SUBJECT: Damage to Allocated Equipment

TO: General Headquarters
Supreme Commander for the Allied Powers
APO 500
ATTN: Civil Property Custodian

1. Attention invited to the inclosed communication from the Osaka Finance Office reporting loss of the shaft and pumping unit of a deep well pump, inventory number 32-32-3223, and damage to a switchboard, inventory number 32-32-5293, incurred in the course of dismantling and crating operations. Both items were allocated to the Phillipines by Allocation Notice 3-60 (pp 12 and 13, resp).

2. The shaft and pumping unit dropped to the bottom of the well in which the pump was installed while the contractor was attempting to remove it. The top of the shaft is 210 ft. below ground level. Repeated attempts to retrieve the shaft have been unsuccessful. The shaft can be retrieved, but the cost will be prohibitive and will be several times the value of the pump. The pump driving motor is intact and available. This headquarters has instructed the Osaka Finance Office to abandon efforts to retrieve the shaft pending further instructions.

3. The switchboard was damaged when the box in which it was crated dropped from a crane in the course of transposition. The marble switchboard plate was cracked in several places. It is beyond economical repair and is considered as scrap.

4. It is concluded from investigation that:

a. Dropping of the deep well pump shaft could have been avoided if the contractor had exercised better judgement in calculating risks involved in removing the shaft from the well, but is not attributed to actual negligence by the contractor.

b. The crate containing the switchboard was dropped due to a defective crane cable. The accident was beyond the control of the individuals moving the crate.
