How to plan a project that will help you achieve the goals in your annual plan.

What do you need to plan a project?

WIKIMEDIA
FOUNDATION

You need:

- 1. A clear goal**
- 2. Background research**
- 3. Task lists & timelines**
- 4. People & resources**
- 5. A communication plan**

1. A clear goal

- What you hope will change as a result of the project?
- Why is the outcome of this project is important?
- What methods, rules or activities can help achieve these goals?

**“I want to do _____ so that
_____ happens.**

**Right now, _____.
After this, I hope _____.”**

Example 1: Wiki Loves Africa

“I want to host Wiki Loves Africa so that more articles about African culture can be illustrated.

Right now, only 20 of 300 articles about Ghanaian Fashion have images. By the end of this project, we hope 70 of 300 articles have images.”

2. Background research

- What similar projects have you seen in the movement and beyond?
- What lessons can you learn from grant reports?
- Are there tools that can be used or adapted for your project?

3. Task lists & timelines

- Does the timeline interfere with planned work and events?
- What tasks depend on the completion of previous tasks?
- How can someone ask for help if they cannot complete a task?

5. Communication

- How will your team share updates and information?
- Which teams need to sync their plans and timelines?
- Is there someone who will act as a ‘spokesperson’ to communicate with partners or funders?

What might we look back on?

How do we know how it went?

We want to learn **with you** what works for your community so that you can increase your impact.
