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely sym. tomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Eclampsy" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 2*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Branchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Branchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtonia," "Anemia" (merely symptomatic), "Atrophy," "Col-lapses," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Trania," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.
(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Branchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscar-riage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certi-ficate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certi-ficate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 38, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence. If known; other-wise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.**

(2) **Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.**

(3) **Medical examiners will investigate and certify to all deaths sup-posedly due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer, Physician, Stenographer, Composer, Jeweler, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Farmer*, (b) *Cotton mill*, (a) *Salesman* (b) *Grocery*; (a) *Man*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper's wife, Housework on at home*, and children, not gainfully employed, as *At school or at home*. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal fever"); *Diphtheria* (avoid use of "Croup"); *Spinal meningitis* ("report "Typhoid pneumonia"); *Lobar pneumonia* (never *pneumonia of lungs*, *meninges*, *portionum*, etc. *Cyrtoma*, *Sarcoma*, etc., of (name origin), etc. *Cyrtoma*, *dehiscit*; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (*Secondary*), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphasia," "Anemia" (merely symptomatic), "Atrypia," "Colic," "Sickle," etc.; "Dropsy," "Exhaustion," "Heart-failure," "Hemorrhage," "Intuition," "Marasmus," "Heart-ache," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always mention, etc., all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For those for which surgical operation was and probably as accidental, strychnia, or homicidal, or as accident; *Accidental drowning*; *Struck by railway train*—*by carbolie acid—probably suicide*. The nature of the injury as fracture of skull, and consequences (e. g., *sepsis*; *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

SECTION 377, CHAPTER 619 OF THE LAWS OF 1913.

Certificate of death.—The particulars called for by items one to thirteen inclusive shall be authenticated by the signature of the Informant, who may be any competent person acquainted with the facts.

The statement of facts relating to the disposition of the body shall be signed by the undertaker or person in charge of the corpse.

The medical certificates shall be made and signed by the physician, if any, last in attendance on the deceased, who shall specify the time in attendance, the time he last saw the deceased alive and the hour of the day at which death occurred. He shall further state the cause of death, so as to show the cause of disease or sequence of causes re-

and the duration of each. Indefinite terms, denoting symptoms of disease or conditions resulting from disease shall not be held sufficient for the issuance of a burial removal permit. Any certificate stating the cause of death in terms which the state commissioner of health or person making the medical certificate for correction have declared indefinite shall be returned to the physician more definite statement. Causes of death which may be the result of either disease or violence shall be explicit and stated; and if from violence the means of injury shall be stated, and whether apparently accidental, suicidal, homicidal. For deaths in hospitals, institutions, or nonresidents, the physician shall supply the informant required under item 15. If he is unable to do so, and in his State where, in his opinion, the disease was contracted.

§ 378. Registration of deaths occurring without medical attendance.—In case of any death occurring without medical attendance, it shall be the duty of the undertaker or other person to whose knowledge the death may come to notify the local health officer of such death, and when notified the health officer shall immediately investigate a health officer has reason to believe that if it has been due to unlawful act or neglect he shall then refer the case to the coroner or other proper officer for investigation and certification. The coroner or other proper officer whose duty it is to hold an inquest on the body of a deceased person, and to make the certificate of death required for a burial permit, shall state in his certificate the name of the disease causing death, or if from external causes, the means of death; whether probably accidental, suicidal or homicidal; and shall in any case, furnish such information as may be required by the state commissioner of health in order properly to classify the death.

§ 379. Duties of undertaker.—In each case the undertaker, or person having charge of the corpse, shall file the certificate of death with the registrar of the district in which the death occurred and obtain a burial or removal permit prior to any disposition of the body. He shall obtain the required personal and statistical particulars from a person qualified to supply them, over the signature and address of his informant. He shall then present that informant out and sign the medical certificate of death, or to the health officer or coroner, for the medical certificate of this record for the registration of deaths, as specified in this article. If no physician was in attendance upon the deceased. He shall then state the facts required relative to the date and place of burial, cremation or removal over his signature and with his address, and present a completed certificate to the registrar in order to obtain a permit for burial, removal or other disposition of the body. The undertaker shall deliver the burial permit to the person in charge of the place of burial, before interring or otherwise disposing of the body; or shall attach the removal permit to the box containing the corpse, when shipped by any transportation company; said permit to accompany the corpse to its destination, where if within the state of New York, it shall be delivered to the person in charge of the place of burial.

