MARGIN RESERVED FOR BINDING

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

Official position Secretary Date of issue of permit 2/6/23 Permit No. 227

Every item of information should state CAUSE OF DEATH EXACTLY. PHYSICIANS should state CAUSE OF DEATH EXACTLY. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*. *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Irritability," "Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumony"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when first seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise as description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given pedicab care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 56, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 56, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

ADDRESS

Waltham Mass

20 I HEREBY CERTIFY that a satisfactory standard certificate of death was filed with me BEFORE the burial or transit permit was issued.

Albert S. Smith

Official position

Secretary

Date of issue of permit

2/5/23

Permit

No. *529*

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association.]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Leconative engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meningis, peritonemum, etc., Carcinoma, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatoic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intanition," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information, which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 86, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Typhemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *92 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphania," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 89, Secs. 10 and 1, as amended by Acts of 1910, Chap. 522.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 84, Sec. 8.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

106-13, 1923
[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a simple word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or *At home* and a definite salary), may be entered as *Housewife*, *Housework*, or *At home* and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphenteria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name organ); "Cancer" is less correct; avoid use of "Tumor," for malignant neoplasms); *Meningeal*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Meninges* (disease causing death), 23 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report more symptoms or terminal conditions, such as "Asbestia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any of her necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N.B.—WRITE PLAINLY, WITH UNFADING INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscar-riage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

PRACTICES
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such cer-tificate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; other-wise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths sup-posedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Woman at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Nestles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Nephritis* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report more symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forth with, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 88, Sec. 6.*

. . . He shall in all cases certify to this town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

ADDRESS

Winterton

V. S. No. 98
 N. B.—WRITE PLAINLY, WITH UNFADING INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employment, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer"; "Foreman"; "Manager"; "Dealer"; etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc., of _____ (name organ; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic subacute heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia," (merely symptom-

atic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For violent deaths state means of injury and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*. (b) *Cotton mill*. (c) *Salesman*. (d) *Grocery*: (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Nephitis*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Meselas* (disease causing death) *99 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Tebility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PERIPERAL septicemia," "PERIPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health. Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from diseases resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Landscape engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Printer*; (b) *Callon mill*; (c) *Salesman*, (d) *Grinner*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *Name*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite; *Tuberculosis of lungs, meningis, peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestion," "Sedla," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person)

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a simple word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary) may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scullery, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebral meningitis*, *typhoid fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *typhoid fever* (never "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonæum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphæmia," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hæmorrhage," "Insultion," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hæmorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 83, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 83, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal meningitis*; (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Disiplmia* (void use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Mesenteric Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mesenteric disease causing death, 89 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Athropy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Scabic," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicæmia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Coal engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary) may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to specify officially the occupations of persons engaged in domestic service for wages, as *Seaman, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation) using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphenteria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonaeum*, etc., *Coronaria, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report more symptoms or terminal conditions, such as "Ashtonia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Sotile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PERIPERIAL septicemia," "PERIPERIAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gascolitis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

33 Way Home Ave

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereon furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 88, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health. Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*. *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mines*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia", unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . of the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. MARGIN RESERVED FOR BINDING

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .
— General Laws, Chapter 46, Section 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person)

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

THIS CERTIFICATE CONSTITUTES SUCH PERMIT

M. 1. 1923

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or even up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc.; *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatic), "Atrophy," "Colicapses," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, colitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reason, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Permit

No. 547

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colony mill*, (c) *Salesman*, (d) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritonaeum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 49, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 15.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 88, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 89, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from homo when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 36, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 36, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc. *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic nodular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anæmia" (merely symptomatized) "Atrophy," "Collapse," "Coma," "Convulsions," "Epilepsy" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PERIPARTAL septicæmia," "PERIPARTAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhages, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectman for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely synonymic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from diseases resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

March 11, 1923
[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthiness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia", unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *92 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or misadventure, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or other and the date of his death. . . . — *Gen. Laws, Chap. 48, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of any such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. This question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 8 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the name accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meninges, peritoneum*, etc. *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as *Asphemia*, "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all deaths resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 48, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence; if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

19 UNDERTAKER T. F. MONAHAN ADDRESS PROV.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Typhoid cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; if *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *20 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plabobitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, whom last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . The shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (a) *Automobile factory*, return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *89 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestional," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal," *septicemia*, "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration or as to the manner or cause of the death, which can be obtained as to the deceased, require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

ADDRESS

John T. O'Malley

Wintthrop

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archivist, Locomotive engineer, Civil engineer, Stationary fireman*, etc. Put in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprayer*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business that have may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death is the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meningis: Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which solve any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, ergotism, erythris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician. If any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

302
 N. B. While in plain terms, PHYSICIANS should state CAUSE OF DEATH in plain terms, carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, carefully supplied. AGE should be stated EXACTLY. Exact statement of OCCUPATION is very important. See instructions on back so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back so that it may be properly classified. Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on forms part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report officially the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonitis, etc., Carcinoma, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely syndromatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Pneumopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original informant, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Leconomic engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphæxia," "Anæmia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hæmorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: *Abortion*, *cellulitis*, *childbirth*, *convulsions*, *hæmorrhage*, *gangrene*, *gasstritis*, *erysipelas*, *meningitis*, *miscarriage*, *negrosis*, *peritonitis*, *phlebitis*, *pyæmia*, *septicæmia*, *tetanus*.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . . It shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, *o. e., Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Foreman, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or even up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of.....* (name origin; "Cancer" is less definite; avoid use of "Tumor"; for malignant neoplasms); *Meningis; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *89 ds.; Bronchopneumonia* (secondary). *10 ds.* Never report mere symptoms or terminal conditions, such as *Lapse, "Coma," Convulsions, "Debility," "Atrophy," "Colic," "Ashteria," "Anemia"* (merely symptomatic), "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal *epileptic, etc., "Puerperal peritonitis," etc.*

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childhood, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, the facts required by law to be returned and recorded, which shall be accompanied, in case of an original internment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician or other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

RETURN OF CERTIFICATES OF DEATH

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (c) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.*

The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation) using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonæum, etc., Carcinoma, Sarcoma, etc.*, of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *10 ds. Never report mere symptoms or terminal conditions, such as "Asphania," "Anæmia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.*

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

State of Rhode Island.

