NEIGHBORS ORDER.

S E E D S

Where the crowds congregate there must be some attraction. Where the orders go there must be some inducements offered. Our whole business is planned on the basis of giving our customers all we can in quantity and quality for their money. Most business houses plan on the opposite basis; that is, give as little as possible for the money. Examine this Catalogue, compare it with any other you may have at hand and see if it is not gotten up with your interests in view. And this is one reason why our business constantly grows, even when others' business is depressed. Our seed house during the months of January, February, March and April of each year is the busiest place in the country. To our friends and patrons we return thanks. May they ever prosper as those people do who plant O. K. Seeds. To the old customers of our house, and the new people who we hope to count as customers, we again send greetings.

OUR PRICES are O. K. also. They are based on A No. 1 First Quality Seeds. Nothing else ever enters our house. You may pay double our prices elsewhere, but we defy you to get better seeds anywhere.

FREE BY MAIL We deliver all our seeds free by mail at prices quoted, in packet, oz. $\frac{1}{4}$ lb., 1 lb., 4 lbs, pint and quart. If sent by freight or express, postage may be deducted at rate of 8c per lb. Beans and Peas 8c per pint, 15c per qt. Sweet Corn 5c per pint, 10c per quart. Keep this in mind when comparing prices. When goods are sent by freight or express the purchaser invariably pays the transportation charges, except where stated to contrary.

WARRANTY We warrant all our seeds to be O. K. or all right, and that they will grow with proper treatment, and be as represented, in so far that if they prove otherwise, we will refill the order or return the money. We exercise the greatest care to have all seeds pure, true and reliable, yet so many contingencies arise over which we have no control that we can not warrant the crop. If not accepted on these terms they must be returned at once.

OUR TERMS are cash with order. We will occasionally send goods C. O. D. if enough is remitted to guarantee charges. Express

companies charge extra to return money for C. O. D. shipments.

HOW TO REMIT a Registered Letter. This is one of the best and most convenient ways to remit, and the sender gets a receipt for the letter as soon as it reaches its destination. Every postmaster must register letters. Money Order, Bank Draft on New York, or Express. Postage stamps taken same as money in small amounts—1-cent preferred, until February 15th. 2-cent after that date.

REDUCED FREIGHT and EXPRESS Through our efforts th., railroad companies have made a lower rate on Seed Corn, Oats, Wheat, etc., going to farmers. We ship such seeds from Indianapolis for about one-half the former rate. This is an item for you to consider in placing your order. Our Express rates are 20 per cent. less than regular merchandise express rates.

PRE-PAY STATIONS. If there is no agent at your station, remit extra for the freight or we cannot ship.

GIVE FULL ADDRESS every time you write.

WE FILL ALL ORDERS IMMEDIATELY. Hence if you don't get your seeds in a reasonable time you had better repeat your order, and be sure to give the same post-office as first given.

Every Man AND HIS Pocket Book

Just see them Seeds a-growing,
They're fine, I do declare;
"O. K. Seeds"—That's the kind,
And they're growing every-
where.

The more O. K. Seeds are planted
the more money is saved at the start
and the greater returns in the result-
ing crops.

THE GREAT MAIL ORDER SEED HOUSE. From Grower to Planter.

A PLAIN TALK TO THE PEOPLE.

For years we have been selling our good O. K. Seeds direct to the planter, and number our customers by many thousands, representing probably every county in the country. Our ambition is to have our O. K. Seeds planted on every farm and in every garden in the country. We hope to accomplish this because

No Other Seeds are so Cheap, No Other Seeds are so Good.

Our idea finds favor with the consumer, who is thankful for relief from the layer after layer of greedy profits with which his seeds have been weighted down heretofore.

Why should not the producer and the consumer come close together? What good reason has any careful farmer or gardener to buy seeds at his home store? It is all right to buy sugar, tea, nails, etc., there, but all wrong to expect living vital seeds that will produce the crop you desire. Your postoffice is no doubt as convenient as your grocery. A visit to it will bring you the best seeds under the sun at *half the price you can get doubtful seed* at the grocery.

Your Neighbor may not be as fortunate as you and not receive a catalogue of O. K. Seeds. We suppose you love your neighbor, as you should; therefore go and see him and get his order for the O. K. Seeds and send with yours.

Make Some Money. In every neighborhood some person can take many orders for O. K. Seeds. In fact, should get all the seed orders, by making a little effort.

REMEMBER 100 PACKETS OF O. K. SEEDS \$2.00

40 Pkts. \$1.00, 25 Pkts. 75 cts.

Varieties price at more than 5 cents each are not included in above offers, but when combined with them we let them go at 1-2 the single packet price. See 2nd cover page and don't make any mistake about this or your order will be delayed.

The O. K. Seed House is the only one in the country where you get more than your money's worth in Seeds.

If they're from EVERITT They are O. K

PRICE YOUR Wants from any other Catalogue and also from ours and notice how much we save you.

Can we Afford to Sell O. K. Seeds at the Low Prices?

Certainly we can, and it is time some seedsmen gives relief to the long suffering seed buyer. The desire of the seedsmen has been to keep the prices up. The tendency of the times now is to put prices down. Note other lines, and are we not correct? The seedsmen who is the pioneer in real low prices should have the everlasting thanks of farmers and gardeners, and an enormous trade.

To illustrate: 1 pound of beet seed costs 13 cents and makes 100 packets, which, at the old rate, sells for \$5.00; 1 lb. of Cabbage costs 50 cents, makes about 200 packets, and sells for \$10.00; 1 lb. of Tomato seed costs 75 cents, makes about 300 packets, and sells for \$15.00, etc.

Of course we cannot afford to sell and deliver single packets at as low prices as large numbers of packets, and we gauge our prices accordingly. If it was not for the fact that we must send many catalogues out that do not bring us orders we could make even lower prices. We hope the proportion of blanks will be less this year, when we can make further concessions in favor of our customers next year.

We tell you the truth about seeds. If we deserve your order, let it come along.

EVERITT'S CELEBRATED O. K. SEEDS ARE GROWN AND SOLD ONLY BY

SEEDSMAN

The Leading Seed
House on Earth...

SHIPPING DIRECT TO FARMERS AND GARDENERS.

No difference who you have dealt with before, we will make it to your interest to deal with us in the future.

NOTICE The central location of Indianapolis (see map). We can save the great majority of seed planters money on transportation. Why send to the far North or East for your seeds when you can get them in the centre of the country, saving time and money? We deliver all seeds in small lots as explained on 2nd cover page, and some of our manufactured specialties. If other goods are ordered in quantities of 100 lbs. or more (the railroad companies charge the same on less than 100 lbs.) the freight will not be burdensome at all, but would be if you ordered from one side of the country. We depend largely for building up our trade on our ability to deliver our seeds, etc., to a customer's town at less than he can obtain them for elsewhere, at the same time giving him fresher, better goods.

RELIABILITY

As this Catalogue may fall into the hands of some who are unacquainted with our reputation for fair and honorable dealing, and who do not know our financial standing, we take pleasure in referring them to the State Bank of Indiana, of this city, or to any other financial institution or business house in Indianapolis; also to P. M., express agents, Governor of Indiana, Mayor of Indianapolis. In fact, any person who is acquainted with us and with our business. Also to Commercial Agencies. You can go to your bank or large business houses and look in the commercial directories, which will be the simplest plan. We urge every one, particularly those who have not dealt with us in the past, to make inquiry about us and our goods. We also urge them to apply the same test to other houses, and then place their order with a house of known responsibility.

Where Will You Buy Seeds?

We ask for your trade purely on the merits of our goods, and our ability and facilities to execute your orders to your satisfaction. We believe the people who receive this Catalogue are intelligent and endowed with a liberal supply of good, sound common sense. They are not the kind of people to believe seed will grow better or flowers smell sweeter if they selected the seed from a Mammoth Catalogue, or one with exaggerated pictures. The Prize-Paying Seedsmen puts up the price to allow him to pay the prizes to a few fancy gardeners. The ordinary farmer or gardener, who must hustle for a living, has few chances to get a prize, but he helps to pay for them in every packet of seeds he buys. The Northern Seedsmen deceives you in his broad claims. His "Northern" seeds are grown N., E., S. and W. the same as ours. The only difference is in the extra transportation charges you must pay. Beautiful colored illustrations please the eye, but who ever raised the crop to equal them? The biggest buildings do not shelter seeds of better quality than those of moderate size. Eastern Seedsmen

Our Seed House, No. 227 W. Washington St. People coming in on trains will go 3 squares north on Illinois St., 1 1/2 squares west on Washington St., and you are at our store. Or you will find it directly across from the State House. Everybody Welcome!

men come west to grow their seeds, and then tell the dear public to "plant only Eastern seeds." If you buy from the Seedsmen 100 years in business, you pay roundly for the privilege. Old relics come high, and usually they are not worth the money paid. Cheap Seeds, like quack medicines, are dear at any price. They will do more harm than good if they cost you nothing. In the Catalogue of O. K. Seeds you don't find great exaggerations and misrepresentation. We tell you what our seeds will do, and you can depend on them. They won't grow Beets larger than a 15-year-old girl, Tomatoes that require a ladder to climb to the top of, Sunflowers big enough for skating rinks, Carrots 3 times as large as a horse, Broom Corn that raises the brooms reads made, Beets that 2 horses, a man and a whip can not pull, or such as Barnum, the great showman, might use in his high and lofty tumbling act; Pumpkins that make a load for Jumbo, the king of elephants; Cabbages that require ladders to climb upon, Melons that "Jones, of Binghampton," would not pay the freight on, Onions that single bulbs make a wheelbarrow load and tower high above a man's head, Man-faced Cauliflower, Walking Potatoes, Ferris Wheels Tomatoes and 10-Story Cabbage Heads are some of the things we don't recommend O. K. Seeds to produce. You must place your order elsewhere if these are the crops you want to raise. Without any extravagant claims, but with a neat Catalogue, no premiums, reasonable illustrations, seeds grown where they find a suitable soil and climate, backed by facilities for handling our trade in the center of the country, we offer O. K. SEEDS and sufficient experience as Seedsmen to intelligently execute the orders entrusted to us. We send thanks in advance to each and every person who sends us an order this year.

GO OUT AND GET YOUR NEIGHBOR'S ORDER and send it with yours. Of course, you are entitled to some pay for this, and as no family will want 100 packets, you charge them the single packet price, thus making about \$2.00 on every 100 packets you sell. A good business can be done in selling O. K. Seeds. This is a splendid chance for the unemployed or those whose time is only partly occupied. School teachers particularly are favorably situated, and can add to their earnings. Send all orders to

J. A. EVERITT, Seedsman, INDIANAPOLIS INDIANA.

NEW EVERGREEN BEAN

(Introduced this Year, 1899.)

It seldom falls to the lot of any seedsman to introduce such a distinct and meritorious variety of vegetables as we have in our **New Evergreen Bean**. A Bean that is unsurpassed in its green state by any other variety in existence, or if allowed to ripen on the stalk, then pulled and cooked in the

winter, pods and all, equals the best fresh green Beans, is worthy the attention of all gardeners. This is what we have in our **New Evergreen Variety**. The Evergreen Bean has a long, round, green pod, en-

tirely stringless. Medium size pure white Beans, that if not used in the pods are equal to the best White Beans when dry and shelled. The beans in the

green state are most delicious, and remain in prime condition a long time. In fact, they never get tough; even when left to mature and dry on the stalk they can be pulled, and will cook into a tender, delicious dish of green beans.

The illustration is intended to impress upon our readers the fact that they can now enjoy a delicious dish of green beans as well on Christmas as on the 4th of July. In fact, this new bean makes it possible to have green beans every day in the year. Any garden without this new bean for 1899 will be lacking of the chief novelty and chief attraction that it might possess.

ENJOY GREEN BEANS EVERY DAY IN THE YEAR.

PRICE—Pkt. 10c, pint 35c, quart. 60c, by mail post paid.

Everitt's Alpha Pole Bean.

The Earliest Pole Bean in Existence. Can be Grown as Far North as Bush Beans. Introduced in 1896.

It is with no small degree of satisfaction that we offer this new Bean to our customers. Each seedsman aspires to be the first in offering new things, and the great competition to secure really valuable vegetables oftentimes runs the price up to high altitudes. We never let price prevent us from securing a really good article, and we paid for the stock of this bean, about 2 bushels, \$75. Our experience with it in the past proves that our investment was a wise one. There are several splendid varieties of green pole Beans, but none of them approach Everitt's Alpha in earliness by more than two weeks. This Bean is so early that it can be grown in the far north wherever Bush Beans succeed, while for any section they are unsurpassed in productiveness by any Pole Bean, whether grown on poles or with corn. The vines produce nearly all pods and very few leaves. On this account they may be planted close together, about 2x3 feet. Also are better suited to grow in corn, not pulling the stalks down like the Beans with heavy foliage. The vines keep in bearing a long time. Quality is in all respects equal to the well-known Kentucky Wonder. The color of the seed is bright yellow, which is different from any other Pole Bean, thus proclaiming them a distinct sort. They have never been known to rust or blight. Pods long, round, thick, stringless.

The Beans that are enjoyed the most are usually the ones that come first. This is the Bean to grow. Also, the Bean that brings the most money is the earliest. Here we have it again.

As soon as the merits of this Bean are known it will be grown as generally as the now famous Kentucky Wonder. Pkt. 10c, pt. 20c, qt. 35c, by mail, post paid; by express, 4 qts. 80c, peck, \$1.50.

BEANS.

The Crop of Beans was short in 1898. Prices are consequently higher than last year.

1 quart to 100 feet of row, 1-2 bushel per acre. We pay postage on beans offered by packet, pint and quart. Larger quantities are sent by freight or express at expense of purchaser. Half-bushels at bushel rates. PRICE OF ALL BY MAIL, UNLESS STATED TO THE CONTRARY, Pkt. 5c, Pt. 25c, Qt. 40c.

Davis Max.

A Wax Podded Bush Bean with Clear White Seed. Every Seedsman, every Canner, every Gardener, in short, every person who has tested this Bean, concedes that it is a great ways in advance of any other Bean of the kind ever offered. It is absolutely rust-proof, and so productive that a field viewed from a distance shows more yellow from the pods than green from the leaves. The plants are a complete mass of pods, yet they hold up well from the ground. Pods are always full of large, plump, white Beans; never a blank. Pods are larger and handsomer, flavor finer and yield greater than any other Kidney Wax Beans in cultivation. Early as Golden Wax. For canners this Bean fills a long felt want. Its pearl white Beans, combined with other qualities mentioned, make it entirely without a peer. In a test of all the principal Wax Beans, Davis Kidney yielded $\frac{1}{2}$ more than any other. Pkt. 7c, pt. 25c, qt. 40c.

Dwarf Max Podded.

VALENTINE WAX—The Earliest Wax Bean. A perfect round pod Valentine Bean, with wax pods, and the earliest Wax Bean in cultivation. The pods are very thick and meaty, with so little string that they may properly be called stringless. Free from rust, a vigorous grower and will surely become a great favorite with all gardeners for home or market. To show its extreme earliness, we need only to relate the fact that beans planted June 18 produced pods 4 inches long by July 25, and on August 1 half a crop could be picked. Pkt. 7c, pt. 25c, qt. 40c.

KEENEY'S RUSTLESS GOLDEN WAX—This new Bean is the result of many years' efforts on the part of one of the most experienced and largest Bean growers in the country. It combines hardness, productiveness and fine quality. Strong grower and rust-proof. Produces, under favorable conditions, 100 to 150 fold. Peck \$1.25, bu. \$4.50.

RUST PROOF GOLDEN WAX—This is the handsomest and hardest of all Wax Beans. Pods long, thick and rust-proof. Much excels Golden Wax in yield and is of better quality. Should be grown in every garden. Peck \$1.00, bu. \$4.00.

WARDWELL'S KIDNEY WAX—Week earlier and yield $\frac{1}{2}$ more than Golden Wax. Stalk erect. Pods long, broad, flat, brittle, stringless. Delicate waxy color. Seed white, with a reddish-purple spot. Peck \$1.00, bu. \$4.00.

CHALLENGE BLACK WAX—The first to produce a full crop of pods. This habit is of inestimable value to market gardeners. Plants are more upright than the old Golden Wax. Pods large, good color, stringless and of superior quality. Peck \$1.00, bu. \$4.00.

NEW BLACK EYE WAX—Extra early. The seed is white, with black markings around the eye. The pods are about an inch longer than the Golden Wax, and plants are vigorous in growth. It is very productive. $\frac{1}{4}$ bu. \$1.25, bu. \$4.50.

Dwarf Green Podded.

LIGHTNING EARLY VALENTINE—The earliest snap short in the country. The most profitable variety for market. This variety is well named as it is lightning quick in ripening in comparison with any other stock of this popular Bean. The pods are large, it is very productive, and, when young, entirely stringless. It can not be recommended too highly to the market gardener, as he derives his greatest profit from the earliest crop. With the Lightning Early Valentine you beat your competitor one to two weeks, which means many dollars in profits. Sure to give satisfaction. By freight or express, peck \$1.00, bu. \$4.00.

IMP. EARLY RED VALENTINE—So well and favorably known as to not need description. More extensively grown than any other tender green pod Bush Bean. Peck \$1.00, bu. \$4.00.

IMP. EARLY YELLOW SIX WEEKS—Well known old sort. Very early. Peck \$1.00, bu. \$3.50.

EARLY MOHAWK—An old sort. The hardest variety. Esteemed for first planting, as it will stand a slight frost. Peck \$1.00, bu. \$4.00.

BEST OF ALL—Pods long, fleshy and entirely stringless. Very productive. Very early and bears a long time. Peck \$1.00, bu. \$4.00.

NEW EXTRA EARLY REFUGEE—A selection from the well known Refugee, and is ready for market about the time the ordinary Refugee is in flower. An immense yielder and sure to produce a crop in either wet or dry season. Best for pickling. Peck \$1.00, bu. \$4.00.

Dwarf or Bush Lima Beans.

1 Packet of Each 15c.

BURPEE'S—This is the true large Lima in bush form, and comes true from seed. The plant grows 18 to 20 inches high, branching so much that each bush is circular and 2 to 3 feet in diameter. Pkt. 6c, pt. 25c, qt. 40c, peck \$1.25.

DEER'S—We recommend them highly. Very delicious flavor, medium size. Pkt. 6c, pt. 25c, qt. 40c, peck \$1.25.

HENDERSON'S—This was the first Bush Lima Bean offered. It is a very early variety and enormously productive. It is largely grown as a field crop for dry beans, being a reliable and heavy yielder. A light soil, inclining to sand, suits them best. Pkt. 6c, pt. 20c, qt. 35c, peck \$1.00, bu. \$4.00.

DAVIS KIDNEY WAX.

Field Beans

Plant $1\frac{1}{2}$ bus. per acre.

The cultivation of Beans as a field crop is increasing, and in many sections of the country it is now an important and profitable industry. The varieties we offer are the very best that can be grown.

GREAT WESTERN—Unusually early, productive and the handsomest Bean of all, being large, round, ivory white. When other kinds fall down and spoil in a wet season, these stand up on a strong stalk. Resists rust and mildew. Will stand in the field after maturity longer than any other and not waste. The Great Western grows the heaviest top of all, with a root in proportion, thus enabling it to withstand drought, and fits this variety particularly well for our Western country. The pods hang in clusters all over the top (see illustration. This stalk was photographed suspended by the root). Also, notice the pods contain from 7 to 9 Beans each, denoting a remarkable productive sort. This Bean yielded in a test at the rate of 450 bushels per acre. They are the grandest Bean of all, and surprise and please every grower. Pkt. 5c, pt. 20c, qt. 30c, peck 75c, bu. \$2.50.

WISCONSIN TREE—Quite distinct from the Mexican or California Tree Bean, the Bean being twice as large, more productive and very early. The Beans are very white, of finest flavor and cook in less time than the Navies. Pkt. 5c, pt. 15c, qt. 28c, peck 75c, bu. \$2.50.

WHITE WONDER—A very early Field Bean that can be planted on ground where other crops have been removed. It greatly outyields the Navy on the same ground and under same conditions. Seed is about the size of Navies. Pkt. 5c, pt. 15c, qt. 28c, peck 75c, bu. \$2.50.

WHITE MARROWFAT—A standard field variety. Largely grown. Pkt. 5c, pt. 15c, qt. 28c, peck 75c, bu. \$2.50.

Pole or Running

BEANS

LAZY WIVES—No good wife would like to be called a "lazy wife," yet she will be excused for exhibiting a lazy spell when "Bean picking" time comes, if she has the foresight to plant this variety. They are called Lazy Wives because they hang so full and the pods are so long and broad that a mess is soon picked. The pods are green, wonderfully broad, thick, fleshy and entirely stringless, retaining all their good qualities until nearly ripe. The peculiar taste and agreeable flavor of this Bean are so captivating that other varieties are not desired while the Lazy Wives can be obtained. Pkt. 6c, pt. 25c, qt. 40c.

EARLY GOLDEN CLUSTER WAX—It grows rapidly, bearing very early, clusters of 3 to 6 pods of

**GREAT WESTERN
FIELD BEAN**
INTRODUCED BY
J. A. EVERITT, SEEDSMAN
INDIANAPOLIS, IND.

succulent. Good green or dry. A wonderful yielder. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.50.

Pole Lima Beans.

Price of Each:
Pkt. 6c, pt. 25c, qt. 45c, $\frac{1}{4}$ bu. \$1.50.

DREER'S IMPROVED—An improvement in quality on the large Lima. They are plumper and richer; remain green longer.

LARGE WHITE—This well known and delicious Bean is everywhere esteemed. Very large.

KING OF THE GARDEN—A magnificent variety in growth of vine and number and size of pods. Specimens have been grown over 9 inches in length and containing 7 great large beans.

CHALLENGER—Have been constantly improved by saving Beans from the strongest vines and best filled pods. They yield an amazing quantity of shelled Beans.

SEIBERT'S EARLY—This variety was developed by a market gardener, who selected the largest green Beans from the thinnest and most easily opened pods. Practical value to the market gardener has been the object aimed at, and we believe it to be the very best sort for their use. The vine is very productive and exceptionally hardy and vigorous. It produces pods very early and the Beans are of fine quality. The green shelled Beans are of immense size, but so tender and succulent that they shrink in drying to about the size of the Large White Lima. Pkt. 10c, pt. 25c, qt. 45c, post paid.

rich golden color. Pods average about 8 inches in length, tender and entirely stringless, retaining their plumpness and tenderness long after they have attained a large size, and continue to bear, if the pods are picked, until frost. Pkt. 6c, pt. 25c, qt. 40c.

WHITE CREASE BACK—For String Beans it is simply perfection. Its handsome green pods grow from 5 to 6 inches long, perfectly round, with a crease in the back. They ripen early and bear continuously all summer, the vines being loaded from one end to the other. Pkt. 6c, pt. 25c, qt. 40c, $\frac{1}{4}$ bu. \$1.25.

KENTUCKY WONDER—A very prolific sort, grows vigorously and climbs well; pods grow in large clusters, green, 9 to 10 inches long, nearly round; crisp and tender. Sure to give satisfaction; excellent to grow in corn. Seed long, oval, brown color. We sell more of this variety of Pole Beans than of any other to our city gardeners. This hint may be of advantage to parties undecided what to purchase. Pkt. 6c, pt. 20c, qt. 35c, peck \$1.25.

HORTICULTURAL—A round, speckled bean, used both in pods and shelled. Pkt. 6c, pt. 20c, qt. 35c, peck \$1.75.

EARLY WHITE DUTCH CASE KNIFE—One of the earliest of all. Suitable for corn or for poles, flat pods, well filled with fine, large Beans. Excellent for winter use. Pkt. 6c, pt. 20c, qt. 35c, peck \$1.25.

RED SPECKLED CUT SHORT—An excellent variety and particularly valuable for planting among corn. Vines medium, pods short, round, tender and succulent. Good green or dry. A wonderful yielder. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.50.

EARLY...
OTHELLO,
 Dark Blood Turnip Beet.

This very desirable variety will become very popular with the market gardeners, who require a variety of the darkest color for their main crop. It is the result of a very careful selection of the finest formed and very darkest roots, having been annually selected for years for seed stock, and we venture to say that there is no Beet in this country superior to it for its dark, rich color, perfection of form or sweetness of flavor; foliage, dark crimson. Pkt. 10c, oz. 20c, ¼ lb. 35c, lb. \$1.00.

ABLANC
 1 Pkt. of each, 15c

Crosby's Improved Egyptian.

First and Last Beet

This very fine and decidedly improved variety of Beets was discovered several years ago. While it then showed superior qualities, it has been still further improved by careful growing and selecting for the ideal shape, size and color, until now, we believe, we have the perfect Beet. The roots are of the very best form, with smooth skin and deep, blood red flesh. Quality sweet and tender. It comes for use as early as Egyptian, of better quality. If left in the ground they will continue to grow and attain large size for fall and winter, retaining all their good qualities, hence the name, **First and Last.** Top small and neat. All customers should plant a package or more of this superior Beet. Pkt. 10c, oz. 20c, ¼ lb. 35c, lb. \$1.00.

THIS BEATS ALL—One pkt. each of these unsurpassed Beets for only 15c.

ENGRAVED FOR
 J. EVERITT SEEDSMAN

BEETS.

CONTINUED.

1 oz. will sow 50 feet of row.

Price of all varieties in this list, except where given: Pkt. 3c, oz. 5c, ¼ lb. 12c, lb. 35c, post paid. By freight or express, 5 lbs. or more of a kind, 25c per lb.

IMPROVED BLOOD TURNIP—The best strain of this popular sort. The result of years of careful selection, which has increased its size and made it earlier. Color, rich, deep red; fine grain, solid. Excellent for all purposes.

DETROIT DARK RED TURNIP BEET—One of the very best sorts for the market and home garden. Its small, upright top, early maturity and splendid shape makes it popular everywhere. Flesh bright red, crisp, tender and sweet, and remains in prime condition a long time. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

ECLIPSE—A great acquisition to our list of Turnip Beets. Always gives the greatest satisfaction among market gardeners. It is as early as the Egyptian, and much more desirable, owing to its globe shape, great smoothness and regularity, having a small top, very sweet, flesh fine and dark blood color.

EDMAN'S TURNIP—A selected strain, very uniform and even in type; flesh, deep blood red, exceedingly sweet and tender; of good market size. It is very early, and for marketmen's use is justly popular and much called for wherever it has been sold.

EXTRA EARLY EGYPTIAN—Ten days to two weeks earlier than the Blood Turnip. Of fair quality, medium size; fine for forcing.

IMPROVED LONG BLOOD RED—One of the finest Beets for winter and spring use, also on account of its great productiveness; very valuable to grow for cattle. Sweet, crisp and tender; color, rich red; withstands drought.

DEWING'S IMPROVED BLOOD TURNIP—Very symmetrical in shape and free from fibrous roots; flesh deep blood red.

HALF-LONG BLOOD—An excellent second early. Good, also, for winter and spring.

LENTZ'S EXTRA EARLY BLOOD TURNIP—As early as Egyptian; larger and of unsurpassed quality, being tender and sweet at all times, old or young. Will produce a crop six weeks from planting. A great favorite with Eastern gardeners and popular wherever known.

BASTIAN'S EXTRA EARLY—Very early, of quick, large growth; fine turnip form and bright, red color.

EARLY YELLOW TURNIP—Similar to Blood Turnip in form, but yellow flesh.

SWISS CHARD—A distinct vegetable, and makes superior greens. The ribs are used as asparagus, the leaves as spinach. We recommend all our customers to grow it.

Mangel Wurzel and Sugar Beets.

For Stock Feed and Manufacture of Sugar.

Price of all varieties: Pkt. 3c, oz. 5c, ¼ lb. 12c, lb. 30c, by mail. By freight or express, 5 lbs. or more at 22c per lb.

MAMMOTH GOLDEN GIANT—Color, yellow; broad at top and bottom, making very heavy roots. A favorite with leading farmers.

MAMMOTH LONG RED—Grows to an immense size, single roots weighing 30 to 50 lbs. Under high culture 2,000 bus. per acre have been grown. Quality excellent.

GOLDEN TANKARD—The flesh is deep yellow to the center. One of the best and richest for food for sheep and cattle. Highly prized by stockmen.

CHAMPION YELLOW GLOBE—The short root makes it particularly valuable for light soils; of fine quality and a heavy cropper.

••• Sugar Beets •••

KLEIN WANZLEBEN—This is the variety of Sugar Beet which the analytical chemists, both of Germany and this country, have united in recommending

THE GREAT.....

SECRET

If you want the best Seeds at the lowest cost, that will produce the best crops and realize the most money, plant

Everitt's Celebrated O. K. Seeds.

as possessing the highest sugar producing qualities, which scientific investigations have been fully sustained by the practical results of sugar making in the factories. As much as 18 tons of sugar having been made from 100 tons of roots of this variety. It is endorsed and recommended by the Department of Agriculture at Washington. Pkt. 4c, oz. 8c, ¼ lb. 15c, lb. 40c, 5 lbs. or more at 30c.

LANE'S SUGAR BEET—Long, symmetrical roots, fine grained and very sweet; a heavy cropper; splendid for table use or cattle feeding.

FRENCH YELLOW SUGAR—Grows very large; much above ground. Very rich in sugar.

VILMORIN'S SUGAR BEET—Color, white; medium size. Greatly esteemed by sugar manufacturers. This is recommended as being next to the Klein Wanzleben in the percentage of sugar it will produce.

Some Odds and Ends.

BROCOLI—Early Purple Cape. Produces large heads of a brownish purple color; very close and compact and of excellent flavor. Pkt. 5c, oz. 25c, ¼ lb. 75c.

BRUSSELS SPROUTS—Improved Dwarf. They grow about 2 feet high, and produce from the sides of the stalk numerous little sprouts, 1 or 2 inches in diameter, resembling cabbage. Pkt. 5c, oz. 20c, ¼ lb. 60c.

CHICORY—Large Rooted or Coffee. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

COLLARDS—Georgia Southern. A variety of cabbage. Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. \$1.00.

CORN SALAD—Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 75c.

CRESS or **PEPPER GRASS**—Sow early in the Spring, very thickly in shallow drills. The sowing should be repeated every week, as it soon runs to seed. Use as a small salad. Extra curled. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 70c.

Water Cress—True. Pkt. 10c, oz. 25c, ¼ lb. 75c.

GARLIC—They are cultivated for flavoring. The flavor and odor are similar to onions, but more powerful. Plant on very rich soil in rows 14 inches apart, 6 inches apart in row. Pkt. 5c, ¼ lb. 20c, lb. 50c.

KOHL RABI—Early White Vienna. Very early, small, handsome, white bulbs. Pkt. 5c, oz. 15c, ¼ lb. 50c.

Early Purple Vienna—Identical with former, except in color. Pkt. 5c, oz. 15c, ¼ lb. 50c.

LEEK—American Flag. Used for soups and salads, also fine when sliced and cooked with peas. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

MUSTARD—Black or Brown. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

White—Best for salad. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

New Chinese—Highly esteemed for salads, particularly in the South. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c.

Short Stem Drum-head Cabbage.

This famous matchless variety (illustrated above) has no superior as a variety for truckers to raise for distant markets, while it is also a magnificent and reliable variety for all purposes. Very reliable to head in the South. Grows a compact head. Withstands drought well. Seldom bursts or rots. Heads frequently weigh 30 lbs. each. Keeps until late spring. Stem very short. It is almost all head and very sure to head. Pkt. 10c (worth 5 times the price), oz. 20c, ¼ lb. 50c, lb. \$1.75.

A Grand New Sort x x x Late White Dutch Cabbage.

LATE, LARGE, ROUND,
SOLID HEADS.

The numerous varieties of Cabbages being introduced are liable to cause confusion to growers, but it is our aim to test and sift the varieties so we offer not one sort but what fills a real need in some part of the country, or is needed to round out the rotations of the seasons properly.

We don't pretend to offer any excuse for bringing this new, valuable and distinct sort to the attention of growers, as its merits warrant high praise. In compactness, solidity, hardness, weight, size of head, uniformity of shape and excellent keeping qualities it is unsurpassed by any sort heretofore on the market, and possesses the best qualities to give it the greatest commercial value.

The average weight of the heads is from 18 to 24 lbs. They are the greatest winter and spring Cabbage, not rotting like many other kinds do. For table there probably never will be a better, while for market and shipping it will lead wherever offered.

PRICE—Pkt. 10c, 3 for 25c, 8 for 50c, oz. 25c, 1/4 lb. 75c, lb. \$2.50.

THE
NEWEST
AND BEST

CABBAGE

ROUGH & READY OR HARD HEADING CABBAGE

Owing to the peculiar and extraordinary keeping qualities of this Cabbage, which preserves the heads until late spring as green as when gathered in the fall, it is pre-eminently the King of Cabbage for late spring selling. For get up and getting there this variety occupies the field without a superior. Season late. Sure to produce large heads of the greatest solidity, even under unfavorable circumstances. The heads grow medium to large, but owing to their hardness it is one of the heaviest cabbages grown.

Those who have this Cabbage for sale in the spring will coin money, Pkt. 10c, oz. 20c, ¼ lb. 60c, lb. \$2.25.

GEORGE BLUE'S "TREASURE" CABBAGE.

DEFINITION OF TREASURE—"SOMETHING VERY MUCH VALUED."

This variety of Cabbage has been grown by Mr. Geo. Blue, trucker, near Indianapolis, for a number of years, and, as is well known by other gardeners, the seed has been guarded as the most valuable treasure by Mr. Blue, and all efforts to obtain the seed in its purity have heretofore failed. About 4 years ago some seed was sold by another seed house in this city under the name of "Aeme," which purported to be the Blue Cabbage, but it was not and the crop showed it to be a bad mixture and worse than worthless. We guarantee our seed to be strictly the true genuine Blue Cabbage, and we name it **Geo. Blue's Treasure Cabbage**, as we know that it will be a valued treasure to other growers as it has been to Mr. Blue. Our seed was grown by Mr. J. M. Lupton on Long Island, who is the most extensive grower of Cabbage seed in the country, and a person eminently qualified to judge a variety of Cabbage on account of his personal contact with all the known varieties and consequently, the opportunities he has to make comparisons. He says:

"In regard to Blue's Treasure Cabbage, there is no question as to its being distinct. There is no other variety like it catalogued. * * * As to its superiority, it depends a good deal on the locality. I understand that in your section the gardeners like this particular Cabbage better than anything else they can get, and that it is suited to your market. I have no doubt it will be liked all through the West. It is an excellent keeper and some gardeners think a great deal of that. I think this Cabbage is well worth introducing. With me the Cabbage grows with comparatively few outer leaves, a medium size, round, deep head, short stem, with a wavy edge to the leaf. Is dark bluish-green color. True to color and type and a first-class keeper."

The description of this Cabbage given by Mr. Lupton is correct, and we will add that it is a very sure grower and reliable header. Every stock will produce a solid head. We know gardeners who would have paid \$2.00 an ounce for this Cabbage seed if money would buy it, also we know that bribery offered Mr. Blue's farm hands failed to get the seed, and we have no doubt attempts have been made to steal the seed or plants from the field, but all attempts of this kind failed. Price, Pkt. 10c, oz. 25c, 1-4 lb. 75c, lb. \$2.50.

HOLLANDER CABBAGE.

This is a variety of cabbage that has been exported to this country from Holland, arriving late in the season, and on account of its well preserved condition, great solidity and depth of head, sells at higher prices than American sorts. It is one of the **hardest varieties** in cultivation, enduring drought and frost that would destroy other varieties. Head of medium size, round and very solid; matures late and keeps best of all for late spring use. *Every head coming out in the spring as sound as a dollar and of healthy bright color.* We offer the genuine, every seed strictly true. *Don't take chances, as there is much spurious seeds on the market.* Pkt. 5c, oz. 20c, 1-4 lb. 65c, lb. \$2.25.

