Making data discoverable

Project Summary

To use the peer-reviewed bioscientific literature as a primary resource for informing Wikidata and Wikipedia editors of relevant citation-supported facts.

Prepared by: Thomas Arrow (ContentMine)
Prepared for: Marti Johnson (Wikimedia Foundation)
Summary: WikiFactMine Project status update 2017-06-05

Project Goals

Making data work for you

- Goal A: Use dictionaries derived from Wikidata to index the daily literature
- Goal B: Create a feed of scientific facts in context with associated citations for Wikipedia and Wikidata editors
- Goal C: Promote a combination of the scientific literature, Wikidata and Wikipedia as powerful resources for the scientific community, build and support the community of editors who facilitate interlinking between these three resources.

Online

- FactoPost – Inspiration from WikiProjectX
 - New newsletter to be distributed by enWiki mass message
 - Initial list of ca. 50 Pages
 - Includes proposal identified Wikiprojects (that still exist)
 - Includes users who were commenters and interested parties on Grant Page
 - Also disseminated in the Wikidata weekly update
 - Also advertised on the WikiCite discuss Mailing List

Online

- Other Wiki Outreach
 - Technical Documentation on Wikidata WikiProject: SourceMetadata
 - Community guidance and bootstrapping on Wikidata WikiProject: Sources
- WiR Blog hosted at Moore Library
- Technical Documentation on GitHub
- Requested Phabricator Tag for technical tickets

In Person

- Conferences
 - Wikicite
 - EU Hackathon
 - Wikimania – Lecture, Stand, Workshop (pre-Wikimania)
- Meetups
 - Cambridge Wikimedians
- Training Sessions in Library
 - 3 Talks + Hands on Session
 - 1 Lecture
- Requested Phabricator Tag for technical tickets

Mid Term Report

Making data work for you

Next Steps

- Started the Page Template
- Made a Draft Learning Pattern
 - “Making the best tool for the job”
 - On the SourceMD/PMID/Bibliowikidata tool
- Feedback on Timeline / Blogs
