BULBS AND SEEDS

DAHLIAS

Unusual Bulbs and Tuberous Plants...

* Water Lilies *

CATALOG FOR SPRING · 1932

TERMS OF SALE—1932

ORDER EARLY. Send in your orders as soon as possible after receiving catalog to insure prompt delivery. All orders are acknowledged and shipped as soon as received, as far as possible. For bulbs that require late planting, we will advise date when delivery will be made. All bulbs should be planted immediately after receiving them.

DELIVERY. GLADIOLUS will be ready for shipment in December and usually can be supplied until June 1. DAHLIA TUBERS are ready for delivery in March.

OTHER ITEMS in this catalog supplied from Dec. 1 until June 1 unless otherwise specified.

SUBSTITUTIONS. Kindly state a second choice unless your order is sent early. When no substitution is desired, please make notation on the order blank.

ORDER BLANKS. Better and quicker service can be given when the order is plainly written on our special order blanks.

TERMS. Remittance should accompany order in the form of bank draft, postal or express money order, or personal check.

POSTAGE on delivery charges is paid on all orders of \$2.00 and over. Orders of less than \$2.00, please send 25c to cover postage and packing.

PRICES. At prices quoted herein 6 bulbs will be supplied at the dozen rate and 25 at the 100 rate. Less than 6 at an inceased rate of 10 per cent over dozen price, except when offered otherwise. As three bulbs of a single variety are very effective when planted together, you may order ¼ dozen of any bulbs of the same value, providing the order is for complete dozen lots. For example, you may group together:

		Per Doz.	
Gladiolus-"Betty Joy"		1.00	3 bulbs
" "Golden Frills".	*	1.00	each
" -"Henry Ford" .		1.00 {	
" -"Purple Glory" .		1.00	for 1.00
	OR		
Lilium-"Krameri"		5.00	3 bulbs
" —"Leichtlini"		5.00	oo ob
" - "Speciosum Magnit	ficum"	5.00	each
" - "Speciosum Rubru	m''	5.00	for 5.00

DO NOT GROUP TOGETHER BULBS OF DIFFERENT PRICE

Special attention is called to the various collections of Dahlias, Gladiolus, and other bulbs offered at reduced rates.

GUARANTEE. All bulbs, plants and seeds are guaranteed to be true to name and in a good growing condition, but I cannot be responsible for results obtained due to soil, climatic, and other conditions beyond my control. Every order receives most careful attention, but mistakes sometimes occur.

ADJUSTMENTS. Satisfactory adjustments will be cheerfully made where any error on our part has occurred, if we are notified promptly.

TO MY FRIENDS AND CUSTOMERS

THIS, my 1932 Spring Catalog, heralds a noteworthy expansion in the scope and possibilities of my business. Heretofore, this has been largely confined to the rarer and more unusual sorts of bulbs and tuberous rooted plants, and to Holland bulbs for Fall planting. Lovers of fine Gladiolus and Dahlias will be interested to learn that I have acquired the retail bulb and seed business of the Chageda Gardens at San Leandro, California, formerly conducted by Mr. Charles Davis. This purchase includes a choice collection of Gladiolus and Dahlia bulbs, and of Dahlia seeds, produced by a grower well known for the excellence of his stock. In the opening pages you will find listed only the newer creations that have exceptional merit. This will, of course, supplant my former limited offerings in these groups.

Following the Gladiolus and Dahlia sections is an enlarged and revised price list of rare and unusual bulbs and plants as well as seeds of gladiolus. This contains as many illustrations as space permits, many of which have been reproduced from photographs made at my own trial grounds. It is my hope to introduce and popularize as many of these plants as possible. Most of them are real floral gems, which would be hailed with enthusiasm by flower lovers if only they were better known. Cultural requirements are very simple.

Some of the species I offer were formerly found in American catalogs before the embargo on bulb importations; others are entirely new in this country, the stock being grown from seeds imported from many parts of the world. Names and descriptions have been carefully checked for scientific accuracy, and an effort will always be made to maintain this standard. It will be noted that prices on some items have been favorably revised, owing to larger stocks being available. I am constantly growing new sorts from seed, all of which will find a place in future catalogs as soon as large enough to sell. I am confident that my offerings will include a larger number of species than are found in any other catalog in this country.

Enclosed with this catalog is a folder, listing seeds of Dahlias, Iris, Lilies, Perennials, Annuals, and Miscellaneous Bulbs. Please note the prize offer on best Dahlias grown from our seeds.

This is a SPRING CATALOG. I will offer a wonderful variety of bulbs for Fall planting in a separate catalog, ready September first. A post card will bring it to you.

GLADIOLUS

Gladiolus nave grown in popularity to such an extent in the last few years that they are now seen in nearly every garden, and no flower will give more pleasure in return for the little care they require. The bulbs may be planted from January until July in California and in other localities as soon as the ground can be worked in the Spring. For early planting full

sunlight is desirable, while for late planting a location that is partially shaded during the heat of the day

should be selected.

Wonderful improvements in the newer introductions of Gladiolus were noted at the shows this past season; the new varieties in Blues and Violets being much better than the older introductions of the same colors which did not have such clear shades.

AVE MARIA (Pfitzer). A blue, nearly as light as Heavenly Blue. Seven or eight blooms open at once on a perfect spike. L. .50 each, 3 for \$1.25; M. .25, 3 for .60; S. .15, 3 for .35.

BERTY SNOW (Mair). Large flowers of beautiful lavender. Excellent substance and placement. Eight open at once. Fine exhibition and cut flower. A prize winner. .20 each; 3 for .50; 12 for \$1.50; 25 for \$2.50.

BETTY JOY (Bill). Soft, creamy white, flushed La France pink. Strong grower, long flower spikes with 6 to 10 perfect flowers open at one time. Delicately beautiful. .10 each, \$1.00 doz.

BETTY NUTHALL (Salbach 1928). Considered by many growers to be the best of Mr. Salbach's introductions. Light coral color blooms of great size, with pale orange throat markings and feathering of carmine. The plants are tall and vigorous in growth, the spikes gracefully carrying six to eight blooms open at a time. It is a good producer, large bulbs usually throwing from two to three separate stalks. Large, .20 each, \$2.00 doz.

BLUE PEACOCK (Salbach 1932). The only Salbach introduction of the year. A blue with deep colorings but nearer to true blue than Veilchenblau. A velvety blue blotch overlaid with cream gives the

Giant Nymph

peacock eye for which the flower was named. Large wide open florets, all well placed on the spike. Five or six open and many buds. \$5.00 each.

BREAK O' DAY (Bill). Clear pink blooms with darker throat lines on a good willowy spike. A leading early cut flower variety and very popular. .50 doz.

BYRON L. SMITH (Kunderd). A large wide-open lavender pink with the blooms well placed. .50 doz.

CANBERRA (Errey). A pure deep yellow of one shade on exceptionally tall spikes with 8 or more open at one time. Large, .30 each, \$3.00 doz.

CARMELITA (Diener). A very odd flower of smoky pink, blotched and striped with steel blue. Yellow and slate lip. .50 each, \$5.00 doz.

CATHERINE COLEMAN (Coleman). Tall spikes of large flowers of geranium pink. .15 each, \$1.00 doz.

CHARLES DICKENS (Pfitzer). Clear glowing violet-purple with a velvety blotch on lower petal. Excellent substance, fine placement. Seven or eight open. Awarded first prize in purple class American Gladiolus Society show, 1931. .15 each; 3 for .35, 12 for \$1.00, 25 for \$1.75.

CORYPHEE (Pfitzer). New European variety which has been a consistent winner. Large rose pink florets well placed on a good spike. 8 to 10 open at once. Large, .35 each, \$3.50 doz.

DOROTHY SIMPSON (Salbach 1928). Large beautifully ruffled lilac. Blotch of pale amber with heart-shaped inset of soft purple. From five to six well placed blooms open at one time. Very heavy substance. .20 each, 3 for .50, 12 for \$1.75, 25 for \$3.00.

DR. MOODY (Kinyon). An early variety with clear lavender florets without throat markings. Early, and many open at once. .20 each, $$2.00\ doz$.

E. J. SHAYLOR (Kunderd). Ruffled. Deep rose pink blooms on a strong spike and one of the best and most satisfactory for the home garden. .50 doz.

ELF (Diener). Lemon yellow when in bud. Open flowers pure white, lip delicate lemon. Large flowers. .15 each, \$1.50 doz.

EMILE AUBRUN (Lemoine). Rose and orange shades with gray overtone. Scarlet and rose blotch on lower petals. .10 each, \$1.00 doz.

GERALDINE FARRAR (Diener). Winner of the first prize for the best blue variety at the American Gladiolus Society convention in New York. A pale lavender with a deep violet spot on the lip. .25 each, \$2.50 doz.

GIANT NYMPH (Coleman). A vigorous growing variety of light rose pink, with creamy yellow throat. Tall and stately. .10 each, .75 doz.

GLADYS PLATH (Diener). An orchid flowering, mallow purple, dark near the edges with a white stripe through each petal. Large crimson spot on the lip. .15 each, \$1.50 doz.

GOLD EAGLE (Austin). A lovely clear yellow which does not burn, fleck or fade in the hottest sun. Vigorous grower, and one of the best listed. .75 doz.

GOLDEN FRILLS (Kunderd). A heavily ruffled prim hybrid of heavy substance. Rich daffodil yellow with a carmine tongue. .10 each, \$1.00 doz.

GOLDEN MEASURE (Kelway). A pure yellow with a golden sheen, which is thoroughly reliable. It is a standard florists' variety and is satisfactory in all sections. .75 doz.

HEAVENLY BLUE (Pfitzer). Large clear delicate lavender blue of great refinement and elegance. Reverse of petals much darker. Long graceful spike, many open. Blooms out to the very tip. Large .20 each, \$2.00 doz.

HELEN WILLS (Salbach). One of the best white gladiolus ever introduced, and named in honor of America's best woman tennis player. A clean, large white, shading to soft canary yellow on the lower petals. Tall, vigorous, and of wonderful substance. A coming cut flower for the florist trade. .15 each, \$1.25 doz.

