Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured covers/  
Couverture de couleur
- Covers damaged/  
Couverture endommagée
- Covers restored and/or laminated/  
Couverture restaurée et/ou pelliculée
- Cover title missing/  
Le titre de couverture manque
- Coloured maps/  
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/  
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/  
Planches et/ou illustrations en couleur
- Bound with other material/  
Relié avec d'autres documents
- Tight binding may cause shadows or distortion  
along interior margin/  
La reliure serrée peut causer de l'ombre ou de la  
distortion le long de la marge intérieure
- Blank leaves added during restoration may  
appear within the text. Whenever possible, these  
have been omitted from filming/  
Il se peut que certaines pages blanches ajoutées  
lors d'une restauration apparaissent dans le texte,  
mais, lorsque cela était possible, ces pages n'ont  
pas été filmées.
- Additional comments:/  
Commentaires supplémentaires:

- Coloured pages/  
Pages de couleur
- Pages damaged/  
Pages endommagées
- Pages restored and/or laminated/  
Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed/  
Pages décolorées, tachetées ou piquées
- Pages detached/  
Pages détachées
- Showthrough/  
Transparence
- Quality of print varies/  
Qualité inégale de l'impression
- Includes supplementary material/  
Comprend du matériel supplémentaire
- Only edition available/  
Seule édition disponible
- Pages wholly or partially obscured by errata  
slips, tissues, etc., have been refilmed to  
ensure the best possible image/  
Les pages totalement ou partiellement  
obscurcies par un feuillet d'errata, une pelure,  
etc., ont été filmées à nouveau de façon à  
obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/  
Ce document est filmé au taux de réduction indiqué ci-dessous.

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public  
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives  
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

NOTE.—When the Sun is slow, Equation to be added to Apparent Time—  
When the Sun is Fast, Equation to be subtracted from Apparent Time.

## ECLIPSES OF 1863.

In this year there will be two Eclipses of the SUN, and two of the MOON.

I.—A PARTIAL ECLIPSE OF THE SUN, May 17th, visible in Europe and the north western part of North America.

II.—A TOTAL ECLIPSE OF THE MOON, June 1st, partly visible as follows:

Total Phase ends, . . 7th. 15m., P. M., } Mean time at Boston.  
Moon leaves shadow, 8h. 22m., P. M., }

III.—AN ANNULAR ECLIPSE OF THE SUN, Nov. 11th, visible in the Southern Ocean.

IV.—A PARTIAL ECLIPSE OF THE MOON, November 16th, visible as follows:  
Moon enters shadow, 2h. 31m., A. M., } Mean time at Boston.  
Middle of Eclipse, . . 4h. 12m., A. M., }  
Moon leaves shadow, 5h. 5 m., A. M., }

MORNING AND EVENING STARS OF 1863.

The Planet *Venus* (♀) will be *Evening Star* until September 28th; then *Morning Star* to the end of the year.—*Mars* (♂) will be *Evening Star* until October 2nd; then *Morning Star* to the end of the year.—*Jupiter* (♃) will be *Morning Star* until April 12th; then *Evening Star* until October 31st; then *Morning Star* to the end of the year.—*Saturn* (♄) will be *Morning Star* until March 23rd; then *Evening Star* until October 2nd; then *Morning Star* to the end of the year.

## LIGHT HOUSES.

*Board of Commissioners for the several Light Houses in the Bay of Fundy.*—Hon. S. L. Tilley, Charles Watters, James Steadman, G. L. Hatheway, and John McMillan. R. W. Crookshank, Esq., Secretary; George W. Smith, Accountant.

*Cape Sable Seal Island Light.*—The first Light in approaching the Bay of Fundy, is on the South Point of the Seal Island. This is a plain white Light, elevated about 80 feet above high water mark, and may be seen in approaching the Island from any point of the compass. A very dangerous rock, under water, but upon which the sea always breaks, called *Blonde Rock*, lies about  $3\frac{1}{2}$  miles S. by W. by compass, from the Light House. Between this rock and the Island, there are some dangers—the ground is rocky throughout, and large vessels, therefore, ought not to attempt passing between them.

*Brier Island Light.*—In advancing up the Bay, the next Light is situated on Brier Island, about half a mile N. E. from the N. W. point thereof. A plain white light

*Digby Gut Light.*—The next light on the coast of Nova Scotia is placed on the west side of Digby Gut—from Brier Island North Eastward. The coast is very bold and not indented; the Light is therefore chiefly intended as a guide into Digby Basin—A white Light.

*Gannet Rock Light.*—This Light is intended to warn vessels of their approach to a very dangerous range of shoals and ledges, which extend from the Old Proprietor to the Seal Islands off Machias, a distance of about twenty miles. It is a flash light—white—twenty seconds dark and forty light in each minute. The Light House is painted in stripes, vertical, black and white

*Bearings and Distance by Compass from the Gannet Rock Light House.* This Light bears from the Light house on Brier Island, N. N. W.  $\frac{3}{4}$  W. 22 miles.

From the Gannet Rock to the Old Proprietor E.  $\frac{1}{4}$  S. distance 7 miles.

From the Gannet Rock to the Black Rock, off White Head Island, N. E.  $\frac{1}{4}$  E. 7 miles.

From the Gannet Rock to the South West Head of Grand Manan, N. N. W.  $6\frac{1}{2}$  miles.

From the Gannet Rock to the Northernmost of the Murr Ledges, N. W.  $\frac{1}{2}$  N.  $2\frac{1}{2}$  miles.

To the Southernmost of ditto, called Saint Mary's Ledge, W. S. W. 2 miles.

From the Gannet Rock to Machias Seal Island, W and by N.  $\frac{1}{4}$  N. 13 miles.

NOTE.—Between the Northernmost and Southernmost of the Murr Ledges, there is a range of dangerous rocks and shoals, many of them always above water, and which extends Westward from the Light House about four miles; from this range, farther Westerly, about six miles from the Gannet Light, lies a dangerous breaker called the *Bull*. This may be avoided by keeping three remarkable headlands near the S. W. end of Grand Manan, open.

From Brier Island Light to the Old Proprietor, N. and by W.  $\frac{1}{4}$  W.  $18\frac{1}{2}$  miles

The Blonde Rock from the Southernmost point of the Cape Sable Seal Islands S. and by W.  $3\frac{1}{2}$  miles distant.

**Machias Seal Island Lights.**—There are two fixed white lights upon the Machias Seal Islands, elevated about forty-five feet above high water, and bear from each other E. S. E. and W. N. W. distant about 200 feet, by which circumstance of two Light Houses at the same station, they will be immediately distinguished from all other lights upon the coast, (British or American) Both the Buildings are painted white. The following are the bearings from them, viz:

- To the Southernmost Murr Ledge, (St. Mary's) E. S. E. easterly.
- " Gannet Rock Light E. by S.  $\frac{1}{4}$  S. 13 miles.
- " Southern Head of Grand Manan, E. by N.  $\frac{1}{4}$  N.
- " Northern Head of Grand Manan. N. E.  $\frac{1}{4}$  E.
- " N. E. Rock, distant 2 miles, N. E. by N.
- " Little River Head, N. by W.
- " Libby Island Light House, (American.) N. W. by W.

