Special Report No. 60

SELECTED CLIMATIC DATA

August - November

Korea

Herewith is submitted Special Report No. 60, Selected Climatic Data, August - November, Korea. It is derived from climatic data obtained from the Central Meteorological Observatory, Tokyo, Japan. The information contained in the report may be considered reliable, since each of the climatic stations has a record of more than ten years duration. Attention is invited to the fact that this report deals with climatic statistics and as such is an accurate description of past conditions. It cannot be used as a forecast of anticipated weather.

BY COMMAND OF GENERAL RIDGWAY:

DOYLE O. HICKEY
Lieutenant General, General Staff Corps
Chief of Staff

OFFICIAL:

R. F. ENNIS
Brigadier General, GSC
Assistant Chief of Staff, G-2

1. There have been recent instances of "false verifications" of intelligence reports which stem from the reproduction of material from informational intelligence publications without "crediting" the published source. These cases have usually occurred through a field agency reporting or disseminating intelligence without indicating that the intelligence has been previously published.

2. In view of the serious consequences that can arise from "false verification" of intelligence, the following limitations on reproduction of intelligence from publications of all intelligence-producing agencies (CIA, State, Army, Navy, Air) are announced:

a. Reproduction of, or extracts from, all intelligence publications will be limited by the instructions incorporated in the publications.

b. In event reproduction of an item is authorized (either by instructions embodied in the publication or after specific request) the reproduction or extract will be "credited" to the original publication and appropriate security classification continued.

By ORDER OF THE SECRETARY OF THE ARMY:

/s/ Edward F. Witsell
EDWARD F. WITSELL
Major General, USA

SELECTED CLIMATIC DATA

August-November

Korea

A. Introduction

The purpose of this report is to present in a readily usable and comprehensive form detailed climatic data pertaining to Korea for the four-month period August through November. It is not a complete climatic analysis for those months. Only the climatic factors which are thought to be of major importance to the conduct of operations in or over Korea are included. The information is presented in considerable detail and should be adequate for general planning purposes. The individual plates are self-explanatory, but for convenience a brief textual summary and analysis of the most significant aspects follows.

It is important to note that the generalizations in the text as well as the climatic statistics themselves are not valid as specific weather predictions and are useful merely as an indication of climatic probability.

Weather stations are located on Plate 1.

B. Typhoons

On the average, typhoons affect Korea directly only once or twice each year. They may occur any time between May and October, but they are most likely to influence Korean weather during the nine-week period from the beginning of July through the first week of September. After the second week in September a typhoon might pass through the Korean or Tsushima Strait, but it is not at all likely to directly affect the Korean peninsula. Later than 10 September, typhoons almost always move across or to the west of southern and southeastern Japan rather than into the Korean area. In addition to the normal strong winds associated with these storms, the typhoons are attended by widespread low overcast conditions, heavy to torrential rainfall, and high "following" tides in the coastal sectors.

Plate 2 shows the typical tracks of typhoons which have occurred in August and early September. Although these tropical storms may strike across Korea at any point, the highest incidence over a long period of years has been recorded in the Moko'o vicinity at the extreme southwestern corner of the peninsula. By the time typhoons reach the latitude of Korea they are generally reduced in violence, being considerably less intense than when they moved into the regions of the Ryukyus, Formosa, or the China mainland. Although wind velocities are likely to reach 75 to 85 miles per hour in the East China Sea, they generally slack off below 65 miles per hour in the Yellow Sea and in the strait between Cheju Island (Quelpart) and Korea. Peak velocities just above 75 miles per hour have been observed at Mokp'o and Inch'on on the west coast of the peninsula, but such excessive speeds in that area are extremely rare. Once a storm has passed a few miles inland, wind speeds drop to below 50 miles per hour and are no longer of serious consequence. Thus the danger of extensive typhoon damage at interior and east coast points is relatively slight. This is also true for localities on the west coast of northern Korea, where winds very rarely reach a velocity of more than 45 miles per hour.

In the Pusan area in the extreme southeast, typhoons occasionally move in from the Korean Strait. When this occurs, wind

DECLASSIFIED
Authority 813562
By 2r NARA Date 1/9/12

speeds of nearly 70 miles per hour can be expected, since there is no sizable area of high land on the seaward quarter to dissipate the wind force.