CHAPTER 121, GENERAL LAWS, 1909. OF THE REGISTRATION OF BIRTHS, DEATHS AND MARRIAGES

Sec. 20. The clerk or registrar of each town and city shall on the first day of each and every month make a certified copy of all births, marriages and deaths recorded in the books of said town or city during the previous month, whenever the parents of the child born, or the bride or the groom, or the deceased person, were resident in any other town or city in this State or in any other state at the time of said birth, marriage or death; and shall transmit such certified copies to the clerk or registrar of the town, city or state in which such parents of the child born, the bride or the groom, or the deceased, were resident at the time of said birth, marriage or death, stating in case of a birth, the name of the street and number of the house, if any, where such parents resided, the place of birth of such parents and the maiden name of the mother, whenever the same can be ascertained; and the clerk or registrar so receiving such certified copies shall record the same in the books kept for recording births, marriages and deaths. Such certified copies shall be made upon blanks to be furnished for that purpose by the secretary of the state board of health.

N.B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite term for the same disease. Examples: *Cerebromeningitis*); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Mesites*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Mesites* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as *Lapse*, "Coma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insultion," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not eventually employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gaseritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicæmia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

MARGIN RESERVED FOR BINDING

N. B. — WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person)

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

PARENTS

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archited, Locomotive Engineer, Civil Engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., etc., etc., etc.,* (name origin; "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Malaria; Whooping cough; Chronic nodular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphænia," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phibbitis, pyæmia, septicæmia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until a satisfactory certificate shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . . The shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

April 11, 1928 B

[Approved by U. S. Census and American Public Health Association.]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Stationer*, (b) *Collon mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "I do not know," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphenteria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia," (merely asymptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Dobility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died [defined so that it can be classified under the international classification of causes of death], where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 11, as amended by Acts of 1910, Chap. 822.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 29, Sec. 36.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 5.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, *e. g.*, *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (c) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the name accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonias"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *99 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original internment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 83, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 83, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereunto furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

19 UNDERTAKER **J. S. WATERMAN & SONS** ADDRESS

N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less desirable; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc. When a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumony"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician. If any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N.B. - WRITE PLAINLY, WITH UNFAADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

April 16, 1928

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*. (b) *Cotton mill*. (c) *Salesman*. (d) *Grocery*: (a) *Foreman*. (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer" "Foreman" "Manager" "Dealer" etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary) may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dyspheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Mesles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mesles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information, as they give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 11, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 79, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WHITE FRAME, WITH UNFADING BLACK INK THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. Physicians should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

April 18, 1923

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Servant*, (b) *Coal mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*, *Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 11, as amended by Act of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 29, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PARENTS

EXTRACTS

**FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS**

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

DESCRIPTION (for unknown person)

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *General Laws, Chap. 38, Sec. 14.*

THIS CERTIFICATE CONSTITUTES SUCH PERMIT

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposedly due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

April 21, 1923

Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthiness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archited, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Formery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary); *10 ds.* Never report more symptoms or terminal conditions, such as "Aschemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died! . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death)."

N.B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthiness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Coal-miner, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housewife, or At home*, and children, not gainfully employed, as *A school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium*, etc., *Carcinoma, Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Aschemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestive," "Colic," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, neurosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 40, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

RETURN OF CERTIFICATES OF DEATH

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report officially the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or even up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "umor," for malignant neoplasms); *Measles*; *If whooping cough*; *Chronic nodular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestional," "Colic," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 8.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 53, Sec. 6.*

... He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 53, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

302
 N. B. - WHITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

[Approved by U. S. Census and American Public Health Association.]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. Birth may (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal hold only* (not paid *Housekeeper*, who receive a definite salary), may be employed, as *At school* or *At home*. Care should be taken to report officially the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs*, *meninges*, *pericereum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asbemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until these shall have been delivered to such board, the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatic (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden death of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Form laborer*, *Laborer*—*Coal hold only* (not paid *Housewife*, *Housekeeper*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*; *Branchiopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "tumor" for malignant neoplasms); *Menses*; *Wandering cathexis*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mesias* (disease causing death), 29 ds.; *Branchiopneumonia* (secondary), "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Pre-natal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.
(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give cause of the following diseases, without explanation, as the sole cause of death: Abortion, eclampsia, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 89, Secs. 10 and 1, as amended by Acts of 1910, Chap. 522.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement con-taining the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the at-tending physician, if any, as required by law, or in lieu thereof a certifi-cate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the per-mit is so given and the physician who certifies to the cause of death shall can the better furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 58.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, upon the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 84, Sec. 8.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is made.
- (3) Medical examiners will investigate and certify to all deaths sup-possibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthiness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper* or *Al home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never "Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meninges: Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Meningitis* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc. When a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicæmia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectman for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

WHILE PLAINLY, WITH UNWRITING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Coal miner, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonem, etc.*, *Carcinoma, Sarcoma, etc.*, of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Concidental," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician. If any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians will certify** to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians will certify** to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners will investigate** and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person)

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (c) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, moniliasis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died! . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 36, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 36, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health. Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

 Official position, Health Officer Date of issue of permit 6/13/23 Permit No. 597

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or at home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualifies, is indelicate); *Tuberculosis of lungs, meninges, peritonæum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestial," "Stimle," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on a statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 8.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or the agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until the aforesaid have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 44.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archited, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocer; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer — Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *99 da.; Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Scabic," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Tern-peral septicemia," "Puereral peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebeitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, with last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent. . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 86, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 86, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

