Proprietors of the EconoMIST. The Paris Agent for the Sale of the EconoMIST is Mr Fotheringham, 8 Rue Neuve des Capucines, where copies of the Paper can always be obtained.

- New York, Subscriptions and Advertisements for the ECONOMIST are received at the Office of the BANKER'S MAGAZINE, 251 Broadway.
- A SUPPLEMENT, containing the Reports of the Joint-Stock Banks of the United Kingdom, similar to that published on the 22nd of October, will be published by the Economist on the 20th of May.

This Supplement will likewise contain a Tabular Statement, showing at one view the Capital, Reserve Funds, Assets and Liabilities generally, of the Banks concerned, as far as this information is supplied.

To ADVERTISERS.—To insure insertion for this important number, Advertisements should be sent not later than mid-day on Friday, May 19th.

LORD FREDERICK CAVENDISH.

SINCE our last publication a crime of almost unprecedented atrocity has moved the heart of the country to the core. On the evening of last Saturday the recently-appointed Chief Secretary for Ireland, Lord Frederick Cavendish, was, together with Mr Thomas Burke, the Under-Secretary for that country by for that country, brutally murdered at Dublin, within the

THE MONEY MARKET AND THE AMERICAN BULLION MOVEMENTS.

INFLUENCED mainly by the continued shipments of gold from America, the money market has become slightly easier, the rate for three months' bills, which we last week quoted at $2\frac{3}{4}$ per cent., being now $2\frac{5}{8}$ per cent. To the home demands for money, and their probable influence upon its value, we refer elsewhere. Their tendency, it will be seen, is chiefly in the direction of an enhancement of rates. But what is now governing, and seems likely for some time yet to govern, the market is rather the movements of bullion than the internal requirements of the country. If gold continues to be shipped hither in such quantities as at present, we may look forward to a period of easy rates, whereas if these bullion supplies are arrested, the influences operating in the direction of dearer money are more likely to prevail.

It is thus important to endeavour to ascertain what are the causes of the flow of gold from America, and what chance there is of these continuing to operate. The main originating cause of it, no doubt, is the altered condition of American trade. Instead of the large balance of exports over imports which the United States of late years have shown, there is now an excess of imports over exports. Last month the value of the imports into New York exceeded that of the exports thence by about 2,800,000*l*, and it is estimated that when the returns from all ports are received, they will show an aggregate excess of imports, amounting to between $1\frac{1}{2}$ and 2 millions. Instead, therefore, of having, as formerly, a balance of trade debt due to them with which to active a them there are interest on dott to satisfy other claims against them for interest on debt, &c., the United States have now on balance a large amount to pay to other nations. These nations, too, are now by no means so ready as formerly to take payment of

this debt in the form of securities, and thus not only have the United States much more to pay abroad, but they are also under a greater necessity than before to make the payment in specie.

Although, however, the state of the trade accounts between nations must ultimately determine the movements of the precious metals, it does not necessarily do so immediately. And if America could not spare gold with which to discharge her trade debts, there are many ways in which the payment might be deferred. As it happens, however, she is now in an unusually good position to spare the metal. The Treasury is constantly paying out specie for the redemption of called bonds, and the internal exchanges are causing money to flow into New York and the other reserve cities. Hence the banks are in a strong position, and the money market is easy; and as speculation has recently sustained a sharp check, there is the promise of a continuance of ease. Gold can therefore be parted with more readily than at most times, and as it is needed to settle trade debts it goes.

But this state of affairs may not last very long. There is, to begin with, the prospect of a much more abundant harvest in America this year than last, and if that promise is realised, the increased shipments of produce thence to this side will go a good way towards wiping off the adverse trade balance that now exists, and so doing away with the need for gold shipments. In the course of a few months, moreover, the customary drain upon the New York and other banks for money for harvest purposes will commence, and when it begins there will not be much gold available for export, if, indeed, it is not found necessary to draw upon the European stocks of the metal. And thirdly, there is this year more than usual cause to anticipate stringency in the autumn. We do not attach much importance to what is being said as to the possibility of the National Banks contracting their note issues, owing to an uncertainty as to whether or not their charters, which expire in February next, will be renewed. There is, we should think, little doubt but that the Legislature will arrange for these renewals in sufficient time, for the National Bank system, although by no means perfect, has worked well. But in the course of the next three months, it is probable that the 8,000,000l or so of the extended 6 per cent. bonds which the National Banks now hold as security for their notes will be called in, and it becomes a question whether it would not be more profitable for the banks to surrender circulation to that amount, than to buy 4 and $4\frac{1}{2}$ per cent., at their present prices, as a basis for their issue. At all events, the possibility of a contraction of the note issues as the result of the redemption of the Government bonds, upon which those issues are based, is a contingency which must be kept steadily in view, implying as it does a possibly increased demand for metallic currency to take the place of the notes.

On the whole, therefore, although gold may possibly come to us from America for some time yet, the flow does not promise to be of very long continuance. It seems likely to cease, too, at the very time when our own internal demands for money undergo their usual autumn in-Nor even, in the meantime, are we likely to get crease. the full advantage of the shipments. A large portion of them is certain to be taken for Italy, which it will be seen from the letter of our Italian correspondent has still to receive 6 millions of the metal from the contractors for the recent loan. Our market, therefore, may not even now gain so much ease from this source as many seem to anticipate, while any who may depend upon it to relieve the pressure which seems not unlikely to arise in the autumn are pretty certain to be disappointed.