C. Cloudiness

Plates 3, 4, 5, and 6 contain data indicating mean monthly cloud conditions. Available information on this subject is limited, because only the few major Japanese weather observatories maintained detailed records on cloudiness for long periods. However, the data is sufficient for a general picture.

The summer season is the period of maximum cloudiness over Korea. Of the four months under consideration, the most adverse sky conditions for aerial operations occur in August. In that month the mean cloud cover is above 70 percent in northern Korea and between 64 and 68 percent throughout most of southern Korea. Conditions are slightly better over the extreme south end of the peninsula, but cloudiness is still high, averaging about 60 percent. In most sectors there are ordinarily less than five clear days during the month and over 12 overcast or nearly overcast days.

Near the middle of September there is a moderate improvement, although mean cloudiness for the month remains above 56 percent in most areas. The most favorable conditions at that time are found in western Korea, from Inch'on north to Sinuiju. In this sector mean cloudiness is still between 49 and 56 percent, but there is an average of six clear days and nine or less overcast days.

October marks a further decrease in cloudiness and the beginning of generally favorable sky conditions for air activity. Mean cloudiness is between 40 and 50 percent for all of Korea, with the highest percentages occurring in the southern sectors. The average number of clear days is 9 to 11 in northern Korea and only two days less in southern Korea. Fewer than eight cloudy days (80 to 100 percent cloud cover) are likely to occur in northern Korea and only one or two more in southern Korea, with the exception of the Pusan area.

During November, cloudiness is ordinarily little changed from October conditions except in the vicinity of Pusan, where there are more clear days, and along the southwest coast, where the number of overcast days and consequently the mean cloudiness increase slightly.

D. Precipitation

Plates 7, 8, 9, and 10 give a detailed distribution of mean monthly precipitation. Mean totals for only those stations which maintained records for 12-year periods or longer have been used.

Summer is the season of heavy rainfall throughout Korea. Over most of central and southern Korea July is normally the rainiest month, with August a close second. In the north-central and northeast sectors, August is the wettest month, and rainfall is also moderately heavy and sometimes very heavy during the first two weeks of September. There is a sharp decrease after that time in both total amount and frequency of occurrence. Precipitation is light everywhere during October and very light in November. In terms of overall weather conditions, including temperature, these two autumn months are ordinarily the most favorable of the entire year for both air and ground operations.

At high elevations in the northern highlands, snow flurries are likely to occur as early as the beginning of October, but there is seldom any accumulation of snow on the ground until near the end of November, or later, and even then it is slight. Snowfall is thus a negligible factor in the computation of precipitation data for both months.

DECLASSIFIED
Authority 813562
By NARA Date 1/9/12

E. First autumn freeze

Plate 11 indicates the mean date of the first autumn freeze at some 130 well distributed places in Korea. The dates refer to the first ice formation on standing water under conditions of little or no wind. This information is of value only as an indication of the beginning of freezing conditions. After the initial freeze there is normally a two- to four-week transition period of night-time freezing and day-time melting before the permanent winter ice cover on standing water becomes established.

Flowing water will freeze at a much later date than indicated on this chart. On the most northerly rivers the freeze-over will normally begin during the last 10 days of November, but throughout the remainder of Korea rivers and streams do not ordinarily freeze until after mid-December.

Plate 12 shows the date of the earliest freeze on record at the same 130 places.

F. Temperature conditions

Plates 13 through 19 contain detailed data on temperature conditions. The first four give the mean maximum and minimum monthly temperatures, and the last three indicate the extreme minimum temperatures in September, October, and November on the basis of observations over a 15-year period or longer. The day of the month on which the extreme low reading occurred is also indicated. Minimum temperatures for August are omitted because they are not low enough to cause discomfort to personnel living in the field.

In northern Korea, particularly in the highland districts, the period of critical temperatures usually comes during the last 10 days of September. At that time, although the mean minimum reading is about 50 degrees in most areas, temperatures will fall below 40 degrees on some nights, and may reach freezing or below. Troops sleeping in the field will require adequate cold weather gear and clothing in spite of the fact that daytime temperatures in late September are generally moderate to warm.

On and near the present battle front in central Korea, the period of critical temperature from the standpoint of troop comfort occurs from two to three weeks later, near the middle of October. In the southern sectors of the peninsula temperatures which approach freezing are not likely to be experienced until the last few days of October or more probably early November.