3/2 23 15 21

June 16, 1923

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of a household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housewife*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelimitic); *Tuberculosis of lungs, meningis, peritonaeum*, etc.; *Carcinoma*, *Sarcoma*, etc., of ----- (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptom-

atic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Hemiplegia," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Renal wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, eclampsia, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plephlebitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and this scope can be extended at a later date.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association)

17, 1923

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, *e. g.*, *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomati), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

R-301
 in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Carpenter, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Woman at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housewife, or At home*, and children not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebralgical fever* (the only definite synonym is "Epidemic cerebral meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*; *Brachopneumonia* ("Pneumonia," unqualified, is indomitable); *Tuberculosis of lungs, meningis, meningium*, etc., *Carcinoma, Sarcoma*, etc., of..... (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *99 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, whom last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died! . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health. Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia?"; *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonis, etc.; Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asbemia," "Anemia" (merely symptomatoic), "Atrophy," "Collapse," "Coma," "Convulsions," "Tebility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on a statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reason, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 83, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or at home*, and children, not gainfully employed, as *At school or at home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia" unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses: Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on a statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATE STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

30, 1937
M.C. Miller

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonias"); *Labor pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc. *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite, avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.
(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body who has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths and possibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from diseases resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, *e. g.*, *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer"; "Foreman"; "Manager"; "Dealer"; etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scullery, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphteria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carotidoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility," "Congestive," "Smile" (etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "In-flu-enza," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscar-riage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certi-ficate of the attending physician. If any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certi-ficate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereupon furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 83, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence. If known; other-wise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 83, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths sup-possibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

20 I HEREBY CERTIFY that a satisfactory standard certificate of death was filed with me BEFORE the burial or transit permit was issued. S. J. Coury
 (Signature) Official position Health Officer Date of issue of permit 5/7/23 Permit No. 580

N. B. — WRITE PLAINLY, WITH UNFADING BLACK INK — THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association]

may 6. 1923

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former* (*retired*, *6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia. If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, colic, cholera, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectman for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, At home*, and children, not gainfully employed, as *A school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name neoplasms); *Menses; Whooping cough; Chronic tubular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Examples: *Septicæmia* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anæmia" (merely symptomatic), "Atrophy," "Colic-lapse," "Coma," "Convulsions," "Debility," "Congestive," "Sonic," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumony"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISÉD UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil Engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as Day laborer, Farm laborer, Laborer — Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as Servant, Cook, Housemaid, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: Farmer (retired, 6 yrs.). For persons who have no occupation whatever, write None.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid pneumonia"); Labor pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meningitis, peritonitis, etc.; Carcinoma, Sarcoma, etc., of..... (name neoplasms); Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report more symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken. (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.) Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, neurosis, peritonitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — Gen. Laws, Chap. 46, Sec. 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — Gen. Laws, Chap. 114, Sec. 46.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — Gen. Laws, Chap. 38, Sec. 6. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — Gen. Laws, Chap. 38, Sec. 7.

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from **injury or infection** related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons **found dead**.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under **cause**, the nature of an injury and of its consequences; and (2) under **manner**, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to **disease**, specify: (1) Under **cause**, its known or presumable nature; and (2) under **manner**, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death)."

DESCRIPTION (for unknown person) Body that of a woman apparently 50-60 years old; length, 5 ft. 5 inches; actual wt. 96 lbs.; the skull bare; the teeth false. Has been in the water many months. Clothing: Black poplin jacket; black fur collar; black poplin skirt; green waist, also a black waist; blue sweater; brown stockings over black stockings, etc. Had 3 prs. spectacles and remains of a pawn ticket issued by concern in West Philadelphia. Had a gilt bar pin with green, red and white stones and another bar pin with facet.

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

may 13, 1923

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer retired, 6 yrs.*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the diseases causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualifed, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphonia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 86, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 86, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

ADDRESS

20 I HEREBY CERTIFY that a satisfactory standard certificate of death was filed with me BEFORE the burial or transit permit was issued. J. J. Maury
 Official position Health Officer Date of issue of permit 7/10/23 Permit No. 2585

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Furn laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia?"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptom or terminal conditions, such as "Asbestia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 86, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereon furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary freeman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, that occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonaeum, etc., Carcinoma, Sarcoma, etc., etc.* (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Malaria; Whooping cough; Chronic tubular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 89, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence; if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 89, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumaism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

 so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.
 carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms,

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many (a) the kind of work and also (b) the nature of the business or industry, should therefore an additional line is provided for the latter statement; it may be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Cant mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never "Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonaeum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Hypopharyngeal cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Examples: *Malaria* (disease causing death), *2d*; *Bronchopneumonia* (secondary), *10* *da*. Never report mere symptoms or terminal conditions, such as *Asphemia*, "Anemia" (merely symptomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Droopy," "Exhaustion," "Heart failure," "Icteric," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittees on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, muscular, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until these shall have been delivered to such board, the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration or as to the manner or cause of the death, which can be obtained as to the deceased, require. — *Gen. Laws, Chap. 114, Sec. 46*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; or otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7*

FILES OF PRACTICE

The fulfilment of the purposes of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to each death only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths suspiciously due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

may 21, 1923

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, *e. g.*, *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Leconicme engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scraml Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meesles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Examples: *Meesles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Asphemia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Comengital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," ("Emorrhage," "Intanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all deaths resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper*, *Housework*, or *At home*, and children, not finally employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "tumor," for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report more symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, ergotism, gasstritis, erysipelas, meningitis, miscarriage, neurosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . I shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise as description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

R-302
 N. B. - WRITE PLAINLY, WITH UNFADING INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Archdeacon, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mining, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report officially the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningea, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Ashtemia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PERIPERAL septicemia," "PERIPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Pneumophneumonias: If primary cause, write the word "Pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or ordinary member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized injury unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

May 25, 1923

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as Day laborer, Farm laborer, Laborer — Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as Servant, Cook, Housemaid, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: Farmer (retired, 6 yrs.). For persons who have no occupation whatever, write None.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Group"); Typhoid fever (never report "Typhoid pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of..... (name origin); Cancer (is less definite; avoid use of "Tumor" for malignant neoplasms); Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: Measles (disease causing death), 20 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphonia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Compliment," "Sole," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tramia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia. If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — Gen. Laws, Chap. 46, Sec. 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration or as to the manner or cause of the death, which can be obtained as for the deceased, any other necessary information which can be obtained as for the deceased, — Gen. Laws, Chap. 114, Sec. 46.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence, — Gen. Laws, Chap. 83, Sec. 6.