Vessels standing to the Northward, between these Lights and the Gannet Rock, should tack or haul off the moment they bring these Lights in one, as they will not then be more than three fourths of a mile from the Murr Ledges, if more than five miles to the East of the lights.

It is recommended that the Ship's Compasses should be well compared and adjusted (particularly in new ships), before they leave Partridge Island, as serious errors have frequently occurred from want of attention on this point; and as the variation in the Bay of Fundy is seventeen degrees Westerly, or ( $1\frac{1}{2}$  points) it will be found by the latest published Admiralty Charts, that the course from Partridge Island down the Bay (South Channel) between the Old Proprietor and N. W. Ledge, is S. W.  $\frac{1}{4}$  S., but the course to be steered must depend on the direction of the wind on leaving Partridge Island.]

**Head Harbour Light.**—Next in order after passing Grand Manan and the plain white Light, (American) on West Quoddy Point, is Head Harbour Light. This is placed on the North East extremity of Campo Bello, and is a guide to vessels entering the main Channel to West Isles, Moose Island, and the inner Bay of Passamaquoddy; it enables vessels also at all times to enter Head Harbour—it is a fixed white light. The building is painted White, with a red cross on it.

**Point La Preau Lights.**—Upon this projecting head land two lights are placed, one above the other, in the same house, and distant 28 feet—Both lights can be seen from every point of the compass, where they may be useful—both are fixed and white. The Light House is painted red and white, in stripes of five feet broad each, horizontally.

**Partridge Island Light.**—This light at the entrance of the River and Harbour of Saint John, having been established upwards of forty years, requires no particular notice, further than that it is a fixed white light, and that the Light House is red and white, in vertical stripes.

**Beacon Light.**—Within Partridge Island, and upon a Spit or bar which extends about half a mile S. S. E. off Sand Point, and which dries at two-thirds ebb, stands the Beacon Tower. Upon this Tower a light is established, which is eminently useful to the coasting trade of Saint John, and to all other vessels having pilots on board, as it enables them to enter the harbour at all hours of the night. A fixed white light. The House is white and black, in stripes vertically.

**Quaco.**—A revolving white light is placed on a small rock off Quaco Head, showing twice full and twice dark in a minute. This light can

be seen from any quarter where a vessel can approach. The Light House is painted white and red in horizontal stripes.

**Cape Enrage Light.**—On the point of that name, in Westmorland, nearly opposite Apple River Harbour, N. S. A plain white light. The House is painted white, and is about 120 feet above tide mark.

**West Quoddy Light.**—This is an American Light, and is placed on the West side of the entrance into the Saint Croix by Lubec and Eastport.

**Cape Forchu Light.**—On Cape Forchu, on the western side of the entrance to Yarmouth (Nova-Scotia), in lat. 43, 39, N. long, 66, 8. W. It exhibits a plain revolving light—visible one minute and a quarter, and invisible half a minute. The building is painted white and is elevated 135 feet above the level of the sea.

**Grindstone Island Light.**—An Octagonal Tower, sixty feet above the level of high water on Grindstone Island, in Chignecto Bay, in Lat. 45° 43' 13" N. Long. 64° 37' 25" W. The Tower is painted white, as is also the Keeper's house, one story, situate about 50 feet to the Eastward of the Tower.

Bearings and distances of several places from the above Light House, as follows: Cape Enrage Light, by compass, S. 81½ W., 10 1-7 miles.

Highest Point of St. Mary's Ledge, by compass, N. 40 W., 6-10 mile.

The point of low water off the Light House, by compass, S. 78 W., 2-10 mile.

Jones' Ledge, N. 10 W., 3-10 mile, it dries at low springs and has about 2 1-2 fathoms on it at half tide.

A Sand Bank, S. 15 W., 6-10 mile, it has 1½ fathoms on its shoalest part at lower water springs.

**Grand Manan.**—There is a Light House and Keeper's House at the "Swallow Tail" on the North Eastern part of the Island of Grand Manan, in the Bay of Fundy. The Light is 45 feet from Base to Deck; the point on which it stands is 163 feet above high water, making 148 feet elevation. This is a conspicuous mark in the South Channel between Brier Island and Grand Manan. Both Houses are painted White.

### SIGNALS.

Displayed at Partridge Island, on the approach of Vessels to the Harbour of Saint John.

- One ball close, for one square-rigged Vessel,
- One ball half hoisted for two ditto.
- Two Balls close, for three Vessels
- Two Balls separated, for four ditto
- A Pendant of any colour, for five ditto
- A ditto under a Ball, for six ditto
- A ditto over a Ball half hoisted, for seven ditto
- A ditto under two Balls close, for eight ditto

A ditto between two Balls separate, for nine ditto  
 A Flag of any colour, for ten or more ditto  
 The above are displayed at the East or West yard arm, according to the direction in which the Vessels are at first observed, and as soon as their rig can be distinguished, descriptive Colours will be hoisted at the mast head, in the following order:  
 A Union Jack for a Flag Ship, with or without a squadron.  
 " with a Red Pendant over, for a two-decker  
 " with a Blue Pendant over, for a Frigate  
 " with a white ditto, for a small armed vessel  
 A blue Pendant for a Merchant Ship  
 A red ditto, for a Merchant Brig  
 A white and blue ditto, for a Foreign Vessel  
 A white ditto, [without a ball,] for a Topsail Schooner or Sloop.  
 A blue Flag pierced white, for a steamboat from Saint Andrews or Eastport.  
 A Red Flag pierced white, for a Steamboat from Digby  
 A Red Flag with a white square, for a Steamboat from Boston  
 A Ball at the mast head, Vessel is on Shore or in distress

### RATES OF PILOTAGE,

*Established by a Law or Ordinance of the Common Council of the City of Saint John—passed 3d August, 1848.*

Five Shillings per foot, for bringing any Ship or Vessel into the Harbour of Saint John, and mooring her into a safe place or berth, or securing her alongside of one of the Wharves; and Five Shillings per foot for removing and taking any Ship or Vessel out of the Harbour.

In cases where Pilots shall be detained on board of Vessels, under and by Virtue of the Quarantine or Health Laws of the Province, they shall be entitled to demand and receive from Masters of such Vessels, the sum of Ten Shillings per day, for every day of such detention, in addition to the allowance aforesaid.

Coasting Vessels, going from one part of the Bay of Fundy to another, British Steam Boats, or British Vessels drawing under six feet of water, are not compelled to take pilots; when employed, they are to be paid according to the rate above mentioned.

For removing Vessels from any mooring ground to any Wharf, or from one Wharf to another Wharf, and seeing them properly moored or secured, the following rates: For Vessels not exceeding One Hundred Tons, Seven Shillings and Sixpence; for Vessels over One Hundred and not exceeding Two Hundred Tons, Ten Shillings; for Vessels over Two Hundred and not exceeding Three Hundred Tons, Fifteen Shillings; and for all Vessels over Three Hundred Tons, the sum of Twenty Shillings.