HENRY FORD (Diener). A clear, dark rhodamine purple shading into deeper tones near the center. Excellent propagator. .10 each, \$1.00 doz.

J. A. CARBONE (Diener). Orange salmon, very iridescent, darker shading toward the outer edge of the petals. Yellow center. Fine, long, well built spikes. Each .25, doz. \$2.50.

JACK LONDON (Diener). Light salmon penciled vermilion. Canary yellow throat also penciled. Perfect bloom. .10 each, \$1.00 doz.

Dahlia—Jersey's Beauty

KING TUT (Davis). A splendid novelty in a gigantic flower of Venetian pink blended with peach red with fine throat markings. Flowers are wide open on a tall, straight spike. .25 each, \$2.50 doz.

LA PALOMA (Dusinberre). A clear orange grandiflora prim with many florets open at one time on tall spike. It does not burn. .50 each, \$5.00 doz.

Gold Eagle

LAVENDER BRIDE (Bride). Large open smoky lavender. Tall. .20 each, 3 for .50, 12 for \$1.50.

LONDON SMOKE (Diener). Corinthian red shading into bordeaux on the outer edges of the petals. Fine light stripe running through the center of each petal. Lip speckled ruby. .25 each, \$2.50 doz.

LOS ANGELES (Houdyshel). Called the "Cut and Come Again" glad, due to its wealth of bloom spikes. A graceful, clear bright pink with darker throat. Wonderful variety, featured in all catalogs. .50 doz. MARMORA (Errey). A magnificent flower of grayish lavender color, with an old rose blotch. Many flowers open at a time, and each is of great size. .25 each, \$2.50 doz.

MING TOY (Kunderd). One of the most popular glads in our Trial Grounds. An apricot yellow touched with bittersweet orange. A grand primulinus with excellent habits. .50 per doz.

MINUET (Coleman). A real aristocrat in clear lilac lavender on strong, sturdy spikes with many florets open at once, and exceptionally well placed. .15 each, \$1.50 doz.

MISS DES MOINES (Prestgard). Lovely clear pale lilac shading deeper at tips of petals. Medium .20 each, 3 for .50. Large .40 each, 3 for \$1.00.

MME. SULLY (De Groat). Ivory white with carmine blotches in throat. Very distinct and beautiful. .10 each, \$1.00 doz.

MOTHER MACHREE (Stevens). Rated as the best "Smoky" variety on the market. Tall, straight spikes carrying 6 to 8 wide open florets of a soft lavender and subdued orange with an overcast of gray. Edges of petals show a salmon pink. .60 each, \$6.00 doz.

MRS. J. K. ARMSBY (Diener). A great many large flowers opening at one time of a coral pink with a cream throat, speckled ruby. .15 each, \$1.50 doz.

MRS. TRUXTON BEALE (Diener). Ground color begonia rose striped with flame. .10 each, \$1.00 doz.

MRS. H. E. BOTHIN (Ruffled—Diener). Light geranium pink, heavily ruffled. Flame scarlet center. Strong, wellbuilt spikes. .10 each, \$1.00 doz.

MRS. LEON DOUGLAS (Diener). This is rapidly becoming one of the leading florist varieties because of the exceptional perfection of the large blooms which are begonia rose striped with flame. Flowers of great size are gracefully carried on a long spike. .10 each, \$1.00 doz.

MRS. FRANK PENDLETON (Kunderd). Flushed salmon pink with rich maroon blotch on lower petals. A very popular variety. .10 each, .75 doz.

MRS. F. C. PETERS (Fischer). Fine rosy lilac blossoms with soft crimson blotch; slightly ruffled and many opened at one time. Tall, vigorous ard fine. Large. .20 each, \$2.00 doz.

MR. W. H. PHIPPS (Diener). Beautiful La France pink, overlaid light salmon rose. Lower petals faintly streaked and dotted ruby. Flowers are enormous, ten or more being open at one time. The plant is tall and flower spike long. .15 each, \$1.50 doz.

MRS. NEWELL VANDERBILT (Ruffled—Diener). Light salmon pink, heavily ruffled. Throat sulphur yellow, mottled and striped with crimson. Large. .25 each, \$2.50 doz.

MRS. VAN KONYNENBURG (Pfitzer). Tall, clear light blue, and probably the best ever introduced. Wonderful propagator, and one of the best sellers. .15 each, \$1.50 doz.

MRS. JOHN R. WALSH (Ruffled—Diener). Heavily ruffled, flesh pink. Three lower petals flame shading into dark ruby at the throat. Very large flowers. .25 each, \$2.50 doz.

NIMROD (Errey Bros.). Very dark rich crimson. Its deep velvety coloring makes this flower an outstanding gladiolus. .15 each, 3 for .35, 12 for \$1.00, 25 for \$1.75. Bulblets, 100 for .50.

O. D. BALDWIN (Salbach 1929). Deep rich velvety red, dark cherry blotch. Wide open well placed blooms. A larger and improved Martha Washington. .25 each, 3 for .60, 12 for \$2.00, 25 for \$3.50.

ORCHID, THE (Sprague). A little gem, and a decided novelty. Lavender pink on pale flushed frosted surface. Edges ruffled. The name "Orchid" is most fitting. Large .10 each, \$1.00 doz.

PEARL OF CALIFORNIA (Kingsley). The size, color and form of this flower are all that could be desired. A tall, graceful spike bears from 26 to 32 buds with 8 to 12 open at one time. The color is clear, soft La France pink, blending to a rosy white throat. .15 each, \$1.50 doz.

PFITZER'S TRIUMPH (Pfitzer). This is unquestionably one of the largest and finest gladiolus ever introduced. The enormous Amaryllis-like flowers are bright flaming salmon with cherry blotch in the throat. 15 each, \$1.50 doz.

PICARDY (Palmer). A most sensational flower of delicate apricot pink. This fine new gladiolus has many large blooms open at the same time. The individual florets are all extremely large, slightly ruffled and of heavy wax-like substance. Large, \$10.00 each.

POLA NEGRI (Diener). Apricot with yellow lip, shading into old rose and salmon on the outer edges. Very lovely combination of colors. .10 each, \$1.00 doz.

PRIMROSE PRINCESS (Salbach). Tall growing spike of rich primrose yellow. Well placed, and many are open at one time. .10 each, \$1.00 doz.

PURPLE GLORY 'Kunderd). A velvety purple with darker throat. .10 each, \$1.00

REAH (Salbach). Rich mallow purple shading to mallow pink in center. Deep velvety blotch, almost black, in throat. Large wide open blooms. .15 each, 3 for .35, 12 for \$1.25.

RICHARD DIENER (Diener). A gorgeous bloomer of geranium pink with a yellow throat. .10 each, \$1.00 doz.

ROSE ASH (Diener). Strong stemmed, popular variety with good blooms of a rose shade suffused with a curious combination of blue, yellow and gray. One of the best. .75 doz.

SALBACH'S PINK. A glowing geranium pink with lip and throat of soft carmine. Petals are slightly recurved. Good size and substance and a fine spike. .50 each, \$5.00 doz.

SARABAND (Salbach). A very unusual flower, rich as an oriental rug. Coloring a velvety oriental brownish red, shading to red-purple. Straw yellow blotch. .15 each, 3 for .25, 12 for \$1.25.

SCARLET BEDDER (Salbach). A glowing scarlet grandiflora Prim, that is not too red to cut well with other Primulirus. Very popular. .50 per doz.

SCARLET PRINCEPS (Kunderd). Also known as "Virginia." An extraordinarily distinct and massive spike, with blooms of a rich scarlet, shading deeper in the throat. Massive blooms closely set. Winner of many awards. .50 doz.

SCARLET WONDER (Cowee). Immense, brilliant red. .25 each, \$2.50 doz.

SIR THOMAS LIPTON (Salbach 1929). Large salmon rose, heavily flaked smoky steel. Growth vigorous. The tips of this g'adiolus make a beautiful basket for a room with mahogany and old rose, old blue or taupe hangings. .15 each, 3 for .35, 12 for \$1.25.

SOUVENIR (Gravereau). An early, pure yellow prim of great merit. Probably the finest bright yellow of the type. .50 doz., \$3.50 per 100.

TENNYSON (Kingsley). A velvety brownish oxblood red with cream blotch in throat. Six to eight open. L. \$5.00, M. \$3.00, S. \$2.00.

VEILCHENBLAU (Pfitzer). A large flowering violet blue, rather dark. .15 each, \$1.50 doz.

WHITE BUTTERFLY (Primulinus—Kunderd). Pure white. .10 each, \$1 doz.

YOSEMITE (Diener). Geranium red shading into rose. Light stripe runs through the center of each petal. Lip pale lemon yellow. Very large and open flowers. \$1.00 each, \$10.00 doz.

GLADIOLUS COLLECTIONS

: :

"FRIENDSHIP COLLECTION"

This collection of Gladiolus has made more friends for my bulbs than almost any other collection in my catalog.
6 BETTY JOY, 6 GOLD EAGLE, 6 GIANT NYMPH, 6 HELEN WILLS, 6 MRS. F. C. PETERS, 6 THE ORCHID.
Blooming size bulbs, all properly labeled2.25 Half-size collection, 3 each of above varieties 1.25

"U. S. A. COLLECTION"

"OUR DOLLAR MIXTURE"

We consider this the finest mixture put out by any dealer. All large bulbs, of excellent varieties. NO TWO ALIKE IN A DOZEN. Will give you a wealth of bloom to cut. This is our most popular seller in glads. 1.00 per dozen, 7.00 per 100.

"OUR SIX BITS MIXTURE"

A mighty fine assorted run of large bulbs. Just the thing for that corner of your garden. Very satisfactory as cut flowers. .75 per dozen, 4.50 per 100, 35.00 per 1,000.

"OUR FLORISTS' MIXTURE"

Designed for the florist trade, and guaranteed to furnish splendid crops of bloom. These are assorted so some will bloom early and some late, in same planting. 3.50 per 100, 25.00 per 1,000.

