## REPORT OF THE CITY AUDITOR.

---

OFFICE OF THE CITY AUDITOR,  
January 18, 1922.

To the Honorable, the Mayor, and the Board of Aldermen of  
the City of Somerville.

Gentlemen: — In accordance with the requirements of Section 3 of Ordinance Number 44, I herewith submit a report of the expenditures and receipts during the year 1921, showing in detail the appropriations and expenditures, and the receipts from each source of income, also a statement of the funded debt and temporary loans together with a balance sheet showing the assets and liabilities at the close of the financial year.

It seems appropriate at this time to mention the financial condition of the city as regards funded debt.

The total funded debt on January 1, 1918, was \$1,757,500., a per capita debt of \$19.42. No five-year loans have been authorized since 1917 and the total amount borrowed on funded debt account for all purposes in the years 1918 to 1921 inclusive was \$140,000. During this period maturities amounting to \$894,000. were paid from tax levy, making a net reduction in the outstanding debt of \$754,000, or 42.9%. The total funded debt December 31, 1921 was \$1,003,500. or \$10.79 per capita.

This reduction of debt has, of course, a direct effect upon the borrowing capacity of the city. This has increased from \$242,121.85 on January 1, 1918 to \$1,156,063.28 on December 31, 1921.

Maturity obligations in 1918 were \$251,500. and interest charges on funded debt \$66,412.50. Corresponding figures for 1922 are, — maturities \$169,500. and interest charges \$38,731.25.

Respectfully submitted,

HOWARD E. WEMYSS,

*City Auditor.*

## REPORT OF THE TREASURER AND COLLECTOR OF TAXES

---

Somerville, Mass.,  
January 17, 1922.

To the Honorable, the Mayor and the Board of Aldermen of the  
City of Somerville:

Gentlemen :—

I herewith present the annual report of the City Treasurer  
and Collector of Taxes for the year 1921.

Respectfully submitted,

JOSEPH S. PIKE,

*City Treasurer and Collector of Taxes.*

**REPORT OF THE SCHOOL COMMITTEE.  
CITY OF SOMERVILLE.**

---

School Committee Rooms, December 23, 1921.

Ordered, that the annual report of the Superintendent be adopted as the annual report of the Board of School Committee, it being understood that such adoption does not commit the Board to the opinions or recommendations made therein; that it be incorporated in the reports of the City Officers; and that 1,000 copies be printed separately.

CHARLES S. CLARK,

*Secretary of School Board.*

## SCHOOL COMMITTEE, 1921.

HERBERT CHOLERTON . . . . . Chairman  
 WALTER I. CHAPMAN . . . . . Vice-Chairman

## Members.

## EX-OFFICIIS.

CHARLES W. ELDRIDGE, Mayor, . . . . . 47 Highland road.  
 RICHARD L. RICE, President Board of Aldermen, 296½ Broadway.

## WARD ONE.

FRANCIS J. FITZPATRICK, . . . . . 76 Broadway.  
 WILLIAM T. MCCARTHY, . . . . . 38 Pearl street.

## WARD TWO.

DANIEL H. BRADLEY, . . . . . 19 Concord avenue.  
 CHRISTOPHER J. MULDOON, . . . . . 88 Concord avenue.

## WARD THREE.

CHARLES W. BOYER, . . . . . 104 Summer street.  
 OSCAR W. CODDING, . . . . . 59 Vinal avenue.

## WARD FOUR.

FRANK M. HAWES, . . . . . 257 School street.  
 EDWARD I. TRIPP, . . . . . 21 Wigglesworth street.

## WARD FIVE.

HARRY M. STOODLEY, . . . . . 283 Highland avenue.  
 MISS MINNIE S. TURNER, . . . . . 64 Hudson street.

## WARD SIX.

WALTER I. CHAPMAN, . . . . . 18-A Central street.  
 WILLIAM M. MORRISON, . . . . . 97 Rogers avenue.

## WARD SEVEN.

HERBERT CHOLERTON, . . . . . 94 College avenue.  
 PAUL O. CURTIS, . . . . . 41 Mason street.

## Superintendent of Schools.

CHARLES S. CLARK.

Office: City Hall Annex, Highland avenue.

Residence: 75 Munroe street.

The Superintendent's office will be open on school days from 8 to 5; Saturdays, 8 to 10. His office hour is 4 o'clock on school days, and 8:30 on Saturdays.

## Superintendent's Office Force.

Mary A. Clark, 42 Highland avenue.

Mildred A. Merrill, 26 Cambria street.

H. Madeline Kodad, 104 Sharon street, West Medford.

Marion E. Marshall, 30 Gilman street.

Ruth O. Elliott, 4 Lincoln place.

Marguerite E. Flanagan, 10 Auburn avenue.

## Standing Committees, 1921.

NOTE.—The member first named is chairman.

District I. — Fitzpatrick, McCarthy, Muldoon.

PRESCOTT, HANSCOM, BENNETT.

District II. — Bradley, Muldoon, Coddling.

KNAPP, PERRY, BAXTER.

District III. — Boyer, Coddling, Fitzpatrick.

POPE, CUMMINGS.

District IV. — Tripp, Hawes, Miss Turner.

EDGERLY, GLINES.

District V. — Miss Turner, Stoodley, Hawes.

FORSTER, BINGHAM.

District VI. — Chapman, Morrison, Stoodley.

CARR, MORSE, PROCTOR, DURELL, BURNS, BROWN.

District VII. — Curtis, Cholerton, Morrison.

HIGHLAND, CUTLER, LINCOLN, LOWE.

High School. — Bradley, Hawes, Fitzpatrick, Coddling, Stoodley, Morrison, Cholerton.

Finance. — Stoodley, Coddling, Bradley, McCarthy, Tripp, Chapman, Cholerton, Eldridge, Rice.

Text-Books and Courses of Study. — Muldoon, Chapman, McCarthy, Boyer, Hawes, Turner, Curtis.

Industrial Education. — Tripp, Boyer, Fitzpatrick, Muldoon, Miss Turner, Morrison, Cholerton.

School Accommodations. — Coddling, Curtis, Fitzpatrick, Bradley, Tripp, Stoodley, Morrison, Eldridge, Rice.

Teachers. — Cholerton, Miss Turner, Muldoon, Coddling, Chapman.

Health, Physical Training and Athletics. — Morrison, McCarthy, Muldoon, Boyer, Tripp, Stoodley, Curtis.

Rules and Regulations. — Hawes, Curtis, McCarthy.

## REPORT OF THE SUPERINTENDENT OF SCHOOLS.

To the School Committee:—

Herewith is submitted the 50th annual report of the Superintendent of Schools upon the conditions of the public schools for the municipal year 1921.

With this report statistical tables are given which show facts concerning the attendance of pupils, expenditures for the support of the schools and other facts of interest to the citizens.

### Membership and Teachers.

The membership in the regular day schools in December was 14,223, an increase of 612 pupils over the corresponding time last year. The average membership for the school year ended June 30, 1921 was 13,396, an increase of 560 over the average membership of 1920. These numbers are the largest in the history of the schools. The present membership is 1056 greater than the membership two years ago at this time. The distribution of the present membership among the large divisions of the school system and a comparison of this year's conditions with the corresponding ones a year ago are shown in the following statement:

#### Membership.

		High	Junior High	Elementary including Kindergartens	Vo-cational	Total	Increase
December .....	1921	1966	3367	8766	124	14,223	612
December .....	1920	1692	3168	8630	121	13,611	

#### Teachers.

(including masters but not supervisors or special teachers.)

		High	Junior High	Elementary including Kindergartens	Vo-cational	Total	Increase
December .....	1921	72	115	224	10	421	8
December .....	1920	65	112	226	10	413	

During the year 36 teachers were elected and assigned as follows: High School 8, Junior High Schools 10, Elementary Schools 16, Continuation School 1, and an assistant physical director. 31 teachers resigned,—11 to be married, 17 to accept

better paying positions, of whom 4 were from the High School, 9 from the Junior High Schools, 2 from the elementary schools, and 2 cadets. Two teachers were promoted from Junior High School to Senior High School, 3 from assistant to principal kindergarten teacher. There were two deaths and five retirements. The large number of teachers who left our schools for better positions elsewhere is cause both for concern and for satisfaction. It is a cause for concern in that the schools have lost the services of these teachers and the work of the schools has been interrupted by consequent changes. It is a cause for satisfaction to the extent that other cities have recognized these Somerville teachers as superior and desirable. Under existing conditions of salaries for teachers in Massachusetts, it will be difficult for Somerville both to retain its superior teachers and to fill the positions of those who are attracted to other places by higher salaries. The chief element of stability now is the fact that many of our able teachers are attached to Somerville by home ties or by liking for teaching conditions here, and prefer to remain rather than to gain financial advantage elsewhere. This acknowledgment is due to these fine teachers lest there should seem to be an implication that all our superior teachers are leaving us.

#### Finance.

Of the total sum spent for the support of the schools in the school year ended June 30, 1921, 80 per cent was expended for teachers' salaries, 3 per cent for school supplies, 1 1-2 per cent for administration, 8 1-2 per cent for heat and light, and 7 per cent for janitors' salaries. The increases in per cent over last year were for teachers' salaries 1 per cent, and for heat and light 2.2 per cent. The decreases were in school supplies 2.3 per cent, administration 1-2 per cent, and janitors' salaries .4 per cent. Over a series of years these expenditures have maintained about the same relation one to another. It is a creditable fact that by far the largest part of the whole amount expended is given to teachers' salaries. The total expenditure was \$878,153, an increase of \$120,475. There was an increase of \$102,385 in teachers' salaries and \$5,054 in janitors' salaries. This increase of teachers' salaries was due largely to the operation of the salary schedule which became effective in January, 1920, whereby an addition of \$400 was given to all teachers.

In order to show the standing of Somerville among the other cities of the state in expenditure for education, the following table was compiled from the 84th annual report of the Department of Education:

Statement showing the expenditure of the 38 cities in Massachusetts for support of Public Schools per pupil in net average membership for the school year ending June 30, 1920. Expenditures for Vocational Education are not included herein.

Rank	Name of the city	Expenditure
1	Springfield	\$65 34

Somerville is 10th in population; 7th in number of pupils enrolled; 28th in expenditure per pupil; 20th in expenditure per \$1000 of valuation.

#### School Accommodations.

As no additional school accommodations have been provided during the last year, the conditions noted in the last annual report of the School Committee continue modified only by changes in the attendance of pupils and by the increase in

number of pupils. The High School is full. It is necessary to use every room for recitation or home-room purposes. There is no room available for desirable additional activities. The school suffers for the lack of a suitable room for the school library and of suitable rooms for the use of teachers; there should be one large room for women teachers and one for male teachers. An additional room for office practice is needed in connection with the Commercial Department, and a music room for small choruses, glee clubs, band, etc. Rooms for these uses can be had only by taking classrooms. As with the present large attendance classrooms cannot be spared for this purpose, it will be necessary to wait until the school shrinks materially before these improvements can be made. In the Junior High Schools the overcrowding referred to last year continues. It has been aggravated in the Southern and Eastern Junior High Schools by considerable growth in membership. In the Eastern Junior High School, it has been necessary to use the sewing room and typewriting room as home rooms and to convert the basement assembly room of the Southworth Building into three classrooms for recitation purposes. Protests against this use have been made by parents of children whose classes are held there but the arrangement has been accepted as the best one that can be made. At the Southern Junior High School an increase of 100 pupils has greatly added to the difficulties of conducting the school. As there were not enough rooms to accommodate all the pupils at one time, it was necessary to have an afternoon session for one grade. The seventh-year pupils therefore are attending school on a two-session basis, one-half the number attending the first half of the regular session, the other half attending the second half, and both groups making up the rest of the time in the afternoon.

At the Northern and Western Junior High Schools the conditions are substantially as reported last year, there being no considerable change in the membership of these schools.

In the elementary schools there is overcrowding in the eastern part of the city and comfortable conditions elsewhere. In the Prescott School five rooms devoted to elementary school purposes carry seven classes. The Hanscom School, a ten-room building, carries eleven classes. The Edgerly School, a twelve-room building, carries twelve classes, all over-large. The Glines School, a fourteen-room building, has fourteen classes, all above forty. At the Forster School, where four classrooms are devoted to elementary uses, there are six grades and four teachers. In the Bennett, Baxter, Cummings, Pope, Carr, Bingham, Durell, Burns, Brown, Cutler, Lincoln,

and Lowe schools every classroom is occupied. In the Knapp School, formerly a twelve-room building, two rooms have been taken for an assembly room. This room is used for school purposes, parent-teachers' association meetings, political rallies, and for other neighborhood activities. Of the remaining ten classrooms, one is vacant at the present time. There is a vacant room in the Perry School. A request is pending before the School Committee for a new kindergarten in one of these rooms. There is a vacant room in the Morse School which is used as an assembly hall, a meeting place for parent-teachers' associations and other community meetings, and a place for the holding of Americanization classes. This room should not be regarded as an empty room but rather as one contributing its full share to community needs. There is a vacant room in the Proctor School where it is proposed to place a new class for atypical children. In the Highland School there are three vacant rooms. There are propositions pending before the School Committee to use two of these rooms in the near future. From this statement it is seen that the large majority of the schoolhouses are occupied to their full capacity. Several are overcrowded and there are but two vacant rooms in the schools for which there is not now in prospect a day school use.

In the January meeting the School Committee adopted a recommendation presented by the Committee on School Accommodations as follows: That in its judgment suitable additions should be made to the Western and the Southern Junior High School Buildings, each to include an auditorium, gymnasium, and swimming pool; and, further, that a new junior high school building, to provide for the needs of the district now cared for by the Northern and Eastern Junior High Schools, should be erected at a point accessible to both the districts, thus releasing for elementary purposes the present buildings in the Northern and Eastern districts used for Junior High School purposes. In the opinion of the Committee, Broadway Park would make an admirable location for the proposed new building. The Committee further recommends that the Public Property Committee of the Board of Aldermen be invited to arrange a conference with the Committee on School Accommodations of this Board.

Following the adoption of this report there were conferences between the Public Property Committee of the Board of Aldermen and the School Committee extending over a period of several months. On June 9, 1921, the Committee on Public Property of the Board of Aldermen submitted the following report:

To the Board of Aldermen of Somerville,  
Gentlemen:—

The Committee on Public Property begs leave to submit the following report:

After an extensive study of the school accommodations situation in Somerville, together with the expected increased enrollment in September, your committee has unanimously agreed that the need for additional accommodations is very urgent. During their investigations the committee has visited many locations where new construction has been recently undertaken and they are convinced that the best interests of Somerville can be served by inviting all interested architects to submit tentative plans and specifications, and that construction should begin at an early date.

Respectfully submitted,

(Signed)

A. F. HEALD,

*Chairman.*

On June 23, 1921, the Board of Aldermen adopted an order as follows:

ORDERED:

His Honor the Mayor is respectfully requested to recommend to this Board an appropriation of sufficient funds to obtain a suitable location and erect a thirty-six room school building with an auditorium and gymnasium, to accommodate the pupils of the present Northern and Eastern Junior High schools, thus releasing for other needed school purposes the present buildings now used for Junior High Schools in those districts; to erect an addition of six rooms to the Western Junior High school and put that entire building in good condition.

To summarize the situation, the elementary schools in the Eastern part of the city are crowded. Any increase of attendance in that portion of the city will necessitate putting more classes on half-time. The junior high schools are overcrowded, two of them more than ever before. The schools throughout the city are generally full and the classrooms already noted are occupied. The need for the remedy of these conditions has grown more urgent with the passing of another year.

#### Professional Improvement of Teachers.

A matter vitally affecting the efficiency of a teaching corps is that of professional improvement of teachers in service. So important is this matter to the welfare of the teachers and

pupils alike that many cities provide special inducements for teachers to take professional improvement courses, either during the summer vacation or during the school term. Where such inducements can be offered it is undoubtedly good policy to do so. In the absence of provision by the School Committee giving direct recognition of professional improvement work, the teachers of our schools have been actuated only by professional interest in whatever they have done in the matter of self-improvement. It is only an act of fairness to say that a large proportion of our teachers have devoted time and money to the work of self-improvement. A recent report submitted to the Superintendent shows that over 50 per cent of our teachers have taken some kind of professional work since the close of the last school year. These teachers range all the way from kindergartners to Masters of Schools.

Among the institutions attended by our teachers during the time mentioned are: Harvard University, Boston University, Pace Institute, Boston School of Oratory, Simmons College, Boston College, Tufts College, Hyannis Normal School, Boston Normal School, Columbia University, University Extension Courses, and one teacher reports a University Extension Course at Oxford University.

Among the subjects pursued by the teachers have been the following: Business Law and Administration, Principles of Accounting, French, Chemistry, English, History, History of English Literature, Vocational Guidance, Bookkeeping, Secondary Education, Spanish, Teaching and the Supervision of Teaching in Elementary Schools, School Measurements, Appreciation of Music, Socialized Recitation, Psychology, Project Method, Educational Measurements, History of the United States, Story Telling, Citizenship, and Elementary Education.

The results of this professional spirit are shown throughout the school system in improved methods of instruction and in the general tone and work of the schools. Another result is that our teachers are alert to present problems in education and are informed concerning the discussions which are carried on concerning them. This progressive, forward-looking attitude there is every reason to expect our teachers will maintain to their own credit and to the welfare of the schools.

#### The Spirit of the Times.

The spirit of the times is affecting the conduct of the schools in important particulars. Some of these are wholly beneficial and others are more distracting than beneficial.

Among the former may be classed the demands made up-

on the school to direct its influence towards the securing of certain definite ends which are held to be desirable. In general terms these ends are the development of habits or states of mind which will affect the conduct of the individual and to that extent affect his character. Some of these influences are of a permanent and continuing character but others are more or less temporary and accidental. Among the former may be included the agencies and celebrations inculcating patriotism and citizenship, such as Armistice Day, Columbus Day Citizenship Celebration and other national and state holidays; those inculcating benevolence and philanthropy, such as the Junior Red Cross, appeals for Near East Relief, for the up-building of devastated France, and for selling Christmas seals; those inculcating civic virtues such as Education Week, Limitation of Arms Conference, Safety Week, Fire Prevention Day and Christmas Mail Instructions. These and other agencies of the same sort are fostered by interests outside of the school which are devoted to high ideals and to the task of improving our social and political life. They earnestly believe that pupils should be trained in school in the virtues which they represent. In response to their urgency and in response to the conception which school masters have of their own duties, the schools undertake to give instruction on all these matters with the purpose in view of having such instruction operate in the forming of character.

Activities of the second class are hardly so meritorious. They consist in most part of appeals to the school children to aid in raising funds for worthy causes. It is astonishing how many causes of a public and beneficial nature seek to increase their finances through the meager allowances of children. It is a fair question if adults ought not to bear their own financial burdens and leave the children and teachers an opportunity in school to devote time and thought to other matters. The schools are trying to teach thrift to the pupils as a fundamental attribute of character. The most obvious manifestation of thrift is the saving of money. The school is at a disadvantage in teaching thrift when it constantly asks pupils to give their money to adult enterprises which appeal to them for aid. As a further evidence of the timeliness of these considerations, the report of an elementary school principal may be quoted who states that since the opening of schools in September no less than 27 different outside undertakings have been brought by request to the attention of the pupils of his school. Undoubtedly this list would be enlarged if an accurate account had been kept from the beginning of the year.

Concerning the first group of influences the schools do

not complain. Children learn to do by doing; they build character by activity not by passivity. The schools must include in their organized program provision for these character-forming activities. But from many of these temporary and mainly inconsequential (from the view point of the schools) appeals they pray to be delivered—at least for a while.

#### High School.

The membership of the High School on December 2, was 1966. Besides the principal there were 71 teachers. The school has the part-time services of three teachers of physical training, and two of music. There is one matron. The 71 teachers have an average of 27.6 pupils. There are now 355 more pupils in the High School than on June 22, 1921. During the past year the work of the school has been conducted along lines already laid down and effort has been concentrated upon improving methods of administration and instruction and upon securing the best attainable work from the pupils. In both of these efforts substantial results have been achieved. The preparatory department successfully fitted a large number of pupils for college and other higher institutions of learning; and the commercial department prepared its graduates so thoroughly that they found employment without difficulty. The modern High School is today called upon to perform a work far more comprehensive and difficult than was expected of the High School a decade or two ago. A fair idea of the extent and character of this work as seen by High School Principals themselves can be obtained from a report of a Committee of Massachusetts High School Masters upon the topic "Needed Changes in High School Education." This report was submitted to the Massachusetts High School Masters' Club, March 26, 1921. Its discussion is divided among the following heads and sub-heads: Section I. (1) Mobilizing in the High School. (2) Discovering Aspiration, Aptitudes, and Capacities. (3) Adjustments for Different Abilities. (4) Self-Realization and Self-Determination. Section II. (1) Differentiated Curriculums. (2) Adapting Subject to Actual Requirements of Particular Occupations. (3) Independent Intensive Courses. (4) Adaptation of Contents of Subjects to Group Needs. Section III. CONSTANTS IN ALL CURRICULUMS. (1) Command of Fundamental Processes. (2) Health. (3) Citizenship and Socializing Agencies. (4) Worthy Use of Leisure. (5) Building-up of Ethical Character and Morale. Section V. Problems of Reorganization. (1) Means of Reorganization. (2) Obstacles to Reorganization. (3) Recognition of "Main Objectives" in organizing these schools. (4) Junior College. (5) Adjustment to requirements of College

and Other Higher Schools. These topics indicate live questions in the administration and development of High Schools. Each stands for an important matter. Whatever may have been the attitude in the past, it is certain that in the present and in the future it will be necessary for high schools to shape their programs of studies with reference to the application thereto of the ideas discussed in this report. Health and Physical Training are bound to demand greater attention in the management of the schools. Citizenship and socializing agencies, the building-up of character, the adjustments for different abilities, opportunities for self-realization and self-determination are all values which claim consideration and a place in High School programs.

These activities all have for their objective the development of character rather than the increase of knowledge. They have to do with the training of the will that the individual shall become habituated in right re-actions; become, in fact, accustomed to making right decisions in questions of ethical and spiritual values.

An attempt to provide these values in secondary education will necessitate the employment of methods additional to those of class-room recitation. Some of these are suggested by the captions in the report of the Committee. They are: opportunities for pupils to participate in school government; opportunities for pupils to co-operate for common interest of school, home, state and nation; using the moral values and the field of personal responsibility and sacredness of honor in pupils' activities and school discipline; courses in ethics based on concrete problems of school, home, vocation and community; courses in vocational information, instruction, and guidance. In addition to these agencies for the development of character there are others required for the development of health. The report is specific upon this point and urges a vigorous system of physical training and health supervision. Space will not permit the development here of particulars under this head. The purpose of mentioning these matters in this place is first to call attention to these important values in high school education, and second to call attention to the difficulties of providing the necessary machinery for procuring the desired results. Chief among these difficulties is the element of time. The high school day is now divided into recitation periods that are not any too long. These recitation periods are almost wholly claimed by book instruction. The small fraction of time not so claimed is entirely insufficient for the handling of these important character-building subjects. The difficulty is acute. Any attempt to take time from the book subjects for these non-academic activities is resisted by teachers of

academic subjects. An attempt to get more time by a longer school day is opposed frequently by the public. Under these circumstances at the present time there is then a recognition by the school of its duty to the pupils in these particulars, coupled with an inability to discharge its duty properly because of lack of time. Such a situation should receive attention from school authorities with the end in view of finding a solution. The Somerville High School is carrying on all of its literary, commercial and arts work with energy and success. It is attempting to incorporate in its program some of the extra curriculum activities. It intends to find a way to enlarge this field as time and opportunity permit.

#### Junior High Schools.

The membership of the Junior High Schools in December, 1921 is 3367, an increase of 200 pupils over the membership of a corresponding date last year. There are 115 teachers, including 4 masters. The ratio of pupils to teachers, excluding masters, is 30.3. In discussing the number of pupils per teacher in High Schools, the Commissioner of Education in the 84th annual report of the Department of Education says: "The studies of the Department of Education, with reference to the organization and administration of High Schools, point to the conclusion that the *minimum* teaching force consistent with good results in a High School is one teacher, exclusive of the principal, for every 25 pupils." As has already been pointed out, the present situation in the Somerville High School is one teacher for every 27.6 pupils, and in the Junior High School, one teacher for every 30.3 pupils. In actual practice the fact is that some classes in both the High and Junior High Schools have fewer than the average number of pupils while others have a considerable excess. The average, however, in both schools is not far from a desirable standard. 1013 pupils of the Junior High School are in the third or Senior year. These pupils are in the regular High School grade and are taking High School subjects. The remaining pupils are divided about equally between the 7th and 8th grades. These pupils are following a program in which elementary school subjects have approximately 4-5 of the time and elective studies 1-5 of the time. The work of both grades is departmentalized but 7th grade pupils have a considerable portion of their work under one teacher. Four-fifths of the work in the 7th and 8th grades is common to all pupils. The remaining one-fifth offers opportunities for differentiation whereby a child may pursue a line of study for which he has special interest and aptitude. Opportunity is presented to

children to change an elective course when such change is desirable. By such means a pupil has an opportunity to discover by experience what his aptitudes and inclinations really are. Experience in the Junior High School so far shows that most pupils find themselves before the end of the 8th year and thereafter follow the chosen course through the High School. The exceptions to this rule are not far more numerous in the Junior High School than in the Senior High School where pupils have been known to decide to begin to fit for college as late as the Senior year. In measuring the work of the Junior High School reference should be made to the objectives which govern that work. In the 84th annual report of the Department of Education, the Commissioner of Education quotes as follows a resolution adopted by the first state conference of Junior High School Administrators:

Resolved, That we record ourselves in agreement with the following main objectives:—

1. To bring about the proper co-ordination of the elementary and secondary schools.
2. To equalize educational opportunities.
3. To discover and develop the interests and aptitudes of the individual pupil.
4. To develop initiative, self-reliance, and a willingness to accept responsibility; and be it further

Resolved, That this conference believes that the purposes of the Junior High School may best be attained through the following features:—

1. The 6-3-3-plan of organization.
2. Departmental teaching.
3. Differentiation of studies.
4. Gradual introduction of promotion by subject.
5. Supervised study.
6. Reorganization of subject, content, and method.
7. Educational and vocational guidance.
8. Prevocational opportunities.
9. Socialization of instruction and "student activities."

In the Junior High School Manual prepared by a committee of fifteen appointed by the Commissioner of Education the role of Junior High School is defined as follows:

"The distinctive role of the Junior High School, then, is that of a *transition* school. This transition should be natural, gradual, and effective. It should bridge the hazardous and objectionable gap existing under the 8-4 plan between the elementary school and the High School,— a gap due to a too sudden change in the aims, methods, and content of instruction, and in the character of the school organization. It should also recognize the difference in the age, in the case of the two

sexes, at which' the physical transition begins to show itself through attendant changes in mental, physical, and social interests, and should make suitable provision for each. It should provide a controlled environment to meet the expanding interests due to these different kinds of transition.

As a transition school the Junior High school should,—

1. Introduce gradually new subjects, demonstrating to the learner the value of the subjects and constructing therefor an adequate apperceptive basis.
2. Introduce gradually new methods of lesson assignment and of learning.
3. Develop to an increasing degree the power of self-control and self-direction.
4. Increase the departmentalization of instruction, but only so rapidly as the pupils can profit by it.
5. Assure the advancement of pupils in subjects in which they are successful, and require the repetition, in case of failure, of only such subjects as are indispensable as a foundation for future instruction needed by that pupil.
6. Give pupils a broad outlook upon the world's work, and help them to ascertain their own aptitudes, interests, and abilities with reference thereto.
7. Provide progressive differentiation in studies.
8. Utilize all integrating agencies more and more consciously and purposefully as the time devoted to differentiation is increased."

It will be noted that this statement of the role of the Junior High School corresponds to the statement of the scope of the Senior High School in that it includes two distinct sets of activities; first, the old time academic activities having for their objective the increase of knowledge, and second, extra curriculum activities which have for their purpose the development of traits of character such as initiative, self-direction, responsibility, and ethical and spiritual virtues. The burden of time and emphasis in the Junior High School as in the Senior High School is laid upon the first of these classes. The difficulty in dealing adequately with the second is again the difficulty of providing time therefor. Wherever by rearrangements of the subject matter and by modification of teaching methods these aims can be assisted, the principals are making such changes. Testimony upon these points is afforded by the following quotations taken from statements made by the masters of the several junior high schools:

"While we are attempting to carry out as fully as possible the suggestions found in the Junior High School Manual, as special features it is our purpose during this year to add the

following clubs: birds, camp cooking, first aid, hiking, knitting, sewing, and short story. We shall also organize our home rooms so that they will be practically self-regulating."

SAMUEL A. JOHNSON,

*Master of the Eastern Junior High School.*

"We certainly believe in the objectives of the Junior High.

"Supervised study and the socialized recitation are enlarging the horizon of the pupils and making them more self-reliant.

"More and more the individual pupil is developing along his own lines. The grouping of pupils according to their adaptabilities stimulates the whole group, develops leadership and a spirit of kindly criticism.

"The various activities of the school generate the school spirit, deepen the community feeling and assist the pupil in gaining power by individual efforts."

GEO. M. WADSWORTH,

*Master of the Southern Junior High School.*

"During the present year we have laid stress on several objectives of education, namely: 'Command of Fundamental Processes,' 'Citizenship,' and 'Worthy Use of Leisure.'

"We have produced by constant drill a marked improvement in the fundamentals of Language and Mathematics.

"We are conducting our Civics and History lessons in such a way that there is a good deal of personal investigation of the institutions of city, state, and nation. The questions of the moment are discussed, etc.

"We hope to be able during the rest of the year to lay stress on the worthy use of leisure by organized activities after school hours and on Saturdays. We have been tendered the use of the gymnasiums at Tufts College for Saturday morning activities."

FRANK W. SEABURY,

*Master of the Northern Junior High School.*

"I wish to say that I believe in the Junior High School and feel that I can truly say it has accomplished all and more than we expected of it as far as my knowledge goes. I have organized my statement according to the seven objectives of education as laid down by Mr. Kingsley in the Junior High School Conference Report.

"We are endeavoring to develop the objectives as set forth below:

*First Objective, — Health.*

1. By physical exercise.
2. By the conducting of a Tennis Club, a Hiking Club, Hockey Team, Gymnasium work at Tufts for the girls, and by the carrying on of Football, Baseball, Basket Ball, Track and Hockey for the boys.
3. Through instruction in community health and personal health by the teachers in the class room, particularly in connection with the work in Hygiene and Civics.
4. Through discussions at the Parent Teacher Association meetings looking towards the building of a gymnasium and suitable playground for the children.

*Second Objective, — Command of Fundamental Processes.*

1. By the conducting of a Library Hour under the direction of a Library Teacher.
2. By directed learning.
3. By socialized recitations.
4. By project work.
5. Through debating.
6. Through Teachers' Meetings where plans for better methods are discussed.
7. By meeting of teachers of one subject to discuss the work that should be done in that subject by all teachers.
8. By supervision of the newer teachers by the more experienced ones.

*Third Objective, — Worthy Home Membership.*

1. Through the study of the problems in the Civics classes.
2. By Bread-making Club.
3. By French Club. (Meetings held at the homes.)
4. By the arousing in the pupils of a sense of courtesy through the means of competitive essays on courtesy.
5. By the teaching of thrift. (School Savings Accounts, Civics and talks by teachers.)
6. By the practicing in the shops of various projects which prove to be beneficial in the homes.

*Fourth Objective, — Vocation.*

1. By guidance given through Civics and home room teachers from time to time.
2. By instruction in cooking, sewing, carpentry and metal work.

3. Through personal talks of teachers to pupils in guiding them in the wise choice of a future career.

*Fifth Objective, — Citizenship.*

1. By the teaching of the subject in the Civics classes.
2. By Civics Club.
3. By student participation in school affairs.
4. By acquainting the pupils with the machinery of the Government through the election of officers in classes and clubs.

5. By inculcating the ideals of self-control and respect for the rights of others in class and club management by pupils themselves.

“Through the above we hope to teach those attributes of civic knowledge, civic interests, civic ideals, civic habits and civic powers.

*Sixth Objective, — Worthy Use of Leisure.*

“Through the Tennis Club, Hiking Club, Hockey Club, Canning Club, Story Telling Club, Debating Club, School Paper, as well as by having the sports as Football, Baseball, Basket Ball, Track Work, and Hockey.

*Seventh Objective, — Ethical Character.*

1. Through morning talks.
2. Through athletics which develop self-control, high ideals and good sportsmanship.
3. Through student participation in the affairs of the school.

“As to the future, we propose to carry on the work along the above lines for the rest of the year.”

ARTHUR L. DOE,

*Master of the Western Junior High School.*

In this comment upon the work of the Junior High School I have purposely omitted reference to their wholly inadequate accommodations. Reference to these limitations is made under the head of School Accommodations. At this point I prefer to deal only with the facts of actual accomplishment and the purposes which the schools are attempting to achieve under present conditions.