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — Gen. Laws, Chap. 38, Sec. 7.

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonitis, etc., Carcinoma, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic tubular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumony"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or other and the date of his death. . . . — *Gen. Laws, Chap. 48, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*; *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Chief engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer;" "Foreman;" "Manager;" "Dealer;" etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Woman at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonæum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Anæmia," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestive"), "Sepsis," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hæmorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, eye primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hæmorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrotic, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until these shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for substantial reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 89, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association

July 2, 1923

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Tailor," "Foreman," "Manager," "Dealer," etc., without more precise specification, as Day laborer, Farm laborer, Laborer — Coal mine, etc. Women at home who are engaged in a definite salary, may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. Care should be taken to report specifically the occupation of persons engaged in domestic service for wages, as Servant, Cook, Housemaid, etc. If the occupation had been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: Formerly retired, 6 yrs. For persons who have no occupation whatever, write None.

Statement of cause of death. — Name, first, the disease causing death (the primary cause) with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid pneumonia"); Labor pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meningitis, peritonitis, etc.; Carcinoma, Sarcoma, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphyxia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — Gen. Laws, Chap. 46, Sec. 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — Gen. Laws, Chap. 114, Sec. 46.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— Gen. Laws, Chap. 38, Sec. 6. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — Gen. Laws, Chap. 38, Sec. 7.

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of cause of death. — Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of..... (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: Menses (disease causing death), 29 da.; Bronchopneumonia (secondary), 10 da. Never report mere symptoms or terminal conditions, such as "Ashtmia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Hemiplegia," "Hysteria," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. — Gen. Laws, Chap. 46, Sec. 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — Gen. Laws, Chap. 114, Sec. 45.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — Gen. Laws, Chap. 38, Sec. 6.

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — Gen. Laws, Chap. 38, Sec. 7.

RULES OF PRACTICE

The fulfilment of the purposes of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicaemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized diseases, and those of persons found dead.

See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

July 6, 1923
[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocer; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonem, etc., Carcinoma, Sarcoma, etc., of.....* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphyxia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestion," "Stimle," etc.), "Dropsy," "Exhaustion," "Heartfailure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereupon furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . We shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths and possibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asbemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Fibility" ("Congestial," "Stable," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

* State the DISEASE CAUSING DEATH, or in deaths from VIOLENT CAUSES, state (1) MEANS and NATURE of INJURY, and (2) whether ACCIDENTAL, SUICIDAL, or HOMICIDAL. (See reverse side for additional space.)

19 PLACE OF BURIAL, CREMATION, OR REMOVAL West Bridgewater, Mass. DATE OF BURIAL July 22 1923

20 UNDERTAKER C. R. Benson ADDRESS Wintthrop, Mass.

N. B.—WRITE PLAINLY, WITH UNFADING INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

S. A. Mowbray Health Officer

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid, *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc., of _____ (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthemia," "Anemia" (merely symptom-

atic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy" "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Tremor," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicaemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

ADDITIONAL SPACE FOR FURTHER STATEMENTS
 BY PHYSICIAN.

(name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicæmia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purposes of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archivist, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphenteria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestal," "Sedle," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH exactly. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Approved by U. S. Census and American Public Health Association]

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer or Planter. Physician, Composer, Architect, Locomotive Engineer, Civil Engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill; (a) Salsman, (b) Grocery; (a) Foreman, (b) Automobile factory.

The maternal worked on many form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as Day laborer, Farm laborer, Laborer — Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not faintly employed, as At school or At home. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as Servant, Cook, Housemaid, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: Former (retired, 6 yrs.). For persons who have no occupation whatever, write None.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Group"); Typhoid fever (never report "Typhoid pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indelicate); Tuberculosis of lungs, meningis, peritonium, etc., Carcinoma, Sarcoma, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestial," "Scarle," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken. (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.) Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information when they give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, ganagrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — Gen. Laws, Chap. 49, Sec. 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall nevertheless furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — Gen. Laws, Chap. 114, Sec. 45.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — Gen. Laws, Chap. 38, Sec. 6. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — Gen. Laws, Chap. 38, Sec. 7.

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH exactly. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Cartwright*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*. (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever*; *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Melancholia*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asplenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Comatose," "Semi," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is received.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. [Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer", "Foreman", "Manager", "Dealer", etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Firmly retired, 6 yrs.*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Examples: *Malaria* (disease causing death), *99 ds.*; *Bronchopneumonia* (secondary), *10 da.*. Never report mere symptoms or terminal conditions, such as "Ashtania", "Anemia" (merely symptomatic), "Atrophy", "Collapse", "Coma", "Convulsions", "Debility" ("Congenital", "Senile," etc.), "Dropsy", "Exhaustion", "Heart failure", "Hemorrhage", "Insanition", "Marasmus", "Old age", "Shock", "Uremia", "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia", "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 49, Sec. 9.*

No undertaker or other person shall buy or a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

See instructions and extracts from the laws on back of certificate.

