Flowers That Grow For Everybody

Oronogo Flower Gardens

CARTERVILLE, MO.

BENJAMIN C. AUTEN

Terms: Cash with order. No charge for packing. Goods offered subject to previous sale. All prices include delivery by mail or express.

Of tulip and narcissus bulbs, if total of order amounts to 100 bulbs or more, 25 of a variety will be furnished for one-fourth the price of a hundred.

Items quoted only in small quantities can be furnished only in small quantities, and at the printed prices.

Bulbs shipped on receipt of order, plants in regular routine of digging and shipping. Bulbs and plants not shipped together.

No guarantee goes with my bulbs or plants, but I take extreme pains to have them true to name, and it is on them I depend for future orders. Write me, however, if you fail to have success with them. It is important for me to know.

If a mistake is made in the filling of your order or the package reaches you in bad condition, write me. I do not know of it unless you do.

If you do not hear from your orders in a reasonable length of time, write. Orders may get lost on the way, may possibly be overlooked after receipt, or the shipment may go astray.

Order early and plant early, while the bulbs are still fresh and solid.

Next year's price-list will as a matter of course be sent to all this year's customers, but I do not keep a permanent mailing list.

MY OWN GROWING ONLY

As my customers mostly are familiar with the management of these flowers, I am omitting this year the usual detailed information and planting directions. I have a number of catalogues left from last year, however, which give full information, and shall gladly send a copy to anyone wishing it. A postal-card request will bring it.

Tulip and narcissus bulbs should be planted about three inches deep to the tops of the bulbs as soon as possible after summer heat and drouth are broken, must remain in the ground over winter, and should not be disturbed until the leaves have turned yellow in early summer. This is the correct time to dig them. Narcissi prefer to be left in the ground several years. Tulips are better dug every year, though they can be let go an extra year if small when planted.

Bulbs should not be allowed to lie in the sun when dug, nor when planting, nor at any other time. They should be stored cool, dark, and well ventilated.

NARCISSUS BULBS

It is advisable to get samples, at least, of all the kinds possible this fall, as the supply is going to be very short after this year, both as to quantity and as to variety. You can get quantity by growing it, but variety can be had only by buying it when it can be bought.

My descriptions may seem short, but there is a large amount of description in the key following the name. The Ajax type is the one with the long trumpet; the Incomparabilis has the half-length trumpet, or cup, the Barrii the quarter-length cup. The Poeticus type has a white flower with a little flat red-edged saucer in the center. The Poetaz, Tazetta, and Jonquil types are bunch flowered and the blooms have small cups. The Leedsii type has medium or small cups and is primrose-white in color. Y, W, and Bic stand respectively for yellow, white and bi-color (white with yellow trumpet or cup). 1, 2, -6 tells the season of bloom. F means that a variety is good for forcing, FF that it is very good.

My supply of many of these varieties is very small: therefore do not order more of any kind than the largest number offered of that kind.

SPRING, 1926

Peonies, tulips and narcissi I do not furnish in the spring, and I have so little of stock for spring planting that I do not expect to issue a list. Snowdrops, Stars of Bethlehem, the hardy violet, and all irises can be ordered from this catalogue, and the following items which can not be handled in the fall:

Eulalia Gracillima. One of the most elegant of the hardy ornamental grasses. 15c. 12 for \$1.20. Larger plants 25c, 50c, \$1.00, according to size.

Eulalia Zebrina. An ornamental grass coarser and heavier than E. Gracillima. The leaves are marked every few inches with broad cross-bars of yellow. Grows to six or eight feet high. 25c.

Hardy Bamboo. A strong, hard-wooded, grassy-looking plant, one of the most elegant ornamentals of shrub size. The leaves remain green until well into winter, and the stems do not die down. Strong field-grown plants. \$1.00.

Japanese Walnut. They transplant easily, grow rapidly, come to bearing very young, yield heavily, and are highly ornamental. The nuts are easily cracked and extracted, and have a flavor similar to that of the butternut. One-year trees, 50c. 3 for \$1.00.

Tuberose, Mexican Everblooming. Single, sure bloomers, of purest white and most exquisite fragrance. 10c. 4 for 25c, 10 for 50c, 24 for \$1.00.

N. B. All prices in this catalogue include delivery by mail or express.