NEW HYBRID GLADIOLUS SEED

Saved from Flowers of Separate Colors

I have had so many requests for Gladiolus seed saved from flowers of separate colors that a few of the most sought after shades are listed herewith for the first time. Every effort has been made to keep the colors pure, but do not expect to grow all one color of Gladiolus from seeds saved from one shade of flowers, for that would be impossible. However, there is a much better chance of growing a "Blue" Gladiolus from seed saved from blue flowers, than from "mixed seed."

GROWING GLADIOLUS FROM SEED

Where there is no frost Gladiolus seed may be sown in the open. Plant in the early Spring in rows about ore foot apart; cover with half an inch of sandy soil. Water and cultivate the same as for any other seed. Many will flower the first season. Lift the bulblets in the fall and handle the same as for other Gladiolus bulbs. In colder climates the seeds should be sown in shallow boxes in coldframes or greenhouses. A good sandy soil mixed with one-third leaf-mold should be used.

GLADIOLUS SPECIES

The greater part of the improved garden forms of Gladiolus are derived indirectly from South African species, of which there are over a hundred now known, which are unique both in shape and color,

FOR SPRING PLANTING

Each	Doz.

SEEDS OF SOUTH AFRICAN GLADIOLUS SPECIES

Each Spring I receive seeds of a number of wild Gladiolus from a collector friend in South Africa. Some of these species are most interesting in their unusual form and coloring. A few of the commoner species are the parents of the large flowering forms of Gladiolus. Many of these wild types are very fragrant and, with their unique shapes and exotic color combinations, furnish endless possibilities for Gladiolus breeders.

Some species bloom quickly from seed as in the case of G. Maculatus, which bloomed last summer after being planted for only six months. Other species require one or two seasons to bloom. It takes a long time to order and receive seeds from South Africa. After my supply has been sold, it will be months before another lot is received; therefore, order early. No responsibility is assumed for this Gladiolus seed in regard to it being "true to name" or its "fertility," for I have no control over it. However, I will say that all seed from this source that I have sown during the past two seasons has germinated very satisfactorily. The descriptions of the following species have been supplied by the collector. If possible, kindly give second and third choice in case some species have been sold out.

- Alatus—A peculiar type, should be useful in hybridizing. Large flowers, terra-cotta with green or yellow on lower segments. Sweet scented. 6 in. to 1 ft. high.
- Angustus—Very branched, of the "Painted Lady" type with very long narrow perianth tube.
- Blandus—Typical "Painted Lady" coloring. 1 1-2 ft; up to 20 blooms on a stem, often branched.
- **Brevifolius**—Blooms late autumn, small flowers, dainty pink and white, sometimes blue.
- Callistus. 3 ft. high, flowers well spaced out on stem, pale pink or white with deeper throat markings. Manner of growth reminds one of Primulinus Hybrids.
- Cardinalis—The "Superb Gladiolus." Long sprays of large carmine-red flowers with white throat markings outlined in dark red. Likes moist shady spots.
- Carmineus—Flowers in autumn and the long leaves come later. Very intense red. Large flowers on short stem.
- Crassifolius. Flowers late. Flowers smaller and deeper pink than G. Stanfordiae.
- Cuspidatus—More delicate than G. Blandus, flowers yellow with carmine throat markings, 1 ft. upper segments narrow and very waved.
- Debilis—A very pretty spring-flowering species, 11-2 to 2 ft. high on thin wiry stems, blossoms white, very prettily marked with deep carmine.

- Formosus. Flowers cream, blotched with purple, height 1 to 1 1-2 ft.
- Gracilis—The earliest to bloom, 1-2 ft. high, very graceful, flowers blue, marked with yellow on the lower lin.
- Hirsutus—Large deep pink blossoms, striped white. Sweetly scented. Very robust and handsome.
- Leichtlini-Spikes 4 ft.; flowers orange and red.
- Odoratus—New species, winter blooming, large flowers marked brown or mauve. Sweetly scented by day.
- Orchidiflorus—Very attractive, resembles G. Alatus in shape, having upper segments elongated and turned over, flowers soft bronze, sometimes marked with purple. Sweetly scented.
- Psittacinus—Height 5 ft., large flowers on strong stems, red flecked with orange.
- Stanfordiae—Flowers autumn, plants make nice clumps of foliage with many sprays of pink and white flowers.
- Tristis—Height 4-6 ft., very thin stems, flowers 10-20 in a spray, pale yellow, mottled brown. Very sweet-scented after sunset. Flowers midsummer.
- Villosus—Flowers with G. Gracilis. Pink, somewhat smaller.

Sent FREE as a premium with an order for \$10.00 worth of bulbs from this catalog at single or dozen rates, if asked for at the same time.

DAHLIAS

Dahlias grown in California are without doubt the best obtainable on account of the long growing season. Our gardens are in full bloom from early July until October, a wonderful blaze of color. Many are prize-winning introductions.

Dahlias are the most prolific of all summer flowers, producing as they do numerous blossoms which, if disbudded, will be gigantic in size. Owing to a recent acquisition, details of which are noted elsewhere in this catalog, and of which I am justly proud, more than ten acres of the finest introductions of Dahlias are now available for your selection. The mild California days are a great benefit to Dahlias, inducing the formation of strong tubers of perfect quality.

In planning the Dahlia garden, a pleasing effect may be obtained by grouping certain colors together, which may be followed out according to individual taste.

Our Dahlia tubers are priced to fit every purse. Some of the finest standard varieties will be found listed this season at very low prices. For some attractive Dahlia Collection bargains, turn to page 18 in this catalog.

FULL DIRECTIONS FOR PLANTING THE TUBERS AND CARING FOR THE PLANTS WILL ACCOMPANY EACH ORDER.

TYPES OF DAHLIAS

Dahlias are divided into the following types as classified by the American Dahlia Society:

- 1. FORMAL DECORATIVE. Double flowers, full to the center; outer petals usually flat and inner ones rounded; regular in arrangement.
- 2. INFORMAL DECORATIVE. Fully double flowers, often irregular in arrangement and with long, twisted or pointed petals.
- 3. CACTUS. Fully double flowers with long narrow petals, which are rolled or curved more than half their length.
- 4. SEMI-CACTUS. Fully double flowers; half-way between the Cactus and the Informal Decorative.
- 5. PEONY. Semi--double flowers, with yellow center; the outer petals are unusually broad and flat, while the inner ones twist and curl around the center.
- 6. POMPON. These are fully double miniature Dahlias having a diameter of less than two inches.
- 7. SINGLE. This type has only one row of petals surrounding an open yellow center.

NOTE: Pompon and single Dahlias are not included with the other types but are listed separately.

DAHLIA GREEN PLANTS

These are rooted cuttings, taken from tubers which have been started early in the greenhouse. They are ready for shipment after APRIL FIRST, and will bloom about the same time as tubers that have been planted three weeks earlier. They require the same care as any other plant and if this is given them, they will produce more and better flowers and just as good tubers as if grown from tuber stock. They are less liable to carry disease. The clumps of tubers are easier to divide the following spring and the cost of DAHLIA GREEN PLANTS is just half as much as for tubers of the same variety.

DAHLIA GREEN PLANTS are shipped to all parts of the United States. They are packed in ventilated packages and shipped EXPRESS PREPAID for orders of \$10 or over. (Orders for less than \$10 are shipped EXPRESS COLLECT). These green plants are not satisfactory to ship by parcel post.

DAHLIA GREEN PLANTS are supplied in varieties where the tubers sell for \$1 or over. The price is exactly one-half the price of the tubers. Send in your order for DAHLIA GREEN PLANTS as early as possible as only a limited quantity is available. A list of varieties of DAHLIA GREEN PLANTS of NEW INTRODUCTIONS, not included in our general list of Dahlias, will be mailed on request.

A. A. STYVERS (Boston). C. This is an immense flower with incurved petals. The color is amber, shaded salmon rose. Splendid cut flower. \$5.00.

AIMEE HODGENS (Boston) HC. Extra early bloomer. Golden bronze, under petals red. Strong, straight stems. \$7.50

Cactus Type

AL KORAN (Davies). D. Golden yellow. Big, bold flower with long, wavy petals, which stands very erect on long rigid stem. The plant is a tall, vigorous grower. .59

ALTAMONT (Kemp) D. Rose-pink deepening to American Beauty Rose toward center. Flower is larger than average, fully double, petals slightly curled. Keeps well when cut. \$1.00.

AMBASSADOR (Broomall). S. C.. One of the best. Color a soft amber pink and salmon with yellow center. .75.

AMUN RA (Seal). D. Golden copper deepening to a rich reddish bronze. A sensational dahlia of great size that is unsurpassed for exhibiting and very useful for cutting. .50

BALLET GIRL (Boston). Solid orange or orange edged white, sometimes on the same bush. .50.

BARBARA WEAR (Seal) D. A fine cut flower of blended pink and lavender on long, stiff stem. \$2.00.

BASHFUL GIANT (Marena) D. A rich apricot bloom with golden shadings, often winner as the "largest flower in the show." .75

BEAR CLAWS (Staats). An immense cactus of rich true carmine. The blooms are made up of many large long clawshaped petals, well incurved. The plant is tall and the stems good. A very free bloomer. 50.

BIG BEN (Dothy). HS. Raspberry red of one shade and one of the largest of the show dahlias. Stems are fine and the blooms are always perfect. .50

BLACK JACK (Westilius). D. Deep maroon, almost black. One of the darkest of all dahlias and a robust grower. The flowers are large and stems good. Decidedly attractive. .75

CANARY (Boston). D. An extra early canary yellow. Free bloomer on long stems. Tall grower. \$1.50

CHAMPAGNE (Boston). Dull, golden champagne. An entrancing color and an irresistible dahlia in every way. Large flower, extra long stem, lasts a long time on the bush as well as when cut. 50

CIGARETTE (Boston). C. A bi-color flower in scarlet and white on cane stiff stems. .50

COLOR SERGEANT (Lyndora Garden). D. Color is a deep salmon bronze. A new eastern dahlia of great beauty. \$2

CONQUISTADOR (Ballay) Hyb. Cactus. Awarded gold medal for best dahlia at the San Leandro flower show. The flowers are a beautiful soft creamy yellow shading to a glowing pink at the base of the petals. \$2.50

CORAL (Cactus). Color as name suggests. .50.