10, 1923
REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative helpfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Cook*, *Painter*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Strawer*, (b) *Cotton mill*; (a) *Salesman*, (b) *Greenery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former* (retired, 6 yrs.). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum, etc.*, *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), 2d ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia's" (merely symptomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectman for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 89, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 89, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
 FROM THE LAWS OF THE
 COMMONWEALTH OF MASSACHUSETTS
 GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .
 — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Cartwright*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Koreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelicate); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic infectious nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary); *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestive," "Stable," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 49, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If relieved from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Current disease causing death, 29 ds.; Bronchopneumonia (secondary), 10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Oma," "Convulsions," "Debility," "Congestive," "Scarla," etc.); "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc. When a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths as possibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anomia" (merely symptomatic), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility" ("Congenital," "Scoble" etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mitted on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: *Abortion*, *cellulitis*, *childbirth*, *convulsions*, *hemorrhage*, *gangrene*, *gastroitis*, *erysipelas*, *meningitis*, *miscar-riage*, *necrosis*, *peritonitis*, *phlebitis*, *pyemia*, *septicemia*, *septicæmia*, *betanus*.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary foreman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonem, etc.*, *Curculoma, Sarcoma*, etc., *of*, (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 da.*; *Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congestial," "Sciele," etc.), "Dropsy," "Expansion," "Heart failure," "Hemorrhage," "Intanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 4E.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stipulating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as for the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . . We shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housework*, or who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, eclampsia, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

Everett notified

STANDARD CERTIFICATE OF DEATH.

Aug. 27, 1923.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebro-spinal fever* (the only definite synonym is "Epidemic cerebro-spinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Broncho-pneumonia* ("Pneumonia," unqualified, is indefinite); *Taber-*

culosis of lungs, meninges, peritonaeum, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin: "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Broncho-pneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Asthma," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Crna," "Convulsions," "Debility" ("Con gen ital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hæmorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uræmia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken.

- Cases for the Medical Examiners.**—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:
1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *Gas poisoning*, *Suicide*, *Homicide*, etc.
 2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Starvation*, *Suffocation*, *Erpousure*, etc.
 3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street*, or *one supposed to be due to Alcoholism*, etc.
 4. Deaths under circumstances unknown, as *A person found dead*, etc.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Sept. 3 1943

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Cart engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc.; *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary). 10 ds. Never report more symptoms or terminal conditions, such as "Asbestosis," "Anemia" (merely symptomatous), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility," "Congestional," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "In-fluxion," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscer-riage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —Gen. Laws, Chap. 46, Sec. 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certi-ficate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certi-ficate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —Gen. Laws, Chap. 114, Sec. 47.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —Gen. Laws, Chap. 85, Sec. 6.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; other-wise a description as full as may be, with the cause and manner of death. —Gen. Laws, Chap. 85, Sec. 7.

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths sup-posable due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Exact statement of OCCUPATION is very important. See instructions on back of certificate.

PARENTS

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatsoever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia?"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Commission on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6*

. . . The shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, *e. g.*, *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. Put in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprinter*, (b) *Collon miter*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphenteric* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meningis, peritonem, etc.*, *Carcinoma*, *Sarcoma*, etc., of..... (name origin); "Cancer" is less desirable; avoid use of "Tumor" for malignant neoplasms; *Melias*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Melias* (disease causing death), *29 da.*; *Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestion," "Stimle," etc.), "Dropsy," "Explanation," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumonia"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 40, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . Ho shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH EXACTLY. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Approved by U. S. Census and American Public Health Association!

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Maremmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, calicivirus, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

22
 carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespectively of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be filled in when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Drover," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (*not* paid *Housekeeper* or *Housework*), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (traded, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation); using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 da.*; *Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Toreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Mangler," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *at home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonaeum*, etc., (*Cyrcinoma*, *Sarcoma*, etc., of ----- (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Meninges*; *Whooping cough*; *Chronic reticular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anæmia" (merely symptom-

atic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," ("Congenital," "Senile" etc.), "Dropsy," "Exhaustion," "Heart failure," "Hæmorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uræmia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septichæmia," "Puerperal peritonitis," etc. State cause for deaths state means or injury and qualify as ACCIDENTAL, SUICIDE, or DOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Renal wound of head—homicide*; *Poisoned by carbonic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may aid to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, 'reluctant,' childbirth, convulsion, hæmorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septichæmia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committees on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or his agent . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

His oath in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known, otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health. Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths and possibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprinter, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not generally employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Mesenteric Whooping cough, Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mesenteric* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia" (merely sym.omatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Lability" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUPPERAL septicemia," "PUPPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person, or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer or Plumber, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Poorman," "Manservant," "Dentist," etc., without more precise specification, as Day laborer, Farm laborer, Laborer—Coal mining, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as Servant, Cook, Housemaid, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: Former (retired, 6 yrs.). For persons who have no occupation whatever, write None.

Statement of cause of death. — Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Group"); Typhoid fever (never report "Typhoid pneumonia"); Labor pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meningitis, peritoneum, etc., Carcinoma, Sarcoma, etc., of..... (name origin; "Cancer" is less definite; avoid use of "tumor" for malignant neoplasmas); Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashtonia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Droopy," "Exhaustion," "Heart failure," "Tomorhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — Gen. Laws, Chap. 46, Sec. 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — Gen. Laws, Chap. 114, Sec. 46.

Medical examiners shall make examination upon the view of the dead bodies of such persons as are supposed to have died by violence. — Gen. Laws, Chap. 38, Sec. 6.

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — Gen. Laws, Chap. 38, Sec. 7.

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Cooking*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not originally employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asihemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congential," "Senile," etc.), "Droopy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where the same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall hunt a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence, — *Gen. Laws, Chap. 84, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 83, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

1028. 11, 1923

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically, as occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia" unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc. (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic tubular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or . . . shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatic (including resulting septicaemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

ADDRESS

EXTRACTS

FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — General Laws, Chapter 46, Section 9.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — General Laws, Chap. 114, Sec. 45.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . Gen. Laws, Chap. 38, Sec. 6.