THE ASSASSINATIONS IN IRELAND.

THE assassination of the Chief Secretary for Ireland and the permanent Under-Secretary has, as a political *coup*, failed. That is the only satisfactory fact connected with a crime which, in its motive, its circumstances, and the character of its victims, is one of the worst that has been committed in our generation. The victims were both absolutely innocent men from the point of view of their assailants. Mr Burke was a Catholic and an Irishman, notoriously friendly to the views of land reformers; and as head of the permanent staff at the Castle, only the instru-

ment of a policy dictated by superiors. So thoroughly was this recognised in Ireland, that he excited no party animosity at all, and in the worst period of the excitement about coercion was able to dispense with police protection, and walk home every evening across the Park, a distance of two miles. Lord Frederick Cavendish, again, was a stranger—a man who had never been implicated in anti. Irish legislation—born of a family remarkable in Ireland for kindness to their tenantry, and at the moment he was murdered engaged in furthering a policy received with delight by the popular representatives. More innocent men never were killed, or in a more barbarous manner. They were suddenly surrounded when totally unprepared, hacked to death with bowie knives, and left in pools of blood, to be noticed by any chance passer-by. As for the motive, words can hardly describe its full atrocity. The assassins either intended by the murder of her innocent representatives to warn England that she was to blame for offering any measure of conciliation to Ireland, or they were bravoes hired to carry out the will of a society which, having traded for years on promises of great deeds, felt it essential to its receipts and its character to perform some sensational feat. Their calculation was that they were giving in a declaration of war between England and Ireland which must be taken up.

Fortunately they failed. The English people, with its instinctive political sense, in grave crises waits for its leaders, and its leaders, having all Sunday in which to reflect, resolved to continue their course unmoved by the assassinations. They at once detected the truth that the crimes were not ordered by the Land League, but were directed against them, and resolved to adhere to the course which, as they explained in Parliament, they intended to take. The only change they made was to hurry forward the previously-prepared Bill for strengthening the law, giving it precedence of the Resolutions on Procedure, and they refrained from all menaces, violent proclamations, or appointments of military men. They even pledged them-selves to bring in the Bill authorising a composition for arrears at once, and openly announced through every unofficial channel that their promises of conciliation and of consultation with the popular Irish Members would be considered still binding. The new policy would, in fact, still be pursued. The Conservatives, unable to take power, and unwilling to appear to oppose in such a crisis, agreed to support all needful measures for strengthening law, and the body of the people left affairs in their leaders' hands, showing a calumess and decision which extorted the admira-tion of not very friendly French critics. This calm persist-ence deserves all praise. The Economist has been unable to support the so-called "new departure" quite heartily, holding that under it the essential efforts for the restoration of legality were too much postponed to political expediency ; but we recognise fully the necessity for going on unmoved by either the acts or the menaces of Even if the policy were worse than it is, it assassins. would be better to persevere with it, than to give a secret society, using the dagger as its weapon, a right to claim the smallest measure of success; and success would have been claimed if the Government had done any act calcu-lated to embitter the standing quarrel between Ireland and England. The Fenians would have said that Englishmen were only just by fits; that they seized the first opportunity of reverting to oppression, that the only remedy was separation; and that they held all Moderates like Mr Parnell traitors to the common cause. As it is, they have failed, and it was above all things necessary they should fail. It is vain and foolish to disguise that political assassination has become a very great and dangerous power. The anti-social factions in all countries have grown at once both more bitter and more intelligent. They hate the Governments more than they did, while they recognise more perfectly than before that they did, we dovern-ments cannot be overthrown either by appeals to the masses or by insurrection. They therefore are more dispersed to every the sector of disposed to appeal to assassination, and they have found for murder new facilities, not only in the discoveries of science, but in securing better and more daring instruments. In Russia they avail themselves of men careless of life, if only they may disorganise the detested State, while in America and Ireland they use men who are as ready to encounter the risks of political murder as of any other,

[May 13, 1882.

and, indeed, more ready, because they find more accom-plices to shelter them. Rewarded if they succeed, and acting under a well-understood penalty of death if they fail, these agents act with the hardihood and cunning of semi-lunatics, and find in their audacity itself a means of safety. The societies are enabled, therefore, to make of themselves a formidable power, and one with which it is most difficult to deal. A succession of men are always ready to step into vacant political places, moved partly by heroism and partly by ambition; but every violent change involves a temporary stoppage of the machine, a partial change of policy, and an injury to the discipline and good order of the public service. The impact on society, too, is most disorganising. It is most essential to reduce the extent of this effect; and the most effective way to do it is for Government to pass on as if nothing had occurred except the loss of officers, to be expected in war. This has been the German, Russian, and American policy, and it must be the right one, as every attempt costs the assassinating society a frightful expenditure of force in the increased risk of betrayal, and of incurring that bitter persecuting popular hostility which will ultimately suppress the crime.

