DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

Remarks:

On this problem, the oral recommendations were offerred from General Sams to the Vice-Minister of the Welfare Ministry, at the spring season of last year.

At that time a draft of the unification of them were submitted with the Agricultural Ministry to General Sams from the Welfare Ministry, but after that I did not receive any information.

In this connection, the opinions of the officials in charge at that time were as follows:

1. The Welfare Ministry.

   At present condition, to establish a division of the veterinary affairs in the Welfare Ministry, including the health section of livestock section of the Ministry of Agriculture and Forestry.

2. The Ministry of Agriculture and Forestry

   If it is a bureau, they will agree with the draft, but if it is a division, they prefer it just as it is.

KPH 72.1 (19 Jul 50) 1st Ind
SUBJECT: Alleged Neglect in Ice Candy Sanitation

Hq, Kanto Civil Affairs Region, APO 500, 2 August 1950

TO: Chief, SCAP Civil Affairs Section, APO 500

1. In compliance with Paragraph 2, basic communication, an investigation was made to determine if willful avoidance of good sanitation practices in the ice candy industries was evident as implied by the attached enclosure.

2. The initial phase of the investigation was conducted at the display office of the Japanese Ice-Candy Machine Company, 4, 1-chome, Kobiki-cho, Chuo-ku, Tokyo-to. This company manufactures several types of equipment which are designed to aid the manufacturer in stepping up production as well as increasing sanitary control of ingredients utilized in ice-candy processing.

3. The equipment demonstrated by this company include; tube filling machines or fluid distributors, hashi inserter, tube washers and multiple or single seamless fluid tubes. The following description of these items is a translation from the inclosed circular; reference to the circular diagrams will locate various parts of the machinery as defined in the description.

a. Filling machines or fluid distributors are of three types, portable or semi-portable and designed for plants of limited output.

(1) The filling machine (Pat. #3410) is made of "almite" metal. The suction and fluid distribution aspects of vacuum physics has been utilized; it is simple in construction and operation; therefore, there are no disorders and the product is sanitary. The prepared mix is placed in the storage tank (D) and the freezing tubes (B) are placed on rail (A). When the stop-cock (C) is turned several tens (10s) of freezing tubes can automatically and uniformally filled at one time. The flow can be stopped temporarily by turning the stop-cock in the "off" position.

(2) The filling machine (Pat. #2961) is somewhat more complex. It is made of "almite" metal and is capable of filling several tens (10s) of freezing tubes in one operation. Tubes to be filled are placed on the conveyor and moved into position under the filling head (A). The cover (D) is open and the stop-cock (B) is closed. When the stop-cock is opened the filling head (A) is filled and the cover (D) closes simultaneously and allows the mix to flow into the freezing tubes by gravitation. The reservoir is located at (C).

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

(3) The filling machine (Pat. #3176) is constructed from brass, tin and copper. This model is operated by means of a hand crank and depends upon this action for tube filling. This machine is designed to permit the addition of small solids which may be incorperated in the ice-candy. The ice-candy mix is placed in the reservoir (D); the pick-up tubes (A) have an adjustable key (B) which regulates the amount of mix that is picked up and dispensed to the freezing tubes (E). The cover (F) can be adjusted to completely shield fluids from outside contamination. Excess mix can be drawn from tank at the exit pipe (C).

b. The "hashi" inserter (Pat. #4579) is constructed of brass, tin and copper alloy. The "hashi" are placed in the machine and sterilized. By pressing a lever, hashi (sticks) are inserted individually in tens (10s) of freezing tubes in one operation. The "hashi" inserter can be attached to any of the filling machines described above by attaching leg (A) to the machine at a position which will place the exit trap of the inserter over the tens (10s) of freezing tubes; by pressing lever (D) of hashi container (C) and hashi will emerge through (F); when pressure is released on lever (D), the hashi container will return to normal position through hinge action at (B) and be in readiness for the next operation. The illustrated inserter has been revised; however, operation principle of the revised model is as described above.