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — General Laws, Chap. 38, Sec. 7.

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archited, Locomotive engineer, Cartlayer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill;* (a) *Salesman, (b) Grocery;* (a) *Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housework*, or *At home*, and children, not gainfully employed, as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Ashtonia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.
(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 88, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

2025. 27, 1923

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Artist, Locomotive engineer, Carlineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Toreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *A school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the name accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meningis, peritoncum*, etc.; *Carcinoma, Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatale), "Atrophy," "Col-lapse," "Coma," "Convulsions," "Debility" ("Comatose," "Semi-l," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "In-attention," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puer-peral septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Com-mittee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pri-mary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscar-riage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as re-quired by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certi-ficate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physi-cian who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certi-ficate. . . . The person to whom the permit is so given and the physi-cian certifying the cause of death shall thereat furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; other-wise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths sup-possibly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary employments*, etc. But in many cases, especially in industrial work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colon mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Scamoi, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of _____ (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Miscels*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Miscels* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Assthemia," "Anemia" (nearly synonymous), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marrasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicaemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For violent deaths state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated

under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners.—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns, Falls Drowning, Gas poisoning, Suicide, Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion, Poisoning, Starvation, Suffocation, Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street, or one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

19 UNDERTAKER Richard Kirby East Boston. ADDRESS _____

Official position Health Officer Date of issue of permit 11/1/23 Permit NO. 672

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprayer, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer" or "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Example: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonaeum, etc., Carcinoma, Sarcoma, etc.,* (name origin, "Cancer," is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles, Whooping cough; Chronic reticular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds., Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Embasion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gastrone, gasstritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 58, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

EXTRACTS

FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .
— *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.— *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.— *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under **cause**, the nature of an injury and of its consequences; and (2) under **manner**, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to **disease**, specify: (1) Under **cause**, its known or presumable nature; and (2) under **manner**, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

Official Health Officer *Health Officer* Date of issue of permit *11/16/23* Permit No. *644*

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 49, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 83, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 83, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Archited, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or *At home*), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatsoever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonium, etc., Carcinoma, Sarcoma, etc., of* (name origin); "Cancer" is less definite; avoid use of "Tumor," for malignant neoplasms); *Menses; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), *29 da.; Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (morely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which solve any of the following diseases, without explanation, as the sole cause of death: Abortion, coliculis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlobitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original internment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. . . . — *Gen. Laws, Chap. 58, Sec. 6.*

— He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Artistical, Leconicative engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing DEATH the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonem, etc., Carcinoma, Sarcoma, etc., of* (name origin, "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease or which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 86, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 86, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employment, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, *house, who are engaged in the duties of the household only* (not paid *Housekeepers* who receive a definite salary, may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Example: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (definite synonym is "Epidemic Typhoid fever" (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritonum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *28 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestial," "Senile" etc.), "Dropsy," "Convulsion," "Heart failure," "Hemorrhage," "Imitation," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or . . . from the clerk of the town where the person died. . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or if insufficient, a physician who is a member of the board of health, or employed by it or by the selectman for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by the violence.—*Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically, as occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSE DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSE DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic nodular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *2d ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Ashtania," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Edema," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 8.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to **disease**, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

WHILE I LIVE, WITH MY OWN HAND, I WILL SIGN THIS CERTIFICATE OF DEATH. PHYSICIANS SHOULD STATE CAUSE OF DEATH IN PLAIN TERMS, SO THAT IT MAY BE PROPERLY CLASSIFIED. EXACT STATEMENT OF OCCUPATION IS VERY IMPORTANT. SEE INSTRUCTIONS AND EXTRACTS FROM THE LAWS ON BACK OF CERTIFICATE.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil Engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Deputy," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not finally employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (yielded, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualific., is indefinite); *Tuberculosis of lungs, meningitis, peritonitis, etc., Carcinoma, Sarcoma, etc., etc.* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 da.; Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Asphyxia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Dobility" ("Congenital," "Colic," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Peripartal septicemia," "Peripartal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "pneumony"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 46, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence. If known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

R-301
 N.B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Artist, Locomotive engineer, Circumlocution, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonium*, etc., *Cerebral, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Hemorrhage," "Inanition," "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "TERTIAL septicaemia," "Puereral peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on a statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 48, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original internment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 58, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purposes of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

INSTRUCTIONS AND EXTRACTS FROM THE LAWS ON BACK OF CERTIFICATE. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Steel engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupation of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease, see DEATH, relate occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the terms accepted term for the same disease. Examples: *Cerebrospinal fever* (its only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *2d day*; *Bronchopneumonia* (secondary), *10 da*. Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Colic," "Coma," "Convulsions," "Debility" ("Congenital," "Collapsus," etc.), "Droopy," "Exhaustion," "Heart failure," "Hemorrhage," "Transition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information as follows: as the sole cause of death: Abortion, cellulitis, childbed fever, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumata (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where this person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the places where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The minister worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the *PERSONS CAUSING DEATH*, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the *DISEASE CAUSING DEATH* (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc.; (name of site in "Cancer" as less definite, avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 da.*; *Bronchopneumonia* (secondary), *10 da.* Never report more symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . from the clerk of the town where the person died; . . . No such permit shall be issued until these shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 58, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. Those include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 53, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*, (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home* and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary action with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonium*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Examples: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; If secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.