COQUETTE (Fisher & Masson). D. Giant flower, red and gold, the face of the petals being velvety red at the base blending and shading to golden sunset color at points. Reverse of petals gold. \$2.00

DADDY BUTLER (Boston). H. C. Rosy carmine with reverse of petals lighter. Large free blooming and an excellent keeper. .50

DAHLIAMUM (Ballay). Hyb. Cactus. Clear bright yellow. This dahlia much resembles a chrysanthemum, hence its name. Excellent cut flower. \$2.00

DOROTHY STONE (Fisher & Masson). D. Huge exhibition rose pirk. \$3.00.

EAGLE ROCK JEWEL (Broomall-Success). D. Cream overlaid shell-pink. Good stems. \$2.00

EDNA FERBER (Fisher & Masson). H. C. Color coral, shading to old gold at base of petals, which are long and wavy. One of the best sellers. \$1.50

EL GRANADA (Boston). True bright orange with a yellow reverse. Hybrid cactus with all good qualities, most lovely color, largest size, stands the warmest sunshine unusually well. .75

ELLINOR VANDEVEER (Seal). Glowing rose pink. An exceptionally beautiful dahlia of good size and with all the other qualities necessary to place it in the highest class. .75

EL REY Ω & C). D. Rich golden and salmon shade which blends well with other flowers, \$2.50

EMMA MARIE (Dahliadel). H. C. Color, clear pink with a creamy white center. Large. Splendid keeper. .50

FAITH GARIBALDI (Boston). D. Clear rose pink. A gold medal dahlia that has won many prizes. In our garden it has been a model of perfection. Flowers are large and well formed, the stems long and stout, the bushes loaded with bloom. .75

FLAMING METEOR (Barker). I. D. The color is a flaming orange-scarlet deepening to burnt orange at center. The flower is large, of good depth, splendid form and unexcelled keeping qualities. Stems long, tough and cane-like. .75

FORT MONMOUTH (Kemp). H. C. Rich claret color, with brightness unusual in the darker tones. Flowers frequently 13 inches in diameter. \$3.50

FORT WASHINGTON (Rindlfeisch-Jost). D. A splendid mahogany-red which does not fade, borne on extra long stems of great strength. \$1.50

FRANCESCA (Davis) D. A huge flower, tanned rose with distinct violet suffusion, touched with gold. Petals long narrow and artistically twisted. Stems are long and rigid. \$1.50

F. W. BUTLER (Boston). D. This dahlia has frequently won prizes of various flower shows for largest and best blooms. Color is golden orange, flaked bronze. Excellent for cutting and exhibition. \$15.00

GLADYS SHERWOOD (Broomall). H. C. Clear white. One of the favorites. .50

GORGEOUS ELIZABETH (Boston) P. Brilliant red, tipped gold. One of the finest Peony dahlias. .75

HALVELLA (McWhirter) D. Beautiful shade of rose pink, flowers of large size on stiff stems. A late bloomer, but prolific at the time when you want flowers. .35.

HARRY MAYER (Europe). D. A splendid pale rosy purple which is held well above the foliage on long, stiff stems. Fine form and good grower. 1.00

HATHOR (Seal). D. A distinctive dahlia of a vivid flame color with tones of orange and crimson showing. Large bloom on perfect stems. The richness of the color and free growing habit makes it one of the best of the newer varieties. \$1.50

IVORY (Boston). D. A large exquisitely beautiful broad-petaled ivory white. The flower is full and deep, does not burn and keeps indefinitely. Fine stem. \$3.50.

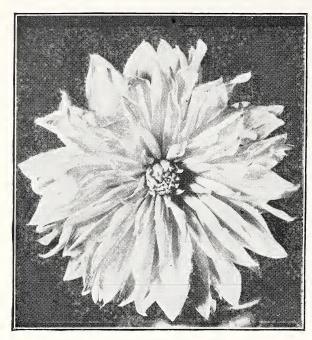

JACK O'LANTERN (Reed). D. A good decorative with wide twisted petals of brilliant orange-red shading darker near the center. Center petals are tipped gold. \$1.00

Semi-Cactus Type

JANE COWL (Downs). I. D. One of the few graceful giants. It is an immense glistening, bronzy buff and old gold, with just enough twist to the broad petals to make it beautiful. Free blooming and fine for cutting and show purposes. 50.

JEAN HARE (Fisher & Masson). H. C. Beautiful golden yellow, which changes to an apricot buff late in the season. \$1.50

Peony Type

JERSEY'S BEACON. D. Chinese scarlet with a much paler reverse. Very large. .50

JERSEY'S BEAUTY (Waite). D. This salmon rose pink dahlia is one of the best cut flowers in the garden. The blooms are of good size and fine substance and the stems are long and tough. 50

JERSEY'S CAPRICE. D. An autumn shade, best described as apricot buff. Flowers large on strong stems. .75.

JERSEY'S IDEAL. D. Dark lavenderpink and one of the best in its color. Free bloomer. \$1.00.

JERSEY'S KING. D. Begonia-rose with a distinct form, the petals being broad, and rounded at the tips. .50.

JERSEY'S MASTERPIECE (Waite). An immense strawberry bloom suffused gold at the base of the petals. Excellently formed and on stems of great strength. Thick, leathery foliage which is very attractive. \$1.50.

JIM MOORE. (Loller). D. A golden yellow bloom suffused salmon with good size and form. \$3.00.

JOVE (Ballay). D. A giant dahlia. Bronze with old rose and gold. Has been a winner in many flower shows. \$1.50.

JOY (Boston). F. D. A beautiful clear silvery lavender without a trace of white. An immense flower. \$3.00.

KATHLEEN NORRIS. (Fisher & Masson). D. True rose pink, later deepening to mellow pink and paler in the young central petals. Petals are broad and overlapping, with twisted ends, filled to the center. \$4.00.

KEMP'S VIOLET WONDER (Kemp). D. A rich Naphthaline violet, lightening to a bluish violet at the tips of petals. Lavender reverse. A fine, deep flower of great size and perfect form. \$2.50.

KING TUT (Seal). D. Rich, dark velvety crimson burgundy. Extra large. \$1.00.

KITTY DUNLAP (Boston). D. A very free blooming dahlia of American Beauty rose. The stems are long and stiff. .75.

LADY LYNDORA (Lyndora Gardens). D. Color, pink and white. \$1.50

MAE SADLER REID (Pelicano). D. An exceptionally large blossom of mahogany red, deepening to a dull maroon. The petals are broad and flat and the flowers have great depth. Blooms till late fall and flowers never show center. \$1.50.

MARGARET MASSON (Fisher & Masson). D. A beautiful eastern dahlia that does well in California. Silvery pink. .75.

MARGARET WOODROW WILSON (Fisher & Masson). D. Creamy white with a slight lavender suffusion. Large flower with broad petals slightly rolled. The plant is low growing and branching. .75

MARIPOSA (Boston). H. C.. One of the favorites. Pure light pink with a touch of mauve. Good center. .75

MARMION (Mastick). I.D. An immense pure golden yellow with bronze suffusion on reverse of petals. Form perfect, prolific bloomer. Long canelike stems holding blossoms well above foliage. .75

MEADOW LARK (Burns) D. A fine large flower with shading of buff and straw, reverse darker. .75

MINNIE EASTMAN (Eastman) H.C. Splendid hybrid cactus. A brilliant flame color bloom with undershadings of deep yellow. Stems are long and firm and a sturdy grower with glossy foliage. \$2.00

MRS. ALFRED B. SEAL (Seal). I.D. A beautiful old rose decorative. The flowers are huge, of great depth and substance. Strong tall bushes with excellent stems. \$4.00

MRS. CROWLEY (Broomall). D. Brightest salmon pink shading to yellow at the base of the petals. Good sized flower on strong stems. Attractive in the outside row of the garden. .50.

MRS. CARL SALBACH (Salbach). D. Large flower of lavender tints on pink, sometimes with a touch of white at the center. One of the best for cutting. .50

MRS. ELEANOR MARTIN (Pelicano). D. Mulberry or violet rose. Something new in color. In a sunny climate the violet tone will be more pronounced. It is a

very handsome dahlia with perfect stem and habit of growth. \$1.00

MRS. I. DE VER WARNER (Maraen). D. Considered the best of the standard orchid pinks. .50

MRS. JOHN T. SCHEEPERS (Maraen). D. Lovely canary yellow, changing to old rose and pink on outer petals, and as season advances it takes on deeper tones. .50

MY MARYLAND (Downs). H. C. A delicate pink suffused lavender, each petal tipped ivory. Splendid stem and foliage. \$1.50

NANAQUAQUET (Richards). D. Orchid pink. Good for cutting. \$2.00

NICHU (Boston). D. Pale yellow. An improved Yellow King which is vigorous in growth and free in blooming. Resembles in appearance the Yellow Turner chrysanthemum. .75

NOBILIS (Doolittle). D. Combination of white and red. .75

OLD HICKORY (Dahliadel). D. Madder red with apricot suffusion and the blooms are held well on cane stems. \$2.00

PAUL MICHAEL D. One of the largest of the California decoratives and best described as "California Gold." It has a faint tint of old rose, with a perfect center and wire stems. .50

PEPPER'S DELIGHT (Decorative). A true pink for cutting. \$1.50

PIERROT (Stredwick). C. An attractive deep amber, distinctly tipped white. .50

POP STEWART (Fisher & Masson). D. Lilac pink. Large size on good stems. \$1

PRIDE OF CALIFORNIA (Lohrmann) D. Called the "American Beauty Dahlia." Grown very largely for cut flowers. Crimson red, with a dark, full center. .35.

QUEEN OF THE GARDEN BEAUTIFUL (Decorative). Clear yellow with good stems. One of the best sellers. .75

REGAL (Boston). D. Bronze heavily suffused with dull old rose. This is doubtless one of the largest dahlias grown. The flowers retain their large size even in the late fall. The stems also remain strong and straight through the whole season and the plant is a free bloomer. \$2.50.