EVERITT'S EARLIEST CABBAGE ALWAYS HEADS AND ALWAYS SOLID HEADS.
THE GREATEST & MOST PROFITABLE FOR MARKET GARDENERS.
EARLY CABBAGE.

WE MAIL 500,000 COPIES OF THIS CATALOGUE ❀❀❀❀

and should sell 500,000 PACKETS of this Beautiful, Good, Earliest of All

❀ **Cabbage**

Of course, you will understand by this, that we think everybody should grow it. This expresses the matter exactly. It should be in every garden throughout the land.

IT'S THE FIRST TO HEAD.

IT MAKES GOOD SIZED SOLID HEADS LIKE THE ILLUSTRATION.

Not a bunch of leaves like some other early varieties. 70 days from sowing the seed you have Cabbage on the table or sell it in market and get the big price if you plant **Everitt's Earliest**. The heads are very solid, while the edible part is sweet and tender. The illustration shows a half section of a head which can not be surpassed by any variety, early or late, in fine texture, small ribs and solidity. By reason of this Cabbage coming so early, a second crop of late Cabbage or some other crop can be grown on the same ground. Set the plants 15 inches apart in the rows and rows 2½ feet apart.

If you are an **Up-to-Date Gardener** you will certainly want some of this Earliest Cabbage. It is one of the best things we offer, and we again express the hope that every person who receives this Catalogue will obtain a package or more of it, even though they omit something else. **Pkt. 8c, 3 for 20c, oz. 20c, ¼ lb. 65c, 1b. \$2.00.**

CWT. Cabbage. Everybody knows that **CWT.** means hundred weight, and this is the largest and heaviest of all varieties of Cabbage, single specimens weighing nearly a hundred pounds. It is the grandest type of mammoth Cabbage, and certainly whoever raises for exhibition purposes should not fail to include the **CWT. Cabbage**. A late fall and winter sort. Splendid keeper and of good quality. For kraut it is simply immense, a few heads filling a barrel. If you want the largest Cabbage ever seen in your neighborhood, and, besides, one of splendid quality, plant some of the **CWT.** **Pkt. 10c, oz. 20c, ¼ lb. 60c.**

EXTRA EARLY AND EARLY CABBAGE.

1 oz. of Seed produces about 3,000 Plants.

EARLY YORK—A well known extra early sort. Pkt. 3c, oz. 10c, ¼lb. 40c, lb. \$1.20.

EARLY ETAMPES—Quickly forms fine, solid, pointed heads. Of extra quality. Pkt. 3c, oz. 12c, ¼lb. 40c, lb. \$1.20.

EVERITT'S EARLY GIANT—No other variety grows as rapidly as this, and early in the summer you have cabbage heads equaling the fall and winter sorts. Heads very solid. If planted late, is a fine fall and winter sort. Pkt. 5c, oz. 15c, ¼lb. 50c, lb. \$1.75.

IMP. EARLY WINNIGSTADT—One of the best Extra Earlys, being a sure header and will grow a head under circumstances where many others would fail. The heads are so solid that cabbage worms can not penetrate them. Valuable for summer, fall and winter. Pkt. 3c, oz. 12c, ¼lb. 40c, lb. \$1.25.

SELECTED EARLY JERSEY WAKEFIELD—A favorite sort. Heads very compact, solid, of conical shape. Few outside leaves. Pkt. 3c, oz. 12c, ¼lb. 40c, lb. \$1.25.

ALL HEAD EARLY—A new variety and one of the largest Earlys in cultivation. Being a very thoroughbred variety the heads are very uniform and it is certain to head; growth compact, admitting close planting. If planted late, it is a splendid winter cabbage. Pkt. 3c, oz. 15c, ¼lb. 40c, lb. \$1.50.

IMP. EARLY SUMMER—A popular sort. Our strain of this peerless cabbage is not excelled. Fine, large, solid heads will form in 90 days from sowing the seed, with proper care and cultivation. Pkt. 3c, oz. 12c, ¼lb. 45c, lb. \$1.50.

EARLY FLAT DUTCH—Popular wherever grown. A good second early, of excellent quality. Pkt. 3c, oz. 12c, ¼lb. 40c, lb. \$1.25.

LOUISVILLE EARLY DRUMHEAD—A very choice variety, largely grown in this section and following immediately after the Early Summer. When planted late makes an excellent winter cabbage. Pkt. 3c, oz. 15c, ¼lb. 50c, lb. \$1.75.

LATE VARIETIES.

AUTUMN KING—A grand autumn and winter cabbage. Heads of enormous size and very solid. This variety is scarcely excelled by any other in weight of crop per acre. Pkt. 4c, oz. 15c, ¼lb. 50c, lb. \$1.50.

ALL SEASONS—We have sold this reliable variety for over 8 years with the greatest satisfaction to our customers. If sown early will produce large heads early, and if sown late is a superior winter sort. We sell this cabbage in large quantities to many large growers, who prefer it to all others. Pkt. 3c, oz. 12c, ¼lb. 40c, lb. \$1.25.

EVERITT'S SUPERIOR LARGE, LATE FLAT DUTCH—So well known as to scarcely need description. Our "superior" strain is unexcelled. Pkt. 3c, oz. 12c, ¼lb. 40c, lb. \$1.25.

SUCCESSION—A fine fall and winter cabbage. This variety is one of the surest to head, scarcely a plant failing. Pkt. 4c, oz. 15c, ¼lb. 45c, lb. \$1.50.

SURE HEAD—Takes its name from its quality of always heading up, even under unfavorable conditions. In all cases gives great satisfaction for general crop. Pkt. 3c, oz. 12c, ¼lb. 40c, lb. \$1.25.

FOTTLER'S IMPROVED BRUNSWICK—Produces a large, firm, solid head, often weighing from 20 to 30 pounds. Pkt. 3c, oz. 12c, ¼lb. 40c, lb. \$1.25.

MARBLEHEAD MAMMOTH DRUMHEAD—The largest headed cabbage. Its size is indeed mammoth. Pkt. 3c, oz. 12c, ¼lb. 40c, lb. \$1.25.

DRUMHEAD SAVOY—A very large-headed variety, partaking of the size of the Drumhead Cabbage; flavor of the Savoy. Pkt. 3c, oz. 12c, ¼lb. 35c, lb. \$1.20.

THE LUPTON,

A Fine New Main Crop Cabbage.

Originated by Mr. J. M. Lupton, the largest individual Cabbage grower on Long Island, who says of it: "I originated the Lupton from a single early plant of a late variety. It is between the two in point of size and season of maturity, coming in after the second earlys and before the late—more thoroughbred and holding color better than any late sort. It combines the health and vigor of late sorts with the uniformity and sure heading qualities of the best second earlys. I believe it will become the leading main crop Cabbage." Prices of seed grown by originator: Pkt 5c, oz. 15c ¼lb. 50c, lb. \$1.75.

Plant O. K. SEEDS. This is the best kind of crop insurance.

BRILL'S NONE-SUCH.

This new, distinct and valuable variety of Cabbage can be sown in the fall and will not run to seed like most second early sorts when wintered over. This fact will make it a favorite in the South and with Northern growers, who still use cold frames. It is really an "All Seasons" variety. Sown in the fall or in early hot-beds, it will head immediately after the Wakefield. The originator, who is the pioneer grower of Cabbage Seed on L. I. says: "The None-Such is unquestionably the best Cabbage for general purposes ever introduced. Succeeds admirably as second early, summer, fall or winter variety in every section of the U. S. and Canada. L. I. gardeners and others, who saw this Cabbage growing, willingly paid \$10 per pound for seed." Pkt. 10c, oz. 25c, ¼lb. 60c, lb. \$2.25.

CAULIFLOWER.

EARLY SNOWBALL—Gilt Edge Strain. Probably grown more than all other varieties together for forcing or wintering over for early crop. We spare no pains or expense to produce the best seed possible, and confidently recommend it as equal to that offered by any one. Pkt. 10c, ½oz. 85c, oz. \$1.50, ¼lb. \$5.00.

EXTRA EARLY DWARF ERFURT—Gilt Edge Strain. Our stock is almost as early as Early Snowball and is very desirable for forcing or for planting out doors. Plants compact, with a few narrow, upright leaves, making it the best for close planting. Our stock of this is unsurpassed. Pkt. 15c, ½oz. 75c, oz. \$1.25, ¼lb. \$5.00.

EARLY PARIS—An excellent early sort. Short stocks, white head. Pkt. 10c, ½oz. 35c, oz. 60c, ¼lb. \$2.00.

VEITCH'S AUTUMN GIANT—Heads very large, beautiful white, firm and compact. Remains long fit for use. A valuable sort. Pkt. 10c, ½oz. 35c, oz. 60c, ¼lb. \$2.00.

GARDNER'S FAVORITE CAULIFLOWER—The earliest and finest Cauliflower in the country. Resembling Snowball in habit, and sure heading under adverse conditions to the most marked degree. It will head when all others fail. Dwarf erect habit, with few surplus leaves, allowing to be planted close. Heads are very solid, pure white and of finest table quality. Pkt. 10c, ½oz. 50c, oz. \$1.00, ¼lb. \$3.50.

CARROTS.

Sow 1 oz. to 200 Feet of Drill, 2 lbs to the Acre.

Price of all Carrots, unless otherwise quoted. Pkt. 3c, oz. 8c, ¼lb. 18c, lb. 50c. By freight or express, not less than 1 lb. of a kind, 40c per lb.

EARLY FRENCH FORCING—The earliest variety, largely grown for forcing purposes; globe shaped root of an orange red color.

EARLY SCARLET HORN—Best for early planting out of doors. Tops small; roots top shaped, surface dented, skin orange red.

OX-HEART—Intermediate in length, between the half-long varieties and the Short Horn, but much thicker than the latter, attaining at the top 3 or 4 inches in diameter. It is of fine quality for table use, and deserves general cultivation.

HALF-LONG SCARLET NANTES—Tops medium; root cylindrical, smooth, bright orange; flesh orange, becoming yellow in center; of the finest quality.

NEW CHANTENAY—This new, half-long, stump-rooted Carrot is one of the most productive varieties known; has an extra large shoulder, is easily dug, and is in every way desirable. It is very smooth, fine in texture, and of a beautiful rich orange color. Well worthy of cultivation.

DANVER'S HALF-LONG ORANGE—A most excellent variety for all soils. It will yield the greatest bulk with smallest length of roots of any variety, 20 to 30 tons being no unusual crop per acre.

RED SAINT VALLEY—A large, beautiful Carrot, of a rich, deep orange red color. The roots grow very straight and smooth, from 10 to 12 inches long. Very fine quality for table use, and very productive.

LARGE WHITE BELGIAN—Grows one-third out of the ground; immense yield; large size; easily gathered; very suitable for stock.

IMPROVED LONG ORANGE—Long roots, good yield. Good for table or stock. We offer the best strain of this fine variety.

Giant Victoria The Largest Yellow Carrot

MOST PRODUCTIVE OF ALL.

This is the largest and unquestionably the heaviest cropping and most nutritious Yellow variety in cultivation. It is the largest and best form of Orange or Yellow Carrot known. The roots are remarkably fine, very symmetrical and of excellent quality, possessing high feeding properties. It is a heavy cropper on all soils, but especially adapted for strong or rich land. It grows fully twice as much weight per acre as the ordinary varieties, and as the roots grow more above the ground, it is much easier to gather the crop. The roots frequently measure 12 to 18 inches in circumference and yields 20 tons per acre. Nothing excels this Carrot in quantity and quality of stock feed that can be grown on a limited area of ground. This grand variety is sure to suit every one who grows it.

N. P. CLARK, St. Cloud, Minn., Importer and Breeder of Clydesdale Horses, Short-horn and Guernsey Cattle, says: "In expressing my opinion as to the value of Carrots for stock, will say that no one who feeds stock can afford to be without them. I feed each year Mangel Wurzels and Ruta Bagas and esteem them very highly, but Carrots I regard as indispensable. I increase my acreage of Carrots each year and believe I secure better results from them than anything else I feed, and no variety can be better in quality and great productiveness than the Victoria."

JUST THINK

Every Post-Office in the country is a branch store for O. K. SEEDS. What could be more convenient? Hand the Postmaster a letter and in a couple days he will hand you the best seeds that are planted under the sun. Why risk your crops on store seeds of uncertain age and quality? O. K. SEEDS planted means success. Store seeds planted means—
WHAT? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ?

The last obstacle to the universal growers of Celery removed. Choice Blanche Celery can be raised as easily as a head of cabbage or lettuce. We have sold many thousands of packets of our Eureka Self-Blanching, and we have not had one customer to our customers of previous years by the oz., 1/4 lb. and lb. They say they never raised any crop that met with as much favor among customers as the Eureka Celery. The only trouble we have with it is to grow enough seed to supply the demand. One great advantage of the Eureka is the fact that it will keep all winter, while any other self-blanching variety will not keep much beyond Christmas. Stalks beautiful in appearance, compact in growth and solid. Dwarf habit. Color of outer leaves, cream, tinted with green; stalks and inner leaves creamy white; ribs very crisp, tender and of the most superior flavor. All who have not heretofore grown this Celery should do so without further delay. It is bound to give satisfaction. Pkt. 10c, 3 pkts. 25c. oz. 50c, 1/4 lb. \$1.50.

A Page of the Best Varieties of **Celery.**

GOLDEN SELF-BLANCHING—Gilt Edge Strain. A remarkable stocky and strong growing variety; solid and delicious flavor self-blanching and a good keeper. One of the very best for early market. **Pkt. 10c, oz. 30c, ¼ lb. 75c.**

GOLDEN SELF-BLANCHING—As usually sold. **Pkt. 4c, oz. 15c, ¼ lb. 50c.**

WHITE PLUME—Gilt Edge Strain. Each year adds to the popularity of this variety. Many market gardeners now plant their entire crop of it. The heart and stock are naturally white, and consequently requires very little earthing. Eating qualities are the very best; will not keep late in the winter. **Pkt. 10c, oz. 25c, ¼ lb. 75c.**

WHITE PLUME—As usually sold. **Pkt. 4c, oz. 15c, ¼ lb. 50c.**

KALAMAZOO BROAD-RIBBED—A distinct variety, its broad ribs, thick and closely set, are solid, crisp and of fine flavor. Grows rapidly, and by reason of its neat and compact growth and showy appearance, makes a grand market variety. **Pkt. 4c, oz. 15c, ¼ lb. 50c, lb. \$1.50.**

NEW ROSE—The red or rose Celeries are better in many respects than the white. They are more solid, hence keep better, and have to a greater degree that nutty flavor so desirable in celery. Red Rose is the best colored celery. **Pkt. 4c, oz. 15c, ¼ lb. 50c.**

GOLDEN HEART—In quality, appearance and size, this variety leaves little to be desired. **Pkt. 4c, oz. 15c, ¼ lb. 40c, lb. \$1.50.**

GIANT GOLDEN HEART—Originally produced by a careful selection from the Dwarf Golden Heart by a gardener, who made the need of a critical market his study for years. The quality is fully equal to the original stock, and in habit of growth is taller than its parent; the stalks are very thick, perfectly solid, of excellent flavor and unexcelled as a long keeper. It is one of the best Celeries for winter storage, for market or for the private planter. **Pkt. 4c, oz. 15c, ¼ lb. 50c.**

PERFECTION HARTWELL—The best flavored, most crisp and tender of the white varieties; the stalks are medium size, round, very solid, crisp and tender; fine nutty flavor. **Pkt. 4c, oz. 15c, ¼ lb. 45c, lb. \$1.50.**

CRAWFORD'S HALF DWARF—Early, solid; of vigorous growth and nutty flavored; very ornamental. **Pkt. 4c, oz. 15c, ¼ lb. 45c, lb. \$1.50.**

GIANT PASCAL—It excels in flavor, and is free from any bitter taste. The ribs are the largest of all, thick, hard, solid, stringless, and of a beautiful waxy appearance. **Pkt. 4c, oz. 15c, ¼ lb. 50c.**

CELERIAC—Turnip rooted Celery. **Pkt. 4c, oz. 15c.**

Grand Surprise.

If you want a Celery that will keep until the following May, after all other celeries are done, and sell at a high price, plant the Grand Surprise. It is certainly the grandest winter and spring Celery ever offered. Grows medium size and is not excelled for solidity, crispness and fine nutty flavor; every particle can be eaten. Plant is beautiful in appearance, blanching to a cream white. No celery grower should fail to plant part of his crop of this, and there awaits him a grand surprise. **Pkt. 15c, oz. 45c, ¼ lb. \$1.25.**

SWEET CORN.

All Eastern grown and free from flint and glaze. One quart will plant about 500 hills; one bushel, 6 acres.

We quote pints and quarts of Sweet Corn by mail, prepaid. If to be sent by freight or express, deduct 5c. per pt., 10c. per qt.

A NEW SWEET CORN.

NEW SWEET
CORN—

Indiana Wonder.

As early as Early Adams, with an ear twice as large and the sweetest Corn ever put on the table. This Corn originated in Indiana and is a great honor to the Hoosier State. We confidently believe there is not its superior for earliness, quality and size of ear in existence. For evidence of this, read the reports below. A very strong and rapid grower; bears two or three ears to the stalk; ears large, like illustration; grain deep, large, much shriveled when dry. We recommend it to all, and guarantee it as recommended. Price, pkt. 10c., pt., 20c., qt. 35c. postpaid. By express, per peck, 75c., bu. \$2.50.

REPORTS FROM GROWERS.

- Mighty fine, large and very sweet. W. M. SUBER, Broad Ripple, Ind.
Indiana Wonder Sweet Corn is the earliest and largest eared variety I ever grew. CHAS. M. DOLEN, Waverly, Ind.
Earlier than any other I ever tried; of superior quality, with larger ear than Early Adams. It can not be too highly recommended. F. V. BEELER, Friendswood, Ind.
Planted same time with Early Adams. It was a little earlier, much larger ear, well formed. Remained in condition for table longer than any other kind I ever raised. URIAH LOW, Carlton, Ind.
Indiana Wonder Corn made a quick growth and big yield. We highly recommend it as far superior to Adams in size of ear, table quality and earliness. S. A. BEELER, Zionsville, Ind.
Best I ever raised. It surpasses all others in continuing in good condition. A. V. HIGHTSHOE, Clermont, Ind.
Much larger and better than Adams. JOHN N. GRAHAM, Whiteland, Ind.
The earliest, largest eared and best quality Corn I ever grew. W. T. MEMIFEE, Brownsburg, Ind.

STOWELL'S EVERGREEN.

We sell all kinds of Sweet Corn, unless otherwise quoted, as follows: By mail, postpaid, pkt. 5c., pt. 18c., qt. 30c. By freight or express, peck 65c., bu. \$2.25.

EXTRA EARLY ADAMS—The earliest white Corn grown; ready for use in sixty days; used extensively wherever introduced. Can be planted earlier than sugar varieties. Also called Imitation Sugar.

EARLY ADAM—Similar to above, but larger and not quite so early.

WHITE COB CORY Ears are very handsome, sweet and fine quality. It is the earliest of all the sugar varieties. Two crops can be raised on the same ground in one season.

CROSBY'S EARLY SUGAR—Early and a great favorite. Ears small, but is productive and of excellent quality.

EARLY MINNESOTA—A well-known early dwarf variety; ears fine size and excellent quality.

COUNTRY GENTLEMAN—Is the sweetest and most tender of all. Ears medium, cob small, kernels of extraordinary depth, pearly whiteness and irregularly crowded together on the cob. It is very productive, bearing two to four ears to the stalk. Matures medium to late.

EGYPTIAN—One of the best and the handsomest of all the late sorts. Ears large, none more uniform, and excels all in filling out perfectly at the tip end. Cob and grain pure white. Very productive and used extensively for canning purposes.

MAMMOTH—This variety produces the largest ears of any sort, a single ear sometimes weighing two or three pounds. It is of excellent quality, sweet, tender and delicious, and its only fault (if this can be considered one) is the immense size of the ears.

SWEET CORN FOR FODDER—Much sweeter than field Corn, makes finer fodder, produces a stronger flow and richer milk. Stock eat it clean, stalk and blades. Per bu. \$2.00.

STOWELL'S EVERGREEN

SEE NEXT PAGE.

NEW INDIANA WONDER SWEET CORN.

Pedigree Stowell's Evergreen.

This grand variety is more largely grown than all others. Our seed is the result of scientific selection and growth in a locality perfectly adapted to the growth of this variety to the greatest perfection. Lovers of tender, juicy Sweet Corn will make no mistake if they plant our Pedigree Stowell's Evergreen. As we furnish this seed to compete with inferior grades in price, there can be no excuse for taking chances on your crop. Pkt. 5c. pt. 20c, qt. 35c, peck 75c, bu. \$2.50.

Pop Corn. Price of all varieties: Pkt. 5c, 1/4 lb 10c, lb. 25c, 4 lbs. 75c. By express, 6c per lb.

MAPLEDALE PROLIFIC—A profitable variety; has borne as high as 18 ears on one stalk, but we find 4 to 6 a good average.

QUEEN'S GOLDEN—Large ears, golden yellow grains. A great yielder.

SILVER LACE—The ears are very handsome, 5 to 6 inches long, and always filled out to the end with smooth, round, metallic, white grains.

WHITE RICE—A very handsome variety. Ears short, kernels long and resemble the grain of rice. Color, white; of the best quality for popping, and as it is the standard market variety, with a good reputation everywhere, we advise its growth by every person who grows Pop Corn to sell.

SNOW BALL—Like the flakes of snow falling as it pops and like a pile of pure white snow as it lies in a heap. Tender, rich, melting.

BOY'S FAVORITE—Quite a novel sort. Grows of many different colors, all growing on the same stalk.

Endive. **GREEN CURLED**—Not only most useful as a salad, but it is highly ornamental from its delicately cut and colored leaves. It is much used for garnishing. Pkt. 5c, oz. 10c, 1/4 lb. 25c.

BROAD LEAVED BATAVIA—Chiefly used for flavoring. Price same as above.

Gourds. The following varieties will be found very useful about every house. Start the seed early and transplant:

NEST EGG They exactly resemble the eggs of hens, and are very useful as nest eggs. The plant grows very rapidly and is useful in covering unsightly places, being quite ornamental. Pkt. 5c, oz. 15c.

DIPPER—This variety makes a splendid tool for dipping hot liquids. The handles do not heat through. Pkt 5c, oz 15c

DISHCLOTH—Makes an admirable vegetable dishcloth. The peculiar lining is the part used, which is sponge-like, porous, very tough and elastic. The vines are very ornamental. Pkt. 5c oz. 20c.

SUGAR TROUGH—Grows to a very large size, holding from 4 to 10 gallons each, having hard, thick shell. They are used for a great variety of purposes, such as buckets, baskets, soap and salt dishes, nest boxes, etc. Pkt. 10c, oz. 25c.

Herbs.

Indispensable to the cook, useful in the sickroom, and many kinds fine for perfuming clothing, etc.

The varieties marked with an asterisk (*) are perennial, and when once started in the garden may be preserved for years with but little care.

ANISE—Used for cordial, garnishing and flavoring. Pkt. 5c, oz. 10c

BALM—Leaves have a fragrant odor. Pkt. 5c, oz. 2c.

BASIL—SWEET—Leaves used for flavoring soups, stews and highly seasoned dishes. 1 kt. 5c, oz. 20c.

BORAGE—Leaves used for flavoring. Pkt. 5c, oz. 15c.

CATNIP—Leaves and young shoots are used for seasoning. Pkt. 5c, oz. 40c.

CARAWAY—Grown for the seeds, which are extensively used for flavoring of bread, pastry, candy, etc. Pkt. 5c, oz. 10c.

CORIANDER—Pkt. 5c, oz. 10c.

DILL—Seeds used for pickling cucumbers. Pkt 5c, oz 10c

FENNEL SWEET—Pkt. 5c, oz. 10c

HYSSOP—Is a stimulant and used for asthma and chronic cartarrh. Pkt. 5c, oz. 20c.

HOREHOUND—Leaves used for making cough medicine. Pkt. 5c, oz. 30c

LAVENDER—Pkt. 5c, oz. 20c

MARJORAM—SWEET—Pkt. 5c, oz. 20c.

PEPPERYROYAL—Pkt. 5c.

ROSEMARY—Ornamental herb. Pkt. 5c, oz. 40c.

RUE—Good for colds and croup. Pkt. 5c, oz. 15c.

SAFFRON—Pkt 5c, oz 10c.

SAGE—Extensively used for seasoning and dressing. Pkt. 5c, oz. 15c, 1/4 lb. 30c.

SAVORY—SUMMER—Pkt. 5c, oz. 15c.

SAVORY—WINTER—Pkt. 5c, oz. 20c.

TANSY—Pkt. 5c, oz. 30c.

THYME—Pkt 5c, oz 30c

WORMWOOD—Is beneficial to poultry. Pkt. 5c, oz. 25c.

ALL THE
BEST

CUCUMBERS

ONE PKT. EACH
OF 15 VARIETIES
ILLUSTRATED.

40 Cts.

PRICE OF ALL VARIETIES, UNLESS OTHERWISE
QUOTED: Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 40c,
by mail. By freight or express, per lb. 30c.

GIANT PERA—A variety remarkable for its great size, often attaining a length of 18 ins. and 10 ins. in circumference. Notwithstanding this immense size, their quality is excellent. They are fit to eat at all stages of their growth, even when full grown, and are free from the green cucumber taste. Superior for slicing. Pkt. 5c, oz. 10c, ¼ lb. 30c.

GHERKINS—Very small and prickly fruit, used expressly for pickling. Pkt. 4c, oz. 10c.

PARISIAN PROLIFIC PICKLING—A great acquisition. Very long, slender, cylindrical, densely covered with fine prickles, and deep, rich green in color. The flesh is very crisp and tender. One of the best for slicing, as well as for pickles. Enormously productive.

NICHOL'S MEDIUM GREEN—Very thick through, full at both ends, handsome in appearance and of fine quality. The vines are vigorous in growth and very productive.

WESTERFIELD'S CHICAGO PICKLING—Fruit medium length, pointed at each end, with very large and prominent spines; color deep green. Largely grown for factories. Extra early and very productive.

GREEN PROLIFIC OR BOSTON PICKLING—A very prolific

variety; thriving in any locality. With good culture 200,000 can be raised on an acre.

IMPROVED EARLY WHITE SPINE—Vines vigorous, fruiting early and abundantly; fruit straight and handsome, light green with a few white spines.

EARLY FAME—A well known early sort. Vigorous growth, productive and fine quality.

EARLY GREEN CLUSTER—A short, prickly variety, bearing in clusters near the root. It is a great bearer and matures early.

IMPROVED LONG GREEN—Forms fruits for the table nearly as early as the shorter. Grows 12 inches long, firm and crisp, with very few seeds. The young fruit makes the best of pickles.

ARLINGTON—The young fruits are unusually crisp and tender, and are of a very dark green color, so that the variety is considered by many to be the best for small pickles.

SNAKE—This cucumber grows sometimes to the length of six ft., curled up like a snake. Pkt. 10c.

JERSEY PICKLING—Certainly one of the finest pickling cucumbers in the market. Early and a great bearer, well formed, firm and crisp.

EARLY RUSSIAN—The earliest of all; small size.

EVERGREEN CUCUMBER—This variety has been thoroughly tested and has proved itself to be an evergreen and also an everbearing sort. In cases where cucumbers had not been gathered and frost killed the vines, the ground when viewed from a short distance appeared to be entirely covered with cucumbers. Our special claim for this variety is its wonderful productiveness, while it is also one of the most handsome and valuable sorts grown. Pkt. 5c, oz. 15c, ¼ lb. 30c, lb. 75.

NEW EVERBEARING CUCUMBER.

In calling especial at-
tention to this new and
unique variety, we wish to emphatically state that it is one of the most valuable sorts
ever introduced. It is of small size, **very early**, **enormously productive** and valuable
as a green Pickler. The peculiar merit of this novelty is that the vines continue to flower
and produce fruit until killed by frost, **whether the ripe Cucumbers are picked off
or not**—in which respect it differs from all other sorts in cultivation, Cucumbers in
every stage of growth will be found on the same vine. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

Livingston's Emerald

A Dark Green Cucumber that will hold
its color.

It is a selection from the White Spine, made after 7 years careful, systematic work. It retains every good quality of the best White Spines, and in addition it possesses a rich dark green color, so long sought for, but never before obtained in any other variety. It is strictly evergreen, retaining its color until fully ripe. The fruit sets early and the vigorous vines abound with beautiful long, straight, handsome Cucumbers of the crispest and best quality. For forcing and long shipping unexcelled. Pkt. 7c, oz. 20c, ¼ lb. 50c, lb. \$1.50.

Climbing Japanese Cucumber

This great novelty was introduced from Japan into Europe, where it created a great sensation and was the reigning novelty, and met with phenomenal sale. From Europe it crossed over to this country, where they are also having an enormous sale.

The vines are healthy, vigorous growth, with rich dark green foliage, and throw out *strong, grasping tendrils*, which enable it to climb trellis, wire netting, brush, or any other suitable support. It clings so tightly that it is not prostrated by heavy storms of wind or rain. It comes into bearing quickly and continues to set the fruits abundantly throughout the season, while the climbing habit of growth enables the fruit to grow perfectly straight; of large size, from twelve to sixteen inches in length. The Cucumbers are thick exceedingly tender, and of delicate flavor; of cylindrical shape, flesh pure white, skin dark green turning to brown and netted; when ripe they are of excellent quality for slicing, and when young make attractive pickles. With this variety of Cucumbers, the product of a given area of ground can be increased threefold, thus making them particularly valuable in small gardens or to grow on high priced land. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 75c.

The vines continue bearing late in fall. Pkt. 5c, oz.

EGG PLANT.

1 oz. will Produce about 1,000 Plants.

No gardener should be without a few plants of this most delicious vegetable. If all were acquainted with their excellence they would be grown as generally as tomatoes.

NEW PEARL WHITE—This great novelty is sure to meet with a warm welcome from all who love this delicious vegetable. It resembles the New York Purple in shape, but it is pure white, and oftentimes exceeds that popular variety in size. It is unequalled by any other sort in productiveness and of superior table qualities; fruits very early. It short, it is unsurpassed. Pkt. 10c, 3 for 25c.

NEW YORK IMPROVED LARGE PURPLE—The leading variety grown by market men everywhere; fruit large, smooth and deep purple; flesh white and of good quality. Pkt. 5c, oz. 20c, ¼ lb. 75c, lb. \$2.75.

EARLY LONG PURPLE—Hardier and earlier than the New York Purple, succeeding further north. Fruit from 6 to 9 inches long. Good quality; one of the best. Pkt. 3c, oz. 15c, ¼ lb. 50c.

EXTRA EARLY DWARF ROUND PURPLE—Same in general appearance to New York Purple, but smaller. Its great merit is its hardness and extra earliness, hence it is valuable in northern sections. Pkt. 4c, oz. 20c, ¼ lb. 65c, lb. \$2.50.

BORECOLE, OR

KALE.

1 oz. will Sow 150 Feet of Drill.

Sow and Cultivate the Crop with Everitt's Man-Weight Farm and Garden Tools.

DWARF GREEN CURLED SCOTCH—A dwarf variety, rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter. The leaves are very beautifully curled and of a bright green. Very hardy; will stand out where the temperature does not fall below zero. It is most tender after being bitten by a sharp frost. Pkt. 3c, oz. 8c, ¼ lb. 20c, lb. 65c.

DWARF GREEN CURLED GERMAN—This variety is extensively grown as Winter Greens; sown in September, in rows 1 foot apart, and treated in every way as Spinach, it is ready for use in early spring. Pkt. 3c, oz. 8c, ¼ lb. 20c, lb. 65c.

SIBERIAN—Sometimes called "Sprouts" and "German Greens." In this variety the very large, green leaves are comparatively plain in the center, but coarsely cut and frilled on the edge. The plant is low, but spreading and very hardy. Pkt. 3c, oz. 8c, ¼ lb. 20c, lb. 65c.

EVERITT'S EVERLASTING

LETTUCE

THE QUEEN OF SUMMER

Beautiful Color and Forms Large, Handsome, Tender Heads.
The Longest Standing of All.

Every gardener knows the importance of having a Lettuce that is slow to run to seed, and they should also know that this sort excels all other in this respect. It will remain almost all summer in prime condition from one sowing. It is also early and remarkable for the size of its head. *Self-blanching, crisp, tender and of excellent flavor.* This is one of the finest varieties we know of, and will please everybody for family or market garden. Particularly do we urge market gardeners to grow it, and it will put money in their purses, as no variety will bring more money or produce a more permanent crop. Pkt. 10c, oz. 20c, ¼ lb. 40c, lb. \$1.25.

EVERITT'S

THE EUREKA
KITCHEN GARDEN
AND HOT BED DRILL

1 Ounce Will Produce about 4,000 Plants.

TENNIS BALL—A fine early sort; very hardy. One of the best for forcing under glass or early planting outdoors. Heads are small, but extremely solid. Pkt. 2c, oz. 7c, ¼ lb. 20c, lb. 60c.

NEW YORK—Heads almost as solid as an early summer cabbage, which in general form it somewhat resembles. It blanches itself naturally, tender and of excellent flavor, and entirely free from bitterness. Pkt. 3c, oz. 10c, ¼ lb. 20c, lb. 75c.

IMPROVED HANSON—The finest strain of this popular variety in the country is what we offer. Our seed will produce mammoth heads almost as solid as cabbage, delicious, sweet, crisp and tender. Stands drought and scorching heat better than many others. Pkt. 3c, oz. 8c, ¼ lb. 20c, lb. 65c.

BLACK SEEDED SIMPSON—Grows fully double the size of the Early Curled Simpson, and is better in every way. It is much lighter colored, leaves being almost white. Stands summer splendidly. Pkt. 5c, oz. 7c, ¼ lb. 20c, lb. 65c.

CALIFORNIA ALL HEART—It heads up like a cabbage and almost as solid, of a beautiful light green shade, almost white and a very rich flavor; grows rapidly and is tender and sweet at all times. Pkt. 5c, oz. 15c, ¼ lb. 30c, lb. \$1.00.

TILTON'S WHITE STAR—Of the Black Seeded Simpson type, but grows larger and more rapidly; blanches perfectly and is of excellent quality. The plants remain long in condition for use before running to seed, and owing to the thick leaf keep long after cutting without wilting. For forcing and early planting out doors, it is a decided improvement over other varieties of this class for either purpose. Pkt. 4c, oz. 10c, ¼ lb. 25c, lb. 75c.

GRAND RAPIDS—This variety originated at Grand Rapids, Mich., where it is largely grown for shipment, and where it is considered the best loose-headed Lettuce for forcing under glass. Leaves medium size, of light yellowish green color, much crimped, and frilled, very upright growth; forms a fair sized but loose head; crisp, tender and a good quality. Will stand without spoiling a week to ten days after it is fit to cut. Pkt. 3c, oz. 7c, ¼ lb. 20c, lb. 65c.

BUTTERCUP—For beauty of foliage, extreme tenderness and delicacy of flavor, it is hard to beat. Always forms good solid heads. It is one of the best of all new varieties. Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 75c.

DENVER MARKET—An early variety of Head Lettuce, either for forcing or open ground. It forms large, solid heads of a light green color, and is very slow to go to seed. The leaves are crisp and tender, and of excellent flavor. By the blistered leaves it distinguishes itself from any other kind of Lettuce now grown. Pkt. 3c, oz. 7c, ¼ lb. 20c, lb. 65c.

