Price 8d; by post, 8½d.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for March gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to March 26.

Advertisements for the next Number, to be published on April 26, must be sent, to insure insertion, on or before April 24.

THE RISE IN THE BANK RATE.

THE course taken by the Bank directors this week in raising the rate from 3½ to 4 per cent. was one clearly called for by the condition of the market, and the state of their account. The demand for money has for sometime been such as to cause a steady increase of the private securities of the Bank. So far as this was due to the revenue arrangements, and the Bank only lent out as much as the Government money that came in, there was perhaps no occasion to make any change; but the demand last week has been for a good deal more than

the amount paid in to the Government account. The increase in the Government deposits is about 400,000*l.*, but the increase of the private securities is 1,950,000*l.* As these private securities now amount to 27,000,000*l.*, such an increase in one week showed beyond doubt that the aggregate resources of the money market, in proportion to the demand, were less than they had been. The advance of the rate had thus become expedient from the existing state of the demand alone, unless the Bank were willing to prolong unduly an artificial market by lending much cheaper than at the rate they could charge. The diminution of the reserve furnished them with an additional motive for acting at once. The reserve, even after a loss of 1,523,000*l.* in one week, still stands at the large total of 13,695,000*l.*, which is quite enough for very considerable demands, and would in former times have been considered a reserve of overwhelming magnitude. But the demands which are current, and which may spring up at any moment, are on a large scale, and we cannot be sure that the reserve, large as it is, will be anything more than enough. It is expedient, therefore, to use precautionary measures as soon as the reserve begins to be seriously operated upon, even when it amounts to thirteen or fourteen millions.

Whether any further action of the Bank will be necessary depends mainly upon the question of the reserve. So far as we can judge, the demand in the money market is not likely to cause any pressure. There is usually more activity now than there is earlier in the spring, but we do not expect anything more than the ordinary increase in the demand. It is noticeable, as bearing on this point, that the private securities of the Bank are no greater now than they were at the corresponding date last year, although the Government deposits have taken about 1,400,000*l.* more from the open market than they did last year. An advance to 5 per cent. last spring was found sufficient, and perhaps as the pressure is now rather less, a lower rate than 5 per cent. might now suffice. But the bullion demand is an uncertain element. The German Government is acting with great moderation, and will probably take as little as possible until the large supplies to be received next month from Australia—amounting to about 1,600,000*l.*—come in. Still there are buyers of gold in the market besides Germany, while the markets of the world are generally barer than they were last year. It is therefore just possible that, in spite of all the care of the German Government, the bullion may soon be drawn upon to such a point that the Bank will have no course but to raise the rate at once to 5 per cent. and upwards. We do not expect this, but the contingency must be kept in view. It must also be remembered that if a period of impending stringency is tided over for the present, the causes which will make money dearer are likely to increase in strength. The bullion markets of the world get barer month by month, as the German demand sweeps up out of the annual production of gold more than can really be spared for so unusual a want. Although a quick advance may not at present be required, and there may as usual be a tendency to cheaper money in June, we should expect that for a considerable period the average rate for money is likely to rule rather above 4 per cent. than under it.

THE COMING CURRENCY INQUIRY.

ON Tuesday evening Mr William Fowler rendered a very considerable service to the banking and commercial public of England. It was principally owing to his speech (which is

but imperfectly reported) that the Government were induced to consent to an inquiry into by far the most objectionable part of our currency legislation—the operation of the Act of 1844 during a panic. We have often explained to our readers our views on this subject, and have alluded to the pithy remark of Sir G. O. Lewis that “the Act of 1844 goes on for ten years doing so much good that you think, “practically at least, nothing can be better, and then for one “week in ten years it on a sudden works so much harm that “you begin to doubt whether it is a good Act after all.” On the whole and putting abstract theory of currency aside, the debate of Tuesday night did credit to the House of Commons. Every one must see that there is not likely to be any exact argument on questions of abstract currency; the subject is perpetually argued without even an approach to such an agreement. Many persons most competent to judge object to the Act of 1844, and to its theory; we ourselves have often stated several objections to the theory of that Act, which are to our minds most important, though many most competent persons see nothing in them. But practically there is no doubt that the Act of 1844 has now been on trial for nearly thirty years, that there are ten people now for it where there is one for any particular substitute, and that our best course is to leave off discussing abstract doctrines which are never universally conclusive to human minds, and see whether our experience of practical results during this long course of years shows no very material point in which our existing legislation can be mended.

Now undeniably our present mode of dealing with a panic does not seem right. It looks at first strange, as Mr Fowler argued with great force, that the whole mercantile and banking community should be expecting, and should be dependent upon, a breach of the law. On the face of it, nothing can better deserve investigation than the question whether such a system be the best system or the only possible system. It unquestionably is a system which causes incalculable anxiety. The public have got pretty well to feel sure that the law will be broken; but they are never sure at what time and after how much delay, and there may be such a phenomenon as a new Chancellor of the Exchequer who thinks the required issue of notes a depreciation of currency, and who declines, therefore, to concur in it.

The useful and moderate turn of the debate is the more creditable to the House of Commons because in the introduction of it Mr Anderson gave it a turn exactly contrary. He left on his hearers the impression that he thought money was too dear—that the price of it changed too often, and therefore he wanted legislation to make it cheap and stable. But the English House of Commons is well aware that the prices of all commodities do vary, must vary; that it cannot for example fix or render invariable the prices of coal and iron. The useful part of the debate began with the well considered and careful speech of Sir John Lubbock, who refuted many fallacies and who exhibited their practical consequences in many figures. But we regret that Sir John should—we hope not permanently—have committed the weight of his authority to our present system of dealing with panics. And we have no doubt he will agree with us that so anomalous a condition as the present one which foreigners find so very difficult to understand, and which it is so hard to justify by short and simple reason, is one well deserving of the most careful and accurate investigation.

Whether the investigation should be by a Parliamentary Committee or a Royal Commission is not easy to say, for there are advantages and disadvantages on both sides. A Parliamentary Committee, on which important members of the Government are constantly present, and over which they perhaps preside, undoubtedly brings home the real state of the subject to those who have to decide on it, very differently from a commission, partly, perhaps, composed of theorists who work, so to say, in a different world. There is something more practical about a committee every one would say. But, on the other hand, it is now the month of March, Easter is upon us, and it is late in the Session to appoint a committee on such a difficult question. If it is to be of any use at all, it must be at considerable labour. The subject is a difficult one, and will require much consideration. The members of the Government are but men (and some of them very overworked men already), and we do not like to ask them to serve on such a committee, but if they

would name a good committee, and some of them set on it themselves, this would be by far the best course.

THE GOVERNMENT AND THE DISSENTERS.

A STEP of some importance was taken towards the healing of the breach between the Government and the Dissenters, by the large vote on Mr Osborne Morgan's Burial Bill, which passed the second reading by a majority of 68. Mr Disraeli has apparently given up the policy after which, in his political novels, he has so often shown a hankering, of winning over the Wesleyans to his side. Nothing could be harder or less conciliating than his tone towards the whole body of Dissenters on Wednesday afternoon. He classed them altogether, and he set the Church of England over against them rather as a distinct sect which had acquired a right to the fabrics and churchyards of England through the negligence and laches of the Dissenters and their refusal to pay church-rates, than as still claiming in any sense to be a national Church, and eager therefore to offer to all English citizens their proper privileges as at least potential members of that Church. This line of Mr Disraeli's was evidently carefully considered, and intended to reassure his own followers of his staunch Church Conservatism. Nay, he went further, and gave the Dissenters a broad hint that they had lost a good deal of political power, which they wielded under the Reform Bill of 1832, since he gathered the poorer householders into the Electorate in 1867. They were no longer so powerful in the constituencies as they had been, he said,—and this was his doing. Unless they allied themselves with the Church, and turned their common forces against the fashionable scepticism, they would find themselves but a weak political body in future. This was a significant attitude to take up, and was no doubt intended to sooth the grave distrust which Mr Disraeli's followers feel of his professed attachment to the Church of England. He believed that by thus “burning his ships,” and telling the Dissenters openly that he had undermined their power and meant to defy them, he would regain the confidence of some of his own discontented adherents.

This attitude of Mr Disraeli's makes the opportunity for a hearty reconciliation between the Government and the Dissenters particularly promising. And in view of a dissolution, which, whether it happens this year or next, cannot be long deferred, this reconciliation is plainly most desirable. The Nonconformists have now seen that their alliance is not only not courted by the Tories, but is declined by anticipation. Whoever gives them anything, the Tories will not. They know, moreover, that a real Tory success with the constituencies is, if not very probable, yet by no means off the cards. Whether the Tories fail or not in the next appeal to the country, it is tolerably certain that they will not fail in greatly diminishing the great Liberal majority. The apparent ill-success of Mr Gladstone's great Irish policy in conciliating Ireland, the alarm produced by the chronic troubles in France, and the still worse chronic troubles in Spain, above all, the fright which the great succession of strikes has given to every small tradesman and every small farmer in England, have all tended to diminish for a while the prestige of Liberal policy, and to carry a great many doubtful minds into the timid Conservative camp. If then the Dissenters really want a Liberal policy, this is not the time to desert their party. If they do, they may very well contrive to bring in a Conservative Government which, if it is prudent, will manage to rule the country for seven years to come. If the Dissenters desert Mr Gladstone at the next dissolution, they will not only not obtain from the Tories the Education and Church policy they desire, but they will obtain from them a very different policy indeed, and one vastly more hostile to their own interests than any policy which even their prepossession can ascribe to the present Government.

On the other hand we have always maintained that the Government on their part should do what they can to satisfy their Dissenting supporters that their political claims are regarded as claims of a very high kind, the neglect of which might fairly be resented on the part of a political body so active and strenuous for Liberal statesmen as they have been. The conduct of the Government, in relation to the Burial Bill, will give them some assurance of this. But they may fairly claim something more, and, in relation to the Education Act, it is only reasonable to grant something more. However small the scruple may seem to be, which the Dissenters have raised

on the subject of the 25th clause of that Act, it may be admitted at once that it is not the only cause of offence the Act has given them. Very naturally they hoped that the Education Act would do a great deal to destroy the caste-advantages which the Church enjoys in the country. And unquestionably, owing no doubt to the praiseworthy zeal of Churchmen and also to their great advantages over the Dissenters in wealth, it has not had that effect, but, in the country districts at least, the opposite effect. We do not say and do not think that the Government can fairly be blamed for this. But it must be admitted that it is a fair cause of disappointment to the Dissenters, and that they are therefore at least very excusable for criticising with more jealousy these minor provisions of the Education Act which tend in the same direction, and which are not of the essence of the Act, than they would be if the effect of the Act had not in country districts been distinctly favourable to the power of the Church. We say therefore that as regards the clause which enables School Boards to devote a (certainly not very large) proportion of the Education rate to paying the fees of pauper children in denominational schools,—a clause to which it is quite conceivable that a very scrupulously controversial conscience might feel serious moral objection,—there is a very strong *prima facie* case for relief. It is, as far as it goes, very much in the nature of a minute church and chapel rate; and a good deal of the money payable under this clause to denominational schools is exceedingly likely, considering the poverty of the Irish colonies in our great towns, to go to Roman Catholic schools, which are a special object of dread to Protestant consciences. Here then is a clear case for concession. The Government have promised a Bill to amend the Education Act, and we venture to express our hope that it will treat the Dissenters fairly if not generously; and will not take any account of the hostility likely to be created on the Tory side of the House. We do not think that the efficient education of the children should be sacrificed to any party exigencies, but there are no doubt, ways of satisfying the scrupulous Dissenting consciences, in which there would be no danger that the interests of the children would suffer. We are aware that the Dissenters also demand the extension of compulsion and of School Boards to all the rural districts. We are by no means clear that this is possible without creating a very great prejudice against education in the rural districts where the poverty is great and the dread of rates even greater. But however this may be—and on this point the Dissenters must be prepared to be reasonable, if they are satisfied on the other issues, more especially their own—we are quite sure that the Education Department could find more than one remedy for the grievance now contained in the twenty-fifth clause, and more than one remedy which would be perfectly satisfactory. And if it can be found, it should. It would be a very great misfortune to the country if the divisions among the Liberals prove to be so great at the next elections, that the Conservatives may gain the opportunity for which they are hoping to arrest the progress of society, and that gradual but steady inroad on mischievous traditions which has now gone on almost uninterruptedly for forty years. But Mr Disraeli's boast that he has got down to a class in the electorate which prefers old abuses to new remedies is probably not by any means an idle boast; and therefore it becomes all good Liberals to be on their guard and act with harmony as well as vigour.

THE GRAND TRUNK RAILWAY OF CANADA REORGANISATION SCHEME.

The directors of the Grand Trunk Railway Company of Canada have just adopted a novel scheme for raising new capital and placing the line in a proper condition. The company has had a most chequered history, and so many disappointments have followed on previous schemes, that the first disposition of the outside public is to be incredulous of any good being done. The present scheme, however, has only been accepted by the directors after a spontaneous expression of approval by the various bond and shareholders of the company, and for this and other reasons deserves some consideration as a remarkable scheme for restoring an unfortunate undertaking.

The last accounts of the Grand Trunk railway, it must be admitted, exhibit a rather hopeless position. A great railway company, with 1,400 miles of line, and a capital of nearly 22,000,000*l.*, is found to be yielding a revenue on only a portion of its debentures, which do not exceed altogether

about a third of the capital. The preference capital amounting to about 13,000,000*l.*, and the ordinary capital of 3,500,000*l.*, are entirely barren. The last annual account is, in brief, as follows:—

	2nd Half-Year, 1871.	1st Half-Year, 1872.	Total.
	£	£	£
Gross receipts	935,000	869,900	1,804,900
Working expenses	756,000*	692,000*	1,450,000
Proportion of working expenses to gross receipts	81 %	80 %	80½ %
Net revenue.....	180,000	175,000	355,000

* We include in this item the expenditure on renewals of way and "sundry" expenditure, which have been paid out of revenue.

The entire surplus of revenue for paying interest and dividends upon 22,000,000*l.* of capital was thus only 355,000*l.*, whereas the amount required on the bonds and preferences alone is upwards of 900,000*l.* The discredit of the company is therefore not surprising, nor the difficulty it must have in dealing with the various rights and interests of mortgagees and preference shareholders in raising new capital. The account also points to the secret of the difficulty. Although the net earning is so small, the gross receipts are close upon 2,000,000*l.* annually; and it is the heavy expenditure, amounting to 80 per cent. of the gross receipts, which is the cause of the barrenness of the capital invested in the line. In fact, the Grand Trunk Railway suffers from many faults incidental to poor lines, and from some peculiar to itself. As originally a broad gauge line, it fits in badly with the surrounding narrow gauge systems; its partial conversion to the narrow gauge creates a great difficulty in using the rolling stock, different sets of engines, carriages, and waggons being used for different portions of the line; a portion of the engines are also antiquated and wood-burning engines, whereas coal-consuming engines should alone be used; the permanent way requires constant renewal, and is especially defective in the rails not being of steel, which appears to be almost essential in the climate of Canada. Hence it is that the above traffic is earned at so formidable and exceptional a cost, even in America.

The discouragement of the position is more annoying to the shareholders for another reason. On the testimony of Mr Allport, it appears the above traffic might be immensely increased at once but for the awkward broad gauge of the company and its deficient rolling stock. The traffic cannot be dealt with because the company has not rolling stock of its own to carry it, while its unsuitable gauge prevents the rolling stock of adjacent railways from carrying forward the traffic which they bring to its junctions.

Such is the situation which the present scheme is devised to put an end to. Of course the essence of any such scheme is to raise money to cure the radical defects of the line which cause delay, obstruction, and expense, and render it unable to carry the traffic offered; and 2,000,000*l.* is the amount agreed to be required by the directors and all the authorities. The peculiarity of the present scheme is that, instead of raising money by a new pre-preference charge, which is the natural device, or by a complex arrangement with the preference shareholders, which was the principle of a scheme which the directors themselves had devised, it is simply proposed to raise the new capital by an issue of ordinary stock. Unfortunately for the other two expedients, which seem most natural at first, the discredit of the company is so great, and the surplus revenue so small, that the capital which seeks a secured interest would have been with difficulty attracted, and they did not address themselves at all to the capital which goes into a progressive but speculative investment. The present scheme addresses itself to the latter class of capitalists. And though at first the speculation seems so bad that nothing could be extracted even from these capitalists, there is no doubt that a promising speculation is put before them. It has been necessary to propose the issue of ordinary stock at an enormous discount, viz., 80 per cent., for, when the scheme was started, the ordinary stock was about 20 or under. This will require the issue of 10,000,000*l.* additional ordinary stock, increasing it from 3,500,000*l.* to 13,500,000*l.*, but even with this great inflation, an account is presented, by which a hope is held out of almost immediate dividends on the ordinary stock. The only new condition is that the interest on the preferences should be temporarily reduced about 1 per cent. until the ordinary stock has paid 1 per cent.; and subject to this deduction the capital and

interest charge, under the new arrangement, will be as follows:—

	Capital. £	Interest Charge. £
Debenture stock.....	5,600,000	280,000
Preference stock—		
First preference 5 %	£3,200,000	160,500
Second ditto, ditto.....	2,325,000	116,260
Third ditto, 4 %	7,165,000—12,700,000	286,600
	18,300,000	843,360
Open stock	13,500,000	

The total interest charge is no doubt more than double the above surplus of net revenue which has yet been earned, but the whole object of the change is to reduce the cost of working, and it is maintained that when the proposed improvements are carried out, the working expenses will be reduced from about 80 to about 60 per cent., which is nearer the average of first-class American lines, and that in this way the above interest charge will be about covered with the present traffic. Forty per cent. of a gross receipt of 2,000,000*l.*, which is the current annual traffic, will be exactly 800,000*l.* From this starting point it is farther argued the prospect of an ordinary shareholder in a railway whose traffic increases rapidly must be a good one; and it is even maintained that as so much traffic offering is now refused, the gross receipts will soon be 3,000,000*l.* instead of 2,000,000*l.*, and 3 per cent. dividends on the ordinary stock will be paid.

Whether the expectations thus held out may not be too sanguine, it must at least be admitted that a plausible case is held out for the speculative capitalist, who is likely to take ordinary stock at a low price. The immediate expenditure of 2,000,000*l.* of money in the permanent improvements of a property in bad order ought certainly to produce a saving in working much greater than a moderate interest on the capital expended, so that the net revenue to pay the debentures and preferences ought to be greatly increased. Possibly the working expenses may not be quite reducible to 60 per cent., but they should be reducible to near that figure. As regards the immediate increase of traffic again, that is a point on which the speculative capitalist, who is accustomed to these matters, may fairly judge. Mr Allport's testimony is very strong, and we are ourselves disposed to believe that an immediate and large accession of traffic is probable in the first year after all the projected improvements have been carried out. But whatever doubts there may be as to the speculation on this head, the past history of the line proves that the traffic is very progressive. Between 1863 and 1872 the freight and passenger receipts have almost exactly doubled, and the experience is all the more likely to be repeated, because it is not abnormal in the history of railways on the American continent, and would not be extravagant even in older countries. After the new scheme is carried out we should certainly be inclined to say that the ordinary stock of the Grand Trunk Railway of Canada will compare very favourably with the ordinary stock of a line like the London, Chatham, and Dover, which does not yet pay all the preference interest. No doubt the ordinary stock is being greatly watered, but at 13,500,000*l.*, which will be its total amount; its proportion to the traffic and net earnings, as the author of the scheme maintains, will be nearly fifty per cent. less than the proportion of the London, Chatham, and Dover ordinary stock to the traffic and earnings of that line. The case of the new scheme is thus to all appearance without a flaw, and as its success seems hardly doubtful, its author may already have the credit of giving life to a large amount of dead capital and placing it in a flourishing position.

BANK OF PRUSSIA.

REPORT OF THE PREUSSISCHE BANK FOR 1872.

We are glad to be able to present as a translation from the *Berlin Börsen Zeitung* of the 22nd March inst. the following full abstract of the official report of the Bank of Prussia for the year 1872:—

The business results obtained in 1872 by the Preussische Bank may, on the whole, be described as satisfactory. The industrial branches have of course had to suffer severely under the enormous rise in the prices of some of the raw materials, especially of coal and iron, and under the tension prevailing in the labour market. This however has been no hindrance to a further development of business in general, and that the transactions must also have been of a profitable nature is best shown by the fact of a number of new establishments having been started, while those already existing have been considerably enlarged. It was not to be expected that under the excitement following the re-

cent removal of the fetters which hitherto confined the concession-laws there would not be throughout also a goodly number of fraudulent concerns, to which the "Preussische Bank" could not extend and has not extended any support. On the whole, however, business has remained on firm ground. Suspensions of payment of any moment have scarcely occurred at all, and the Bank has had no losses whatever.

The total of the Bank's transactions in 1872 amounts to 5,991 million thalers, and including the Bank's offices in the Provinces and other branches to 9,284 million thalers, i. e., 2,012 and 2,918 millions respectively more than in 1871.

The rate of interest was in the beginning of the year 4 per cent. for bills, and 5 per cent. for loans on security—on the 16th September it had to be raised to 5 and 6 per cent. respectively, and only in the course of the present year was it possible to reduce it again to the normal figure. For the whole year the average rate was,—discounts, 4.29 per cent.; loan-rate, 5.29 per cent.