*First Distance.*—From Patridge Island to Musquash Cove Head, bearing North West, Five Shillings per foot.

*Second Distance.*—From Musquash Head to Point LePreaux, bearing North West, Six Shillings and Threepence per foot.

*Third Distance.*—From Point LePreaux to North Head of Grand Manan, bearing North West—or North Channel, bearing South East, Seven Shillings and Sixpence per foot.

*Fourth Distance.*—From the North Head of Grand Manan—or North Channel as aforesaid—to Machias Seal Island, bearing South, or Brier Island bearing South South East, Eight Shillings and Ninepence per foot.

*Fifth Distance.*—Any where outside the aforesaid distance, Ten Shillings per foot.

### HARBOUR MASTER'S FEES.

On Vessels of 30 Tons and under 50, 2s. 6d.; Vessels of 50 Tons and under 75, 3s. 9d.; 75 and under 100 tons, 5s.; 100 and under 150 tons, 6s. 3d.; 150 and under 200 tons, 7s. 6d.; 200 and under 300 tons, 10s.; 300 and under 400 tons, 12s. 6d.; 400 tons and upwards, 15s.; Decked Vessels, under 100 tons, owned and registered at Saint John, and all British Vessels under that tonnage trading within the Bay of Fundy, or arriving from Ports to the Northward of Cape Cod, or the Westward of Cape Canso, or from any Port in Nova Scotia, to pay annually as follows: Under 30 tons, 3s. 9d.; over 30 and under 50 tons, 5s.; over 50 and under 75 tons, 6s.; over 75 and under 80 tons, 10s.

*RATES OF WHARFAGE, established by Act 5 Vict. cap. 49, in the City of Saint John and Parish of Portland.*—For every decked vessel, or wood boat, of the burthen of 40 tons and under 1s. 6d. per day; above 40 tons, and under 50, 1s. 9d.; above 50, and under 60, 2s.; above 60, and under 70, 2s. 3d.; above 70, and under 80, 2s. 6d.; above 80, and under 90, 2s. 9d.; above 90, and under 100, 3s.; above 100, and under 120, 3s. 6d.; above 120, and under 150, 4s.; above 150, and under 180, 4s. 6d.; above 180, and under 200, 5s.; above 200, and under 220, 5s. 6d.; above 220, and under 240, 6s.; above 240, and under 260, 6s. 6d.; above 260 and under 280, 7s.; above 280, and under 300, 7s. 6d.; above 300, and under 320, 8s.; above 320, and under 340, 8s. 6d.; above 340, and under 360, 9s.; above 360, and under 380, 9s. 6d.; above 380, and under 400, 10s.; above 400, and under 450, 11s. 3d.; above 450, and under 500, 12s. 6d.; and 1s. 3d. for every additional 50 tons.

### RATES OF SLIPPAGE AT THE CORPORATION SLIPS.

All Decked Vessels, same rates as for Wharfage; Wood Boats, and other Boats, or undecked Vessels, having standing Masts, and all Scows, and not lying at the wharves on either side of Slips, to pay the following rates:

Every Woodboat of sufficient burthen to carry 10 Cords of Wood, or under, 3s.  
ditto ditto upwards of 10 Cords, and not more than 15, 5s.  
ditto ditto upwards of 15 Cords, and not more than 20, 7s. 6d.  
ditto ditto upwards of 20 Cords, . . . . . 10s.

The above to be paid each trip, and if any such Vessel remains over six days, an additional duty to be paid of from 2s. 6d. to 5s. daily, according to the burthen. Other Boats and Vessels without decks, and having fixed or standing masts, and all Scows, to pay 1s. 6d. each trip and 1s. 6d. additional per day, if suffered to remain over three days.

*RATES OF FERRIAGE ACROSS THE HARBOUR OF ST. JOHN*—Foot passenger, 2d.; Child under twelve years, 1d.; Horse, 3d.; Ox, or other large animal, 3d.; Elephant or Camel, 1s. 3d.; sin-

gle Waggon, not loaded, 2d.; single waggon, with horse and one man, 6d.; single waggon, with horse, load and man, 7d.; double waggon, not loaded, 7d.; double waggon, with horses and man, 9d.; double waggon, with horses, load and man, 1s. 3d.; barrel, 1d.; bag, containing two bushels, 1d.; firkin, keg, or box of the same size, 1d.; cask of lime, 2d.; pipe, hogshead, or puncheon, whether in waggon, cart, sled, or other vehicle or not, except containing molasses, vinegar rice, or sugar 9d.; every cwt. of iron, steel, or copper, whether in waggon, cart, or other vehicle or not, 1d.—Carts, sleds, drays, and carriages, same as waggons.

**RATE OF TOLLS FOR CROSSING THE SAINT JOHN SUSPENSION BRIDGE.**—For every foot passenger, (excepting children under five years of age,) 2d.; horse, mare, gelding, mule, ass, ox, cow, or other large animal, 4d. each; elephant or camels, 2s. 6d.; carriage, sleigh, waggon, cart, sled or other vehicle, drawn by one horse or beast of draught with one person, with or without a load, 7 1-2d.; horse or beast of draught, more than one, with a carriage or other vehicle, 4d. each; sheep, calf, hog, or goat, 1-2.

**RATES AT THE PUBLIC WEIGHING MACHINES**—Every load not exceeding One Thousand Pounds Weight, One Shilling; and One Penny for every additional Hundred Weight; payable, half by the seller, and half by the purchaser.

**HACKNEY COACH FARES.**—For conveying one passenger from any public stand to any part of the City, or from any one part of the City to any other part thereof, 1s.; and for every passenger exceeding one, 6d. additional; and if any driver of any Carriage or other vehicle, shall be detained at any place by any passenger, or shall make any agreement for carrying any passengers by the hour, he shall be entitled to ask, and receive the following rates, viz:—For any time not exceeding half an hour, 1s. 3d.; and in that proportion for every half hour that such Carriage, or other vehicle shall be detained or employed. Provided always, that in case any driver shall be required to cross the Ferry to Carleton, he shall, in addition to the foregoing fares, be entitled to demand and receive the ferriage for himself, his carriage and horses, both going and returning.

**PUBLIC PORTERS AND HAND CART MEN**—For loading, carrying, and housing any goods, or any other article on any Hand Cart, from the Market Slip in King's and Queen's Wards, or from any other place within the limits of the first district, to any other place within the said several Five districts, the rates of prices are as follow:—For the first district 3d.; second district 3 1/2d.; third district 4d.; fourth district 4 1/2d.; fifth district 5d.

**MARKET TOLLS.**—Beef, per quarter, 2d.; Calf, Sheep, Hog, Goat, Lamb, Kid, or Shoat 2d.; Tub, Pail or Jar of Butter, 1 1/2d.; Firkin, 3d.; every 10 lbs. of Roll Butter, 1d; Cheese, 1d.; load of Potatoes under 15 bushels, 3d.; ditto over 15 bushels, 6d.; load of Oysters in shell or tub, 6d.; Turkey, Goose, or dozen of Pigeons, 1d.; pair of Ducks, Fowls or Partridges, 1 1/2d.; bag of Flour, Meal, Oats, Peas, or Beans, 1d.; Ham or Shoulder, 1d.; Eggs, per 10 dozen, 1d.; and all other articles in like proportion.