The effect of these murders upon the Parnellite party cannot yet be accurately judged, but it can hardly fail to be beneficial. It is not necessary to believe too fully in the change of sentiment which they affect. They are probably as hostile to England as ever; but they are evidently shocked, and perhaps touched in conscience, by the violent and dangerous criminality of their late supporters. They have lost influence over them, and they must perforce rely more and more on Parliamentary methods, and on their hold over masses of men who are not wanting insurrections or any other catastrophies. The shock will diminish their power over the evil section of their followers, who will cling to the more desperate secret society which cannot work through Parliament, and will incline them to a moderation through which they may secure legislative successes sufficient to make their position on the hustings They are, in fact, so completely outstripped fairly secure. by the dynamite party, that they will fall without their own consent into the position of Moderates, and cease to be, what they have hitherto been, Irreconcilables. It has always been so in revolutions. The Constitutionalists swallow the Royalists, the Girondins the Constitutionalists, the Mountain the Girondins, till the masses get tired of them all, and supersede them by any one who can give them a respite from agitation, while securing to them the social and economic privileges they have won. In the presence of an assassination faction, Michael Davitt and Mr Parnell seem moderate and reasonable, and the im-moderate and unreasonable in Ireland will fall away from their standard, and organise themselves for an underground war, which, horrible as it may be, is easier to meet than social revolution.

THE GOVERNMENT AND IRISH CRIME.

The terrible crime of last Saturday, although it has not led the Government to any substantial alteration of their Irish policy, has compelled them, as Mr Gladstone acknowledged on Monday, to change the order of their proposals. It has made the substitution for the existing Coercion Act of a new preventive and protective code, at once more urgent and more easy—more urgent, because of the proof which it affords that the present system is wholly inadequate to control and defeat the murderous activity of the secret societies; more easy, because it has roused the instinctive conscience of the Irish people, for the first time for two years, into a genuine and emphatic loathing of the policy of outrage. Whatever may be the secret history of the recent agitation, it is certain that until now the Land League has never dared openly to repudiate the co-operation, or to disavow the acts, of the Ribbonmen and the American Fenians. The murder of Mrs Smythe, some weeks ago—a murder every whit as brutal and unprovoked as that of the two Secretaries, and still more atrocious, from the fact that its victim was a woman—excited none of the indignation and self-abasement which have been so universally displayed in Ireland during the past few days. It almost seemed as though long familiarity with demoralising doctrines and degrading acts of cruelty had sealed up the sources of humanity and

pity in the Irish character. The dramatic horror of the assassinations in Pheenix Park, the rapidity with which they followed the liberation of the Suspects and the arrival of Lord Spencer, the high rank, stainless character, and popular sympathies of the victims, created a revulsion, or rather a revolution, of sentiment, the extent of which it is, even now, difficult either to realise or to explain. Its first result was that the leaders of the Land League, in order that they and all whom they represent might escape the intolerable reproach of moral complicity in a crime which horrified the whole civilised world, were compelled at once not only to denounce the criminals as traitors to their cause, but to admit the necessity of severe repressive legislation. And as the days have passed, and the details of the crime have become more widely known, the same temper has manifested itself with growing intensity not in Ireland only, but throughout the Irish communities of the world.

It is never safe to count on the permanence of a state of feeling like this, and the duty which its existence imposed upon the Government was therefore plain. It became incumbent upon them to introduce without delay a measure which would strike with irresistible force at the roots of Irish disorder, without at the same time affording an excuse for a renewal of the old alliance between the League and the secret societies. It should be clear upon the face of the Bill that it was not the offspring of panic, and that its provisions were at once quite adequate to, and yet strictly measured by, the necessities of the case. It should, especially after the experience of the last two years, leave as little as possible to the arbitrary discretion of the Executive, discriminate carefully between lawful agitation and criminal violence, and while giving no quarter to treason and ensuring for cruelty and terrorism of every kind certain detection and the sternest possible punishment, offer no discouragement to the ventilation of real grievances and the redress of official injustice. It should, in short, be a measure unmis-takably aimed at the secret societies, the moonlight gangs, the hired assassins, and the whole class of desperadoes who, through the imperfections of the existing law, aided in some cases by popular sympathy, more often by popular terror, have been able hitherto to ply their trade with impunity. To make agrarian crime impossible should be, of course, the first and paramount object. To do so without checking the newly-aroused loathing of such crime should be deemed, under existing circumstances, of scarcely less importance.

Whether the measure introduced by Sir W. Harcourt on Thursday night in all respects answers the purpose, it is impossible to say until time has been given for a careful study of its details. But there can be no doubt of the wisdom and, indeed, the necessity of its main provisions. The substitution of a tribunal of judges for the jury, in agrarian cases, has long since been acquiesced in as a necessary change by all who can distinguish between the substance of justice and its outward forms. The special commissions provided for in the Bill are hedged round with abundant safeguards, the general effect of which will be that no prisoner can be convicted against his will unless at least six judges are satisfied of his guilt. The imposition of a fine upon the district in which murder or mutilation is perpetrated, by way of compensation to the victims of the crime or their families, is proved by past experience to be a preventive measure of considerable efficacy, and few persons will complain of its revival. The extension of the right of search, which is borrowed from the Act of 1870, is imperatively required, and in order to prevent abuse, the power will only be exercisable under the direct authority of the Lord-Lieutenant. All these modifications in the existing law were strongly advocated by us some weeks ago, and we see no reason to fear that their adoption will tend to create popular sympathy with the miscreants against whom they are aimed. Nor can we understand how any Irishman, in view of recent events, can take exception to the clauses which empower the Executive to arrest strangers and require them to give an account to arrest strangers, and require them to give an account of themselves, to expel the foreign emissaries of O'Donovan Rossa and his fellow-conspirators, and to bring up for summary trial and punishment the members of secret societies.