**Elementary Schools.**

The work of the Elementary schools during the past year has been largely confined to the teaching of the so-called fundamentals of education. Reading, Arithmetic, Geography,

History, Spelling, and English Composition have been the main occupations of teachers and pupils. Vigorous efforts have been made to secure the best attainable results in these studies. Approved methods have been used by all the teachers, and experiments have been made in the application of the project method and the socialized recitation method. It is a characteristic effort of the elementary schools to train pupils in independent study and in self-reliance. The discipline of the schools is of such an order as to encourage pupils to develop their individual powers to the best advantage. Along with the major studies already mentioned the schools have given instruction in morals, in thrift, in health and hygiene, in patriotism, and in civics. In accordance with the spirit of the times there is increasing need for emphasis on these subjects in the elementary as well as in the higher schools. In order to find time for an adequate treatment of these subjects, it will be necessary to reorganize the content of instruction in the other subjects. Such reorganization of the program of the elementary school is under consideration by the elementary principals and action in that direction may be taken during the present school year. An interesting investigation of the aptitudes of children for academic or manual arts studies has been conducted during the last year in certain schools by a trained psychologist. The result of this work is given in a letter submitted by Charles E. Brainard, Master of the Edgerly School, from which I make the following quotation:

“Two of our sixth grade classes, co-operating in this work, have served for the investigation, the object of which was to obtain information regarding psychological tests upon which might be based both educational and vocational guidance.

“The main underlying reason for the study is that children of academic ability are frequently found in manual training classes for which they are not well fitted, and on the other hand children possessing manual skill above the average may be struggling with Latin or bookkeeping.

“The choice between academic and manual work comes to the children at the close of the sixth grade and the beginning of Junior High School work. The study carried on by Miss Glenn, at the Edgerly School last year, is being continued and extended to higher grades and will ultimately be published. Since educational psychology is so much at the front at the present time, I think we owe Miss Glenn a very hearty vote of thanks for the help she has given us in this experimental period in which we are trying to find the best psychological

method of determining the mental efficiency of the children in different grades above the fourth.

"The time is not far distant when mental ability will form the fundamental basis for all grading, classification, and promotion."

#### Kindergartens.

In November, three additional kindergartens were established, — one each in the Bingham, Cutler, and Morse Schools. The applications for admission were in excess of the capacity of the classes. Since the opening of these schools there have been requests for the establishment of classes in other parts of the city. It appears evident that there is a strong demand in the city for kindergarten opportunities. All of the seven kindergartens are full and full membership is maintained in each of them throughout the school year. Kindergartens provide a distinct contribution to the development of young children. They are a legitimate and valuable part of a school system. The only considerations which have for so long a time retarded the adoption of kindergartens have been those of accommodations and expense. Concerning accommodations, there are now several rooms available which could be used for kindergarten classes. In Ward three, there is no kindergarten and no vacant room in any of the schoolhouses in that ward. There is, however, a strong feeling in favor of providing a kindergarten for this locality if a place for holding it can be found. Regarding the pending requests for additional kindergartens, it may be noted that it is difficult to see on what just grounds kindergartens can be provided for one locality and withheld from another locality where the opportunity and the demand co-exist.

#### Physical Training.

The School Committee has taken significant action this year in the matter of physical training and athletics by appointing an assistant director of physical training and assigning him to the duty of coach in the High and Junior High Schools. In defining the duties of this new officer, the Committee has expressed the intention of promoting the development of athletics for the pupils in the High and Junior High Schools. Hence the program of physical training hereafter to be conducted in the public schools will consist of two general divisions: (1) Required formal physical exercises, consisting of indoor classroom work and outdoor recess work. (2) Athletics, sports, and games to be promoted among the students of all grades of school. It is proposed to organize

athletics in the High and Junior High schools in such a way as to secure the participation in some form of athletics of as many pupils as possible. Thus it is hoped to create a love for outdoor physical activities and by so doing to improve the health of pupils, and to interest them in personal participation in games. The plan for such an organization of athletics among the pupils of the schools has already been prepared by the physical director, Ernst Hermann, and has been approved by the assistant physical director. This plan provides for the organizing of athletic associations in each one of the junior high schools and for inter-school games in all of the major sports. It includes the establishing of a school team in each of the major sports which shall represent the school in competitions with other schools. It provides for the maintenance of the usual High School suburban league teams of football and baseball and for the forming of other teams to represent the High School. It is believed that this plan if vigorously prosecuted will revive the interest of boys and girls in outdoor sports and will lead to a larger number being actually benefited thereby. It is believed also that such a plan will produce a larger number of students physically equipped to take part on the teams which will represent the High School. On the whole the purpose of the School Committee in starting this plan seems in a fair way of fulfillment. At the present time the first move in putting this plan into effect will be the organizing of hockey and basket ball teams. The lack of a suitable gymnasium in connection with the High School is a drawback to the fulfillment of all the plans under consideration, but an effort will be made to get a suitable place for the indoor practice of the several teams.

#### Special Classes.

Since the early part of the summer a psychological clinic, furnished by the Department of Education, has been conducting an examination of children three or more years retarded. This examination included mental, moral, and physical tests and an inquiry into the family history of the individual. When this work is completed there will be filed with the Superintendent of Schools a statement giving the history of each case. This data will show what children should be placed in additional atypical classes. The pupils in the existing atypical classes were examined and found to be properly placed in those schools. It is probable that there are children enough to fill two more atypical classes.

At the meeting of the School Committee on October 31.

1921, the following letter was received from the Department of Education, Division of the Blind:

Boston, October 31, 1921.

Mr. Charles S. Clark, Sec. School Committee,  
School Department, City Hall,  
Somerville, Mass.

To the Members of Somerville School Committee.

Gentlemen:—

We have on file in this office the names of a group of Somerville children with seriously defective eyesight. These are not blind enough to require training by the touch method yet are gaining their education at the expense of eyes and general health.

Again may we ask if Somerville is not ready to provide for these children in a class specially equipped to meet their great need? There are eighteen of these Conservation of Vision or Sight Saving Classes in Massachusetts.

During the past several months we have had several calls from the parents and guardians of Somerville children urging that more adequate attention be given than can be obtained in the ordinary grade class.

This office supplements Sight Saving Classes to the extent of five hundred dollars yearly, pays one hundred dollars toward the desks and supplies three complete sets of large (24 point) typed text books when the class is organized.

I am enclosing a list of ten applicants who have recently been seen and in the event of your deciding to open a class, we will send an additional list. I am enclosing a booklet on Sight Saving Classes and will be glad to work with you to the best of my ability.

Respectfully,

IDA E. RIDGEWAY,  
*Supervisor of Work for Children.*

This letter was referred to the Committee on Textbooks and Courses of Study with a request that a report be made at the next meeting. At the meeting of the School Committee on December 5, 1921, the Committee on Textbooks and Courses of Study reported in favor of opening a sight saving class and recommended that the Superintendent be authorized to submit a plan for such action. The School Committee adopted this recommendation. The following statement was prepared by the Superintendent for the use of the Committee in considering this matter:—

*Statement Concerning the Organizing of a Sight Saving Class  
in Co-operation with the Division of the Blind,  
State Department of Education.*

I. *Sight Saving Classes:* Sight saving classes are conducted in several Massachusetts cities in conjunction with the Department of Education. At the present time such classes are maintained in the following cities:

Seven classes in Boston, one about to be opened.

Two classes in New Bedford.

Two classes in Worcester.

One each in Brockton, Fall River, Lynn, Cambridge, Salem, Lowell and Chelsea.

Pupils for such classes are selected on the basis of careful diagnosis of optical defects and include only those whose attendance in regular schoolroom is of little benefit to themselves. Ten to fifteen pupils constitute a class.

II. *Somerville Needs:* The Department of Education, Division of the Blind, reports the list of ten names of pupils living in Somerville who should be cared for in such a class. Additional names are in the possession of the Department and will be furnished later.

III. *Pupils:* Pupils Eligible for such a class are scattered over the city. It follows that some must travel a long distance to reach the schoolhouse where the sight saving class is conducted. This makes it desirable that the session of the school should vary from the usual school-day in such way that the pupils need travel only once daily to the school.

IV. *Location:* A suitable location for such a class then would be in any building where a vacant room could be provided for such purpose.

V. *Equipment:* Equipment for such a class is simple, consisting of furniture capable of proper adjustment and books and other teaching material printed in special type.

VI. *Teacher:* A teacher trained in regular school methods and willing to specialize on the methods approved for teaching sight saving classes should be selected. The salary should be equal to that paid teachers of atypical classes.

VII. *Co-operation of the Department of Education:* The Division of the Blind co-operates with the community in the expense of this undertaking in the following way: It will give \$100-\$150 towards the purchase of furniture, and three sets of textbooks. In addition it will contribute \$500 annually towards the maintenance of the class. It is estimated that \$100-\$150 more would be required for the first outlay on teaching material.

VIII. *Location for Class:* A suitable room for such a class is available in the Highland School. This school is convenient to several lines of street cars and in that way is accessible to pupils coming from different parts of the city.

IX. *Time for Starting the Class:* Pupils eligible for such a class are already known and as the equipment required is easily procurable, such a class could be established without delay.

#### Americanization Classes.

This work has been thoroughly organized during the present school year. There is now a director with two assistants who act as organizers, supervisors, and teachers. Day and evening classes, factory, citizenship, and English classes are being conducted at the present time. A good response is being made by adults of foreign birth to these opportunities. On Columbus Day a Citizenship Day celebration was held in the High School Hall, under the direction of the School Committee. Pupils in Americanization classes were in attendance and a great deal of enthusiasm was manifested. Speakers on this occasion were His Excellency, Channing H. Cox, Governor of Massachusetts, His Honor, Charles W. Eldridge, Mayor of Somerville, and John J. Mahoney, State Supervisor of Americanization. As now organized, this department is able to provide instruction for all adults of foreign birth who are willing to receive it.

#### Morning Luncheon.

Nineteen of the schools reported in June that they were serving milk to their pupils either during the morning or at the noon recess. The schools embrace all grades from the kindergarten to the high school. Milk is served to pupils in some instances by the glass, and in others in bottles with straws. Pupils pay for their milk but arrangements are made to furnish milk to needy children free of charge. The schools report in some instances a sale of as high as one-third of the membership of the school. Along with this provision there has been instruction in the schools upon the value of milk as a food. There is a growing interest in this undertaking which was started by the principals of the buildings upon their own initiative and which has been conducted by the principals on their own responsibility. The subject of morning luncheon for young children is one now much discussed and the policy of our principals in carrying on this milk sale affords an interesting opportunity to determine by experience the values of such a provision. So far, the evidence is all in favor of the

undertaking. Several principals have followed this plan for more than a year and are confirmed in their opinion of its worth. In several schools where the Health Crusade was carried on last year records of the development of pupils were kept and improvement in weight was shown in many cases.

#### Conclusion.

While there have been no unusual occurrences in the work of the School Committee or of the schools to stand out prominently, there has been a steady progress in the work of both. Co-operation and good feeling have tended to produce the best results. As superintendent I want to express my thanks to the School Committee and to the principals and teachers for their share in the work which, continued through the year, has made these happy conditions possible.

Respectfully submitted,

CHARLES S. CLARK,

*Superintendent of Schools.*

#### REPORT OF THE HEAD MASTER OF THE HIGH SCHOOL.

Mr. Charles S. Clark,  
Superintendent of Schools,  
Somerville, Mass.

Dear Mr. Clark:—

I take pleasure in presenting for your attention the following matters of moment and interest in connection with the Somerville High School during the year 1921.

#### *Attendance.*

A very serious handicap to our schools is in the poor attendance of the pupils. Our schools are in session to give children an education. This can only be done providing our children are regular in their attendance at school. Figures in Somerville show, however, a decrease of over three per cent in our annual percentage of attendance since ten years ago. In other words there are now three more absences each day per one hundred pupils than there were in 1911. In the High School this makes sixty more absences a day or approximately 12,000 more a year; in the entire city, 84,000 more absences per year than there were ten years ago for the same school enrollment. The chief blame for this lies in the home and with the pupils who attach so little importance to the necessity

of being on the job every minute. The hardship comes now on the teacher but what about the handicap to the next generation? Some method must be devised to "follow up" attendance more closely and to impress on parents and pupils the importance of strict attention to regular attendance.

#### Physical Training.

Our school is lamentably lacking in facilities for proper development of the body. For years the need of a gymnasium has been urged, yet we remain practically alone, among the large high schools, without means for the physical training of our boys and girls. We are doing our best in a simple way, that is, by giving the pupils daily setting-up drills in the schoolrooms. We should have instead two large gymnasiums where these setting-up drills could be carried on under proper conditions and where also systematic gymnastics, corrective gymnastics, games and indoor sports could be conducted under the guidance of competent instructors.

#### Standardized Marks.

In a high school having as many teachers as ours, it is inevitable that in grading pupils' work and scholarship, there should be a great diversity of standards. Unless there is some common standard used by all, each teacher is a law unto himself in marking the pupils' work. One teacher might give "A," another "C," for the same work.

Furthermore, the record of the work of each pupil, kept at the school, according to which certificates are given to higher institutions, diplomas are granted and promotions are made, is based on the supposition that each mark has a uniform and a definite meaning.

Then, too, if reports of the pupils' work, which are sent home are to be really helpful to his parents, each mark should have a uniform and definite meaning known to the parent.

The following plan adopted by the teachers during the past year is an attempt to meet the above situation.

#### Scale of Qualities of Work

##### A.

##### 1. Knowledge of Subject Matter.

1. Memory and thought questions answered intelligently and fully.
  - a. No guessing.
  - b. No help from teacher.

2. Topical recitation.
  - a. Assigned work given clearly and thoroughly.
  - b. Outside information and volunteering expected.
3. Written work.
  - a. Statements briefly and clearly given, fully covering the assignment.
  - b. Careful wording, form, thought, penmanship, spelling, punctuation, neatness.

## II. Preparation.

1. Constant daily preparation, and regularity in attendance.
2. Preparation done rapidly and thoughtfully.
3. Written work done on time.
4. Directions of the assignment followed as an outline.

## III. Attitude.

1. Attitude in recitation.
  - a. Good position standing and sitting.
  - b. Alert and attentive.
2. Attitude toward preparation of lesson.
  - a. Ability to work alone.
  - b. Good judgment and self-control in use of time.
3. Attitude toward teamwork.
  - a. Shows leadership as well as respect for the rights, privileges, and opinions of others.
  - b. Co-operates with the teacher and other members of the class in a socialized recitation.

## B.

Good work, deserving commendation, and adequate to meet college entrance requirements.

### I. Knowledge of Subject Matter.

1. Answers to questions well-directed in thought and showing a grasp of essential points.
2. Topical recitation.
  - a. Completes assigned topic.
  - b. Frequent volunteering expected.
3. Writtten work.
  - a. Statements brief and clear, covering assignments in substance.
  - b. Careful wording, form, thought, penmanship, spelling, punctuation, and neatness.

**II. Preparation.**

1. Constant daily preparation and regularity in attendance.
2. Preparation done thoughtfully.
3. Written work done on time.
4. Directions of the assignment followed as an outline.

**III. Attitude.**

1. Attitude in recitation.
  - a. Good position, standing and sitting.
  - b. Alert and attentive.
2. Attitude toward preparation of lesson.
  - a. Ability to work without assistance.
  - b. Good judgment and self-control in use of time.
3. Attitude toward team work good.

**C.**

Fair work not wholly satisfactory, indicated by letter "C."

**I. Knowledge of Subject Matter.**

1. Irregular answers, not well-directed in thought.
2. Topical recitation.
  - a. One-half of recitation topical.
  - b. Questions from teacher necessary to complete recitation.
  - c. Some volunteering.
3. Written work.
  - a. Should contain three-fourths of the important facts in the assignment.
  - b. Some carelessness in wording, form, thought, penmanship, spelling, punctuation and neatness.

**II. Preparation.**

1. Daily preparation, constant but insufficient.
2. Not enough time spent in preparation.

**III. Attitude.**

1. Attitude in recitation.
  - a. Attention poor.
  - b. Needs frequent reminding about correct position standing and sitting.
2. Attitude toward preparation.
  - a. Requires frequent assistance and urging to effort.
  - b. Lack of ability to visualize problems and clothe the language of the textbook with reality.
  - c. Wastes time from lack of concentration and well-directed effort.

- d. Poor team work due to lack of spirited co-operation and ability to function effectively at right moment in team play as applied to classroom activities.
- e. Makes up deficiencies due to absence or failure in preparation.

### C.—

Poor work, passing but with low standing, is indicated by letter "C—"

#### I. Knowledge of Subject Matter.

1. Very irregular answers, thoughtful answers infrequent.
2. Topical recitation.
  - a. Topical recitation seldom made.
  - b. Detailed questions necessary.
3. Written work.
  - a. Written work contains one-half the important facts.
  - b. Serious lack in wording, form, thought, penmanship, spelling, punctuation and neatness.

#### II. Preparation.

1. Preparation not uniform.
2. Preparation covers only three-fourths of assignment.

#### III. Attitude.

1. Attitude in recitation.
  - a. A poor position, twisting about.
  - b. Inattentive, distracting the attention of others from the class exercise.
2. Attitude toward preparation.
  - a. Unable to accomplish much without tutoring and some compulsion to give attention to work.
  - b. Marked lack of ability to visualize problems and clothe the language of the textbook with reality.
  - c. Cannot be depended upon for team work.
  - d. Makes effort to make up work lost through absence or failure in preparation.

### D.

Failure to pass or to receive credit for a course is indicated by the letter "D". These should receive very serious attention in connection with remedial measures. The following are typical:

1. Little apparent effort to respond, no volunteering.
2. Only one-half or less of the assignment attempted.
3. Failure to hand in written work on time, if at all.
4. Guessing answers to questions.
5. Written work poor in form and content.
6. No effort to make up work lost through absence or lack of preparation.

### E.

Work less than "D" is indicated by the letter "E".

#### **Student Co-operation in the Administration of the School.**

The control of the modern school has materially changed from the old plan of arbitrary authority and unquestioned obedience. Although there must still be a court of final appeal, as in all forms of government, yet the opinion of the student is more and more consulted and his co-operation sought. In the Somerville High School the Students' Council is a strong medium for pupil self-determination, as well as for assistance in school administration.

#### *Organization:*

The plan of organization of the Students' Council is based on the democratic form of representation. The four officers of each class, — namely the President, Vice-President, Secretary, and Treasurer, — are ex-official members of the council. In addition, there are six other members known as Floor Proctors. These are chosen by the proctors of the individual home rooms on each floor, there being six floors in the two buildings of the High School. This plan provides a means of conveying messages and information to the room proctors of their respective floors.

The president of the Senior Class is, by the constitution, President of the Students' Council. Two members of the faculty are assigned by the Head Master as advisers. Regular meetings are held once every week, special meetings being called when necessary.

#### *Object:*

The body is known as the Students' Council of the Somerville High School.

The object of this Council is to promote the interests of the Somerville High School, to voice the opinion of the students, and to effect a closer relation between the faculty and pupils of the school.

*Activities:*

Among the matters which it has discussed are the methods of filing to and from recitations; campaigns for cleanliness in class rooms, corridors, lunch rooms, and school grounds; procuring posters and mottoes for school activities; assisting in securing better car service and reduced fares for the pupils of the school; conducting school assemblies for the promotion of school spirit, or for some particular school undertaking; assisting in campaigns and "Drives" for the benefit of the school paper, the debating societies and like activities; conducting occasionally school affairs; acting as a reception committee at public functions, such as Parents' Night. The most recent form of assistance rendered by the Council has been its effort to eliminate infractions of the school regulations. On a few occasions, when in the opinion of the Council the reputation of the school has suffered because of some serious breach of conduct, it has suggested to the Head Master a form of punishment for the misdemeanor, and has taken steps to impress upon the pupils at large its displeasure at such occurrences. In general, the Council, because of its value as a co-operating committee between the faculty and the pupils, has proved to be a great assistance to the Somerville High School.

**Record of the Preparatory Department for 1921.**

The Preparatory Department during the past year has had an enviable record. Under the able leadership of the head of the course and with the hearty and unstinted efforts of excellent teachers, many pupils were prepared for higher institutions, with practically no failure.

In September, graduates from our school entered the following institutions:

Amherst . . . . .	1	Radcliffe College . . . . .	3
Boston College . . . . .	3	R. I. State College . . . . .	2
Boston University . . . . .	10	Sargent School . . . . .	5
Dartmouth College . . . . .	4	Simmons College . . . . .	3
Harvard University . . . . .	10	St. Xavier's College, N. S. . . . .	1
Jackson College . . . . .	1	Tufts College . . . . .	12
Lowell Textile School . . . . .	1	University of Vermont . . . . .	1
Mass. Inst. of Technology . . . . .	7	Wheaton College . . . . .	1
Northeastern College . . . . .	4		
Normal Schools . . . . .	22	Total . . . . .	91

Our record at Harvard this past year was an unusual one, — in fact one of the best (if not the best) that the school has ever had. In June, 1921, 11 boys took the Harvard examinations by the new plan, each boy taking four examinations.

All boys passed.

Eight boys received honors.

Two boys received honors in three subjects each.

Three boys received honors in two subjects each.

Three boys received honors in one subject each.

15 honors were received in all.

These honors were distributed as follows:

Seven honors in Mathematics.

Three honors in French.

Two honors in Latin.

Two honors in Chemistry.

One honor in Physics.

Of the public schools fitting for Harvard, Somerville High School tied with the Springfield Central High School in the number of boys entering Harvard, September 1921.

This placed Somerville High School in the fourth place among the public schools of the country in the number of students entering Harvard.

Last year (1920-1921) Somerville High School boys at Harvard all stood well.

Two received High Distinction for the year.

Two received Distinction for the year.

Three received High Pass for the year.

From Dartmouth College our school received the school plaque because the Freshman delegation representing it secured the highest scholastic standing.

All honor to our graduates who are doing such excellent work at college, thereby reflecting great credit on their school and its excellent teachers.

#### Commercial Department.

Although the reputation of a general high school is apt to stand or fall on the success or failure of its college preparatory department, yet an equally important department, concerning which we hear much less, is the Commercial Department. This department is, as a rule, the largest in the school and is accordingly deserving of much more recognition than it usually gets.

Pupils in this course must major in either stenography or bookkeeping. By far the greater number select stenography and it is this group that I wish particularly to bring to your attention at this time. The training of a stenographer in a public school is a much longer process than in a business school. This is due to the fact that in order to receive a high school diploma, the pupil must receive instruction along many lines in addition to stenography and typewriting. English

literature, English grammar, history, foreign languages and sciences are added to the course in order that the graduate may have a greater breadth of vision and a higher degree of preparation for any position he may secure. It is generally conceded that this result obtains and the fact that our graduates from this department are in constant demand and that we often cannot supply the demand is sufficient evidence. In June, 1921, 44 pupils completed the course in stenography and graduated from the school.

The following information has been obtained regarding these pupils:

Four are continuing their studies at the Chandler Shorthand School, presumably to prepare for teaching.

Two are at the Sargent School of Physical Training.

Two are employed at the office of the Superintendent of Schools.

One is employed at the Boston State House.

One is employed at the Somerville City Hall.

Two are studying at the School of Business Administration, Boston University.

Twenty-eight have good positions in Boston, Cambridge or Somerville.

Two are at present not at work.

Of those at work, from whom we have obtained reports, the lowest salary received is \$12.00 per week, the highest \$22.50. The average salary is about \$16.00 per week.

These pupils before graduation received varied experience. Each pupil spent a week in the office of the Superintendent of Schools or the principal of this school. They also wrote many business letters for the heads of courses, prepared reports, outlines of work, examinations, etc., for teachers. They had drill in preparing attendance bulletins, lists of many kinds, notices and reports. In fact, wherever the services of a stenographer or typewriter were required, these pupils were called and did excellent work.

It is a matter of considerable pride that the teachers in both the departments of stenography and bookkeeping are of broad training and vision who have succeeded in imbuing their pupils with a keen sense of the dignity of the work and of the higher qualities which make of their labor a profession rather than a mere job.

Respectfully submitted,

JOHN A. AVERY,

*Head Master.*

January, 1922.

REPORT OF THE PRINCIPAL OF THE VOCATIONAL SCHOOL  
FOR BOYS.

Mr. Charles S. Clark,  
Superintendent of Schools,  
Somerville, Mass.

Dear Mr. Clark:—

The enrollment of the Vocational School for Boys is the largest in the history of the school and there has been an increased number of applications for admission to all departments which has necessitated carrying a waiting list.

While a financial statement or productivity record does not give a satisfactory record of efficient training in a school, yet such a record furnishes some idea of the work the school has accomplished in the last year.

The following figures are from the State Report on Productivity for the year 1920-1921.

Value of all products . . . . .	\$11,204 93
Cash received and turned back to City and School . . . . .	1,726 23
Value of products for school and city departments . . . . .	2,401 56
Value of products increasing the value of school plant . . . . .	2,268 12
Value of material furnished by customers . . . . .	2,735 62

The work of rehabilitation under the Veterans' Bureau continues. The men are becoming more skilled in their trades and valuable results accrue from their efforts. Not only are the ex-service men receiving very good training but the school equipment is being continually increased in value through repairs, new construction, and tool equipment,—all work produced by these ex-service men.

The number of ex-service men who have received training since April, 1920 is 111. A large proportion have been rehabilitated or sent to higher institutions, placement training, or into permanent jobs in industry. As soon as the present industrial situation clears up, a very large proportion of the present enrollment will be permanently placed and fully rehabilitated.

The school was open through the summer months, the Federal Board paying the entire cost of training for the additional period.

The present departments of the school are fairly complete, but new departments are needed to provide further opportunities in industry.

The following is the financial statement of the school for 1920-1921:

## Financial Statement, 1920-1921.

Maintenance 10 months . . . . .	\$26,887 35	
Maintenance Summer session . . . . .	3,972 73	
	<hr/>	
Gross maintenance . . . . .	\$30,860 08	
Income:		
Smith-Hughes Fund . . . . .	\$1,319 35	
Non-resident tuition . . . . .	4,292 02	
Veterans' Bureau . . . . .	8,000 00	
Cash from Products . . . . .	1,726 23	
Credits . . . . .	130 94	
Summer income. . . . .	4,311 64	
	<hr/>	
Total income . . . . .	19,780 18	
Net maintenance cost . . . . .	11,079 90	
Net cost per capita . . . . .		\$100 18
State Reimbursement . . . . .	5,539 95	
	<hr/>	
Net cost to City . . . . .	5,539 95	
Net Cost per capita to City . . . . .		50 09
Labor and value of products on work for School and City Departments for which no charge was made . . . . .	2,096 54	
	<hr/>	
Net Cost to City . . . . .	\$3,443 41	
Net Cost Per Capita to City . . . . .		31 13

Respectfully submitted,

HARRY L. JONES,

*Principal.*REPORT OF THE DIRECTOR OF THE CONTINUATION SCHOOLS  
AND AMERICANIZATION WORK.

Mr. Charles S. Clark,  
Superintendent of Schools,  
Somerville, Mass.

Dear Mr. Clark:—

I herewith submit the report of the work of the Continuation Schools covering the period from September 1, 1920 to date, and of the Americanization work for the year 1921.

## Continuation Schools.

On November 4, 1919, by a referendum vote, the citizens of Somerville accepted the provisions of Chapter 311, General Acts of 1919, which authorizes the establishment of a state aided Continuation School in any city or town, where two hundred minors between the ages of fourteen and sixteen are

employed under authority of employment certificates or home permits. Employed minors are required to attend school four hours per week of the forty-eight which they are permitted by law to work, and must attend twenty hours a week during periods of temporary unemployment. For such instruction, each city or town, conducting such a school, is reimbursed by the state an amount equal to one-half the net maintenance cost of the school.

In accordance with said Compulsory Continuation School Act the local school was established and was opened on September 9, 1920, as a part of the public school system. The organization consisted of a director and three teachers, two men and one woman.

The problem of the school is to provide suitable part-time instruction for fourteen to sixteen-year-old minors who leave the regular schools to go to work. The salient characteristics of the adolescent pupils are revealed markedly in this group of students. This age is a period of rapid growth, tremendous energy, physical awkwardness, quick temper, self-consciousness, strong likes and dislikes, and unrest, shown by a constant drifting from job to job.

The reasons for leaving school may be grouped under two headings, namely, reasons related to economic conditions in the home, and reasons related to conditions in the regular schools. Lack of interest in the regular school work results in failure, failure causes discouragement and discouragement creates a desire to leave school. Contrary to expectations the larger number leave school for reasons related to conditions in the regular schools.

These characteristics and reasons for leaving school determine the functions of the Continuation School, which are: (1) the conservation of the education already acquired and the extension of it; (2) vocational guidance, facts for which are obtained by (3) follow-up work; (4) placing minors in better jobs; and (5) tying school work to the job.

The functions of the school determine the plan or the program of studies. In order to provide for the conservation and extension of education already acquired, especially for those who found conditions in the regular school uninteresting, it was necessary to adopt a methodology based on interest factors. For instance, these factors in English and Arithmetic are derived from the pupil's employment and his outside interests such as sports and recreations, which make the lessons very different from those which the children dislike in the regular schools. Civics and Hygiene are taught with the basic idea to make good citizens. It is more important to the Continuation School pupil to know his duty to his family, his neighbor-

hood and his community, and how to care for his health that he may better serve his employer, than to know the number of members in the Senate at Washington, or the names and locations of all the bones of his body.

An intelligent choice of vocation cannot always be made for various reasons, namely:

- (1) Desirable openings are not always available.
- (2) The background of experience is lacking.
- (3) Childish whims and the ill-formed ideas of parents generally are accountable for the choice.

Vocational Guidance is the antidote and may be administered in two ways:

- (1) Either by furnishing the background of experience by the practice of actual shop work in well-equipped shops conducted on a commercial basis, or

- (2) Through discussions on the opportunities of various commercial and industrial callings, and through conferences with individuals, growing out of follow-up visits to the homes and places of employment. The small school must, of necessity, use the second method. Follow-up visits bring the home, the employer, and the school into close contact, and the pupil is considered in relation to his individual needs.

With these functions as a base, the program of studies is divided equally between academic and practical arts subjects. The academic work, for both boys and girls, includes oral and written English, Civics, Hygiene, Mental and Oral Arithmetic and Spelling. All academic subjects are related as closely as possible to the practical work which consists of household arts, cooking and sewing for the girls, and woodworking and general household repairs for the boys. It is our desire soon to add home nursing to the program for the girls, and sheet metal and electrical work for the boys.

Three rooms in the High School building were given over for our exclusive use, and a fourth has been used jointly with a High School Manual Training class. The milling machinery already in use in the High School, and sewing machines, a power machine, gas stoves, kitchen and dining room furniture, dishes and cooking utensils formerly used at the Girls' Vocational School were also placed at our disposal. Expense of installing new equipment and increased overhead charges were thus avoided.

New pupils are entering the school each week, making group instruction an impossibility within a short time of the opening of school; therefore, the class work must be individual to a large degree.

In the shops exercise work is reduced to a minimum, and all projects are man-sized, marketable products. Already

our list of products in the boys' school, all of which have been sold, and our large repeat order list, include baby swings, waste baskets, telephone tables and chairs, tea wagons, costumers, taboretts, ironing boards, kitchen tables, etc. In the girls' school marketable products were prepared for the high school lunch room and many articles of wearing apparel were produced by the sewing class. Our productivity returns to the State Department of Education showed, to June 30, 1921, products having a market value of \$958.81.

The membership of the school is always a varying quantity, due (1) to the dropping out of those who become sixteen years of age, and (2) to constant changing of city of employment by the students. During the school year 1920-1921 the total number of different students enrolled was 382, of which 157 were girls and 225 were boys.

About November 20, 1920 the business depression which swept the country caused a large increase in the group of temporarily unemployed minors who were required to attend Continuation School twenty hours per week. This problem is distinct from the problem of the four-hour group and involves a larger provision for room, instruction and equipment. In order to provide for this group an extra woman teacher was added to the corps. Business conditions are now tending toward normality, but the enrollment for this year to date is smaller than for the corresponding period of last year. The decrease in enrollment is due to the fact that more students of our school are becoming sixteen years of age than the number who are leaving regular schools to go to work. The scarcity of jobs makes the number who are leaving the regular schools far below normal, for no minor under sixteen years of age may leave school until he has a promise of employment.

The organization of this school was greatly facilitated by advice and suggestions from the Superintendent of Schools, and the High School administration has co-operated to make the school a success, and I wish to express my appreciation to all those who have shown interest and aided in the work.

#### Americanization Work.

Somerville, in common with many other cities in Massachusetts, especially those on the Atlantic coast in close proximity to ports of entrance, has many residents of foreign birth. Since the beginning of the World War the number has been increased by the large influx of immigrants to this country. A large number of these speak only the language of their native country, while others are wholly illiterate. The census of 1920 shows that there are 1200 persons, twenty-

one years of age or over, who are unable to write in any language, regardless of their ability to speak or read English. These people cannot mingle easily with English speaking people and they are at a disadvantage in all ways, especially in the matter of becoming acquainted with local institutions of government and society, and of becoming imbued with American ideals. Participation in governmental matters is not within their reach, due to regulations controlling naturalization. This condition is so serious that all units dealing with government have seen the necessity of giving the matter earnest consideration.

Massachusetts, which is acknowledged to be the leader in this respect, has passed a fine piece of legislation in Chapter 295, General Acts of 1919, later changed to Chapter 69, Revised Laws. This act authorizes any city or town, in co-operation with the State Board of Education, to establish classes for instruction in the use of English for adults unable to speak, read or write the same, and in the fundamental principles of government and other subjects adapted to fit for American citizenship. For such courses, the Commonwealth shall reimburse the city or town an amount equal to one-half the total expense of supervision and instruction.