MONTHLY REPORT OF ACTIVITIES

JANUARY 1951

A. ROUTINE ACTIVITIES

1. Investigative Correspondence: During January 1951, a total of 3,400 pieces of investigative correspondence, covering incident and individual cases and social and/or civil conditions in Japan, were processed through Headquarters 441st CIC Detachment by the Special Investigations Section. The figures do not represent completed investigations. (See Page 6).

2. Reports Processed: Monthly Information Report for January 1951 was submitted to CIS Publications for inclusion in the CIC District Field Report.

In accordance with paragraph 69, TM 30-215, September 1947, Monthly Report of CIC Activities, DA AGO Form 395, for January, was forwarded to the Chief, CIC Center, Fort Holabird, Maryland.

3. CICTS Conducts Agents' Basic Class: During the period 4 January to 31 January 1951, CICTS conducted the 76th Agents' Basic Course. Twenty-eight (28) officers, three (3) civilian agents and seventeen (17) enlisted personnel completed the course. Of this total, two (2) were guests from CID, one (1) a guest from Hq, Northern Command, one (1) a guest from G2, Japan Logistical Command and one (1) a guest from U.S. Naval Activities. The graduation address was presented to the class by Colonel Washington M. Ives, Jr., Executive, G2 Administration. Letters of commendation were presented to Captain William Stefen, Captain Howard E. Newman and 1st Lt George L. McClanahan who were, in that order, the three ranking students in the class. All commended personnel are assigned to the 441st CIC Detachment. The class average was 87.2%. (See Attached Schedule).

The members of the class fired the agents' course with the revolver, caliber .38, 2-inch barrel. The course consists of 20 rounds at the "L" type target and 15 rounds at the "E" type (bobbing) target, with a possible score of 275. A score of satisfactory, 175 or above, was fired by fourteen (14) class members.

During the period 28 December 1950 to 3 January 1951, a Special Combat Training Course was conducted by CICTS. Sixteen (16) officers and twelve (12) enlisted personnel completed the course. Colonel Lawrence G. Smith, Commanding Officer, presented the closing remarks. (See Attached Schedule).

4. Troop Training Schedule: Weekly troop training, required by Headquarters and Service Command, GHQ, FEC, for January 1951, included four hours per week of instruction for the approximately two hundred fifty (250) enlisted personnel of the Headquarters Detachment and the Tokyo-to CIC Area.

As per instructions contained in GHQ, FEC, Circular Nr 3, 24 January 1949, the troop training for the approximately one hundred twenty-five (125) officers of the Headquarters Detachment and the Tokyo-to CIC Area was conducted.

B. HIGHLIGHTS

1. Staff Field Trips: The following officers of Headquarters 441st CIC Detachment made visits to the field during January in connection with CIC operations:

SECRET

a. Major Otis L. Norris, S3 Inspections Section, visited 6th CIC District during the period 8 January to 13 January 1951.

b. Major N. L. Vest, S2 Special Investigations Section, visited 6th CIC District during the period 8 January to 13 January 1951.

c. Captain M. H. Gifford, S3 Inspections Section, visited 6th CIC District during the period 8 January to 13 January 1951.

d. WOJG Vincent Del Campo, S4 Section, visited 6th CIC District during the period 8 January to 13 January 1951.

e. Major Otis L. Norris, S3 Inspections Section, visited 3d CIC District during the period 26 January to 31 January 1951.

f. Major Bruce Beard, S3 Plans and Policy Section, visited 3d CIC District during the period 26 January to 31 January 1951.

g. Captain M. H. Gifford, S3 Inspections Section, visited 3d CIC District during the period 26 January to 31 January 1951.

h. Captain J. E. Freestone, S3 Safety Section, visited 3d CIC District during the period 26 January to 31 January 1951.

SPECIAL ACTIVITIES (SYNOPSIS OF NORTH KOREAN ESPIONAGE RING IN JAPAN)

This case, although carrying the classification of SECRET, has been handled as sensitive for security reasons. Therefore, though of considerable interest, a summary has not been forwarded previously.

In August 1950, a Korean civilian visited the Tokyo Area office of CIC with what he believed to be information of interest to CIC. After a lengthy interview a Summary of Information was submitted to Hq 441st CIC Detachment the contents of which warranted the opening of a case entitled "NORTH KOREAN ESPIONAGE RING IN JAPAN."