THE ECONOMIST.

The parts of the Bill which will need the closest scrutiny are those which deal with the suppression of public meetings, the forfeiture of newspapers, and the constitution of the tribunals which will have jurisdiction over summary These are delicate and dangerous matters, in offences. the treatment of which it is of the utmost moment to discriminate clearly between a weak timidity and an excess of zeal. Too much must not be made of the spirit in which the Bill was received by Mr Parnell and his followers on Thursday. Much of their indignation was of a conventional, not to say histrionic kind, and would have been lavished with equal profusion upon the mildest proposal that could have been made. It is true that the strain in which Mr Dillon and Mr Healy permitted themselves to address the House was, under all the circumstances, nothing short of disgraceful, and shows that, notwithstanding the awful discipline of the last week, the speakers have in taste and in temper learned nothing and forgotten nothing. But it is none the less clear from all their speeches that the Home Rulers, whatever amendments they may be able to introduce on points of detail feel, that their power of obstructing and defeating the measure, as a whole, has been completely destroyed. So far as the Bill is a Bill for putting down murder and outrage, they know that it is not more in harmony with the opinion of Great Britain than it is with the present temper of Ireland. It is the duty of the Government and the House of Commons to direct and concentrate the measure to this single end, strengthening it wherever it falls short, pruning it of all excrescences which are not strictly necessary for the purpose. In this way, and in this way only, will they be able at the same time to satisfy the imperious demand of Great Britain, and to secure and retain in Ireland the allegiance of the popular sympathies which have for the moment, under the shock of a great crime, rallied to the support of social order and peace.

EGYPT.

AFFAIRS in Egypt, which as we showed last week, have for some time past been moving rapidly to a crisis, have now reached that stage. Acting in accordance with the advice of the foreign Consuls, the Khedive has commuted the sentence of banishment to the Soudan, passed by the secret court-martial upon the Circassian officers, to one of simple exile. This will enable these officers to retain their rank and receive half-pay, and such an arrangement naturally does not commend itself to Arabi Bey. If he is sincere in the belief that these officers were implicated in a plot against his life, his desire must be for a heavier punishment than that which the Khedive has inflicted; while, if as is perhaps more likely, his aim has been to get rid of men opposed to his ambitious plans, and likely to influence the Army against them, his anger, though not so excusable, is equally intelligible. The exiled officers, instead of being put out of the way altogether, will remain close at hand, still possessed of a certain military status, burning with enmity against him, and ready to be called in to the aid of any party that may oppose his schemes. As to which of those two motives-whether indignation at interference with what he regards as a just sentence, or rage at the baffling of ambitious plots-may have influenced Arabi Bey, it is not necessary now to speculate. It is sufficient to know, that no matter what the cause, his conduct, and that of his fellow-Ministers, has been of so outrageous a character, as to make it impossible that they can longer be suffered to exercise control. Having failed to browbeat the Khedive into withdrawing his decree, they have, on their own authority, convoked the Assembly of Notables, in direct violation of the law, which declares that that body cannot be convened without the previous assent of the Khedive. They have, in short, overturned the constitution of the country, and now aim at the deposition of the Khedive and the creation of a military dictatorship.

Such an insurrection, it is evident, must be suppressed. The authority against which it is directed is not so much that of the Khedive as that of the Western Powers by whom he was nominated, and at whose instigation he is acting; and the same reasons which dictated his appoint[May 13, 1882.

ment make it essential that his position should be secured. And it is equally evident that the power by which the revolt is to be suppressed must come from without. It is just possible that the Assembly of Notables may refuse to act according to the dictation of the revolutionary Ministers, although that is hardly probable. But even if they do, they are powerless to prevent the rebellion from making headway. Their protest will be as little heeded as those of the Khedive, and beyond them there is no power in Egypt which can cope with the military insurrection. But while the necessity for outside intervention is thus sufficiently apparent, nothing is more difficult than to determine the best form for that intervention to take. To any course of action it is possible to suggest there are objections of the most formidable kind. Turkey, for instance, is known to be anxious to interpose, and has, indeed, been plotting for an opportunity of once more asserting her authority over Egypt. And the British Government, rightly or wrongly, is credited with a desire to avail itself, under certain conditions, of with a desire to avail itself, under certain conditions, or the services of the Porte in the matter. The Turkish occupation, it is said, might be limited in point of time, and restricted in its scope. But if once the troops of the Sultan were permitted to land in Egypt, what guarantee can there be of their speedy withdrawal? Nothing would be easier than for Turkeer while professing to be realous in putting down Turkey, while professing to be zealous in putting down the revolt, to keep it alive by underhand means-fanning the flame it professed to be desirous of quenching. And when the time fixed for the withdrawal of the Turkish troops came, and the insurrectionary spirit remained unsuppressed, what then? Would the Turkish forces be asked to quit the country, leaving it more unsettled than ever, or would they be permitted to remain indefinitely? And if they refused to retire, on the pretext that their work was still unaccomplished, what force would be available to compel the Porte to act up to its engagements.