§ 381. Interments.—No person in charge of any premises on which interments or cremations are made shall inter or permit the interment or other disposition of any body unless it is accompanied by a burial, cremation or transit permit, as herein provided. Such person shall deliver upon the permit the date of interment, or cremation to the registrar, and shall return all permits so endorsed to the date of interment or cremation. He shall keep a record of all bodies interred or otherwise disposed of on the premises under his charge, in each case stating the name of each deceased person, place of death, date of burial or record shall at all times be open to official inspection; which provided that the undertaker, or person having charge of the corpse, when burying a body in a cemetery or burial ground having no person in charge, shall sign the burial or removal permit giving the date of burial, and shall write across the face of the permit the words "No person in charge," and the file burial or removal permit within three days with the registrar of the district in which the cemetery is located.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

July 8 1923

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Archibolc, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Ironman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of.....* (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 da.; Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia," "Old age," "Shock," "Uremia," "Weakness," etc.). "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or other and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 83, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 83, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

August 18, 1923

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthiness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as Day laborer, Farm laborer, Laborer — Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as Servant, Cook, Housemaid, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Former (retired, 6 yrs.). For persons who have no occupation whatever, write None.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indelicate); Tuberculosis of lungs, meningitis, peritonitis, etc.; Cholera, Sarcema, etc., of..... (name neoplasm); Measles; Whooping cough; Chronic nodular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken. (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortions, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gascolitis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, and the name of the quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — Gen. Laws, Chap. 46, Sec. 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration or as to the manner or cause of the death, which the clerk or registrar may require. — Gen. Laws, Chap. 114, Sec. 45.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — Gen. Laws, Chap. 36, Sec. 6. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — Gen. Laws, Chap. 36, Sec. 7.

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Official position

Health Officer Aug. 19, 1922 #466

Every item of information should be carefully supplied. AGE should be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for changed or even up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Assthemia," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicæmia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration, or as to the person or cause of the death, which can be obtained as to the deceased, require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Former or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *39 ds., Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtmia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.
(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —Gen. Laws, Chap. 46, Sec. 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —Gen. Laws, Chap. 114, Sec. 45.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —Gen. Laws, Chap. 85, Sec. 6.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —Gen. Laws, Chap. 85, Sec. 7.

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatica (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Journal 22, 1927

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colon mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scullery*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meningis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meningis* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Aschemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.
(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the role cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"; *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified is indistinct); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "tumor" for malignant neoplasms); *Mesites*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Mesites* (disease causing death), *90 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely sym. tomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Tremis," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly by injury. These include not only deaths caused directly or indirectly by traumatic (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N.B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many (c) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Dog laborer*, *Farm laborer*, *Laborer—Cool mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; If secondary, five primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereat furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 83, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 53, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from homo when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from diseases resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

RETURN OF CERTIFICATES OF DEATH

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Archited, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing *nevrin*, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing *nevrin* (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Chroup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lung, meningis, peritonaeum, etc., Carcinoma, Sarcoma, etc., of.....* (name organ); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms; *Mesias; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mesias* (disease causing death), *29 ds.; Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestial," "Scule," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intanition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septitemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, colic, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 53, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 53, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicaemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

20 UNDERTAKER J. Waterman & Sons ADDRESS Boston

Official position Health Officer Date of issue Aug 31, 1922 Permit No. 473

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Woman at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," "unqualific," is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Meningeal Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meningeal* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Dobility" ("Congenital," "Scable," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inundation," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, oryphelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths apparently due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Groceries*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of _____ (name organ); "Cancer," is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Assthemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestive," "Senile" etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For violent deaths STATE MEANS OF NATURE and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Feverish wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull and consequences (e. g., *sepsis*, *tetanus*) may be stated

under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners.—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *Gas poisoning*, *Suicide*, *Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Starvation*, *Suffocation*, *Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street*, or *one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

PHYSICIANS should state CAUSE OF DEATH EXACTLY. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Painter*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Dog laborer*, *Form laborer*, *Laborer—Cool mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer retired, 6 yrs.*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Anæmia," "Anæmia" (merely symptomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility," "Congestional," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "In-fection," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscar-riage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certi-ficate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certi-ficate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; other-wise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths sup-possibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