Of Banknotes there were in circulation on an average 253½ million thalers (38,000,000*l.*), about 7,550,000*l.* more than in the previous year. They were covered on an average for the whole year by a stock of bullion in the proportion of 68.28 per cent.

The reserve fund has remained unaltered, at 6,000,000 th (900,000*l.*). Of bills, there were bought or collected (cash) 1,791,606, representing an amount of above 1,327½ million thalers (199,125,000*l.*)—344,190 more as to number, and 66,900,000*l.* more as to amount than in 1871. The whole profit of the bill business amounted to 1,606,803 thalers (241,020*l.*) more than in 1871.

New loans on security were made for 275,000,000 thalers (41,250,000*l.*), or 12,900,000 thalers more than in 1871; at the end of 1872 there were outstanding 5,078 loans of above 31½ million thalers (4,750,000*l.*). The interest derived from that business amounted to 17,400*l.* more than in the previous year. The average investment in bills and loans amounted to 154,567,000 thalers (23,185,000*l.*), i. e., 5,700,000*l.* more than in 1871.

On the stock of precious metals in bars and coins available on the 31st December 1872, viz.: thalers 46,404,702 (6,960,400*l.*), 71,174 thalers (10,670*l.*) had to be written off, the value of the silver having still further decreased.

The stock of securities on hand was sold in the beginning of 1872 at a profit of 13,634 thalers (2,045*l.*). In 1871 the profit on securities sold amounted to 1,064,795 thalers, and that on interest 383,332 thalers, amounting therefore to 1,434,493 thalers (215,170*l.*) more than in 1872.

	Thalers.	£
The gross profit for 1872 amounts to.....	7,066,188	(1,059,930)
From which there is to be deducted:—		
For expenses of management	1,101,415	
For interest on deposits	623,148	
For cost of banknotes	50,183	
For loss on silver	71,174	
For the Bank's quota of interest on the loan of 1856	621,910	
	2,467,826	

Leaving a profit of..... 4,598,362 (689,740)

	Thalers.	£
Of this sum there have been paid or placed in reserve:—		
The interest on the State's quota of capital.....	66,533	
The interest on the proprietor's quota of capital...	900,000	
For the new head office	100,000	
Less reserved for doubtful items of bills to be cashed	13,566	
	66,433	
	1,032,967	

Leaving a net profit of..... 3,545,394 (531,810) of which half falls to the lot of the State and the other half, together with 1,755 thalers undivided profit of the last year, in all 1,774,452 thalers (366,170*l.*), to the proprietors.

These latter receive therefore for every share of 1,000 thalers, besides the dividend of 45 thalers paid for the first and second half-year, a surplus dividend of 88 thalers 10 sgr., or in all 13½ per cent. (against 12½ per cent. in 1871), 7,786 thalers being carried forward to new account. The State receives in all 2,461,140 thalers (369,170*l.*).

BUSINESS NOTES.

ATLANTIC TELEGRAPHS AMALGAMATION.—One of the most remarkable schemes which has for a long time been submitted to the public is that of the Consolidated Atlantic Telegraphs Company whose prospectus has just been issued. It contains a scheme for amalgamating the various Atlantic Telegraph lines, and the ideas embodied appear to be sound, as well as novel in their application to submarine cable property, however much, as we fear, the scheme may be mixed up with gigantic Stock Exchange speculations. The proposal simply is to work the existing Atlantic Cable companies as one concern, the shares of the new company, which is to have a nominal capital of 8,000,000*l.* altogether, being given in exchange in certain proportions for the shares and stocks of the old companies, and the new Consolidated Company assuming the debentures of the various companies which it absorbs. The principal novelty is that the shares to be issued are to be in a divided form—one-half preference shares bearing 6 per cent. interest, and the other half ordinary shares on which, after paying the preferences, the existing net revenues of the three companies, will be sufficient to pay 9 per cent., leaving a surplus of 45,000*l.* to be added annually to the renewal fund, which already amounts to a quarter of a million. There is no doubt that such an arrangement of capital is a most beneficial one for shareholders,—the debent-

tures, which are the first charge, offering a first-class security and attracting one set of capitalists, the preferences which pay a rather better interest attracting another set, and finally the ordinary shares, which take all the risk of the business, attracting the more speculative capitalist, who likes them all the better because of their small amount. It is a well-known fact that the division of ordinary railway shares into preferred and deferred increases the aggregate value of the stock, and the same result must follow in the case of submarine cable property. In the latter case amalgamation appears essential to success, the amalgamation increasing immensely the security of all the first charges, and insuring to the ordinary shareholder that his property will always be dividend-earning. This last is a most important point in deep-sea cable enterprise, where the experience has been, that although the cables can be repaired, yet that the work takes time, and the danger of the business with one cable alone is enormous. But when amalgamation and the division of capital are combined, as in the present scheme, there is no doubt that they justify a great enhancement of the market value of the property, even to the extent, we think, of 30 per cent. on existing values, which appears to be the improvement aimed at by the promoters of the scheme in their suggestion to give 200/nominal capital of the new company, in exchange for 100/ Anglo-American stock, the steady market value of which before the scheme got wind was about 150/. The other cable companies are of course to receive in proportion. Naturally the scheme meets with opposition, the very fact that it is done over the heads of the directors arousing hostility; but on such a point it is manifest that the directors are the natural enemies and not the friends of the shareholders, because consolidation means the extinction of the occupation and fees of all who are superseded. If the directors had consulted the shareholders' interests they would have amalgamated long ago, without contesting too keenly the question of respective values, which is the rock on which directors as a rule are but too ready to wreck all schemes of amalgamation. At present, for instance, a great deal is said about the late accident to the 1865 Atlantic Cable, as increasing relatively the value of the French Cable property, but the accident does not alter the real position of the companies, and is really an incentive to amalgamation from its demonstration of the risks of one or two cables only. Submarine cable shareholders would be very foolish to let an opportunity like the present pass them because their directors profess that they cannot come to terms about the comparative merits of their properties.

THE NEW GERMAN COINAGE BILL.—We receive the following remarks from an able correspondent with reference to our recent article on the German coinage. The point is of importance, and our correspondent's explanation of a matter where we have been misled will be interesting:—

Inasmuch as 1,395 marks are the product of a German pfund (= $\frac{1}{2}$ kilog.) of fine gold—the corresponding product of the same weight of fine silver (in the accepted ratio of $15\frac{1}{2}$ —1) would be 90 marks
 $15\frac{1}{2} : 1 :: 1,395 : 90.$

But, as correctly quoted, that ninetieth of the lb of fine, heretofore one-third of a thaler, is to be reduced by one-tenth, for, as the law says:—

“The pound of fine silver shall be made into one hundred mark pieces.”

The seignorage of German silver coin will obviously be greater therefore than in our own.

	Grains
Our shilling contains.....	80 $\frac{1}{4}$
The mark, which is approximating $\frac{1}{10}$ of £ s $\frac{1}{2}$, should, by that ratio, contain.....	77 $\frac{1}{2}$
Whereas the actual content of the mark will be only.....	77.16

In these circumstances it seems not merely reasonable, but necessary, that the several proprietary mints of Germany should be restrained from flooding that empire with token coinage otherwise than in equitable proportion *inter se*. If 10 marks per head of the population be found inadequate, there will be no difficulty in increasing the amount, but always *per capitem*, unless the issuing power be centralised as in our own case.

If, as there is reason to believe, not only Germany, but Holland and other countries, have been for some time collecting gold in preparation for the revolution in monetary standards, long foreseen, the process will not involve any formidable difficulty.

The State will continue to receive silver coinage for a reasonable time after it shall have been demonetised for private commerce, and the profit of its recoinage after abstraction of the 10 per cent. shown above, will be a set-off against depreciation by fair wear and tear, or by want of markets for silver bars in remote countries, rapidly developing demands for coinage too small for representation by gold.

THE PUBLICATION OF THE BANK RETURN.—We are glad to see that the Bank of England authorities have at length

made a change in the time of publishing the weekly bank returns which we urged upon them several months ago. Instead of merely sending the return to the Stamp Office on the Thursday afternoon, so that its contents could not be generally known in the City until after business hours, it has now been arranged to exhibit a duplicate on the Bank premises as soon as the copy is forwarded to the Stamp Office, while another duplicate will be posted on the Stock Exchange. The convenience to business men will be very great. At present there are many transactions in the dark on Thursday afternoon, because bankers and discount houses as well as the general public are ignorant of the figures of the return upon which the Bank Court have acted in fixing the rate. The information is often most valuable in interpreting the action of the Bank, and the Bank authorities are to be congratulated on having at last conformed to a wish very generally expressed.

AMERICAN RAILWAY BONDS.—Investors in American railway bonds should be on their guard at the present moment respecting the security of the bonds offered them. There is no doubt that a certain class of these bonds offer almost the best possible security. The first mortgage bonds of the leading railways, which have immense surpluses for dividend after paying their preference and debenture charges, are as good securities to lend upon as the best debentures of English railways. Americans say that even in the worst days of Erie misrule the debenture interest was always paid, and that is a crucial instance. We fear that there may be some room for misgiving on the point, as the mischief of the Erie scandal lay in the demonstration of the weakness of an appeal to law, and it is clear that misconduct may be so directed as to injure debenture holders as well as others interested in railway property. But, practically, the bondholders of good American railways have been thoroughly well secured, and have not lost their money, and the best secured have been the holders of the first mortgage bonds. The practical point which investors should now attend to, however, is to see that the bonds offered to them are really first mortgage bonds of good lines. There is another class of bonds in the market having a superficial resemblance to them, but really affording a different security. A great railway company, say, offers the first mortgage bonds of a particular section of its line, but this is a very different thing from the first mortgage bonds of the company itself. Often the section on which the mortgage bonds are offered is only in course of construction. No doubt the principal company which indorses the bonds is in some way bound for the money, but the investor should clearly understand that the so-called first mortgage bond does not give him a first mortgage over the property of the big company whose name is prominently put forward, but a security of a much inferior nature. We do not say the security really offered may not sometimes be fairly good, but the investor should understand very clearly what he is doing. If he wants to invest in the first mortgage bonds of a good American railway, he should be most particular in ascertaining that he gets them.

BUSINESS PROFITS AND THE PRICE OF COAL.—A curious instance of the disturbance of business arrangements by the rise in the price of coal is given by the *Oldham Chronicle*. Nothing is more natural than to suppose that the rise in coal would seriously affect manufacturers' profits; but this is not so in all cases, and has not uniformly been the case in Lancashire. The above journal says:—

A question which affects a large class of our townspeople is pressing forward for solution. We refer to the question of leases of mill premises to tenants upon the “room and turning principle.” A large number of such leases exists in Oldham, where the arrangement was entered into between millowners on the one hand and owners of cotton-spinning machinery on the other, at a time when engine coal was sold at about one-third of the present price. Neither the landlord, as the millowner may be termed, nor his tenant had any idea when the contract was entered into that the price of coal would reach the price it has done, and so serious is the item in a large factory that, as compared with its cost a few years ago, the year's item of coal alone shows a difference on the balance sheet of some thousand pounds. The question therefore arises, for what length of time can the millowner afford to face this difficulty—how long, in fact, can he hold out before he finds himself a ruined man? A sliding scale of leases is much spoken about at the present moment, and whilst that would put the landlord in a true position as regarded the cost of supplying power, it would also render the lease a less speculative undertaking on the part of the tenant. In some few instances tenants have voluntarily advanced their rents as much as 10 per cent., whilst others in the same building have held out for the stern letter of the contract.

But singular as this experience may seem, it ought not to be surprising to any who are acquainted with the ramifications of

business. In almost all trades there are intermediaries who are affected most seriously by a rise in the price of raw material, and it is this loss of individual profit which is often the most serious consequence of a rise of price. The existence of these intermediaries is also one of the reasons why the price of the manufactured article frequently rises much more slowly than the price of the raw material, so that the ultimate consumer does not always suffer so much from a rise of price as may be supposed.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending March 22 :—

	Receipts of Week Ending March 22. £
Customs	419,000
Excise	543,000
Stamps	200,000
Taxes	56,000
Income tax	181,000
Post Office	190,000
Telegraphs	170,000
Crown lands	15,000
Miscellaneous	104,647

Total 1,878,647

The total receipts of the previous week were 2,901,814.

The Exchequer issues of the week on account of expenditure were 945,639, viz. :—

	£
Interest of debt	300,000
Other charges on Consolidated fund	925
Supply services (including Telegraph services)	644,714
	945,639

During the week the cash balances have increased as follows :—

	Bank of England. £	Bank of Ireland. £	Total. £
Balances on Mar. 15	10,796,935	1,417,513	12,214,448
— 22	11,504,869	1,642,253	13,147,122
Increase	707,934	224,740	932,674

Foreign Correspondence.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

BERLIN, March 26.

It is very difficult to predict with any degree of probability what the more immediate influence will be on financial and political affairs of the Evacuation Convention, concluded on the 15th inst. The general, political, and military combinations of the respective governments may have remained unaltered in France as well as in Germany. Although it would be natural that the French Radicals should feel at liberty to renounce their reserve, hitherto recommended by the presence of a foreign army on French soil, in opposing the constitutional policy of the President, yet the German opinion is that the position of M. Thiers and the prospects of French republicanism have been gaining a considerable degree of strength in the eyes of all those that consider financial prestige a main stronghold of modern Governments. In Germany the anticipation, after the conclusion of the peace, was, that the French would not recover so soon from their military disasters as to pay the war money under the terms originally agreed to. Now that the payment of of the whole sum is to be accomplished prior to the final period fixed by the first treaty, it is believed that the French have not been too heavily taxed, nor materially weakened in their general political power, by the war contribution. At least, it appears that there will be no financial impossibility on their side in the way of seizing on any future opportunity for regaining their military prestige. The practical result, arising from this popular belief, will be an acceleration in carrying out the measures for defence by the reconstruction of the German fortresses. In former times the Prussian Government was charged with a tendency to exaggerate the items of the military budget. Nowhere was dissatisfaction, proceeding from such charges, and directed against the Prussian administration, so widely spread as in Southern Germany. At present, however, quite the contrary feeling is gaining ground amongst the populations of Bavaria and Wurtemberg. Instead of resting satisfied with what has been considered a sufficiently effective accumulation of defensive means against foreign aggression,

the Bavarian Government strongly insists upon a federal reconstruction of the Ingolstadt fortifications. The Prussian military authorities did not contemplate any probability of warfare on the banks of the Danube; Metz and Stratsburg appearing to them strong enough to protect Southern Germany from invasion. Political considerations however have led the Imperial authorities to appropriate large sums (about four million thalers) in compliance with the Bavarian demand. The same feeling amongst the Wurtembergers has been expressed in a resolution of their First Chamber, asking for a better protection of the South-Western regions of Germany. And even the discussions that have of late been raised by the Left section of the Italian Second Chamber, more especially by M. Nicotera's motion for an increase of the military budget, are by some Berlin politicians attributed to a fear that the evacuation of French territory might tempt M. Thiers to offer his assistance to the Pope. At all events, there is much ground for assuming that M. Thiers' Government would become remarkably strong in its foreign policy, if it should succeed in winning over the Ultramontane party to Republican views. As to Germany, no one can deny, that as yet the French war money has not exercised any degree of demoralising influence whatever on the public mind. As that money is flowing directly to the Federal treasury, and perhaps also partially to that of single states, there is as a rule no reimbursement for individual war losses. How much money for war purposes has been raised by local taxation and extraordinary contributions cannot be estimated with any degree of certainty. Those individual losses, however, by no means trifling, have not been repaired by the sudden rise of industry and trade in 1872. The middle classes at large are suffering from the depreciation of money in consequence of the war, and of the tremendous advance in the price of all the necessaries of life. This calamity is now most directly pressing on people living on a fixed income, and on Government officials more especially. Berlin prices have, since the termination of the war, been increasing with an unparalled rapidity.

As to the financial side of the Evacuation Treaty, it is important to draw your particular attention to a speech, delivered by M. Bamberger on the 2nd March in the Imperial Parliament. His predictions are deserving of being noticed, not only because of the speaker's well-known sagacity, but also on account of the practical warning they give to the Imperial Government, and at the same time also to the Bourse. The conclusion arrived at by M. Bamberger is, that the sudden dislocation of huge sums of French capital, and their, so to speak, violent transfer to Germany, could not possibly be effected without causing the most serious disturbances to the money market on the more prominent trade centres of Germany.

FRANCE.

(FROM OUR OWN CORRESPONDENT.)

PARIS, March 27.

The returns of the Bank of France for this week, last week, and for the corresponding week of last year, are as follow :—

	DEBTOR.		
	March 27, 1873.	March 20, 1873.	March 23, 1872.

Sundries.....	62,345,337	54	53,247,911	94	11,506,379	61
Total	3,382,147,237	23	3,354,436,282	29	3,093,240,980	99

The above return, compared with that of the preceding week exhibits the following changes:—

	INCREASE.	francs.
Treasury account.....		30,057,881
Cash.....		4,172,212
	DECREASE.	francs.
Circulation.....		19,800,970
Private deposits.....		13,032,806
Trade discounts.....		14,860,331

The discounts, as is usual at this period of the year, continue to decrease, and have already diminished by 200 millions since the month of January. The amount is still large compared with former years, and is 300 millions higher than the corresponding period of 1872. The reason for this extension is that, from the large investments of the banks in the loan, less capital, is left free for discount operations, which are now almost centralised at the Bank of France. The enlarged speculative business on the Bourse has also led to more of the money available for short loans, being lent for continuations which return a larger profit than the ordinary discount affairs. The larger interest allowed on Treasury bonds has helped to add a sum of thirty millions to the Government account, of which the increase of four millions in the cash no doubt forms part, the usual purchasers of those bonds belonging to the same provident class in whose hands the hoards of specie are held. The result of the various changes has been to reduce the circulation by nearly twenty millions. The other chapters remain unvaried, excepting the sundries on the creditor side, which have again increased by about two millions.

The Bourse has been very quiet during the week, the rates for the Government stocks varying only by a few centimes from day to day. Prices have, however, been maintained. Of the foreign funds Turkish show the greatest firmness, the knowledge that a new loan is being negotiated not producing any unfavourable effect. Italian, after recovering at the close of the week, have since relapsed. Spanish continue to decline, the Exterior being quoted to-day at 23, and the loan at 22 5-16ths. Mobilier and Banque de Paris have again improved, and the best railway shares command higher rates. The advance on Bank of France shares has not been maintained. Suez Canal shares have been in demand at better rates. Subjoined are to-day's prices for the account:—

	March 20.		March 27.

The preamble of the Budget of 1874 has now been printed and distributed to the Assembly, and permits a more complete account of M. Leon Say's financial plan than I was able to give last week. The credits for 1873, as voted, amounted to 2,374½ millions, to which a supplement of 10 millions for the

Ministry of War, was added in December last, making a total of 2,384½ millions. The amount fixed for 1874 is 2,523½ millions, or an increase of 133½ millions. This augmentation is due to additions of 57 millions in the interest of the public debt, 24 millions for pensions and the annuities voted for indemnities arising out of the war and insurrection, 35 millions to increase the various Ministerial services, and 22½ millions for the cost of the volunteers for one year in the army. With this latter sum the credits for the Ministry of War will be 39 millions higher than in 1873, and will amount to 480 millions. All the Ministerial departments show an augmentation with the exception of that of justice, which is reduced by 30,000f. As mentioned last week the Budget of 1873 shows on paper a surplus of 93 millions being the estimated yield of the tax on raw material, which could be left uncollected in 1873 without leaving a deficit in the estimates. This nominal surplus of 93 millions is, however, reduced to 83 millions by the supplementary credit of 10 millions for the Ministry of War above referred to. The Minister of Finance has consequently to create resources to provide for the difference between the surplus of 83 millions and the 138 millions now required. The Minister proposes to obtain an amalgamation amounting to 73½ millions in the different chapters of receipts; against that sum is, however set-off the 13½ millions of the war contribution levied on the insurgent Algerian tribes by which the Budget of 1873 profited, and which has not to be received this year; and a reduction of a million and a quarter on the estimated yield of the State forests, thus reducing the 73½ millions of new taxes to 58½ millions; and which sum, after balancing the receipts and expenditure, will leave a surplus of about three millions—the exact amount of the residue is 2,563,787f. The Budgets of the two years, if compared, are as follows:—

	1874.	1873.
	francs.	francs.
Receipts.....	2,526,020,199	2,467,470,630
Expenditure.....	2,523,456,412	2,384,739,894
Surplus.....	2,563,787	82,730,736

This means that if the duty on raw material were collected in 1873, the result would be a surplus of nearly 83 millions, and that if not collected the Budget will leave a deficit of 10 millions; while in 1874, the duty on raw materials being again set down as resources the result will be in the two eventualities, either a surplus of 3 millions or a deficit of 90 millions. The Minister has no doubt acted regularly in counting that duty as income, as it has been voted by the Assembly, and until the law is abrogated he is not bound to propose any substitute for it. He especially calls attention to the fact that all the resources voted are absorbed by the Budget, and that if the law is not put in execution, some other tax which would be very difficult to find, must be put in its place. As the Minister of Finance cannot but have conceived the possibility of the Chamber reversing its former vote, it would be interesting to know by what means he intends to fill up the void left by the abolition of the duty, as it is permitted to suppose that he is prepared for such a contingency. For this reason it is desirable that the question of the duty on raw materials should be decided without delay.