Informal Decorative Type

REGENT (Boston). D. Lavender pink. large flower with numerous long incurved petals completely covering the center. .50

ROBERT TREAT (Mueller). D. Deep bright rose. A beautiful eastern prize winner. Flower is large and it blooms most freely on good stems. .75

ROMAN EAGLE (Fisher & Masson). D. A typical autumn shade of flaming brilliant burnished copper. .75

ROOKWOOD (Boston). D. A deep cerise rose, with petals that curl and crinkle. \$1.00

ROSE FALLON (Harding). D. Deep old rose bloom. Perfect form and straight stem. .75

SAGAMORE (Badette). Golden amber shading deeper at the center. Another popular eastern variety that has won many prizes. The color is very good and the bloom is very beautiful. .50

SALBACH'S WHITE (Salbach). Large ivory white decorative dahlia. Keeps well and does not burn. Awarded gold medal by the Dahlia Society of California. \$1

SANHICAN'S BLUEBIRD (Fisher & Masson). D. One of the nearest things to a blue Dahlia we have seen. Violet blue. Splendid for cutting. \$1.00

SANHICAN'S GEM (Fisher & Masson) D. Old rose shade thickly suffused with amber. Petals are staghorn type. \$1.00

SEAL'S CALIFORNIAN (Seal). D. Bright golden yellow at center, shading lighter toward outer petals and tips tinted bronze pink. \$2.50

SUSAN G. TEVIS (Boston). F. D. The color of this stately flower is a deep shade of lilac with a silvery sheen. The plant is unusually vigorous and the foliage dark and rich. The large blooms are supported on exceptionally long and strong stems. .75

TOMMY ATKINS (Boston). D. Bright scarlet. A new and very brilliant shade. The refined but irregular formation of the large flower is very striking. Stem is the best possible and the blooms are freely produced. .50

TRENTONIAN (Fisher & Masson). D. Reddish copper and gold, described by the originator as "Indian skin." Flower has a velvety appearance unusual in this color blending. This variety is a strong grower and produces immense blooms on very strong stems that are good for all purposes. .50

TRYPHINNIE (Seal). D. Shell pink with darker reverse. Large flower on strong stem. Good keeper. .50

SINGLE DAHLIAS

Single Dahlia

Single Dahlias are prolific bloomers. For mass planting in beds or borders they are very satisfactory. Excellent for cut flowers.

SEPARATE COLORS: Pale Pink, Golden Brown, Rich Purple, Buff, Bright Orange, Yellow or Lavender. Each .50, doz. \$5.00

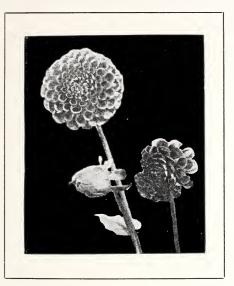

UNION JACK. Red, with white stripes. Each .50

ENGLISH BEDDING SINGLE DAHLIAS

The plants bloom in 12 weeks from planting and are literally covered with bloom until frost. The bush is dwarf, not exceeding two feet in height and requires little care. They can be planted in beds 12 inches apart or in attractive hedges along a drive. The flowers are similar to the single Dahlia except the bloom is smaller and is carried on long rigid stems which make an excellent cut flower with a wide range of color from white to darkest maroon.

MIXED COLORS: Dozen \$2.25; 25 for \$4.25; 100 for \$12.75.

PLEASE NOTE: Pompons, Singles and English Bedding Dahlias should be planted as soon as received. The tubers are small and may dry out if exposed to the air.

POMPON DAHLIAS

You can plant nothing better in your garden to produce a wealth of cut flowers for the home, over a long period, than Pompon Dahlias.

They are very easy to grow, can be planted quite closely together, and may be used with annuals and with shrubbery in the border or the foundation planting.

One of the most popular uses of Pompon Dahlias is in a hedge, which quickly makes a growth of foliage and for several months is covered with a mass of bloom, furnishing outside beauty and material for cutting. Plant one foot apart for a hedge, staggering the plants in a double row.

IMPORTANT: Tubers of Pompon Dahlias should be planted as soon as received.

Ainsley's Superior Flower Seeds

DAHLIA SEEDS

Many growers of cut flowers are today growing their Dahlias from seed instead of bulbs, and find the percentage of doubles very high and colors good.

This is a great saving of both investment and labor, and since all new varieties are produced from seed, many new and improved varieties are found in a seedling bed.

Dahlias will usually bloom from seed about two or three weeks later than tubers planted at the same time. Usually they make large clumps of tubers in the Fall.

CULTURAL INSTRUCTIONS

Obtain some good garden soil and pulverize it quite fine. If too heavy add sand. Fill a box with about 3 inches of soil and press down level. With the edge of a board press rows about 1-2 inch deep. Sow the seeds in these rows. Sift sand over the seed until the surface is level and press down firmly. Water carefully and keep box in warm moist place.

Dahlia seed will show the first plants in about 4 or 5 days, and while growing re-

quire no more care than other tubers or plants.

As soon as the plants have the first pair of rough leaves, prick them out with the point of a penknife, and transplant into 3-inch pots, or into another box, if you have no pots. Grow them thus until it is warm enough to put into the ground. Never put Dahlias into the ground until the soil is warm.

XXX GRADE DAHLIA SEED MIXTURE

Our XXX (three X) grade of seed is, in our opinion, the best value you can obtain for your opinion, the best value you can obtain for your money, either from us or other growers. It is a formula mixture, each packet containing seeds from 15 parents which we have tested for years and are known to throw a large percentage of double flowers. The seed parents used are strong continuously about the first falls. growing plants with insect resisting foliage, of the newer type. The pollen parents used this year were varieties of special merit such as Jane Cowl, Kemp's Violet Wonder, Kathleen Norris, Marmion, Francesca, etc. Packet of 100 seeds, \$5.00; half packet (50 seeds), \$3.00

SPECIAL TRIAL PACKET of 35 Seeds of XXX MIXTURE for \$2.00.

XX GRADE DAHLIA SEED MIXTURE

Made up of the best of the standard varieties, such as Jersey's Beauty, Mariposa, Amun Ra, Mrs. I. de Ver Warner, etc. The proportion we use is about 70 per cent decorative and 30 per cent hybrid cactus. Will give plenty of splendid flowers of a wide range of colors. Packet of 100 seeds, \$2.00

X GRADE DAHLIA SEED MIXTURE

Our one X grade is saved from named varieties only, and gives good results. It is intended for use where the gardener wants to plant in quantity for flowers only, and for this reason we call it our "Florists' Mixture." The repeat orders we receive on it convince us that it gives satisfaction where cut flowers are wanted. Packet of 100 seeds, \$1.00; packet of 1000 seeds, \$9.00

HYBRID SHOW DAHLIA SEED MIXTURE

The increasing popularity of this type of Dahlia has caused us to grow it separately, although it often reverts to the old ball type, and many come as decorative. It furnishes an interesting experiment. Packet of 50 seeds, \$1.00

ENGLISH BEDDING SINGLE DAHLIA SEED MIXTURE

Plants bloom in 12 weeks from planting and are literally covered with single blooms until frost. The bush is dwarf, not exceeding two feet in height and requires little care in growing. They can be planted in beds or as a hedge 18 inches apart, and the fact they do not need disbudding or staking increases their popularity. The flowers are similar to the single Dahlia except they are smaller. Stems are long and strong, making them a splendid cut flower. Range of colors is from white to darkest maroon, with many shades in the same flower in some of them. Per packet, .50 Per packet, .50

POMPON DAHLIA SEED MIXTURE

Seed harvested from the smaller and most popular new varieties. We grow nearly all the best ones, featuring many of the new varieties in our gardens. A packet of this seed will give you a splendid bed of pompons. We grow them entirely separate from the larger Dahlias, and use every possible means to induce cross pollenization between the smaller types. Packet of 50 seeds for \$5.00. seeds, \$1.00; 500 seeds for \$5.00.

Gordon Ainsley

CAMPBELL, CALIFORNIA

CASH PRIZES

FOR THE BEST DAHLIAS GROWN FROM "AINSLEY DAHLIA SEED"

\$25.00 in Cash to the winner of FIRST PRIZE in the 1932 AMERICAN DAHLIA SOCIETY SHOW, for the best ONE-YEAR-OLD SEEDLING, with the understanding that the exhibitor purchases the Dahlia seed from us.

\$25.00 in Cash to the exhibitor who is awarded FIRST PRIZE for the best ONE-YEAR-OLD SEEDLING in the 1932 show, held by THE DAHLIA SOCIETY OF SAN FRANCISCO, with the same provision that the winning Dahlia is grown from seed purchased from us.

IN ADDITION TO THESE CASH PRIZES

\$10.00 orders for bulbs or seeds will be presented to the winners of FIRST PRIZE FOR THE BEST ONE-YEAR-OLD SEEDLING, offered by any other OFFICIAL DAHLIA SHOW held in 1932, providing the prize-winning Dahlia was grown from "Ainsley Dahlia Seed" purchased this year. Winners of these \$10.00 PRIZE ORDERS will be allowed to select any BULBS, PLANTS or SEEDS listed in this catalog to the value of \$10.00. PRIZE CERTIFICATES, signed by an official of the show should be forwarded to us as soon as possible after the award has been made, so that prizes may be selected in time for shipment at the proper season.

Only one \$10.00 order will be awarded to the same person. When competing for any of these prizes, we must be notified at least ten days prior to the exhibit, stating name of show and where it will be held.

DAHLIA SEED OF KNOWN PARENTAGE

All our seed is saved under the name of the variety, whether we sell it in mixture or not. For those specialists who want to plant seeds and keep the record of parentage we offer the following varieties of seed bearing parents. Pollen parents of these have been Jane Cowl, Elite Glory, Marmion, Jersey's Beauty, Francesca, Color Sergeant and others of a newer type, which usually transmit a heritage of strength, form and color.

BE SURE TO ORDER A SECOND AND THIRD CHOICE if your order is placed after harvest, as many of our customers order a year in advance of the crop to insure a supply, and some varieties produce few seeds even when hand fertilized. Expect NOTHING from Dahlia Seed and be surprised with results, rather than plant with the idea that each plant will be a winner. We again urge the amateur to consider planting our XXX Grade Mixture, which gives by far the best chance, as we select the varieties from ten years of experience.