— *Gen. Laws, Chap. 38, Sec. 6.*
. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from diseases resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died [defined so that it can be classified under the international classification of causes of death], where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 29, Secs. 10 and 1, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as herein-after provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 53.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise

a description of such person, as full as may be, with the **cause and manner of his death**, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposedly due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the **cause and manner** thereof, and will specify: (1) Under **cause**, the nature of an injury and of its consequences; and (2) under **manner**, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to **disease**, specify: (1) Under **cause**, its known or presumable nature; and (2) under **manner**, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

PHYSICIANS should state CAUSE OF DEATH EXACTLY. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite, avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthma," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyæmia, septicæmia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or . . . from the clerk of the town where the person died. . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

MARGIN RESERVED FOR BINDING

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person)

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *Gen. Laws, Chap. 38, Sec. 14.*

THIS CERTIFICATE CONSTITUTES SUCH PERMIT

1888. 1927

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a simple word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Articled*, *Leomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer retired*, 6 yrs.). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same official term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritonaeum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, colicitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc.*, *Carcinoma, Sarcoma*, etc., of.....(name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Meninges*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary); *10 ds.* Never report more symptoms or terminal conditions, such as "Ashtenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Delirium," "Congestional," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 48.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence, — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physical is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthiness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprinter, (b) Cotton mill; (c) Sakerman, (d) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs, meninges, peritoneum, etc. Carcinoma, Sarcoma, etc., of.....* (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Anemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Insanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State causes for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectman for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 83, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 83, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*; *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*; (b) *Cotton mill*; (c) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Dysphleria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is inadequate); *Tuberculosis of lungs, meningis, peritoneum, etc.*, *Carcinoma, Sarcoma, etc.*, of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *89 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Corticæes will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicæmia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, *first*, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Lebility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 88, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by trauma (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

19 UNDERTAKER C. R. Beaman ADDRESS Wenchook

Official position Health Officer Date of issue of permit 1/17/24 Permit NO. 671

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal miner*, *Stationary Fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colon mill*; (c) *Salesman*, (b) *Greasy*; (d) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic reticular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *19 da.*; *Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Asphyxia," "Anemia," "maraly symptomatic," "Atrophy," "Collapse," "Coma," "Convulsions," "Dehility" ("Congenital," "Senile," etc.), "Dropsey," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original informant, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 39, Sec. 6.*

. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicemia) and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 8.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death)."

DESCRIPTION (for unknown person)

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *General Laws, Chap. 38, Sect. 14.*

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Approved by U. S. Census and American Public Health Association!

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive Engineer*, *Civil Engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Expansion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefor furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 36, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resusitating septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary Comman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, *Home*, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (retired, 6 yrs.). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection which alone, in time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Diphteric cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*, *Bronchopneumonia* ("Pneumonia" unqualified, is indistinct); *Tuberculosis of lungs*, *meninges*, *peritonem*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin in parentheses, if less definite, avoid use of "Tumor" for malignant neoplasms); *Malaria* (Whooping cough; *chronic nodular heart disease*; *Chronic interstitial nephritis*, etc. The unqualified (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *10 da*; *Bronchopneumonia* (secondary), *10 da*. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Edema," "Heart failure," "Hemorrhage," "Inflammation," "Marasmus," "Old age," "Shock," "Drema," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL eclampsia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, whose name was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or . . . shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained easily enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 39, Sec. 6.*

He shall in all cases certify to this to town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 39, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons for whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths suspiciously due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicaemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

City St. Petersburg Fla

REMOVAL AND BURIAL PERMIT

Reg. Dist. No. 390I

Full name James Edward Young; Age 76; Sex Male; Color White

Disease causing Death Acute Pancreatitis

Date of death Jan 18th 1924, 19__

Removal to Boston Mass, via Atlantic Coast Line

Undertaker Wilhelm Undertaking Co Address St. Petersburg Fla

A Certificate of Death having been filed in my office in accordance with the Laws of Florida, I hereby authorize the removal and burial of the body of said deceased person as stated above.

Dated Jan 21st 1924, 192__ Registrar's Signature [Signature]

Burial Permits must be delivered by the undertaker to the sexton or other persons in charge of the burial ground or cemetery where burial takes place. When the body is to be shipped to a distant point, requiring the service of a common carrier, in addition to the Removal Permit, the body must be accompanied by a Transit Label as required by the State Board of Health. For full particulars see Rules and Regulations governing the transportation of dead bodies.

Sexton's Signature _____ Date of Interment _____, 192__

This permit must be indorsed by the sexton and returned to the Local Registrar of his district within ten days. If there is no sexton or person in charge of burial ground, the undertaker or person acting as such, shall sign same as sexton, giving date of interment. Write across face of permit the words, "No person in charge," and return to Local Registrar of the district in which interment is made within ten days.

INSTRUCTIONS TO PASSENGER ACCOMPANYING REMAINS

This Burial and Removal Permit must be filled out by the Local Registrar of the registration district in which the death occurred from information stated on the Death Certificate, over his signature.

The transportation company's agent or baggagemaster must detach this portion of the permit and hand it to the person authorized to accompany the remains.

If the body is shipped by express, the express agent must detach this portion of the Transit Permit and attach it to the Waybill, as it must accompany the remains to its destination. The receiving agent to turn over this Permit to the receiving undertaker, or person to whom the body is delivered.

The passenger accompanying the remains must deliver this Permit to the undertaker or person having charge of the burial of the body.

This permit authorizes the burial of the body of the deceased named on the reverse side of this Permit at any place in the State of Florida.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*; (b) *Cotton mill*; (c) *Salesman*; (d) *Grocery*; (e) *Foreman*; (f) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonaeum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasmas); *Measles*; *Whooping cough*; *Chronic tubular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtemia," "Anemia," (merely symptomatoid), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Compensal," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Imanition," "Marasmodine disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gasstris, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness when last seen alive by physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*
. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposable due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a simple word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Cartwright, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningitis, peritonitis, etc., Carcinoma, Sarcoma, etc., of* (name origin; "Cancer" is less definite; avoid use of "tumor" for malignant neoplasms); *Mesles; Whooping cough; Chronic tubular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mesles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report more symptoms or terminal conditions, such as "Asthma," "Anomia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congential," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, plebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefore furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatsoever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc. of (name origin, "Cancer" is less definite, avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asbestia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Hemiplegia," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PERINEURAL septicemia," "PERINEURAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, colic, cholera, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until these shall have been delivered to such board, agent or clerk. . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original informant, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatic (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Sprayer*, (b) *Cotton mill*; (c) *Salesman*, (d) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal hold* only (not paid *Housekeeper* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing nears the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Labor pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc. *Carcinoma, Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *29 da.*; *Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, who last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereat furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Official position *Health Officer* Date of issue of permit *1/30/24* Permit NO. *678*

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonaeum, etc.*, *Carcinoma, Sarcoma, etc.*, (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Hemiplegia," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certhaceas will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gastrone, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicaemia, tetanus.