**FISH MARKET DUES.**—For every Salmon, 1 1/2d.; Codfish, Pollock, Bass, or Shad, each 1d.; Halibut, not exceeding 20 lbs. 1d.; exceeding 20 lbs., and for every 20 lbs., 1d.; every Lobster, 1d.; dozen of Maddock, 1 1/2d.; every 100 of Gaspareaux, Alewives, Herrings, or other small fish, 1 1/2d.

**TIME FOR GOING THROUGH THE FALLS**—(near Saint John.)—The Falls are level or still water at about three and a half hours on the flood, and about two and a half on the ebb, so that they are passable four times in twenty four hours, about ten or fifteen minutes each time. No other rule can be given, as much depends on the floods in the River Saint John, and the time of high water or full sea, which is often hastened by high winds, and in proportion to the height of them.

D. M. 1 Th 2 Fri 3 Sat 4 SU 5 Mo 6 Tu 7 W 8 Th 9 Fri 10 Sat 11 SU 12 Mo 13 Tu 14 W 15 Th 16 Fri 17 Sat 18 SU 19 Mo 20 Tu 21 W 22 Th 23 Fri 24 Sat 25 SU 26 Mo 27 Tu 28 W 29 Th 30 Fri 31 Sat

There's a robe of snowy whiteness  
 Resting light upon the hills,  
 Where the Summer sunshine dances  
 To the music of the rills;  
 Icy fetters of the Frost-king  
 Have been thrown upon the streams,  
 On whose banks we have so often  
 Lain us down to pleasant dreams.  
 Winter winds now are sighing  
 Mournfully around the door,  
 And they seem like tongueless pleaders,  
 For the unprotected poor.

Brumal month! Thy solemn voices  
 Tell my soul of childhood's years,  
 Fill my heart with untold sadness,  
 And my eyes with unwept tears;  
 For the dead with soul-full features,  
 Pass before my mental gaze,  
 With the fleeting pleasure shadows  
 Of my childhood's happy days.  
 The storm without is raging,  
 And against the dusky pane,  
 Like the sound of demon footsteps,  
 Beats the chill and frozen rain.

Dying, dying,  
 Winter's dying,  
 In the lovely lap of Spring;  
 Spirits grieving,  
 Sad are leaving  
 Winter haunts on viewless wing.  
 Coming, coming,  
 Spring is coming,  
 For March's breezes loud and shrill,  
 In the valley  
 Sport and dally  
 With dancing daffodil.

There's joy in the valley,  
 And joy on the hills,  
 A gushing of torrents,  
 A laughter of rills;  
 An echo of gladness  
 From many a dell,  
 For Spring's happy spirit  
 Hath broken the spell.  
 We hail thee, sweet April,  
 Best month of the year,  
 Thy coming brings gladness,  
 The lonely to cheer.

I gaze upon thy sunny face,  
 Where love lies soft and warm,  
 And deem the Spring a living thing,  
 That has assumed thy form.  
 Thine eyes—the music of thy voice—  
 Thy brown and silken hair—  
 All speak without thy presence here,  
 This scene were not so fair.  
 Then welcome to the gladsome Spring,  
 For it has brought me thee—  
 A being full of light and light—  
 Like childhood bask to me.

JUNE.

Lovely June, with rosy blushes  
 Comes in costliest array,  
 And a flood of sunlight gushes  
 Forth in many a golden ray;  
 Flocks upon the hill-sides gather,  
 With their fleeces white as snow,  
 Flitting hill-top o'er and valley  
 Summer shadows come and go.  
 Swallows lightly skim the streamlets,  
 Dancing with a gush of music,  
 With a song of mirth and glee.

It is the glorious Summer time,  
 The winds are soft and low,  
 And o'er the hills, sunlight and shade  
 Alternate come and go;  
 Yes, glorious Summer now is here,  
 With all her lengthened train,  
 She sways her golden sceptre o'er  
 The fields of rip'ning grain.

The sun is shining bright and clear,  
 'Tis lovely Summer weather,  
 Sunlight and shadow gaily dance  
 Upon the grass together ;  
 While from the fields the reapers' song,  
 Is borne on every breeze along.  
 The harvest-time again is here,  
 The earth is full of gladness,  
 And though I hear the sound of mirth,  
 My heart is full of sadness ;  
 For memory's gates are open wide,  
 I weep for loved ones who have died.

Autumn sits with eyelids red,  
Weeping over beauties fled,  
By the heir of nature dead.  
Touched has been her glad array,  
Of commingled colors gay,  
By the frost-king on his way.  
Sad expressive is her eye,  
As she breathes a mournful sigh,  
On the cold winds passing by.  
By October's chilling blast,  
Moaning like a spirit past,  
Yellow leaves around are cast.

But say, hath Winter then no charms?  
 Is there no joy, no gladness, warmth  
 His aged heart? no happy wiles  
 To cheat the hoary one to smiles?  
 Onward he comes—the cruel North  
 Pours his furious whirlwind forth  
 Before him—and we breathe the breath  
 Of famished bears that howl to death.  
 Onward he comes from rocks that blanch  
 O'er solid streams that never flow;  
 His tears all ice, his locks all snow,  
 Just crept from some huge avalanche.

1863.]

## DECEMBER.

A thing half breathing and half warm,  
 As if one spark began to glow  
 Within some statue's marble form  
 Or pilgrim stiffened in the storm.  
 O! will not mirth's light arrows fail  
 To pierce that frozen coat of mail?  
 O! will not joy but strive in vain  
 To light up those glazed eyes again.  
 No! take him in and blaze the oak,  
 And pour the wine, and warm the ale;  
 His sides shall shake to many a joke,  
 His tongue shall thaw in many a tale.

## AGRICULTURAL

**OBJECTS AND RESULTS OF MANURING.**—Leading objects of manuring are to improve the general *quality* and to increase the *average* quantity or general yield of our arable farm products. All our plants are as much derived from *dead matter* as all our animals, in their substance and structure, are wholly and entirely from the products—in some stage—of *vegetable* assimilation, organization or growth. To the latter rule I know of no exception; to the former I perceive no reason for any. The plant grows by appropriating matter to large extent yielded by the decay and complete disintegration of the structure and substance of previous generations, or crops of similar plants—plants similar in quality or the ultimate composition of their substance or elements. The growth of these precursory plants was equally or more gradual and measured by conditions than that of their successors which we are cultivating. And their decay and decomposition was equally measured and *slow* with their rate of growth, because it depended upon the *same* agencies of heat, humidity oxygenic air. The nature of the forces by which plants are formed and grow, matured and decay, are still the same as aforesaid. Experience or art has not changed, and never can change, any natural process. It can modify *adverse* conditions, intensify natural processes by accumulating the agencies with which nature works. But the conditions being placed, nature does *all* the work, both of production and destruction, of organization and decay. Art does not contribute an iota in either process. Art does not exercise natural power; but only supplies conditions supposed to be more favorable to its fullest force and effect; and in this latter it often fails from imperfection of judgment, and in every failure must recur, before succeeding, to the lessons of nature for instruction.