CALIFORNIA CREAM BUTTER—A distinct variety of cabbage Lettuce. It forms round, solid heads, as shown in illustration. The leaves are of a very rich cream-yellow color—most refreshing in appearance, and particularly rich and buttery to the taste. The heads are of good size, compact, very hard and solid. The heads are so solid that generally they have to be cut before any seed stock can make its appearance. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

TOMHANNOCK—Entirely distinct from all other existing varieties and of fine quality. It forms a beautiful plant ten to twelve inches high, grows very quickly, is ready to cut early; remains for weeks of the finest quality. Pkt. 3c, oz. 8c, ¼ lb. 25c, lb. 75c.

EARLY CURLED SILESIA—The first to produce edible leaves. For forcing and early spring sowing it is very popular. Pkt. 2c, oz. 6c, ¼ lb. 20c, lb. 60c.

"ALL SUMMER LETTUCE"—One dozen varieties mixed. Will give you excellent Lettuce all summer from one sowing. Try a packet this season. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

Quality. We realize that QUALITY OF SEEDS is everything to the gardener, and we know there are no seeds in the world purer and of higher quality than our O. K. SEEDS.

O. K. NETTED GEM. MUSK MELON.

Also lately sold under name of
...ROCKY FORD...

This improved strain of Netted Gem Melons we have produced by years of careful selection, and their superior quality is attested by numerous large growers in many important trucking sections of the country who regularly procure their seeds of us. This variety of Melons is probably more largely grown than any other, and all planters should use the O. K. strain of seed. Are very prolific, small size, weighing 1 to 2 pounds. Flesh thick, green. Flavor lusciously sweet. Shape oval, as shown in illustration, averaging from 4½ to 5 inches in length, of the most attractive appearance and yield with the most lavish productiveness. Extra early in ripening. They are usually marketed in baskets and crates, and it is the one variety that the markets are seldom overstocked with. We sell large quantities annually. Pkt. 5c, oz. 15c, ¼lb. 25c, lb. 75c.

O. K. NETTED GEM, (Round Strain.) This is the same as above, except the shape is round. Pkt. 5c, oz. 10c, ¼lb. 20c, lb. 65c.

Paul Rose—New Musk Melon. A successful cross of the Osage with the rind and "Cheesy" structure of the flesh peculiarly its own, which are great advantages. It surpasses others as a crate or basket shipper and long keeper. In times of overstocked markets the Paul Rose sells out clean at four or five times prevailing prices. Shape of Netted Gems. Color of netting gray, underlaid by a dark green rind; the combination making a strikingly beautiful appearance. Price, pkt. 5c, oz. 15c, ¼lb. 40c, lb. \$1.00.

HOOSIER CANTELOUPE.

INTRODUCED 1898.

THE HOOSIER CANTELOUPE is the latest and best production of the noted Melon grower, J. M. Nash, of the Hoosier State. He has earned an enduring reputation as the originator of such noted Melons as Hoosier King, American Queen, Indiana Sweetheart, etc., and growers who have profited by his former production will gladly welcome this grand new Musk Melon. We introduced it in 1898, and every grower is more than pleased. We have again bought all the originator's seed and control the variety.

The Hoosier Canteloupe is a cross between the Perfection and Hackensack; with six years' careful breeding to obtain a high grade shipping Melon. The skin has a rich color of dark gray netting, which changes to orange when ripe. Flesh is very thick and rich; orange color; flavor the best. The vines grow heavy and vigorously, and should have more space than any other variety. Fruit is a third larger than the Hackensack. The fruit is just the right size. The orange flesh is very thick and lusciously sweet. We urge all lovers of good Melons to try this splendid sort.

I have made a business of raising Melons for five years and the Hoosier Canteloupe is the best seller and keeper I ever handled.

ANDREW COLB, Hillisburg, Ind.

The Hoosier Canteloupe has given my trade satisfaction in every respect. I think they are the best Melons on the market. They are far better than any other Melon ever grown about here before.

W. BARNARD, Merchant, Sullivan, Ind.

I have handled the Hoosier Canteloupe in my trade and find them strictly first-class in every respect, and recommend them to any trade.

BELL & MCKINNEY, Merchants, Sullivan, Ind.

I have sold the Hoosier Canteloupe to my trade and do recommend it highly as a most excellent variety.

W. A. JENKINS, Merchant, Sullivan, Ind.

We have handled the Hoosier Melon grown by Mr. Nash, and recommend it as being first-class in every particular, and one that will bring the top price wherever offered for sale. MASON & Co., Merchants, Sullivan, Ind.

I have used the Hoosier Canteloupe and prefer it to any other that can be obtained in this market.

JOS. FREEMAN, Sullivan, Ind.

We have handled some of the Hoosier Canteloupes, and can recommend them as excellent Melons, both as sellers and eaters. J. T. REID & SOW, Merchants, Sullivan, Ind.

Price, pkt. 10c, oz. 25c, ¼lb. 75c, lb. \$2.00.

SPECIAL. We will send 1 pkt. of each of 4 Melons on this page for 15c, 1 oz. of each for 35c, 1 lb. of each for \$3.00, all postpaid.

EXTRA-EARLY HACKENSACK

MONTREAL MARKET

BANANA

SWEET, DELICIOUS MUSK MELONS

1 oz. will plant about 60 hills; 2 lbs. per acre.
PRICE, UNLESS OTHERWISE STATED:
 Pkt. 3c, Oz. 7c, ¼ Lb. 20c, Lb. 60c.

EXTRA EARLY HACKENSACK—10 days earlier than the old Hackensack, which enables growers to put them on the market when they will bring double the price obtained for the old sort. They grow large, round-shape, flattened at both ends, skin and flesh green, of rich, sugary flavor.

ACME, or BALTIMORE—Very productive, oblong. Of large size, ribbed and heavily netted. A good shipper. Flesh thick, light green and of good quality.

JENNY LIND—Small size, but of best quality; season early.

IMPROVED MONTREAL MARKET—A magnificent musk melon. The fruit is round and flattened, as is shown in the illustration, deeply and regularly ribbed, skin and flesh green; densely netted; extremely thick flesh of exquisite flavor. Frequently grow to weigh more than 30 lbs.

IMPROVED BANANA—Frequently as many as a dozen melons will be borne on a single vine, all measuring over 25 inches in length. Flesh very thick, almost solid; salmon color, and more delicious than any other musk melon when thoroughly ripe. A great novelty and sure to interest and please. Try it.

GROWER'S PRIDE—For beauty, productiveness and delicious flavor, this melon is second to no other sort grown. In prolific bearing it is a perfect marvel, the ground being literally covered with the large, round, deep-ribbed beauties, weighing from 7 to 10 lbs. each. Flesh thick, green, melting. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

GROWER'S PRIDE

CHRISTOPHER COLUMBUS

EMERALD GEM

CHRISTOPHER COLUMBUS—A very distinct variety. The large size and peculiar external appearance, so remarkably distinct from any other sort, in connection with its extraordinary fine eating quality, which excels all others, and its fine-grained and thick flesh, proclaim it a popular favorite wherever introduced. Flesh green. Size convenient for market. Medium early. A splendid shipper. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

OSAGE—Extensively grown. Very popular. Medium size, egg-shaped. Skin is very thin, dark green color, slightly netted; flesh salmon color, lusciously sweet and spicy.

PROLIFIC GREEN NUTMEG—Large growth, fine form, skin and flesh green; very delicious.

EMERALD GEM—About the size of O.K. Netted Gem, but the skin is smooth and of a deep green color. Flesh salmon, very thick, quality superb, yields heavy crops.

SHUMWAY'S GIANT—The largest melon ever introduced. Seeds are four times as large as other melons, thus proclaiming them a distinct sort. The melons average as large as half-bushel measures. Outside green, turning white cream when ripe. Salmon colored flesh. The finest exhibition melon. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

CASSABA, or GREEN PERSIAN—Very large, oblong, netted skin, excellent flavor.

DELMONICO

OSAGE

BANQUET

DELMONICO—The flesh is of a beautiful orange pink, and for quality is among the very best. A grand melon.

BANQUET—Medium size. The flesh uniformly deep, and of that granulated character that always indicates a good melon. Color, a dark rich salmon.

CHRISTIANA—One of the most delicious of all melons.

2 GREAT WATERMELONS.

INDIANA SWEETHEART.

Large.
Uniform.
Handsome.
A Good
Shipper.
A Long
Keeper.
Solid.
Heavy.
Sweet.
A
Grand
Melon
to Grow.

Indiana Sweet-Heart.

Our greatest specialty in Watermelons. The most valuable Melon offered in years. An all-round Melon unsurpassed. Early, large, handsome, heavy, good shipper, long keeper, brightest color, best quality. Vines vigorous, very productive; ripens early and bears long. Fruit large, oval, very heavy mottled or netted, like illustration; light and dark green. Rind thin, but very strong, making it a melon unsurpassed for shipping. Flesh red, melting and sweet. The best keeper. The INDIANA SWEET-HEART Melon brings a good price when others rot for want of purchasers. One of the most satisfactory things we ever sold. Every Melon grower needs it; will not do without it if he knew how good it is. A great ball of sweetness. Read the telegrams:

A record unsurpassed. "Sweet-Hearts" bring fancy prices when others are not wanted.

Cleveland, O. Sweet-Hearts selling to-day 15c to 18c, others 12c to 13c. WILLIAMS BROS.

Columbus, O. Sweet-Hearts selling 15c to 20c. Striped Melons 10c to 15c. WM. M. FISHER & SONS.

Findley, O. Prefer Sweet-Hearts; when can we have another car? ALTSCHUL BROS. & Co.

South Bend, Ind. Sweet-Hearts perfect daisies. MILL BROS.

We could print hundreds of reports if space permitted. Send for them if interested. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 65c, 2 lbs. or more by express at 60c per lb. This seed is worth \$5.00 per lb. to any grower.

NOTE FOR TRUCKERS—This Melon, for shipping purposes is unsurpassed, and its fine quality makes it a favorite in every market. You will probably make more money from a crop of Sweet-Hearts than from any other kind you can plant.

✂✂ GIRARDEAU'S TRIUMPH. ✂✂

6 Melons Weighed 420 lbs. in 1897.

The originator of this Melon, who has produced more good varieties than any other man in the country, describes it as follows:

"This new Melon, as a market sort and for shipment, is the best I have ever introduced. It is very prolific, very early and of uniformly large size. It is a cross between the Duke Jones and Kolb Gem; has the fine, handsome appearance of the former and the fine shipping qualities of the latter. The rind, like the Duke Jones, is of dark green color, the seed exactly the same color as of the Kolb Gem. As a table Melon it is of much better flavor than the Kolb Gem. The average size of the Melon is very large. I gathered from 2½ acres 2,418 Melons, weighing over 40 pounds each. Comparatively speaking, there were no small Melons on the vines at the time of harvesting. Price, pkt. 7c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

1898

6 Melons Weighed 550 lbs. in 1898.

The Triumph is very early, very large, very prolific, deliciously sweet, of finest flavor, in fact, the finest Watermelon in the United States. The farmer who values his Melon patch and looks forward to the good times in July and August can not afford to do without the Triumph. Pkt. 10c, oz. 20c, ¼ lb. 50c.

A commission house in Norfolk, Va., says:

"We handled the past season over 300 cars of Melons. The Triumph's were the best, and we will advise our growers to plant nothing else. One car of Triumph's sells for as much as 3 cars of others."

J. L. Miller, of Chester Co., S. C., says: "I pulled 4 Triumph's from one vine weighing 75, 74, 66 and 58 lbs., total 273 lbs. It is of very fine flavor."

WATER MELONS

GREEN & GOLD

SEMINOLE

EVERITT'S WHITE QUEEN

PEERLESS

Plant 1 oz. for 50 hills, 4 lbs. per acre.

PRICE—unless otherwise quoted: Pkt. 3c, oz. 6c, ¼ lb. 15c, lb. 40c.

GREEN AND GOLD—Green without, gold within. The melons range from 25 to 45 lbs. in weight, and in productiveness equal any of the red-fleshed sorts, while in delicious flavor is unsurpassed.

SEMINOLE—Extra Early, enormously productive, large and of most delicious flavor.

EVERITT'S WHITE QUEEN—This is the largest and finest white melon ever introduced and the handsomest of all. Quality is very fine and equal to the best melon grown. A splendid shipper. Grows to weigh 25 to 40 lbs. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

GYPSY, OR GEORGIA RATTLE SNAKE—A superior early market variety; large, oblong; skin green mottled and striped.

DIXIE—This superb watermelon has taken the market by storm where introduced. The vines grow strong and rapidly, with more laterals than any other melon, and have the singular and very valuable quality of **rooting from every joint**, adding greatly to the productiveness and life of the vines. Very early; thin, hard rind, keeps unusually long before showing decay. One of the best.

BLACK SPANISH—Medium size, round, very green, flavor rich and sugary.

PEERLESS OR ICE CREAM—Medium size, pale green, thin rind, flesh scarlet and solid. **Flavor of the very best.**

CUBAN QUEEN—Flesh bright red, luscious, crisp and sugary. An excellent keeper. Large size.

VICK'S EARLY—Highly prized for its extra earliness. Oblong in shape, smooth, size medium, flesh bright pink, solid and sweet.

COLORADO PRESERVING—The best variety for preserving.

HOOSIER KING

FLORIDA FAVORITE

COLORADO PRESERVING

Hoosier King Watermelon.

This magnificent melon was produced in Indiana by a large melon grower. For years he has been growing them on his farm and shipping them to the Indianapolis market, much to his own profit and to the annoyance of other shippers, as his melons were sought after by retailers and consumers in preference to any other. Read what Mr. Reese has to say:

"The Hoosier King is the finest, largest and best quality melon that comes into this market. They arrive in better condition, are uniformly larger size, and sell for more money than any other variety; besides the consumer who tries them will have no other." **R. H. REESE,** Commission Merchant, Indianapolis, Ind."

The skin is beautifully striped, being two shades of green light, and dark, seeds black, flesh brilliant red, solid, rich, sweet and luscious; skin thick and tough. They will stand very rough handling. Size, large, to very large. Melon 60 lbs. weight can be easily raised. Every melon grower will find the **Hoosier King** fully

equal to our recommendation. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c. 2 lbs. by express at 50c.

LIGHTING—Medium size, round, very light green or white, mottled with slightly darker green. Flesh bright, light red, very sweet and tender. By many this is considered the best of all melons.

FLORIDA FAVORITE—Of medium size, very prolific, and unexcelled as a table variety. For home use or near-at-home markets it will give great satisfaction.

KOLB'S GEM—An excellent shipping variety. Flesh bright red, of good quality. The melons weigh from 20 to 50 lbs. each.

DIXIE

KOLB GEM

ONION SEED THAT CAN BE DEPENDED ON

As this is one of the most important crops grown by gardeners and truckers, and as there is no other crop in which the quality of the seed exerts a greater influence on the crop, too great care can not be exercised in selecting your seed. Our Onion seed is all of the highest quality, grown from choice, perfect bulbs, and can not be excelled in the country. Quality is the first consideration, price second. In both we defy competition. Absolutely none better.

The 1898 crop of Onion seed was shorter than for many years. Prices consequently are higher than for a couple years past. We have our usual large supply and aim to sell our choice O. K. Seeds at prices that challenge competition. If any seedman offers seed that has evidence of being reliable at lower prices, let us know, and we will go him one better. We want your order, whether for 1 Pk. or 1,000 pounds.

♦ HOW TO GROW ONIONS ♦

1. Obtain good seed. O. K. Seed's the kind.
2. A rich, sandy loam, with a light mixture of clay, is the best soil; although any soil that will produce a good crop of corn will grow a crop of onions, except a stiff clay. Very light sand, swamp and raw muck land are not desirable.
3. Fertilize heavily. The manure must be well rotted or composted. Fine ground bone and phosphates are very suitable. A about 600 to 800 pounds per acre.
4. Sow the seed very early—5 pounds to the acre for large onions; 30 to 50 pounds per acre for sets. Can sow later for sets.
5. Give thorough, clean cultivation. Everitt's Man-Weight Machines are the best.
6. New Onion Culture is a valuable book to all onion growers. Price, 50 cents, or can be selected free on orders amounting to \$3.00 for onion seed. Tells how to raise 1,000 bushel per acre.

ONE OF OUR SPECIALTIES

Yellow Globe Danver's ONIONS

A PILE OF YELLOW
GLOBE
DANVER'S
ONIONS
FROM O. K.
SEEDS

If you want to Grow this kind Plant the O. K. Seeds.

THIS magnificent sort can not be too highly recommended. It is more extensively grown than any other variety. 600 bus. per acre is an ordinary crop under favorable circumstances, while 800 bus. per acre can be grown by a skillful cultivator from seed sown in the spring. We offer but one strain of Yellow Globe Danver's Onions and that is the best. For reliability in bottoming our strain is unsurpassed. Bulbs are very handsome, round, of good size, with thin straw-colored skin; flesh white, fine grained, firm, mild and excellent quality. It ripens early, keeps well, and sells readily at the highest price. Our Yellow Globe Danver's is all that can be desired as a market and table Onion. We sell seed in 100 lb. lots to individual growers year after year.

PRICE—Pkt. 3c, oz. 15c. ¼ lb. 35c, lb. 98c, post paid. By freight or express, 5 lbs. or more at 85 per lb.

We have a very large stock of all varieties of Onion Seed, and aim to give our friends the benefit of prices below all our competitors. Yet we can not predict the demand exactly, and if we are obliged to replenish our stock prices may be higher. We advise early orders this year. We will at all times meet honorable competition in price.

Another of Our Great Specialties.

Everitt's Superior Strain
Large Red Wethersfield. **ONION**

IF YOU PLANT O. K.
.. SEEDS YOUR CROP
.. WILL BE O. K.

It is often a matter of choice of color what onion is grown. To those growers who prefer a red variety, we recommend our Large Red Wethersfield. This is also one of our greatest specialties, and next to yellow Globe Danvers we sell the largest quantity of seed of it. It is the most reliable red onion grown for general purposes. It yields enormous crops: from 600 to 800 bus. per acre, and is a most reliable cropper, even under unfavorable conditions. Large size, purplish-red skin, flesh purplish white, form round, flattened, fine grained, moderately strong flavor. The best keeper. Especially adapted to poor and dry soils.

PRICE—Pkt. 4c, oz. 10c, ¼ lb. 35c, lb. 98c, post paid. By express, 5 lbs. or more at 85c.

SOUTHPORT LARGE YELLOW GLOBE—A very handsome round or globe-shaped variety, of large size with thin, yellow skin, white flesh, fine grained, mild, very firm, and the best of keepers. It ripens early and sells readily at the highest prices in our markets. It is a most reliable variety for bottoming, and entirely free from scallions. Pkt. 4c, oz. 10c, ¼ lb. 35c, lb. 98c. By express, 5 lbs. at 85c.

YELLOW FLAT DANVERS—This variety differs from the Yellow Globe Danvers in being more flat. Pkt. 4c, oz. 10c, ¼ lb. 35c, lb. 98c.

EXTRA EARLY RED—This variety matures very early. It yields abundantly and is of a mild flavor; of medium size, deep red in color, very close grained, solid and heavy. It will often form bulbs in cold, mucky soil, where other varieties fail. It is highly recommended, particularly for the North and Northwest. Pkt. 4c, oz. 10c, ¼ lb. 35c, lb. \$1.00. By express, 5 lbs. 90c.

SOUTHPORT LARGE RED GLOBE—With the exception, perhaps, of some of the white varieties, there is no onion that realizes such large prices as this, its beautiful globe shape, and rich purplish crimson color making it extremely desirable. It is a good keeper and of excellent quality. Pkt. 5c, oz. 20c, ¼ lb. 75c, lb. \$2.50. By express, 5 lbs. at \$2.40.

SOUTHPORT WHITE GLOBE—Large, globe-shaped onion, firm, fine grained, mild flavor, keeps well. This is one of the handsomest onions grown, of beautiful shape, clear, white skin, and commands the highest market price. Pkt. 5c, oz. 15c, ¼ lb. 65c, lb. \$2.25. By express, 5 lbs. \$2.10.

WHITE SILVERSKIN, OR WHITE PORTUGAL—Very desirable for family use; flavor mild and pleasant; skin silvery white; of handsome appearance; highly esteemed for pickling when young, also for market in early winter. Extensively planted for White Onion Sets. Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. \$1.50.

EXTRA EARLY WHITE BARLETTA—Without doubt the very earliest onion in cultivation. Pure white color, very mild and delicate flavor. For table use and pickling it is most valuable. Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. \$1.50.

WHITE QUEEN—A small, very early variety. The quality is excellent. Pure white outside and inside. Can be sown from February to July. Largely grown for pickling. Pkt. 4c, oz. 15c, ¼ lb. 45c, lb. \$1.50.

ONION SEED Prices are high on some varieties this season. We don't think any reliable seedsmen will offer at less than our rates, but if they do let us know, as we will not be undersold, and you should plant the O. K. Onion Seed. Prices subject to change.

ITALIAN ONIONS.

All of the varieties grow very rapidly from seed, and are sweeter and of more delicate flavor than our American onions; while the bulbs are of the most beautiful shape and color. We advise growers to devote their main crop to the American varieties, yet we recommend them to vary it by planting part of the Italians. We recommend them highly for summer and autumn use in the family, while if marketed they command fancy prices.

Giant Rocco or Naples.

One of the best known of the Italian Onions in this country. Quite extensively grown in some sections, where they produce immense crops, single bulbs weighing 1½ to 2 pounds each. Flavor very mild and delicate; color, light brown, flesh white; very handsome, globular shape; a good keeper. Pkt. 4c, oz. 10c, ¼ lb. 25c, lb. \$1.00.

Mammoth Silver King.

This is unquestionably one of the largest and most beautiful onions in the world. Single specimens have weighed as much as 5¼ pounds. No other onion excels in mild and delicate flavor, or has a more handsome and beautiful silvery white appearance. So mild are they in taste that they can be eaten raw like an apple. They always command a high price in the market. Pkt. 4c, oz. 10c, ¼ lb. 35c, lb. \$1.25.

Spanish King.

The outside skin is of a rich, yellow straw color, while the flesh is white, sweet, mild and tender. They bottom well, are free from stiff necks, and have produced more bushels (1,127) marketable onions to the acre than any other variety known. Very rapid growth and matures early. In market it attracts marked attention. Pkt. 4c, oz. 15c, ¼ lb. 35c, lb. \$1.25.

Giant White Italian Tripoli.

Of large size, and most beautiful form, with fine white skin. The first season from the black seed it will grow an onion from 1 to 1½ pound, but to attain the full size seed should be sown in a hot-bed and transplanted. Pkt. 4c, oz. 10c ¼ lb. 30c, lb. \$1.10.

WEIGHT
2½ to 4 lbs.

NEW ROSE-COLORED DELICATESSE

ONION.

The Most Beautiful of all. Largest, Finest, Best, Most Productive.

This grand variety can not be praised too highly. In some respects it is different from and superior to any other Onion now in cultivation. In handsome appearance it is quite distinct, having a rosy skin quite peculiar to itself, and is a novel and striking feature. The flesh is pure white and delicately mild. As a variety to serve uncooked it has not a peer. Shaped flat, round, as shown. Bulbs often weigh from 2½ to 4 lbs. the first year from seeds, and will yield enormous crops. Every one desiring the most beautiful Onion, as well as the largest and best, will be satisfied with it.

Pkt. 10c, 3 for 25c, oz. 50c.

Rose-Colored Delicacies, Yellow Danvers and Wethersfield Onions were "death dealers" to all other brands in this section of the country.

CHAS. E. ELLIS,
Feagaville, Md.

The Genuine PRIZE TAKER ONION.

Although several years have passed since this beautiful Onion was offered, it has not lost one iota in the deservedly popular esteem that it is held by growers. On the contrary, by careful selection and growth, we are enabled to offer seed that will produce better crops this year than ever before. No other Onion equals this for ease of growing from the seed and certainty to produce a crop. The amateur is likely to realize more profit from a crop of Prize Takers than almost any other variety. The main thing to insure success is to get the genuine seed, as much spurious seed is palmed off each season, to the great disappointment and loss of the purchaser.

PRICE:

Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50. By express 5 lbs. or more at \$1.40 per lb.

PRIZE-TAKER ONION.
Every person who visits our large cities has doubtless noticed the large, fruit stands every fall. These onions were originally imported, but since the introduction of this famous variety there is getting to be less demand for imported stock, and the demand is being filled by American grown Prize-Takers. They are of a beautiful rich straw color and grow to enormous size, averaging 12 to 14 inches in circumference, and under favorable circumstances attain a weight of 5 pounds from the seed; although of such great size, they are very firm. Of the mildest flavor, they are often eaten as an apple. They have a very small neck, perfect globe shape, and they always attract attention, and bring two or three times the price of ordinary onions of any other color. They are wonderfully productive and can be grown by any person.

O. K. Seeds.

REPORTS ON

If the Seeds you planted heretofore were unsatisfactory for any reason, plant the O. K. BRAND this year. None better under the sun. O. K. Seeds insures your crop.

I am much pleased with **O. K. Seeds**. Green Mountain and Six-Weeks Potatoes are my favorites. Carter's Cardinal Turnips are fine. Yellow Globe Danvers and Red Wethersfield Onions are always found in my garden. I am so well pleased with **O. K. Seeds** that I will send an order for next year. I also want to get a Man-Weight Machine. A. L. REYNOLDS, Logansport, Ind.

I have planted your **O. K. Seeds** and like them. Send me a Catalogue and I will send another order. W. S. THOMPSON, Riley, Okla.

The **O. K. Seeds** from you were the best and cheapest I ever planted. Every seed seemed to come up. The Indiana Sweet-Heart Melon made a fine crop when others failed. Everitt's Earliest is the earliest cabbage I ever planted. Logan's Giant Tomatoes are large, solid and fine flavor. Green Mountain Potato made a fine crop, notwithstanding the drought. J. T. SOUTHERLIN, Brooklyn, Va.

We are well pleased with **O. K. Seeds**. Don't think we could have done any better anywhere. W. B. HELM, Greensburg, Ky.

O. K. Seeds are the best I ever used. No trouble to get plants if you sow **O. K. Seeds**. Logan's Giant Tomato is the best I ever saw. It stands at the head of the list in size, quality and yield. JAMES L. NOBLITT, Stamyers Creek, Ind.

My corn did extremely well. Cabbage and Japanese Climbing Cucumber good. Prize-Taker Onion extra good. SHERMAN BALES, Bales Landing, Ky.

O. K. Seeds from your house all proved satisfactory. The sugar corn was the best we ever saw. Everitt's Earliest-of-All Tomato the earliest we ever raised. Logan's Giant Seedling grew to weigh 5 and 6 pounds each. It was the largest ever seen in this part of the country. It is also the best flavored and the best for canning. ROBERT PENDLETON, Milton, Ky.

O. K. Seeds are the cheapest and best that I ever obtained anywhere. I will always give you my order. I got as much seed from you for 3c. as I got from — for 10c. I will recommend everybody to get their seeds from you. COMODORE BARNEY, Glengary, W. Va.

I have bought and planted your **O. K. Seeds** for four years, and I can say I am well pleased with them. They are just as you say. Space forbids me mentioning all varieties, but I want to especially mention Brill's Non-Such Cabbage, Prize-Taker Onion, Gladiolus, Caladiums, Also the Early Six-Weeks Market Potato, which leads for earliness. B. D. YODER, West Liberty, Ohio.

Brill's Non-Such is the most tender and sweetest cabbage we ever grew. Thoroughbred Potatoes are early, good croppers and good quality. Logan's Giant Tomatoes are of enormous size. J. C. MOSSFORD, Millbrook, Pa.

I like your **O. K. Seeds** better than any other. Logan's Giant Seedling Tomato was the finest I ever raised. Your Superior Late Flat Dutch Cabbage was excellent. The largest heads in the neighborhood. MRS. LIZZIE JONES, Ellinsville, Ind.

I have used **O. K. Seeds** 2 years and will use no other. I raised Logan's Giant Seedling Tomatoes weighing 5 lbs. each. W. J. BANKS, Monticello, Ky.

I am pleased with **O. K. Seeds** in general, but your Rough and Ready Cabbage, Rust-Proof Wax Beans and Prize-Taker Onions are the best I ever grew. J. I. COOPER, Monroeville, Pa.

Your **O. K. Seeds** gave perfect satisfaction. Will order from you again next spring. MRS. L. E. SCOTT, Ewell, Va.

I do not hesitate to recommend your **O. K. Seeds** to the public, as they are the best I ever planted. We made good corn with one ruin, while our neighbors made nothing. GEO. COLWELL, Ledbetter, Texas.

Your **O. K. Seeds** are fully as good as recommended. The Indiana Sweet-Heart and Hoosier King Watermelons are the best melons ever in Ohio. They have no equal. JONATHAN ENGLE, Aid, Ohio.

I have used **O. K. Seeds** 2 years and they are the best I can get. Brill's Non-Such and Everitt's Earliest Cabbages are the best I ever saw. Japanese Climbing Cucumbers, Prize-Taker and Delicatess Rose Onions cannot be excelled. Logan's Giant and Giant Climbing Tomatoes are the finest I ever saw. I raised specimens weighing over 4 pounds. WALTER JOHNSON, Grahamville, Ky.

We have used **O. K. Seeds** for 2 years and are pleased with them. We never saw larger heads of cabbage than we raised from your Short Stem Drumhead and Late Flat Dutch. It was large, deep grains and yielded better than others. SAMUEL E. RAUCK, Intercourse, Pa.

All the **O. K. Seeds** proved satisfactory. They all grew well. The Short Stem Drumhead Cabbage and White Spine Cucumber were the largest I ever raised. ARCHER WILLIARD, Whitley, Pa.

The **O. K. Seeds**, Rough and Ready, Short Stem Drumhead and All-Seasons were the best I ever raised. Indiana Sweet-Heart Melon was fine. I want more of your **O. K. Seeds** next year. J. F. YOUNG, Bundy, N. C.

Indiana Sweet-Heart and Hoosier King Watermelons cannot be beat for fine eating quality and good shippers. We had good success with Yellow Globe Danvers Onion. Logan's Giant Tomato is as fine as I ever saw. New Champion and Mammoth Sweet Corn are certainly fine. Evergreen Cucumbers is one of the finest for the table. Long Blood and Lane's Sugar Beets extra fine. I will plant no others but **O. K. Seeds** when I can get them. W. S. WINTER, Mansfield, Texas.

The Alpha Pole Beans are great yielders and quality unexcelled. Cucumbers all good, but White Spine is my choice. The White Corn is the best of all. I had 45 acres this year that will make 75 bushels per acre. I would like to furnish you some for seed. O. Hlatt, Hamilton Co., Ind.

I used **O. K. Seeds** last spring for the first time and they are all good, but the Giant Climbing Tomato caps the climax. I had 2 vines over 15 feet high and as fine fruit as I ever saw. I have a peck of them now (Nov. 15) as nice and good as when on the vine. I picked them before hard frosts came and put them in a cool room. SUSIE HOCKETT, Dalton, Ind.

I am well pleased with **O. K. Seeds** from your house for 2 years and will want some more next year, and my neighbors want the **O. K. Seeds** also. F. M. WENDT, Patterson, Texas.

I like **O. K. Seeds** mighty well. After I got rid of the cut worms they did fine. I have not room to describe even one variety, but I like them all. S. F. SWANSEY, Weston, Ky.

I am well pleased with **O. K. Seeds**. There is none better than Everitt's Earliest Cabbage. Indiana Sweet-Heart Melon is the best; Logan's Giant Tomato is excellent. I have been planting **O. K. Seeds** for 4 years, and I think they are the best for this country. My advice to all is, "Plant **O. K. Seeds**." GEO. W. RISLEY, Karnes City, Texas.

I have used your **O. K. Seeds** for 11 years and like them best of all. Your Early Valentine Beans were ready for use in May. Best I ever raised. Rough and Ready and All-Head Early are the finest cabbages. I would not be without them. Purple Top Munich Turnips surprised my neighbors. Early Six-Weeks Potatoes, early and fine; can't be beat. **O. K. Seeds** are the best. I will use no others, and my neighbors will order through me next season. M. L. WEST, Kirk Key, Breckenridge Co., Ky.

EVERITT'S EXTRA EARLY RELIANCE Peas

THE BEST EXTRA EARLY.

A MONEY MAKER FOR THE TRUCKER AND GARDENER.

In all the essentials of an early market or home garden Pea this is perfection. *It has made friends wherever planted, and is acknowledged by all acquainted with its merits as being unexcelled in earliness and productiveness.* They are now largely grown by the best gardeners in the country. Height about two feet, vines loaded with well filled pods. Pkt. 5c, pt. 20c, qt. 35c, peck, 90c, bu. \$3.00, 5 bu. \$14 00.

Varieties marked * are wrinkled.

EARLY SORTS.

***McLEAN'S LITTLE GEM**—A dwarf, prolific, green, wrinkled marrow, having all the flavor of late wrinkled Peas. Height, one foot; require no support. Largely grown for canning as well as for market. Pkt. 5c, pt. 20c, qt. 35c, peck 90c, bu. \$3.00. 5 bu. or more at \$2.90.

***AMERICAN WONDER**—So well and favorably known that it scarcely needs description. Our seed is strictly true to name and the choicest strain. Extra early; requires no bushing; exquisite flavor. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.50.

ALASKA—This beautiful Pea has become a standard variety and the earliest of all blue Peas, proving to be not only several days earlier than most early sorts, but of a larger size, and ten per cent. more productive. Vines are dwarf, growing only about 20 inches high; maturing the crop for one picking; of excellent quality. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.75.

FIRST AND BEST—Vines dwarf, about 18 inches, bearing straight, handsome pods, each containing six to eight medium sized, round Peas. Matures all the pods in about 45 days. Pkt. 5c, pt. 20c, qt. 35c, peck 85c, bu. \$3.00, 5 bu. or more at \$2.90.

*Nott's Excelsior Pea

The most valuable of all Dwarf Extra Early Wrinkled Peas. Surpassing in earliness, yield and quality. This is an extra early dwarf Pea, usually ready for the table in 40 to 45 days from planting, only a few days later than the early round sorts. It grows about 14 inches high, or about half as tall again as the American Wonder. It is of vigorous constitution, and wonderfully productive, in which respect it excels such rivals as American Wonder. The even, regular habit of the plant is also a great advantage, particularly to market growers. We believe that Nott's Excelsior has not only "come to stay," but that it will eventually supersede many more of like character. Pkt. 7c, pt. 25c, qt. 40c, peck \$1.25, bu. \$4.00.

*Horsford's Market Garden

A most excellent second early Pea, particularly prized by market gardeners on account of its great productiveness as well as fine quality. It grows about two feet high, very stocky and requires no sticks. Pkt. 5c, pt. 20c, qt. 35c, pk. 85c, bu. \$3.00.

Empire State Pea

A new first early pea, 15 to 18 inches; ripens with Gema; prolific, stocky; pods dark green; peas crowd in the pod; fine flavor, pods good substance and suitable for shipping. Dry peas green, wrinkled. Quality unsurpassed. Price: Pkt. 5c, pt. 25c, qt. 40c, peck, \$1.25.

LATE SORTS.

BLACK-EYED MARROWFAT—A favorite variety; grows about 5 feet high. Pkt. 5c, pt. 20c, qt. 35c, bu. \$2.25, 5 bu. or more at \$2.00.

LARGE WHITE MARROWFAT—A favorite sort; grows about 6 feet high. Pkt. 5c, pt. 20c, qt. 35c, bu. \$2.00, 5 bu. or more at \$1.90.

***CHAMPION OF ENGLAND**—A standard sort; popular in all markets. Productive; high flavor, seeds wrinkled. 5 feet high. Pkt. 5c, pt. 20c, qt. 35c, bu. \$3.00, 5 bu. or more at \$2.85.