Of the new revenue proposed, the largest amount is to be obtained from the direct taxes; the increase of 17 centimes per franc in the Foncier tax is estimated to produce 29 millions; the 13 centimes in the Mobilier tax, 6 millions; and the 13 on doors and windows, 4½ millions. On the other hand, the reduction in the patente, or trade licences, will deprive the Treasury of about 7 millions. This sacrifice had become inevitable for the augmentation of six-tenths last year had formed so heavy a burden on the trading classes that the receivers of taxes met with great difficulty in collecting it, and applications for time to pay have been made in great numbers. This tax, after the reduction is made, will still yield about one hundred millions. A sum of 20 millions is to be obtained under the general heading of "Divers resources," of which the only information given is that the sum comprises 5½ millions transferred from the chapter of registration dues. The tax of three per cent. on the interests and dividends of stocks and shares is also estimated to produce 28 millions in place of 24 in 1873, and an instalment of 4,700,000f due from the Algerian Company is set down as a special resource. The indirect revenue for 1874 is estimated at 1,899,220,000f, which is about half a million less than in 1873; some modifications have however been introduced into the various items by which the total is made up; stamps and registration are increased by 21 millions, and Customs by 2½ millions, while a reduction of 10 millions is made in potable liquors, the measures adopted for the repression of frauds, by which the tax was expected to yield a large increase, not having produced all the good effects anticipated; the estimate of the duty on native sugar has been reduced by 7 millions, a sufficient allowance not having been made for the diminution in the consumption by the loss of territory, and the estimated revenue from the Post Office is diminished by 6 millions.

A special chapter in the preamble is devoted to the situation of the floating debt; this account amounts to 707 millions arising from deficits in the budgets of former years, and to which has to be added the deficit in that of 1872, which the minister believes will eventually prove to not exceed 140 millions; the floating debt will also have some day to be further increased by the difference between the resources and the requirements of the budget of liquidation, which at present shows a deficit of 140 millions. The total will consequently amount to nearly a milliard; such an uncovered debt the minister does not think excessive, as the amount was reached formerly when the budget was much less considerable than at present; and with the greater movement of funds resulting from the increased income, and the augmentation in the number of rente-holders from 1,200,000 to 3,700,000 since the issue of the last loans, the resources of the floating debt may be more easily maintained at a milliard than it formerly was at 600 or 800 millions. Two of the funds by which the requirements of this debt were chiefly supplied have, at this moment, become reduced to a very small amount; those are the deposits in the Savings Banks and those with the Treasury on interest-bearing bonds. The amount held by the Savings' Banks has fallen since 1870 from 200 millions to an insignificant sum, and the Treasury bonds, of which the limit is fixed at 400 millions, have descended as low as 127 millions. This account will no doubt enlarge as the advances on the loan become paid up, and under the influence of the increased interest allowed, in the mean time the Treasury employs in its place the assets belonging to the Liquidation fund, of which the Government hold a balance of 220 millions unemployed.

The details which the Minister of Finance gives relative to the loan of three milliards have now only an historical interest, for although this is the first official statement of the precise results of the loan, most of the facts given had become known through various channels. The exact shares of the loan taken by the different countries is however worth giving even at the risk of repeating information already published. The sum of Rente applied for was 2,592 millions, of which France demanded 1,051 millions, Germany 471, Belgium 396, England 334, Alsace-Lorraine 88, Holland 83, Denmark 34, Turkey 33, Switzerland 32, Italy 31, Austria 30, Roumania 6, and Asia 2 millions.

Referring to the Budgets of past years, the Minister announces that the definitive accounts for 1869 are now in the press, and will show an effective surplus of 58 millions of francs. Those of 1870 and 1871 are still very incomplete, but a rough estimate may already be formed, that of the extraordinary credits opened to cover the costs of the war and the insurrections, the former year will leave disposable a sum of 234 millions, and the latter of 127 millions. Those three sums form the principal resources of the liquidation fund.

Just a year ago I informed you that a banker's clearing-house had been formed in Paris. It originally comprised 18 firms, but, from a list now published, the number appears to have become reduced to 14, including the Comptoir d'Escompte, Credit Foncier, Societe Generale, Societe de Deposits, Credit Lyonnais, &c. It commenced its operations on the 7th March, 1872, and a return just issued shows that, during the year ending the 10th inst., the accounts balanced by it amounted to a sum of 1,629 millions of francs; the sum of the clearings ranged from 253 millions in the month of August to 92 millions in December. This result is no doubt insignificant compared with the immense sums that pass through the London Clearing-house, but it is a forecast of the importance those transactions might attain if the use of cheques became more general, and if traders adopted more generally the practice of making their acceptances payable at banking-houses.

The Tribunal of Correctional Police gave judgment to-day in the affair of the Transcontinental railway frauds, condemning General Fremont, Probst, and Auffermann, none of whom are in custody, each to five years' imprisonment; Lissignol (engineer), to two years and 3,000f fine; Crampon (journalist), to four years and 3,000f fine; Gaudrée Boileau (Consul-General), to three years' imprisonment; and Poupinel (journalist), to one year and 3,000f fine. The 50,000f deposited by Probst is sequestered.

The Italian Credit Mobilier Society has held its annual meeting, in which a report was read showing that the profits for the year amounted to 11,666,225f. A dividend of 70f per share was declared, in addition to the 6 per cent. interest already paid on the capital of 400f per share, and making for the year 94f, or 23½ per cent.

The Western of France railway has fixed its dividends for 1872 at 35f, on which 17f 50c was paid in October last.

The Credit Lyonnais will propose at its annual meeting a dividend of 25f for the year 1872.

The following are the latest quotations of the produce markets at Havre, per 50 kilos (1 cwt), duty paid:—

Wool.—Buenos Ayres, unwashed, 182f 50c to 200f; Levant, 175f per 100 kilos.

Tallow.—Ox, 50f 87½c; sheep, 49f 75c.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.
BANK OF ENGLAND

AN ACCOUNT pursuant to the Act 14th and 15th Victoria, cap. 32, for the week ending on Wednesday, the 26th day of March, 1873.

ISSUE DEPARTMENT.	
Notes issued.....	£37,879,120
Government debt.....	£11,015,100
Other securities	3,984,900
Gold coin and bullion	22,879,120
Silver bullion
	37,879,120

BANKING DEPARTMENT.	
Proprietors' capital ...	£14,553,000
Rest	3,787,578
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts...	16,729,878
Other deposits	18,758,251
Seven-day and other bills	341,738
	54,170,445

Dated March 27, 1873. FRANK MAY, Deputy-Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

LIABILITIES.	£	ASSETS.	£
Circulation (including Bank post bills).....	25,533,058	Securities	40,922,393
Public deposits.....	16,729,878	Coin and bullion	23,886,372
Private deposits	18,758,251		
	61,021,187		64,808,765

The balance of Assets above Liabilities being 3,787,578f, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.	Decrease.
	£	£
Circulation (excluding Bank Post Bills)	578,255	...
Public deposits	391,290	...
Other deposits	72,051	...
Government securities
Other securities.....	1,950,738	...
Bullion	944,846
Rest.....	18,606	...
Reserve	1,523,101

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending March 26, 1873.	Week ending March 19, 1873.	Week ending March 27, 1872.
Thursday	£17,536,000	£14,583,000	£15,484,000
Friday	16,399,000	47,027,000	15,232,000
Saturday	15,337,000	22,377,000	14,639,000
Monday.....	16,552,000	17,738,000	13,871,000
Tuesday	16,071,000	15,479,000	16,083,000
Wednesday	14,652,900	16,962,000	47,638,000
Total	96,749,000	134,166,000	122,947,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, March 27, 1873.

The following shows the amount of the Circulation, Bullion in both departments, Banking Deposits, Banking Securities, Reserve, and Rate of Discount, for three months ending 26th March, 1873:—

Date.	Circulation, excluding Bank Post Bills.	Coin and Bullion.	Deposits.	Securities in Banking Department	Reserve.	Rate of Discount
	£	£	£	£	£	%
Dec. 18	24,267,725	23,944,402	27,685,479	31,239,678	14,576,767	5
24	25,040,090	23,606,867	27,400,353	31,967,369	13,626,777	—

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week.	March 25, 1863.	March 30, 1870.	March 29, 1871.	March 27, 1872.	March 26, 1873.
Circulation, excluding bank post bills	£ 20,136,276	£ 22,763,700	£ 23,373,115	£ 25,285,705	£ 25,101,320
Public deposits	10,364,471	11,293,341	11,863,950	14,382,944	16,729,578
Other deposits	12,742,282	17,162,332	19,164,165	20,501,349	19,758,251
Government securities	11,293,864	12,832,460	12,939,100	13,963,444	13,365,532
Other securities	20,505,474	21,104,347	22,954,785	27,038,245	27,109,861
Reserve of notes & coin	10,081,244	13,112,401	13,984,849	12,540,824	13,695,052
Coin and bullion	15,025,274	20,866,161	22,358,064	22,835,529	23,896,372
Bank rate of discount	4 %	3 %	3 %	3 %	4 %
Price of Consols	92½	93½	92½	93½	92½
Average price of wheat	45s 0d	42s 6d	55s 2d	54s 6d	55s 3d
Exchange on Paris (short)	25 20 25	25 20 27½	25 30 50	25 20 30	25 40 50
— Amsterdam ditto	11 16 16½	11 18½ 19	11 19½ 13 0½	11 19½ 13 0½	12 1 2
— Hamburg (3 months)	13 7½ 8	13 10½ 10½	13 11 11½	13 9½ 10	2053
Clearing-house returns	79,601,000	69,443,000	122,947,000	96,749,000

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1863, a deficiency of 7,763,192*l*; in 1870, a deficiency of 3,942,015*l*; in 1871, a deficiency of 3,790,620*l*; and in 1872, a deficiency of 6,536,897*l*. In 1873, there is a deficiency of 8,351,610*l*.

In 1863, there was little of an interesting character on the Stock Exchange. The only stocks which appeared to be in abnormal demand were Turkish Consolides. Money was easy at 4 per cent.

In 1870, the state of the money market promised a further decline in the rates, trade was quiet, and the demand but moderate. Beyond requirements for the promotion of new undertakings the stock market showed little activity. There were rumours of a new Egyptian Loan and one for Spain if it could be launched on such securities as that country had left to offer.

In 1871, money continued to be abundant, and gold was sent to the Bank in large quantities. French securities continued to decline and the foreign market generally was depressed from the knowledge of the necessitous condition of many States. A new Argentine Loan was introduced for 6,000,000*l* at 6 per cent.

In 1872, the Easter holidays coming at the end of the month close on quarter day caused a strong demand for money to meet engagements in advance. Rates however did not advance, as the pressure was regarded as merely temporary.

The account of the Bank of France for the week ending March 27 shows the following changes :—

	March 27.	March 20.	Increase.	Decrease.
ASSETS.				
Cash	£ 32,122,000	£ 31,955,000	167,000	...
Private securities	41,597,000	42,229,000	...	632,000
Treasury bonds	49,122,000	49,122,000
LIABILITIES.				
Notes in circulation	109,773,000	110,572,000	...	799,000
Government deposits	8,668,000	5,466,000	1,202,000	...
Private deposits	8,568,000	9,070,000	...	502,000

The following are the principal items in the accounts of the undermentioned continental Banks for the latest week published compared with the previous statement* :—

PRUSSIAN BANK—Week ending March 22.				
	March 22.	March 14.	Increase.	Decrease.
ASSETS.				
Coin and bullion	£ 30,987,000	£ 30,378,000	609,000	...
Discounts and advances	29,883,000	28,561,000	1,322,000	...
LIABILITIES.

* Converting the thaler at 3s; the Dutch florin at 1s 8d; the Austrian florin at 2s; the reichs-marc at 1s; and the franc at 25f per 1*l*.

DISCOUNT AND MONEY MARKET.—A large withdrawal of bullion last Saturday for Germany, coupled with withdrawals

for other quarters early in the week, combined to increase the growing demand for money which has lately been experienced. The result was on Wednesday that the brokers refused to work unless conditional on Thursday's rate, and the applications to the Bank were immediately very large. The Bank directors accordingly, instead of waiting till the usual court on the following day, immediately resolved to advance the rate from 3½ to 4 per cent. Since then the demand has been a little quieter both outside and in the open market; but the Bank rate has been maintained as a minimum, while the rate for six months' bills is 4½ per cent., and the tone of the market is firm. At the Bank there has been a fair demand.

The Bank return was in some quarters interpreted at first unfavourably, but the changes would not have justified a sharper advance in the rate than what has been made. The diminution in the reserve is 1,500,000*l*, the bullion having diminished by about 950,000*l*, and the circulation having increased about 600,000*l*, but the reserve is still 13,700,000*l*, and as the withdrawals have been mainly for Germany, which is likely to avoid any farther withdrawal that would cause alarm, the amount still in hand seems likely to suffice for the usual quarterly drain which is now approaching. The increase in the private securities for the week is very large—1,950,000*l*—but compared with last year the pressure has been less, the private securities then advancing by a leap of four millions in one week to the present point. The tendency for some little time will probably be towards an advance of the rate, but unless the drain of bullion should increase and withdrawals for Germany should occur, there appears to be no chance of anything approaching pressure for the present. The magnitude of the Government deposits attracts increasing attention, the increase this week being 391,000*l*, and the total close upon 17,000,000*l*. Even allowing for the transfer of Chancery money, by which the amount is increased a million as compared with former times, this total of public deposits is absolutely without precedent, and has certainly contributed not a little during the present spring to derange the operations of the money market.

On 'Change this week bills have been rather more offered, and comparatively little business has been done.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—Short	4	per cent.
Do 4 months	4½	per cent.
Do 6 —	4¾	per cent.
Trade bills—3 months	4½	per cent.
Do 4 —	4½	per cent.
Do 6 —	4¾ 5	per cent.

The allowances for money at the joint stock banks and discount houses have been altered in accordance with the change in the Bank rate, and are now

Private and Joint Stock Banks at call	3	per cent.
Discount houses at call	3	per cent.
Do at seven days' notice	3½	per cent.
Do at fourteen days' notice	3½	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate.	Open Market.
	Per Cent.	Per Cent.
Paris	5	5
Berlin	4½	4
Bremen	4½	4½
Frankfurt	4	4
Hamburg	3	4
Amsterdam	4	4
Brussels	5½	3½
Leipzig	5	5
St Petersburg	6½	6½
Vienna	5	5

THE STOCK MARKETS.—The rise in the rate of discount has exercised, apart from Government securities, but slight influence over the Stock Markets. From the commencement of the week the movement of the Bank was generally expected in the Stock Exchange, and though the alteration on Wednesday caused some surprise, the depression in prices was but short-lived. As matters now stand, quotations as contrasted with last week indicate an almost universal improvement in Home Railway securities, though dulness in Foreign Stocks; while in two other departments, those of Canadian Railways and Submarine Telegraph investments, there has occurred an unusual display of activity. The proposition for remodelling the Grand Trunk Railway of Canada, which was referred to at some length last week, has continued to find great favour in the market, and the dealings in the

Company's securities have been very heavy indeed, and have been attended with a further important rise in quotations. Colonial Railway Securities have all been well sustained in price, even Indian Stocks standing firm in the face of decidedly adverse traffic returns. A strong speculation has been going on in Atlantic Telegraph Companies, the occasion being the introduction of a great scheme entirely independent of existing Boards of Directors, for buying up the property of the Anglo-American French Cable, and New York, Newfoundland, and London Companies, whether the present Directors will or no. The terms upon which this, to say the least, novel mode of proceeding is proposed to be carried out will be found elsewhere. The American market has not been so buoyant this week, the signs of reaction in the Railroad investments, which lately advanced with such rapidity, having made their appearance. The Government Bonds have, however, been steady. Foreign Railway Shares and Obligations have varied but slightly, the principal feature being a rise in Mexican; and in more Miscellaneous investments, the movements have not excited much attention. A rise in the Imperial Ottoman Bank shares may be referred to; as well as a fall in the Boston City Loan. Notwithstanding the commencement of the settlement to-day, a good business was transacted in the different departments of the Stock Exchange. The Funds were slightly firmer; and in Home Railway Stocks an almost universal improvement occurred, the market closing at its best point. Atlantic Telegraph securities were again in demand; and with respect to Grand Trunk, while the ordinary stock relapsed $\frac{1}{2}$, the Fourth Preference rose $\frac{3}{4}$.

ENGLISH GOVERNMENT SECURITIES.—The expected rise in the value of money caused depression in the Funds during Monday, Tuesday, and Wednesday, and Consols for money receded to $92\frac{1}{2}$; but there has since been an improvement, and the closing prices to-night are only $\frac{1}{2}$ below those current a week ago. Bank Stock has advanced, partly on the recovery of a large portion of the property obtained through the recent forgeries.

	Money.		CONSOLS.		Exchequer Bills. March and June

Thursday	92 $\frac{1}{2}$	92 $\frac{3}{4}$	92 $\frac{1}{2}$	92 $\frac{3}{4}$	2 dis to 2s pm
Friday	92 $\frac{1}{2}$	92 $\frac{3}{4}$	92 $\frac{1}{2}$	92 $\frac{3}{4}$	2 dis to 2s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday	Closing Prices this day.	Inc. or Dec.
Consols for money	92 $\frac{1}{2}$	92 $\frac{3}{4}$	+
Ditto April	92 $\frac{1}{2}$	92 $\frac{3}{4}$	+
Reduced 3%	91 $\frac{1}{2}$	91 $\frac{3}{4}$	+
New 3%	91 $\frac{1}{2}$	91 $\frac{3}{4}$	+
Bank stock (last dividend 5%)	242 4 x1	243 5	+
India stock, 10 $\frac{1}{2}$ %, red. at 200 Apl. 30, 1874	202 4	202 4	...
Do 5%, red. at par, July 5, 1880	110 4	110 4	...
Metropol. Board of Works 3 $\frac{1}{2}$ % Consols	96 4	96 $\frac{1}{2}$	+

COLONIAL GOVERNMENT SECURITIES.—With one exception the changes in the week are favourable. New Zealand 6 per cent. has gone down 2, but three descriptions of landed stock have advanced 6 per cent. 1, 5 per cent. $\frac{1}{2}$, and invested 2. Mauritius 1873 is also advanced $\frac{1}{2}$.

FOREIGN GOVERNMENT SECURITIES.—Foreign Stocks have, for the most part, exhibited but little animation throughout the week, and though during the past two days prices have been steadier, yet the balance of fluctuation has, if anything, been in a downward direction. Still, in few instances are the movements of much importance; the Bolivian Loan alone suffering severely, owing to a statement that the railway for which the debt was contracted is not making that progress which could be wished. Costa Rica, Paraguay, Peruvian, and the later Chilian issues (the last named on the introduction of a new loan for railway purposes) have also receded in market value. The Egyptian Government and the Viceroy's loans have raled flat; while, with respect to Turkish Stocks, some are higher, though the Porte has contracted for the issue of a 5 per cent. loan of very considerable dimensions. This fact has apparently influenced in a favourable direction the existing 5 per cent. Last year, it will be remembered, Turkey raised a loan for eleven millions, and reports have since indicated that further borrowings have been effected, and it therefore behoves intending subscribers to understand fully the purpose for which this new application is made as well

as the nature of the security offered. Russian securities have maintained their positions; while Portuguese have risen somewhat. Spanish too show a slight recovery, though the crisis in that country exhibits no signs of drawing to a close. San Domingo and Honduras bonds have been inquired for during the week, the former on American account. With respect to French Rentes, the changes have proved quite unimportant, though there has occurred a slight improvement in these instances to-day.

The following are the changes for the week, taking the latest unofficial quotations:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS.—A general recovery from the recent collapse in prices has to be recorded in this department. The week opened with steadiness, and later, notwithstanding withdrawals of gold and a rise in the Bank rate, prices have risen under the influence of speculators buying back in anticipation of the half-monthly settlement, which commenced to-day. The finer weather and a fall in the market price of coal have confirmed speculators in these re-purchases. Another fortnightly return of working expenses from the Manchester and Sheffield Company has been somewhat less unfavourable than those previously issued during the current half-year; and the traffic returns, again, with the exception of the Southern lines, have indicated moderately good results. It will be noticed below that the Scotch companies have been especially buoyant, which may be attributed to the result of the Caledonian Company's meeting, whereat the directors expressed their willingness to discuss with a committee of shareholders the possibility of a withdrawal of new competing schemes by the Scotch companies generally, the upshot of negotiation to be reported at a future meeting. It is to be hoped that the North British Company can be influenced in the same manner, and that it may even be possible to arrive at some agreement with respect to the division of traffic where competition is now so hurtful. South-Eastern and Metropolitan Stocks have also been in request at decidedly higher prices. The settlement now commenced does not appear to be so heavy as that in the middle of the month, speculation having been somewhat less violent; but in some few stocks, such as Great Northern A, and South Eastern, the "backwardations" paid to-day by the "bears" have been exceptionally high. To-day's market has been a very strong one, the rise in South Eastern being $2\frac{1}{2}$, and in many other stocks from $\frac{1}{2}$ to $1\frac{1}{2}$ per cent.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	93 1/2	98 1/2	+ 4 1/2
Great Eastern	40 1/2	42 1/2	+ 2 1/2
Great Northern	126 7/8	126 7/8	...
Ditto A	142 3/4	143 1/4	+ 1 1/2

South-Eastern	103 1/2	107 1/2	+ 4 1/2
Ditto Deferred	84 1/2	88 1/2	+ 4 1/2

The quotations for the leading debenture stocks compare as follows with last week:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Great Eastern A 5 %	114 1/2	114 1/2	...
Ditto 1867 Redeemable 5 %	113 1/2	113 1/2	...
Great Western 5 % Deb.	119 20	119 20	...
London and North-Western 4 %	102 3	102 3	...
London and Brighton 4 1/2 %	106 8	106 8	...
London, Chatham, & Dover Arbitration 4 1/2 %	103 1/2	103 1/2	...
Metropolitan District 6 %	125 7	125 7	...

