Lizzie Carter died last evening at 10.45

I went in to the house Commonwealth Ave after breakfast, and consulted with Jennie & Emily Chapman, Harry Spelman & Mr. Woyeth.

Funeral will be at Forest Hills, tomorrow 3 P.M.

I sent off some Calypsons and then went out to J.R. Churchill's getting there by

12.15. I took dinner & tea there & we spent

the afternoon over plants. Then we all went

to Forest together, the Churchills to the Synagogue

planning I think, reaching there at 8.15.

While going I saw a notice about Fizzie's death. I learn the death of Helen Peabody & Mr. Thurston

Sparrow Hawk ♂ & ♀		
<p>As I was walking to the Square this A.M. & had reached St. John's Church, I heard the continuous & excited calling of a Sparrow Hawk. It was circling about some 50 or 60 ft up over Brattle & Ash Sts. uttering its Kee-ee, Kee-ee, Kee-ee-ee, Kee-ee-ee all the time. As I reached the front of the Greenleaf estate, the bird swooped to one of the tall trees on the right of the place and there I saw the mate, a larger bird sitting near the top of the tree. The male disappeared and the female swooped down from her perch soared over the lawn and then returned to the same spot. - I continued my walk -</p>

I saw a male fly into the dead pine with something in his bill. He alighted but a few feet from the hole, and arranged the morsel with his claw. In a few seconds he flew and alighted against the hole, thrust in his head and introduced it with empty bill. Then he flew off.

In a few seconds I saw him drop to the lawn below the tree and pick up something, a beetle apparently. He flew to a limb near the hole and repeated the previous performance, and then flew into the hole and fed the young as before. Then he flew off and I left. I did not see the young.

This morning I went on to the lawn near the old pine and talked with the man. He has constantly seen 2 Sparrow Hawks about. He finds remains of many Sparrows under the tree.

Twice as I examined the hole with my glass. I saw a young bird put his head up at the hole and look out for $\frac{1}{4}$ - $\frac{1}{2}$ min. or more.

Once I saw the ♀ Hawk soar & light on the Catalpa near the pine, with no food in bill. She finally flew to a more distant tree. I previously saw her fly on to the lawn - I was about $\frac{1}{2}$ hr. there.
