OR dving and converting Red and Grey Hair to a black or dirk brown, and also for pre-erving, nourselving, and promoting its growth, without any inconvenience whatever. The proprietor of this inestimable preparation, is well arware that the foundation of all the nostrums, which have here-tofore been made use of for the purpose of converting red or grey hair to a black or dark horse, is the nitrate of silver or other mineral substances, which, it is admitted, will color the hair, but at the same time will deaden and destroy it; so that in the cold the cure is worse than the disease.

other mineral substances, which, it is admitted, will color the hair, but at the same time will deaden and destroy it; so that in the end the cure is worse than the disease.

The ingredients of which this Vegetable Compound Oil is composed, are such as will be found to nourish and promote the growth of hair, and that more so than any other article known, which is sold for that purpose, (notwithstanding the wonderful things they are said to perform.) It will also sofe and give it a heastiful glossy apnearance; and also, at the same time, will color and convert it to a beautiful black or lark brown, according to its nature and primary color. The dye itself being purely vegetable, and combined with other ingredients, becomes nourishing, soffening, and greatly promutes the growth of hair, and is recommended as the bost valuable preparation, for this purpose, of any that has ever heen offered to the public.

The Vegetable Compound Oil acts upon the hair is a low and prog easive manner, and if applied according to the directions, and regularly continued, it will keep the air a good color, will feed and nourish it, and greatly promote its growth. And surely the hair is a beautiful ornament to any person, but particularly the female, and therefore its beauty ought to be entitivated and press ved.

About three bottles of this oil will be sufficient for any person, but particularly the female, and therefore its beauty ought to be entitivated and press ved.