Nor is an intervention by England or France, or the two jointly, much more free from difficulties and dangers. There is, to begin with, the risk of differences arising between the two nations as to the nature and scope of the intervention; and even supposing we can work harmoniously together, where is the occupation to end? If we seat the Khedive again on the throne, it must, in all probability, be by force of arms, and he must continue to sit there, supported by European bayonets. If we withdraw after restoring him to power, what guarantee have we that his position will be any more secure than before? To substitute Prince Halin for Tewfik, as has been suggested, will not really improve matters. It is not to the Khedive personally that the military party are opposed, but to the European control which he represents; and though it may be that he has not shown such firmness in resisting the first seditionary movements as he ought, yet for this he is not entirely to blame. Neither England nor France were at the time prepared to aid him in crushing a military emeute, which took the plau-sible form of a movement in favour of national liberty; and left without effective support, it is not much to be wondered at that he played somewhat too meekly the part of a constitutional sovereign. Now that he is more strongly backed up, he is displaying more firmness and decision, and he probably fills as well as any other would the peculiar position he is called upon to occupy.

The choice of a course of action that remains to us is thus only a choice of difficulties. None but responsible statesmen who have an insight into the inner workings of the forces that have been brought into operation can possibly form a sound opinion as to what is best to be done in the circumstances, and even they must have the utmost difficulty in deciding upon the course to be followed. This much can only be said, that it is essential that whatever is to be done be done promptly. The situation is much too grave to admit of any procrastination, and it is satisfactory to gather from the statement of Ministers last night, that this is clearly recognised. The promise that as full explanations as possible will be made on Monday night, may be taken to indicate that by that time a definite line of policy will have been adopted and put in process of execution. And meanwhile, reading, as he himself suggested, between the lines of Sir Charles Dilke's, we have an implied

THE ECONOMIST.

assurance that such steps as are necessary to protect the life and property of Europeans have already been taken. That is as much as could be expected of the Government at present, but the further development of their policy will be watched with much anxiety.

EMPLOYMENT FOR CAPITAL. WE gave last week the usual summary of the operations of the Clearing-house for the year. Those operations have been larger in extent than any previously recorded, but the increase in them, as compared with those of a few years since, proves to have been more in Stock Exchange transactions than in those connected with what, in a general way, we may term more genuine business. If it had not been for these speculative transactions, there can be no doubt that the demand for money, and the rate paid for its use, would both have been very much smaller than they have recently been. The turnover of capital, however, having so largely increased, it will be of interest to compare some of the principal facts connected with this subject as far as they can be ascertained.

subject, as far as they can be ascertained. We begin with the Clearing-house returns, which in a rough way give, as we mentioned, an index to the employment of capital. The evidence from them is not very complete, though it is the best which can be found, because, as Mr Pownall's investigations have shown, the number of the transactions between one bank and another "cleared" between themselves, without the intervention of the Clearing-house in Lombard street, are very vast—fully as large in extent, probably larger, than those which are passed through the books of that establishment. This circumstance must be borne in mind when the Clearing-house returns are considered. Their totals for the last four years are as follows :—

CLEARING-HOUSE-TOTAL RETURNS-January to December in Each Year.

Years.	£
1881 .	 6,357,000,000
	 5,794,000,000
1879 .	 4,885,000,000
1878 .	 4,990,000,000

There is no equally certain information as to the amount of the banking deposits of the country. Our own estimate, made with the assistance of the information given in the "Banking Supplement" to the Economist supplies, gives the following results for the same period :—

BANKING	DEP	OSITS-UNIT	ED KINGDON	đ.	(Estimated.)
Years.			£		£
Autumn,	1881		520,000,000	to	530,000,000
	1880		510,000,000	,,	520,000,000
	1879		510,000,000		520,000,000
-	1878		550,000,000		560,000,000

Including deposits Bank of England. The amount for the year 1878 shows the position of matters before the failure of the City of Glasgow Bank, and the subsequent banking failures in England had caused a withdrawal of deposits, which had not, even up to the autumn of last year, been overgot. There are, however, some additions to be made to these figures, as since the year 1878 there have been very considerable augmentations to the capitals of many of the banks in the country, consequent on their adoption of the principle of limited liability. Constant additions to reserve funds are also made by many of the banks. Under these two heads, and nearly equally divided between each, the banks have received nearly 6,000,000l of fresh resources between 1878 and 1881. Even with this addition, however, the funds at their disposal do not altogether equal in 1881 what they stood at in 1878. Thus, while the employment for capital, as evidenced by the clearing returns, very distinctly increased in 1880 as compared with 1879, and in 1881 as compared with 1880, the funds which supplied the basis for these operations were smaller altogether in the later year than in the earlier years, when the demand was not so active.