IRIS FROM SEED

Those who find it difficult to establish some of the rarer Iris species will be interested in the following list of seeds. Iris seeds may be sown in the Spring, in flower pots or in shallow wooden boxes or "flats." Any good garden soil will serve. Some will not germinate until the following Spring; therefore, be patient, and do not discard the plantings prematurely.

LILIES FROM SEED

Growing Lilies from seed is very interesting, and in some instances, it is more satisfactory than planting the bulbs. It requires from two to three years to obtain a flowering size bulb from seed. Some varieties of Lily seed germinate very quickly, while others remain in the ground one year before making any sign of growth. Therefore, care should be taken in not destroying the boxes or beds containing Lily seeds. The seeds may be grown either in the spring or the fall, in same manner as suggested for growing Gladiolus seed. When the seedlings are large enough to handle, they may be transplanted to a permanent location.

SEEDS OF BULBOUS AND TUBEROUS ROOTED PLANTS

Growing bulbous plants from seed is a most fascinating pursuit, if one has the patience to wait one to three years for flowers. There is no particular difficulty attached to this work. It is only essential to bear in mind that the seeds of most bulbs are slower to germinate than those of annuals, often taking from six weeks to a year to break ground. A good method for growing these seeds in small lots is to prepare some good potting soil, and sow them in pots. These should not be subjected to severe cold, or allowed to dry out at any time. Seeds should be covered twice their own depth, preferably sifting the soil over them, and pressing down with a smooth block of wood. A mulch of peat will help to conserve moisture at the surface.

Many of the seeds in the following list are grown in our trial garden. Others are obtained from collectors and botanical gardens in foreign countries. Many bulbs can be obtained only by growing from seed on account of importation restrictions. The greatest care is taken to supply the very best seed, true to name. However, no responsibility is assumed for the results obtained. Orders will be filled when the seed is ready, or when received from foreign sources, usually in March or April. If possible, kindly give second and third choice in case some items have been sold out. Packets usually contain from 25

and third choice in case some items have been sold out. Packets usually contain from 25 to 100 seeds each, according to the value. Very rare varieties have from 6 to 12 seeds per packet.

SEEDS OF ANNUALS AND PERENNIALS

The following seeds are offered as a result of my acquiring the retail business of Chageda Gardens. They are all fresh and of the best quality, and will give uniformly satisfactory results with proper care.

I offer a mixture of California wild flower seeds, for broadcasting in waste places.

I offer a mixture of California wild flower seeds, for broadcasting in waste places. These will make a brilliant display through the spring and summer, with a minimum of care, and will self-sow and come up year after year, if weeds are kept down. 10 cents per packet; 50 cents per ounce.

Following the name of each plant will be found initial letters, designating its general character. "A" stands for "annual," "B" for "biennial," "P" for "perennial," "H" for "hardy," "HH" for "half-hardy," and "T" for "tender."

MISCELLANEOUS BULBS. TUBERS AND RARE PLANTS

ACHIMENES

Profuse blooming tuberous plants for greenhouse or conservatory. Closely allied to Gloxinias and require same culture. Three or more should be planted in a pot. They flower in the summer months for a period of 8 to 10 weeks. The tubers are very small.

ALLIUM

A large family of plants that have until recently, been little known. However, through the efforts of The American Horticultural Society and from the many articles appearing frequently in their official Bulletin, "The National Horticultural Magazine," a great deal of interest in this group of bulbs has been aroused. The flowers are borne in large umbels and are very beautiful, the blooms often being very fragrant. Clumps of a dozen or more bulbs will form pleasing patches of color in the border. Excellent for naturalizing or for the rock garden. Once established, no further care is required and in a short time will form large colonies. Following is a list of species suitable for both Spring and Fall planting. Should you desire to obtain a complete collection, order all species now and those requiring Fall planting will be shipped at the proper time.

BEGONIA (Tuberous Rooted)

Begonias are among the most beautiful of all summer flowering plants. They are in constant bloom, when well cared for, from early July until cut down by frost in the fall.

Our Begonias are grown from seed imported directly from England, and are without exception of the finest stock offered anywhere in this country. It is impossible to describe adequately the exquisite refinement of form, the many interesting varieties or types and the gorgeous colors.

Begonias are adapted to use in window boxes, as potplants in conservatory, sunroom or terrace; or, as bedding plants in a partly shaded location. An ideal spot is under oak trees or in the rock garden where they will be shaded during the heat of the day.

during the heat of the day.

We offer many distinct types of Begonias, all of which are of entirely different formation. Each type contains a full range of colors from pure white, delicate pink and rose to the most brilliant reds and scarlets; also pastel shades of salmon, apricot and soft yellow. The autumn tones of orange and golden bronze are in great demand for table decorations at dinners or parties during the harvest season. They should be arranged in low bowls or trays previously filled with moist moss and ferns. Also much used as dinner favors or corsage bouquets.

CULTURAL REQUIREMENTS

Begonias are so easy to grow that anyone can grow them to perfection when the culture is fully understood. The tubers are ready to send out in January and can be supplied as late as the last of April. Should they be procured early, no sign of growth will be noticeable and they should be stored and left undisturbed until the first of April, when the tubers will show a pink swelling in the center. They should then be planted in shallow wooden boxes, placed in a greenhouse or cold-frame, to be later planted in beds outside after all danger of frost has passed. If flower pots are used, place 1 tuber in a 5" pot, or 3 tubers in a 7" pot, which will give a better effect and is more satisfactory. Be sure not to pot the tubers too deep; they should be placed so that the top of the crown is slightly above the soil. Water very lightly at first, until active growth has started, increasing the supply of moisture as the plant de-

velops, but at no time should they be overwatered. This can be overcome to a great extent by providing good drainage. An ideal soil for Begonias is 1-3 well-decayed leaf mold, 1-3 or other manure with the soil, but use as top dressing, when planted in beds outside (which should be slightly raised).

For the potted plants, weak liquid manure should be given twice a week when the first flower buds make their ap-pearance. To get best results, all the first lot of buds should be picked off, which will make stronger plants and

larger flowers.

Should Begonias be grown in the conservatory or green house, care must be taken to shade them from the hot sun, just enough to prevent scorching. Atmosphere must be kept moist by sprinkling sides and floor, also syringing the plants on bright mornings. To dampen foliage when days are cloudy may cause mildew.

STORING BEGONIA TUBERS

As the plants cease to bloom, moisture should be gradu-

As the plants cease to bloom, moisture should be gradually decreased until foliage turns yellow and falls off, after which time they must start to dry out.

When fully dry, the pots may be stored away on their sides in a dark place where the temperature is low, but never below freezing. The tubers may also be lifted, cleaned of soil and thoroughly dried, then stored in boxes in Holland peat, sawdust or very dry sand. Should be kept dry until planting time again. Colors: Pink, red, rose, white, yellow, orange searlet or mixed orange scarlet or mixed.

GIANT SINGLE. Flowers are of mammoth size, often six inches across. Colors as above 2.00 GIANT DOUBLE. So double that they often have the appearance of round balls of velvetlike petals. HEMEROCALLIS (Day Lily)

Hemerocallis have long been favorites in our gardens and are always included in any list of the most popular hardy are always included in any list of the most popular hardy plants. All of the varieties of Hemerocallis are desirable and beautiful. The tall, graceful, grass-like foliage is very handsome and sets off the charming lily-like flowers very effectively. They look particularly well naturalized along streams or on moist banks, and will thrive most luxuriantly in their in shade.

Collection of six strong roots, each labeled, our selection,

HIPPEASTRUM

Under this heading properly belong a great majority of the plants commonly included under the name "Amaryllis," which has been used as a horticultural catch-all by most dealers, in the belief that lovers of plants might not recogdeaters, in the benefit that lovers of plants might not recognize their favorites under their correct names. However, it is our belief that this practice has resulted in much confusion, and we have adopted the policy of offering all bulbs and plants listed in this catalog as nearly as possible under their correct botanical names, always giving references to the commonly used ones where it seems advisable.

The only true Amaryllis, strictly so-called, is Amaryllis Belladonna, native to South Africa, which has quite different requirements form the Hippeastrums, being more hardy, and requiring a season of absolute rest before flowering. Most of the Hippeastrums are practically evergreen, and require to be kept in a condition of active growth all the year around. This necessitates artificial heat in winter; or year around. This necessitates artificial heat in winter; or at least protection from temperatures lower than 45 de-grees F., at which point growth will practically cease. In California and the extreme South, they may be grown in the open if given a southern exposure and perfect drain-age, but the leaves are very impatient of frost, and the plants receive a severe setback as soon as cold weather approaches. Under these conditions, growth will resume about April, at which time the flower buds appear. How-ever, this method is not recommended for any but frostless regions, pot culture being more satisfactory, and producing

regions, pot culture being more satisfactory, and producing flowers over a greater period of time. Any good potting soil will serve very well, a suitable one being composed of loam lightened with leaf-mold and sand, when the soil is inclined to be heavy. 6- or 8-inch pots may be used, setting the bulbs on the surface, with only the root-callus at the base covered. When bulbs are received in an artificially ripened state, lacking roots or leaves, the pots may be set in a dark place for about a month to induce the formation of roots before top growth starts. If green plants are received, they should be potted with great care, to avoid injury to the fleshy roots. Under these conditions, they will form additional new root fibers and take when the soil is inclined to be heavy. 6- or 8-inch pots may titions, they will form additional new root fibers, and take hold immediately. Water should be sparingly given at all times, using just enough to keep the soil moist, but never soggy or sour. Heat is essential, as Hippeastrums are all natives of South and Central America, where tropical conditions prevail.

the name implies, these are the result of a long period of hybridization and selection, with a view to securing flowers of great size at frequent intervals. Flowers a foot across are not uncommon, and the color range runs from white, faintly marked red or pink, through many shades and combinations of pink, vermilion and orange.