20 I HEREBY CERTIFY that a satisfactory standard certificate of death was filed with me BEFORE the burial or transit permit was issued. Official position Health Officer Date of issue of permit Sept 8 1922 Permit No. 475

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name or origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*, *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), 20 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as *Lapse*, "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Stroke," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician either necessary information which can be obtained as for registration, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is made.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of a household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia triaxa, pericoronum*, etc., *Carcinoma, Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Malaria, Whooping cough, Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Infarction," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by a physician or the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Lacemaker engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housewife*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Branchiopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meningis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meningis* (disease causing death), *29 ds.*; *Branchiopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Aschemia," "Anemia" (merely symptomatic), "Atrophy," "Colicapsis," "Coma," "Convulsions," "Debility" ("Congential," "Scaly," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
 FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
 GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .
 — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 33, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 33, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anesthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelicate); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meningis*; *Whooping cough*; *Chronic reticular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meningis* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtonia," "Anomia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, neurosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original informant, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 83, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 83, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

 Every item of information should be
 furnished in plain terms,
 EXACTLY. PHYSICIANS should state CAUSE OF DEATH
 in plain terms, and EXACTLY. Exact statement of OCCUPATION is very important. See instructions on back
 of certificate.
 CAREFULLY supplied. AGE should be stated EXACTLY. Exact statement of OCCUPATION is very important. See instructions on back
 of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of various pursuits is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housekeeper*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Droopy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Metastasis," "Old age," "Shock," "Trismus," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal *epilepsia*," "Puerperal *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Cardiacs will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: *Abortion*, *cellulitis*, *childbirth*, *convulsions*, *hemorrhage*, *gangrene*, *eastriitis*, *erysipelas*, *meningitis*, *miscarriage*, *nerosis*, *peritonitis*, *phlebitis*, *pyemia*, *septicemia*, *tetanus*.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purposes of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, or also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthiness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Former or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *89 da.*; *Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Aschemia," "Anemia" (merely symptomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile" etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "In-fection," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscar-riage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

PHYSICIANS should state CAUSE OF DEATH exactly. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

20 UNDERTAKER **F. E. BROWN** ADDRESS

Approved by U. S. Census and American Public Health Association

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry; and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer*—*Cool mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc., *of*, (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 da.*; *Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely syn. *tomatic*), "Atrophy," "Collapse," "Coma," "Convulsions," "Lebilita" ("Congestial," "Saddle," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 8.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original internment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 86, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

R-302
 N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person. Irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Printer*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthemia," "Anemia" (merely sym. tomiac), "Atrophy," "Col-lapsus," "Coma," "Convulsions," "Erbility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Ins-ultion," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscar-riage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS. GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or the agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory cer-tificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such cer-tificate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; other-wise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths and pos-sibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

MARGIN RESERVED FOR BINDING

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person)

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

N. B. - WHITE PAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Person*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Nekrosis*: *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Goma," "Convulsions," "Debilis" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Pneumopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housewife, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of.....* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry; and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *A automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtonia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Scalia," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reason, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefore furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the photo where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is made.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the old definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia", unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonaeum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin: "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), 23 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or the certifier required for the purpose, shall upon application make or cause by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 98, Sec. 6.*

. . . I shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 98, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septemias), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, pertussis, plebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 11, as amended by Acts of 1910, Chap. 922.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the city or town in which the person died: . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 58.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archited, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill*; (a) *Salesman, (b) Grocery*; (a) *Foreman, (b) Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meningitis, peritonitis, etc.*; *Carcinoma, Sarcoma, etc.*, of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *If whooping cough, Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "P^{ER}NERVAL *septicemia*," "P^{ER}NERVAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall buy a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumaism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall hereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archited, Locomotive engineer, Coal miner, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dyskeritic* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonem, etc.*, *Coronaria, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Menses* (disease causing death), *89 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intuition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumony"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 96, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reason, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 85, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, carefully supplied. AGE should be stated EXACTLY. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*; (b) *Cotton mill*; (c) *Salesman*; (d) *Grocery*; (e) *Foreman*; (f) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc.; *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely *sym.tomatic*), "Atrophy," "Collapse," "Coma," "Convulsions," "Lability" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 2.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died! . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided: If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 86, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 86, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicaemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. This question applies to each and every person, irrespective of age. If or many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archibed, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Meningis; Whooping cough, Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meningis* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Lobility" ("Congenital," "Senile," etc.), "Dropy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. . . . If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 89, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 89, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

16 I HEREBY CERTIFY, That I attended deceased from **Nov 10**, 19**22**, to **Nov 11**, 19**22**, that I last saw her alive on **Nov 11**, 19**22**, and that death occurred, on the date stated above, at **4:30 A. M.** The CAUSE OF DEATH was as follows:

Acute enteritis
[Enteritis]

(duration) **1** yrs. **0** mos. **2** ds.