Immediately following the receipt of the initial information from this Korean several of the suspected espionage agents of this ring were apprehended. Through extensive interrogation, other personalities were named and/or identified by these suspects and by December 1950, twenty-seven (27) agents or suspected agents were confined at Sugamo Prison, Tokyo.

Interrogation reports were reviewed by the legal experts of GHQ, FEC, which resulted in a decision that sufficient evidence had been gathered by CIC to warrant holding these espionage agents for an indefinite period, or at least until other more prominent members of the ring could be apprehended, examined, and connected with the ring. Any publicity resulting from trial of members of such a ring would "blow" the case before the principal operators could be picked up.

To facilitate handling, since every suspect involved had at least two (2) names, some as many as ten (10), code names were assigned to each personality, i.e., ABLE, BAKER, CHARLIE, X-RAY, etc, for identification and discussion purposes.

X-RAY, a self-confessed Major, North Korean Army, trained by the Political Defense Bureau, in Pyongyang, Korea (counterpart of the Soviet MVD) was sent to Japan to organize an espionage net and recruit personnel to be sent to North Korea for training and eventual return to Japan for a service as espionage agents or guerrillas. Missions assigned these espionage agents were to obtain information and locations of Eigth Army Units, Fifth Air Force and the Japanese Police (both National and Autonomous). X-RAY'S first shipments of personnel from North Korea consisted of a twenty (20) man group and a ten (10) man group of trained agents, which are known as "the 30 man team", the most active of whom have been apprehended by CIC and confined.

DECLASSIFIED
Authority 813562
By NARA Date 1/9/12

There were a few established North Korean espionage agents operating in Japan when X-RAY came to Japan. With their assistance his espionage operations were rapidly and smoothly implemented. X-RAY brought word from NORTH KOREA authorities that these established agents were to assist him, which they did promptly. Documents seized in possession of the agents indicated highly classified information had been reported to North Korean authorities before X-RAY'S apprehension; the most important at the time was the date and estimated strength of UN Forces for the Inchon invasion on 15 September 1950. Locations, activities and personnel of air fields, ammunition dumps, ordnance shops and military strengths in Japan were recorded as having been transmitted by other documents. The ring's coverage had been good.

Suspected agents of this ring have been apprehended by CIC in each CIC District throughout Japan. Preliminary CIC interrogations were conducted at point of apprehension and later forwarded to Seventh CIC District, Tokyo, which has acted as Control Office for the case.

All documents seized have been carefully numbered, recorded and receipted for, establishing a chain of custody for use when the espionage agents are brought to trial in Tokyo.

At present the Provost Court Authorities, Camp Tokyo, are preparing for trial from evidence furnished by CIC the cases against espionage agents whose code names are NED, NAN, NAT, ROGER and LUCIFER, who were among the first group apprehended. It is expected that the trial will begin about 15 February 1951 and conviction is anticipated for all who are brought to trial either for espionage or conspiracy to commit espionage, to include actual agents, couriers, smuggling ship operators and informants.

Smuggling has played no small part in the operation of this net, inasmuch as all personnel were smuggled into and out of North Korea and Japan, as were morphine, heroin, streptomycin and other items, including US Dollars, the sale of which financed the entire operation of the espionage ring.

Publicity of the trials is to be coordinated with G2, GHQ by PIO, GHQ which if properly coordinated should permit the apprehension of other suspected agents who until now have succeeded in avoiding apprehension by going underground.

Contrary to Communist Party instructions that persons engaged in underground activity will not be identified as CP members, three (3) of the most prominent Korean Communists have been involved in this case, with KIN, Ten Kai, number one Korean Communist in Japan Communist Party activities, taking the spotlight. To date KIN has not been apprehended.

MONTHLY REPORTS OF ACTIVITIES

FEBRUARY 1951

A. ROUTINE ACTIVITIES

1. Investigative Correspondence: During February 1951, a total of 3843 pieces of investigative correspondence, covering incident and individual cases and social and/or civil conditions in Japan, were processed through Headquarters 441st CIC Detachment by the Special Investigations Section. The figures do not represent completed investigations. (See Page 5).

2. Reports Processed: Monthly Information Report for February 1951 was submitted to CIS Publications for inclusion in the CIC District Field Report.

In accordance with paragraph 69, TM 30-215, September 1947, Monthly Report of CIC Activities, DA AGO Form 395, for February, was forwarded to the Chief, CIC Center, Fort Holabird, Maryland.