A reference to the average Bank rate for the last four years will show what its progress has been in that time.

BANK of	ENGLAND-AVERAGE	MINIMUM	RATE O	f Disc	COUNT.	
Years.	01 - A () A		127 14	2 8	d	
1881	******************************			3 10	0	
1880	*******			2 15		
1879	**************************			2 10	4	
1878	A A A A A A A A A A A A A A A A A A A			9 15	8	1

which foll	lowed the failure o	f the City	v of Gl	asgo	w Bank	. 1

that it cannot be taken to mark so closely the value of money for mercantile purposes as in the years which follow.

It will be seen by this statement, that simultaneously with a brisker turnover of capital the rate paid for the use of money has increased. Bank rate is no longer the accurate guide to the knowledge of the rate for money it used to be. But though the market rate is very generally below the Bank rate, it usually follows, in the main, pretty much the same fluctuations. The increase in the rate of discount in the last year under notice is much larger in proportion than the in-crease in the use for money. This is what might fairly be expected. It is also very probable that this movement may continue. Speculation in Stock Exchange securities, in the form of the introduction of new concerns and new companies, has again begun to be active. And other causes may combine with this. It is too early yet to endeavour to foresee what the agricultural prospects of the country may be in the autumn. At present the signs are promising. We have heard calculations based on this, that as so much money may not be needed to pay for the import of wheat, the demand for the use of capital may be less. But there is another side to this question, and one which may have fully as great if not a more important effect on our money market. If the agricultural interest does better this year, there may be a demand for capital to replace losses experienced in stock and in other ways during the last few years. It is well known that the live stock of the country is not worth so much by a very large sum as it was a few years ago. Mr Caird has borne testimony to a decreasing yield of wheat connected with the same cause. Should a more favourable agricultural season be experienced this year, we may be likely to see efforts made to replace some of these losses, and a very considerable demand for capital would follow.

It is the home demand for the use of capital which, in a general way, far more than the demand for abroad, governs the price paid for it. At the present time it is not possible to carry this investigation further, but it will be desirable to keep these various requirements in mind as the season advances.

OUR COMMERCIAL RELATIONS WITH FRANCE. A FEW hours hence the commercial treaty between this country and France, which has done so much to stimulate the trade of both nations, will expire, and even at a time when men's minds are pre-occupied with grave political problems, this severance of old commercial ties must attract attention and excite regret. The rupture, too, must be all the more keenly felt, because of the uncertainty into which it plunges us. Even at this twelfth hour it is impossible to say exactly what tariff arrangements are to take the place of those that are lapsing. We know, of course, that in accordance with the agreement recently concluded, each country is to extend to the other the mostfavoured-nation treatment, and so far as our fiscal arrangements are concerned, we know exactly what this means. We shall continue, in the meantime, at least, to treat French goods exactly as they have been treated hitherto. Our duties will neither be added to nor diminished. It is very different, however, in the case of English imports into France. Upon these higher duties, in the aggregate, are to be levied, and a new mode of classification and computation has been introduced, which makes it impossible to say beforehand what will be the actual weight and incidence of the new burdens that have been imposed. Nor is this all. The duties upon English products are to be determined by the tariffs which France applies to the goods of other nations; but owing to the delay which has taken place in the ratification of her treaties with other Powers, it is still uncertain what these tariffs are or will be. The Dutch Legislature, for instance, has refused to ratify the treaty submitted to it; modifications, the exact purport of which is not yet known, are understood to have been made in the treaties with Spain and Portugal ; and it is stated, also, that in the treaty with

Italy some changes were made at the last moment. As matters now stand, therefore, no one can say exactly what treatment the goods of this country will be subjected to at the French ports a day or two hence, and it is inevitable that by this uncertainty trade between us and France will be embarrassed and restricted.

That this state of things is regarded with considerable apprehension on the other side of the Channel is evident from the numerous reports that have come thence, during the past few days, of a renewal of the treaty negotiations between our Government and that of France. So far, however, as it is possible to ascertain, these rumours are wholly without foundation. Certainly no overtures have been made by the English Government, for the simple reason that, having already laid down with the utmost clearness the conditions upon which alone they would consent to conclude a new treaty, they have now nothing to add to or to take away from their former statements. And although there is some reason to believe that public opinion in France is getting to regard with increasing dissatisfaction the failure to negotiate a treaty, it has not yet, at all events, expressed itself so decidedly as to induce Ministers to recede from the position they formerly took up. Nor would it be wise on our part to look for any speedy change in the French policy. It is likely enough that when the unsatisfactory working of the new tariff arrangement is realised from practical experience the outcry that is now being raised against them will grow in strength and intensity. But the French Protectionists are a strong, united, and well-organised party, whose opposition it will not be easy to overcome. If they give way at all, they are not likely to do so until after a long and stubborn fight.