c. The tube washer (Pat. #4530) is made entirely of brass and utilizes water pressure in washing freezing tubes. Attach (A) to faucet or water tank with rubber tubing, invert "ten" of tubes over water outlets (C) so that free end of the unit rests on (B). Press down on water release (B) and each tube will be individually washed by a spray of water. Waste water outlet is located at (D) and lavage water ceases when tube holder is lifted.

d. Freezing tubes of the multiple (tens) type unit or individual type are constructed of brass and copper and with the interior being free from seams.

4. According to the inclosed circular, officials of the Ministry of Welfare have taken an active part in the demonstration of these machines and have supported the claims of the company regarding the efficiency of the equipment. The following information is quoted from the inclosed circular.

"- - - - furthermore, at the Ueno Matsuzaka exhibition the all Japan Iced-Candy Refrigeration Federation commended the equipment as the best. The Welfare Ministry's representative personally operated the freezing unit after filling the tubes with liquid and witnessed that the

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

hashi (sticks) can be automatically inserted so that all manual contamination can be avoided. He praised and approved the machine as absolutely sanitary - - - -"

5. The concluding phase of the investigation was conducted in an unannounced inspection at the Tokyo Ice-Candy Company Ltd., 450-2 Denen-Chofu, Ota-ku, Tokyo-to. Investigation at this plant revealed that the operator was processing the prepared ice-candy mix in accordance with operation instructions of the manufacturer and the demonstrated technique was little different than that observed at the office of the Japan Ice-Candy Machine Company.

6. It is concluded that the machine as described is not designed to avoid sanitary practices inasmuch as it will permit handling of the prepared mix without contamination by the operator. Due to the complexity of machines of the stop-cock type, the possibility of product contamination will be potentially greater if proper sanitizing is not effected after each operation; therefore, the simple, hand-crank type filling machine is more practical in operation since it is not complicated in design and there are fewer minute parts to become contaminated. The utilization of this type of equipment will be effective if proper sanitary techniques are observed in preparation of the mix and cleaning of equipment.

1. Inclosed herewith is a copy of a letter received in this headquarters from a business firm which implies willful avoidance of good sanitation practices in ice candy industries. The references are in the Kanto Region although the application is probably in several regions.

2. It is requested that sufficient investigation be made to ascertain the truth, and that a report be made of findings and of any corrective action that may have been taken.

From: Eguchi Shiro
Director of the Japanese Ice-Candy
Machine Company, 4 1-chome, Kobiki-cho
Chuo-ku, Tokyo-to

To: Brig. General Sams, Public Health and
Welfare Section

Date: June 24, 1950

Dear Sir:

In accordance with the spirits of Article 3, Article 4 and Article 5 of "Eihatsu" #56 issued by the Vice-Minister of Welfare May 24th 1949, my company devised a sanitary instrument and on September of the same year at the Ice-Candy / Association an ability test was carried out with the attendance of officials in charge of the Welfare Ministry and the chief members of the Ice-Candy Association and under the guidance of these persons we studied six more months and the instrument was completed at last on February 1950. We sent this exhibit to the exhibition of raw materials, machines and instruments of ice-candy manufacturing which was held at the Matsusakaya Department Store in Ueno under auspices of the Ice-Candy Association and for the purpose of maintaining the people's health we encouraged the method of using instruments which were produced by our company and the instruments were favorably noticed by the persons concerned and since then we are continuing their sale. However, the details of control and the relationship between the government officials and the people concerned which we know from the business aspects of our company are likely to be an important problems in the people's health. Therefore, abandoning the advantages to our business, I am going to write a letter to you. Here I wish to tell you details of control and the relationship between the government officials and the people concerned.