On October 6, 1919 the School Committee voted to accept the provisions of Chapter 295 and, in consequence, classes were organized at the evening school centers at the Bell and Highland Schools and at the Glines School during the fall season of 1920. In November, 1920 a Director for the work was appointed and during the year 1921 two full time women organizers were added to the administration. The organizers also supervise and instruct as part of their duties.

The work already established was reorganized and reclassifications were made, conforming with the specifications of the State Board of Education, Division of University Extension, Department of Americanization. The students were graded in three groups, termed Beginners, Intermediates, and Advanced. The qualifications for these grades are as follows:

**I. Beginners.**

- a. Ability to talk. Pupils having no power of oral expression with or without some ability to understand the simplest forms of expression.
- b. Ability to read. Pupils able or unable to read in their own language, but unable to read simplest English intelligibly.

- c. Ability to write. Pupils able or unable to write in their own language but unable to write simplest English sentences from dictation.

## II. Intermediates.

- a. Ability to talk. Pupils able to speak some English well, those who have completed a Beginners' Course, or have had considerable association with English-speaking people.
- b. Ability to read. Pupils able to read simple sentences with understanding.
- c. Ability to write. Pupils able to write from dictation and able to compose short letters with some correctness in form and spelling.

## III. Advanced.

v

Ability to talk, read and write to a sufficient degree to be able to study principles of civics and government and history leading to an examination for Naturalization.

Certificates showing progress through the various stages of this program are provided for the students by the State Department.

New classes were organized and developed whenever the demand required, and new centers have been opened in the Bennett, Bingham, Morse, and Knapp schoolhouses. Factory classes have also been organized at the plants of the North Packing and Provision Company, New England Dressed Meat and Wool Company, Hinckley Rendering Company and at the factory of H. M. Hillson Company. Mothers' classes, meeting afternoons at the Glines, Morse, and Knapp schools, have been very popular and well attended. A Citizenship class which was organized at the club house of the Italian-American Citizens' Club of Winter Hill, was rewarded by the announcement by the Federal Examiner that all taking the examination had passed. The number of classes has been increased three-fold and the enrollment has been more than doubled.

A few years ago it was the general opinion that anyone could teach an evening school class, especially one composed of non-English speaking people. Later, trained day school teachers were found working in these classes, but it was soon found that the methods for day school work with children, without adaptation, cannot be made to serve for Americaniza-

tion classes for adults. There is a distinct pedagogy in this work with adults and a very distinct methodology; therefore, teachers for these classes must be specifically trained for the work.

A careful study of methods has shown that the Direct Method is the proper one to use in the teaching of English to non-English speaking adults.

In view of the scarcity of specifically trained and qualified teachers for this work in Somerville, a fifteen lecture Teacher Training Course was conducted for us by the State Department.

At the opening of schools this fall, in order to stimulate and arouse interest in the cause, both among the foreign-born and older residents of the community, a Citizenship Day Celebration was held on Columbus Day, October 12, under the auspices of the School Committee. The main feature of the celebration was the public mass meeting held in High School Hall, at which His Honor, Mayor Charles W. Eldridge presided and His Excellency, Governor Channing H. Cox made a patriotic address in which he told of the advantages enjoyed by American citizens which are denied the peoples of other countries. He urged the foreign-born to continue their education, at least until they were able to become naturalized. John J. Mahoney, State Supervisor of Americanization, spoke along the same lines.

Preceding the exercises in the hall there were spectacular parades from the Morse, Glines and Bennett districts. Music was furnished in the hall, on the grounds and for the parades by the 101st Infantry Band.

The appended table shows the scope of Americanization work in operation when the schools were closed for the Christmas recess.

Plans are under consideration for the establishment of several additional factory classes and mothers' classes in sections of the city where classes of this sort are not now conducted. Citizenship or Naturalization classes will be organized in any locality where a sufficient number of petitioners are found.

The results of the work during the year have been exceedingly gratifying to me, and I wish to give the credit and express my appreciation to the organizers, supervisors, and teachers for their faithful, earnest, untiring efforts to bring about the desired results.

Respectfully submitted,

EVERETT W. IRELAND,

*Director.*

## REPORT OF THE GARDEN SUPERVISOR.

Mr. Charles S. Clark,  
Superintendent of Schools,  
Somerville, Mass.

Dear Sir:—

Permit me to submit a report of my work as garden supervisor and agricultural teacher for the season of 1921.

**School Gardens.**

At the end of three years, dealing with boys and girls in the City of Somerville along the lines of garden work as a form of healthful and useful education, I feel as though I am qualified to make the statement that the successful carrying out to a completion of this definite project has been a success in Somerville. The general consensus of opinion among adult persons has been that children of fifth and sixth grade ages would not show an interest sufficient for them to actually complete a project such as that involved in the proper care of a garden. This year sixteen schools with a total enrollment of three hundred and thirty children cultivated approximately nine acres of land within the city limits, most of which was located on the City's Public Parks. Of these three hundred and thirty children, all but eight fulfilled all of the requirements and carried the work through to a successful finish. This was done in spite of the fact that the season of 1921 from the standpoint of weather conditions was one of extremes, which makes the carrying on of garden work very difficult and at times very discouraging. I truly believe that the lessons learned and the experiences gained by the three hundred and thirty boys and girls who had school gardens this year will be of lasting benefit to them in years to come. Very few changes were made this year in the conducting of school gardens. Each participant was given a piece of land containing three hundred square feet. The land itself was plowed, covered with dressing, and put in a condition for planting by the City Engineer's Department. All seeds and plants used in the school gardens were purchased by the supervisor, the children paying the cost of the same, which was 85 cents this year. All products raised were the property of the children to do with as they wished. The gardens were actually planted and cared for up to the close of school during school time, which in most cases amounted to about two hours per week. During the vacation the supervisor spent one-half day each week at each plot of land and every school gardener was expected to

be present that half day at least to care for his garden. The attendance during the summer vacation, even on the hottest days, is positive proof in itself that boys and girls are interested and are willing to work if they have the proper incentive and encouragement. As has been the case for the last two years, one of the requirements of garden work is the keeping of a garden record book. Each gardener is provided with such a book and an accurate record of all products taken from the garden and the disposition made of them is kept together with all expenses incurred in operating their garden. From a careful analysis of these record books the following figures may be of interest and show to a certain extent results of this work. The total value of all crops raised was \$8,000. This amount is divided into three parts; \$1,500 was sold by the children, \$4,500 was the value of the vegetables carried home and used by their parents, \$2,000 represents the value of the vegetables taken from the school gardens and canned for use during the winter months. One of the great advantages from canning work is that the boys and girls are organized into clubs and as such receive recognition from the State Department of Agriculture and the County Bureau of Agriculture and Home Economics. Through these two mediums, a keen interest is worked up among the participants in the offering of suitable prizes and the chance to make exhibits at various fairs and expositions in competition with club members carrying on similar work throughout the whole state. This year garden club members made exhibits at the Massachusetts Horticultural Society's Exhibit at Horticultural Hall, Boston; at the New England States Fair, Worcester; and also at the Middlesex County Fair at Waltham. At the horticultural exhibit in Boston, they won several cash prizes. At Worcester first prize of \$20 was awarded the Somerville Garden Club in competition with similar exhibits from all over the New England States. \$22 in money was also awarded the different exhibitors at the Waltham Fair.

#### Canning Clubs.

Canning clubs were organized and conducted through the two summer months by two school teachers employed by the Recreation and Playground Commission to carry on this work under my supervision. Five clubs were organized with a total enrollment of sixty-five children. The work was carried on at two canning centers, one in the Western Junior High School, the other at the Senior High School where the equipment necessary for the carrying on of this work is provided. Most of the children belonging to the canning clubs had a school garden

so that the vegetables canned during the season were freshly picked and of good quality which insures a canned product of the best. These canning clubs are also enrolled with the State and County Agricultural Departments and receive aid and benefit from them both. Canning club members are not only taught how to properly can all kinds of fruits and vegetables but they must be able themselves to explain and properly demonstrate the different steps necessary. Three girls, members of our canning clubs, were chosen as a demonstration team to represent Somerville in canning competitions carried on by the State Department of Agriculture. These competitive examinations were held at Watertown, Worcester, and Springfield. As a result of their superior work, they captured the first prize and are known as the champion demonstration canning team of this state for the year 1922. At the close of the canning season a public exhibition of their products was held in the basement of the Senior High School at which time two competent judges from the State Department of Agriculture were present and judged their products. Some idea of the quality of the work done by these children, whose average age is 13, may be determined from the score card returned to the supervisor by the judges. The average score obtained by all of the sixty-five members was 93.5; the highest score being 96.4.

#### Winter Instruction.

During the winter term, classroom instruction to boys and girls was given in the fifth and sixth grades along simple lines of garden work. By means of this instruction, the children having gardens were better prepared when the time for actual garden work was at hand. A supply of flower and vegetable seeds put up in small packages was purchased by the supervisor and sold to the school children at cost. In this way reliable seeds of the varieties best adapted to garden conditions found here in this city were placed in the hands of children. About 16,000 packages were disposed of in this manner. Through the co-operation and courtesy of the Warden of the City Farm, flower and vegetable seeds were started in the greenhouse and then transplanted to cold frames and later used in the school gardens. Children from the schools in the western part of the city were given valuable lessons in this phase of garden work, and it is the earnest desire of your garden supervisor that children in other parts of the city may get a little of this experience by means of the placing of some cold frames in the school yards. The cultivation of flowers was given more prominence in my work this year. I believe that if the children of this city can be interested in the cultivation

of the more hardy and quick-growing flowers, the general appearance of the homes as well as the grounds surrounding our school buildings will greatly benefit. This year flowers were planted in beds about the buildings of five of the school-houses and the children themselves cared for and looked after the same all during the season. This fall about 4500 geranium slips were started in sand boxes in the school rooms and later transplanted to individual pots. These have been growing in the school rooms all winter and will be used for bedding purposes around the building in the spring.

#### Home Economics.

In each of the four Junior High Schools, bread and garment making clubs were successfully carried on during the winter months. These clubs were conducted after school hours by teachers who gave their time and services for this purpose. The rules and requirements of the State Board were complied with and very satisfactory results have been obtained. Each club has completed all these requirements and made a public exhibition of their work. At this exhibit a competent judge from the State Board was present, scored the exhibits, and made the award of prizes. A member of the club at the Southern Junior High School has been selected to represent the State of Massachusetts at a convention to be held in some Southern States next summer, which brings more notoriety to our city. She was chosen from among a great many other club members from all over this state.

In closing, permit me to express my appreciation to all those who have shown an interest and have been a help in this branch of school work. It is through the co-operation of principals and teachers and the interest and work of the boys and girls themselves that this work has been made a success.

Very truly yours,

WILLIAM B. MOORE,

*Garden Supervisor.*

#### REPORT OF THE SUPERVISOR OF PHYSICAL EDUCATION.

Mr. Charles S. Clark,  
Superintendent of Schools,  
Somerville, Mass.

Dear Sir:—

Socialized physical training in the public schools of Somerville is now well established. We have many hundred

very capable pupil-leaders in the primary and grammar grades and in the Junior High School and in the Senior High School.

This has been accomplished through the enthusiastic and capable work of our masters, principals, and teachers. It is generally conceded by expert visitors that our formal gymnastics, our setting-up exercises, and our classroom games, are most vigorous and intensive and it is further conceded that this is due to the system of pupil leadership, which was first developed here in Somerville.

This system is psychologically sound. It has led to a more vigorous participation of all pupils in daily exercise than has been possible to achieve elsewhere where all the leading is done by the regular classroom teachers. This is, therefore, a very valuable innovation because it insures a high degree of physiological efficiency of every pupil during school hours.

The system in addition has high social values since it systematically develops and trains leaders, not only in physical activities but in all school activities. This in turn will fit our boys and girls to find places in the ranks of leading men and women in the larger affairs of city, state, and country.

On account of my firm belief in the efficacy of socialized physical training as a means, not only of furthering physical and mental hygiene, but also social welfare, and, because I believe that we should now extend this system to extra-school sports, games, and plays, it may be well to indicate some of the value of stimulating leadership.

I believe that physical education in elementary schools should primarily promote a vigorous and universal play life.

The application of psychology in physical education overwhelmingly proves that children love to play games. The old racial instincts are within the child. These would find universal expression in vigorous and wholesome motor activities, but are retarded, and finally stunted, by modern environment. Under modern conditions these instincts find motor outlets mostly in semi-active activities. The whole reacts unfavorably upon physical development, upon intellectual training and upon citizenship.

This is borne out by the rapid growth of show places and movie shows catering daily to a large percentage of our children in every city and town.

The inability of parents to play with their children and the growing decline of physical work and active forms of recreations of children in the home and nearby, and the prosaic work of home chores add their share in the decline of spontaneous indulgence and love for a vigorous motor life. The children follow the parent's trend in seeking passive forms of recreations, thereby lowering still further the reservoir of sur-

plus nervous vitality, which can only be built up through vigorous exercise of the fundamental muscles and a resting of the more delicate reserve centres.

Inheritance plus environment determines the child's physical and mental development.

The motor experiences of the past of the race have pretty definitely fixed our instincts and public education cannot afford to neglect these instincts.

Education cannot be successful if on the one hand it emphasizes drill and regimentation in difficult and unpleasant tasks and if on the other hand it neglects to emphasize tasks which are pleasant and easy to learn and therefore instinctive.

Such a scheme cannot promote vigorous health because it systematically impairs nervous energy instead of creating surplus vitality.

It is bad enough that we are having a growing percentage of school children who develop abnormal postures and poor body mechanism. This forces us to employ corrective gymnastics and setting-up drills. I believe that the paramount function of physical education should be preventive training which will make, in the future, corrective gymnastics less needed.

We must employ methods which will stimulate vitality and nervous energy by means of actions that are mostly instinctive.

We must use the inherited instincts for certain motor activities by modifying our schoolroom environment and our methods so that the children can do daily what they want most to do and which comes easy for them to do.

Regimentation in physical education has its important function and should have a place in our program, but our first aim must be to nurture the love for a vigorous motor life which is within each child and which we systematically inhibit in the modern home and in our modern school methods.

We all recognize the disappearance of opportunities for a rich and spontaneous neighborhood play-life in our modern civilization. Until recent decades man's mental as well as physical evolution was accomplished through the use of his muscles, and his social advancement came about through co-operative activities and progressive development of group organization.

We must remember that this evolution was greatly enhanced by the fact that children have always imitated in their play-world the work and life of their elders.

Instinctively they recapitulated the life-history of the race, and instinctively, they advanced to co-operative group activities and to co-ordination to leaders.

Our American schools must help in reconstructing a child-

world, and if we try to do this we will find the sad fact that our child-world lacks child leaders, and that there is but little in our schools which will stimulate small group organization.

The dearth of child leaders in our present day meagre child play-world is undoubtedly due:

1. To the physical environment; stone pavements restricting the first instinct for running, skipping; no trees, no shade, no earth to dig in, no plants to plant, no animals to care for, only flats, only apartments, only small cages everywhere.
2. To the frequent change of domicile of parents, thereby preventing children of equal age and related instincts from getting thoroughly acquainted, thereby interfering with the formation and organization of groups and gangs.
3. This increases difficulty of forming homogeneous groups. It prevents the groups from recognizing capable leaders, and prevents the natural born leaders from practising leadership.
4. This is further emphasized by racial, religious and political differences, breaking up the grown-up neighborhood life. This in turn interferes with the stimulation formerly received through children's play while visiting in a number of congenial homes. This exerted formerly profound influence upon physical, mental, moral and social development.

Earl Barnes says in his book "The Psychology of Childhood and Youth" — "In the past, leaders originated ideas, they initiated movements, they gathered a following about them, they trained them to their point of view, and they created new conditions, new opportunities and new institutions.

"The group followed leadership with eagerness and later learned discrimination. Frequently different leaders led in different activities.

"In the traditions of primitive society it is a divinity or a hero who founds the city, establishes laws, settles government, wins wars, or invents writings, music, dances and games."

Thomas Carlyle in his "Heroes and Hero Worship," shows this also. — "The genetic view of *modern* society minimizes the value of individual leadership. We see that governments and religions grow, and they cannot go far ahead of the development of the people. The degree of economic determinism also limits both the group and its leaders.

"We have also learned how tradition gathers around

personality, blending under one name the virtues and acts of many people. And yet we recognize that individual variants may give us leaders of incalculable value for all the purposes of life."

#### What Makes Leadership?

The leader must have courage, even daring, a strong will and self-esteem, for he must be able to stand alone. He must have vision and inventiveness, for he must lead the way.

He must have a keen sense of the values in others, that he may select able assistants.

He leads through affirmation, repetition, and contagion.

#### Loyalty Among Children!

In their weakness and absence of sense of law, and with their strong gregarious instinct, children naturally attach themselves strongly to persons. They love to lead and they love to follow. Leadership with them, as with savages, is largely a matter of strength. The boy who can lick the others, jump farther, or do more daring things, becomes captain.

Intellectual supremacy counts for little. Discipline is maintained mainly by force and fear, though if the leader has a sense of *fair play* it helps him in the long run.

#### Leadership Through Prestige!

About the age of twelve, various forms of what we may call made-up leadership become important. Social position begins to be recognized. Wealth and the possession of a fine home, servants, and carriages, may give a child an enviable position. A little later, the way he wears his clothes, his manners, intellectual ability, or marked self-control give him a position of prominence.

#### Two Kinds of Leaders in America!

The masses admire strenuous characters who bluster and who also deliver the goods, the political bosses.

The more intelligent class admires and follows intelligent, self-controlled, and devoted men.

#### A Democracy Must Work to Increase This Second Class.

Here we have the mental, moral and social significance of the value of stimulating pupil leaders in physical education. What an opportunity in turning our teachers from mere teachers of physical stunts into organizers of an efficient play-world of children; from mere lecturers of personal hygiene into engineers of psycho-physical happiness.

We find the physical significance of the value of promoting pupil leadership in physical education, in the child's fundamental faculty of learning by imitation. It is much better for him to imitate the vigorous, graceful, normal and child-like poise and movements of his mates than the fancy and age-handicapped movements of us teachers.

Let me point out the wonderful possibilities which will develop if these same very capable pedagogues and experts of child nature would devote their energies to finding among the strong and vigorous, and the straight and graceful, those children who have the elements of good leaders in their mental, moral and physical machinery and then train these for self-controlled and devoted leadership.

All this can be done in every classroom by organizing six to eight groups. This can be developed further by the help of school yards and playgrounds and by gardening and excursions into the woods and fields; not only in formal gymnastics as part of our medicine which we modern people must learn to take, but in games and play, in teams and clubs in scouting and gardening, in hiking and marching.

These germs planted in the daily sessions in the school room will germinate in the play-world, in the home and back yards and on playgrounds.

Even if we have a specialist of such a broad system of motorizing, socializing our children in every city school building, unless this specialist develops pupil leadership he cannot have effective hygienic practice daily in every school, but at most he can have only two sessions a week in the gymnasium. This may be good as far as it goes but it can at best be only academic regimentation.

We should teach ideals just ahead of the group, teach heroes daringly, "a diamond with a flaw is better than a perfect pebble." Recognize leadership in the home and in the school. Give it its head; give it opportunity for expression through varied organizations, emphasize fundamental and instinctive motor activities.

Emphasize general excellency; moral excellence may give us prigs; intellectual ability may make exploiters, physical strength may make brutes.

Work for character; praise it; and give it room to act.

I beg to submit, therefore, this outline of a program for the development of a broad system of physical training which will lead to the participation of large numbers of students in athletics, sports and games, in addition to required formal physical exercises.

This program, to be effective, should ultimately include every boy and girl, i. e., it must give an opportunity for the weakest as well as the strongest pupil to participate in some form of wholesome physical activity in addition to the required gymnastics and setting-up exercises.

Even if it were a financial possibility for the School Board of Somerville to furnish each Junior High School with a paid director of physical training for the inauguration and carrying out of such a broad program of school and extra-school activities I would advise against it, since it could easily become too arbitrary and since it could not give to the student body the social experiences and training which are so essential in American education.

“To emancipate each child from external restraint and guidance and to make him self-directing and self-supporting.”

— PROF. PAUL HANUS. *“Aim of American Education.”*

To meet the physical needs of every pupil a carefully selected variety of athletics, games and sports could easily be selected and the rule be made that every pupil, in order to receive credit, must participate regularly in one or more of these activities.

It would be a comparatively easy matter to work out a system of checking and credits, etc., but on account of the psychological significance of these activities they are our best means for intensive social training.

There is a natural love, a natural interest and enthusiasm for games and sports, etc., in every normal youngster. If this natural fascination is directed into wholesome and healthful individual and social or co-operative activities they can easily be organized into self-directing social groups. This natural liking with the variations of athletics and tastes must be given the fullest opportunities for self-expression, and this can best be accomplished under pupil leadership and self-management with the sympathetic guidance of expert advisors.

These expert advisors should be, on the social side, a capable school teacher, and on the technical side a capable coach or physical training expert.

The splendid work which is already being done in our Junior High School in Physical Training under pupil leadership and with the most excellent sympathetic social guidance of masters and teachers, is sufficient evidence that a program of sports and games, of military tactics, of hiking, of drum and fife corps, of bands, etc., etc., is bound to be very successful because in comparison all these are vastly more interesting than the formal setting-up exercises.

This whole scheme of coaching in certain sports and the teaching of certain games which can be carried on even in our school yards, provided more attention were given to their upkeep, should be handled somewhat like our training of pupil leaders in the Junior High School. Each Junior High School has sent on an average, fifty pupil leaders to the armory. With these a teacher-advisor was always present. This teacher took in the instruction which the director of physical training gave to the leaders. The leaders were taught the technique of the exercises and were taught to handle their classes and divisions. The reason we had a teacher with each group was the necessity of having somebody in each school capable of advising the leaders during school hours or at any time they needed assistance. In this manner we have annually trained from 200 to 400 to be capable leaders. They have done most valuable work which has been noted by many experts in physical education as a most remarkable value of pupil leadership. The scheme of developing physical activities for children outside of setting-up exercises should be handled in the same manner. This does not mean that we are to inaugurate only major sports but that we must develop a large variety of activities which can be carried on in school yards and small fields and on streets which are safe for play. I believe that this is the most effective plan for developing a broader system of education in Somerville where we are handicapped by lack of halls, gymnasiums and proper school yards. The scheme will have to be started with a very few activities and the director of physical training will probably have to give a regular course of training to these leaders, in games suitable to our conditions in Somerville. But where larger sports are possible we will have the benefit of a unified system of coaching which insures our boys coming to the High School well prepared for participating in varsity contests with other cities and towns.

The same system should, of course, be extended at once to the girls of the Junior High Schools. If we aim at greater health of our future young manhood, we should really begin with womanhood. Yet it is my conviction that organization and management as well as activities be segregated as much as possible since it is for the best interest of girls that they practice somewhat gentler sports than boys.

This scheme as outlined above is the least expensive of any scheme of physical education now in use in this state. I most earnestly urge its approval for immediate adoption.

Respectfully submitted,

ERNST HERMANN,

*Director of Physical Education.*

## HISTORY OF THE SOMERVILLE HIGH SCHOOL.

EDITH L. HURD, A. B., LL.B.

*Teacher of English, Somerville High School.*

The development of the Somerville High School may be divided into four periods;—the first extending from 1852, when the school was first organized, to 1872 when the structure known later as the Somerville Latin school was erected; the second extending from 1872 to 1895 when the English High School building was erected; the third extending from 1895 to 1911 when the Latin High school and the English High school were united to form the Somerville High school; and the fourth extending from 1911 to the present time.

On April 28, 1852, the first high school building at the corner of Highland avenue and School street was dedicated, and on May 3, 1852 the school opened with two teachers and sixty-one pupils in attendance. The town report of March 6, 1854 states that the subjects taught were reading, writing, arithmetic, grammar, geography, history, algebra, geometry, trigonometry, natural philosophy, drawing, Latin, French, and composition.

On March 4, 1872, the second period in the history of the school begins with the dedication of the second high school building known later as the Latin school. At this time the school had six teachers and one hundred and eighty-one pupils.

**Course of Study.**

“The objects of the school are three in number:— as a finishing school to prepare the pupils for active life; to prepare pupils for college; to prepare pupils for scientific and professional schools.

“There are three courses of study: the Regular Course; the Classical or Preparatory to College Course; the English Course. Each course requires four years.

**First Year.— Regular Course and Classical Course.**

Algebra, General History, English Literature and English Composition, Latin. Bookkeeping may be taken instead of history the first half of the year.

**English Course.**

Arithmetic, Grammar and Composition are substituted for the Latin of the Regular Course.

**Second Year. — Regular Course.**

Physics, Geometry, English Literature and English Composition, Latin.

**Classical Course.**

Latin, Greek, Physics, Geometry, English Literature and English Composition.

**English Course.**

Physiology and French are substituted for the Latin of the Regular Course.

**Third Year. — Regular Course.**

Chemistry, English Literature and Composition, Latin, French.

**Classical Course.**

Latin, Greek, English Literature and Composition, Ancient History and Geography, Physics, French, a review of Arithmetic, Algebra, and Geometry.

**English Course.**

Civil Government and Natural History are substituted for the Latin of the Regular Course.

**Fourth Year. — Regular Course.**

Geology and Mineralogy, Astronomy, History, Botany, French, English Literature, Rhetoric and English Composition. Latin may be taken as an extra study two, three or five times a week, or substituted for one of the other studies. Geology and Mineralogy, Astronomy, and Botany are pursued half the year.

**Classical Course.**

Latin, Greek, French, Mathematics, English Literature and Composition. Reviews of earlier studies.

**English Course.**

Same studies as in the Regular Course.

The course preparatory to college is identical with the Regular Course during the first year. Parents are thus not

called upon to decide in regard to the preparation of their sons or daughters for college until after a trial of one year in high school studies.

Capable pupils, at the request of their parents, are allowed to pursue extra studies during any year.

Pupils are allowed five years instead of four for completing any course, if the parents make such request, in which case a smaller number of studies is pursued each year.

Those wishing to change from one course to another are allowed to do so at the beginning of any year.

No classes are formed for less than four pupils.

Pupils in a course preparatory to the scientific schools take a part of the studies in the Regular Course, a part of those in the Classical Course, completing the course regularly in four years. Those who are capable, and desire it, are allowed to complete the course in a shorter time.

Pupils wishing to be prepared for the professional schools have a special course marked out for them to meet their wants."

In 1878, about twenty-five years after the first published report of the course of study, the subjects offered in the curriculum were grouped under three courses,—the Regular, the College, and the English. Subjects offered at this time were Algebra, Latin, history, bookkeeping, English Literature, geometrical drawing, geometry, trigonometry, natural philosophy, chemistry, German, geology, botany, arithmetic, Greek, physics, physical geography, grammar, French, civil government, and astronomy.

In 1895 occurred the dedication of the English High school and the separation of the Somerville High school into the Somerville Latin High School and the Somerville English High School. The Latin school had nine teachers and two hundred and seventy-five pupils. The course of study was preparatory for college and included English, Greek, Latin, German, French, history, algebra, geometry, and physics. These subjects were all required subjects with the exception of physics, which was an elective, and Greek, for which German could be substituted.

The English High School in 1895 had nineteen teachers and five hundred pupils. Its course of study consisted of two groups of studies, required subjects and elective subjects, the electives to be "chosen with regard to the aptitude of the pupil and his plan for future work and study." The course of study for the English High School was based on two important principles,— "the necessity of a broad training for all pupils and the recognition of individual claims for development in the direction of aptitudes and desired ends."

The subjects offered were the following:—Algebra, English, history, drawing, elocution, ethics, music, physical train-

ing, botany, French, German, Latin, manual training, mechanical drawing, zoology, physics, physiology, bookkeeping, chemistry, commercial arithmetic, stenography, typewriting, analytic geometry, solid geometry, plane geometry, astronomy, commercial law, geology, and trigonometry.

In 1911 came the next important change in the school when the Somerville Latin and the Somerville English High Schools were united and the present Somerville High School was organized. The curriculum today comprises six distinct courses, — the College, the Scientific, the Normal, the Household Arts, the General, and the Commercial.

These courses include all the subjects taught both in the Latin and the English schools and the following additional ones: — Spanish, civics, biology, dressmaking, cooking, millinery, food study, design, textiles, hygiene, commerce and industry, penmanship, commercial history, business practice and salesmanship, household chemistry, household management, community hygiene, and applied music.

During a period of nearly seventy years the Somerville High School has increased from a school of two teachers and sixty-one pupils to one of seventy-five teachers and two thousand pupils, and its course of study has been developed to include nearly fifty different subjects.

#### SOMERVILLE TEACHERS' ASSOCIATION.

1921-1922.

President, James S. Thistle

Vice-Presidents, { Joseph S. Hawthorne  
                          } Carrie Armitage

Secretary-Treasurer, Geneva C. Tobey

Executive Committee

Charles S. Clark, ex-officio.

Bernice Newborg, High  
Elizabeth J. Mooney, E. Junior  
Arthur E. Gordon, S. Junior  
Ruth Hawkins, N. Junior  
Florence Hopkins, W. Junior  
Phillip J. Heffernan, Boys' Voc.  
Everett W. Ireland, Cont.  
Grace Allen, Prescott  
Nellie W. McPheters, Hanscom  
Kate Gifford, Bennett  
Sue Fitzpatrick, Baxter  
Mary T. McCarthy, Knapp  
Mary A. Mullin, Perry  
Katherine M. Fox, Cummings

Alice B. Frye, Pope  
Berta M. Burnett, Edgerly  
Monira C. Gregory, Glines  
Elizabeth J. O'Neil, Bingham  
Susie L. Luce, Carr  
Helen T. Smith, Morse  
Mary Winslow Durell  
Alice E. Morang, Burns  
Ethel F. Morang, Proctor  
Helen L. Galvin, Brown  
Eva M. Barrows, Highland  
Clara G. Hegan, Lowe  
Elva Cutler, Cutler  
Lillian M. Wentworth, Lincoln

The meetings held under the auspices of this association in the year 1921 were as follows:

- April 27, 1921 — Dr. Ilhyer H. Lichliter of Newton. Subject: "Modern Social Tendencies."  
 October 17, 1921 — Miss Charl O. Williams, President of National Education Association. Shubert Male Quartette.  
 December 7, 1921 — Mr. Philip Davis, Author-Lawyer. Subject: "Our Boys and What Ails Them." Mr. Harry Newcombe, Baritone Soloist.

### SOMERVILLE TEACHERS' CLUB.

#### Officers, 1921 - 1922.

President, Miss Clara G. Hegan  
 Vice-Presidents,                    } Mrs. Mary B. Soule  
   } Miss Harriet E. Tuell

Recording Secretary, Miss Irene Vincent  
 Corresponding Secretary, Miss Bernice Newborg  
 Treasurer, Miss Alice M. Saben  
 Auditor, Miss Mary H. Joyce

#### Object.

The object shall be to secure a close union among the women teachers in Somerville; to promote the spirit of mutual helpfulness; to advance professional interests; to create a deeper sense of the dignity of the profession; to unite the interests of the home and school.

#### Program.

- January 12 — Illustrated lecture by Manley Bacon Townsend,—“Special Adaptation of Birds.”  
 February 8 — A Shakespearean Recital by James Plaisted Webber, M. A.  
 March 17 — Club Play.  
 April 12 — Lecture by Prof. Dallas Lore Sharp,—“Education for Democracy.”  
 May 10 — Supper, — Speaker.  
 October 26 — Community Singing; Five-minute Talks on Current Topics by Junior High School men.  
 November 9 — Concert: Jean Bedetti, Violin cellist; Mme. Lucille Delcourt, Harpist; Mme. Florence Ferrell, Soprano.  
 November 16 — Young Peoples' Symphony concert.  
 December 14 — Christmas Party,—Eleanore Soule Hayden, Organ chimes.

## CONTENTS OF APPENDIX.

## SUMMARY OF STATISTICS.

Population and school census.  
 School buildings.  
 Teachers.  
 Attendance for year.  
 Cost of school maintenance.  
 Teachers' salaries.  
 Results of eye and ear tests.

## MISCELLANEOUS TABLES.

## CONCERNING FINANCE.

No. of Table.

1. Schedule of school property.
2. Cost of maintaining schools, school year 1920-1921.
3. Cost per capita of maintaining schools, school year 1920-1921.
4. Cost of maintaining schools for a series of years.
5. Cost per capita for maintaining schools for a series of years.
6. Amount spent annually for new school buildings and for repairs for a series of years.

## CONCERNING PUPILS.

7. Population and school registration.
8. Attendance, etc., of the schools for school year 1920-1921.
9. Statistics of the high school for school year 1920-1921.
10. Pupils by grades, June, 1921.
11. Separate statistics for high, junior high, elementary and vocational schools, for school year 1920-1921.
12. Admissions to first grade in September.
13. Number of junior high school graduates, 1921.
14. Truant statistics for a series of years.
15. Evening school statistics, 1920-1921.
16. Grammar school promotees for a series of years.
17. Attendance statistics of all schools for a series of years.
18. Statistics of the high school for a series of years.
19. Promotions, junior high schools, 1921.
- 19A Promotions, elementary schools, 1921.

