Agricultural History.....	21-22
General Economics.....	22-24
History of Economic Thought.....	24-25
Selected List of Periodicals.....	25-26

FOREWORD

This list was first issued in January 1925 to provide a reading list of basic books in the field of agricultural economics. It was revised September 1927, February 1929, April 1930, January 1934, and January 1936. This revision, like the earlier issues, contains sections on the general subject of agricultural economics and on the principle subdivisions of the subject, namely, cooperation, credit, farm management, land economics, marketing and rural sociology. The sections on general economics and on the history of economic thought, which were placed at the beginning of the earlier issues, have been placed after a new section on agricultural history which follows the section on rural sociology. With the exception of one book in the section on credit and several in the section on general economics, the books listed were published in this country. All are in English.

A selected list of periodicals has been appended. In earlier revisions of this list, some of these titles were included with the books in the various sections of the list. References to bibliographies and to proceedings of national conferences have been included in the various sections.

Publications of the State agricultural experiment stations and of the United States Department of Agriculture, with a few exceptions, have been omitted. A list of the printed publications issued by the Bureau of Agricultural Economics may be obtained from the Division of Economic Information, Bureau of Agricultural Economics, U. S. Department of Agriculture, Washington, D. C.