***TELEPHONE**—A tall wrinkled marrow, very productive, and of the best quality, with long pods containing 7 to 10 very fine flavored Peas. Height, about 4 feet. Pkt. 5c, pt. 20c, qt. 35c, bu. \$4.00.

IMPROVED STRATAGEM—All the good qualities of the old Stratagem are highly developed, and it is vastly superior to the stocks now generally sold as Stratagem. Vine medium height, but very stocky, with very broad, light green leaves and bearing an abundance of large handsome pods. One of the best Peas now on the market for those who want large, showy pods and Peas without any sacrifice in quality. Price: Pkt. 5c, pt. 25c, qt. 45c. Qt. by express 30c.

Pride of the Market

We assure one and all who are not acquainted with this famous, magnificent Pea that it will astonish all who grow it for the first time. They are a remarkable, robust growing, free-branching sort, 18 to 20 inches high. Stiff stalk and very productive. The stalks are covered with the immense pods and Peas from bottom to top. On account of their grand size and appearance, they are a fine exhibition sort and attract attention and customers wherever put on sale, while the Peas, when put on the table, are of such fine quality, it is difficult to overpraise them. Requires no sticks. Wrinkled. Season late or for main crop. This Pea is in great favor among market gardeners, and each season our stock is not sufficient to supply the demand. We have grown a large supply for this season and hope to be able to supply all comers, yet we advise early orders. Price: Pkt. 5c, pt. 25c, qt. 45c, 1-4 bu. \$1.25, bu. \$4.50.

Everbearing Pea.

The want of a reliable first-class Pea for summer and autumn use has long and seriously been felt by everyone. In this choice and remarkable variety we have a Pea which, when sufficiently known, will everywhere be recognized as an excellent sort for summer and autumn crop. Season late to very late. Height of vines 18 inches to 2 feet. Its habit of growth is of a peculiar branching character, forming as many as ten stalks from single root stalk, 100 pods have been counted on a single vine. After repeated pickings of quantities of full-sized pods the vines continue to be covered with blossoms and buds, developing to maturity, making it a perpetual bearer. On account of its branching habit, a pint of seed will plant as much ground as a quart of most other kinds. Peas large, wrinkled, tender, of superior flavor. Greatly esteemed wherever known. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.50.

*** Parsnips ***

1 oz. of Seed to 200 Feet of Drill
5 to 6 Pounds per Acre.

A deep, rich, sandy loam is preferable. Sow in drills fifteen or eighteen inches apart and thin to six or eight inches in a row. The roots are improved by leaving in the ground during the winter. Excellent food for cattle and also for table use.

IMPROVED CROWN PARSNIPS—A selection from the hollow crown—finer more symmetrical in shape, more sugary and tender. A very heavy cropper, smooth, and the finest variety for the home or market garden. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 50c.

LONG WHITE—A standard variety of great merit. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 50c.

*** Parsley ***

1 oz. to 150 Feet of Drill.

FINE CURLED or DOUBLE
—Used principally as a garnish for the table. Pkt. 3c, oz. 7c, ¼ lb. 20c, lb. 75c.

NEW FERN LEAVED—A new variety; very ornamental in form and coloring. Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. \$1.00.

Peppers

GOLDEN DAWN—A most beautiful golden yellow, making it most beautiful in appearance either in growth or for the table. In productiveness they stand at the head of the list. The flavor particularly sweet and mild, and entirely free from any fiery flavor, so much so that they can be eaten like fruit. Pkt. 3c, oz. 15c, ¼ lb. 50c.

PROCOPP'S GIANT—The real giant among all Peppers, frequently growing 8 to 9 inches long by 3 inches in diameter. Besides being wonderfully large, they are also beauties; color, a glossy scarlet; flesh, nearly half an inch thick, sweet and mild. Every exhibitor should grow them to add to his collection. Pkt. 5c, oz. 20c, ¼ lb. 65c.

RUBY KING—This magnificent Pepper grows 4½ inches long by 3½ inches broad. When ripe, they are bright ruby red color, remarkably mild and pleasant in flavor, having no fiery taste whatever. Single plants ripen 8 to 15 fruits. Pkt. 4c, oz. 15c, ¼ lb. 50c.

LARGE BELL OR BULL NOSE—Early, very large, square form, pleasant to taste, very suitable for filling with cabbage. Pkt. 4c, oz. 15c, ¼ lb. 50c.

LONG RED CAYENNE—Bright red color; very hot. Pkt. 3c, oz. 15c, ¼ lb. 50c.

MONSTROUS, OR MAMMOTH—Mammoth size; mild flavor. Pkt. 3c, oz. 15c, ¼ lb. 50c.

LARGE SWEET MOUNTAIN—Very large and excellent for mangoes. Pkt. 3c, oz. 15c, ¼ lb. 50c.

CHINESE CELESTIAL—It is not only a most useful Pepper, but one of the most beautiful plants in existence. Pkt. 5c.

The Great PRIZE PUMPKIN, King of the Mammoths.

LARGEST PUMPKIN ON EARTH. ENGRAVED FROM A PHOTOGRAPH.
 Heaviest Weight in 1889, 250 lbs. Heaviest Weight in 1891, 195 lbs. Heaviest Weight in 1893, 151 lbs.
 1890, 196 " 1892, 174½ " 1894, 198 "

Truly a colossal variety. No other Pumpkin ever reached such enormous weights, and any person can grow them of mammoth size by planting on rich ground. If planted on any good land they are wonderfully productive as a field crop. Grow the King of Mammoths and you will be sure of the prize at your fair, besides having one of the best table or pie Pumpkins ever grown and a grand keeper. Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. \$1.

A PAGE OF GOOD PUMPKINS.

What is a Fair without Pumpkins or a Thanksgiving Dinner without pumpkin pie?

1 oz. will plant 40 hills; 5 lbs. per acre. If planted with corn, 1 to 2 lbs. per acre.

We will sell one pkt. each of the 14 varieties offered for 35c.

1. **GENUINE MAMMOTH TRUE POT-IRON**—Grows to an enormous size, 3 ft. or more in diameter and 100 to 200 lbs. or more in weight. Salmon colored skin, flesh bright yellow, fine grained and of excellent quality. Pkt. 4c, oz. 8c, $\frac{1}{2}$ lb. 20c, lb. 65c.

2. **MAMMOTH TOURS**—Grows to an immense size; often weighing 200 lbs., and commonly 100 to 150 lbs. Grown for cattle and for table use. We offer the genuine, true article. Seed saved from selected specimens. These seeds have frequently sold at fairs at 10c to 25c each. Pkt. 4c, oz. 8c, $\frac{1}{2}$ lb. 20c, lb. 65c.

3. **MAMMOTH ETAMPES**—Skin is very bright, glossy red, and presents a most handsome appearance, whether for exhibition or on market. Thick-meated, flesh very rich in color and of excellent quality. It attains mammoth weights; in only ordinary soil grows about 2 ft. in diameter. It is very productive and a most profitable sort to grow. Pkt. 4c, oz. 8c, $\frac{1}{2}$ lb. 20c, lb. 65c.

4. **CONNECTICUT FIELD**—Large, color yellow. Largely raised for feeding stock. Pkt. 3c, oz. 7c, $\frac{1}{2}$ lb. 15c, lb. 40c, bu. \$2.50.

5. **TENNESSEE SWEET POTATO**—Grows to medium size, pear-shaped, a little ribbed, color creamy white, sometimes lightly striped with green; flesh thick, white, fine grained, dry and brittle, and of most excellent flavor; very productive and keeps perfectly sound until late in the spring; has no superior for making pies and custards. When cooked it has the appearance of sweet potatoes. Pkt. 3c, oz. 7c, $\frac{1}{2}$ lb. 15c, lb. 50c.

6. **LARGE CHEESE**—Superior to most of the field-grown sorts. Very hard and productive. Pkt. 3c, oz. 7c, $\frac{1}{2}$ lb. 15c, lb. 50c.

7. **INDIANA, OR KENTUCKY FIELD**—Best variety we ever saw for raising with corn. Grows to a large size, solid, and is relished by stock; also valuable for pies and canning. Pkt. 3c, oz. 7c, $\frac{1}{2}$ lb. 15c, lb. 40c.

8. **GOLDEN OBLONG**—Grows 15 to 20 ins. in length. Shell rich, golden orange color; flesh, light yellow. Very rich and fine, making the very best of pumpkin pies. 14 good pumpkins have been raised on a single vine. Pkt. 3c, oz. 8c, $\frac{1}{2}$ lb. 20c, lb. 60c.

9. **JAPANESE PIE PUMPKIN**—This excellent, odd variety comes from Japan, and is largely grown as a choice pie and cooking pumpkin. They ripen early, keep well, and are very productive. Flesh is very thick, being nearly solid, fine grained, dry and sweet, having the flavor of sweet potatoes. The seeds are peculiarly marked with Japanese characters, making them quite a novelty. Pkt. 3c, oz. 8c, $\frac{1}{2}$ lb. 20c, lb. 60c.

10. **GOLDEN MARROW**—Shape, round oblong, slightly ribbed. Golden orange color, cooks soft and tender and is the best of keepers. Very vigorous growth, and immensely productive. Pkt. 3c, oz. 8c, $\frac{1}{2}$ lb. 20c, lb. 60c.

11. **WINTER LUXURY**—This new pumpkin, first offered two years ago, is the result of six years' careful selection and improvement by a veteran pumpkin-grower, and is pronounced by him and his neighbors the very best pumpkin for pies that they have ever known. It grows uniformly to a diameter of 9 to 10 ins. In color, a beautiful yellow or straw color, and very finely and closely netted, like a netted muskmelon. As a winter keeper and cooking variety it stands unequalled. Pkt. 5c, oz. 10c, $\frac{1}{2}$ lb. 25c.

12. **QUAKER PIE PUMPKIN**—A distinct variety, grown for many years by a family of Quakers or Friends. The shape is nearly oval, tapering slightly toward the ends. Color, creamy white, both inside and out; flesh sweet and rich, and an excellent keeper. Pkt. 3c, oz. 8c, $\frac{1}{2}$ lb. 20c, lb. 60c.

13. **SMALL SWEET SUGAR**—Small size, very sweet and sugary. Pkt. 4c, oz. 10c, $\frac{1}{2}$ lb. 25c.

14. **CASHAW**—Excellent table qualities; well adapted to Southern States; light cream shell; flesh, salmon color; very productive. Pkt. 3c, oz. 7c, $\frac{1}{2}$ lb. 15c, lb. 50c.

A PAGE OF SUMMER RADISHES

Sow 1 oz. to 100 Feet of Drill, 80 lbs. per Acre.

Price, unless otherwise quoted: Pkt. 3c, oz. 7c, 1/4 lb. 18c, lb. 50c, by mail. By freight or express, 2 lbs. or more of a kind at 40c per lb. Numbers before the names refer to illustrations.

SHEPHERD Still at the head of the list as the best and earliest long Radish in existence, and all who have grown them say they are the best long Radish in the country. Excels all others in rapid growth, attaining a size of 12 in. in length and 1 1/2 in. in thickness in 30 days from sowing the seed, and will grow 20 in. in length and 3 or 4 in. thick before becoming hard and woody. It is the earliest, the largest, remains tender the longest, the handsomest, best for the family, for market, and is good spring, summer and fall.

WOOD'S EARLY FRAME—A long, red Radish, small top; excellent for forcing.
IMP. EARLY LONG SCARLET SHORT TOP—Of quick growth; color bright scarlet; long, straight and smooth, crisp and tender.

LONG WHITE VIENNA—The finest and most beautiful long white Radish. Tender, mild flavor, grow quickly.

1. **GIANT WHITE STUTTGART**—Very early; pure snowy white. It withstands the severest heat, and grows to an immense size. The quality is always the very finest, firm, brittle and not pithy.

2. **NEWCOM**—This is the earliest, largest, white Radish known. Owing to their beautiful half-long shape and fine appearance they readily sell at double the price of ordinary varieties. Quality very fine.

3. **NEW WHITE STRASBURG**—One of the most popular summer Radishes grown. Of handsome oblong shape, tapering beautifully to a point; pure white and almost transparent; very tender and delightful pungent taste.

5. **IMP. EARLY SCARLET TURNIP**—Extra early. Brilliant color. Especially recommended to market gardeners.

6. **EARLY WHITE TURNIP**—Quick growth; crisp; tender. Very fine.

8. **EARLY SCARLET TURNIP, WHITE TIPPED**—Beautiful scarlet variety, having a white tipped tail, or root. Very fine.

9. **WHITE BOX**—Its short top and rapid growth fits it for growing underground, in frames or boxes, as well as for early sowing in the open ground.

10. **EARLY YELLOW SUMMER TURNIP**—Russet-colored sort. Grows much larger than the white or red turnip sorts. Best kind for resisting the extreme heat and the drought of the Southern States.

11. **TWENTY DAY FORCING**—A new and very distinct type of the well known olive-shaped Radish, of perfect form, smooth skin, fine color, and very short leaves, extremely quick growth, takes only 3 weeks to mature, valuable for forcing, while it does equally well in the open ground.

12. **SCARLET, OLIVE-SHAPED**—Well adapted for forcing or for early sowing in the open ground.

13. **EARLY FRENCH BREAKFAST**—Earliest of all; very tender and beautiful; scarlet, tipped with white; great favorite.

14. **LARGE WHITE GLOBE**—A very large round Radish. Of beautiful form, pure white, crisp and brittle. It grows quickly to a large size, and withstands summer heat.

15. **EARLY WHITE, OLIVE-SHAPED**—Is very early.
SUMMER VARIETIES, MIXED—Includes all summer varieties in list. Gives great satisfaction. Pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 65c.

SOME SPECIALTIES IN
RADISHES

Market Gardeners' Ideal Long Scarlet.

WHITE TIPPED.

This is not a new Radish, strictly speaking, although many seedsmen would pass it off as such. It is an improved strain of the *old reliable Long Scarlet Short Top*. It is a week earlier than the old strain, has a shorter and more compact top; remains in good condition longer. In shape it is shorter and thicker, which is an advantage if not possible to market at once when pulled. The upper portion is *deep scarlet red*, shading off to white at the tips, altogether making a Radish of the most beautiful form and color. Pkt. 6c, oz. 15c, ¼ lb. 40c, lb. \$1.00.

GLASS RADISH.

This new Radish is a fine acquisition. It is a long radish of light pink color, white tipped and of very uniform size. The flesh is of a transparent white, always crisp and brittle, even if grown to a large size, and mild flavor. It is named "Glass Radish" on account of the fine transparency of the flesh. All who have tried it pronounce it one of the finest among all the Radishes. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

NEW WHITE STRASBURG—This variety is now the most popular summer Radish grown. Of handsome, oblong shape, tapering beautifully to a point. Both skin and flesh are pure white, almost transparent, very tender, and of a delightful pungent taste. It can be pulled five weeks from time of sowing the seed, yet it will continue to grow without losing its fine quality, and remains in a tender condition longer than any other summer sort. There is much spurious seed on the market, which is a great annoyance and loss to gardeners. Our seed produces every root true to the type. Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 60c, 5 lbs. 50c per lb. by express.

SPINACH.

Sow 1 oz. to 50 feet of Drill; 12 lbs. per acre.

We will send any variety of Spinach by freight or express at 15c per lb. in 10 lb. lots.

THICK LEAVED ROUND—Generally preferred for early sowing, and is a popular sort with market gardeners. Leaves large, thick and fleshy. Pkt. 3c, oz. 5c, ¼ lb. 15c, lb. 30c, 4 lbs. \$1.00.

BLOOMDALE—The leaves are numerous and partially rolled. It is much liked by gardeners wherever introduced. Pkt. 3c, oz. 5c, ¼ lb. 15c, lb. 30c, 4 lbs. \$1.00.

NEW LONG STANDING.

A sort of the finest quality, and producing nearly twice the weight of crop as other sorts, and is also the hardiest of all Spinachs. The leaves are numerous, succulent, curled and wrinkled like a Savoy Cabbage. Pkt. 3c, oz. 5c, ¼ lb. 15c, lb. 30c, 4 lbs. \$1.00.

SQUASHES.

Plant about 4 lbs. per acre.

Mammoth Chili The largest of the Squash family, being simply immense. The largest Squash on record—292 pounds—was of this variety. If you want to secure the premium at your county fair, plant some of this seed. Color orange yellow, smooth skin; flesh very thick and fine grained, good and nutritious. A profitable variety to grow for stock feeding. Keeps well though the winter. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

MAMMOTH WHITE BUSH, SCALLOPED—The Squashes are very uniform in shape and wonderfully prolific. They are fit to use very early, are a beautiful white color and grow very large size—12 to 15 inches across. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 45c.

GIANT SUMMER CROOKNECK—This new strain is even earlier than the common variety; the Squashes grow to an extra large size, measuring from 18 inches to 2 feet long of finest quality. On account of their handsome appearance they command an extra price on the market. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 45c.

Market Gardeners' Ideal.

Winter Radishes.

Prices of All Varieties:
 Pkts. 4c, oz. 8c, ¼ lb. 18c, lb. 50c.

The following varieties should be sown in August or September, for use during winter:

CALIFORNIA MAMMOTH WHITE—It grows to a large size; flesh solid and of good flavor.

LONG BLACK SPANISH—One of the largest, as well as the hardiest of Radishes. Roots oblong, black, of a very large size and firm texture.

WHITE CHINESE—Root nearly cylindrical, 6 to 7 ins. long and nearly 3 ins. in diameter; piquant and very appetizing.

ROUND BLACK SPANISH—Black skin, white flesh and roots globe shaped. The flavor is piquant.

CHINESE ROSE—This variety has become very popular with market gardeners. It is of a half-long shape, pink color, and flesh as solid as an apple.

WINTER VARIETIES, MIXED—Includes all winter varieties in our list. Large pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

PROLIFIC ORANGE MARROW—The skin is a rich, deep orange, making the Squash of a very handsome appearance. As large as the Hubbard; the flesh is very thick, fine grained and of choice quality. In prime condition from September to January. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 45c.

HUBBARD—Generally considered the best winter Squash grown; flesh dark yellow, fine grained, dry and sweet; very hard shell; will keep till spring; productive; color green, when ripe. Pkt. 3c, oz. 8c, ¼ lb. 15c, lb. 50c.

EARLY YELLOW BUSH, SCALLOPED—A popular variety. Grows to medium size and of unsurpassed quality. Pkt. 4c, oz. 8c, ¼ lb. 15c, lb. 45c.

ESSEX HYBRID—A very productive Squash of finest quality and an excellent keeper, specimens having been kept until June as sound and good as when gathered. Early, quick growth, and can be raised very successfully as a second crop, following early potatoes, peas, etc. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 45c.

WINTER CROOKNECK—The best keepers. Color pale green; excellent for table use. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 45c.

GOLDEN CUSTARD—An improvement on the old Yellow Bush, so well and widely known. Very early, of a bright, golden yellow, often producing Squashes 12 to 15 inches across. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 45c.

SALSIFY.

1 oz. will sow 50 feet of Drill.

MAMMOTH SANDWICH ISLAND—Mammoth, indeed, as compared with the common kinds. It is pure white in color and has all the good qualities of the other, which, with its great size, will recommend it to all gardeners. It should be found in every garden in the land. Pkt. 4c, oz. 8c, ¼ lb. 25c, lb. 75c.

LONG WHITE—Pkt. 3c, oz. 7c, ¼ lb. 20c, lb. 65c

The Seedsmen who sell the **Best Seeds** at a lower price than his competitors sell at, is going to do the business and no amount of argument can prevail against it. **O. K. SEEDS** are the best and prices lowest.

NOV. 13.

ONE DAY'S RECORD.

REPORTS ON

O. K. SEEDS.

If you have ever been disappointed in your seeds in the past, plant the O. K. BRAND this year and you will have no cause for dissatisfaction.

O. K. Seeds did extremely well and I will plant them again. E. E. TUCKER, Wier, Tenn.

O. K. Seeds were splendid. Giant Climbing Tomato was all that you recommended. Everitt's Earliest of All was 3 weeks ahead of any other sort in the neighborhood. I will call for more seeds. JANE PAHT, Dillon Vale, O.

O. K. Seeds gave entire satisfaction. The largest cabbage heads I ever raised was from your O. K. Seeds. B. L. HINKLE, Elkins, W. Va.

You have given your seeds the right name. They are O. K. and no mistake. My wife says she never saw anything to equal your Japanese Climbing Cucumber, Prize Taker Onions and Logan Giant Tomatoes. They beat the world. The Six-Weeks Potatoes are first class. CHAS. M. MOHR, Struthers Station, O.

The **O. K. Seeds** surpass any other kind we have ever grown. O. K. Nettle Gem Musk Melons are superior to all other that I ever ate; Hoosier King Water Melons the largest we ever raised; Prize Taker Onions weighed 4 lbs. last year, from seed. Yours is the most courteous, reliable and prompt seed house I ever dealt with. W. B. PERDUE, Fountain Head, Sumner Co., Tenn.

First Premium White Dent Corn is the finest I ever raised. Some ears shelled almost a quart of corn. Mammoth Silver King and Prize Taker are the Onions for this section. I sold them for \$1.50 per bu. I also raised your Six-Weeks and Green Mountain Potatoes. They made a fine yield of very large tubers. N. STEVENS, Worthington, W. Va.

Your **O. K. Seeds** produced the finest Tomatoes and Cabbage that I ever saw. MRS. MARY E. RODENBURG, Cleveland, Tenn.

Your Seeds are all O. K. Cabbage weighed 8 to 12 lbs., Giant Climbing Tomato averaged 1 lb., Sweet Corn was immense, Carter's Cardinal Turnip splendid, Six-Weeks Potato can't be beat. W. W. JAMES, Brunswick, Ill.

O. K. Seeds gave perfect satisfaction. Indiana Sweetheart Melons from you were the only nice ones we grew, though we planted other varieties from other seedsmen. We have always been pleased with seeds from your house. JOHN L. WALKER, Browningsville, Md.

No seeds could have done better than the **O. K. Seeds** from you. Wishing much success. C. H. REID, Inez, Tex.

All the **O. K. Seeds** ordered of you did well, notwithstanding the long drought from April 5th to October 20th. E. P. ROSENSTEIN, Hitchcock, Tex.

I was very successful with the **O. K. Seeds**. They turned out above all others. F. J. PAULUS, Strausstown, Pa.

I used your **O. K. Seeds** in 1896 and I certify that they have no superior. We like Carter's Cardinal Turnip and None-Such Cabbages so well that we will never use any other. I advise all my neighbors to use Everitt's **O. K. Seeds**. A. C. CURTIS, Statesboro, Ga.

Your **O. K. Seeds** gave the best of satisfaction. In fact we never before used seeds that every variety grew so well as yours. Everything was first quality. We had some of your Chinese Radishes 12 inches long and 6 inches in diameter. You can count on our order as long as you keep such seeds. Don't forget to send Catalogue. A. O. CHASE, Mt. Gilead, O.

I am well pleased with your **O. K. Seeds**. Everitt's Eliest Cabbage forms good sized solid heads; it's very good; Japanese Climbing Cucumber is well worth raising. Of your White Spine I raised specimens 9 inches long by 4 inches through. Giant Climbing Tomato can not be beat. F. REISS, Blanchester, O.

Your **O. K. Seeds** proved good. I never raised better cabbage. Your melon seed made the best melons I have had for years. I will buy more next spring, and wish you success. J. WESLEY COOK, Concord, N. C.

The seeds from your house all did splendidly. Water-melons, Indiana Sweetheart and Hoosier King, Musk Melon and Tomatoes are all you recommend them to be. I will want more **O. K. Seeds** next spring. W. G. GRIFFITHS, Unita, Tenn.

I am highly pleased with **O. K. Seeds** and return many thanks for kindness and prompt attention in filling orders. The Rough and Ready and Brill's None-Such Cabbage, Giant Climbing Tomatoes and the Onions were the finest I ever grew. JOS. M. HIMERRIGHT, Star Tannery, Va.

We had great success with Giant Climbing Tomato. Would not have any other kind. SADIE CASEY, Camden, W. Va.

Giant Wax and Kentucky Wonder Beans are in fact O. K. Cabbage was good as could be expected this dry season, Cucumbers were dandy, Montreal and Hackensack Melons were all right. **O. K. Seeds** are rightly named. C. E. ELLIS, Feagaville, Md.

Rose Colored Delicatess, Yellow Danvers and Wethersfield Onions, Logan's Giant, and Everitt's Earliest Tomatoes, Six-Weeks Potato, Crosby's Early Sweet Corn, Snowball Pop Corn and Evergreen Broom Corn were "death dealers" to all other brands in this section of country. I want an agency to sell your seeds. We will use no other seeds as long as we can get the **O. K.** brand. CHAS. E. ELLIS, Feagaville, Md.

I am glad to say the product of **O. K. Seeds** far exceeded my expectations. From 1 pound of oats I threshed 3 bushels. The Giant Climbing Tomato pleased me to perfection. I am well pleased with all your seeds. WRIGHT HOLLAND, Noah, Ky.

Rose Colored and Prize Taker Onions are both good. I have 42 kinds of potatoes, including all of the newest varieties, and the Six-Weeks holds its own with any of them. Early Mastodon and Mortgage Lifter Corn were both out of sight. The Man-Weight Machine is better than a gold standard. D. U. McFARLAND, Coshocton, O.

O. K. Seeds have given entire satisfaction ever since I have been using them. Japanese Climbing Cucumber is a wonderful bearer. I am delighted with it. Logan's Giant Tomato is a perfect beauty, and I can recommend it to others for market and home use. With best wishes for your future prosperity, I am, yours truly, S. J. BOWMAN, Kio, W. Va.

O. K. Seeds gave entire satisfaction. The tomatoes were just as recommended. If they have any fault it is their very large size. I was well pleased with the radishes, beets and peas, also. KATE BEEM, Kirkliland, Ind.

All the **O. K. Seeds** I received from you did exceedingly well, and the Six-Weeks Potatoes were just splendid. They were just what you represented them to be. I am well pleased with all your seeds and will recommend them. W. BILLITTER, Williamstown, Ky.

I have planted your Celebrated O. K. Seeds for 4 yrs. and believe they are the only true and reliable seeds for sale anywhere. Out of 100 plants of Rough and Ready Cabbage I received 97 good, salable heads. My 3 years experience with Logan's Giant and Everitt's Earliest Tomato show them to be the best for early gardeners. Everitt's Earliest comes 3 weeks ahead of other early varieties. You will receive my future orders. FRED. L. BROWN, New Petersburg, Ohio.

TOMATO!

ON Page 35 we offer a real Giant Tomato—the largest of all. While size, combined with earliness, productiveness and high quality, to a great extent fills the bill, yet if we do not attain extreme earliness it lacks in being a complete all-around Tomato. As is usual when we attain great size in a vegetable, we sacrifice to a certain extent earliness, hence we must make this up in another variety, which we have done in **EVERITT'S EARLIEST OF ALL**. Extreme earliness is where this variety excels. Outside of this we have equally as good Tomatoes as regards color, form and table qualities, but none of them approach **EVERITT'S EARLIEST OF ALL**, in season of ripening by a week. This is a very important consideration, as it allows the market gardener to get the high price early in the season, which oftentimes is the only part of his crop that it pays to market. **EVERITT'S EARLIEST OF ALL** is a bright scarlet color, very smooth, solid and fine; medium size. The plant grows thrifty and spreading, thus allowing the sun to ripen the fruit evenly and quickly. Every gardener should plant this Tomato. The small investment in seed will be many fold returned in the crop if used at home or marketed. Pkt. 10c, 3 for 25c, 3 for 50c, 20 for \$1.00, oz. 25c, ¼ lb. 75c, lb. \$2.50.

IT IS WORTH SOMETHING to you to place your Order where you can save 25 to 50 per cent. in price; get the best Seeds that can be produced under the sun, and have your order filled immediately.

GIANT CLIMBING TOMATO.

Great progress has been made in late years in the improvement of the Tomato. Quite in contrast with the small, ill-shaped, sour specimens of a few years ago are the large, smooth, sweet fruits so easily raised now. Great rivalry exists in localities as to who can raise the earliest or largest Tomatoes. We offer in the **GIANT CLIMBING TOMATO** the greatest novelty in this line, and who ever raises it, according to directions printed on each package, will have an attraction that will draw all eyes toward their garden.

This is not a tree Tomato. The term "tree," frequently applied to Tomatoes, is generally intended to mislead, except as applied to our new variety—**Kuttawa Dwarf Tree**. (See Page 36).

We do not call grapes "Tree Grapes" because they will climb up a trellis. The **GIANT CLIMBING TOMATO** needs a support to climb upon, when they will grow 10 to 15 feet high, bearing fruit all along the vine from the ground up. The Tomatoes grow very large, weighing as high as 4 lbs. each, and in size 10 to 16 inches in circumference. Nearly all the Tomatoes are smooth and regular in shape; color, glossy red; sound to the core, with *very few seeds*. The flavor is all that can be desired. They are everbearing, only cut off by frost. These tomatoes can be grown on the garden fence, on the sunny side of a house or outbuilding, or in any position where a support is provided. The more public the situation, the more they will be admired. We print a few reports. Many more could be given if space permitted:

Your Giant Climbing Tomatoes are immense. I have them weighing 2½ lbs., and the people see that they are wonderful. **GEO. R. BOOTH**, Ludlow, Mass.

The Giant Climbing Tomatoes are wonderful in size and fine quality. One fruit weighed 3 lbs., 1 oz. **C. H. COX**, Bascobel, Pa.

From the Giant Tomato Seed I raised the greatest crop I ever saw. One weighed 3 lbs. and many 2 lbs. each. **P. J. DICES**, Mallory, Va.

PRICE OF

Everitt's Giant Climbing Tomato Seed.

As this Tomato is a very shy bearer of seed, the price will always be high, yet when you consider that each plant, with proper care, will produce nearly a bushel of Tomatoes, the price should not be considered. 1 liberal package, 10c, 3 for 25c. Families should club together and get them at wholesale rates.

WHOLESALE PRICE—10 pkts. or more at 5c per pkt.

GIANT CLIMBING TOMATO.—Showing habit of growth. Besides being a great novelty and a profitable variety to grow, they are very useful and ornamental as a vine to furnish shade, and cover, and beautify unsightly places. They grow with remarkable rapidity.

PLEASE REMEMBER THIS.—Don't think that because one seedsman asks a higher price than another that his seeds must necessarily be better. It is often the case that one seedsman charges 50 per cent. more than another for seeds that come out of the same bulk. Yet don't buy low-priced seeds unless you have good reason to think the quality is high. **THE QUALITY OF EVERITT'S O. K. SEEDS IS ALWAYS HIGH, REGARDLESS OF THE PRICE.**

LOGAN'S GIANT SEEDLING

UNEQUALLED IN SIZE, UNSURPASSED IN PRODUCTIVENESS, SOLIDITY, QUALITY AND SWEETNESS.

A GREAT SOLID BALL OF TENDER, DELICIOUS MEAT, WITH VERY FEW SEEDS—THE BEST EVER PRODUCED.

The Largest, Most Solid, Most Productive, Best Quality

THESE few words describe this GREAT TOMATO. Others claim wonderful properties, offer prizes to induce big reports, but our Logan Giant Seedling comes out victorious every time. If you think you have tried the largest Tomato, try this one now, and you will see that you did not have the largest and best heretofore. It is not only a new variety, but we claim for it in point of productiveness, size of fruit, exquisite quality and flavor, as well as early ripening, *the best Tomato extant*. They grow to weigh over 3 pounds each and attain the enormous circumference of 2 feet. This Tomato is not, like many others, one-third seeds and water. They are a great solid ball of tender, delicious meat, *with very few seeds*. They have frequently sold at 15 cents each in competition with other kinds at 35 cents per bushel. If the vines are trained on a support they will grow 10 feet high and be loaded with the finest fruit you ever placed your eyes on.

Read testimonials below and many more on other pages.

Price, pkt. 10c, 3 pkts. 25c, 8 pkts. 50c, 20 pkts. \$1.00, oz. 50c.

ENGRAVED FOR J. A. EVERITT, SEEDMAN

THE GIANT OF TOMATOES

The earliest; the largest; the best yielder; the most delicious Tomato I ever ate. KENNEDY COLE, Pa.

Two Giants weighed 36 ounces each. They are truly wonderful. The Giant Tomato grew very tall and fruited very large and prolific, hence, imagine my surprise to find them so solid, sweet and delicious. The finest I ever ate. MRS. J. C. HARRIS, Pa.

I picked 16 pounds of Giant Tomatoes at one picking from one vine. SAMUEL JOHNSON, Pa.

I have bought the Logan Giant Tomatoes at \$3.00 per bushel, for sale in my store before other varieties were ripe. H. J. LIBERMAN, Pa.

I bought ten new varieties last spring and gave them a fair comparative test. Logan Giant stands first for size and quality. I never raised nor seen such fine Tomatoes before in my life. J. H. CURTIS, N. Y.

Mr. Wade, of Blooming Valley, brought to this office a cluster of 8 Tomatoes all on a single stem, weighing 10 lbs. They are of the Logan Giant variety. The quality is equal to the quantity. PENNA. FARMER, Pa.

Logan Giant Tomato is the best I ever saw. I sold single Tomatoes for 10c each; the product of a single stem for 30c. Single plants bore 30 lbs. of fruit. Twelve weighed 23½ lbs; they ripen with the earliest. D. L. MARSHALL, Mo.

Price, unless otherwise quoted: Pkt. 4c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

MIKADO—Also called Turner's Hybrid, is one of the finest, largest, most solid and most productive Tomatoes grown. The heaviest Tomato ever grown of this mammoth variety was grown from O. K. Seeds—weight 4 lbs. 2 oz. Rapid grower, thick stalk; beautiful shape and color; the weight averages from 1 to 4 lbs.

EARLY ESSEX HYBRID—This is one of the most profitable Tomatoes for the market in cultivation. Pink skin, very early and always ripening all over alike. The flesh being very hard and solid makes it one of the best Tomatoes for shipping or marketing. We recommend it highly.

IMPROVED TROPHY—Fruit large, smooth, solid, fine color; very productive; well known and popular market sort.

SELECTED ACME—One of the earliest in cultivation. Fruit of medium size, perfect form, round, slightly depressed at the poles; pink purplish color. Ripens evenly and has no green core. Bears continuously until frost comes.

PERFECTION—Shaped like the Acme, but somewhat larger, fully as early, perfectly smooth, blood-red in color, with more solid flesh and fewer seeds, and produces more and larger fruit at end of the season.

STONE—This new main crop Tomato is very large, bright scarlet red color, smooth shape. A distinguishing feature, and from this it takes its name, is its great

solidity. The flesh is very firm. One of the best shippers. A grand variety, unsurpassed for keeping.

GOLDEN QUEEN—There are many varieties of the red Tomato, but every gardener will hail with delight this fine yellow sort. In size, solidity and productiveness equals any of the red.

LONGKEEPER—This new Tomato of recent introduction was originated by E. S. Carman, editor of "The Rural New Yorker." It is claimed by the originator to combine long-keeping qualities, uniform shape, earliness in ripening as well as productiveness to a remarkable degree.

TOMATOES FOR PRESERVING—Red Cherry, Yellow cherry, Red pear-shaped and Yellow plum.

LIVINGSTON'S NEW BEAUTY—A fine variety, coming from originator of Acme, Paragon, Perfection and Favorite. Very distinct from all former introductions. The color is a glossy crimson with a purple tinge. It grows in clusters of 4 and 5, retaining its large size late in the season; very solid, with a tough skin, making it very desirable for market and shipping.

LIVINGSTON'S FAVORITE—Ripens evenly and early, holds its size to the end of the season. It is very prolific, few seeds, solid flesh, bears shipping long distances.

PEACH TOMATO—This is a very useful and beautiful oddity. For preserving Peach Tomato is hard to beat.