Now do we not see that growth is *gradual*, little by little, and dependent on *many* conditions? A plant is not a boa constrictor, nor yet a marmot, that takes in a mass of food at *once*, and then sleeps in *inactivity* till its glut has disappeared, or the nature of the season changed. Manure is food to the plant, and its *regular* supply is as important to the vegetable as to an animal. Its activity in favorable weather, is as constant as heat and light, upon which it very much depends. And the simple process by which Mr. Smith of Lois Weedon, raises wheat on a clay soil *without* manure, but by *frequent cultivation*, shows distinctly the propriety and effect of a *gradual* supply of the elements of growth.

Yet in the face of all this it often is the practice to manure *heavily* for corn, which can be fed better than *any* other field crop by *cultivation*, and in this fashion supply the expected demand of *future* crops for manure, one, two, three or four years in *advance*. Paying in advance implies ample funds, but manuring so long in advance *wastes* exceedingly the fund or store of manure, however much or little. It is a *spendthrift* system, reminding one of the *fast* young man who squanders in the dreams of *anticipation* what he never fully realises—a prodigality unwarranted by the facts.

Not only are future crops *cheated in advance*, but the *quality* of heavily manured plants is often injured by being forced to a rank, coarse, disproportionate and especially inedible, *unwholesome* growth. Such is a frequent result incident to the gorge and starve system of manuring.

I have not now time to notice it further, but I have not a doubt that the loss of much of the turnip crop in England, and the club foot, and hand and finger diseases in cabbage and turnips with us is due to gorging with rank or unsuitable manure, and every cultivator must perceive in the fact that plants which owe their excellence to cultivation rather than forcing, are always superior in *quality* to those that are forced with *much* manure—that deterioration in quality is probably much of it due to injudicious modes of feeding, as to quality or quantity or both. An object of manuring is to secure the most *healthy* and *vigorous* growth; but when rank, coarse growth supercedes *healthy* vigor it leads to deterioration of quality, which in reducing its real value for economic purposes sometimes more than counterbalances the greater size or mere gross product. There is too much “haste to get rich” by striving after size, which relatively always indicates coarseness, and often leads toward results in useless or odious forms of mostrosity; and this by manuring future crops in abundance, or several in the lump, and thereby debarring the later ones of a sufficient supply of food or matter of growth, of the very means by which alone they can become either profitable or satisfactory.

Adapting means to ends, or doing the right thing at the right time, is the best guaranty of success in any business, and instead of dressing only *one* crop in a course of three to six, I should prefer to manure the same crop—of wheat particularly, as corn is more accessible to cultivation—*twice* during its growth. *Fall* wheat, besides manuring on the surface lightly after the wheat is covered at seeding, might again be lightly manured just before harrowing, as soon as the ground is dry in the spring. Oats might be manured at sowing time, and harrowed, when high enough, in the same manner. In this way soil would be loosed, abraded and turned; manure divided and broken down, and the crop *twice fed* to the full extent of its absorptive capacity, with truer economy and the best reasons for improved quality as well as augmented quantity of product.—*Correspondent of the Country Gentleman and Cultivator.*

**TOP-DRESSING.**—A correspondent of the Boston Cultivator tried an experiment with top-dressing a meadow at three different times in the year. The first was applied early in autumn, when the manure was comparatively dry, and before rain. Another portion sometime afterwards, when the soil was soaked. A third, the following spring. The first portion produced double the crop, well filled with timothy and clover. The second, (applied later and after the rain) did not yield so well. That applied in spring produced little effect, except to increase the “spire grass” at bottom. He thinks the best time is soon after the hay has been cut; last summer he manured a gravelly knoll at that time, from which

the timothy was gradually disappearing. By late autumn, the timothy had outstripped all the other grasses, and was green and fresh, contrasting strongly with the dry red top and spear grass in other parts of the field. The manure was compost, made by spreading a foot of loam and muck under the barn, where the cows were yarded over night, and ploughing it once in two weeks,—an obviously excellent and economical practice.

**THE QUANTITIES OF SEED REQUIRED TO SOW A GIVEN EXTENT OF SPACE.**—The Messrs. Drummond, seedsmen, of Stirling and Dublin, in their very useful "Directions for Sowing and Cultivating Vegetable Seeds," have given the following quantities, which is recommended to the notice of amateur readers as a safe guide to them.

*Peas.*—1 pint, or 1 lb., will sow a row from 40 to 60 feet of a single row, in which way peas should always be sown.

*Beans.*—1 pint, or 1 lb., of the middle sized bean will plant a row of 90 to 110 feet, and the larger size 70 to 80 feet.

*Kidney Beans.*—1 pint, or 1 lb., will sow a row of about 80 feet.

*Onions.*—1 oz. of seed will sow a bed (broadcast) 4 feet by 12, or 50 to 100 feet of drill.

*Lets.*—1 oz. of seed will sow a bed (broadcast) 4 feet by 14, or about 100 feet of drill.

*Carrots.*—1 oz. of seed will sow 60 to 70 feet of a row.

*Parsnips.*—1 oz. of seed will sow 100 feet of a row.

*Turnips.*—1 oz. of seed will sow from 100 to 120 feet of a drill.

*Cabbages.*—1 oz. of seed will sow a bed 4 feet by 10.

*Savoys.*—The same.

*German Greens or Borecole.*—1 oz. of seed will sow a bed 4 feet by 12.

*Brussels Sprouts, Cauliflowers, and Broccoli.*—The same.

*Parsley.*—1 oz. of seed will sow 80 feet of a row.

*Spinach.*—The same.

**DON'T COMMENCE PLOUGHING TOO SOON.**—By too soon, we mean before the soil is in a proper condition to turn up mellow and lively. Ground should always be allowed to settle after it has been frozen, before it is ploughed.

The soil is rendered lighter and more porous by freezing and thawing; and after it has been frozen and thawed it settles back to its original compactness. Therefore, if it be ploughed before it has settled, it will settle after ploughing, and in a short period of time will be as compact as if it had not been ploughed at all. But let it be ploughed or spaded after it has settled to its former compactness, and it will remain mellow and friable for a long time, unless it is excessively wet.

Every farmer should make some estimate of his ploughing and sowing, in order to know how many days will be required to complete this branch of business; and then, if the weather is unfavorable and the soil too wet, ploughing may be delayed sometimes for a longer time, or until the soil is in a proper condition to be ploughed and harrowed.

These considerations are of far more importance where clay predominates in the soil, than where the soil is sandy or loamy.

