Subj: Special Report on Local Election
(For the 2nd time).

1. The status of candidates for the mayor's election in the three big cities in the prefecture:

No more candidate and no more declining at present.

2. (1) The voters' attitudes towards the election:

Having seen all the foreseen candidates for each the pref. assembly, the mayor, or the city, town or village assembly finished their reporting, the election campaign is getting more and more active and people's attitudes towards the election are also getting raised accordingly.

In view of the fact that the elections both for the mayor and the city, town or village assembly are those mattering much to the people and the sphere of the campaign therefor is comparatively small, the people's fever for the election will the more go up and up.

(2) Trends of people's likes and dislikes to each political party :

It is as a matter of course that the trends mentioned above wouldn't be known until the voting is finished, it is, however, supposed that the Liberal Party would win the first place in the recent election, judging from the fact that the influence of the Party has been ~~most~~ strong ~~even since~~ for these long years.

But the influence of both the Democratic and Socialist Parties which won in the election of the Governor last December can also be ~~terrible~~ said.

According to the public opinion survey held under the auspice of the Asahi Press late March in this prefecture, the anticipated effects for each Party in the election are as follows:

The Liberal Party -------	40%
The Democratic Party -----	10%
The Socialist Party -----	25%
Unknown -------	20%

The influence of the Communist Party is getting weaker and weaker.

(3) The degree of knowledge for the Election Law of the general public is generally speaking getting turned for the better through various elections committed in the past.