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending March 22 to 819,620*l*, being an increase of 50,836*l* on the corresponding week of last year. The aggregate receipts for the half-year to date are now 8,786,580*l*, showing an increase of 560,894*l*, as compared with the same period of last year. The principal increases for the week have been—North-Eastern, 10,514*l*; Midland, 8,511*l*; London and North-Western, 8,890*l*; Great Western, 7,179*l*. Most of the Southern lines show little improvement, and South Western receipts have decreased 905*l*.

Erie Shares (par 91 1/2)	51 1/2	51 1/2	...
Ditto 7 % Consolidated Mort. (par 91 1/2)	95 1/2	95 1/2	...
Illinois Central Shares (par 91 1/2)	95 1/2	95 1/2	...
Illinois and St. Louis Bridge 7 %, 1st Mort	101 1/2	102 1/2	+ 1 1/2
Pennsylvania 50 do. shares (par 46)	46 1/2	45 1/2	- 1
Ditto General Mort. 6 % Bonds, 1910	97 1/2	97 1/2	...

JOINT STOCK BANKS.—With few exceptions the rise which has been rather marked in these shares this week is on those of Colonial and Eastern Banks. Anglo-Egyptian has gone up 1/2 to 1/2; Anglo-Hungarian, 1 1/2; Bank of Australasia, 1/2; Bank of Constantinople, 1/2; Otago, 1/2; British North America, 2; Chartered Mercantile of India, 1/2; Consolidated, 1/2; Imperial Ottoman, 1; Standard of British South Africa, 1; and two London Banks have each advanced 1/2: viz: the Union and London and Westminster. Only these three show a decline, Hong Kong and Shanghai, 1; London and River Plate, 1; Ditto New, 1/2; Oriental Bank Corporation, 1/2.

TELEGRAPHS.—The Atlantic shares have again been the subject of much speculation, operators for the rise, though not unopposed, being in the ascendant. The principal event during the week has been the issue of a new amalgamating company which has caused some squabbling among the boards it proposes to absorb. In the end the shares of the companies in question have advanced in about an equal proportion. Anglo-American are 14 higher; French Atlantic, 2 1/2; ditto, Debentures, 1; Newfoundland, 2. West India and Panama have also advanced 1/2; Western Union, 1; Indo-European, 1. On the other side, Submarine have declined 2 1/2; Scrip, 1/2; Great Northern, 1/2. Submarine Trust have advanced 3.

MINES.—In the home market there is no change noticeable on the week; foreign mines have been more attended to. The following have advanced:—Alamillon, 1/2; Colorado Terrible, 1/2; Linares, 1/2; New Quebrada, 1/2; Sontgibaud, 1; Port Phillips, 1/2; Richmond, 1/2. On the other side, Emma have declined 1 1/2; Flagstaff, 1/2; Copiapo, 1/2; General Mining, 1/2; Last Chance, 1/2; Sweetland Creek Gold, 1/2; Don Pedro, 1/2; Scottish Australian, 1/2.

MISCELLANEOUS.—No movement of a remarkable kind has taken place in these shares during the week, but the tendency of the market is favourable. Several of the Welsh iron companies show an advance. Colonial Land shares appear to fluctuate a good deal, and the Swedish Iron and Steel Company shares have fallen 4. The following are those that have advanced:—Foreign and Colonial Trust 6 per Cent., 1871, 1; Share Investment Trust, 1; Spanish Land, 1/2; United States Mortgage 6 per Cent. Scrip, 1; Copper Miners of England, 1; Sydney Iron Ore, 1/2; Merry and Cunningham, 1/2; Butler's Wharf, 1/2; Credit Foncier Mauritius, 1/2; New Zealand, Loan, 1/2; Societe de Credit, Austro-Turquie, 1 1/2; British American Land, 2 1/2; Otago and Southland, 1/2; Peel River Land, 1. The Dublin and London Tramway shares have both gone up, the one 1/2 and the other 1/2. Crystal Palace shares are all up 1. On the other hand, Boston City (U.S.) Loan has fallen 3; Egyptian, 9 per Cent., 1/2; 7 ditto, 1; Ebbw Vale Iron Company, 1 1/2; and the Fairbairn Engineering, 1/2. Australian Agricultural, 1; London Omnibus, 2; Native Guano, 1/2; Young's Paraffin Light, 1/2. Gas shares have been without fluctuations during the week, although it is expected that from the expiry of old contracts they will now begin to be seriously affected by the increased price of coal.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The demand for bars for Germany, and sovereigns for the East, the Brazils, and the Cape, has been so good, that in the absence of all supplies from abroad, 897,000*l* has been withdrawn from the Bank. The next arrival from Australia is only due on the 8th proximo, so that further resort to the Bank's stock of bullion may be anticipated. The Nubia takes 301,520*l* to the East, the Iceland 20,000*l* to the Cape, and the Tiber 30,000*l* to the Brazils.

Silver during the past week has been in demand for France, and also to some extent for India and China; the orders for the East are, however, exceptional, and in view of the present rates of exchange are hardly likely to be repeated. The price improved at the beginning of the week to 59 1/2*d* per oz standard, but it is now somewhat weaker. The supplies to hand have nearly all been from New York, and make a total of about 152,000*l*, chiefly Dore. The Nubia has taken 45,150*l* to Bombay.

Mexican Dollars.—The supplies lately arrived by the "Ariatic" from New York, and other vessels, amounting to about 70,000*l*, have been sold at 59½*d* per oz. for the new coinage, showing no alteration in price; the old coinage is in less demand now, and although the quantity coming in is inconsiderable, it is thought that a decided reduction from the price lately current (62½*d* per oz.) may be anticipated. The "Nubia" has taken 64,000*l* to China and the Straits.

Exchange on India for banks drafts at 60 days' sight is 1*s* 10½*d* per rupee.

Quotations for Bullion.—Gold—Bar gold, 77*s* 9½*d* per oz. std, last price; ditto fine, 77*s* 9½*d* per oz. std, ditto; ditto refinable, 78*s* 0*d* per oz. std, ditto; South American doubloons, 73*s* 9*d* to 74*s* per oz.; United States gold coin, 76*s* 4*d* to 76*s* 4½*d* per oz., none here. Silver—Bar silver, fine, 4*s* 11½*d* to 4*s* 11½*d* per oz. std, last price; ditto, containing 5 grains gold, 5*s* 0½*d* to 5½*d* per oz. std, last price; Mexican dollars, new, 4*s* 11½*d*; old, 5*s* 2½*d* per oz., last prices.

According to the *Gazette* return of this evening, the movement in the precious metals during the week ended March 26, has been as follows:—Gold—import, 11,876*l*; export, 802,620*l*. Silver—import, 157,876; export, 42,355*l*. No bullion operations of importance have occurred at the Bank to-day.

NOTICES AND REPORTS.

STOCKS.

Chilian Government 5 per Cent. Loan, 1873.—The Oriental Bank Corporation invite applications for 2,276,500*l* in bonds of 1,000*l*, 500*l*, and 100*l* each, bearing 5 per cent. interest, payable in March and September in London, and leaving the principal redeemable by a 2 per cent. sinking fund, half-yearly drawings from January, 1874. The issue price is 94 per cent. The greater part of the money is required for railway purposes.

Italian State Domain Loan.—The Anglo-Italian Bank, as bankers to the Italian Land Company, Limited, notify that the bonds, Serie N, drawn for extinction, and the half-yearly coupons of the Italian Five per Cent. State Domain Loan, 1865, due on the 1st of April next, will be payable at the offices of the bank on and after that date.

RAILWAY COMPANIES.

Arbroath and Forfar.—The usual 6 per cent. per annum dividend is recommended.

Bolivar Railway, Limited.—Capital, 350,000*l*, in 10*l* shares.

The purpose is that of constructing a railway of about 62 miles, from the port of Tucacas, in the Caribbean Sea, to the copper mines of Aroa, "reputed to be the most extensive and the richest in the world." These mines are situated in Venezuela, and the realisation of their wealth has been retarded by the expense of bringing the ores to port. The New Quebrada Company (Limited), by whom they are worked, bind themselves to deliver a minimum quantity of 20,000 tons of copper ore annually, for transport by the railway, for which they will pay 4*l* 5*s* per ton, or 15,000*l* per annum. Contracts have been made with Messrs Barnett and Gale.

Caledonian.—At the meeting the directors declared their desire for peace, and agreed to accept the co-operation of the committee nominated. The report was therefore adopted. A special meeting is to be called to receive the report of the committee.

Calandar and Oban.—At the meeting a dividend at the rate of 1½ per cent. per annum was declared.

Central Uruguay of Montevideo 7 per Cent. Preference Shares.—Messrs Scrimgeour invite subscriptions for 250,000*l*. Seven per Cent. Preference shares of 50*l* each, at 38*l* 15*s* per share, being the balance of a total issue of 947,050*l*. These shares are entitled to 7 per cent. per annum from the guarantee of the Uruguayan Government, and to participate with the ordinary shares in any profits beyond.

Dunaburg and Witepsk.—Half-yearly dividend 10*s* per share. Isle of Man Railway, Limited.—Capital 160,000*l*. Subscriptions have been invited for 50,000*l* in 5*l* shares. The undertaking comprises a line from Douglas to Peel, which will be opened in June next, and one from Douglas to Port Erin, which will be opened next year, the total length being 27 miles.

Northern of Spain Priority Obligations.—Messrs Bischoffsheim and Goldschmidt announce that on the 1st April they will be prepared to pay the coupon of No. 6 (Fcs. 7.50) of the Priority Obligations at the rate of 25*f* 40*c* per pound sterling.

Peebles.—A dividend at the rate of 6½ per cent. per annum has been announced.

Toronto Grey and Bruce Railway of Canada 7 per Cent. Mortgage.—Messrs James Shepherd and Co. invite subscriptions for those Sterling Seven per Cent. First Mortgage Bonds to the amount of 66,000*l*. The sum is the balance of 247,000*l*, the whole authorised mortgage debt of the railway. The price of issue is 92.

Varna.—The adopted report stated that the earnings for the half-year amounted to 36,657*l*, showing an increase of 10,945*l* on the corresponding period of 1871; but the expenditure in Turkey was heavy, viz., 43,963*l*, or 15,500*l* in excess of the previous year. A large amount of this has been expended in works chargeable against capital.

BANKS.

Agra.—At the meeting a dividend at the rate of 5 per cent. per annum was declared. The dividend would have been larger but for Mr Gladstone's failure.

Austro-Egyptian.—Dividend for the year 1872-3 fixed at 9-16th shilling per share, less tax.

Bank of Belgium and Holland.—At the meeting the report showed an available 20,242*l*, and a dividend was declared of 3*l* per share, absorbing 15,000*l*, and leaving 1,000*l* to reserve, 1,156*l* to preliminary expenses, and 3,036*l* to be carried forward.

Bank of British Columbia.—A dividend at the rate of 8 per cent. per annum is notified for the past half year, while 4,000*l* is added to reserve, 2,808*l* carried forward.

Chartered of India, Australia and China.—The report recommends, after providing for all debts, including the loss by Gledstones and Co., a dividend at the rate of 2½ per cent. per annum for the six months ended the 31st December.

Oriental Bank Corporation.—A dividend at the rate of 12 per cent. per annum is recommended.

ASSURANCE COMPANIES.

Alliance Life and Fire.—At the annual court it was reported that new life policies covering 238,000*l* were effected during 1872; that in addition to the interest received on the capital and the fire reserve fund, the profit realised on the fire account amounted to 67,505*l*; the funds amounted to 1,716,399*l*; and the investments were yielding interest at an average rate of 4*l* 10*s* 10*d* per cent. per annum; and a dividend and a bonus together amounting to 55,000*l*, or 10 per cent. on the paid-up capital, were declared for the year 1873.

Briton Medical and General Life.—The new policies issued in 1872 were 2,133, assuring 586,848*l*, and producing annually 18,782*l*. The total come amounted to 251,181*l*, and the claims paid to 162,734*l*. The assurance fund stands at 614,166. The usual 8 per cent. dividend, free of income tax, was declared at the meeting.

Great Britain Fire.—The directors have declared an interim half-year's dividend at the rate of 5 per cent. per annum to the 31st December last.

Law Reversionary Interest Society.—At the annual meeting a dividend at the rate of 6 per cent. per annum was declared.

BANKERS' PRICE CURRENT.

BRITISH FUNDS, INDIAN GOVERNMENT SECURITIES, &c.

Table with columns: Dividends Due, BRITISH FUNDS, Closing Prices. Includes entries for 3 per Cent. Consols, India Stock, and various government securities.

FOREIGN STOCKS, BONDS, &c.

Table with columns: Dividends Due, Sinking Fund %, Next Drawing, Name, Closing Prices. Lists various international securities like Argentine, Brazilian, and Egyptian bonds.

FOREIGN STOCKS, BONDS, &c.—Continued.

Table with columns: Dividends Due, Sinking Fund %, Next Drawing, Name, Closing Prices. Continuation of foreign securities including Peruvian, Russian, and Swedish bonds.

* The drawings are yearly in the case of stocks to which asterisks are prefixed. In almost all other cases, where there are drawings, half-yearly.

COLONIAL GOVERNMENT SECURITIES.

Table with columns: Authorised Issue, Dividends Due, Name, Closing Prices. Lists securities from British Columbia, Canada, Mauritius, Natal, and New Zealand.

AMERICAN STOCKS.

Table with columns: Dols, Name, Shares, Closing Prices. Lists various American stocks and bonds, including United States, Virginia Stock, and several railroad securities.

* Issued 2,771,600—reserved for exchange, 3,220,400.

BANKS.

Table with columns: Authorised Issue, Dividend per annum, Name, Shares, Paid, Closing Prices. Lists various banks such as Agra, Alliance, and Anglo-Austrian.

TELEGRAPH COMPANIES.

Table of Telegraph Companies with columns: Authorised Issue, Share, Paid, Name, Closing Prices. Includes entries for Anglo-American, Lim., British Australian, Lim., etc.

GAS.

Table of Gas companies with columns: Authorised Issue, Share, Paid, Name, Closing Prices. Includes entries for Bombay, Limited, Do do New, Continental, etc.

DOCKS.

Table of Docks with columns: Authorised Issue, Share, Paid, Name, Closing Prices. Includes entries for East and West India, Hull, London and St Katharine, etc.

INDIAN RAILWAY DEBENTURES.

Table of Indian Railway Debentures with columns: Debent. Capital, Name, Closing Prices. Includes entries for Bombay, Baroda, and C. India, East Indian, etc.

[CONTINUED FROM PAGE 380.]

MISCELLANEOUS COMPANIES.

Anglo-American Railroad Mortgage Trust.—Capital 1,000,000*l*, in 100*l* certificates. It is urged that no better field for the formation of a trust than American Railroad Mortgages can be found. The price of issue has been fixed at 85*l* per certificate, and 6 per cent. will be paid by half-yearly coupons on the nominal amount. Nine-tenths of the certificates are to be redeemed at par by yearly drawings; and the balance of securities will be divided amongst the remainder, and the trust will then cease.

Brazilian Street Railway.—At the meeting, it was stated the directors have used every exertion to put the railway into efficient working order, and that they had confidence that the Company possessed a property which, if properly worked, would yield a satisfactory return. Interest at the rate of 10 per cent. was declared on the Preference Shares.

British American Land.—The report recommends a dividend of 1*l* 10s per share, which will absorb 8,622*l*, and leave 4,031*l* to be carried forward. At the corresponding date of last year the dividend was 1*l* per share, and 6,165*l* was carried forward.

Gagliari Gas and Water.—A dividend at the rate of 5 per cent. per annum has been declared.

Canada Company.—The adopted report referred to the falling off in the number of acres sold in 1872 compared with the previous year, but which had been fully met by the enhanced prices obtained. The average price was 55s 10d per acre against 53s 5d in 1871. 5*l* per share was paid in dividend last year against 4*l* in the previous year, and a further sum of 2*l* 10s per share was returned to the proprietors in repayment of capital.

Compton County (Canadian Municipal) 6 per Cent. Sterling Debentures.—Messrs Jay and Co. invite applications for this loan for 46,000*l*, at the price of 96½ nominal, or 95 net. The loan will be redeemed in 1896. The proceeds is to be subscribed to the St Francis and Megantic International Railway.

Consolidated Atlantic Telegraph, Limited.—Capital, 8,000,000*l*, in 400,000 six per cent. preference, and 400,000 ordinary shares, of 10*l* each. It is designed to acquire the whole undertakings and assets of the Anglo-American, the Societe du Cable Transatlantique Français, and the New York, Newfoundland, and London Telegraph Companies. The terms on which this is proposed are:—

“For every 100*l* of Anglo-American stock, 200*l* in shares of the present Company, viz.—10 preference shares of 10*l* each (100*l*), and 10 ordinary shares of 10*l* each (100*l*). For every 20*l* share in the French Cable Company, 40*l* in shares of the present company, viz.—two preference shares of 10*l* each (20*l*), and two ordinary shares of 10*l* each (20*l*). For every 20*l* share in the New York, Newfoundland, and London, 30*l* in shares of the present company, viz.—1½ preference shares of 10*l* each (15*l*), and 1½ ordinary shares of 10*l* each (15*l*), exclusive of the land rights not of telegraphic value.”

This Company has been introduced without the sanction of the directors of the various companies to be taken over.

Eastern Counties Aquarium, Limited.—Capital, 50,000*l* in 20 shares. The company is formed for the purpose of establishing a marine and fresh water aquarium, &c, on the beach adjoining the Britannia Pier, Great Yarmouth. The annual returns are estimated at the least at 16,075*l*, which, after deducting 4,000*l* for working expenses, would leave 12,075*l* available for dividend.

Ebbw Vale Steel, Iron, and Coal.—A call of 1*l* 10s per share is payable on the 1st May.

Gas Light and Coke.—A half-year's dividend at the rate of 9 per cent. per annum has been announced.

General Small Arms, Limited.—Capital, 20,000, in 5*l* shares. The object is to acquire and farm the patents of Mr Joseph Needham.

New York, Newfoundland, and London Telegraph.—Interim dividend for the past quarter 10s per share.

Price's Patent Candle.—At the meeting a dividend of 6 per cent. per annum was declared on the preference shares, and 6s per share, or 4 per cent. per annum on the ordinary shares. The results of last year's working are stated to the best ever attained by the company, and during the year machinery has been erected to increase the capabilities of the manufactory.

Railway Debenture Trust, Limited.—Capital 3,000,000*l* in 20*l* shares, and 200 founders shares of 1*l* each. First issue 50,000 shares of 20*l* each at par, of which it is proposed to call up 10*l*. This company will enable investors to obtain the security of railway debentures in the best continental and American lines, plus the security of the subscribed capital of the company; and the founders guarantee the subscription of 700,000*l* of the first issue of capital. The company will issue debentures to the extent of five times its own capital.

Robur Distillery, Limited.—Capital, 50,000*l*, in 5,000 10*l* shares, of which 3,000 are now offered for subscription. The company manufactures and sells the “Robur” spirit, which has been lately introduced. It is stated that the company was originally formed with a capital of 5,000*l*, just enough to test whether there was a market for the new article, and that the experience having been satisfactory, it is now proposed to ex-

tend the business, for which an expenditure of capital on bonded warehouses and plant is requisite.

Rosherville Hotel, Limited.—Creditors are required, by the 26th April, to forward details of their claims to the official liquidator (Mr A. G. B. Caarten), the 6th May being appointed for adjudicating upon them.

Rio de Janeiro Gas.—The annual report shows an available 63,162*l*, and recommends a dividend for the half-year at the rate of 10 per cent. per annum, which will absorb 30,000*l*, and a bonus of 8s per share, absorbing 12,000*l*, leaving 21,162*l*, of which 19,000*l* is to be placed to the insurance and contingency fund.

South of England Oyster.—The company has invited subscriptions for the balance of their 10 per cent. preference shares, consisting of 4,000 of 5*l* each. They are offered at 5 per cent. premium.

Universal Telegram, Limited.—Capital 50,000*l*, in 5*l* shares. The company is formed to purchase and extend the business now carried on by the Anglo-Continental Telegram Company, which has been in operation since 1870.

MINING COMPANIES.

Bramcote Colliery, Limited.—Capital 120,000*l*, in 5*l* shares. This colliery is situated in Nottinghamshire, near the Erewash branch of the Midland Railway. The area is 1,500 acres, and the present output over 100 tons daily. This output it is proposed greatly to increase. The purchase price is 40,000*l* in cash, and 20,000*l* in shares.

Yudanamutana Copper of South Australia.—A meeting is called to consider whether the property shall be transferred to a new company, or shall be wound up.

Victoria and Fenton Park Colliery, Limited.—Capital 100,000*l*, in 10*l* shares. These collieries are situated at Stoke, in Staffordshire, and cover over 250 acres. The lease is for 21 years, renewable, and there are royalties. The purchase price is 45,000*l*, of which 25,000*l* is in shares.