**CARE OF SHEEP IN SPRING.**—It is a prevailing custom among many farmers, to turn sheep to grass as soon as they can possibly get their living. This custom, though widely practiced should not be carried out. Sheep should be kept in a dry yard, till the grass is sufficiently high for them to get a good bite. And even *then* they should be yarded once a day, and fed corn or some other kind of grain. This is my experience, and I have kept sheep for the past twenty years, and have made sheep raising my business for the past eight years. Another practice is widely prevalent, that of letting ewes that have lambed, run with the rest of the flock. Just as soon as an ewe has dropped her lamb, she should be placed in a place separate from the other sheep, and receive extra care. An empty bay, or one that has been cut down and part of the hay pitched out, is a good place for such ewes. Too great care can not be bestowed on ewes with lambs. A little extra care, such as graining and keeping them where it is warm and dry, will be doubly repaid for, both by the extra amount of wool on the sheep and the bulk of the lamb. If your flock be a large one, and you have no convenient place in which to place your ewes, fence off the sunniest and driest part of your yard, and put them in there--or you can put them in some dry or convenient shed.

**PEAS.**—I cultivated twenty sorts last year, of which I will only mention the most desirable or valuable. The earliest is the Tom Thumb, a dwarf variety, growing 6 to 8 inches high, requiring no bush, and yielding quite as well as many of the tall sorts. Two crops may be grown on the same ground in a season. Next in season is the Dan. O'Rourke, a well known and popular variety, but not a first rate yielder. The Royal Dwarf is but a few days later, and yields better. The Eugenie, Napoleon, and others, mature next in season, and are favorites, but I have not found them reliable, sometimes dwarfing. The Lord Raglan, for instance, failed, the last three seasons. Maturing about the same time, and superior to them all, is a nameless variety received from Nourse & Co., Boston. It was derived from a single pea, found among imported seeds. It is a large white pea, resembling the Epps Monarch, but earlier, and does not grow as high. It is equal to the best in quality, and yields better than any other variety I have. To complete the succession, I plant Epp's Monarch, a splendid pea, late, a great bearer, growing 5 to 8 feet high, and requiring tall and strong bushes. A double row of the Monarch planted in June last, furnished green peas till frost came.—*Country Gentleman.*

**WHEAT AND GUANO.**—The Genessee Farmer says, if we could get \$2 per bushel for our wheat, guano might be used for this crop with profit. At \$1 it hardly pays, except in rare instances.

**CLOVER** should be cut immediately after blossoming. It should not be exposed to the scorching sun, but after being partially cured it should be forked up into cocks, and left to cure in this position.

## MISCELLANEOUS.

When the Duke of Wellington was sick, the last thing he took was a little tea. On his servant handing it to him in a saucer, and asking if he would have it, the Duke replied, "Yes if you please." These were his last words. How much kindness and courtesy is expressed by them! He who had commanded the greatest armies in Europe, and was long accustomed to the tone of authority, did not despise or overlook the small courtesies of life. In all your home talk, remember, "If you please." Among your playmates don't forget, "If you please." To all who wait upon or serve you, believe that "If you please" will make you better served than all the cross or ordering words in the whole dictionary. Don't forget three little words, "If you please."

**THE COW.**—When George Stephenson, the celebrated Scotch engineer, had completed his model of a locomotive, he presented himself before the British Parliament and asked for the attention and support of that body. The grave M. P.'s looking sneeringly at his invention said: "So you have made a carriage to run only by steam, have you?" "Yes, my my lords." "And you expect to run on parallel rails, so that it cannot get off, do you?" "Yes, my lords." "Well, now, Mr. Stephenson, let us show you how absurd your claim is. Suppose when your carriage is running upon those rails at the rate of twenty or thirty miles an hour, if you're extravagant enough to even suppose such a thing is possible, a cow should get in the way. You can't turn out for her—what then?" "*Then 'twill be bad for the cow, my lords.*"

**THE POST OFFICE WINDOW.**—A Millesian female approaches. She is short and angular, with a hatchet-spiked face and a hatchet-edged voice. "Where's me letter?" is her abrupt question. "What letter?" asks the clerk. "Niver mind now; I wants my three cints." "What three cints?" "The three cints I gev ye to sind a letther to New-Yorrick." "What do you want the three cints for, then?" "Because the letther niver wint." "And how do you know it never went?" "Because when my sister answered it she said she never got it." "How could she answer it if she never got it?" "Arrah, hould your head! Will ye give me three cints or wont ye?" "No ma'am, you must be crazy to ask it." "Is it me crazy?" "Certainly, crazy as a bed bug." "Bad luck to ye, an' is it the likes of ye that dares to call me a bed-bug? Is there niver another way of gettin' at you only through this little windy?" asked the now furious woman. "No ma'am, no other way." "Faith, an' it's lucky for you thin. Av there was I'd come and welt ye like ould shoe. Niver mind," continued the lady, as she went away, "I'll tell me husband to-night, and he'll dot the two eyes of ye, so he will."

"OH, my friend," said a doctor to an Irish patient, "be composed; we must all die once." And it's that vexes me," replied Pat; "If I could die half a dozen times I'd not care a cent about this time."

**FEMALE PORTRAITS.**—It is a curious fact which you, dear madam, young and beautiful as you are, so gentle in mind and so perfect in form, may explain to a person like myself, but little acquainted with the motives that rule your sex. Why it is I wish to know, that in all public displays, only the fat and ill-looking specimens of woman-kind take a part, and that the youthful fair invariably avoid them? I have seen heroines in every part of the globe when civil war existed, and I never knew one who had the slightest claims to be called good looking. Even the maid of Saragossa (but that, observe, was before our time), about whom so many romantic untruths have been written, was an old woman with a large family, the wife of an artilleryman, who, when he was carried off by a French shell, served his gun in order that she might secure his rations for her devoted offspring, none but combatants having claims upon the patriotic kitchen. Nay, I am convinced that Joan of Arc was an old maid, who had no other way of bringing herself into public notice, and that the Moll Flagon of one of our farces, is the true type of these martial daughters of Eve.

"I never," says Quilp, "bear any malice towards the man who, without malice, says an ill thing of me, with no intention that I should hear of it. I do the same thing to others--perhaps to him. In fact, with few exceptions, everybody talks about everybody whom he thinks worth mentioning. And what of it? Nothing--unless some tale-bearer chooses to make mischief. Accordingly, in such a case, my quarrel is with the man who brings me the news. I set him down at once for my enemy, or the weakest and most troublesome of friends, whom I am to cross out of my books as soon possible."

**AN IRISH GRACE.**—Some years ago, when the Duke of Devonshire paid a visit to his estates in Ireland, the steward of the mansion at which his grace intended to sojourn, called all the domestics together to tell them how to demean themselves, saying among other things, that their master was much higher than a Lord--he was a Duke; 'and,' said he quaintly, "whenever he speaks to you, you must say 'your grace.'" This made a deep impression on a housemaid whose province it was to conduct the Duke to his sleeping apartments. When on the stairs the Duke said, good humouredly, "Well, my girl, what is your name?" The girl, thinking of the steward's injunction, put up her hands and began, "For what I am going to receive, the Lord make me truly thankful."

**OPEN TO OBJECTION.**—Dr. Abernethy's prescription to a rich patient was, "Let your servant bring you three or four pails of water, and put it into a wash tub; take off your clothes, get into it, and from head to foot rub yourself well with it, and you'll recover."—"This advice of yours seems very much like telling me to wash myself," said the patient. "Well," said Abernethy, "it is open to that objection."