## CONCERNING TEACHERS.

20. Resignations of teachers, 1921.
21. Teachers elected in 1921.
22. Leave of absence of teachers.
23. Transfers of teachers.
24. Number of teachers employed for a series of years.

## STATISTICAL AND GENERAL TABLES.

25. Changes in textbooks, 1921.
26. High and Junior High school graduation exercises, 1921.
27. Vocational school graduation exercises, 1921.
28. Organization of school board for 1922.
29. Teachers in service January, 1922.
30. Officers in service January, 1922.
31. School janitors.

## SUMMARY OF STATISTICS.

## 1.—POPULATION AND SCHOOL CENSUS.

Population, state census, 1895 .....	52,200
Population, United States census, 1900 .....	61,643
Population, state census, 1905 .....	69,272
Population, United States census, 1910 .....	77,236
Population, state census, 1915 .....	86,854
Population, United States census, 1920 .....	93,033
Children between five and sixteen years of age, April, 1921, by school census .....	18,139

## 2.—SCHOOL BUILDINGS.

Number of school buildings in June .....	30
Number of classrooms in use in June .....	381
Valuation of school property .....	\$2,276,700.00

## 3.—TEACHERS.

	*1920	*1921	Change
In high schools .....	68	75	+7
In junior high schools .....	113	116	+3
In elementary schools .....	209	211	+2
In kindergartens .....	8	13	+5
Total in elementary schools .....	217	224	+7
Vocational school for boys .....	7	9	+2
Independent Household Arts .....	2	2	0
Atypical classes .....	3	3	0
Cadet teachers .....	3	5	+2
Special .....	10	11	+1
Continuation .....	—	5	+5
Americanization .....	—	2	+2
Total .....	423	452	+29

## 4.—ATTENDANCE FOR YEAR.

	*1920	*1921	Change
Entire enrollment for the year .....	14,091	14,500	+409
Average number belonging .....	12,836	13,396	+560
Average number attending .....	11,807	12,533	+726
Per cent. of daily attendance .....	81.9	93.6	+1.7
High school graduates .....	241	316	+75
Junior High school graduates .....	705	877	+172

## 5.—COST OF SCHOOL MAINTENANCE.

	*1920	*1921	Change
Salaries of teachers .....	\$598,589 80	\$700,975 76	+102,385 96
Salaries of officers .....	14,704 26	13,883 66	—820 60
Cost of books and supplies .....	40,078 68	26,328 84	—13,749 84
Cost of light .....	10,091 82	12,162 57	+2,070 75
Cost of janitors' services .....	56,381 07	61,435 42	+5,054 35
Cost of fuel .....	37,083 21	63,016 60	+25,933 39
Rent of Armory .....	750 00	350 00	—400 00
Total cost of day and evening schools .....	757,678 84	878,152 85	+120,474 01
Per capita cost .....	57 23	66 55	+8 32
Cost of high school instruction	111,784 91	125,319 48	+13,534 57
Per capita cost .....	71 93	75 77	+3 84

\*School year.

## 6.—MISCELLANEOUS.

	*1920	*1921	Change
Paid for new school buildings .....	\$200 00	\$3,285 00	+\$3,085 00
Repairs and permanent improvements .....	44,285 91	39,573 47	—4,712 44
Total school expenditures	802,164 75	921,011 32	+118,846 57
Number of dollars spent to maintain schools out of every \$1,000 of valuation .....	9 03	10 12	+1 09
Valuation of city .....	83,910,855 60	86,718,289 60	+2,807,434 00
Number of dollars spent for all school purposes out of every \$1,000 of valuation .....	9 56	10 62	+1 06

\*School year.

#### Cost of the Schools.

The total amount spent for the maintenance of the schools of Somerville for the school year ending June 30, 1921, is \$878,152.85.

This includes the sums spent for care of school buildings, including janitors' services, fuel, light, and school telephones; the amount paid for salaries of officers, and the amount spent for school supplies; and the sum paid for salaries of teachers.

The expenditure for *care for school buildings* is wholly in charge of the City Government.

The amount paid for janitors is . . . . .	\$61,435 42
The cost of fuel is . . . . .	63,016 60
The cost of light is . . . . .	12,162 57
Rental of Armory . . . . .	350 00
<hr/>	
A total cost of . . . . .	\$136,964 59
The cost per capita . . . . .	10 22
Cost of repairs . . . . .	39,573 47

The second important expenditure is wholly under the control of the School Committee and is covered by what is known as the "*School Contingent*" appropriation. The following is the itemized account:—

CLASSIFIED STATEMENT SHOWING DISTRIBUTION OF EXPENDITURES

School	SALARIES		TEACHERS		Administration	Books	Bookkeep- ing Blanks	Book- binding	Maps and Charts	White Paper	Manila Paper	Blank Books	Pencils, Pens, etc.	Station- ery	Domestic Science Supplies	Drawing Supplies	Seat Work and Kindergarten Supplies	Labor- atory Supplies

For Supplies ..... \$38,747 33  
 For Salaries ..... 12,320 63

Total spent from Contingent \$51,067 96

Expenditures.	Total.	DAY SCHOOLS.		EVENING SCHOOLS.		CONTINUATION SCHOOLS AND AMERICANIZATION WORK
		High and Vocational	Elementary	High and Vocational	Elementary	
Officers' Salaries.....	\$13,883.66					
Office Expenses	3,584.60					
Textbooks.....	1,658.38	\$853.71	\$724.50			\$80.17
Stationery and Supplies and Other Expenses of Instruction.....	16,970.56	11,078.29	5,518.78	\$19.37	\$27.54	326.58
Miscellaneous (Tuition, etc.)	4,115.30	1,070.13	2,861.46	45.32	35.13	103.26
<b>Total .....</b>	<b>\$40,212.50</b>	<b>\$13,002.13</b>	<b>\$9,104.74</b>	<b>\$64.69</b>	<b>\$62.67</b>	<b>\$510.01</b>

The third, and by far the largest, element of the cost of schools is the sum spent for the *salaries of teachers*. This expenditure is under the control of the School Committee.

The following statement shows the distribution of the sums paid for salaries:—

Expenditures.	Total.	DAY SCHOOLS.		EVENING SCHOOLS.		CONTINUATION SCHOOLS AND AMERICANIZATION WORK
		High and Vocational	Elementary	High and Vocational	Elementary	
Supervisors .....	\$9,550.00	\$1,553.50	\$7,996.50			
Principals.....	52,837.00	13,088.00	35,148.00	\$891.00	\$216.07	\$3,493.93
Teachers .....	638,588.76	192,724.47	431,023.27	5,753.00	756.18	8,331.82
<b>Total .....</b>	<b>\$700,975.76</b>	<b>\$207,365.99</b>	<b>\$474,167.77</b>	<b>\$6,644.00</b>	<b>\$972.25</b>	<b>\$11,825.75</b>

The *total outlay* for all school purposes includes all of the preceding and the sums spent for schoolhouse repairs and new buildings.

The *total outlay* for the school year ending June 30, 1921, is as follows:—

Care .....	\$136,964 59
Contingent .....	40,212 50
Salaries .....	700,975 76
<b>Total for school maintenance .....</b>	<b>\$878,152 85</b>
<b>Paid for repairs .....</b>	<b>39,573 47</b>
<b>Paid for new buildings .....</b>	<b>3,285 00</b>
<b>Total for all school purposes .....</b>	<b>\$921,011 32</b>

Each dollar of the sum spent for the support of schools has been divided in the following proportion:—

	1916	1917	1918	1919	1920	1921
Janitors' salaries ....	\$0.077	\$0.076	\$0.079	\$0.097	\$0.074	\$0.070
Heat and light .....	0.059	0.066	0.081	0.057	0.063	0.085
Administration .....	0.017	0.018	0.017	0.017	0.020	0.015
School supplies .....	0.058	0.062	0.064	0.067	0.053	0.030
Teachers' salaries ....	0.789	0.778	0.759	0.762	0.790	0.800
Total .....	\$1.000	\$1.000	\$1.000	\$1.000	\$1.000	\$1.000

*Per Capita Cost.* The proper method of comparison of the cost of schools year by year is to consider the sum spent for each pupil in the average membership. In this computation we exclude the cost of evening schools, and the vocational schools. The following shows:—

THE PER CAPITA COST OF DAY SCHOOLS FOR 1920 AND 1921.

	High School.			Junior High Schools.			Elementary Schools.			All Day Schools.		
	1920.	1921.	Change	1920.	1921.	Change	1920.	1921.	Change	1920.	1921.	Change
Instruction.....	\$73.04	\$77.20	+\$4.16	\$57.09	\$61.47	+\$4.38	\$36.99	\$41.70	+\$4.71	\$45.90	\$50.73	+\$4.83
Supplies.....	8.51	4.86	-3.65	3.18	2.09	-1.09	1.76	.84	-0.92	2.90	1.63	-1.27
Care.....	12.72	13.96	+1.24	7.18	8.97	+1.79	6.88	9.08	+2.20	7.66	9.62	+1.96
Total.....	\$94.27	\$96.02	+\$1.75	\$67.45	\$72.53	+\$5.08	\$45.63	\$51.62	+\$5.99	\$56.46	\$61.98	+\$5.52

Including the cost of maintenance of evening schools, the per capita cost is as follows:—

	1917	1918	1919	1920	1921
Cost of Instruction .....	\$26 72	\$29 58	\$31 82	\$44 34	\$50 07
Cost of Supplies .....	2 05	2 40	2 45	2 80	1 60
Cost of Care .....	4 61	6 09	6 43	7 45	9 62
Total .....	<u>\$33 38</u>	<u>\$38 07</u>	<u>\$40 70</u>	<u>\$54 59</u>	<u>\$61 29</u>

An examination of these tables shows that we have paid \$4.16 more for the instruction of each pupil in the High School than in 1920, and \$3.65 less per pupil for supplies.

The elementary schools have cost \$4.71 more per pupil for instruction, and ninety-two cents less for supplies.

The amount spent for the school year 1921 was \$10.12, or \$1.09 more than was spent in 1920. The amount yielded for each child in the average membership of the schools for 1921, not including the vocational schools, was \$61.29.

#### Teachers' Salaries.

The salaries paid to teachers in January, 1922, are as follows:—

1 man .....	\$4,100	8 women .....	\$1,700
1 man .....	3,300	25 women .....	1,650
4 men .....	3,100	2 men, 20 women .....	1,600

### Report of the Trustees.

---

To the Honorable, the Mayor, and the Board of Aldermen of the  
City of Somerville:

Gentlemen: The forty-ninth annual report of the trustees  
of the public library is herewith respectfully submitted; being  
the report of the librarian and tables of statistics of operation.

Very respectfully,

The Board of Trustees, by

THOMAS M. DURELL,

President.

## REPORT OF THE LIBRARIAN.

Gentlemen of the Board of Trustees:

The forty-ninth annual report of the Somerville Public Library, for the year 1921, is herewith submitted.

The home circulation of books during the year was 482,048. The circulation varies from year to year around the half million mark. This impressive figure represents the travel of books to and from the homes of Somerville. To this must be added the use of books within the four library buildings. This normal and legitimate wear and tear of daily use results in an average annual decrease of 6,230 volumes. It is striking evidence of the place of the library in the life of the community.

It is obvious that if the library is to be maintained even at its present size and usefulness, and progressive deterioration is to be avoided, the supply of new books must at least equal the annual decrease. The number that we were able to add in 1921, 3,912, falls far short of the requirement. While books have been increasing in price our appropriation has been decreasing in amount, our library decreasing in size, and in resources to meet the demands that are made upon it. At the prevailing average cost of books a total appropriation of not less than \$9,843, distributed between our four buildings, will be required to replace the annual shrinkage. To maintain the library at a given level, however, is but a mediocre standard. To retrieve our position as a growing institution is the great problem that confronts us.

We are glad to make especial mention of two beneficent gifts of books. The Union Square Branch has received from Mr. John E. Locatelli 120 books of standard literature in the Italian language. These were selected by an Italian scholar and were imported by Mr. Locatelli. Mr. Alexander Garbati has presented to the same branch a twenty-volume set of the novels of Sir Walter Scott, also in Italian. These books will be greatly appreciated by the many people of Italian birth and extraction who use this branch. To the generous donors the library extends its sincere thanks.

Through the efforts of Miss Worthen, Branch Librarian at Union Square, a community Christmas tree was provided for the children whose recorded attendance during the year at this Branch was over 90,000. On Saturday afternoon before Christmas some nine hundred were entertained with music and story telling, and were treated to gifts of candy, pop-corn,

and cookies. Mayor-elect Webster was present and spoke briefly to the children. To the numerous friends who contributed money and services to make a happy day the library expresses its deep appreciation.

Attention is called to the exceptional opportunity to utilize the upper floor of the Union Square building, now unoccupied, for immigrants' citizenship clubs. This type of work has been carried on with great success by the libraries of other Cities. A moderate expenditure would put the rooms into condition for use, and the salary of an additional person for supervision would be a trifling consideration in comparison with the value of such work to our city.

The East Branch also had a decorated Christmas tree and gave candy to children who came to the library on Saturday. The East staff has raised enough money during the year by the sale of candy to buy two chairs for its hitherto unfurnished staff room.

In June the American Library Association held its annual convention at Swampscott during the week of the twentieth. About two thousand delegates from all parts of the United States and Canada attended. Our library was prominently represented upon the various committees of arrangements, and every member of our staff was given an opportunity to be present at some session which dealt with an aspect of library work in which the individual was interested.

From our school room deposits we report a home circulation of 54,756. This result is the most economical in cost of any department of the library. The public school is the only agency by which contact with the whole, or approximately the whole, juvenile population can be secured. It may be well to call attention to the purposes of this work. They are five: to introduce books into homes not otherwise reached; to teach pupils how to use books as tools; to plant the seeds of a taste for the best in literature; to reveal the permanent availability of the public library in after years as a work-shop, a continuation school, and a source for the material of culture; to supplement the educational work of the schools by supplying collateral material for both pupil and teacher.

The executive direction of this department is properly in the hands of an educated and trained assistant. The nature of the work, both in the selection of books and in its applications, calls for a specialized knowledge of the large and rapidly growing field of children's literature. The librarian is convinced that efficiency will be promoted by combining this work with that of the Children's Department. It is therefore recommended that the work with the graded and Junior High

schools be merged with the Children's Department, and that the Children's Librarian at Central be made Supervisor of Children's work, and vested with general supervision for the entire library system.

Special deposits of books have been placed in the following centers: Home for the Aged, Girls Continuation School, Park Avenue Methodist Sunday school, St. Joseph's Catholic Association, St. Clement's School, St. Anne's School, and the Somerville playgrounds.

The Reference Department has answered 66,000 questions for people who have brought or telephoned their inquiries to the library.

A considerable part of the special collections of local history, and Americana, have been re-catalogued and made more readily accessible for use.

There have been many changes in the personnel of the staff during the year 1921. Anna L. Stone has retired after a continuous service of thirty-four years. Edith B. Hayes has gone to another library as Assistant Librarian. She had been a member of our Staff for twenty-two years. Other resignations from the graded service are those of Edythe L. Miller, High School Librarian; Nina L. Winn, in charge of graded and Junior High School work; Mrs. Edna C. Perrine, for a few months Chief Cataloguer; H. Luthera Fisher, First Assistant at East; Olive W. Gleason, Children's Librarian at East; and Mildred J. Hess, Junior Assistant. From the ungraded service, Mary Stack, Mae L. Gormley, and Jessie E. Bennett.

We regret to record the death, while still in our service of Ruth A. McDuffee, Children's Librarian at Union.

The following appointments have been made: Edna C. Woodbury, High School Librarian; Mrs. Edna C. Perrine, Chief Cataloguer; Clara S. Hawes, Cataloguer; Dorothy H. Terry, Children's Librarian at East; Dorothy S. Bamford, Katherine I. Eaton, Lucy W. Harris, and Orpha B. Matheson, Senior Assistants; Mildred J. Hess, Marion J. Meserve, Eleanor A. Randall, Eleanor M. Dean, and Muriel Stowell, Junior Assistants. In the ungraded service, Mary Stack, Ruth Hayes, and Lillian Gould.

Certain promotions and changes in positions deserve mention. Cora B. Eames, Reference Librarian, has been formally recognized as Second Assistant, and next in authority and responsibility in the library system to the Assistant Librarian. Dorothy B. Spear has been promoted to Branch Librarian at East. Dorothy S. Bamford has been promoted to First Assistant at East, and Myrtle Nicholson to the position of Supervisor of Periodicals and Binding.

During the month of March two students from the New York State Library School, and one from Simmons College were allowed to volunteer their services for practice work at the Central Library.

The Training Class which completed its six months course in April brought to our ranks five recruits, of whom four remain. The present class began its work on the first Monday of October, with a membership of six. Two were college graduates, two had a part college course, and the other two had not less than a complete High School course, our minimum educational requirement. Four of the six are either residents of Somerville, or graduates of Jackson College. No non-resident was accepted until it was found that the class quota would not otherwise be filled.

The usual statistical tables herewith appended are submitted as a part of this report.

Respectfully submitted,

GEORGE H. EVANS,

Librarian.

The Public Library of the City of Somerville

 from Dec. 7, 1921.

Office of the Board of Health,  
City Hall Annex, January 3 1922.

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen:—We respectfully submit the following as the forty-fourth annual report of the Board of Health in which is presented a statement, tabulated and otherwise, of the sanitary condition of the city and the business of the board for the year ending December 31, 1921:

**Nuisances.**

A record of the nuisances abated during the year, in compliance with notices issued by the board, or under the board's direction, is presented in the following table:

Complaints referred from 1920 . . . .	26
Complaints received during 1921 . . . .	583
	609
Complaints referred to 1922 . . . .	21
	588
Nuisances abated in 1921 . . . .	588
	38
Second and third notices sent . . . .	38
Received during 1921 . . . .	583
	621
Total notices sent . . . .	621

In addition to the above, 333 dead animals have been removed from the public streets. Many nuisances have been abated on verbal notice from the agent, without action by the board, of which no record has been made. Each spring the whole city is examined, and cellars, yards and alleyways where rubbish and filth have collected are required to be cleaned.

*Glanders.* Not a single case of glanders has been reported in the city during the past year.

**Record of Licenses and Permits Issued.**

*Cows.* Six applications were received for permits to keep six cows, all of which were granted.

*Goats.* Six applications were received for permits to keep nine goats, all of which were granted. The fee is one dollar for each goat.

*Hens.* One hundred and thirty-two applications for permits to keep 2075 hens were received. One hundred and fifteen permits to keep 1794 hens were granted, and seventeen permits were refused.

*Grease.* Thirteen applications were received for permits for sixteen teams to collect grease, which were granted. The fee is two dollars for each team.

*Melting and Rendering.* Three parties have been licensed to carry on the business of melting and rendering, for which a fee of one dollar is charged.

*Massage and Manicure.* Fifteen persons have been licensed to practice massage and manicure. The fee is one dollar for each license.

*Sale of Alcohol.* The statutes provide that no person, firm or corporation other than a registered druggist shall engage in the business of manufacturing, buying, selling or dealing in methyl alcohol, or wood alcohol, so called or denatured alcohol, or any preparation containing more than three per cent of any of the said alcohols, without being licensed so to do by the board of health.

Under the provisions of this act eight licenses have been issued. The fee is one dollar for each license.

*Bottling. Carbonated Beverages.* Chapter 303, Acts of 1921 provides that no person shall engage in the manufacture or bottling of carbonated non-alcoholic beverages, soda waters and mineral and spring water without a permit from the board of health. Five such permits were granted, a fee of ten dollars being charged in each case.

*Day Nursery.* One license was issued to establish and maintain a Day Nursery for which a fee of one dollar was charged.

#### Stables.

No person has the legal right to erect, occupy or use any building in this city, as a stable, without obtaining a license from the board for such occupancy. Each application is referred to the Agent of this board and no license is granted unless all regulations of the board are complied with. The following is a record of applications received and licenses granted:—

Applications pending from 1920 . . . . .	8
Applications received during 1921 . . . . .	14
	<hr/>
	22
Licenses granted . . . . .	13
Licenses refused . . . . .	2
	<hr/>
	15
Licenses pending . . . . .	7

#### Board of Infants.

Thirteen applications having been made to the State Department of Public Welfare for licenses to care for children in this city were referred to this board under provisions of

Chapter 119 of the General Laws. Eleven of these applications were approved for the care of twenty-two children and two were returned without the approval of this board.

There were 986 deaths and seventy-eight stillbirths in the city during the year, as specified in the following table, which shows a decrease of deaths over the previous year of 151.

Deaths at Somerville Hospital . . . . .	86
Deaths at hospital for contagious diseases and tuberculosis . . . . .	27
Deaths at home for aged poor (Highland Avenue)	45
Deaths at city home . . . . .	11
Deaths at other institutions . . . . .	36

**Diseases Dangerous to the Public Health.**

This board has adjudged that the diseases known as actinomycosis, anterior poliomyelitis, anthrax, Asiatic cholera, cerebro-spinal meningitis, chicken pox, diphtheria, dog-bite (requiring anti-rabic treatment), dysentery, German measles, glanders, hookworm disease, infectious disease of the eye, influenza, leprosy, malaria, measles, mumps, pellagra, plague, pneumonia (lobar only), rabies, scarlet fever, septic sore throat, small pox, tetanus, trichinosis, tuberculosis (all forms), typhoid fever, typhus fever, whooping cough, yellow fever, are infectious or contagious and dangerous to the public health and safety within the meaning of the statutes. Physicians are required to report immediately to the board every case of either of these diseases coming under their care, and postal cards conveniently printed and addressed are supplied to them for the purpose. On receipt of a card from a physician, the principal of the school in the district in which the patient resides, the librarian of the public library and state board of health are notified.

**Specimens and Supplies.**

Outfits for specimens to be examined for tuberculosis, diphtheria, and typhoid fever, and diphtheria anti-toxin, vaccine lymph and nitrate of silver solution may be obtained at the laboratory and at the following places:

Edward Edwards, 25 Union square.  
R. A. Peckham, 154 Perkins street.  
Richardson Pharmacy, 310 Broadway.  
Ernest B. McClure, 529 Medford street.  
George E. Wardrobe, 693 Broadway.  
Willis S. Furbush & Co., 1153 Broadway.  
Hall Drug Co., Hobbs building, Davis square.  
John Morrison, 288 Highland avenue.

Hereafter the Agent of this Board will collect, daily, at five o'clock, p. m., all specimens left at culture stations for examination, prior to that hour.

Physicians desiring reports on the following day, of specimens taken after this collection has been made must deposit the same at the City Hall Annex, in the receptacle provided, before nine-thirty p. m.

Results of all examinations of specimens received at the City Hall Annex prior to nine-thirty p. m., will be reported to the physicians on the following morning.

**Medical Inspection at Schools.**

The medical inspection of the schools of Somerville, which was instituted in December, 1907, has been continued during the year. The value of the system has been constantly demonstrated, and the work has been done in a very satisfactory manner. There has been harmony of action between the board of health and the school board, and the school principals and teachers have very generally co-operated with the inspections in making the system as successful as possible.

The inspectors make daily visits to the schools under their charge, and to them are referred all children who show evidences of disease or abnormal conditions. Children who are found to be unfit to remain in school are sent home, accompanied by a slip properly filled out advising that the family physician be consulted. The inspectors also make an annual inspection of all the children in the schools, and any defects discovered are called to the attention of the parents. Monthly inspections of the school buildings and premises are made, and suggestions or criticisms are referred to the proper authorities. Every effort is made to protect the health of the children and to co-operate with the parents in keeping the children in as normal a condition as possible.

In accordance with the provisions of the statute, tests of sight and hearing are made by the principals or teachers.

The districts and inspectors are as follows:—

*District No. 1.*—Eastern Junior High, Prescott, Hanscom, Edgerly, and Boys' Vocational schools. Inspector, Dr. Francis Shaw, 57 Cross street.

*District No. 2.*—Baxter, Knapp, Perry and Southern Junior High schools. Inspector, Dr. Edward J. Dailey, 46 Bow street.

*District No. 3.*—Bennett, Pope, Cummings and Proctor schools. Inspector, Dr. Walter Jellis, 1028 Broadway.

*District No. 4.*—Morse, Carr, Durell, Burns and Girls' Vocational schools. Inspector, Dr. W. L. Bond, 322 Highland avenue.

*District No. 5.*—Brown, Bingham, Forster and Northern Junior High schools. Inspector, Dr. H. M. Stoodley, 283 Highland avenue.

*District No. 6.*—Western Junior High, Lincoln, Highland, Cutler and Lowe schools. Inspector, Dr. H. Cholerton, 94 College avenue.

*District No. 7.*—Glines and High schools. Inspector, Dr. Edgar F. Sewall, 281 Broadway.

*Parochial Schools.*—Inspector, Dr. M. W. White, 21 Walnut street.

During the year, 11,750 children have been referred to the inspectors during their daily visits, and 773 have been sent home because of illness.

The following list will show the classes of diseases and defects which have been found in the schools, except defects of sight and hearing:—

**List of Diseases and Number of Cases Reported.**

1. Infectious diseases:—

Chicken Pox . . . . .	63
Measles . . . . .	3
Mumps . . . . .	70
Scarlet Fever . . . . .	3
Whooping Cough . . . . .	34
	<hr/>
Total . . . . .	173

2. Diseases of the nose and throat:—

Enlarged tonsils and adenoids . . . . .	737
Inflammatory diseases . . . . .	326
	<hr/>
Total . . . . .	1063

3. Diseases of the eyes:—

Inflammatory conditions . . . . .	39
Foreign bodies . . . . .	6
Other abnormal conditions . . . . .	21
	<hr/>
Total . . . . .	66

4. Diseases of the ears:—

Inflammatory conditions . . . . .	38
Other abnormal conditions . . . . .	29
	<hr/>
Total . . . . .	67

## 5. Diseases of the skin:—

Eczema . . . . .	34
Herpes . . . . .	29
Impetigo . . . . .	136
Pediculosis . . . . .	458
Scabies . . . . .	54
Tinea . . . . .	5
Miscellaneous conditions . . . . .	155
Total . . . . .	<u>871</u>

## 6. Miscellaneous diseases:—

Diseases of the circulatory system . . . . .	4
Diseases of the digestive system . . . . .	26
Diseases of the lymphatic system . . . . .	53
Diseases of the nervous system . . . . .	15
Diseases of the respiratory system . . . . .	121
Wounds and injuries . . . . .	41
Diseases of the teeth . . . . .	27
Other conditions . . . . .	289
Total . . . . .	<u>576</u>
Total number of diseases reported . . . . .	2816
Vaccinations performed . . . . .	64
Examinations for vaccinations . . . . .	733
Certificate to work . . . . .	104

**Bacteriological Department.**

The report of the work of this department is made by Frank L. Morse, M. D., on a subsequent page and becomes a part of this report.

**Undertakers.**

Under the provisions of Section 49 of Chapter 114 of the General Laws, twenty-two persons have been duly licensed as undertakers.

**Examination of Plumbers.**

The public statutes provide for a board of examiners of plumbers, consisting of a chairman of the board of health, the inspector of buildings, and an expert at plumbing, to be appointed by the board of health. This board appointed Duncan C. Greene, the inspector of plumbing, to fill the place of expert. The number of licenses granted will be found in the report of the inspector of buildings.

### Health Nurses.

There are at present four nurses employed by this board. Two of these are employed as school nurses and the work of the others, consists of follow-up work regarding tuberculosis cases and post-natal baby hygiene work.

The report of the school nurses are made a part of the report of the School Committee and those of the other nurses are made a part of this report being submitted in detail in subsequent pages.

### Infant Hygiene Clinics.

During the past year clinics for well babies have been held every Thursday afternoon at the Bennett Schoolhouse and every Friday afternoon at the Bingham schoolhouse except when those days were holidays. 718 babies have been registered at these clinics. The average weekly attendance at the Bennett schoolhouse was 30 and at the Bingham schoolhouse 50. These clinics have been under the supervision and control of Somerville Chapter of the American Red Cross and the health nurses connected with this board have assisted in the work. Owing to lack of funds the Red Cross has been obliged to discontinue their efforts in this direction.

This work is of such inestimable value and the results are so far reaching that this board recommends that the maintenance of these clinics be taken over by this department and that an appropriation be made to cover the appointment of an additional nurse and a small amount for incidental expenses.

R. M. LAVENDER, Chairman,

WARREN C. BLAIR,

JOHN E. GILLIS, M. D.

Board of Health.

*Attest:*

LAURENCE S. HOWARD, Clerk.

## REPORT OF HEALTH NURSES.

Somerville, Mass.,  
January 3, 1922.

To the Board of Health,  
Somerville, Mass.

Gentlemen:—

We submit the following report of work performed by us in infant hygiene, post natal and tuberculosis cases for the year ending December 31, 1921.

**Infant Hygiene.**

Infants reported as born in Somerville during 1921 . . . . .	1757
Infants born elsewhere resident in Somerville . . . . .	173
Pairs of twins born in Somerville . . . . .	22
Sets of triplets born in Somerville . . . . .	1
Still-births in Somerville . . . . .	67
Infants who moved away from Somerville . . . . .	85
Infants afflicted with Ophthalmia Neonatorum . . . . .	7
Infants afflicted with Conjunctivitis . . . . .	12

There were one hundred and thirty-five deaths of infants under one year of age in Somerville during the past year as shown in the following table:

Prematurity . . . . .	38
Congenital diseases . . . . .	33
Intestinal diseases (Breast fed 10. Artificially fed 8) . . . . .	18
Accidental suffocation . . . . .	1
Pneumonia and other diseases . . . . .	25
Infants dying in Somerville residence elsewhere . . . . .	20
<b>Total . . . . .</b>	<b>135</b>
Infants under supervision at Baby Welfare Clinics . . . . .	718

## Tuberculosis.

Pulmonary tuberculosis cases reported in 1921 . . . . .	136
Other forms of tuberculosis reported in 1921 . . . . .	26
Patients admitted to Sanatoria . . . . .	49
Patients previously reported in Sanatoria . . . . .	52
Deaths in Sanatoria 27. Discharged 6 . . . . .	33
Patients now in Sanatoria . . . . .	67
Patients who have moved away from Somerville . . . . .	26
Patients temporarily out of Somerville . . . . .	21
Deaths from tuberculosis in Somerville . . . . .	64
Tuberculosis patients now living in Somerville . . . . .	311
Pulmonary . . . . .	231
Other forms . . . . .	80

## Homes where there is or has been tuberculosis where there are school children

Previously reported . . . . .	253
Found this year . . . . .	45

298

## Children in homes where there is or has been tuberculosis. Reported to School Department.

Previously reported . . . . .	455
Found this year . . . . .	89

544

## Houses from which second and third reports of tuberculosis have come.

Previously reported . . . . .	45
This year . . . . .	25

## REPORT OF DEPARTMENT OF MEDICAL INSPECTION.

Somerville, Mass.,  
January 3, 1922.

To the Board of Health,  
Somerville, Mass.

Gentlemen:—

I herewith present the report of the Department of Medical Inspection for the year 1921 including statistics of the Contagious Hospital.

## Visits.

Scarlet Fever—Each case must be inspected before release from quarantine to see that the condition of the patient is suitable for release . . . . .	143
Diphtheria—Before patients are released from quarantine two successive negative cultures must be obtained . . . . .	144
Contagious Hospital . . . . .	394
Total number of visits . . . . .	681

## Contagious Disease Hospital.

Diseases	In Hospital Jan. 1, 1921	Ad- mitted	Discharged Well or improved	Dead	In Hospital Jan. 1, 1922
Diphtheria . . . . .	0	136	104	19	13
Scarlet Fever . . . . .	2	62	57	0	7
Tuberculosis . . . . .	9	12	14	7	0
Miscellaneous . . . . .	1	7	6	2	0

The daily average of patients was 10.1 in the contagious department, 5.7 in the tuberculosis department, a total of 15.8.

## Tuberculosis.

On September 1st with the approval of His Honor the Mayor, the Tuberculosis ward at the Contagious Hospital which had been maintained since the fall of 1911, was closed on account of the small number of patients cared for. Arrangements were made with the Cambridge Board of Health whereby patients having a legal settlement in Somerville would be transferred to their Tuberculosis Hospital for treatment.

The decrease in the number of deaths from tuberculosis in this city during the past twenty years has been remarkable

and can be attributed to several causes, among which may be mentioned the increased resistance of the individual person, the general education of the public in the care and prevention of the disease, the destruction of sputum from those who are infected, the personal supervision of individual cases at their homes by public health nurses, the removal of active cases to tuberculosis hospitals thereby removing the source of infection from other members of the family, and the pasteurization of milk which at the present time is over ninety per cent of the total amount distributed in the city.

During this twenty-year period the death rate per 1000 of population has diminished from 16.5 in 1900 to 12. in 1905, 9.8 in 1910, 7.9 in 1915, 6.4 in 1920 and during the past year to 5.8.

This remarkable and continuous decrease in the death rate from tuberculosis is indicative of its successful control and leads us to believe that the deaths will still continue to diminish although we cannot look forward to its ultimate disappearance.

Respectfully submitted,

FRANK L. MORSE,  
Medical Inspector and Bacteriologist.

## REPORT OF THE INSPECTOR OF ANIMALS AND PROVISIONS.

Somerville, Mass.,  
January 3, 1922.

To the Board of Health,  
Somerville, Mass.