Some will be fragrant. Flowers have fine lasting qualities, especially if anthers are removed as soon as they open. Mammoth bulbs1.25 5.00

ADVENUM var. MINIATUM. This belongs to a group characterized by narrow foliage, more slender growth than the typical species, and by a tendency to be deciduous, and take a brief period of rest before blooming. Resembles Sprekelia in its habits. Flowers funnel-shaped, three or four in an umbel on a stem about ten inches tall. Color, deep blood-red, with green throat. Very distinct and interesting, and is much hardier than the others, thriving in the open in California. Bulbs may be fully covered with soil. Will not endure winter temperatures below 20 degrees F. Each, .75: Dozen, 7.50. EQUESTRE. A very beautiful orange-scarlet species, sometimes called "Barbados Lily." In Florida, where tulips do not do well, this is freely used as a substitute, giving brilliant color effects. Each, .35: Dozen, 3.50. EQUESTRE var. FLORE PLENO. A very fine variety of Equestre with large double flowers, borne on long stems. They are excellent keepers as cut flowers, being fully equal to Darwin or Breeder tulips for ornamental value in the house. These deserve to be much better known. Each, 1.00; Dozen, 10.00. JOHNSONI. An old-fashioned flower, known to our grandfathers, and still one of the very best. Fine, large, deep, scarlet flowers, with a white stripe through the center of each perianth segment. Each, .50; Dozen, 5.00. ADVENUM var. MINIATUM. This belongs to a

Following is a list of plants of the Amaryllis family that are frequently offered in catalogs under the name "Amaryllis": Childanthus fragrans, Crinums of various species, Lycoris squamigera (as Amaryllis Halli), Sprekelia formosissima, Sternbergia lutea, Vallota purpurea. We offer all of these under their correct names, either in the Spring or Fall catalogs.

HOSTA

FUNKIA (Plantain Lily)

The Plantain Lilies are among the easiest plants to manage; their broad massive foliage makes them attractive subjects for the border even when not in flower. They succeed equally well in sun or shade. Each Doz.

COERULEA. Lovely blue flowers 1 1-4 to 3 ft. 3.503.50 margins deep green and creamy white center. One of the finest 4.00

HYMENOCALLIS (Spider Lily)

Each Doz. GALVESTONENSIS. White flowers, bright green foliage, which dies down in the late fall. The bulbs should be dug in the fall and planted in 2.50

ISMENE GROUP (Peruvian Daffodil)

CALATHINA. A grand summer flowering bulb, producing with great freedom large amaryllis-... .25 2.50

HYPOXIS (Star Lily)
HIRSUTA (Sometimes known as Erecta). A pretty little bulbous plant of the Amaryllis family, native to the Eastern and Central states. Grows 6 to 10 inches tall, with slender, grassy foliage covered with fine hairs. Flowers star-shaped, yellow, in umbels. Thrives in a moist, semishady location. Each, .15; Dozen, 1.50.

IRIS

Very few flower lovers realize the wonderful variety of forms and colors that may be found under this heading. The genus Iris contains several hundred species, found in all parts of the world, with the possible exception of South America and Australasia, where it is represented by Moraea, Libertia, and other Iris-like genera. A great many rare sorts are listed here, as well as the very best of the more familiar ones, such as the Pogoniris or Germanica group, which will be found first in the list hereunder.

POGONIRIS (Germanica) GROUP

Those who are familiar only with the old-fashioned "flags" sometimes called Bearded Iris or Iris Germanica, have a real treat in store for them in the newer hybrids and improved forms. Many of these are enormous, with flowers eight or ten inches across, rivaling the finest orchids in beauty of tints, which range through blue, purple, lavender, pink, maroon, yellow, buff, white, and every conceivable combination of these colors. Most of them are very fragrant, and all are fine as cut flowers. Do well in any soil, with full sun. Need no summer watering, preferring a season of drought between blooming periods. When blooming, and while leaf growth is in progress, water is needed.

Each
ALCAZAR. S. bluish violet; F. rich purple with bronze
veined throat
AFTERGLOW. Buff gray to rich yellow

WILD POGONIRIS TYPES

INTERMEDIATE HYBRIDS

These hybrids are a cross between the tall bearded Iris Germanica and the dwarf Iris pumila. As a result they are of medium height (12 to 24 inches) and flower after the early dwarfs and before the tall bearded, thus filling in the gap between these two types. They are free flowering, vigorous growers and very hardy.

vigorous growers and very hardy.

CRISTATA ALBA. A lovely white form of the above, Very scarce2.50

GRACILIPES. Dainty little Japanese crested iris. Pale lavender flowers, touched with orange. Likes part shade with a well drained soil mixed with leaf mold and plenty of moisture2.00

WATTI. Very rare and unique Iris from the Himalayas. Similar in growth to a dwarf bamboo. Flowers white or lightly tinged. Hardy in Southern California but should be protected well in cold frames during winter in other states.

IRIS SPURIA

This group contains a greater variety of shades than found in most other species of beardless iris, ranging from almost white, and cream to deep rich yellow and from pale lavender to blue-purple. They grow from 2 to 5 feet tall and are desirable to plant along streams or around pools or ponds. They are exquisite cut flowers and when cut keep well.

A. J. BALFOUR. Fine, tall blue hybrid of Monspur. DOROTHY FOSTER. Beautiful violet standards with fall striped lighter. Medium height 2.50 JUNO. Lovely blue-purple flower of the Monspur type. Quite hardy 1.00 LORD WOLSELEY. Large, handsome flower similar MONNIERI. Rich, golden yellow, similar to Aurea, but quite hardy. Prefers moist situation .50 MRS. A. W. TAIT. Handsome, soft porcelain blue25 OCHRAUREA. Elegant flower, in two shades of yellow. A cross between "Ochroleuca" and "Aurea" OCHROLEUCA. Flowers white and gold. Very tall25 OCHROLEUCA SULPHUREA. Yellower than above75

Iris Hoogiana

IRIS KAEMPFERI (Japanese Iris) (Synonym: Iris laevigata)

(Synonym: Iris laevigata)

As these magnificent Iris become better known they gain in popularity and a field of them in bloom or a few specimens artistically arranged in the water garden is truly a lovely sight. These Iris are the last to bloom. Coming into flower the first part of June and continuing for two to three weeks, they fill in a period when flowers of this attractive type are particularly welcome. They have proved hardy in a number of states, but should be covered will with straw in the Northern and Eastern states to prevent danger from freezing and thawing.

garden soil, but especially fine for water garden. Per
dozen, \$3.50
TITE CITE OF THE COLUMN TO THE

The following list of Iris are Spring bloomers, and are delivered in the Summer and Fall. They are included here to make the Iris series complete in one book, as there are many tie-ins between the various hybrids.

PALESTINE HYBRID IRIS

(ONCOCYCLUS AND REGELIA GROUP) FOR SUMMER AND EARLY FALL DELIVERY

This group contains the most curious, yet beautiful of all Iris. Their flowers are strikingly veined on white, soft violet-purple or brown ground. To grow this type of Iris successfully where winters are severe or summers subjected to occasional rains, it is necessary to dig the roots each season after the leaves have died down (about the end of June) wash, and dry off for a day or two and then store in a box of very dry sand until time to replant. Tobacco dust added to the sand is used as a protection against aphis.

The planting should be done a few weeks before the ground freezes, three or four inches deep and then covered with a mulch of straw or dried leaves, to prevent heaving. A light frost will not injure the roots, but will kill the new growth. Therefore, the roots should be kept bone dry after planting, inasmuch as growth starts very readily upon the addition of moisture, if the temperature is mild.

Oncocyclus Type E SUSIANA (Mourning Iris). Enormous flowers of grayish white veined black-maroon2.00

BULBOUS IRIS--HOLLAND TYPE

One of the most satisfactory groups to grow, being particularly hardy in most states, but should be well covered during the winter, with straw or leaves, in the East.

during the winter, with straw or leaves, in the East. The orchid-like flowers are of great beauty, having many different shades and blendings of color, and if cut in the bud will keep for a long time in water. For best effect they should be planted in clumps of 25 or more bulbs or are very satisfactory placed in a long row in the hardy border. Plant in September, six inches apart and two to three inches deep. They bloom soon after the daffodil season.

Describes the dwarf, early, German, Japanese, Siberian, water, crested, Spanish, English, Dutch and other types; tells the best soil; what fertilizers to use; how to plant; and what care is necessary. Tells how to propagate stock for your own use. 54 illustrations, 80 pages. \$1.00.

Sent FREE as a premium with an order for \$10.00 worth of bulbs from this catalog at single or dozen rates, if asked for at the same time.

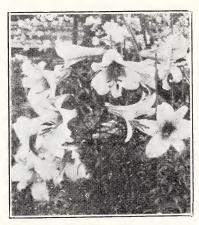

LILIUM (Lily)

Lilies are without doubt among the most beautiful of the summer flowers. They would be cultivated more generally but for the notion they are hard to grow. Some of the rarer species are, it is true; but unless one goes in for Lilies to the extent of making a hobby of them, these can all be left to the collector and there will be quite enough species remaining to keep the garden well supplied with beautiful blooms without special care. Each Doz.50 5.00 AMABILE. Grenadine red; spotted blackAURATUM (Gold-Banded Japan Lily). Undoubtedly one of the finest. Its large graceful fragrant flowers are a delicate ivory-white color, thickly studded with chocolate-crimson spots and striped through the center a golden yellow; 3 to 5 feet. .25 2.50 the stem is stouter and attains a greater height; the leaves are much broader; enormous flowers, 3.50 Larger size

BATEMANNIAE. Strong stems with 5 to 10 flowers of a reddish orange color. July-August. 3 to 5.00 with purplish maroon1.00 10.00 CERNUUM. A deep lilac-pink, spotted wine color. Suitable for rock-gardens. June, CROCEUM. Orange Lily. Bright orange, erect HANSONI. Most desirable; not particular in its cultural requirements and extremely handsome in flower; does well in light loam. 4 to 5 feet. Blossoms 2 inches across, bright orange, spotted with brown, wavy texture. Admirable for pot75 7.50 culture. June. HENRYI. A Himalayan Lily that has become very popular. It has the same form and appearance as the speciosum varieties, but the flowers are a bright orange-yellow. Easily grown and 4.00 7.50 KRAMERI. Unique for its color and grows from 2 to 4 feet high. The funnel-shaped, finely formed flowers are 6 inches or more in length and as much across, of a beautiful clear pink color, 5.00 LEICHTLINI. An uncommon kind from Japan. Pale yellow, purple spots. Very graceful. August .50 MARTAGON DALMATICUM (Turk's Cap Lily).
A handsome Lily, bearing clusters of purple, wax-like flowers. Thrives best in partial shade. June. 5 feet. PHILIPPINENSE. White with reddish brown POMPONICUM. A brilliant red Turk's Cap Lily, like Chalcedonicum, but with flowers more loosely arranged. June. 3 to 4 feet1.50 15.00 PYRENAICUM (Yellow Turk's Cap Lily). Easy REGALE. Absolutely hardy, and excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown outdoors. White, suffused with pink, with canary-yellow center. Delightful perfume, like Jasmine, and lacking the heavy,

NEMASTYLIS

NERINE

Cape bulbs of the Amaryllis family. Very closely related to Amaryllis belladonna, but of more dwarf habit. Culture is exactly the same, forming leaves in the winter, resting dry in summer and blooming in the fall, before leaves start.

