In report No. 29 of VDF-12 the situation at Kibai was described at some length and comment made, that no further report on routine TUAPs at Kibai would be made unless the situation changed. Since 22 April, the date of that report, daily and usual TUAPs have been scheduled and lauxched. We carrying the same armament - 1 - 500 # GP and rockets to be dumped anywhere in wooded areas where hidden revoluents were supposed to be.

On this day not only was WF armament changed to Mapalin bombs, but strikes of WB and WF from this and other ships hit Eikai, and Air Group TWELVE photo planes obtained excellent vertical and oblique photographs. The photographs reveal the landing area temporarily cratered, but more important to WF TCAPs, they reveal at least 26 camouflaged revetments and many A/A positions, the exact location of which was not previously known. There are also to be seen 4 operational planes. The results of mapalin and depth charge bombs are a little disappointing in the wooded areas, but appear to be more effective than previous arming. The reasons for the change in tactics are an interesting subject of surmise.

It is to be noted that due to Lt. A. L. BUREAU'S excellent wrk in the matter of fusing napalm bombs, they all now go off.