(1) I heard that in last February when Major willers lectured to the chiefs of all prefectural Health Departments at the auditorium of the Osaka University Medical Department concerning acute infectious diseases he referred to ice-candy and urged the officials in charge to reflect, pointing out that "in spite of strengthened ice control, dealers are not supplying sanitary ice-candy to the people". Also I heard that on May 7th when a sanitary short-course was held at the Hibiya Public Hall under the auspices of the Tokyo Metropolitan Government Dr. Willers lectured that "in spite of urging the strengthening of control for the maintenance of health, the number of infectious diseases patients have increased over those of 1948, and if the number of patients increases more this year than in 1949 we are ready to suspend the business of dealers in ice-candy troughout the country."

(2) #46 of the notification by the Welfare Ministry was issued on May 19 1950, so the control policy was more strengthened. Thus the control policy was decided but as long as the relationship between the health centers (control agency) and the persons concerned is not eliminated, I think it will be difficult to carry out this, even if General Headquarters urges it for the eradication of infectious diseases.

(3) On June 13th we applied to display our products at a short-course

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

which was to be held at the Shiyaya Health Center, so we went there at 1 P.M. on that day, but as location was changed we were told by an official of the Health Center to go to the Kankoen, a restaurant located at Ikenohata, Ueno. However, it was a get-together meeting sponsored by dealers in ice-candy and the sanitary inspectors repeated to "bow" to the dealers in charge.

The director's address of instruction did not include any purpose of the Notification and after his address inspectors were entertained by them. Such being the case, the standard inspectors have greatly deteriorated.

(4) On May 23rd 1950 the Saitama Prefecture Health Department ordered a display of filters for the purpose of recommending their use and under the urging of Kiyo Norio, vice-cirector and chief of the Omiya Branch of the Saitama Prefectural Ice-Candy Commercial and Industrial Cooperating Union, I went to the Union and a meeting was held at the Seikoen, a restaurant inside the Omiya Park. However, the prefectural officials indulged in drinking and eating at this restaurant with the attendance of "geisha" and we were charged with an allotment of 12,000 yen for payments to the restaurant. In spite of the excellent record of our filter, it was low in price and no orders were given, we were just charged with the expense of pleasures for both persons in charge and inspectors.

(5) On February 15 1950 an officials' meeting of the National Ice-Candy Association was held at Atami, and as we mentioned above, the sanitary discussions were only formal and no signs of results were observed. In summary; as ice-candy is a short period business during summer, dealers think that they have only the summer season entertaining the inspectors of health centers.

The Yomiuri dated June 11th said that a majority of dealers in ice-candy are deficient in equipments and the dysentery #1 was manufactured by the staff of the Ice-candy Association, and I think that dealers in ice-candy have no sanitary ideas because in winter they make it a rule to sell baked sweet potatoes and paste (made from the starch of the devil's tongue), consequently it is natural that acute infectious diseases break out.

Such being the case, without the direct control over the malicious dealers by GHQ, SCAP for the purpose of maintaining the people's health, the relationship between health centers and dealers can not be absolutely eliminated. I ask you that upon investigation on this matter you will take suitable measures for the health of the people. In conclusion, I pray for your health.

Yours truly,

M. Fujinami
I & T Branch

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

ty

28 June 1950
received in January 1951

FROM: Mr. Kisuke Miyakoshi, chairman of the Nippon Domestic Animals Health Assn, of 1-5, 2-chome, Kyobashi, Chuo-ku, Tokyo

TO: Mr. Seiichiro Yasui, Governor of the Tokyo Prefecture

SUBJECT: Application ~~for permission~~ of establishment of a Corporate Juridical Person

This Association was established on 1st May 1950 having finished all procedures gone through, and it was decided to make an application for ~~attaing~~ obtaining permission for the establishment of the Corporate Juridical Person.

All documents concerning application were once submitted to the Livestock Bureau of the Ministry of Agriculture and Forestry; however, they instructed to submit the documents through Tokyo-to.