The Great Kuttawa Dwarf

TREE TOMATO.

(See Illustrations on 1st and 4th Cover Pages.)

The tree on 1st page represents the leaves removed from the front side, so as to show the Tomatoes as they appear. The outline of the tree, also the clusters of Tomatoes were drawn from a stalk in the field. The cluster and half of Tomato on 4th page are about $\frac{1}{4}$ size of average specimens. We aimed to not exaggerate nor overdraw.

This distinct, remarkable and superior variety of Tomatoes is a cross between the Dwarf Champion Tree and New Stone. With the tree tendencies in the Champion greatly improved, reaching in the Kuttawa a full supporting degree. The plants, when only 1 or 2 inches high, assume a tough woody nature, and defy the teeth of cut worms to lay them low. The fruit stems and leaf stems also partake of this nature, being very stiff and stubby. The plants take to transplanting splendidly, rarely, if the plants are properly grown and transplanting correctly done, will the leaves wilt, and the stalk never. The foliage is light-green color, leathery, little ruffled, saw-teeth edges.

The fruit forms along the branches in clusters of 2 to 8, of medium size, weighing 6 to 12 ounces each, so uniform in shape that they appear to have been formed over the same mould, perfect in form, and as handsome as bright-red apples. The fruit is an exact duplicate of the New Stone in color and size, with other qualities improved. They are the perfect shipping Tomatoes, as they may be handled very roughly, and will not decay if the skin is not broken. They have a tendency to dry up rather than decay. The skin is very tough, yet, when slightly scalded, peels off nicely. The fruit is the most solid and heaviest of all Tomatoes, almost as heavy as lead; solid heart, free from green heart and streaks through the flesh. Nearly seedless.

The fruit stems form every 2 to 3 inches along the main stalk and branches, each stem bearing a cluster of 2 to 8 fruits. On parting the dense foliage you behold a mass of fruit from the ground to the top. The foliage is so dense as to hide the fruit and effectively prevent sunburn, making the Kuttawa Dwarf of peculiar value in hot southern sections.

Its upright, self-supporting habit and compact growth allows it to be planted 16 inches apart in rows $\frac{3}{4}$ feet apart. The effect is a solid row or hedge of green from end to end of the rows, allowing 3,000 to 10,000 plants on an acre without crowding. The plant grows 20 to 30 inches high and supports its fruit off of the ground.

The plant when growing resembles Irish potatoes, so much so that it is usual for people to ask, "What kind of potatoes are these?"

In season this Tomato is early, ripening equal with any of the other large size Tomatoes, and is superceded only by the small-fruited sorts. They continue to produce fruit in dry seasons when others fail. Ripens evenly inside and out, adapted for cultivation on a large or small scale for the cannery, for the market, for the home.

With all the good points mentioned, the grand qualities of the Kuttawa Dwarf Tree Tomato can not be fully appreciated until you grow them in your garden and use them on your table.

We want every person obtaining a package of this seed to report the result next summer.

Price, per package 20 cents, 3 for 50 cents.

TURNIPS

1 oz. will plant 150 feet of Drill. Sow about 1 pound broadcast per acre.

We sell any of the following varieties, unless noted, at pkt. 3c, oz. 6c, $\frac{1}{4}$ lbs. 15c, lb. 40c, by mail; by freight or express, per lb. 30c.

A NEW Carter's Cardinal. A flat Turnip of distinct and fine qualities. This variety is distinct from others, having a deep, cardinal skin, which not only appears on the top, but also covers the whole root. Of course, we do not recommend it entirely on account of its novel color, but as a good, all around variety, and one that can be depended on in hot, dry seasons and on a great variety of soils. The Cardinal is of medium size, flat, with very short top, and of fine table quality. It is one of the best varieties to grow on hot, dry land, not running to seed like some early kinds, and being quite sweet and solid. The Cardinal has a strong tap root, this doubtless protecting it from drought, and having thick, spreading foliage, the root is shaded. A great acquisition. One of the very earliest, being ready for use a short time after sowing. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.00.

EARLY SIX WEEKS, or SNOWBALL—This new Turnip is very early, growing and maturing rapidly. Bulbs beautiful white; medium size, solid. Flavor mild; free from side roots.

PURPLE TOP MUNICH—One of the earliest in cultivation, making an excellent spring garden turnip.

RED or PURPLE TOP STRAP LEAVED—One of the most popular varieties, both for table and stock. Grows to a large size, solid, crisp and mild fla-

vor. We have the best strain of this popular variety that can be found anywhere—None better.

EXTRA EARLY MILAN—The earliest flat Turnip in cultivation. Of medium size, with a bright purple top; leaves few, short, growing very compact; flesh pure white, of choicest quality, hard, solid and fine-grained; an excellent keeper. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 65c.

EARLY WHITE FLAT DUTCH—Size, medium; flat, white, sweet, tender; rich for table; spring and fall.

WHITE EGG—A variety of very rapid growth; egg-shaped, thin, white skin, solid, firm, fine-grained flesh.

BREAD STONE—Extra fine quality. Of medium size, very quick growing, and the roots are very smooth and white. Flesh is perfectly white, fine-grained and cooks in only fifteen minutes. It is a fine table Turnip for winter and spring use.

RED or PURPLE TOP GLOBE—This is the most productive variety, and one of the handsomest; quality very fine for table. Owing to its great yielding propensities, can be grown with a great profit for stock.

GOLDEN BALL or ORANGE JELLY—Very beautiful and bright-yellow Turnip of medium size, sweet and delicious flavor.

SEVEN-TOP or FORESTER—Grown exclusively in the South for its abundant leaves, which are boiled with meats. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 15c, lb. 50c.

SWEDES, OR RUTA-BAGAS.

Price same as Turnips.

Grown for stock feed, and could be profitably cultivated on a much larger scale.

CARTER'S IMPERIAL—A hardy sort, excellent for table use or feeding stock. Does not run to long necks. This should be sown a month earlier than the other varieties.

LAING'S IMPROVED RUTA-BAGAS—One of the earliest and best for table. Handsomest variety, first-class quality.

LARGE WHITE FRENCH—Excellent for table use as well as stock. Large size, solid, mild and sweet. A desirable sort.

In July we will publish a SPECIAL TURNIP price list. Send for it.

EVERITTS CHOICE FLOWER SEEDS.

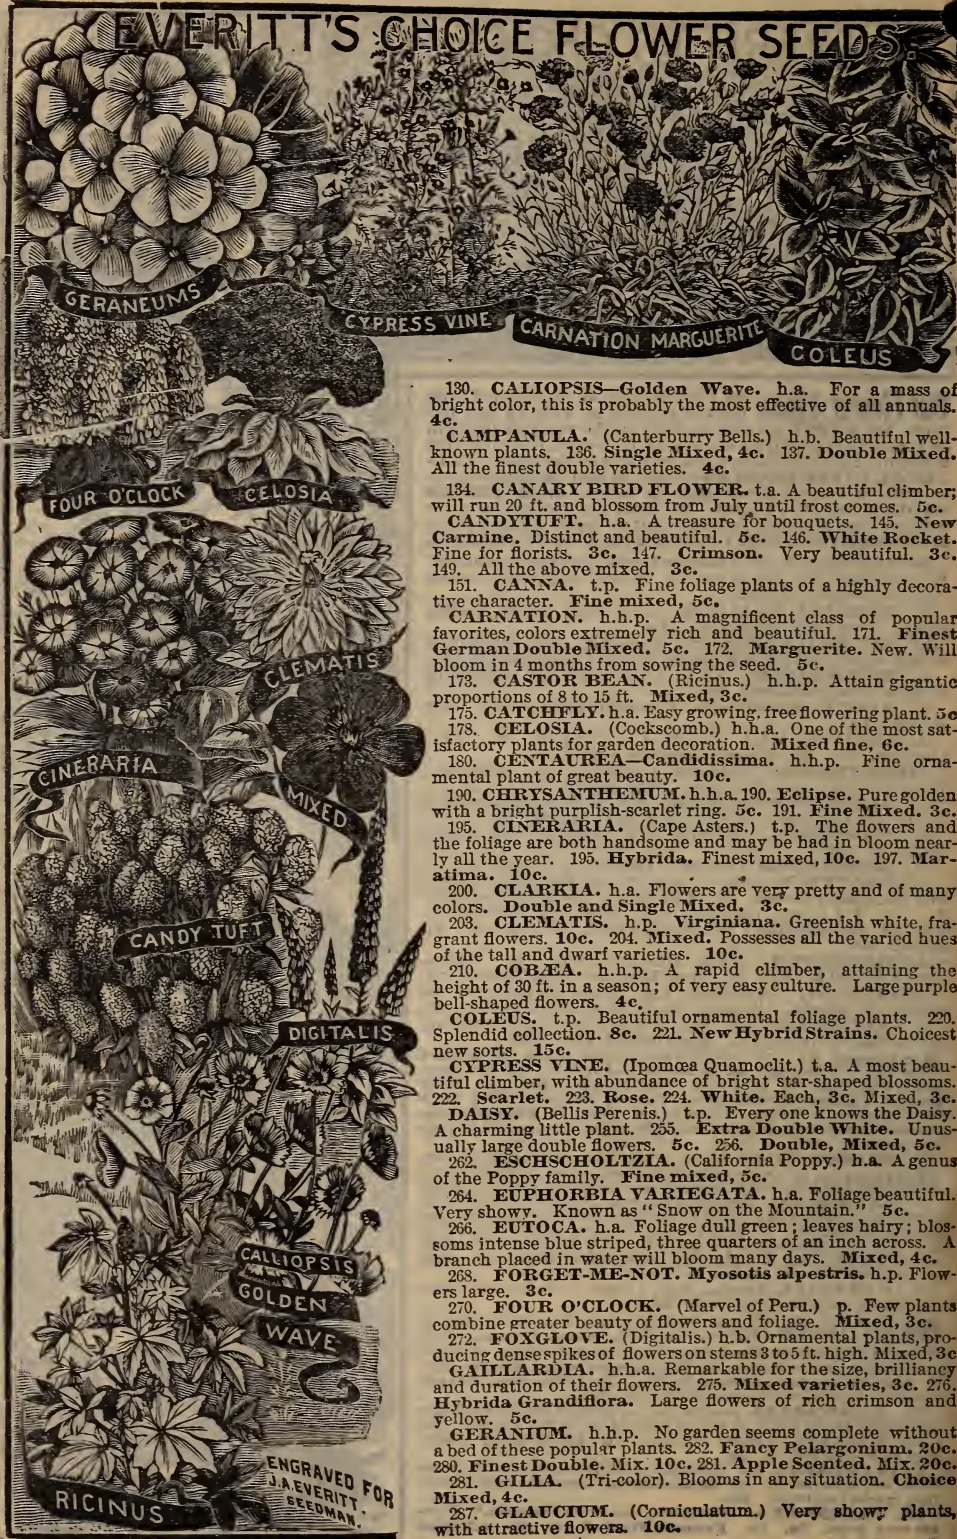

Our Flower Seeds are the best that can be procured from the best growers in America and Europe. **OUR LIST** comprises nearly all the varieties that can be successfully grown by the average cultivator, omitting such as require the skill of a veteran, and special facilities. **CULTURAL DIRECTIONS** are printed on each package, together with a correct illustration in colors. **OUR PRICES SHOULD BE POPULAR.** We don't aim to charge as much for a package as a pound costs us, but we have made our prices so low that **EVERYBODY CAN HAVE AN ABUNDANCE.**

In the following list "a" stands for annual, "b" for biennial, "p" for perennial, "h.a." hardy annual, "h.h.a." half hardy annual, "l.p." tender perennial, etc.

- 10. **ABRONIA Umbellata.** h.h.a. Very pretty trailing plants. Sweet-scented flowers. 4c.
- 12. **ABUTILON.** (Flowering Maple) t.p. Well adapted for house culture and for bedding out doors. Finest mixed, 15c.
- 15. **ACROCLINUM.** h.h.a. One of the best everlasting flowers. Choice mixed, 3c.
- 20. **ADONIS Autumnalis.** (Pheasant's Eye.) h.a. Very showy. 3c.
- AGERATUM.** h.h.a. Excellent for bouquets. 25. Mexicanum. 5c. 26. Finest varieties mixed, 3c.
- AGROSTEMMA.** (Rose of Heaven.) h.a. Abundant bloomer with deep rose flower. Fine mixed, 4c.
- 32. **ALYSSUM—Sweet white.** h.a. Delicate flowers of a honey-like fragrance; much prized for bouquets. 3c.
- 35. **ANMOBIUM.** (Everlasting.) Valuable for winter bouquets. 4c.
- 37. **AMPELOPSIS Veitchii.** (Boston Ivy.) h.p. 5c.
- AMARANTHUS.** h.a. Of remarkably handsome foliage and interesting flowers. 40. Caudatus. (Love lies bleeding). 4c. 41. Tri-color. (Joseph's coat). Red, yellow and green. 5c. 42. Salicifolius. (Fountain Plant). 44. Mixed. All colors. 4c.
- ANTIRRHINUM.** (Snap Dragon.) h.p. 46. Majus. Mixed Tall; 2 ft. 4c. 47. Tom Thumb. Mixed dwarf. 3c.
- AQUILEGIA.** Columbine. h.p. Blossoms early in the spring. 65. Single. All colors. 2c. 66. Double. All colors. 4c.
- 68. **ASPERULA.** h.a. For button-hole bouquets nothing will be oftener in request. Fine mixed, blue. 3c.
- Asters** h.a. Very beautiful and popular plants. 60. Dwarf Bouquets. A magnificent variety. 8c. 61. German Quilled. Of all colors. Very popular. 10c. 62. New Dwarf, Pacony Perfection. Flowers profusely. Very large size and perfectly double. Finest mixed. 10c. 64. Chrysanthemum Flowered. Flowers resemble chrysanthemums. All Colors mixed. 10c.
- 70. **BALOOON WINE.** h.h.a. A rapid, handsome climber. 4c. h.a. Very popular plants; produce most lovely and striking flowers in rich profusion. Easy cultivated
- 80. **Extra Double Rose Flowered.** Profusely covered with large double flowers of brilliant colors throughout the summer and autumn. Mixed, 5c. 81. **The King.** Brilliant scarlet. Very double. 5c. 82. **Camellia Flowered.** Very double and beautiful colors. Mixed, 5c. 83. **Double Solferino.** Beautiful, white ground, with lilac and scarlet. 5c.
- 75. **BARTONIA, Aurea.** h.a. Flowers, with downy, thistle-like foliage, exceedingly brilliant. 5c.
- Begonias** t.p. As bedding plants there is nothing to equal the Tuberous Rooted Begonia. They bloom equal to the geranium, but with a form and variety of colors and shading equal to the rose. 95. **Tuberous-rooted Single.** 12c. 96. **Tuberous-rooted, Double.** 15c. 97. **Box Begonia, Mixed.** Beautiful variety, with variegated foliage. 12c.
- 105. **BROWALLIA, Rozelia.** h.h.a. Valuable for blooming during winter in the house, as well as bedding out during summer. 4c.
- 110. **CACALIA.** (Tassel Flower.) h.a. Small, pretty plants, with tassel-like flowers. 3c.
- CALCEOLARIA.** t.p. Unsurpassed for pot culture in the greenhouse or conservatory. 120. **Grandiflora.** From the most beautifully marked varieties. 13c.
- 123. **CALENDULA.** (Marigold.) h.a. "El Dorado." Flowers very large. 3c. 124. **French Dwarf.** 4c. 125. **African Dwarf.** 3c.

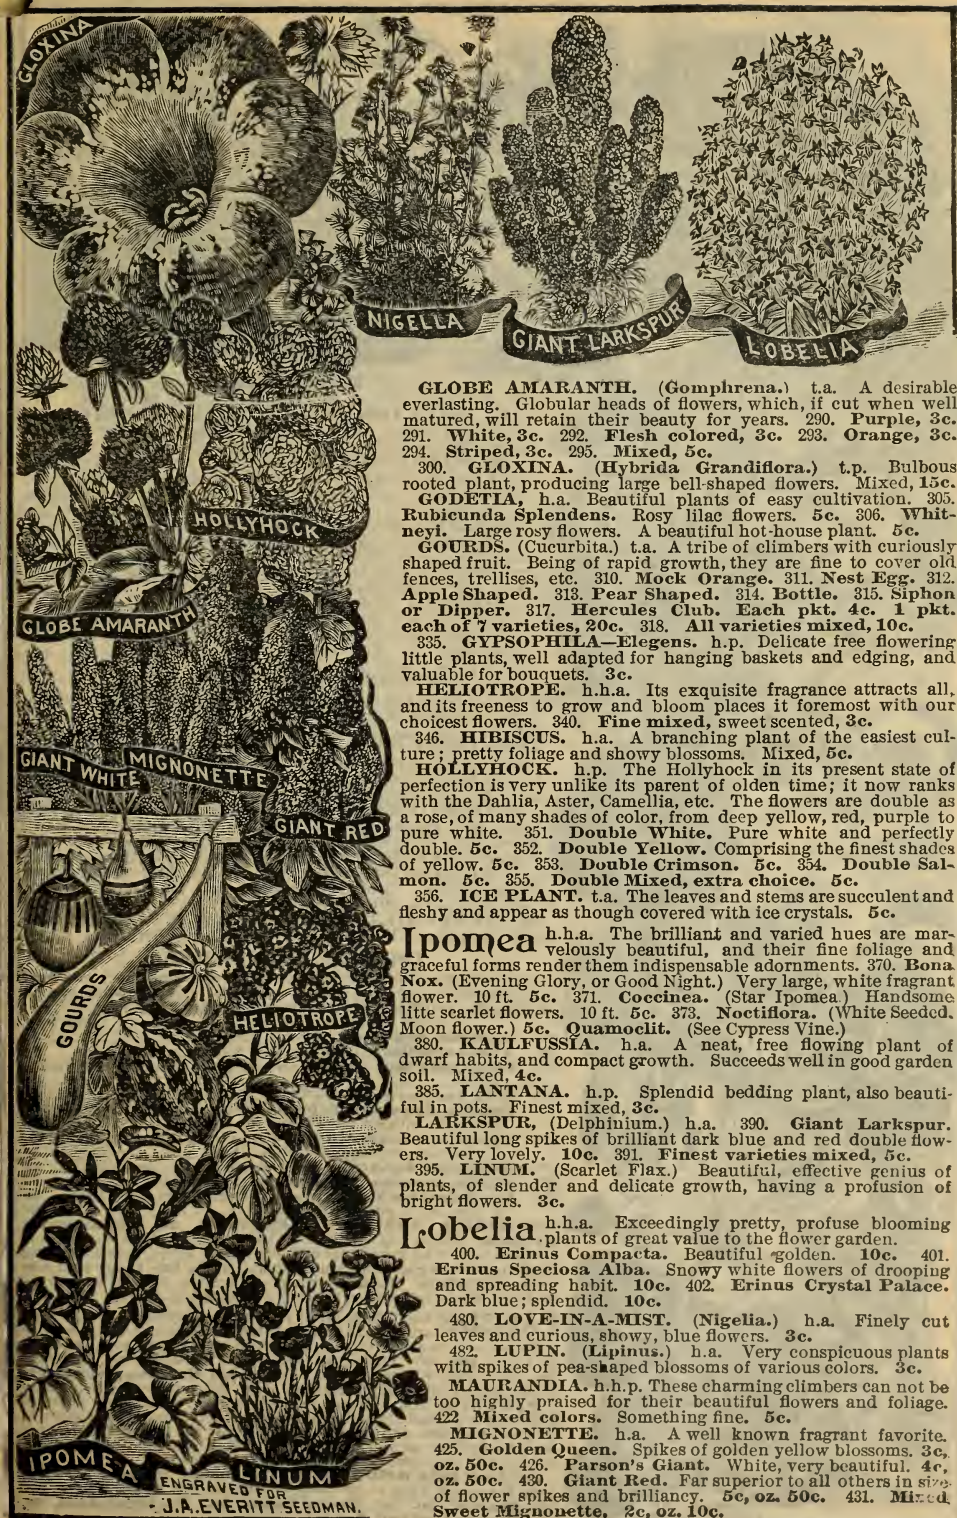

EVERITT'S CHOICE FLOWER SEEDS

130. **CALIOPSIS**—Golden Wave. h.a. For a mass of bright color, this is probably the most effective of all annuals. 4c.
- CAMPANULA**. (Canterbury Bells.) h.b. Beautiful well-known plants. 136. Single Mixed, 4c. 137. Double Mixed. All the finest double varieties. 4c.
134. **CANARY BIRD FLOWER**. t.a. A beautiful climber; will run 20 ft. and blossom from July until frost comes. 5c.
- CANDYTUFT**. h.a. A treasure for bouquets. 145. New Carmine. Distinct and beautiful. 5c. 146. White Rocket. Fine for florists. 3c. 147. Crimson. Very beautiful. 3c. 149. All the above mixed, 3c.
151. **CANNA**. t.p. Fine foliage plants of a highly decorative character. Fine mixed, 5c.
- CARNATION**. h.h.p. A magnificent class of popular favorites, colors extremely rich and beautiful. 171. Finest German Double Mixed. 5c. 172. Marguerite. New. Will bloom in 4 months from sowing the seed. 5c.
173. **CASTOR BEAN**. (Ricinus.) h.h.p. Attain gigantic proportions of 8 to 15 ft. Mixed, 3c.
175. **CATCHFLY**. h.a. Easy growing, free flowering plant. 5c
178. **CELOSIA**. (Cockseomb.) h.h.a. One of the most satisfactory plants for garden decoration. Mixed fine, 6c.
180. **CENTAUREA**—Candidissima. h.h.p. Fine ornamental plant of great beauty. 10c.
190. **CHRYSANTHEMUM**. h.h.a. 190. Eclipse. Pure golden with a bright purplish-scarlet ring. 5c. 191. Fine Mixed. 3c.
195. **CINERARIA**. (Cape Asters.) t.p. The flowers and the foliage are both handsome and may be had in bloom nearly all the year. 195. Hybrida. Finest mixed, 10c. 197. Maratima. 10c.
200. **CLARKIA**. h.a. Flowers are very pretty and of many colors. Double and Single Mixed. 3c.
203. **CLEMATIS**. h.p. Virginiana. Greenish white, fragrant flowers. 10c. 204. Mixed. Possesses all the varied hues of the tall and dwarf varieties. 10c.
210. **COBÆA**. h.h.p. A rapid climber, attaining the height of 30 ft. in a season; of very easy culture. Large purple bell-shaped flowers. 4c.
- COLEUS**. t.p. Beautiful ornamental foliage plants. 220. Splendid collection. 8c. 221. New Hybrid Strains. Choicest new sorts. 15c.
- CYPRESS VINE**. (Ipomœa Quamoclit.) t.a. A most beautiful climber, with abundance of bright star-shaped blossoms. 222. Scarlet. 223. Rose. 224. White. Each, 3c. Mixed, 3c.
- DAISY**. (Bellis Perenis.) t.p. Every one knows the Daisy. A charming little plant. 255. Extra Double White. Unusually large double flowers. 5c. 256. Double, Mixed, 5c.
262. **ESCHSCHOLTZIA**. (California Poppy.) h.a. A genus of the Poppy family. Fine mixed, 5c.
264. **EUPHORBIA VARIEGATA**. h.a. Foliage beautiful. Very showy. Known as "Snow on the Mountain." 5c.
266. **EUTOCA**. h.a. Foliage dull green; leaves hairy; blossoms intense blue striped, three quarters of an inch across. A branch placed in water will bloom many days. Mixed, 4c.
268. **FORGET-ME-NOT**. *Myosotis alpestris*. h.p. Flowers large. 3c.
270. **FOUR O'CLOCK**. (Marvel of Peru.) p. Few plants combine greater beauty of flowers and foliage. Mixed, 3c.
272. **FOXGLOVE**. (Digitalis.) h.b. Ornamental plants, producing dense spikes of flowers on stems 3 to 5 ft. high. Mixed, 3c
- GAILLARDIA**. h.h.a. Remarkable for the size, brilliancy and duration of their flowers. 275. Mixed varieties, 3c. 276. Hybrida Grandiflora. Large flowers of rich crimson and yellow. 5c.
- GERANIUM**. h.h.p. No garden seems complete without a bed of these popular plants. 282. Fancy Pelargonium. 20c. 280. Finest Double. Mix. 10c. 281. Apple Scented. Mix. 20c.
281. **GILLA**. (Tri-color.) Blooms in any situation. Choice Mixed, 4c.
287. **GLAUCIUM**. (Corniculatum.) Very showy plants, with attractive flowers. 10c.

ENGRAVED FOR
J.A. EVERITT
SEEDMAN.

GLOBE AMARANTH. (*Gomphrena*.) t.a. A desirable everlasting. Globular heads of flowers, which, if cut when well matured, will retain their beauty for years. 290. Purple, 3c. 291. White, 3c. 292. Flesh colored, 3c. 293. Orange, 3c. 294. Striped, 3c. 295. Mixed, 5c.

300. **GLOXINA.** (*Hybrida Grandiflora*.) t.p. Bulbous rooted plant, producing large bell-shaped flowers. Mixed, 15c.

GOSETIA. h.a. Beautiful plants of easy cultivation. 303. **Rubicunda Splendens.** Rosy lilac flowers. 5c. 306. **Whitneyi.** Large rosy flowers. A beautiful hot-house plant. 5c.

GOURDS. (*Cucurbita*.) t.a. A tribe of climbers with curiously shaped fruit. Being of rapid growth, they are fine to cover old fences, trellises, etc. 310. **Mock Orange.** 311. **Nest Egg.** 312. **Apple Shaped.** 313. **Pear Shaped.** 314. **Bottle.** 315. **Siphon or Dipper.** 317. **Hercules Club.** Each pkt. 4c. 1 pkt. each of 7 varieties, 20c. 318. All varieties mixed, 10c.

335. **GYPSOPHILA—Elegans.** h.p. Delicate free flowering little plants, well adapted for hanging baskets and edging, and valuable for bouquets. 3c.

HELIOTROPE. h.h.a. Its exquisite fragrance attracts all, and its freeness to grow and bloom places it foremost with our choicest flowers. 340. **Fine mixed,** sweet scented, 3c.

346. **HIBISCUS.** h.a. A branching plant of the easiest culture; pretty foliage and showy blossoms. Mixed, 5c.

HOLLYHOCK. h.p. The Hollyhock in its present state of perfection is very unlike its parent of olden time; it now ranks with the Dahlia, Aster, Camellia, etc. The flowers are double as a rose, of many shades of color, from deep yellow, red, purple to pure white. 351. **Double White.** Pure white and perfectly double. 5c. 352. **Double Yellow.** Comprising the finest shades of yellow. 5c. 353. **Double Crimson.** 5c. 354. **Double Salmon.** 5c. 355. **Double Mixed, extra choice.** 5c.

356. **ICE PLANT.** t.a. The leaves and stems are succulent and fleshy and appear as though covered with ice crystals. 5c.

Ipomea h.h.a. The brilliant and varied hues are marvelously beautiful, and their fine foliage and graceful forms render them indispensable adornments. 370. **Bona Nox.** (Evening Glory, or Good Night.) Very large, white fragrant flower. 10 ft. 5c. 371. **Cocinea.** (Star Ipomea.) Handsome little scarlet flowers. 10 ft. 5c. 373. **Noctiflora.** (White Seeded Moon flower.) 5c. **Quamoclit.** (See Cypress Vine.)

380. **KAULFUSSIA.** h.a. A neat, free flowing plant of dwarf habits, and compact growth. Succeeds well in good garden soil. Mixed, 4c.

385. **LANTANA.** h.p. Splendid bedding plant, also beautiful in pots. Finest mixed, 3c.

LARKSPUR, (*Delphinium*.) h.a. 390. **Giant Larkspur.** Beautiful long spikes of brilliant dark blue and red double flowers. Very lovely. 10c. 391. **Finest varieties mixed,** 5c.

395. **LINUM.** (Scarlet Flax.) Beautiful, effective genus of plants, of slender and delicate growth, having a profusion of bright flowers. 3c.

Lobelia h.h.a. Exceedingly pretty, profuse blooming plants of great value to the flower garden.

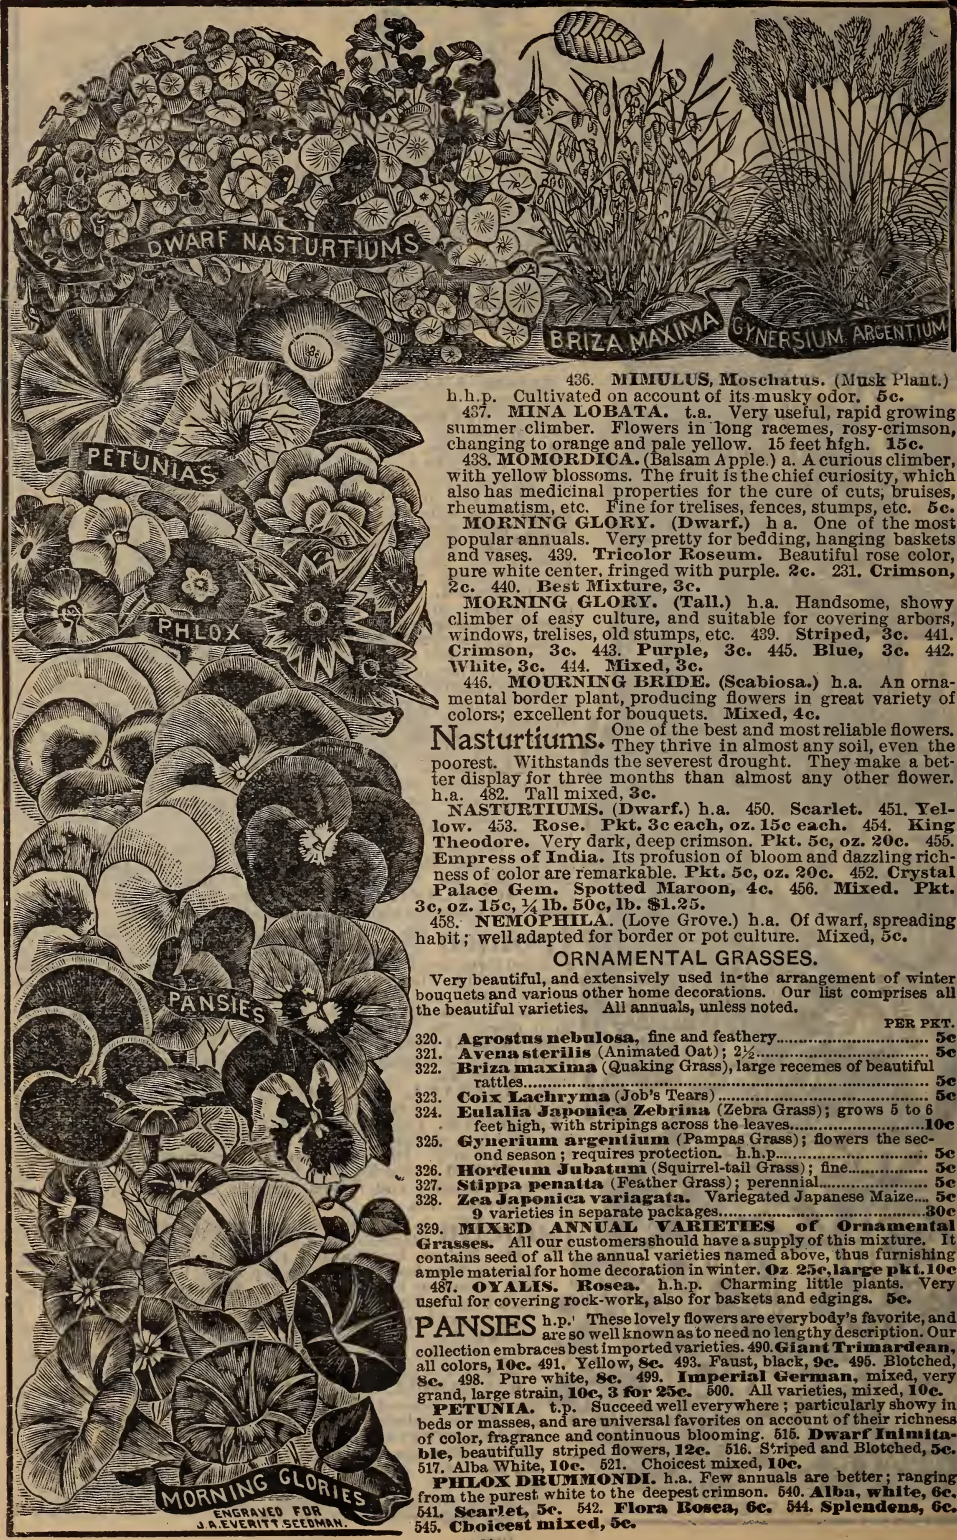

400. **Erinus Compacta.** Beautiful golden. 10c. 401. **Erinus Speciosa Alba.** Snowy white flowers of drooping and spreading habit. 10c. 402. **Erinus Crystal Palace.** Dark blue; splendid. 10c.

430. **LOVE-IN-A-MIST.** (*Nigella*.) h.a. Finely cut leaves and curious, showy, blue flowers. 3c.

482. **LUPIN.** (*Lipinus*.) h.a. Very conspicuous plants with spikes of pea-shaped blossoms of various colors. 3c.

MAURANDIA. h.h.p. These charming climbers can not be too highly praised for their beautiful flowers and foliage. 422. **Mixed colors.** Something fine. 5c.

MIGNONETTE. h.a. A well known fragrant favorite. 425. **Golden Queen.** Spikes of golden yellow blossoms. 3c, oz. 50c. 426. **Parson's Giant.** White, very beautiful. 4c, oz. 50c. 430. **Giant Red.** Far superior to all others in size of flower spikes and brilliancy. 5c, oz. 50c. 431. **Mixed Sweet Mignonette,** 2c, oz. 10c.

436. **NIMULUS, Moschatus.** (Musk Plant.) h.h.p. Cultivated on account of its musky odor. 5c.
 437. **MINA LOBATA.** t.a. Very useful, rapid growing summer climber. Flowers in long racemes, rosy-crimson, changing to orange and pale yellow. 15 feet high. 15c.
 438. **MOMORDICA.** (Balsam Apple.) a. A curious climber, with yellow blossoms. The fruit is the chief curiosity, which also has medicinal properties for the cure of cuts, bruises, rheumatism, etc. Fine for trellises, fences, stumps, etc. 5c.
MORNING GLORY. (Dwarf.) h.a. One of the most popular annuals. Very pretty for bedding, hanging baskets and vases. 439. **Tricolor Roseum.** Beautiful rose color, pure white center, fringed with purple. 3c. 231. **Crimson,** 2c. 440. **Best Mixture,** 3c.
MORNING GLORY. (Tall.) h.a. Handsome, showy climber of easy culture, and suitable for covering arbors, windows, trellises, old stumps, etc. 439. **Striped,** 3c. 441. **Crimson,** 3c. 443. **Purple,** 3c. 445. **Blue,** 3c. 442. **White,** 3c. 444. **Mixed,** 3c.
 445. **MORNING BRIDE.** (Scabiosa.) h.a. An ornamental border plant, producing flowers in great variety of colors; excellent for bouquets. **Mixed,** 4c.
Nasturtiums. One of the best and most reliable flowers. The poorest. Withstands the severest drought. They make a better display for three months than almost any other flower. h.a. 482. **Tall mixed,** 3c.
NASTURTIUMS. (Dwarf.) h.a. 450. **Scarlet,** 451. **Yellow,** 453. **Rose,** Pkt. 3c each, oz. 15c each. 454. **King Theodore.** Very dark, deep crimson. Pkt. 5c, oz. 20c. 455. **Empress of India.** Its profusion of bloom and dazzling richness of color are remarkable. Pkt. 5c, oz. 20c. 452. **Crystal Palace Gem.** Spotted Maroon, 4c. 456. **Mixed.** Pkt. 3c, oz. 15c, 1/2 lb. 50c, lb. \$1.25.
 458. **NEMOPHILA.** (Love Groove.) h.a. Of dwarf, spreading habit; well adapted for border or pot culture. **Mixed,** 5c.