Gentlemen:—

I submit the following as my report for the year ending December 31, 1921.

### Inspections.

The following table shows the number of inspections made during the past year. In order to safeguard the consumer, all establishments handling foodstuffs are under constant supervision. Lunch carts and restaurants have been inspected weekly.

Under the provisions of the General Laws of 1920 all bakeries are required to register with the Board of Health. The law provides that all doors and windows shall be properly screened and that all food exposed for sale shall be kept covered. Careful inspections of all bakeries have been made to see that this law has been complied with.

All the factories in the city have been inspected monthly.

The Barber Shops are under very careful inspection and must be kept in a sanitary condition and the barbers are required to keep themselves neat and clean and to properly sterilize their instruments.

### Number of Inspections.

Bakeries . . . . .	423	Pedlers Wagons and Stock . . . . .	2383
Barber Shops . . . . .	381	Premises where Cows are kept . . . . .	7
Bath Houses . . . . .	8	Premises where Goats are kept . . . . .	9
Billiard Halls and Bowling Alleys . . . . .	93	Premises where Swine are kept . . . . .	66
Blacksmith's Shops . . . . .	26	Public Halls . . . . .	27
Bottling Establishments . . . . .	10	Rendering Plants . . . . .	138
Candy and Ice Cream Plants . . . . .	192	Slaughter Houses . . . . .	334
Factories . . . . .	183	Stores and Markets . . . . .	3857
Fish Markets . . . . .	578	Stables . . . . .	247
Hen Houses and Yards . . . . .	390	Theatres . . . . .	76
Hide Houses . . . . .	48	Vacant Lots . . . . .	22
Lunch Rooms and Cars . . . . .	582	Yards and Cellars . . . . .	573
Milk and Cream Plants . . . . .	121

Lamb . . . . .	432 Lbs.
Liver . . . . .	63 Lbs.
Hogs . . . . .	4 Whole
Pork (fresh) . . . . .	189 Lbs.
Sausages . . . . .	19 Lbs.
Shoulders (corned) . . . . .	128 Lbs.
Steak (Hamburg) . . . . .	11 Lbs.
Turkey . . . . .	105 Lbs.
Veal . . . . .	126 Lbs.

## Vegetables

Asparagus . . . . .	108 B'ches.
Beans (string) . . . . .	19 Bush.
Beets . . . . .	1 Bush.
Cabbags . . . . .	1 Bbl.
Corn . . . . .	9 Bush.
Greens . . . . .	8 Bush.
Lettuce . . . . .	5 Bush.
Lettuce . . . . .	2 Boxes
Onions . . . . .	15 Bush.
Potatoes (white) . . . . .	11 Bush.
Potatoes (sweet) . . . . .	2 B'skts.
Tomatoes . . . . .	7 Bush.
Tomatoes . . . . .	12 B'skts.
Turnips . . . . .	2 Bush.

Miscellaneous.

Coffee . . . . .	30 Lbs.
Crackers . . . . .	11 Cans
Crackers . . . . .	56 Pks.
Dates . . . . .	10 Lbs.
Essence . . . . .	50 B'tles.
Flour . . . . .	200 Lbs.
Hops . . . . .	30 Pks.
Malt . . . . .	100 Lbs.
Raisins . . . . .	12 Lbs.
Rice . . . . .	55 Lbs.
Tea . . . . .	35 Lbs.

Slaughter Houses.

During the year weekly inspections have been made at all slaughtering establishments and these plants were never in a more sanitary condition than at present.

The number of animals slaughtered during 1921 in this city was somewhat less than during previous years.

Number of Animals Slaughtered in 1921.

Swine . . . . .	747,060
Sheep . . . . .	394,699
Calves . . . . .	110,817
Cattle . . . . .	31,464
	<hr/>
	1,284,040

Examination of Animals for Contagious Diseases.

Glanders.

There has been a steady decrease of glanders in this city for several years which I believe is largely due to a thorough inspection and disinfection of stables and blacksmith shops, and to the discontinuance of public drinking fountains for horses. Every stable and blacksmith shop in the city is in first class condition.

In 1913 there were 55 horses killed for glanders; in 1914 thirty; in 1915 ten; in 1916 thirteen; but eight of these were in one stable; in 1917 nine; in 1918 seven; in 1919 only three were killed, and since that time not a case of glanders has been reported.

## Animals Examined.

	Inspected	Quaran- tined	Killed	Released
Horses . . . . .	1383	1	0	1
Swine . . . . .	66	0	0	0
Cows . . . . .	7	0	0	0
Goats . . . . .	9	0	0	0
Dogs . . . . .	2	2	0	2
	<hr/>	<hr/>	<hr/>	<hr/>

Respectfully submitted,

CHARLES M. BERRY,  
Inspector of Animals and Provisions.

## REPORT OF THE INSPECTOR OF MILK AND VINEGAR.

Chemical and Bacteriological Laboratory.  
City Hall Annex.

Somerville, Mass.,  
January 3, 1922.

To the Board of Health,  
Somerville, Mass.

Gentlemen:—

I herewith present my annual report for the year ending December 31, 1921.

On the above date there were in this city licensed to sell milk, 608 stores and 67 dealers, and 112 stores to sell oleo-margarine.

Of the 67 dealers, 24 are located in this city and 37 in the neighboring cities and towns, and 6 dealers have discontinued business.

There are approximately 30,000 quarts of milk and 2100 quarts of cream distributed in Somerville daily, and 23 dealers are pasteurizing their milk according to General Laws Chap. 94, Section 1.

Six dealers discontinued business, 11 new dealers (distributors) applied for a license and there are 6 dealers who handle cream exclusively.

The above is a summary of the Laboratory Work during 1921.

Each month during the year pint samples have been taken from every milk dealer and analyzed for food value (fats and solids) and cleanliness (bacterial count and sediment) and the yearly average is shown in the alphabetical list of dealers which follows:

## Regular Market Milks.

\* Now Pasteurizing. † Found guilty and fined in court.

The higher the fat and solids the greater the food value. The lower the bacterial count, the greater care in production, better handling or more efficient pasteurization is shown.

#### Special Priced Milks.

Milk commanding an increased price due to special care in production or greater food value.

The General Laws define the terms used in this report as follows:—

*“Heated Milk”*.—Milk which has been subjected to artificial heat greater than one hundred and sixty-seven degrees Fahrenheit.

*“Pasteurized Milk”*.—Natural cows milk not more than 72 hours old when pateurized, subjected for a period of not less than thirty minutes to a temperature of not less than one hundred and forty nor more than one hundred and forty-five degrees Fahrenheit and immediately thereafter cooled to a temperature of fifty degrees Fahrenheit or lower.

*“Flash”* method has not been defined by law, but the method in general use is to heat milk as quickly as possible to *about* one hundred and fifty-eight degrees Fahrenheit and immediately cooling to below fifty degrees Fahrenheit.

#### Laws Governing the Sale of Special Milks.

##### Chapter 94.—Section 13.

*“Grade A, Massachusetts Milk”* shall consist exclusively of milk produced within the commonwealth from healthy cows under cleanly and sanitary conditions, and so cooled and cared for that in its raw state the bacteria count shall not average more than one hundred thousand per cubic centimeter, upon examination of five samples taken one each day, and each from a different lot of milk, on five consecutive days. When

sold, kept or offered for sale or exchange, such milk shall be designated and marked by a label, cap or tag bearing the words "Grade A, Massachusetts Milk" in plain, legible bold-faced type. The percentage of milk fat may also be stated upon said label, cap or tag, but the amount of milk fat shall never be less than the standard fixed for milk by the preceding section.

#### Chapter 94.—Section 15

If any grade or classification of milk other than "Grade A, Massachusetts Milk" is established, permits for the sale of such other milk shall be granted and may be revoked in accordance with the preceding section with respect to "Grade A, Massachusetts Milk", but such permits shall not be granted until the milk to be sold thereunder has been tested in such manner as the local board of health, to whom application for the permit is made, shall determine. Milk sold or exchanged or kept or offered for sale or exchange under such a permit shall be marked with a label, cap or tag, bearing in the English language in plain, legible, bold-faced type, the name of the grade as it is determined by such board.

This department has received *no* requests for permits to sell special milks of varying grades though many dealers are offering special priced milks to the public under the head of "Grade A"; "Baby Milk"; "Special Milk"; "Inspected Milk"; etc. The dealer *alone* is responsible for the superior quality of the various grades. A list of the special milks that have come to the attention of this department is published as a part of this report.

#### Infant Mortality.

The index of an efficient system of Milk Inspection is conceded by health authorities to be the reduced mortality rate from intestinal diseases among infants under one year of age. This rate in Somerville has decreased year by year and those interested are referred to the mortality tables in the health department report.

#### Country Inspection.

Methods of shipping milk to the large centres of population have changed considerably in the last few years. The custom formerly was for the individual producer to bring his milk to the railroad and ship it directly to the dealer in the city. This practice has changed somewhat and the cooperative system of marketing milk has been developed.

Creameries have been developed and the producers now sell their product to the creamery which in turn sells direct to the distributor. Under this arrangement it becomes necessary to promulgate regulations governing the conduct of these creameries. This has been done and an inspection has been made of relatively small numbers of establishments. Unsanitary conditions have been found at many of these places and much work should be done at the country end if the sale of milk from these places is to be allowed in Somerville. There are about 350 creameries in New England shipping milk to the metropolitan district and it is very evident to those who have visited these places that a careful supervision should be maintained over not only the creameries shipping fluid milk, but also the butter and ice cream factories who come in direct competition with the fluid milk factories.

The same cleanliness should be demanded of producers whether their milk is used for butter, or ice cream or sold as fluid milk and a producer who has been refused permission to ship milk to the city on account of unsanitary conditions, should not be allowed to sell to the butter or ice cream factory next door.

#### Conclusions and Recommendations.

1. That more time be devoted to country inspection and that a dairy inspector be appointed to look after the country end where the milk is produced, and in some instances processed, that we may inspect creameries and dairies and confirm the corrections required.

2. That a law or regulation be promulgated making pasteurization compulsory.

3. That all pasteurizers be equipped with an automatic temperature control and that all charts from same be preserved at least six months.

4. This department *does not* recommend any *particular special milk*, but we *are* striving to have *all* the milk sold in this city safe and wholesome.

Respectfully submitted,

HERBERT E. BOWMAN,

Inspector of Milk and Vinegar.

## REPORT OF THE CITY PHYSICIAN.

OFFICE OF THE CITY PHYSICIAN,

Somerville, January 1, 1922.

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—The work of your City Physician during the year 1921 is presented in the following abstract:—

Office consultations and treatments . . . . .	290
Total outside visits . . . . .	1251
Confinements . . . . .	10
Vaccinations . . . . .	49
Visits at City Home . . . . .	132
Attended at police station . . . . .	20

## Examinations:—

For legal department . . . . .	12
For highway department . . . . .	17
For police department . . . . .	33
For fire department . . . . .	19
For water department . . . . .	2
For soldiers' relief department . . . . .	1
For pension . . . . .	24

Respectfully submitted,

C. CLARKE TOWLE,

City Physician.

## REPORT OF RECREATION AND PLAYGROUND COMMISSION.

---

To the Honorable, the Mayor, and the Board of Aldermen, City  
of Somerville, Massachusetts.

Gentlemen : —

The Recreation and Playground Commission submits herewith a report of its acts for the municipal year 1921. The work of this Commission has been limited in kind and in extent by the resources which it could use not by its inclination for service or by the opportunities in its field of action. As the opportunities for beneficial and constructive effort so far exceeded the resources available for dealing with the matter, it became necessary to carefully select the things to be done and to conduct those enterprises only to such an extent as was warranted by the means at hand.

In making a plan for the year it was decided to carry on the lines of work established during the preceding year and to amplify that work to whatever extent it seemed wise and desirable. In addition to this policy the Commission proposed to promote co-operation among the various departments of City Government whose functions in any way affect public recreation and to assist in whatever way it could the general cause of recreation throughout the city. In addition to the direct appropriation made by the City Government, which this year amounted to \$6,000, the Commission had the help of \$1,030.75 furnished it by the Somerville Playgrounds Association and the co-operation and assistance of the various women's clubs of the city and of the several departments of the City Government.

The three major activities promoted by the Commission during the year were social centers, summer playgrounds, and school gardens. At the beginning of the year social centers were conducted several nights a week in the Clark Bennett and Bingham Schoolhouses. The Neighborhood House on Maple Street was conducted partly under the Commission and partly under the control and direction of the Ways and Means Committee representing the various women's clubs of the city. This work was carried on for the Commission by Miss Minnette Zuver who had been engaged for this work during the preceding year. Under her leadership, classes for adults were

organized and carried on in the two schoolhouses already named. These classes attracted a large attendance and developed a good show of interest. Entertainments and lectures were given from time to time. The response to these conferences was such as to show conclusively that the people in the neighborhood of these schoolhouses were ready and anxious to take advantage of the opportunity for improvement and social recreation which such meetings afford. There were imperfections in the service rendered to the community by these undertakings which were inevitable under all of the circumstances of the case. The schoolhouses themselves are not well adapted to social center activities and the resources in money and personal services were too limited to provide adequately the things necessary to the success of the work. As an outcome of all these conditions, much was accomplished of a distinct benefit to the community while imperfections appeared which were subjects for criticism and improvement. It was clearly demonstrated that well-selected and well-conducted enterprises of an educational and recreational character would receive a hearty welcome in these neighborhoods but on May 1, 1921, the social worker resigned to accept a more important position elsewhere and since that time the Commission has allowed the social center work to lapse.

The second line of work carried on by the Commission was the supervised summer playgrounds. In this field, as its name indicates, the chief function of this work is to provide trained supervision on certain playgrounds in the city during the summer months. In addition to this provision, the Commission has furnished playing material and some equipment. This year the attendance was large and the services of the play supervisors were of a high and interesting order. The closing demonstration held on Broadway Park on the evening of August 23 was one of the most interesting ever held in connection with the summer playground work. All in all, the playground season of 1921 was, from the amount of money spent upon it by the Commission, one of the most successful ever conducted under the control of the City. Full particulars of this activity will be found in the report of Stephen H. Mahoney, Supervisor of Playgrounds, which is submitted herewith.

The third line of work promoted by the Commission jointly with the School Committee was the school gardens. Again the use of certain public parks for school gardens was authorized by His Honor, the Mayor. The Commission employed again this year as Supervisor of Gardens, Mr. W. B. Moore, whose efficiency in this office is of the highest order. School

gardens were conducted in eleven plots so distributed as to make a school garden accessible in every part of the city. This work was a great success and is fully described in the report submitted by Mr. Moore. The benefit of this work has been not alone in the value of the crops raised by the children but in the fact that the gardens have provided a live and beneficial interest for the children during the long summer vacation.

In certain other ways encouragement of recreation has been given by the efforts of the Commission. The general subject of public recreation in Somerville, however, is not fully comprehend by this account of the work of the Recreation and Playground Commission. Other public agencies are related in one way or another to the recreation problem in this city. Those which have worked in co-operation with this Commission are the following:

Commissioner of Public Buildings, who has charge of schoolhouses, school yards, and the Somerville Beach.

City Engineer, who has charge of public parks and public playgrounds. School Committee, which has direct charge of school children, school activities, physical training, gardening, and canning.

Water Commissioner, who has control of wading pool on Trum Playground.

Warden of the City Home, who has charge of the City Farm.

Chief Engineer of the Fire Department, who has charge of the apparatus which was used frequently during the hot weather to give street baths to the children of the playgrounds.

Chief of Police, who has given police protection whenever needed.

As the year closes, the Commission has made provision for building hockey rinks in various parts of the city. One has been built in Lincoln Park, one on Trum Playground, one in Fellsway East, and one in the Hodgkins schoolyard. Two others are to be built in other parts of the city. These rinks are provided for the use of organized hockey teams from the High and Junior High Schools and for the use of the public when they are not engaged by the schools. The maintenance of the rinks on the public areas will be assumed by the Engineering Department. The maintenance of the rink in the school yard will be assumed by the Public Buildings Department. It is hoped by the Commission that these rinks will increase the opportunities for the enjoyment of that most invigorating and delightful winter sport — skating. Unlike most other communities Somerville has no natural ponds and waterways for skating. The development of this sport, therefore, is wholly dependent upon artificial ice on public areas. The Engineering Department has done a good work in past years in flooding spaces for ice areas but the new rinks will add much to the possibilities of enjoying this sport.

The Commission wishes to put on record its conviction that recreation both for adults and for children is an important item in public policy and one which should receive careful and consistent treatment at the hands of the City Government. How one spends his leisure time determines to a considerable extent the kind of a person he is or will become. The opportunities for intellectual, social and physical recreation are provided either by public or private agencies. Inasmuch as private recreational agencies are conducted wholly for commercial purposes, it is not safe to leave the needs of a community wholly to be satisfied in that way. The Commission believes that Somerville has made a good beginning in this particular. Its parks and public areas are devoted to public uses. Its public bathhouses, its bathing beach and bathhouse, its schoolhouses which are increasingly used for social and recreational purposes, are all contributions to the up-building of a good social order by means of wholesome and well-conducted recreation. For the future, the Commission believes that all of these agencies should be brought into harmonious co-operation to the end that the largest public service may be secured therefrom. It believes that the beginnings already made should be continued in well-planned policies for the future.

At its meeting on December 16, the Commission voted to make the recommendations given below. Some of these can be made without expenditure of money while the others will cost little compared with the benefits derivable therefrom.

The Commission recommends that the Kent Street Playground be enlarged by the inclusion therein of the roadway of Kent Street. This roadway is now practically waste land as there is very little need for its use by vehicles. A right of way over the playground for pedestrians would preserve the benefits of a short-cut from Somerville Avenue to the subway. This change would add materially to the size of this playground, thereby increasing greatly its value to the neighborhood. As this park furnishes the only open space for the children and the adults of this densely populated section, any improvement of the playground conditions would be beneficial.

The Commission recommends that the "ledge lot," so-called, the site of the Western Junior High School, be improved with a view to its use for sports and games. There is space enough here to furnish a ball field which could be used for baseball or football and to furnish room for tennis and other smaller games. The Commission goes on record as opposing the building of a roadway or sidewalk through this area in such a way as to interfere with the uses just named. A

sidewalk along the westerly borders of this field, however, would be unobjectionable.

The Commission also recommends that Dilboy Field be improved in accordance with the plans prepared by the Engineering Department, and that a suitable recreation house be erected.

There are other projects for the benefit of the public which the Commission has considered and which it would like to have put into effect but as its work is completed with this report, it does not deem it appropriate to enlarge upon such plans for the future. The Commission believes that in view of the present state of public interest in this work there will be no retrogression but that there will be a forward movement which will have for its purpose the improving of all the recreational facilities under the control of the City Government.

Respectfully submitted,

CHARLES S. CLARK,

Supt. of Schools, Chairman.

## REPORT OF SOMERVILLE PLANNING BOARD.

---

December 31, 1921.

To His Honor, the Mayor, and Board of Aldermen.  
Gentlemen:

As required by the provision of Chapter 494 of the Acts of 1913 the Planning Board herewith submits its annual report together with recommendation, for the year 1921.

The personnel and organization of the Board have been the same since the preceding year, and the vacancy then existing still remains unfilled.

The several subjects considered in this report have been arranged in the same general manner as followed in previous reports of the Board, with the addition of new subjects not treated heretofore.

### Fire Protection.

The Planning Board has recommended the establishment of Fire Districts in its reports for the years 1915, 1916, 1917, 1918, 1919, 1920 and again calls attention to the need for the establishment of Fire Districts by ordinance of the City Government. Unless a start is made in this direction before building operations begin again, it will be very difficult, if not practically impossible to establish Fire Districts in or about the public squares of the city.

Steps should be taken without delay to prevent the erection of any more wooden buildings on the land adjoining the several public squares of our city.

The Board is well aware of the difficulties to be overcome, and that successive Boards of Aldermen have considered the subject, but believes the time opportune for action by the present city government.

The Board therefore recommends that the subject of Fire Districts receive careful consideration by the present city government, and hopes that some definite action be taken by the Board of Aldermen.

### Public Parks and Playgrounds.

The Board again respectfully suggests that the land used as a playground in Ward Five and known as "Richard Trum Playground" be laid out as a public park, in order to provide a permanent playground for the people of that section of our city. It is also necessary that the playground be provided with

a locker building, similar to the one in Lincoln Park, for the convenience of those who use the park for recreation and amusement. At present it is necessary to use the City Stables, which is a very unsatisfactory arrangement.

The Board also recommends that small playgrounds be established in different parts of the city for the exclusive use of small children.

Although the Board has called attention to the necessity of beautifying the only bathing beach in our city, no improvements of any importance have been undertaken. The beach still needs to be cleared of mud, and some sand should be dumped there, in order to make it possible for the people who use the beach to do so in comfort. This improvement should not be very expensive, and is needed beyond any reasonable doubt.

#### Bridge Street Widening.

The Board has recommended in its reports for the past five years that the city government should take some action tending toward the widening of Bridge Street.

Bridge Street is one of the chief highways leading to Somerville, and has been the scene of many accidents resulting in the congestion of the street car traffic, as well as automobiles and teams. It is the only exit and entrance for the main line of street cars running on Highland Avenue and Somerville Avenue. It is barely thirty feet wide, and should be at least one hundred feet wide to properly care for the heavy traffic going over it every day. Now is the time to widen it before the old dilapidated buildings are town down, and replaced with new structures. If the City of Cambridge is unable to co-operate, resort should be had to the Legislature for a remedy.

#### Clean-up Week.

The Board recommends that the city government set apart a week to be known as "Clean up and Paint up Week," as has been the custom in previous years.

#### Survey of City.

The Board is of the opinion that it is desirable that a general survey of the city be made for the purpose of classifying the various kinds of industrial enterprises, and their location, also the location of desirable industrial sites. This survey would also show the various parks, public buildings, and purely residential districts of the city.

The Board therefore recommends that a sufficient sum be appropriated for the use of the Planning Board to enable it to carry out this plan. The value of a survey of this nature cannot be over estimated.

#### Bill Boards.

The attention of the city government is directed to Chapter 545 of the Acts of 1920, which provides for the regulation of advertising signs and devices on public ways.

The enforcement of this law will do much to cure the bill board evil, and in all cases where a bill board may be considered a nuisance a hearing may be had before the Department of Public Works on the question of its removal. The removal rests solely in the discretion of the Department of Public Works.

#### Zoning.

On June 4, 1920 an Act was passed by the Legislature of the Commonwealth, which appears in the Acts of 1920 as Chapter 601, entitled "An Act to authorize cities and towns to limit buildings according to their use and construction to specified districts." The zoning movement is one which has spread rapidly throughout the country, and has been put into practice in Cambridge, and is also in effect in some parts of Brookline, and in over forty important cities of our country, including the large cities of New York, Washington and Milwaukee.

The constitutionality of the law has been decided by the Supreme Court, and the Planning Board is of the opinion that this year's city government should do something to work out a zoning plan in the City of Somerville, under the direction of the Planning Board.

The old motto "A place for everything and everything in its place" should be made to apply to buildings erected within the city limits. In many instances citizens have bought houses for homes, only to find within a few short years a factory or a business block erected next to their dwelling house, greatly depreciating its value, and spoiling its use as a home. To correct a wrong such as this the zoning law was passed by the Legislature.

The Board recommends that a zoning ordinance be drafted by the Board of Aldermen, after due consideration, and public hearings, in order to determine what is best in the matter of zoning for a city of the size of Somerville.

The Board is of the opinion that a great improvement can be made by setting off some districts for residential pur-

poses exclusively, and other districts for mixed business and residential purposes, until such time as the character of the district changes. The Board also believes that some districts should be unrestricted because circumstances may exist in certain districts at the present time that would make it impossible to work out a satisfactory restriction.

The real object of the zoning system is that it seeks to create permanent residential districts. Then if a person purchases a house in such a district, he will be protected by law from the encroachment of business blocks or factories.

The zoning system would also take care of a matter which is continually coming before the city government for action, and that is, the question of the advisability of allowing a license for a public garage. The Board is of the opinion that public garages should be restricted to certain districts, and not allowed to be erected in a purely residential district.

The Board is also of the opinion that the zoning system, if adopted, would protect the finances of the City, by preventing rapid depreciation in residential real estate values, which inevitably follows a change in the character of the neighborhood caused by the erection of public garages, or any other building of a business nature. The Board believes that it would be for the benefit of various business enterprises to be in a certain district, and would have the effect of increasing the value of real estate for business purposes.

This is a matter which deserves serious consideration, and should not be acted on hastily. Therefore the Planning Board respectfully requests that the Board of Aldermen authorize it to submit a zoning plan to be used as a basis for discussion, in order to arrive at a satisfactory arrangement of our city. The proposal of the plan can do no harm, and will at least raise the question of the advisability of adopting a plan for the arrangement of restricted districts in our city.

#### Appropriation.

The sum of Fifty dollars was appropriated for the Planning Board for the year 1921. The Board realizes that the city government is desirous of being economical with the tax payer's money, but respectfully calls the attention of Your Honor, and Members of the Board of Aldermen to the fact that it is impossible for the Planning Board to attempt to draw up plans, or draft ordinances such as a Planning Board should do, in order to be helpful to the city government, unless the Planning Board receives a sufficient appropriation to enable it to at least make a start on these various projects.

The Board is anxious and always has been willing to give its time free to the city, but believes that the city government should be more generous in its appropriation. In looking over reports received by the Board from various city and town Planning Boards, the Board is unable to find but one or two instances where towns nowhere near the size of Somerville have appropriated the sum of \$50. In practically all cases the appropriation has been at least \$200.00 up to \$2000. Whatever sum of money is appropriated by the city government, the Board wishes to assure Your Honor, and Board of Aldermen, that it will not be wasted, but will be used to formulate various plans, and collect information which will be of great value to the city, and to the business men of the city. The work of the Planning Board is a work for the future. The results obtained we believe will be for the advantage of all citizens, and whatever sum is appropriated will be carefully used.

Respectfully submitted,

WILLIAM F. RILEY, Chairman

PAUL R. VALENTINE

GEORGE J. RAUH

DAVID J. KELLEY, Secretary

## REPORT OF THE CITY ENGINEER.

---

OFFICE OF THE CITY ENGINEER,

CITY HALL, SOMERVILLE, January 19, 1922.

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen, — In accordance with the city ordinances, the following report of the work done and expense incurred for the year ending December 31, 1921, by the Engineering Department and appropriations under my charge and supervision, including the accounts of city engineer, sewers construction, sewers maintenance, parks maintenance, playgrounds maintenance, and other public works, is herewith presented:—my twenty-sixth annual report as city engineer.

### ENGINEERING DEPARTMENT.

In previous reports the general work, charter requirements and city ordinances relating to the duties of the city engineer have been fully described — he shall be consulted in relation to public improvements of every kind when the advice of a civil engineer would be of service — and no pipes, conduits, railway tracks, poles or other structures shall be placed beneath or upon the city streets unless a plan showing proposed location thereof has first been approved by the city engineer.

On account of the excessive cost very little new construction work has been attempted, the greater part of the work done, being for repairs and maintenance in the various divisions.

Divisions	Appropriations and Credits		Expenditures	Balances
City Engineer . . . . .	\$14,545 00	\$230 00	\$14,771 07	\$3 93
Parks Maintenance . . . . .	10,950 00	200 00	11,149 59	41
Playgrounds Maint. . . . .	11,650 00	368 88	12,018 82	06
Sewers Maintenance . . . . .	23,930 00	120 81	24,050 59	22
Sewers Construction . . . . .	5,555 62	130 04	5,643 19	42 47
Stock Account . . . . .		786 28	363 63	422 65
			\$67,996 89	

(Expenditures in the various divisions are shown in detail in the City Auditor's annual report).

### CITY ENGINEER DIVISION, CLASSIFICATION OF EXPENSES, 1921.

Sewers and Storm Drains, — comprising surveys, estimates, profiles, lines, grades, titles, plans, assessments, all engineering work relating to same and supervision . . . . .	\$895 24
--	----------

Highways, — comprising plans, estimates, titles, profiles, lines and grades, inspection of paving and all other engineering work relating to the department . . . . .	1,751 50
Sidewalks, — comprising profiles, lines, grades, measurements, inspection, titles, costs and assessments . . . . .	423 85
Water Works, — comprising lines, grades, locations of mains, gates, hydrants, services and other matters relating to the department . . . . .	611 42
Parks and Playgrounds, — comprising surveys, plans, estimates, profiles, and grades, including laying out of parks, playgrounds, boulevard and supervision . . . . .	236 99
Public Buildings, — comprising surveys, estimates, lines and grades, and other work relating to constructing and laying out of grounds . . . . .	47 25
Street Numbering, — comprising locations of buildings, plans, assigning street numbers, etc. . . . .	233 22
Street Lines and Grades, r comprising establishing of lines, grades, and miscellaneous data given parties for building and grading . . . . .	222 49
Bridges and Grade Crossings, — comprising surveys, plans, profiles, estimates, lines and grades, etc. . . . .	117 97
City Survey, — comprising establishing of street lines, acceptance plans, and miscellaneous survey work for city map, etc. . . . .	950 01
Middlesex Registry and Land Court, — comprising copying of plans, and abstracts from deeds and examination of titles filed at East Cambridge, also tracing of street acceptance and sewer taking plans filed for record . . . . .	114 09
Private Corporations, Railway, Telephone, Electric Light and Gas Light Companies, — comprising grades, plans, profiles and office notes, locations of poles and conduits . . . . .	49 71
Setting Stone Bounds and Brass Rods, — defining street lines and city boundary lines . . . . .	78 40
Office Work, — comprising record of all locations, indexing, typewriting, bookkeeping, calculations, reports, and general draughting . . . . .	1,797 99
Miscellaneous Work, — comprising preliminary surveys, designs, sketches, etc., relating to various schemes for committees . . . . .	131 63
Holidays, Vacations and Sickness . . . . .	1,268 38
National Guard Duty . . . . .	65 00
General Departmental expenses (all divisions) — comprising city engineer's salary, auto, telephone, car fares, postage and incidentals . . . . .	5,775 93
Total . . . . .	\$14,771 07

Value of field instruments, tools and office instruments, \$1,500.00

The total cost of maintaining the Engineer's Division since it was established, 1872-1921, both years inclusive, has amounted to \$424,861.00.

Six assistants have been employed the entire year, on engineering work.

A number of plans were made during the year for street acceptance and ten streets have been accepted as public highways, under the betterment act.

There are plans for acceptance of eleven private streets on file in this office, that for various reasons have not been made public ways.

Many streets and avenues in the city are of the same, or very similar name and could be changed at the present time (renamed in memory of deceased veterans of World War) eliminating the confusion now existing.

Some of the old main thoroughfares should be re-numbered their entire length, so as to eliminate half numbers and letters now being used; and certain streets where traffic is congested should be made "one way" streets.

## STREETS ACCEPTED AS PUBLIC HIGHWAYS IN 1921, UNDER THE BETTERMENT ACT.

Name of Street	Ward	From	To	Width in ft.	Length in ft.	Date of Acceptance
Bailey street . . . . .	7	North street . . . . .	West Adams street . . . . .	40	420	December 27, 1921
College Hill Road . . . . .	7	North street . . . . .	Around to Conwell ave. . . . .	40	449	December 9, 1921
Eustis street . . . . .	6	Beacon street . . . . .	Cambridge Line . . . . .	30	146	December 27, 1921
Magnus avenue . . . . .	2	Washington street . . . . .	Lewis street . . . . .	40	429	December 9, 1921
Maple avenue . . . . .	4	School street . . . . .	Near Marshall street . . . . .	40	319	December 9, 1921
Mead street . . . . .	7	Moore street . . . . .	Near Cameron avenue . . . . .	40	345	December 9, 1921
Pennsylvania avenue . . . . .	1	Cross street . . . . .	Wisconsin avenue . . . . .	40	350	December 9, 1921
Pitman street . . . . .	6	Beech street . . . . .	Spring street . . . . .	30	377	February 11, 1921
Rose street . . . . .	2	Washington street . . . . .	Lewis street . . . . .	40	450	December 9, 1921
West Quincy street . . . . .	7	Bailey street . . . . .	Medford Line* . . . . .	40	292	December 9, 1921
Total . . . . .			(0.677 miles) . . . . .		<u>3577</u>	

Summary. — Public streets 85.281 miles (includes 1.406 miles of City Boulevard and Park Roadways, 2.331 miles of State Boulevard (Metropolitan Park Commission), and 1.596 miles State Highway); private streets 15.502 miles.

Total length of streets in the city 100.783 miles.

In the 1910 report, tables were published showing old names of certain streets as formerly known, and names of public squares in the city.

(Name of Oak Square changed to Wilson Square, — 1918.)

(Name of Metropolitan Square changed to Gerrior Square, — 1921.)

#### Length of Public Streets in Each Ward.

	Miles
Ward one . . . . .	10.798
Ward two . . . . .	9.739
Ward three . . . . .	7.630
Ward four . . . . .	10.026
Ward five . . . . .	12.388
Ward six . . . . .	13.788
Ward seven . . . . .	20.912
	<hr/>
Total length of public streets in the city . . . . .	85.281

Street "Markers" — (Stone Bounds) (Brass rods set in cement sidewalks).

1921 — stone bound set Myrtle Street — east side at Perkins street.

City Line bounds No. 10 and No. 19 on Cambridge boundary line were raised to grade and set in concrete.