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was connected, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which to the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*
 . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative helpfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Colton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement, Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Limber — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic services for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indelicate); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Examples: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Dribble" ("Congestive," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PERIPARTAL septicemia," "PERIPARTAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, neurosis, peritonitis, phlebitis, pyemia, septicæmia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws, Chap. 89, Secs. 10 and 11, as amended by Acts of 1910, Chap. 882.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died: . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. If death is caused by violence, the medical examiner only shall make such certificate. . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 88.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 84, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumas (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry; and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeeper* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH, the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typoidal fever* (never report "Typoidal pneumonia"); *Labor pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *metastases, peritonem*, etc., *Carcinoma, Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *2d ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Collapsus," "Coma," "Convulsions," "Delirium" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 467, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required for the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 58, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicaemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 58, Sec. 6.*
. . . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) **Medical examiners** will investigate and certify to all deaths **supposable due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

WHILE IN PLAIN, WITH ORIGINAL BOOK IN THIS TO A PLAIN. PHYSICIANS SHOULD STATE CAUSE OF DEATH IN PLAIN TERMS, SO THAT IT MAY BE PROPERLY CLASSIFIED. EXACT STATEMENT OF OCCUPATION IS VERY IMPORTANT. SEE INSTRUCTIONS AND EXTRACTS FROM THE LAWS ON BACK OF CERTIFICATE.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Composer, Archited, locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever*; "Typhoid pneumonia"; "Epidemic cerebrospinal meningitis"; *Dysphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonaeum*, etc., *Carcinoma, Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses*; *Whooping cough*; *Chronic nodular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Menses* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congestial," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intuition," "Manasimus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Prenatal septicemia," "Prenatal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . —*Gen. Laws, Chap. 46, Sec. 9*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. —*Gen. Laws, Chap. 114, Sec. 46*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. —*Gen. Laws, Chap. 36, Sec. 6*.

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7*.

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g. *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Cool mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and a child, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "tumor," for malignant neoplasms); *Menses*; *If dropping cough*, *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Menses* (disease causing death), *20 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic), "Atrophy," "Colicaps," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intention," "Marasmus," "Old age," "Shock," "Premia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectman for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 89, Sec. 6.*
— He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 88, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.
- (3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Painter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic reticular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 da.*; *Bronchopneumonia* (secondary), *10 da.* Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Droopy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childhood convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 58, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

- (1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
- (2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary Fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer*—*Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *metingus*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*, *Whooping cough*; *Chronic tubular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Meadles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Ashenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Dehility" ("Comental," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicæmia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia. If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, erysipelas, phlebitis, pyæmia, septicæmia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or . . . from the clerk of the town where the person died: . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 58, Sec. 6.*
. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicæmia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Feb. 28 1924

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Collin mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Dry laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc.; *Carcinoma*, *Sarcoma*, etc., of _____ (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds*; *Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asphyxia," "Anoxia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Tremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc. State cause for which surgical operation was undertaken. For violent deaths state means of injury and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning*;

Struck by railway train—accident; *Reverber wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated

under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners.—Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *Gas poisoning*, *Suicide*, *Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Starvation*, *Suffocation*, *Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street*, or *one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

20 Burial permit issued by H. C. Daniels Official position Health Officer 21 Date of issue 3/29/24 Permit No. 691

MARGIN RESERVED FOR BINDING

N. B. - WRITE PLAINLY, WITH UNFADING BLACK INK - THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he

shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death)."

DESCRIPTION (for unknown person).....

No. 692

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Plumber*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Coal engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* or *At home*), and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Group"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Cerebrum*, *Sarcoma*, etc., of (name or site); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Menses*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Malaria* (disease causing death), *20 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthemia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Intoxication," "Marasmus," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, colic, childbirth, convulsions, hemorrhage, gangren, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall therefore furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Composer*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Former (retired, 6 yrs.)*. For persons who have no occupation whatsoever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; *Mexles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or inter-current) affection need not be stated unless important. Example: *Mexles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Erbility" ("Congenital," "Scaly," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS GOVERNING THE RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, whose name was contracted, the duration of his last illness when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health Physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical examiners will investigate and certify to all deaths supposedly due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name organ); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asphemia," "Anemia" (merely symptomatic); "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Edema," "Old age," "Shock," "Uremia," "Weakness" etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, starting to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, § 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original instrument, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of any such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

... He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfillment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths suspiciously due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

No. 695

N. B.—WHITE PRINTED, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician, Compositor, Archited, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner, (b) Cotton mill, (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine, etc.* Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework, or At home*, and children, not gainfully employed, as *At school or At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid, etc.* If the occupation has been changed or given up on account of the disease causing DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the disease causing DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia, Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meningis, peritonem, etc., Carcinoma, Sarcoma, etc., of* (name of organ, "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Malaria; Whooping cough; Chronic nodular heart disease; Chronic tricuspidal repairs, etc.* The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Malaria* (disease causing death), *2d d.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Ashtema," "Anemia," (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Droopy," "Exhaustion," "Heart failure," "Hemorrhage," etc., "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "Puerperal septicemia," "Puerperal peritonitis," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, his knowledge of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . . or . . . from the clerk of the town where the person died. . . . No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 58, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 58, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.