ORNAMENTAL GRASSES.

Very beautiful, and extensively used in the arrangement of winter bouquets and various other home decorations. Our list comprises all the beautiful varieties. All annuals, unless noted.

Grasses. All our customers should have a supply of this mixture. It
contains seed of all the annual varieties named above, thus furnishing
ample material for home decoration in winter. Oz. 25c, large pkt. 10c | |
| 487. OYALIS. <i>Rosea.</i> h.h.p. Charming little plants. Very
useful for covering rock-work, also for baskets and edgings. 5c. | |

PANSIES h.p. These lovely flowers are everybody's favorite, and are so well known as to need no lengthy description. Our collection embraces best imported varieties. 490. **Giant Trimardean,** all colors, 10c. 491. **Yellow,** 9c. 493. **Faust,** black, 9c. 495. **Blotched,** 9c. 498. **Pure white,** 8c. 499. **Imperial German,** mixed, very grand, large strain, 10c, 3 for 25c. 500. All varieties, mixed, 10c.
PETUNIA. t.p. Succeed well everywhere; particularly showy in beds or masses, and are universal favorites on account of their richness of color, fragrance and continuous blooming. 515. **Dwarf Inimitable,** beautifully striped flowers, 12c. 516. **Striped and Blotched,** 5c. 517. **Alba White,** 10c. 521. **Choicest mixed,** 10c.
PHLOX DRUMMONDI. h.a. Few annuals are better; ranging from the purest white to the deepest crimson. 540. **Alba,** white, 6c. 541. **Scarlet,** 5c. 542. **Flora Rosea,** 6c. 544. **Splendens,** 6c. 545. **Choicest mixed,** 5c.

ENGRAVED FOR
J.A. EVERITT SEEDMAN.

PINKS. (*Dianthus*.) h.a. Bloom all summer and fall, and then again the next summer. Easy cultivation.

- 560. *Chinensis*, finest mixed, double, 5c.
- 561. *Laciniatus*, very large, mixed, 10c.
- 562. *Imperialis*, very bright, mixed, 5c.
- 565. **POPPY.** h.a. *The Shirley*, mixed, numberless shades of colors, 4c.
- 577. *Snow Drift*, 5c.
- 579. *Carnation*, mixed, 5c.
- 580. *Finest Hybrid*, mixed, 5c.

PORTULACA. h.a. A most brilliant and profuse bloomer, perfectly refulgent in bright colors under a drought and on soil where most flowers would perish.

- 595. *Double*, white, 5c.
- 596. *Orange*, 4c.
- 597. *Red*, 5c.
- 598. *Mixed*, 5c.

PRIMULA SINENSIS (*Chinese Primrose*.)

- 605. *Fimbriata*, Scarlet, 12c.
- 606. " *Rose*, 12c.
- 607. " *White*, 15c.
- 608. " *Choicest Mixed*, 10c.

PYRETHRUM ROSEUM. h.p. From the dried and powdered flowers of this is made the famous insecticide, *Parisian Insect Powder*. 10c.

ROCKET. (*Hesperis*.) h.p. The sweet rocket produces clusters of flowers which are very fragrant during the evening. 3c.

SALPICLOSIS-Grandiflora. h.h.a. Highly ornamental autumn blooming plants. Finest mixed. 4c.

SALVIA (*Scarlet sage*) h.a. A beautiful bedding plant, loaded with brilliant flowers. 3c.

SENSITIVE PLANT. (*Mimosa pudica*.) Very curious. Pink flowers. Leaves droop on being touched. 5c.

STOCKS. h.h.a. Brilliant and varied in color; adapted for massing, bedding, edging or pot culture. Profuse bloomers. 650. *Dwarf German*, Blood Red, 10c.

651. *Crimson*, 6c. 653. *Blue*, 6c. 654. *Mixed*, 5c.

SUNFLOWER (*Helianthus*) *Miniature*. h.a. The smallest and the most beautiful of all Sunflowers, growing 2 feet high. 3c, oz. 5c.

661. *Mammoth*. Very large size. 3c, oz. 5c.

Sweet Peas **OUR ROYAL MIXTURE** comprises the Earliest and Latest sorts, and new blooms and beauties will appear daily through the whole summer. Everybody can scatter them lavishly and revel in their sweet blossoms all summer. They are all the rage. Price, postpaid, pkt. 3c, oz. 6c, 1/4 lb. 15c, per lb. 35c. **SWEET WILLIAMS.** h.p. For display in the garden the Sweet William is unsurpassed.

- 675. *Pure White*, 5c.
- 676. *Fine mixed*, 5c.

Verbena For massing, the Verbena is unrivaled; flowers of the most brilliant colors, blooming continuously from spring until late in the autumn.

- 700. *Hybrida*, striped, 5c.
- 701. *Hybrida*, scarlet, 10c.
- 702. *Hybrida*, blue, 10c.
- 703. *Fine Mixed*, 5c.
- 704. *New Mammoth Seedling*. This distinct class of Verbena produces flowers of great size. 6c.

VINCA. *Periwinkle Rose*. Ornamental free flowering plant, glossy green foliage and handsome flowers. 10c.

ZINNIA. h.a. Fine, large flowers of a great variety of colors. Double as a Dahlia; bloom from July till frost.

- 720. *Yellow*, 3c.
- 721. *Scarlet*, 3c.
- 722. *Purple*, 3c.
- 723. *Violet*, 3c.
- 724. *Orange*, 3c.
- 725. *White*, 3c.
- 726. *Choice mixed*, all colors, 5c.

Garden Treasures **SOMETHING FINE. SEE THE PRICE.** A mixture of many varieties of beautiful, easy-growing flowers, producing a constant and varied bloom the whole season and many biennials and perennials will appear in succeeding years. In no other way can so many flowers be had for such a small investment. For sowing where no care will be bestowed it is very fine. Large pkts. 5c and 10c, 1/2 oz. 10c, oz. 15c, 1/4 lb. 50c.

Sweet Peas See remarkable low prices for **ROYAL MIXTURE SWEET PEAS**, only 35c per lb., postpaid.

Choice Gladioli. Great Bargains.

OUR offers have never been equaled. The varieties are the best; the colors unsurpassed; embracing every color and shade. All post paid unless noted.

5 Lemoines Butterfly Gladioli, 25c.

Flowers finest texture and richest, most vivid coloring, 5 for 25c, doz. for 50c.

5 Named Gladioli Childsi, 25c.

This distinct mammoth race of Gladioli is much stronger and more vigorous than any others. They grow very tall and erect, with spikes of blooms 2 feet in length representing every color known among Gladioli.

We are fortunate in securing a fine stock of these bulbs, which we can offer to our customers at the very low prices named, 5 for 25c, doz. for 50c.

FINE MIXED GLADIOLI.

Our mixed Gladioli embrace a magnificent variety of beautiful colors.

First Size Bulbs, guaranteed to flower, extra fine mixed, 4 for 10c.; 25c per doz.; 50 for \$1.00, or \$1.75 per 100, post paid. By express, \$1.25 per 100; \$11.00 per 1,000.

Second Size Bulbs, which will all flower the first summer, 5 for 10c, or 20c per doz.; \$1.25 per 100 post paid. By express, \$1.00 per 100; \$8.00 per 1,000, embracing all colors.

Who will not plant a plenty of Gladioli at above ridiculously low prices. They grow as readily as potatoes and no bugs to fight through the summer.

New Excelsior Pearl TUBEROSE

THIS is the best variety, and is a general favorite and the most popular of all flowers for button-hole bouquets. Can be grown in pots or plant in open ground in May. The flowers of this variety are double the size of the common Tuberosa, and are borne in great profusion. Of dwarf habit, perfectly double and of most delicious fragrance. No flower garden is complete without a few stalks. If planted in pots in early winter will bloom before spring flowers come.

Extra sized flowering bulbs, 5c each, 6 for 20c, 35c per doz., 25 for 65c, 100 for \$2.40, post paid. By express at expense of purchaser, 100 for \$1.50, 500 for \$5.00.

Caladium.

Esulectum (Elephant's Ears)

The leaves of this giant plant often attain a length of 3 feet. Very suitable for single plant on lawn, beds or margins of water. Attains greatest size in a moist situation. Keep bulbs in dry sand over winter. Each 15c, doz. \$1.50, ¼ doz. same rate, post paid. By express, \$1.00 per doz.

Sacred Lilies Direct From China.

EVERYBODY now wants one or more Chinese Sacred Lilies for the window in winter. Why? Because it is of easy culture; it is sure to bloom; each bulb bears several clusters; the flowers are deliciously scented; you are sure to succeed. If you cultivate but half a dozen window plants the Sacred Lily ought to be among them. Its popularity is increasing every year. If you grow it once you will want it again. We have a fine stock of immense bulbs imported direct from their native home, the YULA river, at following low prices: By mail, 15c each, 2 for 25c, 5 for 50c. To grow them, fill a bowl, or any vessel about 4 inches deep, half full of water; place the bulb therein and lay some pebbles around to keep it in an upright position. No order accepted after March 15.

EVERITT'S MORTGAGE-LIFTING

SUFFICIENT attention is not given to farm seeds by the majority of farmers, and by most seedsmen this department is made of secondary importance. This is not as it should be. These are the crops in which the farmer is most interested. **These are money crops.** Success or failure depends on them, hence how important that those varieties be secured that are the most reliable and give the greatest results. As an observing man passes through a farming community, those farmers can be pointed out who are enterprising, wide-awake and progressive. The surroundings are a fair index of the farmer. **The experimenting farmer is the most prosperous of all.** He recognizes that varieties of grain and vegetables are running out (*dying*) and that new ones must take their place. He procures seed of all the promising kinds, tests them and selects the best to grow. Thus he always has the best, and all farmers who understand their business know that there is a great difference between the best and the poorest varieties of farm crops. **We can help the farmers along the road to prosperity if they secure their farm seeds of us. They will LIFT THE MORTGAGE AND SWELL THE BANK ACCOUNT.**

Our Location. Indianapolis is situated in the center of the richest and most extensive agricultural region on the face of the globe, and has shipping facilities unsurpassed by any other city in the country. We can save you time and money on transportation, if you give us your order for **FARM SEEDS.**

Fact. *The most successful farmers are those who possess large areas in Grass and Clover. Stock growing is profitable. Hence seed more ground to grass. Raise more stock.*

CLOVER SEED.

Bags, extra for each 2½ bushels or less, 15c.
1 to 4 lbs. are prepaid by mail. Larger quantities by freight or express. Prices subject to change.

COMMON OR MEDIUM RED CLOVER—This is the variety in general cultivation, and is so well known that description is not necessary. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. By freight or express, bu. \$4.50.

MAMMOTH CLOVER. (*Pea Vine or English*)—Like Common or Medium Clover, but of larger growth. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. By freight or express, bu. \$4.75.

ALSIKE. (*Trifolium hybridum*)—This clover is deservedly in repute as one of the best perennial Clovers, and is well adapted to this country. Should be more generally grown. Sow in spring same as common Clover. It will stand for years. Seed weighs 60 lbs. per bushel and is very small. On this account a bushel will sow from 12 to 15 acres, making it one of the cheapest varieties to seed with. By mail, pkt. 10c, lb. 35c, 4 lbs. \$1.25. By freight or express, bu. \$5.00.

LUCERNE OR ALFALFA CLOVER—*Lucerne should not be sown on hard, compact soil, or with hard subsoil, nor on sandy, open or porous soil. Even where no other crop will grow, it finds its natural home, and yields enormously.* The great value of Lucerne is in its enormous yield of sweet and nutritious forage. Sow about 15 lbs. per acre in March or April. It can be cut three times in a season, and will produce magnificent crops for 10 to 15 years without renewing. 60 lbs. per bu. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. By freight or express, bu. \$4.75.

SCARLET CLOVER. (*Trifolium Incarnatum*)—An annual. It will make abundant pasture in the fall, winter and spring. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. By freight or express, American grown, \$3.00 per bu., Imported, \$2.50 per bu. Weight, 60 lbs. to bu. Sow 10 lbs. per acre.

Send 4c stamps for exhaustive treatise on Crimson Clover. The most complete work on the subject ever wrote. Illustrated.

WHITE DUTCH CLOVER—The best to sow with lawn grass and valuable in permanent pastures. Pkt. 10c, lb. 35c, 4 lbs. \$1.25, bu., 60 lbs., \$7.50.

GRASS SEED.

Bags, extra for each 2½ bushels or less, 15c each.
1 to 4 lbs. are prepaid by mail. Larger quantities by freight or express. Prices subject to change.

TIMOTHY—This is decidedly the best grass for hay, making a large return of strong, rich hay. Sow 6 to 8 quarts, spring or fall, to acre. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c. By freight or express, bu. \$1.35.

KENTUCKY BLUE GRASS—This is known in some sections as "June Grass." It is the best pasture for our climate and soil, succeeding finely on hill lands and producing the most nourishing food for cattle. Sow in the spring or fall, 1 to 2 bus. per acre. Fancy cleaned, pkt. 10c, lb. 40c, 4 lbs. \$1.25, bu. \$1.25. Extra cleaned, 85c per bu. Weight, 14 lbs. per bus.

ORCHARD GRASS—This is one of the most widely known of all pasture grasses, coming earlier in the spring and remaining later in autumn than any other. 14 lbs. per bus. Sow 1½ to 2 bus. to acre, either fall or spring. By mail, pkt. 10c, lb. 40c, 4 lbs. \$1.25, bu. \$1.40.

RED TOP—A valuable grass for moist soils and low lands. It is a good, permanent grass. 14 lbs. to bus. Sow 2 bus. to acre, fall or spring. By mail, pkt. 10c, lb. 40c, 4 lbs. \$1.25. Fancy Seed, bu. \$1.25.

MILLET.

GERMAN OR GOLDEN—The true large headed variety. The best variety and largely grown wherever its value is known. Sow broadcast, 1 bus. to the acre, from May 1st to August 1st. Pkt. 5c, lb. 25c, 4 lbs. 75c. By freight or express, 1-4 bus. 25c, bu. 85c.

COMMON MILLET—Smaller growth than German. Makes fine hay. Price 10c per bu. less than German.

HUNGARIAN MILLET—Abundant foliage and slender head; yields well. Price same as German Millet.

QUICK GROWING LAWN GRASS—Fine lawns, grass patches or grass borders add to the beauty of a place as much as flowers. We have prepared a grass mixture which will give a good sward the first year. Sow early in the fall or spring. Lb. 30c, peck \$1.30, post paid. By express, peck 75c, bu. \$2.50.

Miscellaneous Farm Crops.

Buckwheat. JAPANESE—The plants are large and vigorous, maturing seed early, and resisting drought and blight remarkably well; the grain is much larger and has a thinner hull than the Common or the Silver Hull. We recommend this especially for well drained or sandy land, and the dry climate of the western plains. Pkt. 5c, lb. 25c, 4 lbs. 65c, $\frac{1}{4}$ bu. 35c, per bu. 95c.

Buckwheat. SILVER HULL—This improved variety is much better than the old sort. It is in bloom longer, matures sooner and yields double the quantity per acre. The husk is thinner, the corners less prominent, and the grain of a beautiful light gray color. Pkt. 5c, lb. 25c, 4 lbs. 65c, $\frac{1}{4}$ bu. 35c, per bu. 95c.

Broom Corn. IMPROVED EVER-GREEN—For length, strength and straightness of brush, unexcelled. It is a very bright green color, without the slightest reddish tinge. It makes by far the best broom of any growth; height, 7 to 8 feet. Pkt. 5c, lb. 25c, by mail; peck 50c, bu. \$1.50.

Flax Seed. For Sowing. By mail, lb. 25c, 4 lbs. 65c. By freight or express, 5c per lb.

Kaffir Corn. The heads are long and perfectly erect, well filled with white grain, flecked with reddish-brown spots. The average height of growth on good, strong land is 5 $\frac{1}{2}$ to 6 feet. The seed heads grow from 10 to 12 inches in length, and the product of grain on good land reaches easily 50 to 60 bus. per acre. The whole stalk, as well as the blades, cures into excellent fodder.

WHITE KAFFIR—Pkt. 10c, lb. 25c, 4 lbs. 65c, peck 40c, bu. \$1.25.

RED KAFFIR—Same as White.

Sunflower. MAMMOTH RUSSIAN—Is grown for its seeds, which are very valuable food for stock, particularly poultry. It is considered the best egg-producing food known. They eat it greedily, fatten on it, obtain a bright, lustrous plumage and strong, healthy condition, that fully illustrates the wonderful benefits from its use. It can be raised as cheaply as corn, having yielded at the rate of 120 bus. per acre. Single heads measure 12 to 22 inches across, and contain an immense quantity of seed. It can be planted at any time up to the middle of June. Pkt. 5c, $\frac{1}{4}$ lb. 10c, lb. 30c, 4 lb. 75c. By freight or express, $\frac{1}{4}$ bu. 50c, bu. \$1.50.

Sugar Cane. EARLY AMBER—Most valuable variety for general cultivation, ripening as far north as Minnesota; also yields heavy crops of seed and fodder, which are excellent for feeding poultry, swine or cattle. Pkt. 5c, lb. 25c, 4 lb. 65c, by mail. By freight or express, peck 40c, bu. \$1.25. Bags free.

EARLY ORANGE—A later variety, suitable for the South or lower Middle and Western States. Requires a longer season to ripen, much larger and ranker in growth. Price the same as the Early Amber.

Peanuts. SPANISH—An early variety, growing perfectly erect; can be cultivated with the plow exclusively. They yield per acre very large. Because of their early habit and easy cultivation, the most profitable variety to grow for fattening hogs. The foliage, growing erect, is easily harvested and makes a very rich hay. Plant any time from April to July 10. They succeed well in the drill. Price, large pkt. 10c, lb. 25c, 4 lbs. 75c, by mail, post paid. By freight or express, $\frac{1}{4}$ bu. 75c, $\frac{1}{2}$ bu. \$1.25, bu. \$2.00.

Rape. DWARF ESSEX—There are millions of acres of good land that lie idle part or all of the year to run to weeds, that can be sowed to this rape and produce the finest feed imaginable, and at the same time improve in fertility. It can be sown from May to September in this latitude. It can follow any other crop and furnishes most nutritious pasture, when oftentimes cattle are roaming the fields in search of a scanty living. Should be sowed at intervals of two or three weeks, so as to have fresh crops constantly coming on. From one-half acre there was cut 9 3-4 tons of green rape fodder

It is particularly valuable for sheep and hogs, being twice as nutritious as red clover. In fact, sheep soon "weigh like lead" when pastured on it. It is hardy in winter, resists severe droughts; in fact, of untold value, and its cultivation is just beginning. Sow 5 lbs. per acre broadcast; 3 lbs. per acre if drilled. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. By freight or express, per lb. 12c, 100 lbs. \$10.00.

Tobacco Seed. PEDIGREE STOCK—Improved by selection and grown on the crown shoots only.

PRICE OF ANY VARIETY—Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

BRADLEY BROAD LEAF—A popular variety for export, manufacturing, or cigars. A good, reliable variety.

TUCAHOC—A first-class variety in every respect. Leaf long and extra fine—the perfection of a wrapper.

YELLOW PRYOR—Preferred by many for bright, and succeeds where other yellow sorts fail.

SWEET ORINOCO—Used for first-class plug fillers, and makes, when sun cured, the best natural chewing leaf.

HAVANA—Grown from imported seed. Better than dried imported seed for American planters.

CONNECTICUT SEED LEAF—The largest, finest and best of this indespenable kind.

PENNSYLVANIA SEED LEAF—Largely grown in famous Lancaster County district.

BLUE PRYOR—The Genuine James River favorite. Rich shipper.

Yellow Millo Maize. A tall plant, growing 9 to 12 feet, stooling from the ground. It sends out shoots also from the joints. It has all the vigor and vitality of other Sorghums. It is non-saccharine; useful for the large amount of foliage, green feed or cured fodder that it furnishes, and for its grain. Earlier than the White Branching variety. Sow 10 lbs. per acre. By mail, pkt. 5c, lb. 25c, 4 lbs. 75c. By freight or express, 6c per lb.

Vicia Villosa. SAND VETCH—A forage plant destined to create a sensation in the West and Northwestern States, owing to its adaptability to withstand severe drought, heat or cold. It succeeds and produces good crops on poor, sandy soil. It is perfectly hardy throughout the United States, remaining green all winter. It is also equally valuable in the South. Nothing can excel this Vetch for early cutting. Sown in August or September, at the rate of 40 to 50 lbs. per acre, mixed with a bushel of rye or wheat to furnish support for the vines of the Vetch, or in drills 3 feet apart, using about 30 lbs. per acre, it will furnish a magnificent crop of green fodder by May. If cut before coming into bloom, it immediately starts into growth, furnishing a second crop, which can be eaten off by sheep or hogs or plowed under as a green manure. The Washington Department of Agriculture estimates the value of a plowed under crop of this Vetch as equivalent to putting into the ground \$16 to \$45 worth of commercial fertilizers. It can also be sown in April and will be ready to cut by the middle of July, the second growth affording excellent hog pasture during the summer. It is very nutritious, even more so than clover; is eaten with relish, and may be fed with safety to all kinds of stock. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c. By freight or express, 10 lbs. \$1.25, 20 lbs. \$2.00, 1 bu., 60 lbs., at 8c per lb.

Field Peas. CANADA— $\frac{1}{4}$ bu. 30c, bu. \$1.25, 5 bus. or more at \$1.00.

Clay, Whipperwill, Black, Wonderful, Velvet and other varieties. Write for prices.

High Mixed. The best varieties mixed together, and succeed every season better than single varieties, also are cheaper. We advise sowing this mixture where ever Field or Cow Peas are grown. Will always sell them at low prices

How the Up-to-Date Farmer Can Grow 150 Bushels of Corn Per Acre in 90 Days by Planting

Early Yellow Rose

No CORN has ever been grown that has made friends as rapidly as this where known. From Minnesota, Dakota, Virginia, Maryland, Michigan, Ohio, Indiana and other States the reports are most encouraging. The early Rose shows more vitality and stronger growth than other sorts with which it has been tested, and particularly adapts it for standing the extremes of wet and drought that so frequently prevail during the growing season. The stalks grow 8 to 10 feet high; full, dark foliage, setting its ears low, 4 to 5 feet from the ground; starting from 1 to 5 shoots, usually maturing 2 good, sound ears, 8 to 12 inches long. In a test 70 lbs. of ears shelled 64 lbs. of corn. It will mature in 90 to 100 days.

IOWA.

I prepared and planted on June 1, a field of Early Yellow Rose Corn, with the view of raising a large crop. I tended it well, and at harvest time I measured off a plot that contained 1 1-5 acres and the yield was 181 bus. of sound Corn, being at the rate of 150 bus. per acre. It is a strong grower, large and early.

JOHN HEAD, Page Co., Iowa.

VIRGINIA.

In regard to the sample of Early Yellow Rose Corn sent me last spring, it did finely. I planted it on the 19th of May. The season was bad. It was blown down when in roasting ears, but it matured all right. I counted 9 shoots for ears on 1 stalk. I showed it to all our neighbors and friends. They say it beats anything they ever saw. We all say it is just the Corn for Virginia.

C. G. BLESSING, Wythe Co., Va.

MISSOURI.

I have been raising the Yellow Rose Corn for two seasons, and I think it is the best variety of early Corn in cultivation. I was told the other day that I raised more Corn this season than any one man in the township, and simply because the most of my crop was of the Early Yellow Rose variety. It is a bonanza for bottom land, as it will come up when other Corn will fail.

Geo. B. SHIELDS, Livingston Co., Mo.

KENTUCKY.

I am much encouraged with my success with Early Yellow Rose Corn. It is just suited to this State as an early main crop superior Yellow Dent Corn, yielding 100 to 125 bus. on our rich soil. It is sure to come into general and extensive cultivation.

FRANK P. BROSINS, Henderson Co., Ky.

MINNESOTA.

The Yellow Rose Corn is good this year, being such a dry season. I believe it will be the best ever raised in this State if the season had not been so dry. I shall plant it next year and more of it, and I believe after it gets used to this climate it will be the best Corn ever grown. A good lot of it brought 2 ears to the stalk and stayed green, while the other Corn was all dried up. Please send me your catalogue, and oblige

FRED. J. MARIAH, Rice Co., Minn.

KANSAS.

I planted Early Rose Corn on April 18, but the weather was so dry it did not come up till after May 1. We had four hot days during its growth, but it stayed perfectly green and did not hurt the Corn at all. It fully matured in 90 days from coming up. In picking ears I have found several 22 grains around and 60 long, and any number 18 around and 65 long. When it comes to a big crop and fine, large ears, Early Yellow Rose has the front seat. Most of our farmers want early Corn, so it will be out of the way when the hot winds come, and this Corn fills the bill to perfection.

WM. WHITBY, Sedgwick Co., Kas.

Many more testimonials could be given if space permitted. We assure one and all that the Early Yellow Rose is the yellow corn to grow for profit. If you don't grow yellow corn then our Farmers' Interest White will fill the bill. (See next page.)

Price of Early Yellow Rose, pkt. 10c, sample ear 25c, 1 lb. 25c, 4 lbs. 60c, ¼ bu 40c, bu \$1.50, 2¼ bu. in 1 bag, \$3.00.

FARMERS' INTEREST

Is the Grandest White

We have sold this grand Corn two years, the customer completely fill the requirements enough to be profitable to grow in the for Kentucky, Tennessee, Georgia, year if they just realized that we test each year, we

OTHER
VARIE-

TIES OF CORN.

Each variety briefly described, but all are worthy of general cultivation.

Everitt's Mortgage-Lifter.

A YELLOW variety of corn that we introduced in 1893, and have sold many thousands of bushels of it for seed. The growers are scattered all over the Corn-growing belt, from Michigan to Tennessee. Reliability is stamped on every feature of this Corn. It is a variety that can be depended on for a fair crop, even in off years, and in favorable seasons yields 80 to 120 bushels per acre of the finest, deep-grained Yellow Corn imaginable. The Mortgage-Lifter Corn is bound to please. You will produce a rich harvest that will help to pay off the mortgages if Mortgage-Lifter is planted. The grain is very deep, on a small cob, ears medium size. 70 lbs. of the dry corn on the ear of our seed shelled 62 lbs. of Corn, leaving only 8 lbs. of cobs. Price by mail, sample ear 30c, lb. 25c, 4 lbs. 60c. By freight or express, ¼ bu. 35c, per. bu. ONLY \$1.25, 2½ bu. \$2.50.

White Gap Yellow Dent.

The originator, Mr. C. S. Clark, of Ohio, makes the following strong claims for this new Corn: "It combines more solid merit than any other early Corn, for it grows larger ears and is a better sheller, and from one week to ten days earlier, and on poor, thin soil will out-yield others by at least 30 per cent. The tip ends of the grains are white, the inside yellow, making it of beautiful color, both on cob and when shelled." Expert Corn growers pronounce it a perfect field Corn, as to yield, size of ears, color, size of cob and growth of fodder. No corn in the world will yield as well on poor, thin land, while on strong, rich land it is wonderfully productive. Sample ear 30c, lb. 25c, 4 lbs. 60c, ¼ bu. 35c, per. bu. \$1.00.

Iowa "Silver Mine" White Dent.

The originator says: "The stalks grow to a height of 7 to 8 feet and they set ears 3½ to 4 feet from the ground. The ears measure from 10 to 12 inches in length and often weigh 1½ lbs. They are very uniform in size and shape, with 16 to 20 rows of deep, pure white kernels on a small, white cob. It matures in about 100 days. It is the heaviest yielder we know, having yielded over 200 bus. to the acre. 70 lbs. of ears will make 62 lbs. of Corn. It is entirely distinct and will give satisfaction." Sample ear 30c, lb. 25c, 4 lbs. 65c, peck 35c, per bu. \$1.00.

Mammoth 8-Rowed Early Yellow Flint.

243 BUSHELS GROWN FROM 1 PECK OF SEED BY O. B. BLANCHARD OF NEW HAMPSHIRE.

The best variety of Corn for northern latitudes, and the longest eared corn in the country we believe. Ears measure 10 to 15 inches long, 8 broad rows making a most attractive appearance. The stalk grows medium size, and many of them bear two ears. Very leafy and is a valuable variety for ensilage. We expect all our northern customers to order this corn; while we also recommend it very highly to plant on thin ground in any latitude and for late planting.

Price by mail, sample ear, 10 to 15 inches long, 35c; lb. 30c, 4 lbs. 75c. By freight or express, ¼ bu. 50c, per bu. \$1.50, bag of 2½ bu. \$3.50.

Red Cob Ensilage.

This new and superior Ensilage Corn we can recommend as the heaviest cropping variety in cultivation, producing 50 to 75 tons per acre. It has been thoroughly tested in all dairy sections of the country. It is pure White Dent Corn, of large size and handsome appearance, growing on a red cob. The fodder is sweet, tender, juicy; and said to contain more nourishment than any other variety. It grows 13 to 14 feet in height. Lb. 25c, 4 lbs. 60c, peck 25c, bu. \$1.00, 5 bus. and over 75c per bu. Write for special prices in season

WHITE DENT CORN

Corn in the Country.

tomers residing in all parts of the country from Michigan to Georgia, and no variety of Corn could for a profitable variety. It is early enough to mature in the latitude of Northern Indiana, and large South, where it comes weeks ahead of their late sorts, and outyields them, making it an ideal Corn Virginia, Missouri, etc. Tens of thousands of Corn-growers would plant largely of this Corn this the true merit, and would increase their crop from 10 to 50 bushels per acre. Of all the varieties positively have not found another variety to equal it in yield, and until we do this shall be our leader.

EVERY FARMER knows it pays to plant good seed. Every farmer should know that there is a great difference in seed. If by changing seed to a better variety you can increase the yield 10 bushels per acre, it means the payment of the rental of the land over and above your regular crop. An increase of 15 to 25 bushels per acre is not at all impossible. The cost to get the maximum crops in Corn is very trifling, indeed. A bushel of seed will plant about 3 acres, and cost about a dollar. The plowing, pulverizing, fertilizing, planting and cultivating are exactly the same, whether you raise 40 bushels or over 100 bushels per acre. The only extra labor is in harvesting, a task that should be willingly performed.

FARMERS' INTEREST WHITE DENT is the grandest, most valuable variety of corn in the country. We don't think there is another variety of white Corn that will yield equal to it. A strong growing variety, sending its roots out in all directions in search of food. Withstands drought well on this account; stalks are strong, close jointed and leafy. A fine grower. Produces mammoth ears, of which the illustration on this and opposite page is a correct representation. The ear is 11 ins. long, and frequently they grow even longer. Grains are very deep, ranging $\frac{1}{2}$ to $\frac{3}{4}$ of an inch in length in middle of the ear. Color pure white; firm and good texture; cob medium size. As the Farmers' Interest Corn grows an ear remarkable for length, the cobs are never extremely thick, like in short-eared varieties. The ears frequently shell 1 pound of Corn to the ear, and cobs from 1 bushel of ears weigh from 8 to 10 lbs. Ears 18 to 24 rows. Rows straight, and ears of this variety are well filled out at the ends. Matures in about 100 days. Yields very heavy. As the introducers of this fine Corn, we desire to make a demand for it by reasonably extolling its merits. We will, however, appeal more directly to the good, sound sense of Corn-growers, than to attempt to fill the pages with claims for the Corn. **The Corn will speak for itself from the time you receive the seed we will ship you until it is finally stored in the bursting cribs.** We want the better class of intelligent, up-to-date farmers, and those who are seeking for improvements in their crops, as our customers, and count upon an order from every pushing son of the soil, who will plant wisely and reap abundantly.

FIGURES AND FACTS

Prove that the expense of planting our improved varieties of Corn is about 15 cts. per acre, including freight, and your own seed is.

The effect of growing a large-eared variety of Corn like Farmers' Interest can be illustrated as follows: The average weight of Corn ears is not more than 8 ounces. If an increase of 2 ounces to the ear can be secured, there would be added to the yield per acre $\frac{1}{4}$

FARMERS' INTEREST

more. And if there be 4 ounces added to the weight of ears, then the yield will be increased $\frac{1}{2}$. And, as earliness is as readily developed as the size of the ear, then we can as well have a large increase in yield, and at the same time an increase in earliness in ripening. *These were points kept in mind by the originator of this Corn, and earliness and size are combined to a remarkable degree.*

When the Farmers' Interest Corn is grown in the South, new seed should be obtained of us after two or three years, as it gets later and loses some of its good qualities.

Sample Reports From Our Growers—Many More Could be Given.

I planted a field of your Farmers' Interest Corn last spring, and the result was a revelation to me and my neighbors, when we found we could send to Indiana and get seed corn that excelled our native varieties. We thought we grew good Corn, but your Farmers' Interest is yielding 110 to 120 bus. per acre, and surpasses the best of other Corn by 25 to 30 bus. per acre.

Price by mail: Large sample ear 35c, 1 lb. 25c, 4 lbs. 75c. By freight or express, $\frac{1}{4}$ bu. 50c, 1 bu. \$1.50, $\frac{3}{4}$ bu. (1 bag full) \$3.00; 10 bus. or more at \$1.00 per bu.

Pre-Historic Corn.

After Laying Buried 3,000 Years the Seed of Present Generation the Best Connecting Our Country in the Dim, Distant Past. Years, for General Utility and Intrinsic Value Offered—in Our Recollection—of and Beautiful as Silken equaled by Corn of the Presentness of Grain and Food.

Produces 2 to 11 Capable of Yielding

Its Benefits Can Not be Estimated, Whether Grown in its Purity or its Pure Blood be Mixed with and Diffused Through the Varieties now in Cultivation.

In giving a history of this Corn we must go back in the far distant past, beyond the point where history, as now preserved, began, and by the remains that are frequently unearthed we find unmistakable evidences of a vast population that swarmed over the country, and by the articles of their handiwork and hieroglyphical writings we learn that they were engaged extensively in agricultural pursuits, manufactures and commerce.

We are indebted to their belief, that after death the person needed food to sustain him and implements of warfare to hunt with while on his long journey to the beyond, hence they buried corn, arrows and other articles with the corpse. There are hundreds of burial mounds scattered over the country, plainly in view to-day, from some of which carloads of ancient relics have been taken.

THE POTTERY IS ABSOLUTELY IMPOROUS AND INDESTRUCTIBLE BY CORROSION. Composed of ground mussel shells, clay, cements, lime and an imperishable mineral, nothing that will more effectually defy the destroying hand of time can be conceived of. Dig up one of the vessels from underneath a mass of decayed human remains from any depth; wash it and it appears as bright and fresh as if it just came from the moulder's hand. At Marked Tree, Ark., in such a vessel, safely sealed, amidst the decayed dust of human remains, placed there at least 3,000 years ago, fifteen feet under ground, the mound having arisen by successive layers of human remains, pottery, broken implements and earth, this Corn was found. HERE IT HAD LAIN IN PERFECT PRESERVATION, WHILE THE THOUSANDS OF YEARS ROLLED BY, turning to earth again all human remains. Considering the composition of the vessel, the air expelled and it securely sealed, we have the perfect condition for preservation. This is not the only case where corn has been found in a burial mound. It has been found in Ohio, Utah and other States,

this Corn is Discovered and Gives to the Link With the People Who Inhabited As a Novelty Unparalleled in Many Equal Value. Has Been Thought of as Attractive Goods; for Quality, Un-ent Day. For Product-er Unapproached.