The Commercial Times.

MAILS ARRIVED.
LATEST DATES.

On March 27, from SOUTH AMERICA, per Norseman—Cape Town, Feb. 25; Funchal, March 21.
On March 27, from UNITED STATES, per Olympus—Boston, March 15.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended March 22, 1873:—

	Quantities Sold.		Average Price	
	qrs	bush	s	d
Wheat	45,112	7	55	3
Barley	27,146	6	39	11
Oats	4,782	3	23	6

COMPARATIVE AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended March 22, 1873, and for the corresponding week in each of the years from 1872 to 1869:—

	QUANTITIES SOLD.			AVERAGE PRICES.								
	Wheat	Barley.	Oats.	Wheat.	Barley.	Oats.						
	qrs	bush	qrs	bush	qrs	bush						
1873	45,112	7	27,146	6	4,782	3	55	3	39	11	23	6
1872	41,878	7	27,550	1	4,320	7	54	6	36	6	21	10
1871	76,057	1	26,217	3	5,423	2	55	2	36	3	25	10
1870	58,235	7	32,990	3	5,081	5	42	5	34	5	21	2
1869	46,524	4	20,593	0	3,318	5	46	5	43	8	27	1

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There has been little activity in the corn trade again this week, and prices do not gain that firmness which would encourage free buying. At present, though stocks in millers' hands have reached a low point, it is only fine descriptions of English, and the scarcer kinds of foreign grain which attract attention. With the bright weather which has distinguished the past week, sowing and other field work have had a favourable opportunity to recover lost ground; from Scotland, however, where it is greatly needed, weather reports have been tardy in following the agreeable change from the wet which has lasted so long. New samples as yet show little improvement in condition, but arrive in fair qualities at the provincial markets. Continental markets are quiet, and inclined to be flat. In Paris, common flour is a shade lower, while there are some slight irregularities in German markets. At New York, prices do not recover, and the complaint has been current of want of storage room for the supplies; extra State flour costs \$7.55c and red spring wheat \$1.80c. The Chilean harvest is reported abundant.

There has been a decided improvement in the tone of the Liverpool cotton market this week, and the sales have been large, at prices for the better American slightly in advance of last week. This is owing, in part, at least, to the material decrease in the receipts at American ports. Hence middling Upland is now quoted at New York ½c higher than last week.

With the exception of Tuesday, when the sales were only 12,000 bales, the daily transactions at Liverpool have been 15,000 bales, while the receipts at American ports have averaged 8,000 bales daily for the week. Firmness in the Liverpool market has so far reacted favourably upon Manchester that the tone there has been firmer and prices better maintained, some spinners raising quotations $\frac{1}{4}$ d to $\frac{1}{2}$ d per lb, but buyers have been reluctant to respond to the advance, and many of the larger manufacturers are placed at a disadvantage by the competition of smaller men, who from the nature of their contracts have not yet felt the pressure of the high price of coals. They have rented floors of mills with turning power from proprietors, which latter now suffer while their tenants are free to keep down the market.

In the wool market a slight improvement is also reported, although trade is on the whole rather limited. Home growers are no wise disposed to make concessions, and although the prices of colonial sorts of wool have ruled lower, the increased cost of production makes it impossible for makers to give way to buyers on that account as they otherwise would. Transactions are therefore still described as of a hand to mouth character, and foreign demands for yarns are particularly restricted. The makers of piece goods are however reported to be better employed, and considerable orders have lately been placed, so that on the whole the condition of the trade may be considered more assuring.

The latest definite reports from the Staffordshire iron districts announce a total suspension of new orders for the moment. This is owing to the high prices insisted upon, and Americans, for instance, find their own product cheaper; but, being under contract, makers are in no hurry to relax quotations in view of the higher wages ironworkers will require next quarter, the still stiffening rates for coal, and the difficulty of procuring ores to work upon. The North of England district is somewhat similarly situated, but the decision as to future wages by the Northern Arbitration Board is expected to settle matters to some extent, and also to have an effect on other districts. The agitation of ironstone miners has ended without concessions being obtained, and is satisfactory as bringing out a resolution not to reduce the output but to encourage the constitution of a system of arbitration. In the meanwhile foreign orders for heavy iron are said to be intercepted by Belgian firms. Since the rise of wages in Yorkshire prices have been further advanced, much to the indignation of the men; but as London merchants are now less eager to purchase at any price, the turning point is considered to have been reached and no further action has been taken by the men. A reduction has at length been made in the price of coal in Glasgow to the extent of from 4s to 5s per ton.

The sugar market has again been dull at a further slight decline. There is now a steady home demand for cocoa, and prices show no further tendency to fall. New crop East India coffee is in great demand, but Rio descriptions are scarcely so firm. The rice market is moderately active, though holders are reticent. Metals remain steady, tin and copper obtaining much the same prices as last week; the former closes weakly. Oils are in but quiet demand, and the tallow market closes dull and lower on the week.

EXTRACTS FROM TRADE CIRCULARS.

(From Sir Chares Forbes and Co.'s Cotton Circular, dated Bombay, March 3.)—The transactions for the fortnight have been exceedingly restricted for the season of the year, aggregating only about 7,800 candies of new, and about 800 candies of old, cotton for immediate delivery, and about 1,600 candies of new cotton for future delivery. The demand has run principally on Broach-ginned, Khandeish, and Oomrawuttee for immediate, and on Dhollerah and Broach-ginned for future, delivery. Consequent on heavy rains in the central districts, the cotton from Barsee, Oomrawuttee, Julgaum, and other places recently arrived, show stain and black leaf. The arrivals of Broach-ginned are considerable, but so far this description has been generally yellow-stained and leafy. Mowa and Bhownggur show good colour and staple, but are both leafy. The reports as to the crop are generally satisfactory. The arrivals by latest returns are from 1st January about 85,000 bales of $3\frac{1}{2}$ cwts of short of those to a corresponding period last year.

(From Messrs Lee, Hedges, and Co.'s Coffee Report, dated Colombo, February 21.)—Plantation Coffee—Transactions have suddenly acquired a bearing upon the future of our staple that perplexes the general body of operators in no ordinary degree. During the past few days estate crops for the following season have been contracted for at 15s per bushel, subject to delivery before April, 1874, and this from properties not yet yet stripped of their produce for crop, 1872-73. However such operations may result, we fail to see the wisdom of concluding purchases of coffee that has yet to be grown, and that at a figure that until the present year was, save in one instance, unknown in the island. Native Coffee—This article, picked and dried, now commands prices equivalent to those ruling for good ordinary in Mincing lane three months ago.

(From Messrs Mohr Brothers and Co.'s Rice Circular, dated Akyab, Feb. 24.)—Supplies of nakrenzie became very large soon after our last report was issued, but with a tonnage on the berth of fully 40,000 tons burthen, the demand kept most active, and prices remained consequently very firm. The outturn from this season's paddy is not showing so favourably as last year.

(From F. W. Heilger's and Co.'s Jute Circular, dated Calcutta, Feb. 28.)—Buyers do not seem desirous of purchasing to any extent, and take only sufficient supplies for their immediate wants. The consequence is a falling off in the daily deliveries, and, as the imports have been coming in more freely, our local stocks have increased to about 65,000 maunds. The prevailing feeling seems to be that values are almost certain to recede within the next week or two, but we are not prepared to confirm this idea. Advices from the interior state that the position of jute is very firm, owing to several representatives of Calcutta firms being on the spot, and operating largely.

(From Messrs J. Berger Spence and Co.'s Weekly Chemical Report, dated March 24.)—The gradual decline which has taken place in the demand for chemicals since the opening of the present month has resulted in yet less actual business being transacted during the past week. Lessened requirements are slightly more marked in the home trade, and for America business has assumed a tone of temporary inanimation which reports from New York do not tend to revive. The prospects of cheaper coal may stimulate a resumption of activity in all the departments of trade at present suffering from its scarcity and dearness, but until an improvement is effected in this respect neither the supply nor the prices of chemicals can be regulated to the greater benefit of consumers. Alkalies generally have been offered more freely, but the cause may be attributed more to a decline in the export and home consumption than an increase in the production; and quotations, though nominally unchanged, are consequently weaker. Nitrate of soda quiet for forward delivery. The uncertainty as to its future value has doubtless a tendency to restrict business; but as the monopoly scheme was to be put into force on the 18th instant, importers will soon be able to calculate contingencies with tolerable accuracy.

THE COTTON TRADE.

Cotton has been in good demand this week, and full prices have been paid for almost all descriptions. The Bank rate was advanced from $3\frac{1}{2}$ to 4 per cent. on Wednesday. For Sea Island the demand has been more general than of late, and prices have become steady. In American the business has been considerable, and, with more regularity, quotations are raised fully $\frac{1}{4}$ d per lb in the middle and lower grades. New York advices to the 27th instant quote middling Upland $19\frac{1}{2}$ c, costing to sell in Liverpool $9\frac{1}{2}$ d per lb by steamer. For Brazil there has been a limited demand, and prices continue unchanged for all descriptions except Santos, which has declined $\frac{1}{4}$ d per lb. Egyptian has been in fair request, and prices are without material change. West Indian is without change. Rough stapled Peruvian has been more freely offered, and prices are barely sustained; soft stapled kinds are scarce and in good demand, realising full rates. For East Indian there has been an improved demand for all grades, with less irregularity in prices, but quotations are unchanged.

In cotton "to arrive" and for future delivery the market has been active, and prices rose about $\frac{1}{4}$ d per lb in the middle of the week, but have since receded, and, after some fluctuation this morning, the latest quotations are about the same as those of Thursday last—American, basis of middling, from any port, not below good ordinary, delivery April-May 9 1-16d; May-June, $9\frac{1}{2}$ d; shipment February, 9 7-16d, $9\frac{1}{2}$ d; February-March, 9 5-16d, $9\frac{1}{4}$ d; March-April, $9\frac{1}{4}$ d; April-May, $9\frac{1}{4}$ d; not

BELFAST.—Flax—Demand was fair, at prices previously current. Yarns—Demand, without exhibiting any symptoms of activity, was tolerably fair. Stocks increased. Prices have a slight declining tendency.

NOTTINGHAM.—There is still a want of animation in the lace trade. There is a fair business doing in the hosiery trade, and should the fine weather continue, the home demand will doubtless improve.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK—March 14.

The receipts of flour the past week have been at about the average rate, but the demand for low grades has slightly improved, and prices have advanced a little. The shipping demand has been mainly for No. 2 and superfine to ship to the British provinces. But there has something been done in shipping extras for Great Britain, though this business has restricted within narrow limits, owing to the difficulty of procuring freight. In the better grades there has been some pressure to sell, especially current receipts on the wharf, in order to save the expense of storing. A disposition has been shown to accept lower prices, when, by doing so, full lines could be closed out. The net result of these circumstances upon the flour market has been a reduction in the range of quotations. The wheat market has lost a portion of the improvement of last week. The receipts of wheat at the West have fallen off, but this may be attributed in part to the want of storage room. There is no doubt that there is still a large quantity of spring and winter wheat in the hands of growers. To-day the market was dull. Corn has been somewhat irregular. There has been more pressure to sell from store, and in the past few days holders have pretty freely accepted 63½c to 64c for old Western mixed in store. Southern yellow improves in condition, and brings more money, selling at 66c to 66½c afloat. New Western arrives very slowly at all points, and is somewhat nominal on the spot, but for May and June delivery we notice bids at 62c. To-day the market was very quiet. Rye remains dull; stocks are small, and holders are firm at 90c and upward, but sales could not be pushed at much if any over 85c. In barley rather more business has been reported, but at such irregular prices that our quotations are for the most part nominal. Oats have been unsettled. Holders have made a strong effort to force up prices, but free receipts by rail, and the relative cheapness of other articles of food for animals, have prevented an advance that was realised early in the week from being maintained; good to prime new Western mixed and white have latterly ranged from 49c to 51c. To-day there were sales of strictly prime at 50c to 50½c.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The weather has been fine during the week, and has greatly assisted the progress of field-work; but its influence upon the trade has been counteracted by the continuously short supplies of English grain, and the further large falling off in the arrivals of foreign. In some of the country markets wheat has sustained an advance of 1s per quarter. The demand throughout has however been dull, and more especially so towards the close of the week. At Mark lane the quantity of English wheat to hand as been very small, and although the condition is improved the quality is bad, and sales in consequence slow. Prices are not quoted lower, but they are upheld with difficulty. The moderate supplies of foreign have been purchased with renewed caution. Odessa Ghirka has sold at 57s to 58s for good qualities, being about as before. Some new spring American has been taken off chiefly at 59s to 60s with some fine qualities at 61s and even 62s per quarter. For Californian, of which there is more offering, and a large quantity on the way, easier terms have been conceded, and the tendency is downwards. A sample of the first shipments of the new Australian wheats was shown to-day. The quality is fine, and 59s per 480lbs. cost freight and insurance is the price asked. The arrival is expected to take place in July. Flour has not undergone any quotable change, but sales have been very small. Barley, and especially malting kinds, shows rather an improving tendency. Beans firmly maintain their value, although the demand is very moderate. Peas remain as previously quoted. Maize is extremely dull of sale, and drooping in value. Arrivals of oats have been moderate, and have comprised a large proportion of light qualities; the market for them remains lifeless but there is no pressure of sales at any tangible reduction.

The annexed statement shows the imports of grain into and

exports from the United Kingdom, during the week ended March 22, and since the beginning of the season (Sept. 1):—

	IMPORTS.		EXPORTS.	
	Week ended March 22.	Since Sept. 1.	Week ended March 22.	Since Sept. 1.

Flour	101,066	3,989,634	261	11,779

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 17 grain and seed-laden vessels have arrived at ports of call, viz.—8 wheat, 5 maize, 1 barley, 3 flour. The floating grain trade has continued on the whole quiet in tone, but business in arrived cargoes has necessarily been restricted owing to the small number of cargoes offering on sale. In the early part of the week the wheat market was steady, but without any great activity. There was still some inquiry for the continent, and one steamer cargo being taken for that destination. Mid-week, owing chiefly to the improved state of the weather, less disposition was shown to purchase except at a concession in prices. Bids refused on Wednesday were yesterday accepted, and the prices paid show a decline of 6d to 9d on the week. At the commencement of this se'nnight there was no barley offering on sale. Later, one steamer cargo arrived, which has since been disposed of. The coast is now clear of cargoes on sale. Linseed quiet. Spot Calcutta nominally 64s 6d. Rape-seed neglected; ordinary brown, 58s. Cottonseed unaltered at 7 1/2s.

COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE POSTSCRIPT.

MINING LANE, FRIDAY MORNING.

SUGAR.—The prices have again ruled in favour of the buyers with a dull market. A few parcels of low brown sorts have changed hands at 3d to 6d per cwt reduction. The transactions in West India have been limited, including crystallised Demerara at 32s to 34s per cwt. Sales to yesterday, 642 casks. Other descriptions are quiet. Quotations are now 2s to 4s per cwt lower than at this date last year, brown descriptions and crystallised Demerara showing the greatest fall. No new feature in beet sugar. A moderate quantity of refined has changed hands, some export inquiry having prevailed. The stock of sugar in the United Kingdom by the latest return was 136,700 tons; against 93,500 tons last year, and 98,500 tons in 1871 at the same period. Home deliveries show an increase of 10,150 tons over the previous seasons. Arrivals of West India have been delayed by easterly winds. Landings of other kinds were moderate last week, and stocks have not undergone any material alteration.

IMPORTS AND DELIVERIES OF SUGAR in London to March 22, with Stocks on hand.

	1873	1872	1871	1870
Imported	44450	35650	31610	32150
Delivery—home use	46000	38150	44640	33720
Export	2060	1730	2680	2510
Stock	59280	36900	53500	72050

MAURITIUS.—By private contract 5,000 bags soft brown are reported at 23s 6d. A floating cargo of 470 tons, per Evening Star, sold at 23s 6d for the United Kingdom.

MADRAS.—3,251 bags chiefly sold at and after the sales at 19s 6d to 23s for brown to low yellow.

Jaggery.—1,383 bags soft sold at 18s, a few lots at 18s 6d. The remainder of the grain from last week's sale is reported sold at 19s, besides 3,000 bags at the same price.

Manila.—9,800 bags clayed at 25s to 26s 6d.

OTHER FOREIGN.—5,590 bags Pernambuco offered by auction were taken in, there being no offers made at the market value. 116 casks Honduras concrete were taken in at 26s. By private contract 1,600 baskets Java sold at 32s 3d to 34s 3d.

Beet Sugar.—A few parcels have changed hands, graining yellow at 29s 6d to 31s: white at 36s to 37s.

Refined.—The market has been steady without change as regards prices, but with rather more business doing in dry goods pieces. Clyde crushed sugars remain as last quoted.

MOLASSES.—Some West India firm, second hands has sold at 13s. 72 puncheons Demerara by auction were partly disposed of at 12s 6d to 13s 6d per cwt.

RUM.—Business this week has been chiefly restricted to Demerara at about previous rates, viz., 1s 11d to 2s for puncheons, 2s to 2s 1d per proof gallon for smaller packages, viz., hogsheads and barrels. The market is rather quiet.

COCOA.—The demand from the home trade has been steady, and the moderate quantity sold by auction, including 870 bags Trinidad realised previous rates; grey to fair, 54s to 74s 6d, and good to fine 75s to 89s. 127 bags Guayaquil were bought in. Nothing done in the latter by private contract.

COFFEE.—There has been a firm market, colory sorts bringing the full advance of last week, and East India of the new crop, including some few lots of fine Mysore, went at high prices. Native kinds, ordinary Rio and pale Jamaica do not quite support last week's rates. At the public sales 284 casks, 578 barrels and bags Plantation Ceylon sold as follows—Grey and palish, to good middling colory, 96s 6d to 99s; fine, including bold, 99s 6d to 103s; a few lots, 104s to 109s; small berry in proportion. 2,087 bags Native, at 85s to 86s for mixed to

chiefly Coorg and Wynaad; palish to good colory, 97s to 100s 6d; small berry, 94s 6d to 97s; a few lots of fine Mysore at 100s 6d to 123s. 176 half-bales Mocha at 96s to 99s for mixed to good small berry. 200 bags La Guayra partly realised 91s to 92s 6d for palish. A pile of good colory was bought in at 192s. 150 bags Rio part sold at 78s to 80s 6d for low ordinary. A few contracts have been made in Plantation Ceylon, to arrive, at 93s to 97s 6d. East India at 96s 6d to 97s 6d. 200 tons Native East India at 87s. 550 tons Manila at 85s 3d to 86s. A floating cargo of Bahia upon the basis of about 78s 6d per cwt for a near port.

IMPORTS AND DELIVERIES OF COFFEE to March 22, with Stocks on hand.

TEA.—The partial improvement in the demand last referred to having subsided a limited business is reported by private contract. At auction 10,718 packages went without material alteration in prices for Congou. Low black leaf 7d to 8d; sifting, 3d to 4d. Green teas were sold at easier rates for gunpowder. There has not been any fresh accounts of China tea but some are due. The public sales of Indian tea, amounting to 2,328 packages, have not established any alteration in prices.

RICE.—A firmer tone pervades the market. Transactions have been moderate, through the unwillingness of holders to sell at previous prices. The week's business includes fine white Bengal at 14s 6d to 14s 9d; Dacca and Askoolie at 9s to 9s 3d; button and other low sorts at 8s 1½d to 9s 1½d; 6,000 bags broken Necrancia Arracan at 8s. cash. About 5,000 tons Rangoon, chiefly March sailing, at 9s 4½d to 9s 7½d, according to condition. Two cargoes of Necrancia Arracan, comprising 2,500 tons, continental terms, at 9s 2d and 8s 10½d. 1,500 tons Japan (last week), the bulk at 13s, continental terms, with remainder at 13s per cwt ex ship for London.

IMPORTS AND DELIVERIES OF RICE to March 22, with Stocks on hand.

Deliveries last week, 3,846 tons.

SAGO.—1,904 bags by auction, part sold at easier rates; small, from low to good, 15s 6d to 17s; very dark, 14s; 100 boxes withdrawn.

SAGO FLOUR.—339 bags from Havre sold at 15s; 488 bags direct at 15s 6d.

TAPIOCA.—1,869 bags Singapore partly found buyers at 2d to 3½d for common to fine; one lot at 1½; 125 bags Penang were taken in; 161 bags pearl improved sold at 26s 6d to 27s; bold at 29s to 29s 6d per cwt. for extra bold.

BLACK PEPPER.—The market remains dull. Small sales have been affected by private contract, including Singapore, at 7d; Penang at 6½d, the latter for cash. 100 tons Singapore sold to arrive at 6½d. At the public sales yesterday 387 bag good half heavy Malabar were partly sold at 7½d per lb. 250 bags Singapore were withdrawn.

WHITE PEPPER is dull and lower. 50 tons Singapore sold to arrive at 1s, and the same price accepted on the spot for cash. 50 bags low by auction were bought in at 1s 0½d per lb.