3. CICTS Conducts Agents' Basic Class: The 77th Agents' Basic Course of the Counter Intelligence Corps Training School, Tokyo, Japan, commenced 7 February 1951 and is scheduled to graduate 7 March 1951. Twenty-eight (28) officers, four (4) civilians and eighteen (18) enlisted men were enrolled in this course. Of these, two (2) are guests from CID, one (1) from G2, Japan Logistical Command, one (1) from 6001st OSI (IG), FEAF, and one (1) from U.S. Fleet Activities, Yokosuka. (See attached roster and schedule)

4. Troop Training Schedule: Weekly troop training, required by Headquarters and Service Command, GHQ, FEC, for February 1951, included four hours per week of instruction for the approximately two hundred fifty (250) enlisted personnel of the Headquarters Detachment and 7th CIC District.

As per instructions contained in GHQ, FEC, Circular Nr 3, 24 January 1949, the troop training for the approximately one hundred twenty-five (125) officers of the Headquarters Detachment and 7th CIC District was conducted.

During the month of February 1951, one hundred and seventy-five (175) additional CFT Examinations were distributed to the CIC districts. A total of two hundred and twenty-seven (227) persons from the various CIC districts have satisfactorily completed the CFT Examinations as of 28 February 1951.

B. HIGHLIGHTS

1. Staff Field Trips: The following officers of Headquarters 441st CIC Detachment made visits to the field during February in connection with CIC operations:

a. Major Otis L. Norris, S3 Inspections Section, visited 5th CIC District during the period 11 February to 14 February 1951.

b. Captain M. H. Gifford, S3 Inspections Section, visited 5th CIC District during the period 11 February to 14 February 1951.

c. Captain J. E. Freestone, S3 Safety Section, visited 5th CIC District during the period 11 February to 14 February 1951.

d. Captain Robert C. Lawrence, S2 Section, visited 5th CIC District during the periods 11 February to 14 February 1951, and 18 February to 24 February 1951.

DECLASSIFIED
Authority 813562
By 2r NARA Date 1/9/12

e. Major Otis L. Norris, S3 Inspections Section, visited 2d CIC District during the period 19 February to 2 March 1951.

f. Major Elbert H. Eller, S2 Section, visited 2d CIC District during the period 19 February to 2 March 1951.

g. Captain M. H. Gifford, S3 Inspections Section, visited 2d CIC District during the period 19 February to 2 March 1951.

h. WOJG Thomas M. Jackson, S1 Section, visited 2d CIC District during the period 19 February to 2 March 1951.

i. Captain Thomas E. Witkowski, S2 Section, visited 526th CIC Detachment, APO 331, during the period 18 February to 2 March 1951 in connection with polygraph activities.

j. 1st Lt. John Conrad, S2 Section, visited 3d CIC District during the period 14-22 February; 4th CIC District, 26 February to 3 March 1951 in connection with polygraph activities.

2. Transfers:

Colonel William I. Russell was transferred from 441st CIC Detachment (S2 Section) to Joint Special Operations Branch, effective 3 February 1951.

SPECIAL ACTIVITIES

Liberal Lawyers Group was established in 1919 as a group of lawyers interested in the protection of human rights, who supplied free legal counsel for persons unable to pay for such service. In the course of its activities, it frequently defended pre-war Communists in the courts, and consequently laid itself open to Communist infiltration. By 1933 it had clearly assumed the character of a Communist legal group, and in that year twenty (20) of its Communist members were arrested. Thereafter its activities declined, and it was completely disbanded during the war.

Following the war the Liberal Lawyers Group was reorganized and again became active as a source of legal counsel for JCP members. It has been under Communist control during its entire post-war life, although a substantial portion of its members were not pro-Communist and, in fact, a small anti-Communist group existed within its ranks. During 1950 the factional dissension within the group began to increase, and culminated in an open split at the Group's 12th National Convention on 9 December 1950 when a group of 32 non-Communist members seceded from the organization to form their own "Socialist Lawyers Group."

As a result of this split, the estimated former membership of approximately one hundred and twenty (120) reportedly has fallen to less than sixty (60). The remaining members of the Group are for the most part JCP members or sympathizers. While there reportedly has been considerable sentiment in favor of dissolving the Group, no such move has to date been officially announced. Inasmuch as the stigma of being designated a Communist-front organization reportedly constitutes a serious obstruction to the activities of the Group, there is some reason to believe that the Group may attempt to dissolve itself in favor of some new organization of leftist lawyers not so clearly identified with the Communist line. In any case, it is believed that the JCP will continue efforts to expand its influence in legal circles, while at the same time following its standard tactics of camouflaging the extent of such influence insofar as possible.