Ears to a Stalk. 250 Bushels Per Acre.

Mr. J. H. BEAGLEY, of ILLINOIS, the well-known Corn socialist, writes as follows (Mr. Beagley is also known as an expert Corn judge, and no doubt some of our patrons have met him at State and district fairs judging Corn displays. He has a national reputation in this line). "I am well satisfied as to the origin of Pre-Historic Corn, from the fact that it is altogether unlike any other known variety; its peculiar habits of growth, color, prolificacy, luxuriance, its flavor, its remarkable root growth, its fixity of type, all stamp it as the most wonderful and valuable sort of field Corn known. Parties who have grown Corn for me, or seen my Corn growing, men who are expert Corn growers and are truthful and reliable, agree with me on every essential point. From my own personal experiments I take pleasure in corroborating all the claims made. In this Corn you have not only a novelty, but a plant of great merit, one that will make you a benefactor in disseminating it, and also a plant that will do much toward revolutionizing the Corn growing industry. Your customers need have no hesitancy in investing in it, as the results obtained from planting it will be of immense advantages to them. I can not speak too highly of this connecting link between this and a race that were evidently far advanced in agricultural pursuits and civilization. The plant shows great flexibility of constitution, maturing in every part of the Corn belt, on all kinds of soil, and under almost every condition. I am personally acquainted with Rev. Dr. Curry, and am convinced his report of its discovery is absolutely correct. In fact, any statement made by that gentleman has my implicit faith, as I know he is one of nature's noblemen, an honest man. Ears weighing over a pound were grown in Northern Missouri. It grew to perfection in Northern Illinois, Southern Indiana and in Missouri. Severe storms

5 FT.

5 FT.

created great havoc with field Corn generally the past season, but the Pre-Historic stood the gales and was uninjured, while others were laid flat on the ground. Its great root growth and strong brace roots, which in some cases have been noticed 26 INCHES ABOVE THE SOIL, enable it to stand firm on the earth."

The Pre-Historic I think is the corn for the farmers to grow. I believe it will yield double any other kind; for fodder it can't be beat.

E. T. POE, Rosebaugh, Indiana.

This represents a piece of pottery from which the corn was taken.

but never before was a grain found that would germinate.

REV. DR. E. S. CURRY, the discoverer, says: "The Pre-Historic Corn has been grown on my farm in Missouri, successively and successfully for eight years. I HAVE RAISED STALKS 15 FEET HIGH, the blades 7 INCHES BROAD and 10 FEET 5 INCHES FROM TIP TO TIP ON OPPOSITE SIDES OF THE STALK, WITH 11 EARS ON THE STALK. It is a wonderful deep feeder, willingly and from choice sending its roots to the subsoil, and thrusting its roots down deeper during a drought. The stalks and numerous blades it bears remain green through six weeks of the most excessive drought, with hot winds, while common born perished the second week."

Stalk with Six Ears. Made from Nature.

DESCRIPTION.

There is no doubt of the ancient origin of this Corn and its very recent discovery and addition to our list of grain. Search could be made over our whole country and no Corn similar to it in stalk, blade, ear or style of growth would be found. The growth is very rapid, stalk stout and robust, thickly set with leaves 3 to 5 feet long and 4 to 7 inches wide. As a variety to strip the lower blades off for feed, it easily furnishes three times as much leaf fodder as any other. When planted thickly for fodder, or ensilage, its luxuriant growth of blades and tender, juicy stalk make a royal food. Horses and cattle prefer the Pre-Historic Corn and fodder. The Pre-Historic Corn will not blow down unless the stalks break off. The grains are very deep and very beautiful in color, form and marking. The prevailing color is bronze, varying from dark to light, and the ears have a beautiful silken appearance or finish. It easily surpasses any of our present day Corn in yield, 2 to 11 ears growing to a stalk. There is no question but what enormous crops were raised in those older times, when the rude plow turned up very rich soil. Piny tells of one stalk of grain that had on it between 300 and 400 ears. The ears are not mammoth, but of good, medium size, deep grains and small, neat cob, just the right size to mature early, shell and feed, equal to the best sugar corn for the table. Its the perfect Corn, showing great skill and care of the strange people who grew it thousands of years ago.

As a table Corn it is as sweet as sugar corn. For ensilage, the Pre-Historic Corn is being much sought after. It is wonderfully luxuriant. We can not praise it in this respect too strongly. Its brittle, juicy stalks, and leaves broad, long and fleshy, with sweet taste, entitles it to take first rank for dry or green fodder and ensilage.

Testimonials for Pre-Historic Corn.

It was with feelings of awe and fear that we handled this 'corn dispatch from the fathers'—this 'spook corn.' My thoughts would wander from my work and seek to penetrate the hidden veil of obscurity that hung around it. What manner of men cultivated it? How did they live and what became of them? The 'spook corn' is the connecting link between the dust returned past and the present. About the first of May the Corn was planted. Throughout the growing season it *early developed that it was a strange child to this climate and conditions.* The color of its broad, strong-made leaves was different from any Corn ever seen before. It began to shoot for ear before it shot its tassel, and kept shooting 3, 6 and 7 ears to the stalk, on stalks as large as a strong man's wrist. The fully developed stalk was 3 to 9 feet in height. It is a thoroughbred and has inherited from its ancestors honesty and uprightness. No fatism about the 'spook.' No barren stalks, and all as nearly alike as possible. They were from the business end of production, where quantity was considered a virtue. The ears are beautiful bronze colored, 7 to 8 inches long, 14-rowed, 2 inches in diameter at the butt, carrying its size well to point, both ends well filled out. The corn is of the dent variety, very starchy, firm enough for keeping purposes, yet soft enough to be fine feeding; somewhat sweeter to the taste than the ordinary field Corn. In all a valuable acquisition to the varieties of corn now cultivated. V. G. WAX, Ford Co., Ill.

I planted the Pre-Historic Corn the last of April. The spring was backward and cold. It made a wonderful growth in the months of May and June, but was cut short by the severe drought after this. The stalks were about 12 feet high, with 2 to 4 ears, blades 3 to 4 feet long. I estimate its value very highly.

ROBT. POWELL, Lyon Co., Kan.

I am pleased to say the Pre-Historic Corn has given good satisfaction. It produced from 2 to 8 ears to the stalk this year, and I can not tell what it will do in a good season. It has been very dry, but it excels any corn I ever saw in the State of Arkansas.

W. L. SUTTON, Phillips Co., Ark.

I planted the Pre-Historic Corn last spring and did not cultivate as I should. The season was very dry and I did not think it would grow, but its equal can not be found to stand the drought, and its equal in every respect has not been in our part of the country for grain and fodder. Give it a chance and it will yield 100 bushels per acre on our land.

JOHN R. DAVIS,
Edmonson Co., Ky.

I am a large grower of stock, and having tested the Pre-Historic Corn I considered it the best for feeding and planted 40 acres last spring, with the result that it yielded one-half more than my other corn.

CYRUS MCKENZIE,
Morgan Co., Ind.

Section of ear of Pre-Historic Corn. No other variety has such a small proportion of Cob to the Corn.

Ear of Pre-Historic Corn. They frequently grow 12 to 15 inches long.

Mystery of the Pre-Historic Corn Revealed.

(By H. C. WILSON.)

Mr. Everitt—The corn it came—
When I saw the brownish grain,
Surely musty, from a thousand years—
I paid the price with many fears—
It set me thinkin' what Mandy said,
"Not all the fools has yit gone dead"
When I bought that last buck sheep
From the catalog I got each week.
I took the sack and started home,
As nothing else could then be done—
And, studied how to fix affairs
To save my few remaining hairs.
For Mandy claims, for twenty years

"Ten thousand years, as you count time
Have come and gone since hand of mine
Fashioned the pots of shell and clay,
In which my seed corn was hid away."
He quickly grabbed me by the hair,
And lifting me high into the air—
He called his wife, who quickly came,
And asked her to the pigmy name—
She tickled me beneath the chin,
And puttin' on an awful grin
Looked at her spouse and said, "Say Jim,
Are you sure it is a him?"
Just then I heard my Mandy say,
"Dear hubby, goin' to sleep all day?
Law sakes, alive, the pillar's wet,
And you air's in an awful sweat.
Been dreamin', have you? Was it bad?
Must have seen yer great grand dad."
"Yes," says I, "I was in the land
Of the original pre-historic corn-seed
man."

So ended that awful nightmare dream,
I have found the corn was all you claim
Tho' my hair to gray had turned that
night
I'm glad that corn has come to light.
I believe it will double the yield
Of corn ever grown upon that field.

NOTE—We regret very much that our customer, Mr. Wilson, failed to give his postoffice address when he sent this excellent testimonial in poetry and sketch. When this comes to his notice, will he please supply the deficiency.
J. A. EVERITT.

PRICE.

We had a splendid crop of Pre-Historic Corn the past season and are able to offer it at prices that will allow our customers to buy by the peck and bushel instead of small lots as heretofore. By mail, pkt. 10c, 1 lb, 35c, 4 lbs. \$1.00, sample ear, 35c. 4 lbs. will plant more than one-half acre. By express or freight, ½ peck, 50c, 1 peck, \$1.00, 1 bu. \$3.00.

FORFEIT. The Pre-Historic Corn is so remarkable and distinct that if we tell only the truth about it, many people will not believe it. Yet why should we tell less than the facts. To all Doubting Thomases we make this proposition:

We will forfeit \$10.00 for each \$1.00 invested in seed, if, when you receive the seed or after you grow the crop, you can truthfully say it is not a distinct variety and as represented.

REMEMBER This corn will sell for as much on market as either our white or yellow corn, and for feeding we claim it is superior to any other. Every Corn Grower, whether on a large or small scale, will miss an opportunity of a lifetime if they fail to obtain some of this seed. Why, it is worth more than we ask for the seed to gratify the natural curiosity every person has to grow this peculiar grain, that in one step connects the present with the pre-historic past; at least 3000 years ago. As a novelty nothing on earth, in our estimation, surpasses it.

We've run the farm, and very near
All the time have saved some cash,
Until I tuk to readin' trash.
While I see thinkin' these things o'er,
Before I knew I see at the door,
Mandy, says she, "What's in that sack
You se got hid a hind yer back?"
Bnt, how I lied and hid the corn,
It matters not, its past and gone.
But I paid for the sin I done
As you'll see if you read on.

Spring time came as it had before,
And I plowed in all I coul' turn o'er
Of the best dirt up on the farm
To plant your corn I hid in the barn
I worked well and planted it deep,
Often dreamed of it in my sleep—
It grew, and this allayed my fears,
Tho' it had kept a thousand years.

And when on Sundays the neighbors
came,
I tuk them out to see my grain,
I measured and kept account each week,
First week it showed exact two feet,
Nine weeks it grew without a stop;
And when my neighbor stood on top
My tallest ladder the measure to hold
Mandy gave in, I'd not been sold.

The ears they set in the gooddest shape,
On each stalk from three to eight,
And when it was ready to shuck
I wondered how the fodder I'd cut.
My farm had flourished as of old,
Mandy had most forgot to scold,
At peace with all, I went to bed—
But why to me, should come the dead?

I dreamt I lay in the Autumn haze
And saw a giant of pre-historic days,
Inspecting my field of ripening corn
As though he thought it all his own,
While his "better half" basked in the
morning sun

And cuddled and suckled her hairy
young,
While I wish to goodness I'd never
gone
And planted and growed pre-historic
corn.

List, this is what I heard him say,
"Some one has stole my corn away"
Then, he spied me on the ground,
"At last," he said, "the thief I've
found."

**72 PER CENT. OF MEAT.
100 BUSHELS PER ACRE.**

GREAT AMERICAN OATS

See here, GOOD FRIEND, Will this start you to Thinking?

The editor of the RURAL NEW YORKER says: "Side by side in experimental plots we have raised as many as 75 different kinds of wheat. The best yield was at the rate of 37 bushels to the acre—the lowest 25. Side by side we have raised 100 different varieties of potatoes. The highest yield in our rich garden soil has been at the rate of 1,200 bushels to the acre, the lowest about 350. In field culture, in poor soil, well fertilized with potato fertilizers, we have raised from one variety 150 bushels to the acre, from another, 300 to the acre. Now, WHAT corn on your soil, good farmer, will give you the maximum yield? WHAT wheat? WHAT potato? WHAT kind of oats? Isn't it worth your while to find out, or don't you believe in such differences?"

The Great American Oats are the kind of oats to grow for sure cropping, heavy, plump grains with large per cent of meat and small per cent. of hull; stiff straw that will save the crop until harvested. Head long, heavy and full. They are noted for vigorous growth and droughts do not affect them as much as less vigorous varieties. The grain is large, white, plump, with thin hull, weighing 40 pounds per bushel with ordinary threshing cleaning. On account of large per cent. of meat in the kernel, they are well suited for oat meal and other oat products.

We unreservedly recommend the GREAT AMERICAN OATS as the most reliable general purpose oats for farmers to grow. They will yield from 65 to over 100 bushels per acre in ordinary farm cultivation. We don't ask you to build your hopes on 200 or more bushels per acre. We believe we are dealing with intelligent people, and they realize such yields are impossible. We aim to gain and hold the confidence of farmers everywhere; then will we realize the height of our ambition, when our celebrated O. K. Seeds are planted on every farm in the country. Have you decided to devote part of the farm to the GREAT AMERICAN OATS? It is one of the ways to make farming pay.

There are many instances where 75 to 100 bushels of Oats can be grown per acre as well as 25 to 40 bushels, if only the proper variety had been used for seed.

Price by mail, 1 lb. 25c., 4 lbs. 75c. By freight or express, ¼ bu. 35c. 1 bu. \$1.25. Per bag of 3 bus., for 2 acres, \$3.00.

White Superior Scotch Oats.

This has been our leading variety of Oats for several years, and we have sold great quantities of them. They are a most valuable early variety, and any farmer who has not grown them in the past can well afford to obtain some seed this year. They have good, stiff straw; are heavy yielders of plump, heavy grain. They are just such Oats as please the grower and the purchaser who feeds them. Price by mail, 1 lb. 25c., 4 lbs. 65c. By freight or express, ¼ bu. 25c., 1 bu. 85c., 3 bus. in a bag, \$2.25.

4th of July Oats

Often times the only crop that is saved entire and in good condition is the early one. No crop is more susceptible to damage by bad weather than the Oat crop. Therefore, the earlier the variety, the less danger of damage and the more valuable, providing hardiness, yield and quality are not sacrificed.

In the 4th of July Oats we have the earliest variety combined with other good qualities, making it of peculiar and immense value to farmers. These Oats ripen in this latitude about July 4th, about two weeks ahead of other sorts. The straw is strong, medium tall heads, medium length; very compact, but contain many grains. The grains are white, plump and heavy, weighing 45 pounds to the bushel in good clean crops.

The supply of these Oats is so small that we can not offer them for sale this year, but are distributing them free to subscribers to

Up-to-Date Farming and Gardening.

SEE PAGE 64 AND THE 3RD COVER PAGE OF THIS CATALOGUE.

THE 4th OF JULY OATS we will introduce next year, at a good round price. People who get a start now, will have the advantage of others by one year.

New White Mountain

A FIT SUCCESSOR TO OUR GREAT GREEN MOUNTAIN POTATO

TWELVE years ago we introduced the great GREEN MOUNTAIN POTATO, which has been famous ever since. Famous for beauty, great productiveness and the superb cooking qualities loved by all users of this popular food. Probably no other potato is more generally grown at the present time than the Green Mountain, and although it has served the public these many years it still retains its original vigor to a great degree, and will be a good cropper for many years to come.

You can raise 300 bags of White Mountain Potatoes per acre.

We want to call the attention of all the friends of the Green Mountain and others who are seeking for the best results in their potato crop, to our latest, newest and best variety, THE WHITE MOUNTAIN.

A variety that is not excelled for handsome form, color and good cooking qualities and absolutely unapproached in yield. Not excepting such well known favorites as Green Mountain, Rural New Yorker, Carmans, etc. In proof of our assertion we offer testimonials, below, from some well known people which should carry deep conviction.

The WHITE MOUNTAIN is in season medium late and suited for main crop. The tubers are of medium to large size. We say, practically no small ones or sortings. Eyes even with surface, or slightly bulged above, which of itself is a good indication of a strong grower. Skin white with rich yellowish creamy cast, and considerably ruffled or netted. Experienced growers know that a potato with skin like this possesses superior cooking qualities. The flesh is as white as snow and cooks dry and mealy. The plant is a vigorous grower, and if protected from blight and bugs will carry the tubers through to a perfect and bountiful harvest. (For preventing blight and bugs, the great enemies of the potato crop, write to us.) The tubers set close about the base of the plant and turn out clean at first effort.

W. B. Hall's yield was 243 bus. per acre. Next best was 167 bus. Almost 50 per cent gained by planting White Mountain.

This potato will astonish old Potato growers in its yields and fine qualities and every person who is ambitious to make the most money out of his crop cannot afford to let this year pass without obtaining seed of the New White Mountain. Read reports of the few outside tests made in 1898.

I find after testing the White Mountain Potato, both for yield and quality, that it has great merit. They are the talk of this country around who have seen them. *Its a distinct new variety.* Its the strongest grower I ever seen; growing away from blight and bugs and makes a crop when others fail.

C. S. CLARK,
Wakeman, Huron Co., O.

I send you the following result of tests of 4 varieties of potatoes, all planted May 23, all harvested September 27. The yield is given at rate per acre. All had exactly the same treatment: Carman No. 3, 132½ bus.; Mayflower, 127½ bus.; Seneca Beauty, 167 bus.; White Mountain, 243 bus.

W. B. HALL,
Wakeman, Huron Co., O.

We are not able to give a very favorable report of our test of potatoes for this year, owing to the very unfavorable weather. The White Mountain you will find in the list below. We will say, that so far as our test goes, your variety is promising. The tubers are uniform in size, regular in shape, and do not show a tendency to become prongy. On the whole, I think that it is a promising variety. The 1898 tests follow. The yields are per acre:

Sir Walter Raleigh.....	126 Bus.

W. J. GREEN,
Horticulturist of Ohio Agr. Experiment Station,
Wooster, O.

The White Mountain Potato was planted May 3 and dug September 10. It made a very large, vigorous growth, with thick stalk and stocky vines. The tubers were very compact in the hills and all large—no small ones at all. There was no record kept of the yields. I am very much pleased with the potato. There were 31 other varieties, mostly new, planted in the field, and none made a better showing or pleased me better than the White Mountain. This was one of the 52 varieties I showed at Wisconsin and Illinois State Fairs and it attracted much attention.

L. L. OLDS,
Clinton, Rock Co., Wis.

My trial of the White Mountain Potato was very satisfactory. The 6 tubers yielded me 4 bushels, with very common care and planted in the ordinary way. The quality is very fine. They have great merit and a great acquisition for potato growers.

S. J. ANDERSON, White Fox, Lorain Co., O.

The White Mountain Potato proved to be a very vigorous grower, produced smooth tubers of uniform size, while in yield and appearance compare very favorably with Rurals and Carmans.

DENNIS D. ROWLAND, Wakeman, O.
Mr. B., who had in charge the test of White Mountain Potato, is in New York. The writer, however, saw the crop harvested. It was fine and of good quality. This variety was one of the largest yielders out of several varieties tested.

GUNSON, BROWN & Co.,
(Per Lawson), Rochester, N. Y.

PRICE—Remember this Potato is new this year, and, like other varieties of our introduction, will spring rapidly into favor. Those who start now are bound to make much money selling them for seed. We consider the price is very moderate for this Potato. By mail, 1 lb 50c, 3 lbs. \$1.00. By freight or express, ¼ bu. \$1.00, ½ bu. \$1.50, 1 bu. \$2.50, per bbl. \$5.00.

EARLY
xxxx

Andes.

A Valuable New
Extra Early Potato

COMBINING EXTRA EARLINESS, FINE TABLE QUALITIES, GOOD SIZE, BEAUTIFUL FORM, GREAT PRODUCTIVENESS AND LONG KEEPERS.

THE EARLY ANDES POTATO grows ovoid to oblong; eyes numerous, narrowly distributed over the entire surface, with russet tinge, rather short, white, fine grained, rather short, condition and planted they to make a good crop before they are seriously affected by drought, grow and mature quickly.

medium to large size, shape pinkish, rather shallow, even-face; skin delicate, light pink-pearance; flesh firm, very dry; vines upright, If ground is in good moist when are quite sure can be seriously affected by as they so fast mature so

Read reports from parties who have tested them:

The originator says: "I originated the Early Andes from seed, about 1886 or '87, the only one retained out of 17 kinds produced. I do not know from what variety the ball was obtained, as it was given me by a relative. The first year that I was able to get a crop from it, I got 105 bushels of merchantable, and one grain sack, and half another sack of small ones. It has always given a very small per cent. of culls. I have grown it with the standard varieties, and has been two weeks earlier than any variety I have ever tested it with (like New Queen, Early Ohio, etc.) In yield of merchantable potatoes, has equaled any variety. It sets its tubers very early. Its bud growth is remarkably strong and distinct from any other variety. I never sold a potato that gave better satisfaction for quality and form. It will keep longer in the spring than most late varieties."

R. A. ANDES.

While it can not be expected that a very early potato will equal a late variety with 1 to 2 months more growth, and that in the cool months of the fall. Still I believe by close planting and good culture, the E. Andes will equal them, and being so much better in quality and so very early, will bring more money and give the ground for some other crop. Early Andes has given me more bushels to the acre than any variety I ever grew. I have been testing new varieties since 1865.

H. C. MARSH.

My start of Early Andes was from one potato given me by R. A. Andes while they were on exhibition at the county fair. I have tested about 40 varieties in the last 35 years. I have been a market gardener for several years, yet I have never found its equal for earliness, quality or yield. For me it has been 10 to 14 days earlier than Early Ohio. Has always proven more uniform in size than any other potato I ever grew, and of the best quality, and much more productive. The per cent. of

small ones was very small. I do not know that it has a fault.

W. J. HURST.

I have been running the farm of R. A. Andes for four years. Each year I have grown the Early Andes potato. March 20, 1894, I planted it deep, rigging the rows. After the weather opened, the ridges were harrowed down, thereby saving them, while others lost their potatoes by freezing. They were harvested June 22. Another lot was planted about the last week in April. Harvested July 5, fully matured. 1895 planted April 20; harvested July 4. 1896 planted about April 22-3; dead by the 10th of July. July 15 a flood came and rotted almost all of the patch. From less than an acre we got 256 bushels. In table quality they are as good as any variety I know of. In this year's test, E. Andes was two weeks earlier than Early Ohio. I have never grown a variety that yielded more merchantable potatoes to the acre. The culls from those dug June 22, 1894, were in excellent condition for planting spring of 1895.

J. S. FILLER.

PRICE. By Mail, 1 lb. 50c, 3 lbs. \$1.00. By Freight or Express, ¼ bu. 75c, ½ bu. \$1.50, 1 bu. \$2.50, per bbl. \$6.00.

They are cheap at these prices and the public may be thankful that some other seedsmen did not get this variety to introduce and charge \$10.00 per bu. and \$20.00 per bbl., which has been the custom for such a valuable sort.

We make a special request that every purchaser will report on this potato after grown.

Everitt's Early 6-WEEKS MARKET POTATO.

As Good as Ever, and Better than any Other.

Ready for Market in SIX WEEKS. Matures in 72 days, two weeks ahead of any other variety, and has yielded at the rate of over 600 bushels per acre.

Still Leads for 1899. Others may equal it in Size, Quality or Productiveness, but in Earliness Everitt's Six-Weeks Market is Unapproached.

Market Gardeners and all Others Who grow potatoes for home or market will prize this potato ahead of all others on account of its *extreme earliness, good table qualities, fine size and shape, great productiveness and splendid keeping properties*. Just think of one variety of Potatoes combining all of these qualities in high degrees. We positively assert and have abundant and undoubted proofs that **Everitt's Early 6-Weeks Market Potatoes** do make good size merchantable tubers in 6 weeks from planting. This potato can be depended upon for such results every time if *planted when the growing season has arrived and the weather is favorable*. With unfavorable weather they will, of course, require longer. (Read the reports on next page.) The potatoes cook fine and dry from the time they are large enough until late spring. Size is medium, skin light flesh color, shape like in illustration. They are perfect beauties, heavy yielders, and a sure yielder. We have had much experience with this potato and are prepared to state that

Taking all the good qualities of this potato into consideration it is not a money variety, and a variety that will be prized by all lovers of early vegetables at home? There is not a more valuable variety in existence in our estimation. It is worth its weight in gold for a start of seed.

The Potatoes begin to form when the stalk is only 4 or 5 inches high. The tops and tubers grow rapidly. *They grow so rapidly and mature so early that the potato bugs have little chance with them*, making the crop, if planted early, before the young bugs become numerous. They yielded on the farm of the originator in Ohio 420 bus. per acre. Next year 380 bus. per acre, two years later over 600 bus. per acre. He raises them for early, medium and late crop, claiming they "fill the bill" better than any others. The originator says:

"Potatoes have been my favorite crop since I was a boy, and I always took great pleasure in seeing what good crops and large yields I could get, but never did I see a nicer Potato than this. I have raised a great many kinds sent for the *earliest* in the catalogues, and have raised them from seed, and got some very good ones, but none that came up to my ideal of a perfect Potato until I originated this. I have now discarded all others, and raise this for *early and main crop, for market and home use*. I am fully convinced that I have at last produced the *best early potato in cultivation*. I think it combines more good qualities than any other variety in the world. I have given it a thorough trial, and it has proved itself superior to all other varieties.

We introduced this Potato several years ago and have sold immense quantities of them, shipping them to all parts of the country. Any person who has not already obtained seed should not delay longer. As it is one of the good things that never disappoint.

SUMMARY.

- Size for use in 6 Weeks.
- Ripen in 10 Weeks.
- Yield 420 Bus. Per Acre.
- Next Year 380 Bus. Per Acre.
- 2 Years Later 600 Bus. Per Acre.

✕ A Record Unparalleled. ✕

that oftentimes are left to take their chances against unfavorable influences. This potato, *strange to relate keeps sound, solid, and fresh late into the spring, equal to any late potato that we ever saw.*

READ HOW THIS POTATO IS LIKED BY THOSE WHO GROW IT. ❄ ❄ ❄ ❄ ❄ ❄ ❄ ❄

"The Like Was Never Seen Before."

We, the undersigned, do personally know the originator of **EVERITT'S EARLY SIX-WEEKS MARKET POTATO**, and of our own knowledge know that this variety will produce potatoes fit for the table in six weeks from planting, and that they are solid and mealy when boiled, and that they will mature in 72 days from planting. We consider them the earliest potato in the world, and if justice is done them they will be placed at the head of the list as the earliest, finest table variety, and the largest cropper of any early variety. **J. W. SHANKS, E. B. SMITH, R. BLAIR, V. WASHBURN, ELIZABETH WASHBURN**, all of Athens Co., Ohio.

The Everitt's Early Six-Weeks Market Potato is the most wonderful variety in the world, and combines more good qualities than any other variety in cultivation. This will surely be the gardeners' favorite. The potatoes begin to set on almost as soon as the plants appear, and by the time the plants are as large as other early potatoes when tubers begin to set, these are ready for market. At six weeks from planting I have had them fit for table, and as fine, solid and mealy as ripe tubers. They are not troubled with the potato beetle.

JOHN WISE, Athens Co., Ohio,

I know the originator of Everitt's Six Weeks Market Potato, and helped to dig his crop this season, and I think they are the earliest potato in cultivation. When the vines were about six inches high I examined them and found potatoes as large as partridge eggs, and at six weeks from planting were as large as hen eggs. Will mature in 72 days and never rot. The yield was 380 bushels per acre, without manure.

J. E. SHANKS, Athens Co., Ohio.

One pound Early Six-Weeks Market Potato yielded 147 pounds of fine, sound, smooth tubers. Ripened in 75

We regret very much that our space forbids giving many more testimonials for the **Six-Weeks Market Potato**. If we would print all the good testimonials that have been sent for this potato they would fill several catalogues like this.

CAUTION. Since we introduced our renowned **Early Six-Weeks Market Potatoes** some other parties have offered Potatoes under various names, "Early Market," "Five-Weeks Potato," "45-Day Potato," etc. Some of them use our description of **Early Six-Weeks**, others claim their potato is as good as our **Six-Weeks**. We claim our **Early Six-Weeks** is the earliest and best very early potato in the country, and no person will make a mistake if they send their order direct to us.

PRICE. By mail, 1 lb. 25c, 4 lbs, 65c. By freight or express, 1-4 bu. 50c, 1 bu. \$1.50. Per bbl. \$3.50.

❄ ❄ Other Good Varieties of Potatoes. ❄ ❄

GREEN MOUNTAIN.

This is the grand Potato for which we paid \$200 per bbl. for the stock when we first introduced it. This is the greatest price ever paid for Potatoes; also, it has the record of making the greatest yield—at the rate of 1.391½ bus. per acre. Form, handsome; skin, white; size, large; flesh white and fine quality. Cooks dry and mealy. Keeps well till late spring. A very heavy cropper and one of the best Potatoes any grower can plant. We have always heretofore given the **Green Mountain Potato** two or more pages in our Catalogue, but did not have room this year; but it is just as good for all that, and where not already grown, should be added to the list at once. **Lb. 25c, 4 lbs 65c, by mail; ¼ bu. 40c, bu. \$1.00, bbl. \$2.50.**

THE CARMAN No. 1.

Originated by the editor of the *Rural New Yorker*. It is a seedling from other seedlings raised through several generations, always retaining those with best qualities, medium in season, oblong to round shape, smooth, skin white. The flesh is unusually white and the quality fine. It is considered by many of the best Potato growers in the country the most promising second early variety recently introduced. **Lb 25c 4 lbs. 65c, post paid; peck 40c, bu. \$1.00, bbl. \$2.50.**

CARMAN No. 3.

This is Mr. Carman's grand success in breeding up a late main crop variety. In it he has succeeded in fixing

days, and produced marketable potatoes in six weeks. This is the most valuable variety of potatoes ever introduced.

F. TAYLOR, Ashland Co., Wis.

The **Six-Weeks Market Potato** takes the cake. All the seeds I buy from **J. A. Everitt** beat the world.

Mrs. W. H. POWERS, Bradford Co., Pa.

I like the **Six-Weeks Potato** very much. I divided with my neighbors. One of them says they are the best he ever saw.

E. HARTMAN, Sutton Co., W. Va.

The **Early Six-Weeks Potatoes** did well with me. I could sell a car load for seed here if I had them.

JOHN B. COCHRAN, Jeff. Co., Ohio.

I would give hundreds of dollars to control the growing of the **Early Six-Weeks Market Potato** for this market, as they can be put on the market two weeks ahead of any other sort, which means hundreds of dollars profit to a large grower.

W. HENRY MORRIS, Cuyahoga Co., Ohio.

'Tis now six weeks and five days since I planted the **Six-Weeks Market Potatoes**. They did not sprout very quick, but they have nice, large tubers on them. Are the earliest potato I ever saw. I thank you a thousand times.

C. L. RICEL, Armstrong Co., Pa.

The **early Six-Weeks** are grand. We had fine potatoes in 6 weeks from planting; dry and mealy as old potatoes. **Early Ohio** came 3 weeks later.

L. S. JOHNSON, Clearfield Co., Pa.

You cannot praise the **Early Six-Weeks Market Potato** too much. Gardeners should not think of doing without them. I dug 50 bushels off ¼ acre, beginning six weeks from planting, which averaged me 50c. a peck. They are wonderful.

G. R. HIXON, Madison Co., Ill.

those desirable points, so valuable to every potato grower. 1. **VERY LARGE and HANDSOME.** 2. **REMARKABLY PRODUCTIVE.** 3. **ALL LARGE TUBERS and COMPACT in a HILL.** 4. **HIGH TABLE QUALITY,** no hollow center or hard core. Skin and flesh white, eyes few and shallow. Will keep without trouble till planting time. **Price, 1 lb. 25c, 4 lbs. 65c, peck 40c, bu. \$1.00, bbl. \$2.50.**

RURAL NEW YORKER No. 2.

Very large and smooth, with few and shallow eyes. In form, oblong, inclined to round. Skin and flesh white. Of good quality. The vines are very strong and the yield of handsome tubers, of great uniformity and size. Is unusually large. **Lb. 25c, 4 lbs. 65c, by mail; peck 40c, bu. \$1.00, bbl. \$2.50.**

BEAUTY OF HEBRON.

An early rapid growing variety. Skin smooth, slightly tinged with pink about the eyes. **Lb. 25c, 4 lbs. 65c, peck 40c, bu. \$1.00, bbl. \$2.50.**

EARLY ROSE.

Same price as beauty of Hebron.

EARLY ORIO.

One of the main extra early sorts, so well known that description is unnecessary. **Lb. 25c, 4 lbs. 65c, peck 40c, bu. \$1.00, bbl. \$2.50.**

✍ Write for Large Quantities in Season.

Everitt's "Perfection" Broadcast Seed Sowers

...For Sowing Wheat, Oats, Rye, Rice, Flax, Grass Seed, Clover Seed, etc....

In fact, any kind of Seed Broadcast. No careful, economical farmer will continue to sow his seed by hand (the old style) when he can get one of these machines at our reduced prices

They will save their cost almost daily in saving of seed, to say nothing about saving of time and more even distribution, which will have a great effect on the crop.

THEY WILL SOW FROM 4 TO 8 ACRES PER HOUR AT A COMMON WALKING GAIT.

Price of this Machine Reduced from \$5.00 to \$1.50 Each.

These machines, when first invented, sold for \$15.00 each. Valuable labor-saving seed-saving, crop-increasing machines. The seed is not thrown upward, but distributed right and left evenly, and will save at least one-third the seed used in hand-sowing. They are operated by a transverse motion of the bow, or a crank which revolves the distributor and works the vibrator rapidly. *It is the only seed sower having a satisfactory vibrator which prevents the seed from clogging.* They are quickly adjusted to sow any quantity desired. The grain sack holds one bushel, made strong, well finished and weighs about four pounds. It will last many years. At a round will sow wheat 50 feet, buckwheat 48 feet, flax-seed 36 feet, grass seeds from 27 to 36 feet. These are the best machines ever invented for the purpose, and should be in the hands of every farmer. **SATISFACTION GUARANTEED.**

This Crank Seeder will be preferred by some. It is the same as the other, except the gear. We guarantee either one to give entire satisfaction. Price reduced from \$6.00 to \$2.00.

PRICE—We have reduced the price of each machine 50c. this year.

Bow Seeder, Each, \$1.50

Crank Seeder, Each, \$2.00

Agents Wanted. See below. For 25c. each, extra, we will pay expressage to any point west of Pittsburg, east of the Mississippi, and north of Tennessee. To more distant points add 25c. more.

A GOOD BUSINESS

Have you some spare time? You can turn it into money by selling our Perfection Broadcast Hand Seed Sowers. No risk. We guarantee these machines. They are light, and can be carried or hauled from house to house. Nearly every person will buy them when they see them. We have no confidential terms. Any person can engage in this business. The only condition is you must order a certain number, to show that you are buying to sell again.

Bow Seeder. Retail Price, \$1.50. We sell them to you by the dozen, half-dozen or one-third dozen at \$10.00 per dozen. This is \$2.00 per dozen lower than we ever sold them before.

Crank Seeder. Retail Price, \$2.00. We sell them to you by the dozen, half-dozen or one-third dozen at \$12.00 per dozen. This is \$3.00 per dozen lower than we ever sold them at before.