OTHER SPICE.—62 cases nutmegs partly found buyers as follows:—Brown, 115 to 110s, 2s 8d to 2s 9d; 77s, 3s per lb. There have not been any public sales of mace. Small sales reported in Zanzibar cloves at previous rates. 128 bags cinnamon chips were chiefly withdrawn. 170 cases unworked cassia lignea by auction were bought in. 47 cases Cochinchina ginger of the new crop realised 67s for medium soft scraped, and 59s to 60s for good bold rough. 125 cases of old imports were chiefly bought in. 55 barrels Jamaica sold at 61s to 80s. 206 bags African were taken in at 48s to 50s. 327 bags pimento were only partly sold at 2½d per lb, the market being quiet.

SALTPETRE.—The market is now inactive, but during the last week about 3,500 bags Bengal have sold at irregular prices, refraction 7 to 5, at 28s 6d to 29s 3d; 15 to 10s, at 27s 6d to 28s per cwt. No further business done for arrival.

IMPORTS AND DELIVERIES OF SALTPETRE to March 22, with Stocks on hand.

	1873	1872	1871	1870
Imported.....tons	2150	3920	3120	1830
Total delivered.....	2450	2360	2660	4120
Stock.....	2280	3390	2850	2540

SHELLAC.—218 chests partly sold including fine orange at 9/ 7s 6d. A limited business privately at that price for D.C. orange, with liver at 8/ 15s per cwt.

COCHINEAL.—The public sales on Wednesday were small. 531 bags Tenerife were full prices: silver, 2s 3d to 2s 5d; blacks, 2s 4d to 2s 11d. 69 bags Lima: silvers, 1s 11d to 2s 4d; blacks, 2s 3d to 2s 5d. 8 bags Mexican: blacks, 2s 5d to 2s 9d for good.

OTHER DRY-SALTERY GOODS.—At the public sales 1,265 packages Madras turmeric sold at 14s 9d to 16s. 743 boxes China galls sold at 56s to 57s, being rather lower. Bengal quiet. The crop of safflower is expected to be short. 1,713 boxes cutch by auction rather more than half sold at lower rates, from 22s to 22s 6d. Privately business at 22s 6d to 24s, according to quality and packages. There is a better demand for gambier, with hardening prices. Sales of block at 24s to 24s 6d. 300 tons, November and December sailing, at 23s 6d to 24s per cwt, ex ship.

METALS.—A steady tone prevails in these markets. Foreign tin was at one time weaker in prices, but the market since recovered with a good demand. Straits, 146/ to 147/. Yesterday a more quiet feeling, with sales at 145/ 10s to 146/; April, 146/; to arrive, 145/ 10s. Foreign copper dearer, some large sales being reported. The prices are however still moderate. Chili has sold at 88/ to 91/. Burra and Walaroo at 95/ to 96/ 10s according to conditions, being firm rates. No change to report in British, but the market is firmer. Quotations of English manufactured are steady, and likely to remain so. Scotch pig iron has however suffered a further reduction, at one time to 117s 6d cash. The latest business has been at 118s 6d to 119s cash. Spelter quiet at the advances lately quoted. Quicksilver, 13/ 15s per bottle. The demand for lead continues good.

good ordinary. 1 cask, 182 barrels, 1,890 bags ordinary to fine ordinary Jamaica at 85s to 87s. 2,626 bags East India of the new crop.

JUTE.—There has not been much activity in the market, with only moderate transactions on the spot or for arrivals. The deliveries have been remarkably large, and nearly double those of last year, but the stock is still very heavy, viz., 140,550 bales, against 129,250 bales in 1872. Average stock was 1,871 to 1,869 inclusive at this date 55,000 bales. Dundee advices show a quiet market with an absence of speculation.

HEMP.—Of 1,050 bales Manila by auction a portion only sold on previous terms from 44/ 5s to 45s 5s, and the market is quiet. By private contract the transactions have been limited.

LINSEED remains inactive. Calcutta to arrive, 61s 6d to 62s 6d, according to date of shipment; ditto on the spot, 64s 6d. Azov, 60s 6d per quarter.

OILS.—The market for linseed oil is firm. Latest sales are at 33/ on the spot, and 33/ 5s to 33/ 10s for delivery to August. English brown rape quiet, at one time 33/ accepted, but no further sellers yesterday under 34/; next month, 34/; July and August delivery, 34/ to 35/, and last four months 36/; refined, 36/ sellers. The stock of foreign refined is exhausted. Cocoa-nut oil has been steady, with moderate transactions at 35/ to 35/ 10s for Ceylon. The range for Cochin is still 36/ to 40/, fine being scarce. Fine palm also is in limited supply, and worth 38/ 10s to 39/ per ton. Other kinds dull. Olive firmer, but no improvement in business. Sperm oil held at 95/ per tun for colonial. Other fish oils firm at the quotations.

SPIRITS TURPENTINE.—American, after selling at 44s, has since been firmer, and the quotation yesterday was 44s 9d per cwt.

PETROLEUM is in limited demand. American refined, 1s 4d; next month, ½ less, but contracts for the last four months of the year at 1s 5½d to 1s 5¼d per gallon.

HIDES.—At the public sales of East India yesterday the prices were in many cases ½d to ¾d cheaper, the demand being slow. Of 143,000 rips brought forward 98,300 sold. 16,000 buffalo hides went at steady rates.

TALLOW.—The market has been dull, and lower, the only feature being some speculative business for October to December delivery at 45s 6d, which is now the quotation. Yesterday a more steady tone. New Petersburg on the spot, 43s 6d to 43s 9d; June, 44s 3d; old, 43s to 43s 3d per cwt. The supply of Australian, &c., is again moderate at to-day's public sales.

SUGAR.—The business in West Indian to-day amounts to 662 casks, making 1,321 casks for the week. 3,212 bags Mauritius, part sold: soft brown and grey, 23s 6d and 28s; low brown, 20s and 20s 6d. 1,248 bags Madras: Native brown and yellow, 20s 6d to 24s 6d; low washed brown, 17s 6d. 360 bags Egyptian were taken in. 595 bags Natal, at 21s 6d to 26s 6d. Privately, 2,700 bags Jaggery, at 18s 3d. 17,000 bags Manila, at 22s. 1,230 bags Pernambuco, at 26s; and some Mauritius at the above quotations.

COFFEE.—57 cases East Indian by auction, sold at full rates from 98s to 101s. 354 half bales Mocha at 96s 6d to 100s. 250 bags Singapore at 79s to 80s 6d. 1,407 bags Rio were chiefly taken in. A few lots sold at 79s to 83s. 210 bags Central American realised 92s to 94s. 237 bags Sartory at 81s to 88s 6d. Further business in Plantation sorts to arrive and a floating cargo of Lantoo, sold at 82s per cwt.

RICE AND SPICE.—No change.

METALS.—Tin more in demand. Straits up to 147/; to arrive, 146/ 10s. Scotch pig iron, 119s 3d cash.

OILS.—At auction, 342 casks palm went at 33s 6d to 36s 6d; one lot Lagos at 38s 3d per cwt. 184 casks cocoa-nut were bought in: 31 tons white sold at 40/. 32 casks seal at 33/ 15s to 34/ per tun.

TALLOW.—600 casks Australian by auction. 450 casks sold at fed. rates: mutton, 43s 6d to 44s; beef, 41s 3d to 41s 9d. Town unaltered.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states, that oranges from the Azores and Spain have advanced in price, the crop of the former being nearly finished and the value of both increased in consequence. The supply of Messina and Palermo lemons is of a limited character, and high prices are realised. Black Spanish and Barcelona nuts firm. West India Cocoa nuts in demand.

ENGLISH WOOL.—Prices lower, except for Teg Matchings.

COLONIAL WOOL.—Market very firm; good enquiry; fair business doing at full rates at the close of last sales.

FLAX.—Market quiet.

HEMP.—Market very dull and but few sales recorded during the past week.

SILK.—Market declining, and business very limited.

TOBACCO.—There has been but little doing in United States tobacco during the past week, the only sales effected having been for the immediate requirements of buyers; full rates have been paid, and holders show no inclination to submit to lower prices, believing that the market will remain firm until the next import is ready for use. In substitutes and segar tobacco there has been a moderate business done.

LEATHER.—The leather market continues quiet. The supply of fresh goods at Leadenhall on Tuesday was moderate, but the demand was limited, and there was a disposition to concede slightly on the prices of light butts. The articles most wanted were light crop hides, prime light shaved hides, good calf skins of light and medium weights, and English horse hides.

METALS.—A steady business has been doing all the week. Copper

has been selling daily at rather improving rates, and the total sales have been large. Iron is extremely firm. Tin has been quiet but rather looking up at the close. Spelter has been in request and commands higher prices. Lead also is rather dearer and in demand. Tin plates continue steady

METROPOLITAN CATTLE MARKET.

MONDAY, March 24.—The total imports of foreign stock into London last week consisted of 7,524 head. In the corresponding week last year we received 17,859; in 1871, 12,311; in 1870, 8,187; in 1869, 7,944; and in 1868, 5,345 head.

Nothing of importance has transpired in the cattle trade to-day. From our own grazing districts the receipts of beasts have been less extensive, but the quality has been tolerably good. The demand was not active, nevertheless prices have been unaltered. The best Scots and crosses selling at 5s 10d to 6s per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we have received about 1,400; from Lincoln, about 30; from other parts of England, about 200; and from Scotland, 52. The foreign side of the market has been but moderately well represented. From Spain there have been 228, Holland 168, and 69 Gothenburg, in addition to 132 Hamburg beasts at Deptford. Business has not been brisk, but prices have been unchanged. The show of sheep has less extensive, owing to a falling off in the foreign receipts. With a quiet trade prices have ruled the same as last week. The best Downs and half-breds in the wool have sold at 7s 10d to 8s, ditto shorn at 6s 4d per 8 lbs. A few lambs have been on offer, and have made about 8s per 8 lbs. Calves have been quiet, and without change.

SUPPLIES OF SALE.

Table showing supplies of sale for March 25, 1873, and March 24, 1873, including items like Beasts, Sheep and lambs, Calves, and Pigs.

METROPOLITAN MEAT MARKET.

FRIDAY, March 28.—A fair supply of meat has been on offer. The trade has been slow, at late rates:—

Table showing meat prices per 8 lbs by the carcass, including items like Inferior beef, Midding ditto, Prime large ditto, Prime small ditto, Veal, Inferior mutton, Midding ditto, Prime ditto, Large pork, and Small pork.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, March 28.—The demand for good English potatoes continues good, with an improvement in prices. For foreign there if not much inquiry, and late prices are with difficulty supported.—Best Kent Regents, 200s to 260s; Essex and other Regents, 160s to 200s; Flukes, 180s to 250s; and Rocks, 120s to 240s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT).

FRIDAY, March 28.—Of the 22,000 bales of sundry foreign wools offered at public auction here this week, only about one-third has been disposed of at prices, showing a decline of about 15 per cent. from last January sale rates.

The Gazette.

be obtained at the Offices of the Company, and of the
Bankers.

IMPROVEMENTS—BY ROYAL LETTERS PATENT. WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 500 Medical
Gentlemen to be the most effective invention in the curative
treatment of HERNIA. The use of the steel spring,
so often useful in its effects, is here avoided, a soft
bandage being worn round the body, while the requisite
resisting power is supplied by the MOC-MAIN PAD
and PATENT LEVER, fitting with so much ease and
closeness that it cannot be detected, and may be worn
during sleep. A descriptive circular may be had, and
the Truss (which cannot fail to fit) forwarded by post,
on the certificate of the body two inches below the
hips being sent to the Manufacturer.

MR JOHN WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d,
postage free. Double ditto, 31s 6d, 42s, and 52s 6d,
postage free. Umbilical ditto, 42s and 52s 6d, postage
free. Post Office orders to be made payable to John
White, Post Office, Piccadilly.

NEW PATENT.
ELASTIC STOCKINGS, KNEE
CAPS, &c., for VARICOSE VEINS and all cases of
WEAKNESS and SWELLING of the LEGS, SPRAINS,
&c. They are porous, light in texture and inexpensive
and are drawn on like an ordinary stocking. Price
6s 6d, 7s 6d, 10s, and 16s each, post free.
WHITE, MANUFACTURER, 228 Piccadilly, London.

DINNEFORD'S FLUID MAGNE- SIA.

The medical profession for thirty years have
approved of this pure solution of Magnesia as the best
remedy for Acidity of the Stomach, Heartburn, Head-
ache, Gout and Indigestion; and as the best mild
aperient for delicate constitutions, especially adapted
for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New
Bond street, London, and of all other chemists through-
out the world.

HOLLOWAY'S PILLS ARE THE

medicine most in repute for curing the multi-
farious maladies, which attack humanity when wet
and cold weather gives way to more genial tempera-
tures. In fact these pills afford relief to, if they fail
to be an absolute remedy for all the disturbances of cir-
culation, digestion, and nervous energy, which at times
oppress a vast portion of the population. Under the
wholesomely purifying and strengthening powers
exercised by these excellent pills, the tongue becomes
clear, the appetite improves, digestion is quickened, and
assimilation is rendered perfect. Holloway's medicine
possesses the highly estimable properties of cleansing
the whole mass of blood, which in its renovated con-
dition, carries purity, strength, and vigour to every
tissue of the body.

DR LOCOCK'S PULMONIC

WAFERS.—25 Years' Experience.—March 24,
1873, Mr Hayland, Chemist, 20 High Ousegate, York,
writes (this week):—"My own relatives have found the
greatest benefit from them," &c., &c. They instantly
relieve Asthma, Consumption, Coughs, Colds, Gout,
Rheumatism, and all nervous pains, and taste pleasantly.
Sold by all Druggists at 1s 1½d per box.

THE GWENDRAETH VALLEY COLLIERY COMPANY (LIMITED).

Incorporated under the Joint Stock Companies Acts, 1862 and 1867.
CAPITAL, £20,000, IN 2,000 SHARES OF £10 EACH.

Issue of unallotted shares at par.

Payable, £1 on Application; £2 10s on Allotment; and £2 10s one Month after
Allotment.

The balance, as required, by calls not exceeding £2 per share, at intervals of not less than three
months.

Share warrants will be issued to bearer at the option of the applicants in exchange for fully
paid up certificates.

Applications may be made for shares to be paid in full at once, upon which interest at the rate
of 5 per cent. per annum will be allowed.

SECRETARY—G. THOMSON, Esq.

OFFICES—3 LOMBARD COURT, GRACECHURCH STREET, LONDON.

The Directors are prepared to receive subscriptions for the unallotted shares on the same
terms as originally offered to the public. Full reports on the present position and future pro-
spects of this valuable undertaking have been obtained from two experienced viewers, and can be
had from the Secretary on application.

Three veins of this Colliery have now been opened up and the air shaft sunk, which, Mr
Harris's reports, will be complete in a few days, at a further cost of about £10. The Directors,
after carefully considering these reports, have resolved to carry out to the full extent the sug-
gestions contained therein, and for that purpose now offer the remaining shares, in prefer-
ence to making further calls on the shareholders.

Forms of application may be obtained from Henry White, Esq., Stockbroker, 7 Tokenhouse
yard, London; the National Provincial Bank of England, Threadneedle street, E.C., and its
Branches; and from the Secretary, at the Offices of the Company.

PIANOS FOR ALL CLIMATES.

MESSRS BORN and CO., 13 BERNERS STREET, OXFORD STREET, W., beg to call
attention to their IRON COTTAGE PIANOS, celebrated for their POWER and BEAUTY.

These Pianos are Unsurpassed in Elegance of Design or Brilliancy of Tone, and also
Unequaled for the Excellence of their Construction and the Musical effect which they produc-

The Manufacturers pay especial attention to the peculiarities of various Climates, and con-
struct their Instruments accordingly.

Persons proceeding to India and the Colonies are specially invited to inspect these Pianos.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmo-
sphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters
the pores and forms an amalgam of the two metals, which protects the Iron from decay or
incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron
exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with
Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can
produce good work with such material. Those who have obtained the Patent White Zinc
Paint from Grinders who have not adulterated it, will never willingly use any other Paint for
their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK'S, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous
paints. Parents have remarked that their children on returning from the country to newly-painted houses have
suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs
draw in the deadly vapour."—JOHN BULL, September 14, 1850.

DUNVILLE'S OLD IRISH WHISKY, BELFAST.

Of same quality as that supplied to the In-
ternational Exhibition of 1862, Dublin Exhi-
bition of 1865, Paris Exhibition of 1867, and now regu-
larly to the House of Lords, the quality of which is
equal to the finest French brandy, may be had direct
from Belfast, in butts, hogsheads, quarter-casks, and
cases.—Quotations on application to Messrs Dunville
and Co., Royal Irish Distilleries, Belfast; or at their
London offices, 4 Beaufort buildings, Strand, W.C.

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow
spirit is the very
CREAM OF IRISH WHISKIES,

Presents a bird's-eye view of the influence upon the Money Market, of the movements of Bullion, &c., in 1872.—SUNDAY TIMES.

Will be found very useful to commercial men.—SHEFFIELD DAILY TELEGRAPH.

LONGMANS, GREEN, AND CO.

WITH THE SANCTION OF THE REGISTRAR-GENERAL.

Now ready, royal 8vo, cloth lettered, 5s; paper covers, 4s.

DIGEST OF THE ENGLISH CENSUS OF 1871.

COMPILED FROM THE OFFICIAL RETURNS, and

Edited by JAMES LEWIS, of the Registrar-General's Department, Somerset House.

* * * Dedicated by permission to the President, Vice-Presidents, and Council of the Statistical Society of London.

This Digest will be found to embody all the leading features contained in the 1190 pages of the two official folios, condensed into a volume of about 200 pages.

In the Introduction will be found a synopsis of much valuable information gleaned chiefly from the Census Reports of 1851 and 1861, which are probably not generally available for reference now, respecting the organisation by means of which the Census is taken, the various administrative subdivisions of the country, and other matters likely to prove interesting; an exposition of the chief results of the 1871 enumeration as compared with its predecessors, and a comparison of the past with the probable future growth of the Metropolis, are also given.

The Tabular matter is divided into three sections. (I.) A series of Summary Tables, in which, amongst other things, the statistics of population, of Parliamentary representation, of the value of property, and of the degree of education in the several counties, are given in a form admitting of ready comparison one with another; also a statement of the population in every City, Borough, Town, and Urban Sanitary District, alphabetically arranged; a description of the manner in which the several Dioceses are constituted; and the total number of persons in Public Institutions, on board vessels, and without homes. (II.) A series of Tables arranged so as to give a complete view of the manner in which the country is mapped out for Registration and Poor Law purposes, the population of every parish or place in the several Registration Districts or Unions being stated. (III.) An alphabetical arrangement of counties, showing under each county how it is subdivided for administrative purposes, the value of property, the population of its chief towns, and the distribution of its population as regards county and borough representation.

No efforts have been spared to ensure the correctness of every figure throughout the volume, and the Editor believes that in this respect the facts may be entirely depended on for their fidelity to the Official Returns.

London: EDWARD STANFORD, 6 and 7 Charing Cross, S.W.

DIVIDENDS 10 TO 20 PER CENT.

INCREASE OF CAPITAL OF
THE ROBUR DISTILLERY
COMPANY (Limited).

SUBSCRIPTIONS ARE INVITED (PAYABLE at the NATIONAL BANK, 22 Old Cavendish street, and all other Branches) for £30,000, in 3,000 Shares of £10 each:—

£1 payable on Application,
£2 on Allotment,
and the balance by instalments not exceeding £3 per Share, and at intervals of not less than three months.

ABRIDGED PROSPECTUS.

This Company was formed for the purpose of introducing, manufacturing, and selling the new but now well-known tea spirit, "Robur."

The Company was originally formed with a small working capital of £5,000. It was considered prudent, in the first instance, to raise only sufficient capital to enable the Company to ascertain the value of the commodity, and whether there was a market for it. Both these points have now been fully established.

The success of the undertaking is no longer a question but a fact, which the books of the Company will completely demonstrate.

The TIMES of the 24th February, 1873, contains a list of part of the agencies of the Company throughout the country.

Up to the present time very little exertions have been made to introduce the spirit into Scotland and Ireland, and none at all into foreign or colonial countries. In these countries, particularly in India, America, and the Tropics, the Directors feel confident that a very large and profitable trade can be done. But this trade cannot be opened up without bonded warehouses and additional plant. To effect these objects and further to develop the home trade it is necessary to raise additional capital, and the Directors have therefore determined, with the approval of the shareholders, to raise the sum of £35,000 by the issue of 3,500 shares. Of this sum £30,000 is now offered to the public, the balance having been applied for by the present shareholders.

The half-yearly dividend just paid was at the rate of £3 per cent. per annum free of income tax; but as this was, in fact, only earned during the last three months, it is equal to a dividend at the rate of £18 per cent. per annum, and when the Company is enabled to store and mature the spirit and to ship it in bond the Directors feel confident that even a larger dividend than this will be obtained.

No promotion money has been paid, and the Company has been brought out at a very small expense.

The following are some of the many favourable opinions which have been given of the spirit:—

"It is a pure spirit, singularly free from fusel oil, with which most brandy and whisky are largely contaminated. It is extremely palatable—most so when mixed like toddy, with hot water and sweetened. It contains a considerable percentage of theine, with tannin and sugar. It leaves on the palate the pure flavour of tea, and no more wholesome spirit can be found. As a spirit intended for popular use, it has many great merits. It does not tempt to intemperance, for it rather helps than muddles the intelligence; and if Robur were substituted for gin, brandy, or whisky, it would, we think, be a clear gain to the cause of temperance."—British Medical Journal of March 15, 1873.