Stone bounds have been rest in Portland cement concrete at a number of street intersections and angles, to define and preserve the true lines of public streets, and this work should be continued as much as possible each year. These bounds are also of great convenience in establishing permanent "Bench Marks" throughout the city for giving grades.

In the 1907 report a table was compiled from old reports, maps, and office notes, showing the location of stone bounds; the year when set, and whether existing or removed from 1860 to 1907 inclusive, and additional lists in the reports of 1908, 1910, 1911, 1913, 1919, 1920 and 1921 will show location of all street bounds set to 1922.

There are at the present time a total of 658 bounds or brass rods set for defining street lines.

Four new streets have been constructed, under the betterment act, with a bituminous macadam wearing surface, con-

crete gutters and granite edgestones, a total of 1,624 feet (.308 mile) ; the work being done by contract.

The average cost of this type of construction complete, for these streets, was \$9.70 per linear foot, a high rate, on account of the unusual cost of materials and labor.

Assessments have been levied on abutting property owners for approximately one-half of the cost of constructing these streets.

New granite block pavement has been laid on a concrete base with a cement grout in sections of Linwood street, Beacon street and Tufts street ; 9,898 square yards (2,924 feet in length) of this type of pavement were constructed by contract at \$7.45. per yard complete.

In constructing the granite pavement, new streets and sidewalks 3,010 feet (0.570 mile) of new edgestone were set.

The total length of permanent paved streets in the city amounts to 18.07 miles.

Permanent street pavement should be extended as rapidly as possible, using old granite block, re-cut and laid on a concrete base, the best and most economical pavement for this city.

Grades were given and measurements taken for the reconstruction of ten streets with a bituminous wearing surface, a length of 8,765 feet (1.66 miles).

TABLE OF STREET CONSTRUCTION.

	Square yards	Miles
*Streets paved with granite blocks . . . . .	140,987	6.14
**Streets paved with concrete . . . . .	23,990	1.42
†Streets paved with asphaltic top . . . . .	42,215	2.59
Streets paved with vitrified brick . . . . .	20,958	1.29
Streets paved with "Bi-co-mac" . . . . .	10,100	0.77
Streets paved with bitulithic (patent) . . . . .	3,059	0.06
Combination pavement (concrete base with bituminous top) . . . . .	87,200	5.80
‡Streets macadamized (bituminous binder) . . . . .		43.55
Streets macadamized (water bound) . . . . .		23.07
Streets graveled or unimproved . . . . .		16.09
Total . . . . .		100.78

\*Also 31.9 miles (single track) electric railway paved with granite, asphalt, bitulithic, etc.

\*\*Includes 0.42 mile state highway.

†Includes 1.16 miles of state highway.

‡Includes 1.406 miles of city boulevard and park roadways and 2.331 miles of state boulevard (Metropolitan Park Commission).

There are a number of very dangerous crossings in this city at intersecting public thoroughfares, where the corners should be cut back and the roadway widened for the safety of traffic and improvement in appearance.

Lines and grades were given for constructing sixteen new granolithic sidewalks, 4,647 square yards (1.4 miles), and assessments computed, the abutting property owners paying one-half the cost.

In laying out new work, under orders passed for construction of sidewalks, etc., occasionally portions of buildings and fences are found to be encroaching on the sidewalk and on some of the old rangeways these encroachments have existed for many years; as improvements are made, the full width of sidewalk should be maintained.

In sections of the city where brick sidewalks have been laid many years, and must necessarily be relaid on account of deterioration and unevenness, granolithic should be substituted in place of brick.

Miles of Edgestone, Granolithic, Gravel and Brick Sidewalks in Each Ward.

	Edgestone	Gravel Sidewalk	Brick Sidewalk	Granolithic Sidewalk
Ward one . . .	19.925	3.615	12.093	4.758
Ward two . . .	16.807	6.591	6.423	3.609
Ward three . . .	14.325	0.840	11.572	1.911
Ward four . . .	15.309	1.334	9.993	3.914
Ward five . . .	22.679	4.509	12.155	5.946
Ward six . . .	25.201	4.099	10.678	11.269
Ward seven . . .	32.891	2.018	8.389	22.594
	<hr/>	<hr/>	<hr/>	<hr/>
	147.137	23.006	71.303	54.001

(Details, etc., streets and sidewalks in report of Street Commissioner).

The Boston Elevated Railway Company has petitioned for a relocation of tracks in certain streets and has made extensive repairs in its roadbed in this city during the past year, replacing long sections of old tracks with new and heavier rails. There are, however, a number of miles of trackage, orders having been granted for widening in the city's main thoroughfares, where the old granite block pavement, within the railroad location, should be relaid and grouted with cement and additional catch basins constructed between the rails to relieve the flooding of sections of certain streets in times of heavy storms. There are 32 miles of electric railroad (single track length) at the present time in the city's streets. A considerable

length of high power cables have been placed in underground conduits.

Plans have been made by the various companies and filed in the city engineer's office, showing the locations of gas mains, poles, tracks and conduits in this city, which have been granted by the board of aldermen during the year; and the work of placing overhead wires in conduits, underground, and removing poles from the streets should be extended as rapidly as possible.

In the city's squares overhead wires should be placed underground, immediately, and practically all poles (except for lights) removed—on the main thoroughfares many of the existing poles should be eliminated, at the present time, being unnecessary.

A special ordinance should be enacted concerning city inspection on all underground work done by private companies or corporations and regulation as to method of street openings.

At the present time there are underground in the city's streets 17.64 miles of telephone conduits, 12.42 miles of electric light conduits, 4.25 miles of electric railway conduits; and about 9.7 miles of underground conduits used for the city's wires.

The Cambridge and Charlestown gas companies have respectively 63.79 and 28.1 miles of gas mains in the city's streets.

Lines and grades have been given for laying new city water mains. New house services, many gates, hydrants, water posts and blow-offs have been located and recorded, sketches and plans made showing the same, and the water works maps corrected to date; also a large number of old water services where new meters were installed, have been located and recorded.

A number of the locations of old hydrants, gates, etc., have been found to be incorrect, a few having been removed entirely; a new survey of the entire distribution system should be made and the maps and office records compiled. (Length of water mains, details, etc., in report of Water Commissioner).

Lines and grades have been given for the erection of city buildings and plans and sketches made for the laying out of surrounding grounds:—a special plan being made showing a proposed development of the West Somerville Junior High School grounds.

Plans have been made where accidents have occurred on the city work, or where boundaries were in dispute and special plans and data prepared for the city solicitor's use in court

cases and Federal, State and Municipal hearings attended where information was required.

Considerable data has been compiled relating to the various highway bridges in this city for the State Department of Public Works.

All plans of estates in Somerville recorded at the Registry of Deeds, East Cambridge, including land court plans, have been copied, also titles examined, abstracts from deeds made for the purpose of assessments, and the proportional part of the cost of new work computed, and schedules of assessments made out showing the property owners.

Totals number of plans on file in the office approximately eight thousand two hundred and fifty.

A skeleton map of the city has been made for the Somerville Board of Trade showing steam and electric car lines, principal streets, public buildings and locations of principal industries:—also a street map for the Automobile Association showing the various routes for auto traffic through the city, details of pavement, land marks, etc.

A plan and data has been compiled showing a proposed widening of Bridge street (East Cambridge) being the extension of Somerville avenue:—a much needed public improvement for relieving the present congested traffic and business.

Perambulation of the Somerville-Boston city boundary line:—In November, a committee appointed from each city, city engineers and street commissioners, examined the monuments and reference points defining the division line between these two cities and reported their findings in due form to the board of aldermen.

These boundary lines are perambulated every five years as prescribed by the statutes.

No action has been taken by representatives of the city governments of Somerville and Medford relative to the changing of the boundary line between the two cities. From the various studies presented, an exchange of territory can be made that would be equally advantageous.

In addition to the regular work of the department, considerable information and assistance has been furnished to the various city departments and citizens of the city; and special data for the development of real estate etc., given to private engineers, architects, and builders.

For the immediate improvement of conditions in this city the highway bridges and approaches over the steam railroads should be rebuilt the full width of the street at Broadway, (North Somerville) Prospect street and Washington street, near Union square; and the steam railroad bridge over

Washington street (East Somerville) reconstructed with increased head-room for street traffic,—the dangerous grade crossing at Park street should be abolished, as decreed by the courts a number of years ago, and a foot-bridge should be constructed over the railroad tracks making a connection between Wilson Square - Craigie Street and Stanford Terrace - Beacon street.

I respectfully refer to some of the more important recommendations and suggestions made in reports of the city engineer for a number of years past.

### SEWER DIVISION.

The high cost of materials and labor has prevented the extension of the "separate system" sewers and likewise storm drain construction work, except that absolutely necessary.

Three sewers were petitioned for during the year.

#### Construction Account, Statement of Expenses, 1921.

Constructing sewers (separate system) . . . . .	\$1,803 26	
Constructing storm drains . . . . .	2,064 24	
Constructing catch basins . . . . .	1,610 50	
Constructing manholes on sewers . . . . .	255 76

Two sewers were constructed during the year and two storm drains, a length of 1854 feet of 18" - 15" - 10" and 8" pipe, the work being done by the city employing day labor. (See tabular statement for 1921, showing itemized account of work.)

The total length of the city's drainage system is 113.598 miles, and the entire cost of construction has amounted to

TABULAR STATEMENT OF SEWERS AND STORM DRAINS BUILT IN 1921.

LOCATION				ITEMS OF CONSTRUCTION AND COST

Total length of public sewers in the city, January 1, 1922 . . . . . 502,599.3 ft.  
 Total length of private sewers in the city, January 1, 1922 . . . . . 34,748.0  
 Total length of sewers in the city, January 1, 1922 . . . . . 537,247.3 = 101,770 miles (32.521 miles separate system sewers)  
 Total length of storm drains in the city, January 1, 1922 . . . . . 62,452.5 = 11.828 miles  
 Total length of city drainage system, January 1, 1922 . . . . . 113.598 miles  
 Total length of Metropolitan Sewerage System running through the city . . . . . 3.475 miles

about \$1,362,272.00, exclusive of the amount paid to the state for assessments for the construction of the North Metropolitan sewerage system.

The city's assessment for the Metropolitan sewerage system for the past year was \$54,274.37 on construction account and \$57,457.22 for maintenance, an increase of \$20,900.00 over the previous year — an extraordinary and excessive assessment — more than 50 per cent additional, and the total amount paid the Commonwealth of Massachusetts for this state sewer has been \$1,612,937.64 (1892-1921, both years inclusive). The total length of the Metropolitan sewerage system mains running through the city amounts to 3.475 miles.

There are within the city's limits thirteen connections with the North Metropolitan state sewerage system, also four outlets through the city of Cambridge and three outlets through the city of Medford. The locations of the connections of the city's mains with the state sewer are shown in the 1912 report, and details of construction in previous reports.

The 1918 report contains a compiled table of Storm Drains constructed to 1919 showing length, cost, date of construction, district benefited, etc.

Eighteen catch basins have been constructed in the highways during the year, making a total of 2040 basins in the city for street drainage purposes, constructed and maintained as follows:—

By the city (sewer division):—

Located in streets and subways . . . . .	1,848 basins
Located in city boulevard . . . . .	33 "
Located in parks (17) and other city lots (12) . . . . .	29 "
	<hr/>
Total catch basins constructed and maintained by the city . . . . .	1,910
By Boston & Maine Railroad Company on railroad locations . . . . .	36 basins
By State, located in boulevards, and highways . . . . .	130 "
	<hr/>
	166
	<hr/>
Total catch basins in the city for storm drainage purposes . . . . .	2,078

The separate system sewers should be extended in the old sections of the city each year, as the appropriation will allow, and storm drains completed in certain localities as previously recommended:—especially in the North Somerville district, including the B. and M. railroad valley, and at the East Cambridge line extending from the Somerville avenue sewer and discharging into Miller's River. In July a terrific storm

occurred—recording the greatest rainfall ever known in this section of the country for a certain period of time.

The city's drainage system will be greatly improved when all the foregoing changes are made and construction work completed.

#### MAINTENANCE ACCOUNT, STATEMENT OF EXPENSES, 1921.

Maintenance of sewers, including cleaning and flushing (113.6 miles) . . . . .	\$6,122 13	
Maintenance of catch basins, cleaning and flushing (1,910) . . . . .	14,240 78	
Maintenance of storm water pump, Medford street . . . . .	101 08	
Changing line and grade and repairing catch basins . . . . .	462 50	
Changing line and grade and repairing manholes . . . . .	300 30	
Repairing old sewers . . . . .	428 11	
Inspection and location of house drains . . . . .	826 33

Total expenditures . . . . .		\$24,050 59
 Credit.		
Appropriation . . . . .	\$23,930 00	
Transfer from Fire Department . . . . .	45 00	
Received from other departments . . . . .	75 81	
	<hr/>	
Total credit . . . . .		24,050 81
		<hr/>
Balance unexpended . . . . .		\$0 22

Value of tools and property on hand in maintenance of sewers, \$2,000.00.

One employee, a faithful laborer for more than a quarter of a century in this division, was retired on a pension the latter part of the year, the first and only one in the department.

A permanent force of men, varying in number from ten to fourteen, and teams are kept continually at work flushing, cleaning and repairing the city's drainage system, catch basins, etc., the expense necessarily increasing yearly as lengths of sewers, drains and catch basins are added to the system, and the distance increased to the dumping places which are fast diminishing, only two being available at present.

This question of scarcity of dumping places has confronted the city for some time and various schemes have been considered for efficient and economical methods of disposal but no feasible plan has been provided.

Approximately 4,870 cubic yards of material have been removed from the catch basins during the year, at an average cost of about \$2.92 per cubic yard, and the average cost per mile for cleaning and flushing the drainage system, including catch basins, has amounted to about \$179.25. There are about twenty catch basins (average) to a mile of roadway in this city and the approximate cost of cleaning per basin has been \$7.50 the past year.

A number of repairs have been made and sections rebuilt on some of the old sewers, alterations made in the outlets and overflows, and extra manholes built for the purpose of improving the system.

Many catch basins and manholes have been repaired and grade or line changed.

One hundred and forty permits have been issued to licensed drain layers for connecting buildings with main sewers and storm drains, fifty-one being for repairs or alterations; all of the work being done under the supervision of the city's inspector.

Many of these repairs were made necessary by the growth of tree roots in the pipe. In several cases, these private drains were relaid with iron pipe and lead joints, which is the type of construction recommended by this department, where drain connections have become stopped on account of tree roots.

Certain persons are licensed as drain layers by the city and are under bonds, for the purpose of laying these private drains:—none others are permitted to do this work. Reference to data concerning each drain connection with the public sewer is on file in this office.

There are to date about 16,601 private house drain connections with the city's drainage system.

During the year the sewer division has done considerable miscellaneous work for other city departments and outside companies furnishing material and labor, and being partially reimbursed for the same.

Some of the old trunk sewers which were constructed many years ago are in a dangerous condition; sections, where the arch is badly cracked and liable to collapse any time, should be immediately rebuilt.

## PARKS AND PLAYGROUNDS DIVISION.

Under this division about seventy-four acres are maintained as parks and playgrounds, and approximately a mile of city boulevard; 64 acres are owned by the city and certain areas owned by private parties are turned over to the city for recreation purposes, also satisfactory arrangements have been made for a number of years whereby the city has the use of Tufts College playfield during the summer vacation months, and skating areas in the winter. Over 2,000 trees of various varieties are located on these grounds. These areas when completely developed will compare favorably with other cities in the vicinity.

Somerville Field has been re-named "George Dilboy Field" by an order of the Board of Aldermen, May 27, 1921.

Broadway Park has been re-named "Saxton C. Foss Park" by a similar order, December 27, 1921.

These parks were re-named in honor of Somerville young men who lost their lives in the World War.

The narrow strip of land situated in the center of Broadway between the Charlestown line and Fellsway East, about one-half mile in length, being a portion of a reserved area known as Broadway Parkway, has been reconstructed as a part of the street and is now used for travel of all kinds.

The parcel of land, known as Webster Avenue Playground, formerly a schoolhouse lot situated near the Cambridge city boundary line and containing about 11,000 square feet has been sold to private parties for building purposes.

## MAINTENANCE ACCOUNTS, STATEMENT OF EXPENSES, 1921.

The number of men employed has varied from seven to twenty.

The city's assessment for Metropolitan parks and boulevards for the year 1921 amounted to \$18,774.76 on construction account, and \$44,523.31 being the proportional cost for maintaining the same; in addition to this the city's special assessment for the Charles River basin construction and maintenance amounted to \$10,037.81; for the improvement of Alewife Brook and maintenance of same \$1,112.10 and for the maintenance of Wellington bridge across Mystic River, \$3,243.72. The total of these assessments amounts to \$77,791.61, being Somerville's proportional payment to the State on account of the Metropolitan park system for the year 1921.

The total assessment paid to the State for parks and boulevards amounts to \$915,527.23, January 1, 1922 and the length of State boulevard at present constructed in this city consists of seven-tenths of a mile of double roadway, located in the easterly part of the city and extending between Broadway and Mystic River, and one and two-tenths miles bordering Mystic River and Alewife Brook located in the westerly part of the city.

Athletics in general have been very active since the war and the baseball "diamonds," football fields, tennis courts and athletic apparatus located on the various playfields have been in constant use.

During the Daylight saving period "twilight" baseball has been exceedingly popular, practically all of the city's fields being used, and at Lincoln Park games were scheduled for every evening during the season with crowds in attendance. A total of 566 games were scheduled on the city's playfields during the year.

Special supervision was provided during the months of July and August, especially for the children's activities, to make the playgrounds popular and successful.

Part of the money generally spent for flower beds, shrubs, etc., for ornamentation of the various city grounds has been used in cultivating areas of park and playground land, and many school children have devoted their time and energies to the raising of vegetables.

The past year, this division of the engineering department has had the supervision and work of plowing, harrowing, and preparing the various parcels of land used, an expenditure of approximately \$308.00.

The original wooden seats built in 1911 as a part of the concrete grandstand erected at Dilboy Field (formerly Somerville Field) have been decaying for a number of years, on account of exposure to the weather, and had become unsafe in many places for seating the attending crowds. In June the old seats were torn down and replaced, being constructed of hard pine timbers and spruce plank at an expense exceeding \$6,000.00 the work being completed in time for the 4th of July celebration. This new lumber used should be creosoted and painted for the preservation of the structure.

Over the front entrance to this grandstand an appropriate bronze tablet has been erected and made a part of the concrete structure, suitably inscribed George Dilboy Field.

At this enclosed athletic field bordering Alewife Brook, a permanent concrete field house should be constructed with all modern equipment (about \$10,000 is available at the present

time) and the remaining area graded as soon as possible; when completed as originally designed the city will own one of the best recreation fields in the vicinity. (In the 1910 report, plan shows proposed complete laying out).

A number of large Poplar trees on the Powder House Boulevard were uprooted, large limbs broken and trees split during terrific wind, rain and ice storms causing considerable damage to abutting property, houses, etc., and costing approximately \$400.00 for removal — new hardy growth trees should replace these trees the entire length of the boulevard immediately.

Four hockey rinks of regulation size were constructed on certain parks and playgrounds and maintained during the winter season, many games being played, and larger areas on the various parks flooded for general skating.

Additional seats have been erected at Lincoln Park and Trum Playground and back-stops on the ball fields have been reconstructed and fences repaired, — additional equipment and shelters for children should be provided on some of the play-fields.

Shower baths have been maintained in the highway stable building at the Trum Playground and the baths located at Lincoln Park have been kept open certain evenings during each week; more of these baths should be established at the various fields. Wading pools for the children have been maintained at these two places.

All flag poles on the parks were repaired and painted— flags are displayed on all parks every day throughout the year.

Tennis courts have been in use at Mason Street playground, Dilboy Field, Broadway, Central Hill and Lincoln parks.

All tar concrete walks on Central Hill Park should be reconstructed and new walks laid out across Broadway Park for public convenience.

The Metropolitan District Commission have furnished band concerts, certain evenings during summer months, at Broadway Park.

The city has become so densely populated (averaging nearly 25,000 people a square mile) that some of the larger park areas should be more extensively utilized for public recreation and physical training purposes; on several of the play-fields concrete buildings should be constructed in place of some of the old wooden structures, additional apparatus provided on some of the principal parks and playgrounds for the smaller children's pleasure, where a regular park employee can have the care of the same, and some of the smaller play-

ground areas should be enclosed by wire fencing for the protection of children.

In certain localities of the city, well-lighted playgrounds, during the summer evenings, should be maintained for the young men and women working in the factories daily.

Paul Revere Park area should be enlarged by acquiring additional land and constructing a passageway across from Main street to Broadway, separating the city's park from the adjoining land, thereby preserving an historical spot on the top of Winter Hill for the future, also making a convenient connection for travel.

In connection with the departmental work the Recreation and Playgrounds Commission, the Playgrounds Association and Women's Clubs have been of great assistance in advising, directing and promoting the city's welfare. (Details, etc., in Commission' and Association reports).

The total yearly expenditure by the city departments and other Associations for recreation and play the past year has been approximately \$20,000.00.

#### Appended Table.

Annexed to this report is a table giving names of all streets in the city, public and private, lengths, widths, and the total mileage; in the 1910 report, tables were published showing old names of certain streets as formerly known, and names of public squares in the city.

Respectfully submitted,

ERNEST W. BAILEY,

*City Engineer.*

Total length of streets in the city, 100.783 miles.

## REPORT OF THE STREET COMMISSIONER.

OFFICE OF THE STREET COMMISSIONER,  
CITY HALL, Somerville, January 1, 1922.

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen:— I most respectfully submit the forty-sixth annual report, containing a brief summary of the principal work performed by the Highway Department, by day labor and contract, during the year 1921, with recommendations for necessary additions the coming year.

This department has charge of the construction, alteration, repair, maintenance and management of ways, streets, sidewalks and bridges; the setting out and care of shade trees; the suppression of gypsy and brown tail moths, elm leaf beetles and other pests which destroy trees; and the oiling and watering of streets.

### Highway Department Appropriations.

	Appropriations	Expenditures
Highway Maintenance . . . . .	\$56,775 00	
Departmental transfers . . . . .	33,504 99	
	90,279 99	90,173 26
Total credit . . . . .		
Sidewalks maintenance . . . . .	9,091 04	8,750 04
Street Sprinkling . . . . .	39,975 00	39,972 30
Street Cleaning . . . . .	27,775 00	27,581 70
Suppression of Moths . . . . .	4,400 00	4,399 16
Care of Trees . . . . .	6,628 00	6,627 21
New Streets . . . . .	15,751 00	15,750 40
Permanent Pavement . . . . .	83,536 36	81,510 95
Sidewalk Construction . . . . .	15,388 01	15,372 29
Reconstruction and Resurfacing . . . . .	31,325 26	31,298 76
	\$324,149 66	\$321,436 07

The automobile travel from the North Shore to the South Shore increased so rapidly on Webster avenue and Walnut street, that the City Government made these streets, or portions of them, one way streets going south and Franklin street one way north, this has divided the travel going through our city and is a great improvement over the old way, as it saves congestion on these streets and makes them safer for pedestrians.

During the war period prices were so high the Mayor and Aldermen thought it unwise to spend large sums for streets and sidewalks, so for the last few years only necessary work was done.

Now that prices of road materials are on the decline I hope the City Government will make a goodly appropriation the coming year for street work.

Roads and pavements of every type require repair and maintenance. A patching gang, using mostly "Tarvia K. P." have patrolled the streets repairing any defects they might find. The results have been satisfactory. "A patch in time saves nine."

Late this year a "Little Wonder" mixing machine was purchased for mixing "K. P."

Good streets are being demanded especially since the introduction of the automobile, and the Highway Department is doing its utmost, as far as the appropriation will allow, to meet these demands.

My slogan for good roads is "Maintain."

1921.

Highway Maintenance.

Balance . . . . .		\$106 73

#### Snow and Ice.

This year I have purchased some new equipment and made over some old ploughs and levelers so that now this department is ready to remove snow and keep the roads open for travel.

This department removes the snow and ice from sidewalks, and sands when necessary in front of all public buildings, grounds and schools.

121 requests and reports were attended to.

\$5,109.66 was expended for the care of snow and ice. 1090 cubic yards of snow and ice were removed. 20 cubic yards of sand and 298 cubic yards of ashes were used in caring for icy sidewalks, streets and crossings.

#### Bridges.

I recommended last year that extensive repairs must be made to the Lowell street bridges, which was not done. These bridges must be repaired this year. The other bridges are in good condition.

#### Underground Wires.

Outside of a few underground connections no underground conduits were constructed this year.

#### Crushed Stone.

The William J. McCarthy Co. furnished 32 tons of local crushed rock at \$2.00 per ton at their crusher and 5629 tons at \$2.40 per ton on the line of work. Coleman Brothers 1461 tons of trap rock at \$2.48 per ton on line of work. General

Crushed Stone Co. 295 tons of trap pea stone at \$2.80 per ton and 180 tons of nut trap rock at \$2.50 per ton delivered on line of work.

#### Steam Rollers.

No. 1 roller worked 126 days.

No. 4 roller worked 66 days.

The No. 4 roller should be equipped with a road scarifier and the old No. 2 roller should be exchanged for a new fifteen ton maintenance roller.

#### Sidewalks Maintenance.

The old brick sidewalk on the south side of Somerville avenue from Union square westerly was removed and 460 square yards of granolithic laid, this work should be extended to Gerrior square the coming year. This same construction should be extended in all the squares. I have had some trouble in the past maintaining dirt sidewalks on hills and side-hills, but with the introduction of "K. P." mixed with pea stone and spread over these dirt sidewalks, then covered with fine gravel I find that I have eliminated all trouble in regard to these sidewalks washing out after every heavy shower.

1220.9 linear feet of edgestones were reset. 1370 square yards of brick sidewalks were relaid. 421 square yards of paved gutters were repaved and 15 square yards of granolithic were relaid.

All police reports pertaining to this kind of work are charged to this appropriation.

\$8,750.04 was expended for Sidewalks Maintenance.

#### Street Sprinkling.

The American Car Sprinkler Company sprinkles and flushes nearly all of our main streets for \$925.00 per month, eight hours per day and seven days per week. Before the war this car worked twelve hours per day and all the squares were flushed before 7 A. M. giving great satisfaction to all the store keepers by having the squares cleaned every day before their stores were opened for business.

Only one car of Non-Asphaltic oil was used this year. Tarvia B and Tarco were used on macadam streets.

I most respectfully recommend the purchase of a new auto oiling truck.

Dust layers used during the year:—

- 193,839 gallons of Tarvia "B" (Barrett's).
- 67,178 gallons of Tarco (Flemmings).
- 6,068 gallons of McKenna's Non-Asphaltic.
- 950 gallons of Alden Spears Sons Non-Asphaltic.

This division of the department is self supporting.  
\$39,972.30 was expended for Street Sprinkling.

#### Street Cleaning.

The scarcity of dumps has increased the cost of this division greatly. In some of the squares where a push cart man could care for the same, when he had a near dump now with the scarcity of dumps this man must have a team because the haul is so far from his work.

If some of the tenants and storekeepers who complain about rubbish in the streets would be a little more careful themselves and not throw or sweep rubbish into the streets, I know our city would have a more tidy appearance.

6,525 cubic yards of street sweepings were removed.  
\$27,581.70 was expended for Street Cleaning.

#### Suppression of Moths.

Under this appropriation the city cares for all trees both public and private, in regard to moths. Street trees are sprayed in the spring and summer.

This year I found very few brown tail moths. The Satin moth is raising havoc with our poplar trees.

This division gives work to quite a number of men in the winter.

- 9,112 street trees were inspected and cared for.
- 12,751 private trees were inspected and cared for.
- 14,572 bushes were found moth infested.
- 5,711 fences and buildings on which moths nested.
- 57,118 gypsy moth nests were painted with creosote.
- 108 brown tail moth nests were gathered and destroyed.
- 7,620 trees were sprayed by the gasoline spraying machine to exterminate the different kinds of caterpillars and beetles.

\$4,399 16 was expended for the Suppression of Moths.

#### Shade Trees.

If the city does not appropriate any money for the setting out of shade trees, in a few years this city will not have any street trees, because of electric wires, gas leaks, permanent pav-

ing, insects and sleet storms (such as we had on November 28, 1921) killing and destroying our trees. The storm of November hit nearly every tree in our city and this department attended to 450 reports and requests and had to work nights in order to clear our streets and sidewalks. The trees that were hit by this storm must be attended to in regard to cutting off the stumps of broken branches and painting the same.

72 trees were set out.  
119 trees were removed.  
717 trees were trimmed.  
83 tree guards and supports installed.

\$6,627.21 was expended for Care of Trees.

#### Highway Construction — New Streets.

Four new streets were constructed during the year under the Betterment Act, by contract with William J. Sullivan, viz:

Setting edgestones 75c per linear foot.  
Gutter construction \$3.75 per square yard.  
Construction of Macadam roadway \$1.90 per square yard.

The city furnished the edgestone and tarvia binder. Straight edgestone \$1.30 per linear foot. Circles \$1.75 per linear foot from H. H. Fletcher Company, delivered on line of work.

Tarco X binder 14½c per gallon from H. A. Fleming Company, delivered and sprayed on work.

Nine new streets were accepted this year.

\$15,750.40 was expended for New Streets.

NEW STREETS CONSTRUCTED IN 1921.

Street	From	To	Material	Length	Cost
Crescent street	Boston line	Hadley street	Bituminous	402	\$3,130 52
Dickson street	Broadway	Fairmount avenue	"	271	3,268 25
Cedar avenue	Cedar street	Linden avenue	"	290	2,635 31
Spring Hill Terrace	Highland avenue	Belmont street	"	670	5,979 42

PERMANENT PAVEMENT, 1921.

Street	From	To	Material	Sq. Yds.	Cost
Beacon street	E'ly Sacramento St.	R. R. Bridge	Granite Blks. on concrete base	2598.7	\$19,541 07
Broadway	Cambridge line	Cooney street	Granite Blks. on concrete base	1478	11,532 40
Linwood street	Arthur street	Charlestown line	Grass plot Macadamized	2540	4,654 28
Linwood street	Congress place	Fitchburg street	Granite Blks. on concrete base	1924.8	15,001 68
Tufts street	Dix place	northerly	Granite Blks. on concrete base	1911.4	14,795 76
North street	South of Glen street	Cross street	Granite Blks. on concrete base	2049	15,106 63
	Already laid	Medford line	Concrete gutters	210	888 13

**Sidewalks Construction.**

The contracts for granolithic sidewalks were let to Denis I. Crimmings and Peter Salvi, of Somerville, who furnished all the material and did the excavation at \$3.25 per square yard.

Miles of edgestones, granolithic, brick and gravel sidewalks in the city:—

Edgestones . . . . .	147.137 miles
Granolithic sidewalks . . . . .	54.001 miles
Brick sidewalks . . . . .	71.303 miles
Gravel sidewalks . . . . .	23.006 miles

\$15,372.29 was expended for Sidewalks Construction.

**Highways Construction — Permanent Pavement.**

Contract was let to William J. Sullivan at \$7.45 a square yard, for paving with granite (4") paving blocks grouted with cement on a concrete base. He furnished all materials and did the excavating.

\$81,510.95 was expended for Permanent Pavement.

**Reconstruction and Resurfacing.**

Eleven streets were reconstructed or resurfaced under this appropriation at an average cost of \$3.32 per linear foot, by city employees.

The expense for this work is taken from the tax levy, instead of on a five year bond, thus saving a large amount of interest the city used to pay.

This kind of work makes a great improvement in our city and satisfies a number of residents and tax payers.

The Barrett Co. furnished Tar binder Tarvia "X" at 12c per gallon F. O. B. factory.

A big improvement was made on Broadway from the Charlestown line to Arthur street. The grass reserved space between the tracks of the Boston Elevated Street Railway Company was removed and suitable filling with a Tarvia top was constructed, which by far gives the street a better appearance and a chance to cross the tracks wherever one desires.

\$31,298.76 was expended for Reconstruction and Resurfacing.

## Miscellaneous.

- 80 Granolithic driveways constructed.
- 70 Brick driveways constructed.
- 31 Edgestones dropped for driveways.
- 5 Driveways extended.
- 5 Driveways discontinued.
- 4 Carriage walks constructed.

Driveways are constructed, discontinued, relocated or extended at the expense of the petitioners.

Length of public streets 85.281 miles.

Six horses were killed on account of disability and six horses purchased during the year.

The department maintains its own municipal repair shop for the different lines of work.

763 horses were shod during the year. Our horses, during the slippery going in the winter, must be sharp shod because we must have the sidewalks and hills sanded for others to travel on.

I have attended meetings of the Public Works and of the Board of Aldermen for consultation regarding work and petitions.

## Labor.

Eight hours constitute a day.

The regular employees are given two weeks vacation and all employees twelve months Saturday half-holiday without loss of pay.

Laborers receive \$4.00, drivers and chauffeurs \$4.10, mechanics \$4.50 and engineers \$4.75 per day.

The city does its own insuring for injured laborers. There are nineteen former employees receiving pensions under the act providing for the pensioning of laborers.