CASE LOAD PER CIC UNIT AND PERSONNEL DISTRIBUTION

The following chart is submitted to show the relationship between the volume of cases handled by each CIC unit and the number of personnel per unit.

Personnel figures are further broken down to indicate which officers and men are assigned to the 441st CIC Det, and those assigned to the 319th Military Intelligence Company.

Figures cover the month of February 1951.

MONTHLY REPORT OF ACTIVITIES

MARCH 1951

A. ROUTINE ACTIVITIES

1. Investigative Correspondence: During March 1951, a total of 4403 pieces of investigative correspondence, covering incidents and individual cases and social and/or civil conditions in Japan, were processed through Headquarters 441st CIC Detachment by the Special Investigations Section. The figures do not represent completed investigations. (See Page 6).

2. Reports Processed: Monthly Information Report for March 1951 was submitted to CIS Publications for inclusion in the CIC District Field Report.

In accordance with paragraph 69, TM 30-215, September 1947, Monthly Report of CIC Activities, DA AGO Form 395, for March, was forwarded to the Chief, CIC Center, Fort Holabird, Maryland.

3. CICTS Conducts Agents' Basic Class: The 77th Agents' Basic Class of the Counter Intelligence Training School, Tokyo, Japan was in session from 7 February 1950 to 7 March 1951. Twenty-eight (28) officer, four (4) civilians, and eighteen (18) enlisted men completed this course. Of these, two were guests from CID, one (1) from G2, Japan Logistical Command, one (1) from 6001st Special Investigations Unit (SIU), (IG), FEAF, and one (1) from U.S. Fleet Activities, Yokosuka, Japan. (See attached roster and schedule.)

The graduation address was given by Colonel Horton V. White, Chief, Theatre Intelligence Division, G2, GHQ, Far East Command. Letters of commendation were presented to Capt Frank P. Verna, 1st Lt Stanley V. Hussey, and Cpl Masakazu Fujimoto, in that order, the three ranking students. All commended personnel are assigned to 441st CIC Det. The class average was 87.2. (See attached roster.)

A total of nine (9) hours, practice firing, and record firing with the Revolver, caliber .38, Special, 2" barrel, was completed by members of the 77th Agents' Basic Class. A score of excellent was fired by four (4) students; very satisfactory by seven (7) students; satisfactory by fifteen (15) students and unsatisfactory by twenty (20) students. Four (4) guest students did not participate in the firing.

The 78th Agents' Basic Class of the Counter Intelligence Corps Training School commenced training on 14 March 1951 and is scheduled to be completed on or about 10 April 1951. Twenty-two (22) officers, three (3) civilians, and twenty-three (23) enlisted men were enrolled in this class. Of these, two (2) are guests from the 526th CIC Detachment, APO 331, and one (1) from CID.

4. Troop Training Schedule: Weekly troop training, required by Headquarters and Service Command, GHQ, FEC, for March 1951, included four hours per week of instructions for the approximately two hundred one (201) enlisted personnel of the Headquarters Detachment and 7th CIC District.

As per instructions contained in GHQ, FEC, Circular Nr 3, 24 January 1949, the troop training for approximately one hundred twenty-five (125) officers of the Headquarters and 7th CIC District was conducted.

During the month of March 1951, one hundred and fifty (150) additional CFT Examinations were distributed to the CIC districts. A total of two hundred and forty-nine (249) persons from the various CIC districts have satisfactorily completed the CFT Examinations as of 31 March 1951.

Re-test of ninety five (95) linguistic personnel of 319th MI Company was completed on 6 Mar 51. Thirty (30) qualified as interpreters and six (6) qualified as translators as a result of these tests.

B. HIGHLIGHTS

1. On 8-9-10 March 1951, Legal and Government Division, Civil Affairs Section, GHQ, FEC, held a conference in Tokyo attended by representatives from SCAP Sections and Japan Logistical Command Legal Section, SCAP. Colonel L. G. Smith, commanding officer of 441st CIC Detachment, as guest speaker on 9 March 1951, defined the mission of CIC, discussed the good relationship that has existed in the past between the CIC-CA and the few problems that have arisen in carrying out the CIC responsibility for logistical support of GHQ, SCAP and FEC visitors.