A wag says of woman—"To her virtues we give love--to her beauty, our admiration--to her hoops the whole pavement."

**ECONOMY OF PROFUSINESS.**—Economy is the parent of integrity, of liberty, and of ease; and the sister of temperance, of cheerfulness and health. Profuseness, on the contrary, is a cruel and crafty demon, that gradually involves her followers in dependence and debts, that is fetters them with "iron that enters into their souls."

**LIVING ON SMALL MEANS.**—For breakfast, eat three dried apples, without drink; for dinner, drink a quart of water to swell the apples; take tea with a friend.

**A SHYING HORSE.**—Nine out of every ten horsemen start in their seat whenever a horse shies, and then the horse is either by whip or spur driven up to the object. This makes horses look at any singular object with more nervousness, for they expect a thrashing at the same moment. The rider should neither shy himself, nor notice it in his horse; and far less punish him.

The physically blind thanks you for your guidance; the mentally blind usually rejects it with indignation.

**A REMEDY FOR SLEEPLESSNESS.**—How to get sleep is to many persons a matter of great importance. Nervous persons who are troubled with wakefulness and excitability, usually have a tendency of blood on the brain, with cold extremities. The pressure of blood on the brain keeps it in a stimulated or wakeful state, and the pulsations in the head are often painful. Let such rise and chafe the body and extremities with a brush or towel, or rub smartly with the hands, to promote circulation, and withdraw the excessive amount of blood from the brain, and they will fall asleep in a few minutes. A cold bath or a sponge bath and rubbing or a good run, or a rapid walk in the open air, or going up or down stairs a few times just before retiring, will aid in equalizing circulation and promoting sleep. These rules are simple and easy of application in castle or cabin, mansion or cottage, and may minister to the comfort of thousands who would freely expend money for an anodyne to promote "Nature's sweet restorer, balmy sleep."

**RECIPES FOR HARD AND SOFT SOAP.**—A correspondent in the *Germantown Telegraph*, offers the following recipe as one to be perfectly relied on:

Take ten pounds of soda ash, and dissolve it in twenty gallons of soft water, with twelve pounds of fresh lime and three-fourths of a pound of rosin, by boiling them all half an hour, stirring the while to keep them from setting or burning; then pour all the contents into a tub to settle, washing your kettle clean. After these contents have settled, take the clear water that comes on the top and put it in the kettle; now hunt up all your fat and skins till you get about twenty-three pounds—if clear fat not quite so much—put over the fire to boil till all the fat is eaten up; perhaps it will take two hours, or not nearly so long; then take fine salt to divide, and add salt till the hard soap comes on the top. It will at first look like froth, and the waste will look very dark in the bottom of the kettle. Pour all out in a tub. I forgot to say, fill up your tub with cold water after taking off the first clear lye,

ready to boil your soap froth with the second time ; put two good bucketsfull of this clear lye in the kettle, then with an iron ladle take all this soap froth off the top of the tub and put it in with these two buckets of lye-water, to boil again a few minutes, to make your hard soap clear and nice, adding salt till it separates well. Then pour all out in a tub, to remain undisturbed over night. In the morning you will have over thirty pounds of as nice white soap as you will wish, for either washing or toilet use, which will not chap the hands at any time. Again, if you would wish a half barrel of nice white soft soap, fill up this said lime tub again with cold water till it settles, then take the hard soap that sticks to the kettle and the pitcher that you dip out with, and three or four ladles full of your hard soap, with two pitchers full of this lye-water, and let it boil a few minutes, then fill up your kettle nearly full of the lye-water, and let boil a few minutes, then pour it out into a vessel, and you will be much pleased with the result of your labor. This soft soap will be thick and solid, and it is very nice for boiling clothes or washing, as it makes a very nice froth.

In order to have plenty of soap fat, you must begin at the beginning to save all the skins of meat, and all the fat scraps that come from your table, which, in warm weather, should be put in some of this clear lye until you get enough to make some soap. By this course, in an ordinary family, you will always have enough soap without buying.

**TO SWEETEN RANCID BUTTER.**—An agriculturist, near Brussels, having succeeded in removing the bad smell and disagreeable taste of some bad butter, by beating or mixing it with chloride of lime, he was encouraged by this happy result to continue his experiments, by trying them upon butter so rancid as to be past use ; and he has restored to butter the odor and taste of which was insupportable, all the sweetness of fresh butter. This operation is extremely simple and practicable for all. It consists in beating the butter in a sufficient quantity of water, into which had been mixed 25 to 30 drops of chloride of lime to two pounds of butter. After having brought all its parts in contact with the water, it may be left an hour or two ; afterwards withdrawn and washed anew in fresh water. The chloride of lime used, having nothing injurious in it, can safely be increased ; but after having verified the experiment, it was found that 25 to 30 drops to two and a half pounds of butter, were sufficient.

**RECIPE FOR MAKING RHUBARB WINE.**—Cut the rhubarb into small pieces, put it into just enough water to keep it from burning, boil until quite tender, strain through a coarse cloth. To one gallon of this liquid, add two gallons of water ; to each gallon thus made, put four pounds of sugar ; ferment in an open vessel forty-eight hours, then take off the scum, and add one pint of best brandy to every four gallons, after which put it into an air-tight cask ; then let remain six months undisturbed when it will be ready for bottling. In each bottle put one raisin, and seal the bottle well.

### A TABLE

*For Foretelling the Weather through all the Lunations of each Year forever.*

FORMED BY DR. HERSCHELL, AND REVISED BY DR. ADAM CLARKE.

This table and the accompanying remarks are the result of many years actual observation, the whole being constructed on a due consideration of the attraction of the sun and moon, in their several positions respecting the earth, and will by simple inspection shew the observer what kind of weather will most probably follow the entrance of the moon into any of its quarters, and that so near the truth as to be seldom or never found to fail

If the new moon, the first quarter, the full moon, or the last quarter, happens	IN SUMMER.	IN WINTER.
Between midnight and 2 in the morning,	Fair.	Hard frost unless the wind, s. or w.
2 and 4 morning,	Cold and showery	Snowy and stormy.
4 and 6, "	Rain.	Rain.
6 and 8, "	Wind and Rain.	Stormy.
8 and 10, "	Changeable.	Cold Rain, if the wind be w. ; snow if e.
10 and 12, "	Frequent showers.	Cold, and high wind.
At 12 noon, and 2 p. m.	Very rainy.	Snow or rain
Between 2 and 4 p. m.	Changeable.	Fair and mild.
4 and 6, evening.	Fair.	Fair.
6 and 8, "	Fair, if wind n. w.	Fair and frosty, if wind is n. or n. e.
8 and 10, "	Rainy, if s. or s. w.	Rain or snow, if s. or s. w.
10 and midnight,	Ditto.	Ditto.
	Fair.	Fair and frosty.

*Observations.*—1. The nearer the time of the moon's change, first quarter, full and last quarter, are to *midnight*, the fairer will be the weather during the seven days following.