There were during 1921 :—

- 111 permits issued to the Cambridge and Charlestown Gas Companies.
- 103 permits issued to cross sidewalks.
- 338 permits issued to occupy streets and sidewalks.
- 27 permits issued to feed horses.
- 29 street sprinkling complaints and requests.
- 189 notifications to other departments and corporations.
- 21 accident reports.
- 912 police reports.
- 704 brick and granolithic sidewalks repaired.
- 1142 miscellaneous reports and requests.
- 87 drain layers permits.
- 593 water department openings.
- 118 permits to open streets and sidewalks.

40 danger and traffic signs erected.  
25 new signs erected.  
136 signs repainted.  
21 streets cleaned by request.  
3538 cubic yards of sand and gravel used.  
2685 cubic yards of dirt removed.  
1019 cubic yards of ashes used.  
1203 cubic yards of old macadam used.  
1086 bags of Portland cement used.

#### Recommendations.

I most respectfully recommend that Somerville avenue from Beacon street to Porter Station, Cambridge, be paved with granite blocks grouted on a concrete base; that Linwood street and the north side of Beacon street be completed. That the north side of Washington street from Tufts street to Charlestown line be repaved and placed on a concrete base instead of a gravel base, also on Somerville avenue between Union square and Gerrior square. I recommend the purchase of a Ford ton truck with dump body, auto truck oiler and that a fire proof garage be erected at the city stable yard.

I desire to express my appreciation of the assistance and co-operation of His Honor, Charles W. Eldridge, Board of Aldermen, Public Works Committee, Heads of Departments and employees of this department and I should also feel as if I was not doing my duty if I neglected to thank the citizens for notifying my department of defects in the streets and side-walks.

Respectfully submitted,

ASA B. PRICHARD,

*Street Commissioner.*

## REPORT OF COMMISSIONER OF PUBLIC BUILDINGS.

City Hall, Somerville, January 1, 1922.

To the Honorable, the Mayor, and the Board of Aldermen of the  
City of Somerville:—

Gentlemen:—

In accordance with the provisions of the City Charter, I submit herewith the annual report of the public buildings department for the year ending December 31, 1921.

The total valuation of the public property which is in the custody of the public buildings department is approximately \$3,560,000.

The total expenditure for the year 1921 for the care and maintenance of this property was \$228,610.13.

This amount was expended as follows:

	Janitors	Fuel	Light	Care and Repairs	Totals
School Buildings . . . . .	\$60,742 33	\$50,368 23	\$11,278 45	\$39,715 19	\$162,104 20
Municipal Buildings . . . . .	4,673 30	2,365 06	1,754 50	2,536 35	11,329 21
Polling Places . . . . .	.....	11 86	16 27	443 84	471 97
Police Buildings . . . . .	1,990 92	1,900 39	724 03	1,064 66	5,680 00
Fire Buildings . . . . .	.....	6,245 02	3,087 59	4,703 61	14,036 22
Electrical Dept. . . . .	795 00	802 84	118 23	48 65	1,764 72
Contagious Hospital . . . . .	424 00	2,610 93	574 33	1,253 25	4,862 51
Sewer Building . . . . .	.....	82 25	21 25	101 19	204 69
Sanitary Buildings . . . . .	.....	428 54	208 73	1,532 00	2,169 27
Highway Buildings . . . . .	.....	534 78	236 54	708 72	1,480 04
City Home Buildings . . . . .	.....	2,232 86	657 46	962 71	3,853 03
Central Library . . . . .	3,148 30	990 50	1,499 39	548 93	6,187 12
West Branch Library . . . . .	1,378 00	568 14	467 40	353 33	2,766 87
East Branch Library . . . . .	1,113 00	529 19	239 57	52 65	1,934 41
Union Sq. Br. Library . . . . .	1,113 00	693 95	298 68	65 27	2,170 90
Park Buildings . . . . .	385 00	202 95	557 68	1,375 57	2,521 20
Bathhouse . . . . .	1,036 97	.....	.....	1,345 20	2,382 17
Bandstand . . . . .	.....	.....	1 50	247 17	248 67
Water Buildings . . . . .	.....	404 68	350 01	1,688 24	2,442 93
Totals . . . . .	\$76,799 82	\$70,972 17	\$22,091 61	\$58,746 53	\$228,610 13

### Inspection of Buildings.

The Commissioner of Public Buildings is also the inspector of buildings according to the terms of the charter and as such during the past year has made 1872 formal inspections of buildings in the process of construction.

The following table shows the number of permits issued for building operations during the year 1921:—

Buildings	WARDS							Totals
	1	2	3	4	5	6	7	
Dwellings . . . . .	32	22	14	15	35	46	106	270

The number of plumbing permits issued during 1921, was . . . . .	233
Number of permits for plumbing in new buildings . . . . .	63
Number of permits for plumbing in old buildings . . . . .	170
Number of buildings in which soil pipes were tested . . . . .	174

The total estimated cost of the new buildings and alterations during the year 1921 was \$1,838,455, while the estimated cost in 1920 was \$1,384,456, showing an increase of \$453,999.

The total number of permits issued during the year 1921, viz. 714, was 316 more than during the year 1920, when 398 permits for new buildings and alterations were issued, showing an increase of 80 per cent.

There has been considerable speculative building of dwellings going on this year, or to be exact there were permits issued for 93 new buildings housing 204 families.

Single family houses have been altered into two family houses and some of the larger houses have been altered into small kitchenette suites. These types of alterations demand very careful inspection and supervision by this department and entail considerable more time than new construction.

On September 1, 1918, the Board of Aldermen of the City of Somerville passed an ordinance requiring a fee to be collected for every building permit issued by this department. In accordance with this, fees collected for building permits during the year 1921 amounted to \$1840.

The Commissioner has under his charge and direction the work of maintenance and keeping in repair all of the eighty-four public buildings of the city and the grounds in connection therewith, all janitors in the city's employ, a force of nine mechanics who perform most of the work of keeping the buildings in repair, the inspection of installation and care of all elevators, the supervision of construction of all new municipal buildings, the maintenance of the public bathing beach, and public municipal baths in the Bennett and Bingham Schools, and Lincoln Park.

The various activities in connection with the department work require a vast amount of time and attention in order to keep the property in proper condition for occupancy.

#### Coal.

As in the past years an invitation for bids was advertised for supplying the necessary tonnage of both anthracite and bituminous coal for the city buildings for the winter of 1921 and spring of 1922. The wisdom of this has been amply justified as there has been a large saving in money on anthracite coal as a result of this decision.

Several bids were received and after taking the same under consideration, His Honor, the Mayor decided to accept the bid for bituminous coal from a local concern.

The bids for anthracite coal were extremely high and were rejected and it was decided to have this kind of coal purchased direct by this department.

### Elevators.

According to an act of the Legislature, the Building Commissioner is required to have every elevator in the city inspected yearly, and a report of the conditions and necessary repairs made to the State District Police.

Plans and specifications of all new installations of elevators must be filed in this office and certificates of approval granted by the Commissioner.

During the year 1921, there were 138 elevators inspected and 33 orders for repairs to be made to 63 elevators, sent to the owners.

Plans and specifications were filed and applications granted for the installation of three new elevators.

### School Buildings.

The maintenance and care of the school buildings has, as formerly demanded the most vigilant attention from this department and the appropriation made for that purpose has, I believe, been expended carefully and judiciously.

Every year before the summer vacation arrives this department sends out a blank to be filled in by both the principals and janitors of the schools for all requisitions and repairs needed.

These repairs and requests are taken up with the Superintendent of Schools, and taken care of in the order which he suggests so far as the appropriation will allow.

First are taken into consideration the requests and repairs absolutely needed for the opening of schools. Then the others are taken up in the order of their importance. This in itself is a huge task as the wants of every section must be taken into consideration.

Among the necessary repairs that were taken care of this year are the following:

Nine boilers were retubed. A number of grates were installed and repairs made on 24 other boilers.

Steam repairs were made in 18 buildings.

Plaster repairs were made in 10 buildings.

Plumbing repairs and new installations were made in 22 buildings.

New water service with larger main installed in High School.

Mason repairs were made in 10 buildings besides repairs of fire boxes of boilers in nearly every building.

Eighty-three teachers' guest chairs were recaned.

One teachers' couch was purchased.

Roof leaks and other roof repairs were taken care of on eleven buildings.

Carpenter repairs, such as:

Window cords.

Repairing and tightening furniture.

Fitting up two rooms in Cutler, and one each in the Morse and Bingham Schools for kindergarten, and three recitation rooms made out of Hall at the Eastern Junior High and also putting extra desks and chairs in sewing room and typewriting room.

### Painting:

On all school buildings the outside doors were repainted and the basements whitewashed.

At the High School the Teachers' rooms and office walls and ceilings were tinted and the woodwork varnished.

Three thousand desk tops, 45 teachers' desks and 30 tables in various schools refinished and varnished.

All toilet seats finished in white enamel and several school toilets painted out.

2,500 students' chairs in several buildings refinished and varnished.

Window sashes in several schools were painted and puttied.

### Lighting:

Proper lighting of school rooms is a problem to which the head of this department has given considerable time and study. We have made a good start during the past three years and established a system, from experience gained by studying the methods of other cities, which we intend to follow up until every school has the proper lighting required.

The extension to the present service has been installed in the Prescott, Knapp, Northern Junior High and Hanscom School buildings.

Changes were made in nine rooms in the High School building by enlarging and lowering the present lighting fixtures.

### Heating:

At the Bell School additional radiation has been installed in a basement room, thus bringing the temperature of this room up to a satisfactory standard for school purposes.

At the Eastern Junior High School a new connection has been installed between the heat and fan ducts which has obviated the objectionable noise made by the motor and fan.

A new hot water system has been installed in the cooking-room of the Northern Junior High school, thus filling a much needed want.

At the Bennett School, a new 500-gallon hot water boiler and heater have replaced the gas hot water heater for shower baths which has already nearly paid for itself besides giving an unlimited supply of hot water.

### Furniture:

Owing to changes in grades in several of the school buildings, we have been obliged to change several rooms of furniture during the past year as follows:

One room in Bingham School.

Two rooms in Knapp School.

One room in Baxter School.

One room in Bennett School.

New furniture has been purchased, including teachers' desks, and chairs, 75 guest chairs, two new couches, and pupil's desks and chairs for grade schools.

New tablet arm chairs have been purchased for recitation rooms of the several junior high schools.

Folding chairs have been purchased for the several school halls, thereby filling a much needed want and saving of money in transportation.

We now have Halls equipped as follows :

Eastern Junior High . . . . .	200	Folding Chairs
Southern Junior High . . . . .	200	" "
Northern Junior High . . . . .	100	" "
Western Junior High . . . . .	200	" "
Bennett School . . . . .	100	" "
Knapp School . . . . .	300	" "
Carr School . . . . .	100	" "
Burns School . . . . .	75	" "
Bingham School . . . . .	250	" "
Brown School . . . . .	100	" "
Cutler School . . . . .	100	" "
High School . . . . .	1,400	" "

These halls are meeting the community requirements of their several districts for public meetings and for social and community work, as well as adding to the general educational work of the various schools.

**Fire Department Buildings.**

There has been considerable work done and many improvements made in the several fire department buildings.

The apparatus floor of Engine Six House has been remodelled. The horse stalls have been done away with, thus making a large repair shop in the rear, enclosed with a partition with large doors, so that the apparatus may be run into the shop from the main floor.

At the Union Square Fire Station, the floor framing was reinforced to sustain the weight of the new apparatus.

Engine Six House has been thoroughly painted outside.  
Heating :

A new steam heating plant was installed in Engine Six House, doing away with the old combination heater. Additional heating surface was installed making provisions for alteration for new sleeping quarters which are anticipated with the growth of the house.

At Hose 8 House, a new steam heating plant was installed, doing away with the old combination heater which was wholly inadequate to properly heat the building. Additional heating surface was added providing for shop in the rear of the apparatus floor, also for rooms on the second floor.

The most pressing needs for this year will be the following:

New boiler in Engine Two.

Changes on 2nd floor of Engine 6, making new sleeping quarters, Chief's room and recreation room.

New floor in shop, Central Station, and apparatus floor, Engine Two.

Several other minor repairs are being considered and will be carried out as far as necessary.

I urgently recommend something being done at Engine Four House. This building is in such bad shape that it does not seem wise to spend any money on repairs, and as a fire station is needed in this locality, I urgently recommend it being torn down and a modern building erected on a new site where the land is less valuable, thus making a vacant lot for commercial purposes which will bring in much needed revenue to the city. There is much material in the present building which could be used in the new.

#### Municipal Buildings.

The municipal buildings consisting of City Hall and City Hall Annex, are in fair condition generally.

Considerable new fittings and furniture have been requested by the various departments.

During the past year only such repairs as were absolutely necessary were attended to.

I most urgently recommend the connection of the heating plants of the City Hall and City Hall Annex with the Central Heating Plant which would save considerable coal.

#### Libraries.

Very few repairs were necessary at any of the libraries the past year as the buildings are in very fair condition.

The exterior of the East Somerville Branch Library building was repainted with two coats and much of the furniture refinished.

At the West Somerville Branch Library the roof has received much needed repairs.

There is also quite a little new furniture required this year which is much needed.

#### **Water, Highway, Sanitary and Sewer Buildings.**

##### **Water Buildings:**

A new heating plant has been installed in the Water Department building, and the old boiler and pump removed, making a shop out of the old boiler room. This called for the installation of considerable new radiation, allowance for which was made when the boiler was installed.

The new boiler was set up in the basement making a gravity heating plant, doing away with the pump and receiver, thus allowing the plant to be operated on any pressure from vapor to 15 pounds, according to weather conditions.

##### **Highway Buildings:**

A new heating plant has been installed in the shed now used as a garage with an upright boiler large enough to take care of additional heating surface when required.

A new building should be erected for a garage of first class construction, properly heated, to take care of the ever increasing demands for motorized apparatus.

The Highway, Sanitary and Sewer Buildings call for many repairs. Stall bottoms must be replaced, roof and other repairs made each year.

#### **Hospital Buildings.**

General repairs were made this last year in these buildings as follows:

Quite extensive repairs were made to piazzas, steps, etc. and some painting was done on the interior.

There is still much to be done, however, in order to keep these buildings in proper sanitary condition.

#### **City Home Buildings.**

These buildings are old buildings and continually in need of repairs and replacements.

Considerable work has been done in the past year and there is still more to be done this year.

During the past year a new henhouse has been added to the farm buildings enabling the Overseer to handle a much larger line of poultry. The piggery has been altered over so that this building may also be used for poultry.

Besides these repairs considerable furniture had to be purchased.

Request has been made by the Overseers of the Poor for quite an amount of work to be done this coming year.

#### Police.

There have been many needed repairs made to this building during the past year, but there are still more needed, which we hope to accomplish this coming year.

Additional furniture has been bought and a new office fitted up for the inspector in charge of automobile listing, which is required by law.

I urgently recommend that a new heating plant be installed in the stable and garage in the rear. This is needed to properly heat these buildings as the heater in the stable is beyond repair and there is no heat in the garage.

#### Bathhouse.

The public bathhouse on the Mystic River at Wellington Bridge was opened and maintained as usual this year with a good attendance.

We were able to secure 500 tons of sand for the resanding of the beach which was greatly appreciated by the patrons.

I would recommend building a permanent breakwater to save this building from being undermined. Every year the bank is being cut into by the rough water during the winter, until a part of the fence, recently erected by the Metropolitan Park Commission, is undermined.

The present bathing beach should be dredged out so as to have water at low tide.

#### Park Buildings.

This coming year the building located in Broadway Park will need considerable attention in the way of repairs as the building leaks badly and new sills must be installed.

I heartily recommend the erection of a permanent bandstand in Broadway Park, as it is fair to assume that we will continue to have more band concerts here in the future than in the past, and there is no permanent place to have such affairs in the city.

An addition has been made to the appropriation for a new recreation building to be located in Recreation Field, West

Somerville, this building to have toilet facilities for the public and locker and shower bath rooms for the various athletic teams.

Drawings have been made by the Building Commissioner for such a building and an appropriation of about \$10,000 stands available to be used this year.

**In General.**

The Building Commissioner has had the co-operation of all branches of the City Government, including His Honor, the Mayor, the honorable members of the Board of Aldermen and all the city officials, and desires to thank them for their kindly consideration.

Respectfully submitted,

GEORGE L. DUDLEY,

*Commissioner of Public Buildings.*

## REPORT OF THE COMMISSIONER OF ELECTRIC LINES AND LIGHTS.

Somerville, Mass., January 1, 1922.

To the Honorable, the Mayor and the Board of Aldermen of the  
City of Somerville.

Gentlemen:—

I most respectfully submit my thirteenth annual report as Commissioner of Electric Lines and Lights for the year ending December 31, 1921.

### Inspection of Wiring in Buildings.

The number of installations of wiring for light, heat and power have increased materially over last year, consequently requiring a greater number of inspections.

More new buildings have been erected and more old buildings have been wired than last year.

The rules and requirements of the "National Electrical Code" under which all work is done necessitates a most careful and systematic inspection of all installations of electrical work to make sure that all of the requirements have been lived up to.

The work as a whole shows an improvement and no fires have resulted that can be laid directly to defective wiring.

I again call attention to the practice of attaching flat irons, washing machines and cooking appliances to lighting fixtures which cannot be too strongly condemned.

It not only overloads the circuit but requires the replacing of proper fuses, which are placed to properly protect the fixtures and sockets, with larger fuses to carry the additional load and are not approved.

Separate circuits should be run for such attachments.

Any changes in the original wiring or connected load should be reported immediately to the inspection department.

Number of notifications of new work . . . .	1741
Number of inspections of new work . . . .	2367
Number of re-inspections of new work . . . .	246
Number of inspections of old work . . . .	100
Number of defective installations of old work . . . .	10
Number of defective installations remedied . . . .	10
Number of re-inspections of old work . . . .	26
Total number of inspections . . . .	2739

Number of permits issued to the Edison Electric Illuminating Co., for installing meters, lamps, etc.	3316
Number of permits issued to the Malden Electric Co.	1
Number of permits issued to the Charlestown Gas & Electric Co., . . . . .	1

**Fire Alarm System.**

The Fire Alarm System is in first class condition and is giving excellent service.

The ice storm of November 28th and 29th, caused considerable damage to the Fire Alarm System but it was kept in working order throughout the entire storm.

Some replacements of equipment are necessary.

The storage batteries which supply current for the Fire Alarm System have been in constant use since 1917 and will have to be replaced this coming year.

266 bell alarms have been received and transmitted during the year.

Over the central telephone desk with connections to each Fire Station 564 calls for fire have been received and telephone alarms sent to the different stations.

3 A. D. T. alarms have been received at headquarters and transmitted over our own system to the Fire Stations.

The central office equipment consists of the following:

- 2 — 6 circuit operating boards.
- 1 — 5 circuit tapper board.
- 1 — 5 circuit gong board.
- 2 — 16 circuit storage battery charging boards.
- 1 — 32 circuit protector board.
- 1 — 12 circuit automatic repeater.
- 1 — 1 dial, 4 number manual transmitter.
- 2 — 5 circuit punching registers.
- 13 punching registers and take up reels.
- 2 automatic time and date stamps.
- 1 master clock.
- 940 cells storage battery.
- 5 — 10 foot, 4-shelf battery racks.
- 4 metropolitan tappers and 2 gongs.

The apparatus outside the central office consists of the following:

- 131 signal boxes.
- 8 tower strikers.
- 45 gongs.
- 10 punching registers.
- 20 tappers.
- 1 automatic steam whistle.
- 9 private telephones.
- About 60 miles of overhead wires.
- About 78 miles of underground wires.

2800 feet of new twisted pair wire has been run and 2000 feet of old overhead wire has been replaced by new.

No new underground wires were installed last year but provisions are made to continue the work during the present year.

#### Police Signal System.

The Police Signal System is giving the same excellent service as in former years.

Boxes have been thoroughly tested and found to be in good working order. Some replacements have been made this past year and some others will have to be made this year on account of wear.

The system consists of the following:

- 1 — 4 circuit police desk.
- 59 street signal boxes.
- 4 special boxes.
- About 19½ miles of overhead wires.
- About 13 miles of underground wires.

#### Supervision of Poles and Wires on the Streets.

The same attention has been given to the condition of poles and wires on the streets as in previous years. A number of defective poles have been replaced by companies owning same. New poles have been placed in locations granted for the purpose of supplying lighting and telephone service and abandoned poles have been removed.

	New poles	Re-placed	Re-moved	Re-set
New England Telephone & Telegraph Company . . . . .	1	12	1	2
Edison Electric Illuminating Company . . . . .	32	74	5	2
Boston Elevated Railway Company . . . . .	11	1	16	2
Permits given to the New England Tel. & Tel. Co., for attachments to the Edison Company's poles . . . . .	239			
Permits given to the Edison Electric Ill. Co., for attachments to the New England Tel. & Tel. Company's poles . . . . .	107			

#### Street Lighting.

The matter of street lighting has had the same attention as in previous years and additional lights have been placed in various parts of the City.

More lights are required in the western part of the City as some new streets are inadequately lighted.

Our contract with the Edison Company for street lighting having expired, the cost of street lighting has been materially increased, necessitating economy in the placing of new lights.

Additional spot lights have been installed at places where traffic officers are posted and are of great assistance to them.

The new "white way" system of lights is being installed in Union Square and will soon be in use.

The number of Street lights January 1, 1922, are as follows:

134 Magnetite lights.  
376 — 600 C. P. lights.  
117 — 125 C. P. lights.  
945 — 60 C. P. lights.

#### Recommendation.

I respectfully recommend that an assistant inspector be employed to enable the department to more thoroughly cover all old installations of electrical wiring in the City.

#### Conclusion.

I wish to thank His Honor, the Mayor, the members of the Board of Aldermen and the several departments for the many courtesies received.

Respectfully yours,

WALTER I. FULLER,

*Commissioner of Electric Lines and Lights.*

## REPORT OF SANITARY DEPARTMENT

January 25, 1922.

To the Honorable, the Mayor, and the Board of Aldermen of  
the City of Somerville.

Gentlemen:

I have the honor to submit to you the report of the Sanitary Department for the year 1921.

### Collection of Ashes and Paper.

	Ashes (Cubic Yards)	Paper (Cubic Yards)
January . . . . .	16,255	3,280
February . . . . .	12,032	2,960
March . . . . .	14,300	3,240
April . . . . .	10,737	3,040
May . . . . .	9,005	3,300
June . . . . .	6,240	3,775
July . . . . .	6,045	3,800
August . . . . .	7,115	4,150
September . . . . .	7,025	3,920
October . . . . .	7,890	4,000
November . . . . .	8,215	3,640
December . . . . .	8,485	3,590
Totals . . . . .	113,344	42,695

During the year the Sanitary Department paid to the Highway Department \$6,601.59 for the use of teams. Collections of garbage amounted to about 2,100 cords, all of which was disposed of at the department yard.

### Departmental Revenue.

Sale of garbage . . . . .	\$9,960 00
---------------------------	------------

The equipment and its valuation follows:

Horses . . . . .	\$9,000 00
Vehicles . . . . .	13,675 00
Harnesses, blankets, etc. . . . .	2,665 00
Stable equipment, etc. . . . .	300 00
Fittings in blacksmith shop . . . . .	75 00
	\$25,715 00

The incinerator plant was damaged by fire in January. It has been restored and the paper and combustible materials are being disposed of at the incinerator building. Ashes are collected principally by automobile trucks, deemed necessary as there are no nearby dumps. There is no public dump within the city limits and those now used by this department are located in the city of Medford and are subject to the rules and regulations of the Medford Board of Health.

Respectfully submitted,

EDGAR T. MAYHEW,

*Supt. of Sanitary Department.*

## REPORT OF THE LICENSE COMMISSION.

---

To His Honor the Mayor,

Dear Sir:—

The License Commission respectfully begs leave to submit to you and the people of our city the following report of its engagements and activities during the year 1921. The commission entered upon the second year of its activities with a wider knowledge of conditions, gained through personal inspections of the licensed locations.

The practise of transferring licenses without a fee was discontinued this year and the fee for second hand automobile licenses increased so that the revenue from licenses granted by this commission was more than doubled.

Applications from Common Victuallers, Lord's Day, Lodging House, Inn Holders, Druggist and Automobile Dealers Licenses were received and acted upon by the Commission as herein set forth.

### Common Victuallers.

87 Applications Received.  
 85 Licenses Granted.  
 2 Applications Rejected.  
     Licenses Transferred.  
 16 Licenses Revoked.

### Lord's Day.

203 Applications Received.  
 190 Licenses Granted.  
 13 Applications Rejected.  
     Licenses Transferred.  
 27 Licenses Revoked.

### Lodging House.

42 Applications Received.  
 40 Licenses Granted.  
 2 Applications Rejected.  
     Licenses Transferred.  
 2 Licenses Revoked.

### Inn Holders.

2 Applications Received.  
 2 Applications Granted.  
     Applications Rejected.  
     Licenses Transferred.  
     Licenses Revoked.

**Automobile Dealers' Licenses.**

39 Applications Received.  
 39 Licenses Granted.  
 Applications Rejected.  
 Applications Transferred.  
 Licenses Revoked.

**Third Class Liquor Licenses.**

19 Licenses Granted.

The following is a financial statement of the receipts and expenditures of the Commission for the year 1921.

**Receipts.**

Appropriation from City Government . . . . .	\$525 00
Fees from Licenses Issued . . . . .	2,198 25
	<hr/>
Gross Receipts . . . . .	\$2,723 25

**Expenditures.**

Salaries of Assistants . . . . .	\$400 00
Supplies and Postage . . . . .	124 54
	<hr/>
	\$524 54
	<hr/>
Balance . . . . .	\$2,198 71

**Net Revenue.**

Fees Received . . . . .	\$2,198 25
Appropriations used . . . . .	\$524 54
Balance of Appropriation Returned . . . . .	46
	<hr/>
Net Revenue . . . . .	\$1,673 25

Respectfully submitted,

EUGENE M. CARMAN, *Chairman*,  
 WILLIAM H. SMITH,  
 WILLIAM J. SHANAHAN.

## SOMERVILLE WATER WORKS.

---

### SOMERVILLE, MIDDLESEX CO., MASSACHUSETTS.

Settled, when part of Charlestown, 1630.  
 (Home of Colonial Governor John Winthrop).  
 Incorporated a town, 1842.  
 Established a city, 1872.

---

Location: Somerville City Hall (near centre of the city) is  $2\frac{3}{4}$  miles northerly from State House, in Boston.  
 Greatest extent of the City north and south about 4.2 miles.  
 Greatest extent of the City east and west about 2.1 miles.  
 Elevation Highland avenue at City Hall 105 feet above mean low water.  
 Lowest building elevation in the city 13 feet.  
 Highest building elevation in the city 145 feet.  
 Area of city, including land and water, about 4.22 square miles.  
 Land, 2,461.50 acres; water and marsh, 238.50 acres.  
 Population, 1920 census, 93,033.  
 Present population, estimated, 95,000.  
 Entire population on line of pipe and supplied with water.

---

Water works owned by City of Somerville.  
 Construction commenced in 1868.

Source of supply: Metropolitan system, taking water of the Nashua river at Clinton, Mass.  
 Range of pressure on street mains:  
 Low service 35 to 65 pounds.  
 High service 45 to 100 pounds.

---

**Mayor.**

HON. CHARLES W. ELDRIDGE

---

**Water Commissioner.**

FRANK E. MERRILL

---

**Office of the Water Department.**

Room 10, City Hall.

---

**Department Buildings and Yard.**

Cedar street, near Broadway.

## REPORT OF THE WATER COMMISSIONER.

OFFICE OF THE WATER COMMISSIONER,  
January, 1922.

To His Honor, the Mayor, and the Board of Aldermen:—

I present herewith my report for the year ending December 31, 1921, this being the forty-eighth annual report of the water department and my twenty-second as water commissioner:

## Revenue and Expenditures.

Water bills have been issued as follows:—

"Annual" water charges, amounting to . . . . .		\$38,716 75	
"Additional" water charges, amounting to . . . . .		1,147 10	
"Metered" water charges, amounting to . . . . .		218,857 65	
			<u>258,721 50</u>
Abatements and refunds on above charges:			
Changes from "Annual" to "Meter" basis,	\$4,382 53		
Uncollectible . . . . .	307 88		
Other reasons . . . . .	231 29		
Carried forward for collection . . . . .	70 69		
			<u>4,992 39</u>
Income from sale of water . . . . .			<u>\$253,729 11</u>
Receipts; water service assessments . . . . .	\$5,408 19		
Receipts; labor and materials sold:—			
Misc. accounts charged . . . . .	\$6,838 40		
Abatements:			
Uncollectible . . . . .	\$410 31		
Other reasons . . . . .	16 23		
Carried forward . . . . .	38 79		
		465 33	
			<u>6,373 07</u>
			<u>11,781 26</u>
Total income of water works . . . . .			<u>\$265,510 37</u>

This amount was used as follows:—

For water works purposes:—

## Under Control of the Water Commissioner.

Water Works Maintenance . . . . .	\$60,987 29	
Water Works extension . . . . .	15,958 54	
Miscellaneous accounts . . . . .	6,373 07	
		<u>\$83,318 90</u>

Not Under Control of the Water Commissioner.

Metropolitan water works assessment . . . . .	\$133,989 84	
Maintenance water works buildings . . . . .	2,442 93	
	<hr/>	\$136,432 77

For other municipal purposes:—

Not Under Control of the Water Commissioner.

Surplus . . . . .		\$45,758 70
		<hr/>
		\$265,510 37

In addition to the appropriations from water income to other municipal purposes enumerated above, water has been furnished without charge to all the city departments that have required its use and it is paid for out of the income from sale of water.

Department Receipts and Disbursements.

WATER MAINTENANCE ACCOUNT.

Appropriations made by Board of Aldermen . . . . .		\$68,875 00
Credit on refund . . . . .	\$ 75	
Credit on materials exchanged . . . . .	440 00	
	<hr/>	440 75
Department accounts; receipts . . . . .		550 63
Water works extension account; receipts . . . . .		12,294 13
Amount expended for labor and materials for operation, maintenance, and renewal of the water works . . . . .	\$60,987 29	
Amount expended for materials used in extension of the water works . . . . .	12,294 13	
Miscellaneous accounts . . . . .	6,373 07	
Labor and materials furnished municipal departments . . . . .	550 63	
Refund and exchange; Contra . . . . .	440 75	
Transfer by Board of Aldermen to other departments . . . . .	625 00	
Balance: Unexpended . . . . .	889 64	
	<hr/>	<hr/>
	\$82,160 51	\$82,160 51

WATER WORKS EXTENSION ACCOUNT.

Appropriations made by Board of Aldermen . . . . .		\$16,100 00
Amount expended for labor and materials used in extension of the water works . . . . .	\$15,958 54	
Balance: unexpended . . . . .	141 46	
	<hr/>	<hr/>
	\$16,100 00	\$16,100 00

**Cost of Water Works.**

The total cost of water works on December 31, 1920, as represented by the expenditures from appropriations for water works extension was . . . . .	\$1,079,248 19
Expended during the year 1921, on extension account . . . . .	15,958 54
	<hr/>
Total expenditures, December 31, 1921 . . . . .	\$1,095,206 73

**Water Works Income from 1898 and its Distribution.**

The water income and its distribution from 1898 to 1921, inclusive, is shown in the following table:—

Total water income . . . . .	\$5,665,709 55
Distribution:—	

**Water Works Account.**

Water Works Construction, Renewal, Maintenance, Operation and Miscellaneous Accounts . . . . .	\$1,434,373 07	
Water bonds . . . . .	274,000 00	
Interest . . . . .	86,575 00	
Metropolitan Water Assessments . . . . .	2,277,789 74	
Maintenance Water Works buildings . . . . .	8,292 26	
	<hr/>	
		\$4,081,030 07

**Other Municipal Accounts.**

Various municipal departments through specific appropriations and general revenue account . . . . .	\$1,584,679 48
	<hr/>
	\$5,665,709 55

**Water Distribution System — Construction.****STREET MAINS.**

Approximate number of feet of street mains in the city, January 1, 1921, (including hydrant branches and blow-offs) . . . . .	541,893
Feet of street mains laid in 1921 . . . . .	2,520
Feet of hydrant branches laid in 1921 . . . . .	56
Feet of blow-off branches laid in 1921 . . . . .	0
	<hr/>
Total feet of pipe laid . . . . .	2,576
Feet of pipe removed or replaced . . . . .	1,689
	<hr/>
Net increase in feet of pipe . . . . .	887
	<hr/>
Total approximate feet of pipe in the city . . . . .	542,780
Total pipe mileage, approximately . . . . .	102.80

The sizes and lengths of pipe laid and discontinued are as follows:—

Size	Feet Laid	Feet Discontinued	Size	Feet Laid	Feet Discontinued
3/4"	0	96	6"	354	1030
1"	81	33	8"	623	0
2"	285	483	10"	242	0

## Summary of Pipes and Fixtures of the Water System

December 31, 1921.