Don't ask for special prices; these are bottom—and don't order less than one-third dozen at this rate. Some of our agents are making \$5.00 a day at this business. It is a remarkable fact that very few farmers have ever seen these machines. Yet they are so necessary in sowing all kinds of seed broadcast, that once they see and try one, they could not be induced to part with them. *They will save about one third the seed over hand sowing, save half your time, make your work easier and distribute the seed evenly, thus greatly increasing the crop.*

Address all orders for **EVERITT'S PERFECTION BROADCAST SEED SOWERS**—the best sower made—to **J. A. EVERITT, Seedsman, Sole Manufacturer, Indianapolis, Ind.**

RUSSELL'S WONDER APPLE.

This wonderful, most beautiful and prolific apple is a seedling grown in Hamilton county, Ind., and about as hardy as the native timber of that locality. The tree resembles the Rambeau in appearance but is much stronger, and will not break nor split under the heaviest loads of fruit. The apples are oblong, the size of Ben Davis, yellow with beautiful red stripes, and strange to relate, grow from one to seven apples on a single stem as shown in the picture, with one main core in the center and an undeveloped core in each individual attached apple. They are not subject to worms and scab like other varieties. It ripens a little later than Rambeau and will keep until near Christmas. It is the sweetest perfumed and richest flavored apple in the world, and is the best for both eating and culinary purposes of all, requiring no sugar. It sells in any market on sight at your own price.

The supply is limited to 400 yearling trees this year, and 100 fine two-year-old trees. They are all grafted on seedling roots obtained in Iowa from the very hardiest stock and will stand any climate.

Read the following **TESTIMONIALS** from citizens of Hamilton county, Ind.:

I regard the "Russell Wonder" as the most prolific and beautiful apple I have ever seen as well as the best eating and cooking apple.

It can't be beat in any point.

GEO. BRADLEY.

It is the greatest curiosity and best apple I have ever seen.

LEANDER SHELBURN.

There is nothing in apples to compare with it in beauty or excellence.

CHARLES FITCH.

It is beyond doubt the King of Indiana fruit.

F. D. BOWERS.

Price—One-year trees by mail \$1.50, two for \$2.75, three for \$4.00, or if sent by express the same price and we will send larger trees. Two-year trees, by express only, are \$2.00 each.

UNIVERSAL POWDER DISTRIBUTOR

WE will not contend that there are "No new things under the sun," but we do know there are new ways of doing old things and here is one of the big little things that will be welcomed by all farmers, gardeners, truckers and florists, who must fight insects, blight and fungi to save their crops. It is constructed so as to make the distribution of all powders the *easiest, quickest and most effective.*

The machine can be readily understood by the illustration with the following explanations: It consists of a receptacle for the powder with perforated bottom, attached to a handle and hinged as shown. In operation an upward swing of the machine has the effect of tipping the can up at the bottom and down at the top until its movement is arrested by the block on the handle. (See white line around can). The stoppage is very sudden and the effect is, all the powder is thrown away from the perforated bottom toward the top of the can. Immediately following this movement, and of its own accord, the can reverses and drops back into its natural position, stopping very suddenly as it strikes the lower end of the handle. The result is, the powder is discharged in the most effective manner, spreading well over the plants. The agitation of the powder in the can prevents it from packing on the bottom, and if any coarse particles are contained they do not materially interfere with the discharge of the fine particles until all is used.

In ease of operation, saving of time, economy of material and thorough distribution, the UNIVERSAL POWDER DISTRIBUTOR excels any other machine ever offered for distributing all insecticides in powdered form.

For these reasons it appeals to the good common sense of everybody. The only questions you need decide are: Will I select the easiest way to do my work? Will I do a given job in one half the time? Will I save half the material heretofore used? Will I improve my crops by more thorough work?

With the UNIVERSAL POWDER DISTRIBUTOR the work on potatoes and similar crops is done as rapidly as the operator walks. To illustrate, if you can make the movements with your hand as rapidly as you step, this machine is easy enough, it is evident how rapidly the work can be done.

This machine is not intended to do away with our Electric (Liquid) Bug exterminator, as we always recommend that machine where liquids can be used. Some people, however, prefer to use dry material, and on every farm are some crops that must be treated dry, like cabbage for cabbage worms, vine crops for the striped bugs which cannot be poisoned with Paris Green. Vine crops can be saved by applying air slaked lime, ashes, or even road dust with the Universal Powder Distributor, which drives them away. The article listed below, "Black Death," is highly recommended for vine crops.

Knowing the great advantages that this little machine possesses we strongly urge its use by all who raise crops that are preyed upon by bugs, worms, fungi, etc. The cost is so trifling as not to be considered against the saving of time, labor, material and crops it will make. Price only 50 cents each. For 25 cents more we will deliver to any express office.

AGENTS WANTED. This being a Universal Powder Distributor its sale will also be universal. They should sell to everybody. Price to Agents, \$3.00 per dozen.

Address, J. A. EVERITT, Seedsman,
Inventor and Manufacturer, Indianapolis, Indiana.

BLACK DEATH.

AN absolute annihilator of all insects, bugs or beetles that prey on vegetation. Positively kills Potato Bugs, Squash Bugs, Pumpkin Bugs, Water Melon Bugs, Currant Worms, Cabbage Worms, etc. It will kill all kinds of creeping things that eat the leaves of vegetables or plants.

What is "BLACK DEATH?" It is an inexpensive dark gray powder as fine as flour and extremely diffusible, and completely covers with a fine dust all plants over which it is sprinkled. While powerful in its effects, it will not injure the plant or the leaves in the slightest degree, and it is perfectly harmless to the person handling it.

"BLACK DEATH" is the best and cheapest Insecticide, or Bug Killer, on the market.

A GOOD CROP OF POTATOES,

Cabbage, or any other vegetables can not be obtained, no matter how good your soil and seed may be, or how favorable the weather, or how much care and labor you expend on them, unless the vines and leaves are kept vigorous and healthy. Such a condition can not be kept up unless all insects or bugs

are destroyed as fast as they appear. The reason is obvious: Plants and fruit trees breathe through their leaves, and the leaves are as essential to the development of the plant or tree as are the roots. Any cause that injures the leaves hurts the plant, and that which destroys the foliage destroys the root also. Therefore, it is necessary that the vines and trees be kept growing and free from the ravages of insects and bugs.

It will soon lead for killing bugs.
 G. N. WAITE, West Valley, N. Y.

It is the best bug poison on the market.
 Wm. McCONRICK, Wayland, N. Y.

It proved satisfactory. Ship me a ton at once.
 FRED. H. BOOTH, Walpole, N. H.

A decided success.
 J. M. PICKERING,
 Union Home, Mich.

Tried it on pumpkin bugs with good results. Send me half a ton.
 D. B. ROTHROD, Bridgeville, N. Y.

Price \$1.00 per 100 lbs., \$20.00 per ton.
 Agents Wanted and the Trade Supplied.

J. A. EVERITT, Indianapolis, Ind.

We have a little extra space here that we thought could not be used to better advantage than to give our readers a few more reports on the Six Weeks Market Potato. We don't give complete address, because this would direct trade from us to our customers. These Potatoes come so early and bring such good prices, that it is seldom the crop is saved for seed.

X X X

The Early Six-Weeks Market Potato was the best for yield and the earliest I had this season. They are one to two weeks earlier than the Early Ohio.

N. NYEDAN, Marion Co., Ind.

Planted the Early Six-Weeks Market Potato May 3. They grew fine and we had new potatoes cooked June 20. They are the earliest we ever saw.

DANIEL DONOVAN, Carroll Co., Tenn.

Those Six-Weeks Market Potatoes were true to your statement. In just six weeks from planting dug good sized potatoes.

E. W. ANTHONY, Houghton Co., Mich.

Illustration of a Crop 43 Days from Planting.

I send you to-day by freight the product of forty hills of Six-Weeks Potatoes. They were dug last night and this morning, and grew in forty-three days. They were grown from one-eyed seed. I have just begun farming on my own land, and am not fixed yet for pushing a crop of early Potatoes. These were covered with a breaking plow and given very ordinary treatment. Think I can beat it next season. Several people who saw them were astonished. I expect to exhibit at our county fair. JOHN L. SAUM, Paulding Co., O.

Out of seventeen kinds of potatoes planted, your Early Six-Weeks Market were superior to all in quality, size and earliness. I really think they are the best potato on earth. C. CARROLL, Pipestone Co., Minn.

Twenty hills of Early Six-Weeks Market Potatoes yielded a heaped bushel. They bear out your claims for earliness, quality and productiveness.

EMIL LAUBENCE, Worcester Co., Mass.

We have got it this time—I mean the best early and the earliest potato in existence. We had the early Six-Weeks Market Potato large enough for the table in six weeks from planting. They outyielded all our other varieties. AUGUST BROEKNER (Gardener), Allegan Co., Mich.

\$10 per bushel would not buy my Early Six-Weeks Market Potatoes if I could not replace them for less. They are the earliest of all, and a heavy yielder. I predict they will be universally grown by market gardeners for early. JACOB B. STILLSON, Onondaga Co., N. Y.

My Early Six-Weeks Market Potatoes have proved to be as early as you represented them, and a fine yielder; sound, smooth and best quality. They are very valuable. C. E. WARD, Sullivan Co., Ind.

I am well pleased with the Six-Weeks Potato. If I was gardening I would surely buy seeds of you. P. E. GENOWRY, Mo.

The Early Six-Weeks did fine, and were fit to use two weeks before the Early Ohio. W. A. TROR, Highland Co., O.

X X X YOU'VE WANTED IT A THOUSAND TIMES X X X

The EUREKA KITCHEN GARDEN and HOT BED SEED DRILL.

It will sow and cover Beets, Cabbage, Carrots, Celery, Lettuce, Onions, Radishes, Spinach, Turnips and all such seeds with the greatest regularity. The quality of work equals that done with the costly machines and is infinitely better and faster than hand work.

HAVE YOU A KITCHEN GARDEN ?

Don't try to do without this little planter another season. Your garden will smile approbation all through the season if you use the EUREKA.

HAVE YOU A HOT BED ?

This drill you must have. It is the only machine suited to sow in a hot bed. Sows up close to the sides in straight rows. Sows the smallest packet of seeds as well as a large bulk. This Drill is not a toy, but a strong practicable machine that will last many years. Don't buy a similar machine, that has the opening plow in front of the machine. You can not get near the sides of a hot bed nor close up to the fence. Neither does it cover the seed. It will be an aggravation rather than a labor-saving machine, as we offer.

By using this Drill you save seed, you save time, you stand in an upright position, the work is easy, you get a better stand, you get better plants

Price is only \$1.00. Delivered by express, 50 cents extra. Wholesale price \$6.00 per dozen.

LITTLE DEMONS THAT DESTROY OUR CROPS

Good bye! ye bugs, ye crawling devils,
Who oft have brought us many evils;
Your absence now may give some room
For better things, in years to come.

A HIGH AUTHORITY ESTIMATES THAT \$300,000,000 WORTH OF CROPS ARE DESTROYED IN THE UNITED STATES EACH YEAR BY BUGS, WORMS AND FUNGI. Only a small part of this would occur if some safe, cheap and simple machine was available to apply the remedies.

WE HAVE IT.

The **ELECTRIC Bug Exterminator** does it. ☘

Will you sit idly by, while miriads of insects destroy what has cost so much to produce. The

ELECTRIC BUG EXTERMINATOR

will save your crops. It is the simplest, yet the most effective machine made for the purpose. All other machines have their drawbacks; *this is perfection*. You can not begin to realize its value until you use it. Weighs only 1 lb., and only 2 lbs. more when filled ready for use. Only 1 quart of liquid is used at a time, which does the work of 20 gallons as applied with the best of other machines.

Why wear your life out dragging a load of poison around in the hot sun? The poison preparation, in liquid form, is expelled with great force and in a mist so fine it can scarcely be seen. It reaches every part of the plant, and as the application is so evenly distributed and so light, there is no danger of injuring the most delicate plant. *This is a great advantage, as oftentimes crops are ruined by burning the tops.*

❖ ❖ Do You Like a Pleasant and Easy Way to Do a Hard and Disagreeable Job? ❖ ❖

The **Electric Bug Exterminator** comes to your relief. You can poison an acre of potatoes in 2 hours and use only 6 pints of water and a trifle of poison. Impossible, you say? No, its a fact, and other work can be done in the same proportion. Throw away the laborious, wasteful sprayers. The **Electric Bug Exterminator** lightens the labor. Can be used in a hundred ways and it will save hundreds of dollars on any farm, because it is *so simple, light and handy, its no trouble to use it*. No mixing of poison in a separate vessel. You put it right in the machine—it mixes itself. Its ready in a moment. You can drop it any where and any way and it will not spill out. **It can not poison the stock if carelessly left lying around.** Perfection for destroying bugs, worms and fungi on crops of all kinds; spraying Fly Fuma on cows, etc., to drive away lice, flees and flies; sprinkling clothes, spraying hen roosts, whitewashing fences and out-buildings, in the greenhouse; in fact, useful in ways too numerous to mention.

Hard Work,
Much Waste,
Small Crops.
The Old Way.

Don't put off getting a machine until your crop is half ruined. Get it early and kill the old bugs. The work is then half done. It will save you more money than any other machine on the place and costs the least.

CAUTION—The **Electric Bug Exterminator** is patented. It is the only perfect constructions and can not be equaled without infringement. We will esteem it a great favor for information of any machines being offered similar to ours.

PRICE—Tin Machine only 75c delivered to any express office. Brass Machine only \$1.25 delivered.

AGENTS WANTED—They sell to beat everything. Tens of thousands wanted this year. Order at once. Wholesale price, tin, 1/4 doz. \$2.25;

per doz. \$4.00. Brass, 1/4 doz. \$4.00, per doz. \$7.50.

J. A. EVERITT, SEEDSMAN,
Inventor and Manufacturer, Indianapolis, Ind.

(60)

The New Way

Read these Reports from users of the Electric Bug Ex-terminator and be convinced that it is the Greatest Machine for the purpose on Earth and a Great Money-maker for Agents.

The sample Electric Bug Exterminator received and sold. I herewith order some more, and want exclusive agency here.

I sent a friend over into Thos. FIREBAUGH, Ogden, Ill. Schuykhill Co., and he sold 22 Exterminators in two days. The machines speak for themselves.

CHAS. J. CHRISTMAN,
Strausstown, Berks Co., Pa.

If your present business earns you less than \$3.00 to \$5.00 per day, take an agency for the E. B. Ex., and excel this amount.

ON SMALL FRUITS Sample you sent of your Electric Bug Exterminator arrived O. K. Please ship me 1 doz. at once. It is just the thing I wanted. They will sell, C. A. SMITH, Oakley, Kansas.

I have tried the Exterminator and find it O. K. You may send me 1/2 doz. more by first express.

E. VICTOR, Fort Branch, Ind. I received the Electric Bug Exterminator a few days ago. I had one acre of potatoes alive with bugs. The machine worked with perfect success. It took me about two hours; used less than a pail of water and 1/2 lb. of Paris Green. Not a single bug can be found now. I think I can sell a great many. Please send me terms to agents and circulars. J. L. MOORE, Valley Hill, Ky.

The Bug Exterminator is immense—far ahead of my expectations. M. L. MOREHOUSE, Florist, Hillsboro, Ill. Result, death to bugs. JOHN Q. SELBY, Glenelg, Md. Your Electric Bug Exterminator received, and it is one of the greatest inventions of the age. It works so easy and with such rapidity. I sold three this afternoon and know I can sell many more.

Mrs. ROBERT SAMUEL,
Poplar Plains, Ky.

I received the Bug Exterminator and am well pleased with it. I am 60 years old and treated 12 acres of potatoes in 3 1/2 days, taking my time to it. It beats the best \$50.00 cart sprayer I ever saw.

ON SMALL TREES
JNO. H. REYNOLDS, Wagners Landing, Ill.

An agent wanted in every locality to sell this, the most saleable article in the country.

Result: killed the worms. I think the Electric Bug Exterminator fine for vegetables and small plants.

Used on Potatoes with Paris Green in liquid form, and the results were of the very best.

W. J. SMITH, Smithdale, Ohio. Used on potatoes, currants, gooseberries, etc., by myself and others, with results everything that could be desired.

G. B. CLARK, Remington, Ind. Used on potatoes, pickles and melons, with the very best results and almost no labor. There can be no better sprayer than yours for small plants.

G. A. SCHNER, Bremen, Ind. The Electric Bug Exterminator obtained of you is worth its weight in gold.

IN THE POTATO FIELD. W. S. ALLEN, Milledgeville, O. Used on potatoes and cucumbers; results good. The machine is superior to any other I have ever tried.

G. HAZLEWOOD, Chambersburg, Ind.

Used on potatoes, currants and gooseberries; results, killed the bugs and worms. AARON SHAEFFER, Alma, Ill.

Dear Sir:—You will find enclosed \$1.25, for which please send me another Bug Exterminator. I loaned mine to another party; they liked it so well they had me send and get one for them. I have used mine and think it a grand thing. It is just what it is claimed to be.

MRS. W. SIMPSON,
Rosemond, Ill.

I want to arrange with you to travel over the State of Michigan and place the wonderful Electric Bug Exterminator in every responsible hardware dealer's hands. I think they are wonderful machines. Some farmers here drove 10 miles to get them. J. E. SPEICHER, Bloomington, Mich.

IN THE GREENHOUSE Secure an agency NOW for the Electric Bug Exterminator. After a few of these machines are sold in a neighborhood, dozens of applications come for agencies. Everybody wants to be an agent when they see how readily they sell.

My wife says it will justify any family to purchase one of your air guns for spraying clothes for ironing purposes. W. J. KNOX, Dillon, Tenn.

Your sprayer is the finest thing I ever saw in the line of sprayers. I have tested it on potato bugs, and it gets away with them the quickest of anything I ever saw. I would not take \$10 for my machine and do without it.

CHASING THE FLIES.

NEWTON GOLDMAN, Griggsville, Pike Co., Ill.

Used on potatoes and currants with very good results.

C. L. BURNELL, Forestville, Conn.

I have 20 acres of truck, and have used the machine with results never better in any respect.

W. C. HIRTE, Carmi, Ill.

Result, death to insects. CARL TABER, Plum Hill, Ill. Used on potatoes and trees. It did the work well. The machine is all right. W. D. VAN ARNUM, Walnut, Ill.

Results good. It is all you claim for it—better than the old way. JOHN C. BETTS, Mt. Washington, Ohio.

Result: It killed the bugs at once. The man did six acres of potatoes in one day. I have two other kinds of spraying machines which cost \$12 for the two of them, and I would not give your machine for both of them.—It is the best machine of its kind. It does its work and no fail.

WM. PENN WALTER,
Newton, Kan.

IN THE CHICKEN HOUSE Results good; the best I ever saw. I would not take \$10 for machine if I could not get another like it.

BARNARD LIPPS, Ellettsville, Ind.

Results good; they are all that you claim.

C. DEYOUNG, Crystal, Mich.

The machine is all right. HESTER & SON, Harrison, Neb. Result good. JOHN A. HARMON, Beach Haven, Pa.

10,000 people can engage in the sale of the Electric Bug Exterminator, thus reducing the army of unemployed, benefiting their communities and earn as good wages as any county officer of their acquaintance.

more than a spoonful is left. This result can not be accomplished by any other machine without infringing on our patent. When you buy a machine select one that does complete work, and avoid disappointment.

Everitt's Man-Weight

Plow, Hoe, Cultivator, Drill, Etc., Single and Double Wheel.

WILL REVOLUTIONIZE HAND-POWER CULTIVATION. MAKES KEEPING A HORSE AN UNNECESSARY EXPENSE IN MANY CASES.

This new invention is a great boon to all cultivators of the soil, and must be classed with the great inventions of the age. Yet it is so simple that the natural question with every one is, "Why did I not think of that?" And so nicely does it fill a want existing with thousands of gardeners, nurserymen, seedmen, florists and farmers, that after the first trial they invariably conclude to "never do without it." The Man-Weight Cultivator

Is Worth its Weight in Silver,

if not in gold, to anyone who uses man-power in cultivating the soil. All who have used the machine unanimously endorse it in the strongest language they know how to use. We have heard sensible, shrewd gardeners remark: "I would not sell it for \$25," "\$100 would not tempt me to do without it one season," etc. A nurseryman who has a large area under cultivation, and uses hand tools extensively, says: "I can save \$1,000 a year in hand hire by the greatly increased work my men do with these machines, and make an extra \$1,000 by superior work it does and my ability to do it rapidly, and often at just the times needed." It is the only machine we know of that suggests sufficient merit and practical utility at first sight to sell without a trial. The first gardener who saw this machine at Indianapolis gave his order for the first one we would make. Other gardeners at once acknowledge that it is "just what we want," and many remark that "if all gardeners knew of this machine, they could not be made fast enough to supply the demand." A trial by any person will demonstrate the wonderful utility of the machines, and the person possessing them will make it impossible for his neighbor to compete with him in raising crops.

Gardeners need them for every crop they raise, and many times no horse will be required, except to first break the ground. Will do all kinds of work as well as with a hoe, and many times as fast, with greatest ease. All weeds can be removed between the rows and between the plants in the row. Your choicest plants are not destroyed by the horse tramping them, as with other machines.

Farmers will have no further use for hoes. All grass and weeds can be removed from all sides of the plants and the ground thoroughly loosened without the aid of a horse, while plants are small, doing far better work than could be accomplished with a horse. Every farmer needs a machine.

Nurserymen can quickly and thoroughly work their ground, doing the work often and just at the right times.

Small Fruit Growers will find them indispensable.

Notice the Complete Work done with a Man-Weight. No hoeing required after the Man-Weight is used.

Tobacco Growers can save their cost on every acre cultivated. No horse is needed except to first break and pulverize the ground. All after work can be done with these tools, even dispensing with hoes entirely. Three acres can be gone over easily in a day, taking out all grass and weeds between the rows and between the plants in the rows.

Small Farmers

There are many thousand small farmers in the country having from one to 20 acres of land, who can cultivate their crops without the aid of a horse, thus saving the expense of keeping one. Also in certain crops they can make one acre produce as much as two when cultivated with the Man-Weight horse power.

Showing some of the Man-Weight combinations. When you buy a Man-Weight you get many machines in one.

Onion Growers Here is a machine such as you might have pictured in your imagination, but now you have it in fact.

THEY WILL SAVE THEIR COST

Many times over every year in saving of hand hire, in closer planting, in rapid work, in superior work, in larger crops, in earlier crops, in crops of better quality, in freeing the soil of grass and weeds, in the crops that can be raised on the margins of the fields, which are usually left vacant for the horse to turn around: in short, they can be made the best paying tools on the farm. The wheels are 13 inches high, insuring an easy movement over ground moderately smooth. The machines are very light and are moved easily over very sandy ground.

Single-Wheel Cultivator This tool is intended to mark out, cover and pulverize, and to cultivate, hoe or plow on one side of a row at a time. It is capable of doing a great variety of work that will suggest itself to every one who possesses it. It is strong, durable and well made throughout; all iron and steel except the tips of the handles and the propelling bar, from the rear of wheels back. With 5 sets of tools. Price, \$6.

Combined Single and Double-Wheel Cultivator

Besides the single-wheel machine which this combination comprises, it is also intended to straddle the row and cultivate, hoe or plow both sides at once. For this purpose it is a wonderful improvement over all other machines constructed for this purpose. All other man-power tools heretofore constructed did not admit of adjustability, as required as the work proceeded, but if the rows were crooked, or the plants scattering, it would destroy them; also with them you could do only partial work, requiring after hoeing to cut out the weeds between the hills in the row. Our machine admits of perfect adjustability; every inch of surface can be stirred between the rows and between the plants in the row. Every cultivator of the soil will appreciate this. All iron and steel except propelling bar and tips of handles. With 5 sets of tools. Price, \$8.00.

Man-Weight Drill A drill that will plant seeds just as desired is a most important machine for every farmer

ener and trucker. Our Drill is capable of the greatest variety of work, from sowing in a continuous row to planting in hills 3, 6, 12, 24 and 48 inches apart. It plants Beans, Corn, Onions and all seeds large and small. Price, \$8.00.

Combined Cultivator and Drill This is the same as our Combined Single and Double-Wheel Cultivator, with the Drill attachment. Price, \$12.00.

⇒ TESTIMONIALS. ⇐

Read these carefully. Ponder on them, and you will decide that it is economy to invest in a **Man-Weight Combination**. Saves time, labor, and increases production. Three items, each of which are money in your pocket.

I am 63 years old, and have been a farmer all my life, and the opinion I have formed of the Man-Weight Cultivator is, that it is ahead of anything that I ever saw yet. I have shown it to some of my neighbors and they all express a very favorable opinion of it, especially those interested in raising onions. I think there will be a great demand for them. Wm. F. WINT, Hudson, Mich.

Your Man-Weight Cultivator is a great success. A grand triumph. J. S. FLOYD, Walthalla, S. C.

Having purchased one of your Man-Weight Garden Plows last spring and used it during the season, I am glad to recommend it to brother market gardeners and others to be all that you claim for it. One man can do more with it than a dozen with hoes, and it does away with the use of hoes in many cases. For instance, I did not use a hoe at all on my cabbage patch, but kept it clean with the plow. I cannot afford to take \$100 for it and do without it. CHAS. BICKFORD, Eddyville, Iowa.

I would not take \$100 for my Man-Weight if I could not get another for less.

F. R. WIENENMILLER, Riverside, Cal.

Your Man-Weight is the greatest and best tool for cultivating the ground that I ever saw.

S. V. VEST, Houston, Minn.

I have been using the hand push cultivators, but the Man-Weight is far ahead of them.

H. A. SIMMONS, P. M., Clinton, Mich.

Truly superior in its class and a curiosity in my neighborhood.

F. M. MEYERS, West Salem, Ohio.

I had a Planet Jr. before I went to the World's Fair. After seeing your Man-Weight I traded it off and bought yours, which is worth a dozen of the Planets.

W. D. DELONG, Galesburg, Ill.

I would not exchange my Man-Weight machine for any other I have ever seen. I have used the Planet Jr. for several years, and know the Keeley and some others. The Man-Weight has higher wheels, and those who have used mine like it best of all.

NOAH HODGES, College View, Neb.

I am thankful for the Man-Weight machine that I got from you last year. It is all you claim for it. I would not do without it for any price. Some of my neighbors say they want one this spring.

R. M. ADAMS, Dry Ridge, Ky.

We would not do without the machine for double what it cost us.

J. C. COPELAND, Liberty Mills, Ind.

Man vs. Horse Power.

American Agriculturist.

The leading tendency for many years has been to supplant man power by horse power, but wherever the use of horses is not feasible it becomes of the utmost importance to utilize man power to the best advantage. This is accomplished in a remarkable degree in **Everitt's Man-Weight Hoe and Cultivator**. This implement, which is manufactured with single and double wheels, will prove a great boon to all cultivators of the soil, as it accomplishes its work in the most perfect manner not only, but does so with the least possible outlay of strength on the part of the workers.

A Grand Machine.

Christian Cycnourse.

Actual experience with garden cultivators warrants the commendation of **Everitt's Man-Weight Cultivator**. Everybody should have this grand machine, whether gardener or farmer.

Everitt's Man-Weight Cultivator.

Farm, Field and Stockman.

Five weeks ago we called attention to this new garden tool; speaking of its advantages over the ordinary garden wheel hoes. We now have the opportunity of pre-

senting our readers an illustration of it, which will convey a better idea of its workings than word description.

With **Man-Weight Cultivators** cultivating and hoeing can be done with one operation much better and quicker than with horse power and hand hoeing. As it is adjustable, it allows complete work at one operation, cultivating or hoeing as close as desired. It is particularly valuable for thinning plant in the row and removing weeds in the row. They are manufactured by J. A. A. Everitt, Seedsman, Indianapolis, Ind., and advertised in this paper.

Everitt's Man-Weight Cultivator.

Prairie Farmer.

It is not a holiday fun to push for hours at a time any one of the many excellent garden hoes or cultivators now manufactured; yet they are such a great improvement over the old style hoe, that nothing would induce anyone to go back to the old plan.

It will, however, be welcome news to all who cultivate the soil to hear that their time of deliverance has arrived, and that with **Everitt's Man-Weight Cultivator** all this work, and much that has never been attempted with the hand-push machines, can be done almost without work.

While this new machine was primarily intended for gardeners, nurserymen and truckers, or those who use the old style hand machines, the great power obtained by means of the body push will make it available for general farmers in doing much of the work heretofore done with a horse machine and supplemented with a hoe.

With the **Man-Weight Cultivator** cultivation and hoeing can be done with one operation much better and quicker than with horse power and hand hoeing, while gardeners and others, who have been using the old style hand tools, which at best only do partial work, will not be slow to appreciate the advantages of this machine, as its perfect adjustability allows complete work at one operation, cultivating or hoeing as close as desired. It is particularly valuable for thinning plants in the row and removing weeds in the row, work that cannot be done with any other cultivator, doing infinitely better and many times as fast. The slow, laborious, disagreeable labor with the old style hand push machines is made rapid, easy and pleasant. Hoes will not be needed at all.

We regret that we have not more space to tell about these greatest machines, but send for complete Catalogue, free, and don't take one of the old style hand-push machines as a gift before you have thoroughly investigated the **Man-Weight**. If time is money with you, or ease of doing your work an object, you better pay \$25 for an **Up-to-Date Man-Weight Outfit** than work with the old style machines as a gift. Don't let this season, when good up-to-date work promises to pay handsomely, pass without the benefits that are certain to be derived from the possession of a **Man-Weight Machine**.

J. A. EVERITT, Seedsman, Inventor and Manufacturer.

Mammoth White French Artichokes.

The losses to farmers from hog cholera alone, every year amount to millions of dollars. The most certain preventative, and at the same time the least expensive, while it furnishes a wholesome and valuable food, is a crop of our Mammoth White French Artichokes.

No farmer who raises hogs should let another year pass without providing a patch. They surely prevent cholera, and in this way are worth millions of dollars. A couple of dollars invested in Artichoke seed may save many farmers from bankruptcy.

G. W. Lupkins & Sons, Boone Co., Ind., say: "We have not lost a hog by cholera since we raised Artichokes, while it has carried many off all around us. You can not recommend the Mammoth White French Artichokes too highly as a hog food and cholera preventative."

Robt. Ridgeway, Miami Co., Ind., says: "I have grown Artichokes for years and would not think of discontinuing them while I raise hogs. They are a great preventative of cholera."

Every evidence is in favor of this crop as a cholera preventative. The wonderful productiveness and ease with which these Artichokes can be produced is always a surprise to those who cultivate them for the first time. They are an excellent food for cattle, sheep and horses, and the cheapest and healthiest hog food known, 1 acre being equal to 2 acres of corn for building up large, healthy frames with plenty of bone and muscle. They not only grow rapidly, but fatten on them, only requiring corn for a short time in the finishing process. The hogs harvest them themselves, thus saving all expense, even that of feeding. Freezing and thawing does not injure them, and the hogs will feed themselves until late in the spring, when grass has come, except when the ground is frozen solid. We have never known hogs fed on Artichokes to die with cholera, while herds around them died by the score. No farmer can do better than to plant a piece of ground to Artichokes without delay. On good corn land they produce 600 to 1,000 bus. per acre, and do not fail in dry seasons. They delight in a moist, rich soil. Ground too wet for general farm crops will produce immense crops. To destroy them, plow under when they have attained a foot in height. Plant in the fall or early in the spring, cut small like potatoes, 18 inches apart in rows 2 feet apart, 3 to 6 bus. on an acre. They make a full crop the first year. Each following year the field should be plowed in the spring. The plants will come up all over the surface and must be cultivated out and left stand in hills or the crop will be too thick.

PRICE—We have an enormous crop this year, the yield running 1,000 bus. per acre and more. We, therefore, sell them very low, so every farmer can devote a patch to this inexpensive, never failing valuable crop. By mail, post paid, 1 lb. 25c, 4 lbs. 60c. Freight or express, 1-4 bu. 40c, 1 bu. \$1.00, per bbl. of 3 bus. \$2.50, GREEN GLOBE ARTICHOKE—The flower head is the part used. Pkt. 5c, oz. 30c, 1-4 lb. 75c, 1 lb. \$2.25.

...AN...
UP-TO-DATE
PAPER
FOR
UP-TO-DATE
PEOPLE.

THIS Monthly Magazine, as its name implies, conveys to its subscribers descriptions of all the latest plans, methods, appliances and devices, and the newest and best

thoughts in the whole world of agriculture. The time has arrived, when, to be successful, farmers and gardeners must labor on a higher plane. They must do more thinking for themselves, and nothing induces better thought than the thoughts of others conveyed to them as a starting point.

Up-to-Date Farming and Gardening

Will cover Agriculture, Live Stock, Poultry, Gardening and Trucking, Floriculture, Horticulture, Household, Miscellaneous, Etc. All these branches of farming will be treated in the most up-to-date style. The amateur can learn, and the veteran can learn better, how to plant, cultivate, harvest and market his crops; select stock, feed and convert the animal or its product into marketable commodities. The uses of new machinery in the economical conduct of farm labor, will be thoroughly discussed. Special attention will be given to preventing waste on the farm through loss of manurial elements: from insects and fungi, drought, excessive moisture, etc. In short, this publication will cover the field and be all its name indicates.

Cut This Out

It entitles you to 25 per cent. off on Man-Weight Machines. The greatest Cultivators and Drills

ON EARTH.

Up-to-Date Farming and Gardening is printed on good paper, page 8 1/2 x 12 inches, and trimmed, making it as convenient as a book for reading and reference. For subscription price and valuable premium see next page.

Agents wanted to make up Clubs. Include a year's subscription or a Club in your Seed order. You can send subscriptions to J. A. EVERITT, Seedsman, Indianapolis, Ind.

ALL FREE Don't think we charge for the collection of seeds below. The price we ask is the regular subscription price of Up-to-Date Farming and Gardening. They are all given absolutely free as an offering of good will, and with the earnest desire to benefit our subscribers and to build up our circulation.

Up-To-Date FARMING AND GARDENING FREE SEED DISTRIBUTION 1899

OUR 1899

Free Seed Distribution consists of the following new, rare and valuable varieties of seeds. Illustrated also on this page.

1 PKT. THE GREAT PRE-HISTORIC CORN, discovered after being buried about 3,000 years. Most wonderful corn on earth.

1 PKT. NEW 4TH OF JULY OATS. The earliest oats in existence. Every farmer should get these oats.

1 PKT. THE GREAT KUTTAWA DWARF TREE TOMATO, the greatest novelty of the season. Holds its fruit up out of the ground like in illustration.

1 PKT. C W T CABBAGE. A real giant in cabbage. The largest variety in existence.

1 PKT. IMPROVED BANANA MUSK MELON. This true, genuine seed grows most delicious melons. The flavor equals that of Bartlett pears.

1 PKT. THANKSGIVING DAY PUMPKIN, the best pie pumpkin. Grows large, very thick meat, almost solid.

5 PKTS. BEAUTIFUL FLOWERS, our selections. We will send you varieties that will bloom all summer and give you much pleasure.

1899
Should be a prosperous year for you. It will be if you are up to date in your work and crops.

1899
Will be the best time to get some new seeds that will have a marked effect on your future crops. You can make the start now by subscribing for UP TO DATE FARMING AND GARDENING with this FREE SEED DISTRIBUTION.

1899
is the year when wise investments and extra efforts will be rewarded abundantly. Progress is onward, will you keep up with the procession or will you be content to bring up the rear with the slow, old, lumbering coach. Take a trip with us this year on the fast express U. T. D. F. & G. You will meet with people whose acquaintance it will pay you to make. You will see sights to please the eye and learn facts to satisfy your ambitions.

The subscription price to **Up-To-Date Farming and Gardening** is 50c a year, with Annual Free Seed Distribution. A club of 5, \$1.75; a club of 10, \$3.00, with the Seed Collection to all. *Make up a club and get yours free and make money.* Large clubs can easily be formed at each postoffice. The profit being 20c on each subscription.