"That it is at once a stimulant, a nerve tonic, and an aid to weak digestion, follows from its composition; and these effects have been verified in practice. . . . As an alcoholic beverage its qualities speak for themselves. It is, we fully believe, more wholesome and far less liable to abuse than other of the customary forms of spirit."—The London Medical Record, 18th March, 1873.

"From the analysis of the new spirit, 'Robur,' it appears to be a cordial and tonic stimulant, holding in solution, in a very agreeable form, ingredients calculated to exhilarate the system without subsequent depression. Being pure, it must take a high position as a spirit for augmenting the vital forces, and displacing many of the pernicious drinks that now flood the market, to the manifest injury of the public."

"JAMES TEEVAN, F.R.C.S.
"30 Chesham street, Belgrave square, S.W."

"I have chemically examined specimens of 'Robur' procured from the Robur Distillery, and also from the shop of Mr Jonathan Puckeridge, of Oxford street. The properties of the two specimens were the same."

"The principal substances contained in 'Robur,' according to chemical analysis, are alcohol, tannin, theine, sugar, and some tonic-flavouring principles. None of the fusel oil of grain spirit can be detected, nor is there anything found that can be in any way regarded as an adulteration either for the purpose of increasing the bulk or cheapening the sale."

"The spirit is pleasant to the taste, and has the flavour and constituents of tea, hence its name tea spirit. It may be recommended as a substitute in all cases where distilled spirits are used as an ordinary article of diet, or where they are prescribed medicinally."

"There can be no doubt of its superiority as a medical stimulant to the common forms of brandy, whisky, and rum."

"Robur is also entirely destitute of acidity."

"EDWIN LANKESTER, M.D., F.R.S.
"68 Belsize park, N.W."

"The Analytical Sanitary Commission,
"2 Adelphi terrace, Strand, London,
"28th August, 1871."

"I have made an analysis of the spirit termed 'Robur,' and find it to consist of grain spirit, together with the constituents of tea. The combination is a remarkable one, and there can be no doubt but that the action is materially modified by the presence of the tannin and theine of the tea. It was quite free from fusel oil."

"ARTHUR HILL BASSALL, M.D.,
"Author of 'Food and its Adulterations,'
"Adulterations Detected, &c."

The contract with the vendors, and memorandum and articles of association can be seen at the Offices of our Company's Solicitors, Messrs Sharpe, Parkers, Pritchard, and Sharpe, 41 Bedford row.

Prospectuses and forms of application for shares may be obtained at the Company's Bankers, the National Bank, 22 Old Cavendish street, W., and all the other branches; of Messrs Cooper Brothers and Co., 13 and 14 George street, Mansion House, E.C. (the Company's Auditors); and of the Secretary, at the Company's Offices, Bonny street (North London Railway Station), Camden Town, N.W.

OFFICES—13 NEW BROAD STREET, LONDON, E.C.
Messrs. MATHESON and Co. are authorised to receive Subscriptions for the above Share Capital.

PROSPECTUS.

1. The Company is formed for the purpose of constructing a line of railway, about 62 miles in length, from the port of Tucacas, in the Caribbean Sea, to the celebrated copper mines of Aroa, reputed to be the most extensive and the richest in the world. The mineral wealth of these mines is authenticated by the personal inspection of competent persons, including Mr. John Hawkshaw, late President of the Institute of Civil Engineers, and others, whose reports are appended to the Prospectus.

2. The mines are situated about 1,200 feet above the sea level; the deposit, a vast lode of about 100 feet wide, is worked by horizontal adits, and without any pumping or other expensive mining machinery; hence the ore, which is of a quality yielding from 15 to 40 per cent. of copper, and in some cases of a much higher per centage, can be raised at very small outlay. The realisation of the wealth of these mines has hitherto been retarded by the expense of bringing the ores to a port of shipment—the only means of transport being by mules and boats, involving great delay, and an expenditure incompatible with profits.

3. There are no engineering difficulties whatever throughout the entire line of the railway, which could be worked so as to yield profitable results on the copper ore tonnage alone, guaranteed as hereinafter mentioned by the New Quebrada Company.

4. The New Quebrada Company, Limited (the proprietors of the land through which the railway will run), have agreed to lease the lands required for the construction of the railway and its accessories to the railway company for 999 years, at a nominal rent of £20.

5. As security for dividends upon the share capital of this Company, the New Quebrada Company bind themselves to deliver a minimum quantity of twenty thousand tons of copper ore annually, for transport by the railway, for which they will pay to this Company £4 5s per ton or £85,000 (eighty-five thousand pounds) per annum, being of itself equal to a guaranteed dividend of 10 per cent on the share capital, after allowing for estimated working and other incidental expenses, as well as interest, and the annual sinking fund on the debentures.

6. The following are additional sources of income, which may be fairly calculated on, viz.:—

(a) For all copper ore carried in excess of the above minimum of 20,000 tons, containing over 13 per cent. of copper, this Company will be paid £3 12s 6d per ton, and for ore of a smaller percentage a rate of not less than £2 per ton.

(b) In addition to copper ore, other mineral deposits, including gold, silver, and coal, are said to exist on the property of the Company, which produces also, in almost inexhaustible quantities, valuable hard-woods and timber, such as rosewood lignum vite, fustic, and mahogany.

The prospective aggregate dividend from these sources is estimated by the Directors at not less than 8 per cent, which, with the guaranteed dividend of 10 per cent. above-mentioned, will make altogether 18 per cent. on the capital.

7. From the situation of the mines, which are approached by horizontal adits, and not by sinking shafts, as is generally the case, the out-put is not liable to be interfered with by the irruption of water; and while, in the numerous reports which accompany the prospectus, only one mine (the Aroa) is referred to as being able alone to produce a minimum of from 20,000 to 24,000 tons a year, three other mines, as shown on the map, the Titiana, San Antonio, and the Comaragua, would, it is believed, if opened up, be capable of producing an equal quantity of ore of a quality not at all inferior.

8. Messrs. Matheson and Co. have accepted the agency of the New Quebrada Company, Limited, for the consignment and sale of the entire produce of the mines, and under a special agreement they will apply the proceeds in the first instance to paying the amount due to this Company for transport, &c., holding the balance at the disposal of the New Quebrada Company, Limited. In this way the payment of the guaranteed amount of the charges of transport will be secured through that firm. It has been arranged that two of the Directors of this Company shall also be members of the Board of the New Quebrada Company, Limited, and vice versa.

9. The New Quebrada Company, Limited, may, upon giving twelve months' notice at the end of ten years from the opening of the railway, acquire the entire undertakings of this Company upon repayment to them of all sums expended on, or standing to the debit of, capital account, with a bonus of 30 per cent.

10. Contracts have been made with Messrs. Thomas Brassey and Co., for the supply of all the material and rolling stock for the railway, and with Messrs. Barnett and Gale for the building and construction. Messrs. Barnett and Gale have had large tropical experience in railway works, the Grand Trunk line of railway connecting Madras and Bombay having been in great part completed by them, together with other important Indian Government works. Under the contracts the line will be completed and equipped within two and a quarter years; but the contractors anticipate that the whole will be open for traffic in about 15 months. The railway works will be of a most substantial character, and the sleepers and bridges being of iron, the line will be durable and cheaply maintained.

11. The Directors have satisfied themselves that the capital of the Company, with the proposed issue of debentures, will amply suffice to defray the entire cost of constructing, equipping, and working the railway and the terms of the construction contract fully provide for its due completion.

12. Provision has been made for the payment, for two years during the construction and completion of the railway, of interest at the rate of 7 per cent. per annum, half-yearly, upon the paid-up portion of the share capital of the Company.

REVENUE.

13. On the above basis the annual income of the Company from the time of its being opened for traffic would, in the estimation of the Directors, be—

I.—GUARANTEED ANNUAL INCOME.	
Guaranteed revenue from New Quebrada Company, Limited, for the transport of 20,000 tons of copper ore at £4 5s per ton	£85,000
	£85,000

II.—ADDITIONAL PROSPECTIVE ANNUAL INCOME.

Beyond this guaranteed traffic the Directors confidently believe that the Revenues will be increased from the following sources:—

(1.) By an additional quantity of copper ore beyond the guaranteed minimum of 20,000 tons, say 10,000 at £3 12s 6d	36,250
(2.) Transport of timber and other products	4,000
	40,250

£125,250

III.—EXPENDITURE.

Management, maintenance, &c., labour and haulage for the guaranteed traffic of 20,000 tons

For additional estimated traffic	17,000
	10,000
	27,000
Interest on debentures and sinking fund for their redemption in 10 years	33,000
	60,000

Leaving net annual income available for dividends on capital of £250,000

Or over 18 per cent. per annum, which will be further augmented as the debentures are paid off.

Applications for shares must be made in the enclosed form, accompanied by a deposit of £1 per share, to be sent to Company's Bankers. If no allotment be made the deposit will be returned in full.

Prospectuses and forms of application may be obtained at the bankers', brokers', or offices of the Company.

The contracts entered into are as follows:—

Between Messrs. Thos. Brassey and Co., and the Bolivar Railway Company, Limited, (dated) 28th March, 1873.

Between Messrs. Barnett and Gale and the same Company, (dated) 28th March, 1873.

Between Messrs. Barnett and Gale and Lieut.-Col. Strange and John C. Bowring, Esq., (dated) 28th March, 1873.

Between the New Quebrada Company, Limited, and the Bolivar Railway Company, Limited, (dated) 28th March, 1873.

Between the New Quebrada Company, Limited, the Bolivar Railway Company, Limited, and Messrs. Matheson and Co., (dated) 28th March, 1873.

Between Messrs. Hopcraft and Co., and the Bolivar Railway Company, Limited, (dated) 3rd March, 1873.

And the same, with the Articles of Association and other documents, may be inspected by intending subscribers at the Offices of the Solicitors of the Company, Messrs. Bischoff, Bompas, and Bischoff, 4 Great Winchester Street Buildings, E.C.

The SUBSCRIPTION LISTS for SHARES in the above Company will CLOSE on WEDNESDAY, the 2nd April, for London, and on the following day (Thursday) for the Country.

CITY OF HAMILTON, CANADA
WEST, STERLING DEBENTURES OF 1864.
The City Bank have received the usual remittance to provide for the Coupons maturing 1st prox. Three clear days are required for their examination.
London, 22nd March, 1873.

PENNSYLVANIA RAILROAD
SIX PER CENT. CONVERTIBLE STERLING BONDS.
The DIVIDEND WARRANTS, due on the 1st April next, on the Pennsylvania Railroad Six per Cent. Convertible Sterling Bonds, negotiated through T. Wiggin and Co., will be PAID on the 1st April, or any succeeding day (Friday excepted), between the hours of 10 and 2, by the London, Asiatic, and American Company, Limited (T. Wiggin and Co.), 26 Old Broad street, E.C., where lists may be obtained as usual.
The Warrants must be left two clear days for examination.
26 Old Broad street, London, E.C.

The dividend warrants must be left three clear days for examination.
The dividend warrants annexed to Scrip Certificates not fully paid will, according to the terms of the prospectus, be received as part payment of the call due on the 1st April.
Such dividend warrants, together with the Scrip Certificates attached, must be presented on the 1st proximo to the Imperial Bank (Limited), together with the sum required to complete the payment of the call then due.
BISCHOFFSHEIM and GOLDSCHMIDT,
As Agents for and on behalf of the Erie Railway Company.
Founders' court, Lothbury, London, March 15, 1873.

SOUTH OF AUSTRIA AND
UPPER ITALY RAILWAY COMPANY.
Bondholders of the Series X. are informed that PAYMENT of the half-year's interest, falling due on the 1st April, will be made from that date at the following places:—
Paris—MM. de Rothschild Frères;
Marseilles—At the Syndicate of the Agents de Change;
Lyons—MM. P. Galline and Co., and Veuve Morin, Pons, and Morin.

SOUTH OF AUSTRIA AND
UPPER ITALY RAILWAY COMPANY.
Shareholders are informed that a General Ordinary and Extraordinary Meeting will be held in Paris on Tuesday, the 29th April, 1873, at Three in the afternoon, in the Salle Herz, 48 Rue de la Victoire.

As an Ordinary meeting to hear the report of the Board of Directors, approve of the accounts of the year 1872, if thought proper, and fix the dividend.

And, as an Extraordinary Meeting, to ratify the conventions agreed to between the Board of Directors and the parties interested: (1) for the execution of a line of eight kilometres from Trofarello to Chieri; (2) for the concession, construction, and working of two branches, from Rovigo to Legnano, and from Rovigo to Adria, also for a small line from Legnano to Verona; (3) for the concession, construction, and working of a small line between Mondovi and Bastia; (4) for the concession, construction, and working of a line between Udine and Pontebba, with an eventual extension to Tarvis, on the Austrian territory; (5) for the working of the line from Vienna to Pottenatorf, of which the Wiener-Bank-Verein has the concession.

The General Ordinary and Extraordinary Meeting will consist of all proprietors of not less than forty shares, which must be deposited at least fourteen days before the date of the Meeting at any of the following offices:—

Paris—At the Share Deposit Office, 17 Rue Lafayette;
London—Messrs N. M. Rothschild and Sons;
Vienna and Turin—At the Company's Office;
Milan—MM. C. F. Brot;
Geneva—MM. Lombard, Odier, and Co.;
Lyons—MM. P. Galline and Co., or Veuve Morin, Pons, and Morin.

In exchange for the titles deposited will be given a certificate and a card of admission to the meeting.

Shareholders entitled to attend the General Ordinary and Extraordinary Meeting may be represented by delegates provided with proxies; but themselves having a right to attend.

The proxy must be written on the back of the certificate of deposit, and must be presented by the 15th April, 1873, at the latest.

The resolutions which shall be submitted to the General Ordinary and Extraordinary Meeting can only be adopted by an assembly representing at least one-fifth of the capital, or 160,000 shares. Proprietors are earnestly requested to attend personally or by proxy.

PANAMA RAILROAD COM-
PANY'S FIRST MORTGAGE BONDS, 1875.
The DIVIDEND on these Bonds, due 10th April next, will be PAID on that or any succeeding day, between the hours of Ten and Two, at the Offices of the Howe Machine Company, N. P. Stockwell, Manager, 150 Cheapside, E.C., where forms may be obtained. Coupons must be left two clear days for examination.

PANAMA RAILROAD COM-
PANY'S GENERAL MORTGAGE BONDS.
The DIVIDEND on these Bonds, due 10th April next, will be PAID on that or any succeeding day, between the hours of Ten and Two, at the Offices of the Howe Machine Company, N. P. Stockwell, Manager, 150 Cheapside, E.C., where forms may be obtained. Coupons must be left two clear days for examination.

TASMANIAN MAIN LINE
RAILWAY COMPANY (Limited).
Notice is hereby given, that the Interest due 1st April, 1873, on the Five per cent. perpetual debenture bonds of this Company, will be PAID at the Union Bank of London, 2 Princes street, E.C., on and after that date. Interest coupons are attached to the fully paid bonds.
Holders of provisional certificates can obtain the definitive bonds and Warrant for Interest to 1st April, by lodging their Certificates at the Offices of the Company three clear days previously.—By order,
J. B. DAVISON, Secretary.
113 Cannon street, E.C., London,
21st March, 1873.

ANGLO-AMERICAN RAIL-
ROAD MORTGAGE TRUST.
Capital, One Million, in certificates of £100 each.
Price of subscription, £85 per certificate.
Coupons will be attached to each certificate for interest, payable quarterly, at the rate of six per cent., equal, at the price of issue, to 7 per cent. per annum.
The certificates will be redeemed at par by yearly drawings out of the surplus income.
So soon as nine-tenths of the certificates shall have been paid off at par by drawings, the whole of the subscribed capital, with any accumulations, will be divisible pro rata among the holders of the remaining certificates.
Thus on a capital of one million, the holder of each of such last-mentioned certificates will receive £1,000 for each £85 invested, in addition to 7 per cent. per annum during the existence of the Trust, and a share of any surplus income.
Subscriptions will be accepted in first mortgage bonds of American Railways as hereafter explained.
The certificates will be issued to bearer, but a register will be kept for the convenience of those holders who desire to register their certificates.

The object of this Trust is to afford a reliable and convenient medium for the investment of money in First Mortgage Bonds of American Railroads, a class of Securities which, while yielding a considerable higher average rate of interest than those selected by Foreign Government Securities Trusts, are more steady and safe.

Railway debentures in this country yield from 4 to 5 per cent., whilst in the United States First Mortgage Railroad Bonds pay from 7 to 9 per cent.

Such bonds take the place in the United States of our debentures, are most convenient and negotiable securities, and in the event of interest or principal remaining unpaid, for a stated time after payment becomes due, the holders have the power to foreclose, and pay themselves.

Moreover, besides their lien on the franchises and equipments of valuable railways, many of these mortgage bonds are further secured by enormous land grants, or State guarantees or by traffic guarantees of several co-operating lines.

The ANGLO-AMERICAN RAILROAD MORTGAGE TRUST will not only afford investors the means of acquiring investment in a most desirable species of security, but will give the best possible assurance against loss from any unforeseen catastrophe, inasmuch as not more than ten per cent. of the capital will in any case be invested in any one mortgage stock, and in general not so large a proportion.

The total length of railways completed in the United States is upwards of 60,000 miles, whilst for the whole of the United Kingdom the completed length is less than 16,000 miles, and it is estimated that during the next ten years the length of railways in the United States will be more than doubled. The profit realised by railways in the United States is nearly 50 per cent. greater than that obtained upon the capital employed than is the case in this country.

American Railroad Mortgage Bonds, which, on an average, pay better than British Colonial Bonds, are, like our railway debentures, pre-eminently steady and safe. Judiciously selected their security is all but absolute, and assurance is rendered doubly sure in the case of the proposed Trust by the area over which its investments will be distributed.

It appears to be almost certain that specie payments in the United States will be resumed within the next four or five years, and the resumption will be followed by an increase in the value of currency mortgage bonds to the extent of 10 to 15 per cent.

The following statement illustrates what would be the result of an investment of 10,000 dollars, nominal, in the mortgage bonds of 20 well-known American railways, taken from one of several lists, and will demonstrate the principle and prospects of the Anglo-American Railroad Mortgage Trust. An investment of, say 10,000 dollars, nominal, at the present market prices in such railways, including a certain proportion of interest payable in currency, would cost in currency 188,375 dollars, and would produce an annual income in currency of 15 dollars 126/70, or an average annual interest on the investment of 8-116 per cent. per annum. But in the above-mentioned investment interest to the amount of 7,900 dollars is payable in currency; so that with each decrease in the gold premium, this 7,900 dollars would increase in value, until, when gold arrives at par, it would be worth as much as 8,611 dollars currency. In other words, the decline of gold to par would increase the average annual rate of interest on the above investment to 8-39 per cent. Moreover, it is to be remembered that the purchase price of 188,375 dollars, to be invested, represents a price paid of 200,000 to be paid back as the mortgages mature, and this in the specie value which they will have resumed long before then. But 209,000 dollars in specie is equal to 218,000 dollars in currency with gold at a premium of only 4 per cent., so that the premium to be reaped on the expiring of the mortgages will amount to 31,625 dollars. This spread over the period of the existence of the Trust would give an addition of 1-129 per cent. per annum, which would raise the annual interest to 9 1/2 per cent.

It is proposed to pay annually out of the profits, 6 per cent. (or equal to 7 per cent. on the price of issue), leaving the surplus to provide for the half-yearly drawings, the expenses of management, and the formation of a reserve fund.

The securities in which the capital will be invested will be lodged with the Trustees for safe custody, but the selection of such securities will be entrusted to the Committee for the certificate-holders.

The Trust will terminate (it is proposed), on the 31st December, 1895, but should nine-tenths of the certificates have been paid off before that date, it will be closed so soon as such proportion shall have been paid, and the assets divided among the remaining certificate-holders.

Subscribers will enjoy the following advantages:—

- 1st. Security, based on the wide distribution of the investment.
- 2nd. Annual interest at 7 per cent. on the amount paid on subscriptions.
- 3rd. Bonus of 15 per cent., by the repayment of capital at par to those whose amounts shall have been drawn for redemption.
- 4th. Share of the remainder of the capital eventually divisible among those certificate-holders who remain their interest in the Trust at its termination.

The £100 certificates will be issued at the price of £85, applications for which must be accompanied by a deposit of £5. Payments of the balance to be as follows:—

- £10 on allotment.
- £20 on 15th April, 1873.
- £20 on 15th May, 1873.
- £20 on 14th June, 1873.
- £20 on 15th July, 1873.

Discount at the rate of 5 per cent. per annum will be allowed on calls paid in advance.

Subscriptions may, if desired, be paid in stock or first mortgage bonds of such American railways as may be determined by the certificate holders' committee, at the price of the day of application. The selection and acceptance of the several securities will be left to the judgement of the committee, with the view of securing a fair average. Applications must be made in the form accompanying the prospectus.

The ordinary yearly expenses of Offices and management have been fixed at one-half per cent. on the nominal amount of capital, and no other expenses will be incurred beyond the remuneration of the trustees and committee and such further disbursements (if any) as may be considered necessary by the certificate holders' committee.

The amount of preliminary expenses, including advertising, printing, brokerage, ad valorem, and other stamps, legal and other expenses up to the date of each allotment of certificates, and also all expenses which the Trust may incur in purchasing and transferring the Bonds, in which the capital is to be invested, have been fixed at a commission of 2 per cent. on the nominal amount of capital subscribed.