Therefore, I hereby submit you the all documents concerning application for permission of our project.

I shall be greatly appreciated and obliged to you, if you kindly render a deep consideration about this matter so that the permission can be obtained.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

ty

23 June 1950

FROM: Mr. Kisuke Miyakoshi, chairman of the Nippon Domestic Animals Health Assn.

TO: Mr. Kozen Hirokawa, Minister of Agriculture and Forestry.

SUBJECT: Application for permission of establishment of a Corporate Juridical Person, the Nippon Domestic Animals Health Association.

12 projectors of this Association, Mr. Kisuke Miyakoshi and 11 others planned to establish a Corporate Juridical Person, Nippon Domestic Animals Health Association, aiming at works concerning domestic animals health and held a Projector's Meeting at 1, 2-chome, Kyobashi, Chuo-ku, Tokyo on 1st May 1950, and further a General Meeting for Establishment of the Association was proceeded to the held in order to deliberate the procedures to be taken. There are several alternations in personal administration; however, those changes were adjusted at the Temporary General Meeting held on 27 June, whereby the following activities of the Association were determined.

1. Preventive activities for diseases to general domestic animals be conducted.

2. Guidance and assistance be given to animal breeders for improvement of animal's duality.

3. Reserch works on domestic animals be conducted and introduce them to the general public.

4. Animal's Clinic (at real-cost) be established.

5. Consultation Center (of free charge) be established.

6. The Association Monthly Eddition be published.

7. Other activities in relative to the above mentioned 6 paragraphs.

Here, we came to submit you an application for authorization of a Corporate Juridical Person, therefore, I beg leave to ask you to render us a deep consideration on this matter.

ATTACHED SHEETS:

The Act for the Corporate Juridical Person, Nippon Domestic Animals Health Association

Chapter 1 General Provisions

Art. 1 This Association is designated the Corporate Juridical Person, Nippon Domestic Animals Health Association.

Art. 2 This Association shall protect animal breeders by emphasizing disease preventive works on domestic animals, at the same time contribution to the promotion of social welfare shall be aimed at.

Art. 3 This Association shall fulfil the below listed works for the purpose of attaining the object provided for in the above Articles.

Para. 1. Disease preventive works for general domestic animals be conducted.

Para. 2. Guidance and assistance be given to animal breeders for improvement of domestic animal's duality.

Para. 3. Reserch works on domestic animals be conducted and introduce them to the general public.

Para. 4. Livestock clinic for real-cost be established.

Para. 5. Consultation Centre for free cost be established.

Para. 6. The Association Monthly Eddition be published.

Para. 7. Other works to be acquired for attainment of the objects listed in the above mentioned Paragraphs.

Art. 4 The central administrative office of this Association shall be located in Tokyo (1-5, 2-chome, Kyobashi, Chuo-ku, Tokyo) and branch office/s shall be established at places in accordance with necessity.

Chapter 2 Membership

Art. 5 This Association shall be consisted of full members such as breeders of domestic animals in municipalities of Tokyo and surrounding districts, and supporters in consent with the works of this Association; and also the associate members who make contributions to this Association for the purpose of attainment of the object.

Art. 6 Those who desire to join to or secede from the Association shall apply to the Association in writing and obtain acknowledgement of the Director's Meeting.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

Art. 7 Those who are joining to the Association shall pay the entrance fee and membership fee provided at the General Meeting of the Association, the fees which have once been paid shall not be returned at the time of secession from the Association.

Art. 8 Special membership can be proposed in this Association.

a) Membership fee shall not be imposed to special membership and a voting authority shall not be given to special membership.

b) Special membership shall be nominated by the chairman through solution of the Director's Meeting of the Association.

Art. 9 Qualification of the membership shall be avoided with the followings.

a) Secession

b) Dissolution

c) Expulsion

Art. 10 Membership in case of violation of the Act or other rules, or in case of neglecting duties, shall be avoided through the General Meeting solution.