Instead, therefore, of indulging in any doubtful hopes of the adoption by France of a more reasonable tariff, we had better face the existing situation resolutely, and with a determination to make the best of it. And after all, there is not much in it of which we need be afraid. We certainly must expect to see a falling off in our exports to France. For months past our shipments thither have been on an unusually large scale, as French buyers, in anticipation of higher duties, have been accumulating large stocks of our goods. Thus the recorded value of our exports to France during the first quarter of the current year is 5,018,000l, as compared with 4,217,000l in the corresponding period of 1881; and the French markets having thus been supplied in advance will, in all proba-bility, now curtail their purchases. But the very fact that there has been this anticipatory buying shows that there is a demand for English goods which will have to be supplied, no matter what Customs' duties are imposed. Many of the commodities we send to France are virtually indispensable to her, and although high tariff rates, by enhancing their cost, must to some extent restrict their use, that restriction in a well-to-do country such as France is not likely to be at all so great as has been apprehended. And for such of our products as France may exclude we shall, doubtless, soon find other markets. They consist, not like the bulk of the French exports, of luxuries, for which the market must be restricted, but of necessaries, which command a wide sale. If France rejects them, we shall get others to take them, and to these others we will at the same time transfer, as far as possible, our demand for products we now obtain from France, not from any spirit of retaliation, but simply because as trade consists essentially of barter, our commerce must be with those who are ready to exchange with us.

As a promising field for the development of such a mutually advantageous trade, the attention of men of business is now being turned specially towards Spain. It cannot be doubted that if the heavy discriminating duties which Spain now levies upon English goods were abolished, these would be imported in much larger quantities than at present. And there is every reason to believe that we have the power, if we choose to exert it, to obtain the repeal of the obnoxious surtaxes. These were imposed from a feeling of resentment at our treatment of Spanish wines. The jump in our scale of wine duties from a charge of 1s on wines of less than 26 deg. of alcoholic strength to a duty of 2s 6d on wines exceeding that limit, even by a single degree, has always been regarded by Spann differentiating against her wines in favour of those of

France. So far as the intention of the duties is concerned, this feeling is, no doubt, unwarranted. In fixing the limit of 26 degrees, our Government had no desire to discriminate against Spain, or any other country. But, at the same time, the effect of the duties has certainly been to give the French wine producers a great advantage over all other competitors, and there is no denying the justice of the complaints which other wine-producing countries have been making on the subject. Spain has thus unquestionably a grievance against us; and although we cannot legislate specially for that grievance, and must treat all who trade with us on an equal footing, this equality of treatment is not inconsistent with the effecting of such changes in the wine duties as would probably be regarded by Spain as justifying the removal of the heavy surtaxes she has placed upon our goods. If, instead of a scale rising by a bound from 1s to 2s 6d, we were to adopt a scale 2scending by steps of a few pence for each 4 or 5 degrees, all reasonable objections to our treatment of the wines of countries other than France would be met, and the hope must be that this change will not be long delayed.

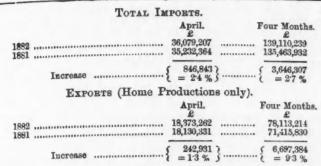

So far as Spain is concerned, the question of the wine duties is complicated by a dispute upon another revenue question, the Spanish authorities contending that we do not exercise as much care as we might, and ought to do, in order to prevent Gibraltar being used as a base for extensive smuggling operations. But this is probably a comparatively subsidiary matter. Altogether apart from tariff questions, we are bound to take all reasonable precautions to prevent our tenure of Gibraltar being used to facilitate frauds upon the Spanish Customs, and this obligation our Government may be trusted to recognise and fulfil. The really crucial question is, as we have said, that of the wine duties. With regard to these, it probably is not necessary that we should enter into any formal engagement. Indeed, after our experience of the French Treaty, the general opinion here will be that the more clear we can keep ourselves of treaties which give to our Free-trade policy the appearance of a bartering of concessions, the better. Nor is there much likelihood of the Spanish Government, after the difficulty they have experienced in carrying their treaty with France through the Chambers provoking fresh opposition by an effort to conclude a treaty with us. But if, by the revision of our wine duties, the special grievance of Spain is removed, she will no longer have any excuse for imposing higher duties upon English goods than those of other countries, and probably no desire to do so; and if the failure of the French treaty negotiations leads to the abolition of this invidious discrimination, and gives us a fair field with no favour in our trade with Spain, it will not have been an unmixed evil.

THE BOARD OF TRADE RETURNS FOR APRIL. RECENT advices from the various manufacturing centres of the country might well lead us to anticipate that the exports would now be showing a smaller rate of expansion than was the case some months back; and certainly these Returns for April give countenance to such a view. Thus, the monthly increases in the exports of home productions since the beginning of this year have been—

ľn	JanuaryIn	acrease	2,501,772	-	141	
,,	February	33	2,100,444			
55	March	22	1,852,237			
99	April		242,931	-	11	

But there are circumstances which tend to somewhat modify the gloomy aspect of the latest figures. The early months of 1881 found the trade of the country in a very stagnant condition, which tended to heighten the contrast with this year's returns; while it must not be forgotten that last month there were five Sundays against four in April, 1881, thus shortening the month by one working day, the exports represented by which would average nearly 750,000*l*. It will not do to place too much reliance upon the figures of a single month; but after making all allowances, the following statement cannot be looked upon as very re-assuring. It will be noted that the increase in the exports is now smaller than that in the imports.