CONTRIBUTORY (SECONDARY) **Severe** (duration) **1** yrs. **0** mos. **0** ds.

17 Where was disease contracted if not at place of death? **+**

Did an operation precede death? **no** Date of **no**

Was there an autopsy? **no**

What test confirmed diagnosis? **clinical**

(Signed) **W. E. Johnson**, M.D. (Address) **Worcester Mass**

Date **Nov 11 1922** (Month) (Day) (Year)

18 PLACE OF BURIAL, CREMATION, OR REMOVAL **Mt. Hope - Boston** (Cemetery) (City or town)

DATE OF BURIAL **Nov 12, 1922**

19 UNDERTAKER **Robert J. Belyea**

ADDRESS **742 Dudley St. 72 Belmont St.**

Official position **Secretary** Date of issue of permit **11/11/22** No. **494**

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of.....* (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *23 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphyxia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Imitation," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician. If any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 89, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 89, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH EXACTLY. AGE should be stated EXACTLY. in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.— Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.— Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Examples: *Malaria* (disease causing death), *39 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia," (merely symptomatic), "Atrophy," "Col-lapses," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Drema," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State causes for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, neurosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original internment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such cer-tificate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

—*Gen. Laws, Chap. 53, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; other-wise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths sup-posable due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

19 UNDERTAKER John F. O'Malley ADDRESS Win.
Official position Secretary Date of issue of permit 11/16/22 Permit No. 496

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*, *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Maniasms," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Apoptosis, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was constructed, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

— He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

2-301 should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal miner*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housework*, or *At home*, and children, not gainfully employed, as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former* (retired, 6 yrs.). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia's" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

EXPLANATIONS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 2.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 53, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 53, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (retired, 6 yrs.). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc., of _____ (name organ); "Cancer," is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestional," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS STATE MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull and consequences (e. g., *sepsis*, *tetanus*) may be stated

under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners.—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *Gas poisoning*, *Suicide*, *Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Starvation*, *Suffocation*, *Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street*, or *one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *2d ds.*; *Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . . The shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence. If known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer" "Foreman" "Manager" "Dealer" etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatsoever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"; *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "tumor" for malignant neoplasms); *Melias*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Melias* (disease causing death), *39 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Col-lapses," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 49, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archivist, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc.*, *Carcinoma, Sarcoma, etc.*, of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Mesitis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Mesitis* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from diseases resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

302
 CAREFULLY SUPPLIED. AGE SHOULD BE STATED EXACTLY. PHYSICIANS SHOULD STATE CAUSE OF DEATH IN PLAIN TERMS, SO THAT IT MAY BE PROPERLY CLASSIFIED. EXACT STATEMENT OF OCCUPATION IS VERY IMPORTANT. SEE INSTRUCTIONS ON BACK OF CERTIFICATE.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary steamman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer — Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonitis, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meningis; Whooping cough, Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtonia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.**

(2) **Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is made.**

(3) **Medical examiners will investigate and certify to all deaths supposedly due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

ADDRESS

Boston

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Laconicite engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia", unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carotidoma*, *Sarcoma*, etc., of (name origin, "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meselas*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meselas* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestive," "Sole" (etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inflition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. EVERY ITEM OF INFORMATION should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry; and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (void use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtema," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," "Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer — Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or even up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatsoever, write *None*.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Examples: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia's" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Immition," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebeitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 1, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died: . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 82.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Artistical, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Collon mill*, (c) *Salesman*, (d) *Grocery*, (e) *Foreman*, (f) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asbhenia," "Anemia" (merely symptomatic), "Atrophy," "Col-lapses," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Expansion," "Heart failure," "Hemorrhage," "Ins-ultion," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscar-riage, neurosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, whose same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory cer-tificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certi-ficate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; oth-erwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths sup-posedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

R-302

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (retired, 6 yrs.). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchio pneumonia* ("Pneumonia"); *Unqualified*, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc., of _____ (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchio pneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," ("Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Dremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For violent deaths state means of injury and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train*—*accident*; *Riveter wound of head*—*homicide*; *Poisoned by carbolic acid*—*probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated

under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners.—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *Gas poisoning*, *Suicide*, *Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Starvation*, *Suffocation*, *Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street*, or *one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

while the informant is present. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not generally employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc.; *Carcinoma, Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 da*; *Bronchopneumonia* (secondary), *10 da*. Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely sym. *tomatic*), "Atrophy," "Collapse," "Coma," "Convulsions," "Lebidity" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45*.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 83, Sec. 6*.