Chapter 3 The Board and the Staff

Art. 11 The following board shall be proposed in this Association.

a)	Chairman be	1
b)	Managing director	1
c)	Directors	several
d)	Secretary	1 or 2
e)	Councilors	several

Art. 12 The staff shall be on honorary position; however, possible to be paid by the Association through resolution of the Director's Meeting.

Art. 13 Directors and Secretaries shall be elected at the General Meeting. Chairman and managing-director shall also be elected at the Director's Meeting.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

Art. 14 Councillors shall be commissioned by chairman through resolution of the Director's Meeting. Councillors shall deliberate important items regarding administration and operation of the Association.

Art. 15 The term of service of the board shall be limited within 2 years; however, prolongation of the term shall not be prevented.

In case there occurs a vacancy during the term of service and successor is needed, the successor shall be elected at the General Meeting. The term of service of the successor shall be limited within the former's.

Art. 16 The chairman shall represent the Association and hold the General Meeting, Director's Meeting and Councillor's Meeting, and shall become the chairman of the each.

Directors shall organize the Director's Meeting and transact all affairs of the Association.

Councillors shall organize the Councillor's Meeting and respond for consultation made by the chairman regarding important affairs of the Association.

Managing-director shall manage administration of the Association and act for the chairman in case of incident happened to the chairman.

Secretaries shall supervise all accounting affairs on the Association.

Art. 17 Advisors can be instituted.

Advisors shall be nominated by chairman through resolution of the Director's Meeting Advisors shall, as a consultative body for chairman, attend the Director's Meeting to make opinions in request of chairman.

Remarks:

There are 32 Articles in this Act; however, the rest of the Articles are regarding Meetings (General, Director's and Councilor's) and Account, therefore I, Watanabe did not translate the rest.

Since this Association has the above mentioned activities (including rabies control of course), there may occur frictions between this Association and Private Practitioners (Veterinary Medical Association) because all rabies vaccination work is entrusted to the private practitioners. However; permission for establishment of this Assn must legally be given since they made an application. It was in the opinions of Norin-sho and Tokyo-to that there may occur frictions between this Association and private practitioners (Veterinary Medical Association) in future, that's why the Government hesitate to authorize the establishment of this Corporate Juridical Person. And turned this application to Dr. Pegg for the final judgement.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

ty

28 June 1950
received in January 1951

FROM: Mr. Kisuke Miyakoshi, chairman of the Nippon Domestic Animals Health Assn, of 1-5, 2-chome, Kyobashi, Chuo-ku, Tokyo

TO: Mr. Seiichiro Yasui, Governor of the Tokyo Prefecture

SUBJECT: Application for permission of establishment of a Corporate Juridical Person

This Association was established on 1st May 1950 having finished all procedures gone through, and it was decided to make an application for attaing permission for the establishment of the Corporate Juridical Person.

All documents concerning application were once submitted to the Livestock Bureau of the Ministry of Agriculture and Forestry; however, they instructed to submit the documents through Tokyo-to.

Therefore, I hereby submit you the all documents concerning application for permission of our project.

I shall be greatly appreciated and obliged to you, if you kindly render a deep consideration about this matter so that the permission can be obtained.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

従来の事業概要

本協會は昭和三十五年五月一日創立總會を開催して成立したる當時の會員數は左記の通りであります

一、正會員　六九名

一、賛助會員　一名

一、特別會員　一名

計　六九名

本協會は其の成立と同時に先づ狂犬病の豫防對策に主力を注ぎ關係當局と緊密の連絡をとりて協力機關として來りました　都下には類似の非公益的行爲をなす者が出現横行したるため本協會の事業遂行上不少支障を來したるにかんがみ公明正大に行動したる結果漸く當局並に一般民衆から認知せらるゝに至りました

都内の未届出畜犬は極めて多く是等の畜犬と野犬は狂犬病の禍根を