2. The space for this calculation occupies from ten at night till two next morning.

3. The nearer to *midday* or *noon*, the phases of the moon happen, the more foul or wet weather may be expected during the next seven days.

4. The space for this calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to the summer, though they affect spring and autumn nearly in the same ratio.

5. The moon's change, first quarter, full and last quarter, happening during six of the afternoon hours, i. e. from four to ten, may be followed by fair weather; but this is mostly dependent on the *wind*, as is noted in the table.

6. Though the weather, from a variety of irregular causes, is more uncertain in the latter part of autumn, the whole of winter, and the beginning of spring, yet, in the main, the above observations will apply to those periods also.

7. To prognosticate correctly, especially in those cases where the *wind* is concerned, the observer should be in sight of a good *vane*, where the four cardinal points of the heavens are correctly placed.

WHEN a powerful and enlightened continental monarch, whose reign'd some centuries ago, saw his courtiers smile at an act of condescension he had just performed towards a great artist, he rebuked them in such terms as these:—"I could easily make a hundred nobles such as you, but not one painter like him who stands among us."

Whatever your necessities may be, still remember that honesty is your only wealth.

TABLE FOR CALCULATING SEAMEN'S WAGES, IN THE MERCHANT SERVICE, FROM ONE TO THIRTY DAYS.

Days	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30

NOW IS YOUR TIME TO GET A  
GOOD FITTING  
**BOOT OR SHOE.**

---

THE SUBSCRIBER HAS RECEIVED THE NOW  
UNIVERSALLY ADOPTED

# P. P. LASTS.

---

BOOTS and SHOES made upon these Lasts will give ease and comfort to all who wear them.

These Lasts are well known throughout the United States as being the Best and Most Perfect Last now in use; and all who wear Boots or Shoes made upon them are universally satisfied.

In regard to the Boot Heel, it is the advanced position rather than the length that is essential, and this can only be attained by the use of a perfectly formed last.

I will guarantee to make up any style of BOOTS or SHOES at as Low a FIGURE as can possibly be purchased elsewhere in the City.

Remember when you want ease and comfort to call on PICK and get your Boots made by him.

**POLICIES ISSUED BY**

**O. D. WETMORE, Agent, Saint John, N. B.**

**PREMIUMS AND LOSSES IN NEW BRUNSWICK CURRENCY.**

**STAR LIFE ASSURANCE SOCIETY.**

**ESTABLISHED 1843.**

**HEAD OFFICE, 48 MOORGATE STREET, LONDON**

**ANNUAL REVENUE, &c.**—There is now assured by the Society the sum of about **THREE MILLION POUNDS** on the lives of persons, represented by 7,096 Policies; and the annual revenue derived therefrom, together with interest accruing from investments exceeds **£100 000.**

**CLAIMS PAID.**—The total claims arising from death which have been discharged by the Society amount in the aggregate to **£ 31 658 15s. 5d.**, the value of which to the recipients believed of their friends can never be told.

**BONUSES.**—The distinct calculations have been made with a view of appropriating the surplus sum or profit arising from the operations of the Society; at the last, made at the beginning of the year 1853, the Actuary reported that, after putting by **£180,379 18s. 10d.** as a reserve for future contingencies, there was available for division **£67,347 15s. 9d.**

**ASSETS.**—The Assured have the security not only of the Capital Stock but of a large invested sum amounting to more than **£400,000** which, with the well known character of the Directors of the Society, is a substantial guarantee that all claims will be met with readiness and punctuality.

**PROMPT SETTLEMENT OF CLAIMS.**—Claims are paid fifty days after proof of death.

**RIFLE AND YEOMANRY CORPS.**—No extra premium required for either of these services.

# JAMES K. TION.

Every Public Building, Dwelling House, Mill, Factory, Shop, Store and Office, in this Province, may be Brilliantly Lighted at Little Cost!

For BRILLIANCY and Economy of its Light that of

## ALBERTINE,

Manufactured by THE NEW-BRUNSWICK OIL WORKS COMPANY, is superior to that of Coal Gas, Oil or Fluid!!!

☞ *NINE PENCE* worth of ALBERTINE will give more Light than *One Dollar's* worth of Fluid.

At the same cost ALBERTINE will give

- 7 times more Light than Fluid;
- 5 " " " " Sperm Oil;
- 4 " " " " Lard Oil;
- 3 " " " " Whale Oil;

And twice as much Light as Rape Seed Oil.

## ALBERTINE

Gives a Brilliant Light, is free from all danger of explosion, it does not ignite when a lighted match is placed directly in it, nor waste on exposure to the air; and may be consumed in a Lamp to the last drop within reach of the wick, without depreciation in the quality of the light.

Leading Chemists of London and New York agree that ALBERTINE is destined to supercede all Oils and Burning Fluids as a source of Artificial Illumination, and is the most valuable material for that purpose now known.

# F. A. COSGROVE,

Importer of Clocks, Watches, Jewelry,

**FANCY GOODS, &C. &C.**

Returns thanks to his friends and the public for the patronage he has received during the past seven years, and in presenting his Circular for 1862, announces his REMOVAL to the New Store

**IN ENNIS & CARDNER'S BUILDING,  
No. 48 Prince William Street,**

Where with greater facilities he will devote every effort for the encouragement of a liberal Retail Business.

Confident, by experience, that the Credit system is hurtful both to the purchaser (who has to pay in the price of Goods an equivalent for time) and to the Merchant, (who is frequently straitened by the want of outstanding amounts,) he has determined for the future to proceed on the CASH PRINCIPLE, and in this trusts to meet the approbation of the public.

The following branches have also been added to the former business :

## **KITCHEN UTENSILS,**

Comprising a great variety of Patent Seamless Enamelled and Tinned Wrought Iron HOLLOW WARE, and CUTLERY in all its branches,

These, together with ENGLISH, FRENCH, GERMAN, and AMERICAN

## **STAPLE FANCY GOODS,**

being all personally selected, are offered at LOWER PRICES than usual.

A Splendid assortment of

## **SILVER AND PLATED WARE.**

German Baskets, Morocco Travelling Bags, Spectacles, Eye and Magnifying Glasses, Parlor Games, Pipes, Ladies', Boys and Men's Belts.

## **RUBBER GOODS OF VARIOUS KINDS.**

Jewelry of every description; Clocks; Gold and Silver Watches

## **OILS, SOAPS, BRUSHES,**

PERFUMERY, STATIONERY, &c. &c.

**AMBROTYPE AND PHOTOGRAPHIC MATERIALS.**

**LADIES SKIRTS AND PAGES,** all styles and prices.

ON LISTENING TO EVIL REPORTS.—1. Hear as little as possible to the prejudice of others. 2. Believe nothing of the kind until absolutely forced to it. 3. Do not imbibe the spirit of one who circulates an ill report. 4. Always moderate, as far as possible, the unkindness that is expressed towards others. 5. Always believe that, if the other side were heard, a very different account would be given of the matter.

# COLD BROOK IRON WORKS,

W. H. SCOVIL, Proprietor.

Office---No. 9 NORTH MARKET WHARF.

ALWAYS ON HAND.