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 83, Sec. 7*.

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

WHILE IN LAINEL, WITH ONE ADDED BLACK INK. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Levee-dike engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocer; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse, etc.," "Coma," "Convulsions," "Idebility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Commission on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall hereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of all such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purposes of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumaism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

MARGIN RESERVED FOR BINDING

N. B. - WRITE PLAINLY, WITH UNFADEING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
 FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
 GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 33, Sec. 6.*
 . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 33, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death)."

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archited, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. (If retired from business, that fact may be indicated thus: *Farmer retired, 6 yrs.*). For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the name accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 da.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, chills, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

Official position Secretary Date of issue of permit 1/6/23 Permit No. 512

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*. *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (c) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be filled in when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (d) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or *At home* and receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home* and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis*, *pericerebrum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meningis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meningis* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, ganrene, gastritis, erysipelas, meningitis, miscarriage, neuritis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45*.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6*.

— He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7*.

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall hurry a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectman for the purpose, shall upon application make or the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 89, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Official Secretary Date of issue 1/9/23 Permit No. 514
position

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*. *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationery firm*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Cool mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scrubber*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc.; *Carcinoma*, *Sarcoma*, etc., of (name origin, "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *ag. ds.*; *Bronchopneumonia* (secondary). 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicæmia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall buy a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

RETURN OF CERTIFICATES OF DEATH

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archited, Locomotive engineer, Carlempainter, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.*

The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer — Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of.....* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent. . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 41.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

William I. Balger *291 - Paway St. - Boston*Official position *Secretary* Date of issue *1/12/23* Permit No. *516*

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farm* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former* (retired, 0 yrs.). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Purpura *septicaemia*," "Purpura *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(It recommends on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 36, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

20 Burial permit issued by Robert S. Smith Official position Secretary 21 Date of issue 11/7/23 Permit No. 518

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .
— *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death)."

 carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

Statement of occupation.—Precise statement of occupation is very important, so that the relative helpfulness of various pursuits can be known. The question applies to each and every person, irrespectively of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be employed as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *39 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefore furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

20 I HEREBY CERTIFY that a satisfactory standard certificate of death was filed with me BEFORE the burial or transit permit was issued Albert S. Smith

Official position Secretary Date of issue of permit Jun 27 1923 Permit No. 579

WRITE PLAINLY, WITH UNFADING BLACK INK — THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Leocomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner* (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritonæum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthemia," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Erbility," "Congestive," "Scalle," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hæmorrhage," "Infarction," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Pre-pernal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on a statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required, by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from diseases resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dendler," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Cool mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphentia* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Athemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 8.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reason, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden death of persons not disabled by recognized disease, and those of persons found dead.

RETURN OF CERTIFICATES OF DEATH

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.*

The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation) using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses; Whooping cough; Chronic nodular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *§§ ds., Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriages, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . The shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 36, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

N.B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, *e. g.*, *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*; (b) *Cotton mill*; (c) *Salesman*; (d) *Grocery*; (e) *Foreman*; (f) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scrub, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonis*, etc.; *Carcinoma, Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Pyrom" for malignant neoplasms); *Malaria*; *If whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insultion," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "tumor," for malignant neoplasms; *Menses*; *Whooping cough*, *Chronic nodular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *§§ ds.*; *Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Purperal septicemia," "Uterine peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 88, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

Date of issue of permit Jan 23 1923
Permit No. 524

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthiness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprayer, (b) Cotton mill, (c) Salesman, (b) Grocer; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory secondary or inter-current affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Squilla," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumony"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gas-tritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or the agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until those shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N.B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*. *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Summer*, (b) *Collon mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic services for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH, the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc.; *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatology), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," "Congestive," "Senile," etc.; "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc. When a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthiness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indelnic); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Strema," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, sticking to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.