OPHIOPOGON

JABURAN. This plant resembles the Liriopes in leaf and habit of growth, but it is a more robust plant with white flowers. Excellent for shady locations and growing in pots or boxes35 3.50

OXALIS

Most of these Oxalis flower from October until Christmas, and later. Easily grown, requiring only a good, somewhat peaty soil, with considerable light, for their successful growth. Pretty evergreen plants adapted for border, window boxes or hanging baskets.

Double Tuberose

Schizostylis Mrs. Hegarty

Sternbergia Lutea

POLIANTHES TUBEROSA

These are highly prized on account of their intensely fragrant, waxy white flowers, whose odor is much like that of orange blossoms. A few flower spikes in a vase will fill a room with their delicious perfume in a short time. Their ornamental value is considerable, as the flowers are of good substance and lasting qualities, and about 1 1-2 inches across, forming a pleasing element in any mixed floral arrangement. The name "tuberose" was not applied from any fancied resemblance to the rose, but on account of the tuberous rootstock. Do well in a warm, sunny situation out of doors, but should be lifted and stored in winter, as they are tender. Natives of Mexico.

DIVARICATA. A magnificent native ornamental bog plant which may be grown in the North as easily as a Canna. The enormous leaves with red midribs, resemble a Banana and are 2 to 4 feet tall. The purplish flowers are borne on central stems 6 to 10 feet tall. An excellent plant for the Scatt. for the South50

TIGRIDIA

Sometimes called Mexican Shell Flower; one of the most showy of summer flowering bulbous plants; blooms from midsummer until frost, grows about 2 feet high and produces large, wide-open triangular blossoms often four to six inches across. The colors and markings are very brilliant combinations of yellow, scarlet and pink. Clumps of them, planted in the border, are most gorgeous. The culture is the same as for gladiolus. ture is the same as for gladiolus.

PAVONIA CANARIENSIS. Light yellow with scar-3.00 PAVONIA SPECIOSA. Scarlet red with yellow 3.00 Second size.

TRITOMA (Torch Lily) (KNIPĤOFIA)

Showy decorative plants, bearing flower spikes from golden yellow to orange scarlet. An excellent plant for the perennial border. PFITZERI. Beautiful flame red; 3 to 4 feet high.

3.00 RUFA. Orange yellow; tall slender flowers and foliage25 2.50 Dwarf Hybrids, 12 to 18 inches high. Golden yellow to deep orange. Very desirable for low positions

TRITONIA

ROSEA. A very lovely species, bearing in summer dainty spikes of pretty rose colored star-shaped flowers. A charming little plant, distinct and very free flowering; it is well worth growing for table decorations, being very light in its habit .25 2.50

VALLOTA (Scarborough Lily)

PURPUREA. A native of South Africa and one of the most attractive of the Amaryllis family.

VELTHEIMIA

VIRIDIFOLIA. Cape bulb. Many long glossy green leaves, wavy on the edge. From the center of these

WACHENDORFFIA Each Doz.

THYRSIFLORA. A streamside evergreen plant of the Lily family. (Was formerly included in the suppressed family Hacmodoraceae, or "blood-root" family, as evidenced by its scarlet roots.) Flowers yellow and russet, Star-shaped, on tall stems. Foliage Tigridia-like, in dense clumps. Thrives in any moist situation.1.00 10.00

XANTHOSOMA

Sub-tropical aroids of great beauty. They are hardy in the lower south, and make attractive plants for summer bodding in the northern states. Decorative for their foliage only. Require a rich soil.

BATAVIENSE. Dark green leaves, with veins and SAGITTIFOLIUM. Large leaves of pale green.

ZANTEDESCHIA (Calla Lily)

The so called RICHARDIA or Calla Lilies strictly speaking are all "Zantedeschia" after Francisco Zantedeschi, an Italian botanist. The only true "Calla" being C. Palustris, a native species of some of the eastern states.

These desirable plants are of easy culture, which can be used with good effect for outdoor planting, in mild climates,

or are suitable for potted plants.

Each	DUZ.

ZEPHYRANTHES

Lovely dwarf bulbous flowers, members of the Amaryllis family. Many of the species are native to the southern states and Mexico, where the long dry periods followed by heavy rains have given these bulbs a very unusual and happy gift of blooming when they have had a good watering

after a rest of a few weeks.

A great deal of interest in Zephyranthes has been noticed this past season. They are most satisfactory and respond quickly and gracefully to the little care they require.

quienty and gracerary to the nette care they	reduire.

THE BOOK OF BULBS, by F. F. Rockwell. With this complete and practical well. With this complete and practical book you can get the utmost in beauty from every kind of bulbous plant. Clearly written by one who knows; illustrated with 187 beautiful photographs and instructive drawings. Includes tulip, daffodils, hyacinths, lilies, crocuses, glads, dahlias, peonies, irises, begonias, and scores of other beautiful but not-so-well-known of other beautiful but not-so-well-known bulbs. We recommend it as the best and most complete bulb book. 187 illustrations, 264 pages 2.00

Sent FREE as a premium with an order for \$20.00 worth of bulbs from this catalog at single or dozen rates, if asked for at the same time.

Zantedeschia Aethiopica

Zephyranthes Rosea

Water Lily (Nymphaea)

WATER LILIES

No garden is complete without a water garden or lily pool, and nothing is more beautiful than the fragrant tropical blooms of these improved Water Lilies, with their wax-like petals of so many colors and shades. Water Lilies should be planted in the Spring in the full sun. The pool should be 18 inches to 3 feet deep. In large pools the tubers may be planted in PINE boxes, 2 feet square and one foot deep, one tuber to box. A miniature lily pool can be made with very little trouble by sinking a half-barrel into the lawn, covering the bottom with about eight inches of good garden soil mixed with one-fifth of well rotted cow manure. Cover with one inch of sand and level off well. Plant tubers so the crown is just out of the sand. Fill with water carefully, not disturbing tubers. Do not run too much fresh water into the pool; only enough to take care of evaporation. A few gold fish should be kept in the tub to keep down mosquito larvae.

AMABILIS. Delicate pink, free bloomer. Flowers open wide and petals turn out at tips. Each \$10.00.

ANDREANA. Beautiful apricot rose, gradually fading to red on last day of opening. Good bloomer. One of the best for tub culture. Each \$1.50.

ATTRACTION (New French variety). Blossoms are garnet red and very showy. Flowers 6 to 8 inches across. Each \$7.50.

COMANCHE. Very beautiful combination of orange and glowing amber red. Largest and finest of all varieties having apricot tints. Each \$5.00.

CALIFORNIA. Largest dark blue Lily grown. Leaves are large with scalloped edges and blotched with dark mahogany spots, sepals light green with mahogany stripes, petals dark blue with pointed tips, stamens bright yellow tipped with dark blue. Each \$5.00.

CAERULEA. "Blue Lotus of the Nile." Flowers light blue, fading to nearly white at the base. Stamens yellow; sepals marked with black lines and dots. Each \$1.50.

ESCARBOUCLE. Brilliant crimson carmine with bright yellow centers. Free bloomers. Each \$5.00.

GLORIOSA. Flowers deep carmine rose, 4 to 6 inches across. Each \$3.00.

GLADSTONE. Finest white Lilies in cultivation. Petals concave and broad. Flowers 8 inches across. Each \$2.00.

JAMES BRYDON. Cerise rose blooms. Most popular of the red varieties. Each \$2.50.

MARLIACEA ALBIDA. Large white flowers; stamens light yellow, petals flushed pink; fragrant. Each \$1.00.

METEOR. Very large flower, deep red, streaked with pure white, sepals lined with red. Each \$10.00.

MRS. EDWARD WHITAKER. Flower is a deep lavender blue, lightening as the blossom matures. Open the entire day. Each \$5.00.

PENNSYLVANIA. Blue Lily with yellow stamens; sepals marked on outside with black lines and dots. Each \$3.00.

PANAMA-PACIFIC. A new variety. Buds are bronze green spotted with a reddish brown; when fully opened the flower is a rich rosy purple. Each \$5.00.

PYGMAEA HELVOLA. Canary yellow flowers, 1 to 2 inches across. Each .75.

PAUL HARIOT. Large, light yellow flowers shaded to copper. Leaves spotted brownish red. Each \$2.50.

SUNRISE. Flowers light cream yellow with ruffled petals. Very fine. Each \$5.

TUBEROSA ROSEA. Rosy-pink flowers. Very fragrant. Each \$1.50.

TUBEROSA RICHARDSONI. Pur e white flowers. Very large and quite double. Each \$1.00.

VIRGINALIS. A French novelty. Enormous flower, pure white; yellow stamens. Early and late blooming. Each \$15.00.

WM. STONE. Petals royal purple changing to purple blue with pointed tips; stamens golden yellow tipped with purple. Sepals brownish green. Each \$2.00.