2. Staff Field Trips: The following officers of Headquarters 441st CIC Detachment made visits to the field during March in connection with CIC operations:

a. 4th CIC District, 13 March 1951:

Major Otis L. Norris	S3 Inspections Section
Capt J. F. Macri	S2 Section
Capt R. L. Moore	S1 Section
Capt R. X. Bowman	Hq Comdt Section
WOJG V. A. Del Campo	S4 Section

b. 7th CIC District, 20 March 1951:

Lt Col L. M. de Riemer	Executive Officer, 441
Maj Otis L. Norris	S3 Inspections Section
Maj E. H. Eller	S2 Section
Capt R. X. Bowman	Hq Comdt Section
1st Lt L. C. Kamp	S1 Section
WOJG V. A. Del Campo	S4 Section

c. 8th CIC District, 22 March 1951:

Lt Col L. M. de Riemer	Executive Officer, 441
Maj Otis L. Norris	S3 Inspections Section
Maj E. H. Eller	S2 Section
Capt R. X. Bowman	Hq Comdt Section
1st Lt L. C. Kamp	S1 Section
WOJG V. A. Del Campo	S4 Section

d. 1st CIC District, 18 to 30 March 1951:

Lt Col Wilbur V. DeLoach	OIC (6th CIC Dist)
Maj W. G. Silva	S2 Section
Capt J. F. Chrest	S3 Section
Capt M. H. Gifford	S3 Inspections Section
CWO Gail M. Jackson	S1 Section

e. 6th CIC District, 6 to 23 March 1951:

Capt R. H. Clark	S2 Section

f. 1st CIC District, 7 to 23 March 1951:

1st Lt J. Conrad	S2 Section

g. 1st CIC District, 18 to 31 March 1951:

Maj W. G. Silva	S2 Section

h. 5th CIC District, 18 to 31 March 1951:

Capt J. F. Macri S2 Section

i. Major J. Bonfiglio, S2 Section, visited the 308th and 442d CIC Detachments during the period 1 - 14 March 1951.

SPECIAL ACTIVITIES:

The Boy Scouts movement in Japan, (BSJ) while not as extensive or systematized as its counterpart in the United States, has been active for many years. Its general popularity increased markedly since the end of the war, attributed in part to the incentive furnished by the presence in Japan of local chapters of the Boy Scouts of America, whose members are children of Occupation Forces personnel and dependents. Joint meetings and social get-together are occasionally held. The further development of the Boy Scouts and Girl Scouts in Japan into a solid movement is dependent largely upon the proper leadership and planning, and the importance of this phase of youth welfare and guidance can be judged from the fact that the Japan Communist Party saw fit to establish a rival group called the "Pioneers" under the JCP Pioneer Guidance Department for the sole purpose of promoting among Japanese children, the Russian version of the Boy Scout movement. Under the circumstances it appeared highly incongruous -- but significant -- that the leaders of the two rival movements were in fact ostensibly wedded together by either family or social ties as the following brief biographical sketches will show:

MISHIMA, Michiharu, a former viscount with a wide background in government circles has been associated with the Boy Scout movement in Japan since 1923. HIJIKATA, Yoshi, prominent in JCP cultural circles is listed as the leader of the JCP Pioneer Guidance Department. The wives of these two men are sisters. SEKI, Tadayuki, the chief executive of the BSJ was appointed to his job by MISHIMA, Seki's divorced wife is currently listed as a member of the Communist-Front, "Peace Preservation Society." Seki's present wife is employed by the Readers Digest in Tokyo but his sister is listed as being a staff member of the JCP Pioneer Guidance Department (who together with another 'sister' allegedly attended and contributed their vocal talents at a Russian Army-Navy celebration at the Soviet Embassy in Korea in 1947.) In addition, Seki's daughter allegedly is a good friend of the purged JCP Central Committee chairman, TOKUDA, Kyuichi.

Since the JCP looks upon the Boy Scout movement as an anti-Communist organization it had to be assumed that the JCP would attempt not only to oppose the Boy Scouts by propaganda and agitation but also from the inside. While there was no indication available to indicate that the JCP was conducting such a program of infiltration and subversion the family and social relationship outlined above suggested that the HIJIKATA family and Communist sympathizers might be among SEKI's relatives and possibly using their influence to create Communist sympathizers within the Boy Scout organization.