In cases where no allotment is made, the deposit will be returned forthwith, without deduction. If a less number be allotted than applied for, the surplus deposit will go towards the payment due on allotment.

The operations of the Trust will be commenced, notwithstanding the full amount of capital, may not in the first instance have been subscribed.

Copies of the proposed Deed of Trust may be seen at the Offices of the Solicitors and Agents.

Prospectuses and forms of application may be obtained from Messrs Martin and Co., Bankers, 68 Lombard street. Messrs Billingham and Wood, Solicitors, 13 Poultry. J. L. Dalley, E-q., Broker, 75 Old Broad street. And from the Agents of the Trust, Messrs J. H. Rudall and Sons, 3 Brabant court, Philipot lane.

AMERICAN SECURITIES.

Holders of American First Mortgage or Consolidated Bonds desirous of exchanging the same for certificates of the ANGLO-AMERICAN RAILROAD MORTGAGE TRUST, can obtain the necessary form for this purpose at the counting-house of Messrs J. H. Rudall and Sons, 3 Brabant court, Philipot lane, E.C., Agents to the Trust.

BANK OF SOUTH AUSTRALIA.

This Bank will commence business by the receipt of deposits and the supply of blank forms of cheques for amounts of £10 each or under, on the 3rd day of June next.

It has been established on a new system, originated by Mr Hertz, to afford facilities to various classes who have hitherto been unable to avail themselves of the advantages of banking, and also to extend the use of cheques of the Cheque Bank, to numerous purposes for which cash payments have hitherto been required.

It is intended to be an auxiliary and not an opponent of all Banking institutions already established.
All cheques must be drawn on the forms provided by the Bank.

No blank cheques will be supplied until the maximum amount for which it can be filled up has been paid to the credit of the Cheque Bank with any one of the banks with which it is in relation, or deposited with the Cheque Bank at any of its own offices. No cheques on this bank against an overdrawn account can, therefore, be in circulation. No cheque can be filled up for a greater amount than £10.

Every blank cheque will bear stamped on its face the full amount for which it may be drawn, but it may be filled up for any less sum.
Convenient books will be provided, each containing ten cheques of the same maximum denomination, which may be from £1 each to the limit of £10. The charge for each book will be 1s, which includes the Government stamps.

Undrawn balances will be carried forward to the credit of the customer.
All cheques will be crossed and payable to order, and, therefore, as they will require endorsement by the person in whose favour they are drawn, necessitate his giving by such endorsement proof of payment to him.

A simple, safe, and economic plan has thus been provided, for the following, amongst many other purposes:
1. Persons hitherto without banking accounts, can deposit their cash at the Offices of the Cheque Bank, or pay the same to the credit of the Cheque Bank, to any Banker in relation with it, and may, at their convenience, receive cheque books for the amounts deposited.
2. Payments of household and petty expenses in London and the suburbs.
3. Allowances to wives, daughters, minors, widows, and annuitants.
4. Payment of charitable donations and subscriptions.
5. Remittances of small sums to the country or abroad.
6. Petty cash payments and office expenses of Merchants, Warehousemen, Manufacturers, Companies, and others.
7. Payments of quarterly or monthly salaries.
8. Disbursements by commercial travellers.
9. Travelling expenses in the provinces, or abroad.
10. The use of foreigners in lieu of circular notes, or letters of credit.

The Cheque Bank will not pay interest on deposits, will not discount bills, nor make advances, nor enter into any financial transactions. All moneys received will be deposited with the banks in relation with the Cheque Bank, Limited. The names of such Bankers will be published from time to time.

The Cheque Bank will commence business on the 3rd day of June next.

DOMINION OF CANADA, PROVINCE OF QUEBEC.

Issue of £46,000 Six per Cent. Sterling Debentures, in 460 Debentures of £100 each, payable to Bearer.

Issue Price, £96 10s per Cent., with Interest Accruing from January 1, 1873.

Messrs Jay and Co. are authorised to receive subscriptions for £46,000 in sterling debentures of £100 each, of the Municipality of the County of Compton, Province of Quebec, Dominion of Canada, bearing interest at six per centum per annum, from the 1st January, 1873.

The principal is repayable on the 1st of July, 1896.

The interest is payable half-yearly, on the 1st of January and the 1st of July, by coupons attached to the debentures.

Both principal and interest will be payable in London, at the Bank of Montreal, Lombard street.

As the debentures now offered will carry the half-year's coupon, due July 1, 1873, the net cost to the investor will be under £95 per debenture, and the interest over 6½ per cent.

The debentures are issued by the Municipality of the County of Compton, as a Municipal Corporation, under the authority of a bye law passed by the council of the said Municipality in conformity with the provisions of the Lower Canada Municipal Act of 1860, intituled "Bye Law No. 37, authorising the Corporation of the County of Compton to subscribe for Stock to the amount of two hundred and twenty-five thousand five hundred and forty dollars currency, in the St. Francis and Megantic International Railway Company, a body corporate and politic, in conformity with the provisions of chapter 25 of the consolidated statutes of Lower Canada, and of the statutes generally in that case made and provided," and are secured upon the rateable property within the Municipality.

The debentures will be issued at 96/10s per 100l, payable by instalments as follows:—

£10 0 0 on application.
£20 0 0 on allotment.
£30 0 0 on 15th April.
£36 10 0 on 15th May.

£96 10 0

In default of payment of any of the respective instalments at their due dates, all previous payments will be liable to forfeiture.

These debentures constitute the subscription of the county to the capital stock of the St Francis and Megantic International Railway Company.

According to the existing valuation rolls, which have all been made since 1868, the rateable property within the Municipality amounts in value in aggregate to \$3,759,000, Canadian currency.

Applications for debentures must be made on the form accompanying the prospectus, and forwarded to Messrs Jay and Co., Bank Chambers, No. 38 Throgmorton street, London, E.C., accompanied by cheque for amount of deposit, crossed to the Bank of Montreal.

Scrip certificates to bearer will be issued against allotment letters and bankers' receipts, and will be exchanged for debentures and coupons after the issue price is paid up.

A certified copy of the bye law under which the issue is made, may be seen at the Offices of Messrs Thomas and Hollams, Solicitors, Mincing lane, E.C.

Prospectuses and forms of application may be obtained of Messrs Jay and Co., No. 38 Throgmorton street; Messrs Thomas and Hollams, Mincing lane; and at the Bank of Montreal, Lombard street.

LONDON AND SAINT KATHARINE DOCK COMPANY.

The Directors are prepared to receive proposals of Loans on Debenture Bonds, bearing interest at the rate of 4 per cent. per annum, for 3, 5 or 7 years, to replace others which have to be paid off. They will also issue 4½ per cent. Preferential Stock to a limited amount, particulars of which may be ascertained on application to the Secretary.—By order,

T. W. COLLET, Secretary.
London and St Katharine Dock House,
109 Leadenhall street, March 18, 1873.

In Bonds of £100 each, having 10 Years to run from the 1st of January, 1873, with Half-Yearly Coupons attached, dated July and January.

Principal and Interest payable at the Bank of Montreal, 27 Lombard street, London; or at Toronto, Province of Ontario, Canada.

Messrs JAMES SHEPHERD and CO., of 10 Old Broad street, London, are authorised by the Toronto, Grey, and Bruce Railway Company of Canada to receive subscriptions for the above-mentioned 66,000 of their First Mortgage Bonds, being the balance of 247,000—the whole authorised amount of Mortgage Debt upon the Railway, 155 miles in length—or an average first charge debt of only £1,600 per mile. Of the above sum of £247,000, £71,000 has been already placed in Canada, and £110,000 in England, the balance of £66,000 being the sum now offered for subscription. The charter incorporating the Company requires that prior to the issue of the Bonds, an amount equal to the bond debt shall have been actually expended upon the works out of the share capital, and the Government and Municipal bonuses granted in aid of the construction of the line, and this expenditure has accordingly been made. The proceeds of the bonds now offered for subscription are for the purpose of completing and equipping the extension from Orangeville to Owen Sound, a distance of 68 miles. The price of issue is £92 per £100, payable as follows:—£10 on application; £40 on allotment; £42 on 10th April—£92.

The Bonds carry interest from the 1st of January last, so that their net price is reduced to £90 5s. At this price, calculating their redemption at par, these Bonds will yield to the investor a rate of interest exceeding 8 per cent. per annum. The Bonds will be exchanged for the bankers' receipts upon payment in full.

Applications, accompanied by a payment of £10 per cent., will be received on the enclosed form.

The Act of Incorporation may be seen at the Offices of J. Brend Batten, Esq., Solicitor, 32 Great George street, Westminster.

Default in payment of the instalments at the dates fixed will render all previous payments liable to forfeiture. In the event of no allotment being made, the deposit will be returned in full.

BANKERS.—Bank of Montreal, London; and Bank of Toronto, Toronto.

This Company was incorporated for the purpose of constructing a Railway upon the narrow-gauge system of 3ft 6in from the City of Toronto to Orangeville, and thence to Owen Sound, with an extension to Mount Forest, and thence through Teeswater to Kincardine, on Lake Huron. Owen Sound is known as the best harbour on Lake Huron and the Georgia Bay, and the importance of the Railway to the district which it serves may be gathered from the fact that the County Council of Grey has voted as a gift the sum of \$300,000 in aid of its construction. It may also be mentioned that there are sometimes stored at the ports on the shores of these lakes upwards of half a million bushels of "bread stuffs," all of which (with the facilities for transport which the Toronto, Grey, and Bruce Railway will, when completed, afford) will be carried to Toronto as the best distributing point for shipment either to Europe or to the United States. The total area between the Grand Trunk and the Northern Railways is about 7,000 square miles, and is of the richest soil in the whole Dominion of Canada. This Railway intersects this district, which abounds with valuable timber and other products, hitherto untouched, and with important water power privileges, now being made available for manufacturing purposes. As an instance of the rapid growth of the country following upon the opening of a railway, it may be mentioned that the town of Orangeville has doubled its population since the commencement of the works of the line, three years ago.

According to the returns just published by the Bureau of Statistics, giving the census of the Dominion of Canada for the year 1871, it appears that the population of Toronto, which was 30,775 in 1851, had increased in 1861 to 44,821, and in 1871 to 56,092. In Bruce county the population had increased from 2,837 in 1851, to 40,514 in 1871, or nearly 1,600 per cent., and in Grey county it had increased from 13,217 in 1851 to 59,395 in 1871, or nearly 500 per cent.; and this extraordinary development, the official report adds, is general all over that section of the country.

The bonuses or free gifts granted to the Company, including those from the Government of Ontario, the City of Toronto, the County of Grey, and Town of Owen Sound, and the other townships through which the line passes, amount in the aggregate to \$1,159,000, the whole of which has been given as a free gift in aid of the construction of the Railway.

The proceeds of the Bonds now offered for subscription are for the purpose of finishing and equipping the section between Orangeville and Owen Sound, a distance of 68 miles. The opening of this extension, which is expected to take place in August next, will not only develop a lucrative traffic upon the section itself, but will also greatly increase the net earnings of the whole Railway.

The Company has secured extensive station and wharfage accommodation in the harbour at Owen Sound, the terminus of the Railway being within half a mile of the Town Hall, and by the arrangements which have been made for transshipping, freight can be loaded and unloaded at a minimum of cost direct from the ships to the cars, and vice versa. The Company has also secured equal facilities for receiving and discharging freight at Toronto.

The line between Toronto and Mount Forest, a distance of 87 miles, has been in partial operation since June last, but it was not until the 30th of September that the works were sufficiently completed between Orangeville and Mount Forest, a distance of 38 miles, for that section to be taken from the contractors; but with all the drawbacks of working an unfinished railway, the net revenue for the past six months leaves a margin over and above the working expenses (exceptionally heavy under the circumstances just stated), of more than sufficient to pay the interest upon the whole of the Bond Debt (\$700,000) apportioned to the Toronto and Mount Forest section of the Railway.

The extent of Railway now in operation is 87 miles—viz., from Toronto to Mount Forest.

The section now under construction is 68 miles—viz., from Orangeville to Owen Sound.

The distance from Toronto to Owen Sound is 120 miles.

In regard to the traffic prospects of the current year, the Superintendent of the Railway estimates that the gross traffic likely to pass over the line during the present year between Toronto and Mount Forest will exceed \$200,000, which estimate is fully borne out by the traffic of the last three months, against \$147,890 of last year, or an increase of, say, 35 per cent., and with, of course, a corresponding reduction in the percentage rate of working expenses. The completion of the line to Owen Sound, which makes (as will be seen by the map accompanying the prospectus) the Toronto, Grey, and Bruce Railway the most direct route between Lake Superior and Michigan and the Great North-West and Toronto, will secure so large a proportion of the valuable "through traffic" from the Upper Lakes, that it is confidently expected that the gross traffic will be almost immediately doubled. The rails are now laid all the way to Owen Sound, and the line will be opened for traffic in August next in time for the "fall" business of the present year.

From the above facts it will be seen that these First Mortgage Bonds constitute a first-class and undoubted security, yielding at the same time a high rate of interest.

Prospectuses and forms of application can be had on application to Messrs James Shepherd and Co., of 10 Old Broad street, London.

TORONTO, GREY, AND BRUCE RAILWAY COMPANY OF CANADA.

Notice is hereby given, the SUBSCRIPTION LIST for the Seven per Cent. First Mortgage Bonds of the above Railway will CLOSE on MONDAY NEXT, March 31, for London, and on TUESDAY, April 1, for the Country.

JAMES SHEPHERD AND CO.

10 Old Broad street, London, E.C.

CHILIAN GOVERNMENT FIVE PER CENT. LOAN, 1873.

Authorised by Laws of the Republic, dated the 4th January and the 26th December, 1872.

£2,276,500, in Bonds of £1,000, £500, and £100 each.

Redeemable at Par, by an Accumulative Sinking Fund of Two per Cent. per Annum, by semi-annual Drawings,
PRICE OF ISSUE, £94 PER CENT.

The **ORIENTAL BANK CORPORATION**, as Agents for the National Bank of Chili, duly empowered and acting on behalf of the Chilian Government, hereby invite Subscriptions for the Bonds of the above Loan.

The Loan will be represented by Bonds to Bearer, for £1,000, £500, and £100, bearing interest until repayable under the operation of the Sinking Fund, at the rate of £5 per cent. per annum from the 1st day of March, 1873, with Coupons attached, payable in London, at the Office of the Oriental Bank Corporation, on the 1st day of March and the 1st day of September in each year.

An accumulative Sinking Fund of £2 per cent. on the entire nominal amount of the Loan will be applied by means of semi-annual drawings in the months of January and July in each year, the first drawing to take place in January, 1874.

The Government reserves to itself the right of increasing from time to time the sum applicable for redemption of the Bonds.

The Bonds drawn will be payable on the 1st day of March and the 1st day of September next after each drawing.

The Subscription price is £94 per £100 payable by instalments as follows:—

£5 per Cent. on Application.		
£10	—	Allotment.
£20	—	2nd May, 1873.
£20	—	3rd June, 1873.
£20	—	1st July, 1873.
£19	—	1st August, 1873.

£94 per Cent.

Allottees will have the option of paying up in full on allotment or on any of the above dates, under discount at the rate of £5 per cent. per annum.

In default of payment of the respective instalments at their due dates all previous payments will be liable to forfeiture.

Applications must be made in the enclosed form, but no application will be entertained unless accompanied by a deposit of £5 per cent. on the nominal amount of the Bonds applied for.

Where no Allotments are made the amount deposited will be returned. In cases of Allotment the deposit will be applied in whole or part as the case may be to the payment of the £10 per cent, due on allotment.

Scrip Certificates to Bearer will be exchanged against Allotment Letters and Bankers' Receipts as soon as possible.

£1,700,000, part of the Loan, will be applied exclusively towards the completion of the railway between Curico and Angol, on the Southern frontier, in conformity with the Law dated the 26th December, 1872, under which the railway is specially pledged and mortgaged for the due and punctual payment of the principal and interest of the Loan, *pro tanto*.

Forms of application can be obtained of the Oriental Bank Corporation; of Messrs Steer, Lawford, and Cuerton, 51 Threadneedle street; and of Messrs J. and A. Scrimgeour, 18 Old Broad street, Brokers.

LONDON, 28th March, 1873.

The Lancashire and Yorkshire Bank, Manchester.

The Staffordshire Joint Stock Bank (Limited), Bilston, Walsall, and Branches.

Barnetts, Hoares, and Co., 60 Lombard street, London, E.C.

AUDITORS—Chadwicks, Adamson, Collier, and Co., London and Manchester.

This Company is formed for the acquisition of the well-known coal and iron works of Messrs Boaz Bloomer and Son, situated and carried on for 30 years past at Pelsall, near Walsall, South Staffordshire. They are disposed of in consequence of the advanced age of the senior partner, who desires to retire from active business.

These works are situated upon the Wyrley and Essington Canal, the produce being discharged at once into boats. By private railways belonging to the works, and running direct into the mills, they are connected with the London and North-Western Railway, three-quarters of a mile distant.

The coal mines are chiefly at Pelsall, and there surround the iron works, the coal being adapted to the iron manufacture in all its stages. They comprise about 500 acres, partly freehold and partly held on lease for terms averaging 24 years, with moderate dead rents, low royalties, and reasonable powers for renewal. Arrangements have been made for the extension of the principal lease to 50 years. The mines are cheaply worked, the depths being small, and the mines lightly watered.

They contain coal unworked to the amount of about 4½ millions of tons, sufficient alone to employ the works at their fullest capacity, including all contemplated extensions and improvements, for 50 years. This is exclusive of the yard seam, which extends under nearly the whole property.

Underlying a considerable portion of the estate are extensive beds of ironstone, including a portion of "black band."

The iron works include 2 blast furnaces (to which another might with advantage be added), 40 puddling and ball furnaces, 6 rolling mills, and all the usual and requisite plant, machinery and appliances, including a liberal supply of trucks, purchased under instalments, and now nearly paid for.

The brand of iron produced at these works is well known and highly esteemed in the Staffordshire and other districts as well as the continental markets.

Connected with the works are superior houses and cottages, and a small freehold estate, producing a nett annual revenue of £813.

The average annual production has been of late about 100,000 tons of coal, and 15,000 tons of pig iron. Of finished wrought iron, in the production of which the greater part of the coal and pig are absorbed, the annual amount is 17,000 tons.

The purchase money will amount to the sum of about £150,000, being the amount of a valuation of the works and property based on their productive capacity, and on the profit realised for a series of years past, together with the addition of the value of the stock of materials in hand at the time of transfer.

The valuation has been made for us by Mr William Armstrong, of Chester-le-Street, and Mr Edward Williams, the Manager of Bolckow, Vaughan, and Co. (Limited), Middlesborough.

The purchase money will be payable as follows:—

£40,000 in shares of the Company, of which at least one-half will be retained in the vendors' hands for 5 years.

£35,000 in cash on the transfer of the works.

The balance in cash by instalments extending over 6 months.

The works have been carried on at considerable profit, and

will be transferred to the New Company in full working order the vendors paying all outgoing to the date of transfer. The bad debts for 20 years past, we are assured, have not amounted to one farthing in the pound on the turnover, and the collieries have been exceptionally free from accidents.

Power will be reserved in the articles of association to give to the officers and workmen, under proper conditions as to permanency and regularity of work, an interest in the surplus nett profits above 10 per cent. per annum after providing for depreciation and for a reserve fund for doubtful debts, accidents, and the equalisation of dividends. Thus it is hoped that loss from cessation of works through workmen's combinations and strikes, and from the short time usually worked, will be averted, and increased benefits accrue to employers and workers from the regularity and enlarged production thereby assured.

Mr Boaz Bloomer, jun., who has for some years sustained the chief management of the works, will continue his association with them as Chairman of the Board and Managing Director.

It is proposed to transfer the works to the New Company on the 31st March, 1873. The price at which they will be transferred is precisely that at which they are purchased from the vendors, being the amount of the valuations and the stores and stocks above-mentioned, and no intermediate profit or increased value has been added thereto.

The total expenses of the formation and establishment of the Company to the date of the allotment of shares, including all brokerage and agency charges, will not exceed one per cent.; and the legal charges in connection with the agreement for purchase and the articles of association of the Company, and all advertising and printing will be limited to a further half per cent. on the capital of the Company.

The only agreement entered into is dated 21st March, 1873, and made between Boaz Bloomer and Son, the vendors, of the first part, and John Oldfield Chadwick, on behalf of the Company, of the second part.

Copies of the agreement and of the articles of association may be inspected at the offices of Messrs Duignan, Lewis, and Lewis, Solicitors, Walsall; Mr Chambers, Solicitor, 65 Moorgate street, London, or of Messrs Chadwicks, Adamson, Collier, and Co., 65 Moorgate street, London, or 64 Cross street, Manchester.

Applications for shares may be made in the usual form, with a deposit of £1 per share on the number applied for. In case no allotment is made, the deposit will be at once returned, and if a smaller number be allotted than is applied for, the balance of the deposit will be applied on account of the amount due on allotment, and the surplus, if any, returned to the applicant.

CHADWICKS, ADAMSON, COLLIER, & CO.
London, March 22nd, 1873.

THE PELSALL COAL AND IRON COMPANY,
LIMITED.

Notice is hereby given, that the LIST of SUBSCRIPTIONS will be CLOSED for London, on TUESDAY, the 1st, and for the Country, on WEDNESDAY, the 2nd proximo.