Feet of main pipe (approximately) . . . . .	542,780
Feet of service pipe (approximately) . . . . .	470,445
Service connections (approximately) . . . . .	13,631
Public fire hydrants . . . . .	1,182
Private fire hydrants . . . . .	64
Gates . . . . .	1,900
Check Valves . . . . .	8
Meters . . . . .	11,190
Motor registers . . . . .	3
Waterposts . . . . .	72
Car-sprinkler connections . . . . .	17
Blow-offs . . . . .	185
Drinking fountains and troughs . . . . .	8

## WATER ASSESSMENTS AND CONSUMPTION.

The annual assessments paid by this city as its proportionate part of the cost and operation of the Metropolitan water works are given below:—

Year	Sinking Fund	Maintenance	Interest	Maturing Bonds	Total
1898.....	No division made				\$14,250 19
1899.....	“	“	“		20,975 58
1900.....	“	“	“		28,689 24
1901.....	\$12,491 73	\$12,033 79	\$32,291 24		56,816 76
1902.....	19,014 85	12,955 64	30,427 40		62,397 89
1903.....	15,748 56	12,763 10	48,776 77		77,288 43
1904.....	16,404 42	15,393 87	54,938 64		86,736 93
1905.....	21,358 11	13,666 71	55,535 91		90,560 73
1906.....	22,345 50	17,412 51	57,402 07		97,160 08
1907.....	25,365 30	18,880 01	62,089 30		106,334 61
1908.....	24,865 73	15,221 12	68,604 23		108,691 08
1909.....	24,812 23	21,220 56	66,540 41		112,573 20
1910.....	25,018 52	18,212 28	66,825 45		110,056 25
1911.....	25,424 55	19,573 82	69,849 26	\$246 66	115,094 29
1912.....	24,469 82	16,111 70	68,205 16	445 46	109,232 14
1913.....	24,930 94	20,691 19	70,206 83	491 92	116,320 88
1914.....	14,190 98	22,488 71	73,138 81	180 63	109,999 13
1915.....	14,164 65	21,376 07	74,111 12	1,129 50	110,781 34
1916.....	13,249 71	21,643 98	74,058 98	1,515 62	110,468 29
1917.....	13,364 71	28,110 19	75,117 17	1,833 60	118,425 67
1918.....	14,193 89	29,185 04	79,975 44	2,004 18	125,358 55
1919.....	13,765 81	33,723 64	78,335 58	2,257 87	128,082 90
1920.....	12,559 45	37,814 68	74,903 80	2,227 81	127,505 74
1921.....	11,956 69	43,942 28	75,848 98	2,241 89	133,989 84
					<hr/> \$2,277,789 74

There has been credited to the city by the commonwealth as its proportion of the amounts received from entrance fees, water supplied outside the district, and water furnished to water companies the sum of \$9,056.10.

The daily consumption of water in Somerville, as recorded by the Venturi meters, operated by the Metropolitan water works, is shown below by months for the year 1921:—

Month	Gallons per day	Gallons per capita	Month	Gallons per day	Gallons per capita
January .....	7,272,500	77	July .....	6,999,800	73
February ....	6,881,800	73	August .....	6,971,300	73
March .....	6,625,400	70	September ..	7,141,200	75
April .....	6,390,700	67	October .....	6,847,600	72
May .....	6,590,000	69	November .	6,746,600	70
June .....	7,507,700	79	December ...	7,057,700	73

The consumption for the year was:—

Low-service system .....	1,968,524,000	gallons
High-service system .....	557,049,000	gallons
Total consumption .....	2,525,573,000	gallons
Average daily consumption .....	6,919,400	gallons
Average daily consumption, per capita, for Somerville .....	73	gallons
Average daily consumption, per capita, for Metropolitan district .....	95	gallons

The following table shows the daily per capita consumption of water in the cities and town in the Metropolitan Water District for the year 1921, as registered by the Metropolitan meters.

City or Town	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Year
Arlington .....	51	51	49	50	54	86	56	63	68	58	49	52	57

The district, in order of per capita consumption, beginning with the lowest, stands as follows for the year 1921:—

City of Town	Gallons		Per. Cent. Services Metered
	Total per Day	Per Capita per Day	
Milton . . . . .	402,500	42	100
Medford . . . . .	1,853,900	45	100
Malden . . . . .	2,468,700	49	97
Winthrop . . . . .	873,000	54	99
Melrose . . . . .	1,064,700	57	99
Arlington . . . . .	1,100,300	57	100
Belmont . . . . .	678,300	60	100
Revere . . . . .	1,958,600	65	80
Lexington . . . . .	441,700	68	99
Chelsea . . . . .	3,101,300	70	99
Somerville . . . . .	6,919,400	73	82
Watertown . . . . .	1,624,400	75	100
Stoneham . . . . .	610,400	76	79
Everett . . . . .	3,530,600	86	71
Quincy . . . . .	4,269,500	86	91
Swampscott . . . . .	718,800	86	100
Boston . . . . .	85,609,200	112	62
Nahant . . . . .	182,100	132	75
Total District . . . . .	117,407,400	95	75

#### Construction — Maintenance — Operation.

Building operations were quiet during the first half of the year; toward the close, however, renewed activity manifested itself and many new houses were erected, calling for service installation and, in some cases, short extensions of the street mains.

Further portions of Linwood street were paved during the year and 12" water pipe was laid in advance of the pavers in place of the old 6" pipe from Congress Place to a connection with Fitchburg street, and from a point near Dix Place northerly for about 480 feet. In London street, at the same time, 38 feet of old 4" pipe was replaced with 6" pipe and the small pipe in Lamson Court was replaced with new; also a part of the old supply to Linwood Terrace was renewed.

In Harvard Place the old 2" galvanized pipe was replaced with the same size of lead-lined pipe, and in Giles Park 110 feet of old pipe was similarly treated.

Construction work was carried on in Broadway, north side, from Pennsylvania Avenue easterly; in Cady Avenue from point near Simpson Avenue westerly to Corinthian Road; in Corinthian Road from point near Broadway, southerly; in Jaques street to connect with Bond street main; in Miller

street, a connection with Beacon street; in Sterling street, to supply new houses being erected; in Waverley street to provide a connection for main in Roland street, and in Woods Avenue in anticipation of building operations.

Twenty additional gates were installed in street mains and hydrant branches; twelve fire hydrants were set and nine were removed.

A large increase in service installation developed in the later part of the year and altogether 84 services were laid and 7 were discontinued.

#### Class of Premises Covered by Service Installation.

Apartment buildings . . . . .	1
Barrel yard . . . . .	1
Bottling business . . . . .	1

Storage warehouse; fire pipe . . . . .	1
Tenements and stores; blocks . . . . .	2
Theatre; fire pipes . . . . .	2
Theatre; fire and service combination . . . . .	1

The low state of construction and reconstruction work afforded an opportunity to catch up with our meter installation requirements and we were able to wipe out our deficiency of the previous year and show an excess installation of six meters; a total of 723 meters having been set during the year on old and new services. At this time 82% of the services in the city are metered.

Water income for the year was \$265,510.37; an increase of \$2,844.03 over the previous year. All bills owed by the department were paid at the close of the year and the appropriation accounts showed an unexpended balance of \$1,031.10.

The old high-service pump and boiler have finally been disposed of and removed from the department buildings but much remains yet to be done by the building department before we can realize any great benefit from these changes. A memorandum of our needs will be submitted for your considera-

tion in the next budget. A new steam-heating plant has been installed and so far has given ample warmth to the buildings.

A great improvement has been made in our motor equipment by the favorable purchase of two new Kissel one-ton trucks to replace old trucks which had become practically unfit for further use. With the early purchase of one more truck our teaming outfit will be good for another year.

My thanks are expressed to the retiring mayor, Hon. Charles W. Eldridge, for many courtesies shown me during his term of office, and to all officials and employees of the city who have co-operated with me in carrying on the various branches of our department work.

Respectfully submitted,

FRANK E. MERRILL,

*Water Commissioner.*

## SUMMARY OF STATISTICS.

FOR THE YEAR ENDING DECEMBER 31, 1921.

In form recommended by the New England Water Works Association.

SOMERVILLE WATER WORKS  
SOMERVILLE, MIDDLESEX COUNTY, MASS.

## General Statistics.

Population, census 1920, 93,033; present, estimated 95,000.

Date of construction: Commenced in 1868.

By whom owned: City of Somerville.

Source of supply: Metropolitan water system.

Mode of supply: Water is delivered into the city's mains, under both high and low pressure, by the Metropolitan Water Works.

## Statistics of Consumption of Water.

Census population, 1920, 93,033.

Population on lines of pipe, Dec. 31, 1921, 95,000.

Population supplied, Dec. 31, 1921, 95,000.

Total consumption for the year, 2,525,573,000 gallons.

Average daily consumption, 6,919,400 gallons.

Gallons per day to each inhabitant, 73.

## Statistics Relating to Distribution System, 1921.

## MAINS

Kind of pipe, cast iron.

Sizes, from 4-inch and under to 20-inch.

Laid 2,576 feet; discontinued 1,689 feet; net extension, 887 feet.

Total now in use, 102.80 miles.

Number of hydrants added during year (public, 3; private, 0), 3.

Number of hydrants (public and private) now in use, 1,246.

Number of stop gates added during year, 20.

Number of stop gates now in use, 1,900.

Number of blow-offs, 185.

Range of pressure on mains, 35 pounds to 100 pounds.

## SERVICES

Kind of pipe: Lead; lead-lined wrought iron; cement-lined wrought iron; cast iron.

Sizes, one-half to eight inches.

Extended 3,107 feet; discontinued 208 feet.

Total now in use 89.1 miles

Number of service taps added, 84; discontinued, 7; increase, 77.

Number now in use, 13,631.

Number of meters added, 793; meters and motor registers discontinued, 75; net increase, 718.

Number now in use, 11,190.

Percentage of services metered, 82.11.

Percentage of water receipts from metered services, 86.

Number of motors and elevator registers added, 0; removed, 0.

Number now in use, 3 (included in number of meters).

## REPORT OF THE LAW DEPARTMENT.

---

To the Honorable, the Mayor and the Board of Aldermen of the City of Somerville:

The annual report of the law department for the year ending December 31, 1921, is as follows:

A hearing was held before the district court of Somerville under chapter 31 of the General Laws on an appeal by a member of the fire department from his removal by the mayor and the board of aldermen. The hearing lasted several days. The removal was sustained by the court.

Two actions for personal injuries claimed to have been caused by an automobile in the water department were tried before a jury in the Middlesex superior court and verdicts were given for \$214 and \$9,000. A motion to set aside the larger verdict was filed in behalf of the city and is now pending.

Two actions for personal injuries claimed to be due to a defect in a public way were tried before a jury in the Middlesex superior court and were disposed of without expense to the city.

In an action brought by a member of the fire department to test the validity of a regulation under the two-platoon law there was a hearing in the superior court and later the questions of law involved were argued before the full bench of the supreme court. No decision has as yet been made.

With the inspector of milk I acted for the prosecution in the district court of Somerville of persons charged with violation of the milk laws.

Various claims for injuries due to defects in public ways were settled for sums ranging from \$25. to \$1500., the larger settlements having been authorized by orders passed by the board of aldermen.

I took part in hearings before committees of the legislature on petitions relative to the widening of Bridge street in Cambridge. No legislation was passed on the subject. It seems to me that the matter could best be adjusted by some agreement between the city governments of the two cities and that the city of Somerville should not be called upon to make any direct contribution to the cost of such widening.

A hearing was held before the commissioners of public utilities on a petition of the mayor in regard to the rate of charges by the Cambridge Gas Light Company for gas furnished through twenty-five cent meters.

At the request of the mayor I made an examination of the laws relating to the Boston Elevated Railway Company and the West End Street Railway Company in order to determine the power of the city government to prevent the street railway company from causing its cars to remain standing at various places in the public streets as at a terminal. As a result an ordinance was drawn and was passed by the mayor and the board of aldermen. The street railway company, while denying the validity of the ordinance, filed a petition with the legislature for the purpose of taking away the power, if any, of the city government to pass such an ordinance. The petition was opposed at a hearing before a legislative committee and was dismissed by the legislature. A partial adjustment of the matter was made by the city government and the representatives of the street railway company.

A claim in favor of the city against the estate of a person who had been aided by the poor department was collected through the Orphans court, Cumberland, Md., the sum received being \$400.

Very respectfully,

FRANK W. KAAAN,

*City Solicitor.*

## REPORT OF CHIEF ENGINEER OF FIRE DEPARTMENT.

Somerville, Mass., January 30, 1922.

To the Honorable, the Mayor, and the Board of Aldermen,

Gentlemen, — Herewith I have the honor of submitting, for your information, the annual report of the fire department for the year ending December 31, 1921:

### Alarms of Fire.

Number of bell alarms . . . . .	266
Number of still alarms . . . . .	583
	<hr/>
Total alarms . . . . .	849
Number in excess of 1920 . . . . .	161
Value of buildings at risk . . . . .	\$878,955 00
Insurance on buildings . . . . .	779,250 00
Damage to buildings . . . . .	154,808 26
Value of contents . . . . .	442,405 00
Insurance on contents . . . . .	402,360 00
Damage to contents . . . . .	48,023 71
Total value at risk . . . . .	1,321,360 00
Total insurance . . . . .	1,181,610 00
Total damage . . . . .	202,831 97
Approximate per capita loss . . . . .	2 18

### List of Probable Causes.

Automobiles . . . . .	5
Bonfires . . . . .	30
Car journal . . . . .	2
Carelessness with matches . . . . .	23
Careless Plumber . . . . .	1
Careless smoker . . . . .	7
Children playing with matches . . . . .	9
Cigars, cigarettes and pipes . . . . .	5
Defective chimney . . . . .	5
Dump fires . . . . .	2
Electric wires . . . . .	9
False alarms . . . . .	36
Filling gasoline tanks . . . . .	4
Firecrackers . . . . .	2
Fire in Boston . . . . .	3
Fire in Cambridge . . . . .	1
Fire in Medford . . . . .	6
Fumigating . . . . .	1
Gasoline leak, automobile . . . . .	3
Gas stove . . . . .	2
Grass fires . . . . .	14
Hot ashes in wooden receptacles . . . . .	5

Incendiary . . . . .	14
Kettle of fat . . . . .	1
Kerosene lamps and stoves . . . . .	2
Lantern exploded . . . . .	1
Leaking gas . . . . .	1
Lightning . . . . .	1
Lime, slacking . . . . .	1
Liquor stills . . . . .	3
Oil heater . . . . .	3
Overheated furnace . . . . .	7
Overheated range . . . . .	4
Salamander . . . . .	1
Smoking in bed . . . . .	2
Smoke mistaken for fire . . . . .	5
Spark from chimney . . . . .	9
Spark from incinerator . . . . .	1
Spark from tarvia truck . . . . .	1
Spontaneous combustion . . . . .	7
Steam pipe, clothing . . . . .	1
Tar barrel . . . . .	1
Thawing water pipes . . . . .	3
Unknown . . . . .	6
Unnecessary . . . . .	14
Vulcanizing . . . . .	2

	Engine 1.	Engine 2.	Engine 4.	Engine 6.	Hose 3.	Hose 5.	Hose 7.	Hose 8.	Ladder 1.	Ladder 2.	Ladder 3.	Totals.
Bell alarms . . . . .	194	138	121	38	136	91	95	75	113	83	57	266
Still alarms . . . . .	58	58	23	116	62	59	59	79	18	8	43	583
Miles traveled . . . . .	477	261	260	150	235	239	219	242	110	158	118	2,469

CHARLES H. TIMSON

Lieutenant

Appointed April 1, 1882

Died March 5, 1921

---

RAYMOND W. GAMMON

Permanent

Appointment February 2, 1920

Died September 3, 1921

---

### Manual Force.

On February 1st the call force was discontinued, two being advanced to the permanent force, one resigned and two being placed on the pension roll; of the permanent force, one was retired on a pension, two died; three men were added from the eligible list of the Civil Service and one was reinstated. The membership of the department now consists of one hundred and thirteen (113) permanent men classified as follows,—

- 1 Chief Engineer.
- 1 Deputy Chief.
- 2 District Chiefs.
- 6 Captains.
- 1 Master Mechanic.
- 11 Lieutenants.
- 3 Enginemen.
- 88 Permanent men.

### Apparatus.

- 1 Second size, horse drawn, steam fire engine.
- 1 Horse drawn, combination chemical and hose wagon.
- 1 Tractor drawn, second size steam fire engine.
- 1 Motor driven, 900 gallon pumping engine and hose wagon.
- 1 Motor driven, 750 gallon pumping engine and chemical,
- 4 Motor driven, combination chemical and hose wagons,
- 1 Motor driven, combination ladder truck and chemical,
- 2 Motor driven, ladder trucks,
- 1 Motor driven, supply and wrecking car.
- 1 Automobile, Chief's car,
- 1 Automobile, deputy chief's car,
- 1 Automobile, district chief's car,
- 1 Automobile, master mechanic's car,
- 2 Horse drawn, ladder trucks, in reserve,
- 2 Horse drawn, supply wagons, in reserve,
- 1 Horse drawn, combination chemical and hose wagon, in reserve.

### Horses.

There are but six horses left in the department, thirteen have been disposed of during the year owing to the motorization of the apparatus, five were transferred to the highway department and two to the sanitary division. The six horses attached to Station No. Six, having become too old for heavy service, were given to persons that would give them good homes and light farm work.

### Hose.

The amount of serviceable hose is but 8,300 feet of two and one-half inch and 1,950 feet of three-quarter inch chemical. There has been but 1,000 feet of new two and one-half inch hose purchased whereas there has been 1,550 feet condemned.

There should be at least 12,000 feet of hose to be on the safe side, and as much as possible should be purchased, this year, to arrive at that amount.

#### Brief Resume.

For the first time, as far as the department records show, since Somerville became a city, a month, September, records no loss by fire. The burning of the Y. M. C. A. building practically doubled the fire loss for the year, the magnitude of this fire was due to the necessity of using the entire fire-fighting force to aid in rescuing the inmates on the two upper floors of the building, even then a fatality occurred in the death of Thomas A. Cargill, losing his life by being cut off in the corridor, on the upper floor, in his apparent effort to escape by the stairway.

The following table gives the loss by months,—

January	.	.	.	.	.	.	\$23,727	97	
February	.	.	.	.	.	.	2,603	40	
March	.	.	.	.	.	.	12,067	16	
April	.	.	.	.	.	.	6,567	01	
May	.	.	.	.	.	.	3,677	68	
June	.	.	.	.	.	.	8,740	00	
July	.	.	.	.	.	.	20,026	00	
August	.	.	.	.	.	.	168	60	
September	.	.	.	.	.	.	.....		
October	.	.	.	.	.	.	9,368	81	
November	.	.	.	.	.	.	100,000	40	
December	.	.	.	.	.	.	15,884	94	
								\$202,831	97

There have been twenty-eight fires with an insurance loss in excess of \$1,000. as follows, —

January 5, 1:06 A. M. Box 226, 6 Beacon Street, Public garage, owned by Eugene P. Gormeley, occupied by William McRea; damage to building \$100, to contents \$1,035.17. Probable cause, careless smoker.

January 6, 10:34 P. M. Box 237, 23 Elm Place, dwelling owned by the Aaron Hook estate, occupants Arthur Mercer and Charles Towle; damage to building \$1,714, to contents \$250. Cause, careless smoker.

January 12, 9:19 P. M. Box 447, 66 Chandler Street, garage owned and occupied by George V. Mead, damage to building \$800, to contents, automobiles, \$61,461.42. Cause, spontaneous combustion, painters' rags.

January 16, 12:34 A. M. Box 24, a second alarm was sounded for this fire, 62 Webster Avenue, coal pocket owned

and occupied by J. P. O'Neil; damage to building and contents, \$12,438.29. Cause unknown.

January 24, 9:07 P. M. Box 37, 536 - 538 Medford Street, stores and dwelling owned by J. M. Isenberg, occupants Joseph Dender and Samuel Davidson; damage to building, \$1,395.00, to contents \$2,055. Incendiary.

March 3, 10:48 P. M. Box 431, 302 - 310 Highland Avenue, block of stores owned by Paul Vartigian, occupants Palmo Cigarette Co., et. al.; damage to building \$1,221, to contents \$2,871. Cause unknown.

March 10, 11:29 A. M. Box 217, 12 - 14 Landers Street, Three decker owned by Mrs. N. E. Baker, occupants Theo. Warfield et. al.; damage to building \$1,673, to contents \$267.96. Children playing with matches.

March 11, 9:58 P. M. Box 342, 20 Radcliffe Road, dwelling owned by Mrs. Frank Rapoza, occupied by T. F. Millea; damage to building \$1,500, to contents \$1,000. Overheated oil heater.

March 23, 11:44 A. M. Box 46, 22 Kent Street, factory building owned and occupied by the Eastern Utilization Company, damage to building and contents \$1,947.40. Electric light.

April 2, 12:50 A. M. Box 41, 40 - 40A Cherry Street, 3 decker owned by Charles F. Shourds, occupants Frank Searle et als., damage to building \$1,252.41, to contents \$183.60. Cause, careless smoker.

April 2, 4:36 A. M. Box 435, 76 - 76A Prichard Avenue, dwelling owned by Harold W. Adams, occupants George Hollis and George Anderson, damage to building \$1,208, to contents \$200. Spontaneous combustion.

April 22, 1:13 P. M. Box 337, City Stables, owned by City of Somerville, damage to buildings and wagons \$3,500. Cause, boys setting fires.

May 3, 8:36 P. M. Box 443, Clarendon Building, Davis square, owned by the Parke Snow Corp., occupants Charles H. Rosenthal et als., damage to building \$769, to contents \$2,618.68. Cause, Rubbish in cellar.

June 25, 10:11 A. M. Box 337, Incinerator on Cedar Street, owned by the City of Somerville, occupant, Dominic Di-Stephano, damage to building \$5,000, to contents \$1,025. Cause, spark from incinerator.

June 25, 4:05 P. M. Box 23, Lumber yard on Harding Street, owned and occupied by C. W. H. Moulton Co., damage \$1,864. Cause, Incendiary.

July 10, 6:13 A. M. Box 24, a second alarm was sounded for this fire, storage shed in rear 58 Webster Avenue owned

and occupied by Waldo Bros. and Bond Company, damage \$15,000. Caused by slacking lime.

July 10, 4:20 P. M. Box 48, dwelling and stores owned by E. L. Russell, occupied by Jason Russell et als., damage to building \$870, to contents \$1,755. Cause, carelessness with matches.

July 25, 10:38 A. M. Box 225, Storage building in rear 3 Warren Avenue, owned by W. S. Howe, occupied by the Dainty Maid Company, damage to building \$107, to contents \$1,059. Cause, Spark on roof.

October 1, 5:55 P. M. Box 35, 187 Central Street, dwelling owned and occupied by Herbert F. Baker, damage to building \$2,506.20, to contents \$1,500. Cause, Electric wires.

October 22, 11:16 A. M. Box 214, 9 Westwood Road, dwelling owned and occupied by Charles A. Landers, damage to building \$1,250, to contents \$1,098. Cause, Match dropped on old shingles in cellar.

October 31, 10:17 P. M. Box 233, 27 - 29 Allen Street, dwelling and sheds owned by Mrs. Jane O'Callahan and Michael Devine, damage to buildings \$1,090, to contents \$739. Cause, Incendiary.

November 9, 3:41 A. M. Box 215, a general alarm was sounded for this fire, 101 Highland Avenue, Y. M. C. A. Building, Thomas A. Cargill lost his life at this fire, nineteen persons were rescued; damage to building \$88,317. damage to contents \$8,000. Defective wiring.

November 12, 8:49 P. M. Box 156, Garage owned by John Milne located on Middlesex Avenue, occupied by the Johnson Baking Co., damage to building \$134, to contents, automobiles, \$1,050. Cause, careless smoker.

December 6, 8:12 P. M. Box 48, 239 Holland Street, store owned by V. H. Worcester, occupied as shoe store by H. Rubin, damage to building \$245, to contents \$800. Cause, carelessness with matches.

December 7, 1:17 A. M. Box 435, 693 - 701 Broadway, apartments and stores owned by Hillson Associates, occupants Gus Gardelle et als., damage to building \$2,812, to contents \$2,630.99. Cause, careless smoker.

December 10, 5:15 P. M. Box 74, 22 Billingham Street, dwelling owned and occupied by Mrs. William E. Gilman, damage to building \$1,572, to contents \$80.60. Cause, rats and matches.

December 22, 1:21 P. M. Box 219, 7 - 9 Holts Avenue, dwelling owned and occupied by Michael Courteney and Mrs. A. Carroll, damage to building \$535.25, to contents \$1,000. Cause, carelessness with matches.

• December 23, 8:34 A. M. Box 432, 367 Highland Avenue, office building owned and occupied by the Highland Coal Company, damage to building \$1,492.80, to contents \$1,150. Cause, hot ashes against wooden partition.

*False Alarms and Bonfires* in the street totalled the incredible number of sixty-six, 25% of the total bell alarms for the year. Both of these classes of alarms are unlawful and are punishable by both fine and imprisonment. Every year I have commented upon these criminal offenses and have urged that efforts be put forth to apprehend the responsible ones. Furthermore, the wear and tear upon the apparatus and the endangering, unnecessarily, the lives of the members of the department should not be required. The record of the Chicago Fire Department, of this year, shows the killing of ten firemen in responding to false alarms, our city is not immune from this possibility of manslaughter and every effort should be put forth to minimize this danger.

*Carelessness With Matches and Children Playing With Matches* have caused thirty-two alarms; Everything has been written and said, relative to this class of fires, to educate and warn the public of the need of exercising care and caution in the use of matches and more particularly safeguarding the children from this menace, still the Juggernaut rolls on crushing out the lives of helpless children. A match bill is to be presented to the legislature in 1922 urging the prohibition of the use of any but the scratch on the box match, I urge every public-spirited citizen to call upon his representative in the General Court to vote for this measure.

One of the *Major Causes of Fires* is the thawing of frozen water pipes, this cutting off of the water supply by Nature's shut-off is not uncommon in our community and therefore fires caused by improper means of remedying this inconvenience are all too frequent, either through ignorance or daring. an open flame, either by burning of paper or criminal use of a torch by the plumber, is frequently used, whereas hot water or cloths saturated with hot water are the most effective means and perfectly safe, water pipes are usually concealed, passing up through the flooring, under closet and sinks where dust and webs collect, a most excellent kindling when an open flame is applied.

#### Recommendations.

As mentioned in previous reports, I recommend the replacement of the present Engine No. 4 Station at the corner of Highland Avenue and Grove Street with a new and up-to-date

three door station for the housing of motor apparatus, every other station, in the city, is now fully motorized and this character of equipment is unquestionably most efficient and economical of operation, the continuation of horse-drawn apparatus at this important location should be given serious consideration inasmuch as the apparatus, at this station, covers one of the important commercial centers of the city and promptness in response, and efficiency may, at any time, be of vital importance.

The replacement of Hose No. 7 with an up-to-date double tank combination hose wagon should be given early consideration, this machine, located in the very center of the city, is called upon to do an unusual amount of service and should be one of the best, whereas it is but a single tank wagon with a body having a capacity for but six hundred feet of hose, this equipment, originally installed upon a touring car chassis, has been in continuous service since 1910, being the first piece of motor apparatus purchased, at an expense of but \$4,500. it can no longer fulfill its required service and need, this machine, if replaced, could be tuned up and used for relief work in an emergency.

A new car, for the use of the chief, should be provided, the present one has been in continuous service for eleven years and has now arrived at the condition where it is impracticable for use and safety.

#### In Conclusion.

In concluding my report I wish to state that I fully recognize the support and confidence accorded me, the past year, by His Honor the Mayor and the Board of Aldermen; I wish also to take this opportunity to thank the officers and members of the department for their faithfulness and efficiency.

Respectfully submitted,

SEWALL M. RICH,

*Chief Engineer.*

## REPORT OF THE POLICE DEPARTMENT.

January 31, 1922.

To the Honorable, the Mayor, and Board of Aldermen of the  
City of Somerville:—

Gentlemen;—I respectfully submit the annual report  
of the Somerville police department for the year ending Decem-  
ber 31, 1921.

## REPORT OF POLICE MATRON.

December 31, 1921.

To Charles A. Kendall, Chief of Police.

Dear Sir:—

I herewith submit my report as matron for the year ending December 31, 1921. The following females and minors were committed to my care, charged with the following offenses, etc.

Abortion . . . . .	1
Assault . . . . .	1
Assault and battery . . . . .	20
Bail surrender . . . . .	1
Being present where gaming implements were found . . . . .	2
Common drunkard . . . . .	1
Default warrant . . . . .	1
Disorderly house . . . . .	1
Drunkenness . . . . .	10
False statement, marriage certificate . . . . .	1
Illegal sale of intoxicating liquor . . . . .	2
Illegal keeping of intoxicating liquor . . . . .	1
Larceny . . . . .	10
Lewd and lascivious cohabitation . . . . .	1
Lost children . . . . .	105
Manslaughter . . . . .	1
Neglected child . . . . .	1
Revoke of parole . . . . .	1
Safe keeping . . . . .	6
Stubbornness . . . . .	6
Threats . . . . .	2
Trespass . . . . .	2
Uttering forged instrument . . . . .	1
Violation of probation . . . . .	4
Total . . . . .	<hr/> 182

I have reported at station each day and have attended the sessions of the juvenile court, looking after minors who have been in court.

Respectfully submitted,

MRS. MINA T. WEEKS, *Matron.*

The vehicles in the department have all been motorized, early in the year the horse which was in use was sold to the Highway Department, a new motor-cycle was purchased which was much needed. The police building needs to be thoroughly repaired and enlarged garage space with suitable heating apparatus installed. A new patrol car to replace one of the older ones.

Increased number of patrolmen and the establishment of a traffic and liquor squads, one lieutenant appointed to fill a vacancy.

To all city officials who have business with this department and to the officers under my command I wish to tender my thanks for all assistance rendered.

Respectfully submitted,

CHARLES A. KENDALL,

*Chief of Police.*

## REPORT OF THE CITY CLERK.

---

## Licenses and Permits.

Besides the licenses mentioned in the foregoing list of receipts, licenses and permits have been granted by the Board of Aldermen, without charge, as follows:—

Children under fifteen to take part in entertainments	10
Newsboys	18
To hold religious services in streets and squares	4
To parade in streets, with music, etc.	4
To sing from auto truck	1
Approval of construction of stable, etc.	1
To move buildings through streets	7

## Births.

1921.

Number of births reported by physicians and midwives for 1921.

Males	835
Females	907

A canvass of the city is at present being made under the direction of the city clerk as required by section 5, chapter 46, of the General Laws, to ascertain the facts required for record relative to children born during the year.

As the information derived from such canvass will not be available in time sufficient for its incorporation in this report, a statement in full of the births of 1921 will be given in the city clerk's report for the year 1922.

1920.

## ORDINANCES.

Somerville, January 1, 1922.

The following ordinances have been adopted since the printing of the annual reports for the year 1920:—

## ORDINANCE NO. 93.

## An Ordinance Relative to Settlement of Claims.

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. The mayor may with the approval of the head of a department and the city solicitor make settlements of claims in favor of the city and sign, seal and deliver in the name and behalf of the city releases for not more than two hundred dollars on any one claim.

Section 2. This ordinance shall take effect upon its passage.

*Approved January 14, 1921.*

## ORDINANCE NO. 94.

## An Ordinance to Amend Chapter XXVII of the Revised Ordinances of 1911.

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. Section 3 of Chapter XXVII of the Revised Ordinances of 1911 is hereby amended by adding at the end of said section the following:

Lodging House, \$2.00.

Section 2. This ordinance shall take effect upon its passage.

*Approved April 15, 1921.*

## ORDINANCE NO. 95.

## An Ordinance Establishing the Somerville Public Welfare and Recreation Commission.

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. The Playground Commission which this city is authorized to create under the provisions of Chapter 45 of the General Laws of Massachusetts shall be composed of ten citizens of this city. Women as well as men shall be eligible to be members of the commission. The title of the commission shall be "Somerville Public Welfare and Recreation Commission." The members of the commission shall serve without pay.

Section 2. The members of the commission shall be appointed by the mayor subject to the approval of the Board of Aldermen as soon as this ordinance takes effect, five to serve until the appointment and qualification of their successors in the year 1922, and five to serve until the appointment and qualification of their successors in the year 1923, and thereafter they shall be appointed yearly, five in each year to serve for two years and until the appointment and qualification of their successors. Any vacancy shall be filled by appointment for the balance of the unexpired term.

Section 3. Ordinance No. 82 entitled an Ordinance Establishing Recreation and Playground Commission is hereby repealed.

Section 4. This ordinance shall take effect upon its passage.

*Approved October 31, 1921*

### ORDINANCE NO. 96.

#### An Ordinance Relative to One Way Streets.

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. No person shall cause or allow a vehicle other than a vehicle propelled by hand to pass along any portion of Webster avenue between Union square and Newton street except in a southerly direction; or along any portion of Walnut street except in a southwesterly direction; or along any portion of Franklin street between Washington street and Broadway except in a northeasterly direction; or along any portion of Broadway in that section between Fellsway East and Grant street northeasterly of the reservation in the centre of Broadway except in a northwesterly direction; or along any portion of Broadway between Fellsway East and Grant street in that section of Broadway southwesterly of the reservation in the centre of Broadway except in a southeasterly direction.

Section 2. This ordinance shall not apply to street railway cars.

Section 3. This ordinance shall not be construed to prohibit any vehicle from crossing the streets above mentioned.

Section 4. Whoever violates any provisions of this ordinance shall be liable to a penalty of not exceeding twenty dollars for each offense.

Section 5. This ordinance shall take effect January 1, 1922.

*Approved November 30, 1921.*