THE ECONOMIST.

On the four months, the apparent proportion of net exports to imports has been over 56 per cent., against $52\frac{3}{4}$ per cent. in 1881, and $50\frac{1}{4}$ per cent. in 1880.

The imports of raw materials are well maintained, and neither on the month nor on the four months, is there any marked falling off under any of the heads named in Table I. The chief percentage of reduction is in lead, the imports of which have been declining for three or four years past. The United States sent us 253,000 cwts less of raw cotton last month, making the deficiency for the four months nearly 1,000,000 cwts, but India let us have an additional 231,000 cwts in April, making 626,000 cwts increase for the four months; and more cotton has come from Brazil, though rather less from Egypt. The imports of flax were unusually large, the entire additional quantity coming from Russia, owing to the early opening of Baltic navigation. In the same way can be explained the extra quantity of timber coming from Sweden, Norway, and Germany. It cannot be shown from these accounts why the 1,200,000 lbs extra of Australian wools imported last month should have been accompanied by a diminution in value to the extent of 636,000*l*. Nor do current market prices afford a clue to the mystery. We have always, how-ever, considered the wool imports—having regard to their macmituda (some 26,000,000*l*, a year) — treated year magnitude (some 26,000,0001 a-year) — treated very meagrely in the Board of Trade Returns, and it would certainly be a very useful alteration to separate washed from the much cheaper greasy wools.

The imports of manufactured goods last month marked a reduction after their decided increase during the previous quarter. In leather and woollen yarn, however, the growth is shown below to have been continuous. But for years past the entries of foreign-prepared leather have increased, to the detriment of the home tanner.

Were it not for the large extra supplies of wheat reaching this country from California, India, and Russia, the food imports would have shown a large falling-off this year. But the additional 3,200,000 cwts of wheat which have come to hand in the past four months, and the increase of 2,190,000l in the value imported, quite alters the character of Table IV., and renders the variation between this year's and last year's totals of comparatively small dimensions. Amongst the different items, however, there is a great deal of movement. The entries of Indian corn, preserved meats, rice, and bacon, again last month were much reduced; and the potato imports have almost died out, representing only 129,000l in four months, as com-pared with 1,447,000l in the same months of 1880. On the other hand, the receipts of "live meat" are now again growing steadily; more sugar came to hand in April; and at last there is an expansion under the head of coffee. This expansion has in the main come from Ceylon, where last year the leaf-disease was far less virulent. This disease year the leaf-disease was far less virulent. This disease had become such a serious matter for the island, that it is gratifying to be able to note any amelioration of the scourge. The imports of rum have again been largely in excess. Butter, last month, also exhibited increase; but that item also includes "butterine;" and it is therefore The imports of rum have again been largely in questionable what proportion of this increase should more properly be ranked under the head of tallow.

The re-exports of foreign and colonial merchandise were last month valued at 6,965,000*l*, which apparently was much in excess of April, 1881. The exports of colonial wool were set down at 2,176,500*l*, against 1,263,700*l*; those of raw cotton at 555,700*l*, against 420,000*l*; rice, 165,500*l*, against 129,700*l*; indigo, 271,200*l*, against 180,100*l*; coffee, 319,900*l*, against 341,900*l*; and tea, 144,700*l*, against 298,100*l*.

The chief depression in the country's exports still rests over the cotton trade. Last month the export of piece goods was less in value by 472,000l than in April, 1881, making the four months' drop as much as 1,665,000l, and in addition last month there was a falling-off of 147,000l in cotton yarn. Against these heavy decreases, the growth of the small items of cotton lace and thread is but a poor set-off. India is still the chief delinquent; and last

[May 13, 1882.

month China was also a smaller buyer in Lancashire. Early in the year, France took more iron and coal from us, but last month this expansion was no longer visible; and the same may be said in respect to silk manufactures. The chief activity in our shipments to France last month was observable in the re-exports of colonial wools, to make up in some measure for the diminished buyings here in the early part of the year. In iron and steel, there was last month a heavy falling-off in the shipments of steel and iron rails to the United States, but there were larger exports of other descriptions of iron in that direction. The United States, however, have certainly been a less active purchaser here latterly of railroad iron. Finally, we must recall the fact that the export trade suffered to some extent by the month being a working day short, and that many of the percentages below are consequently less favourable than they otherwise would have been. BUSINESS NOTES.

SCHOOL BOARD RATES IN RURAL DISTRICTS.—The terrible and absorbing events which have occurred since we last wrote have almost obliterated from the mind of the public the debate in the House of Commons on the incidence of School Board rates. Mr Yorke had no difficulty in showing that the charges under this head not only greatly exceeded the anticipations of those who framed the Education Act of 1870, but that they fell with great inequality on particular parishes.

The School Board rates in the rural districts are no more than 440,0001 a year, but this does not prevent the charge amounting to as much as 1s or 1s 6d in the £ on some places, and even more. Cases, too, occur, and we have known such, in which parents obtain work in one parish, but, owing to deficiency of house accommodation within limits, live just over the parochial boundary. The children have to be educated where they live, not in the place which prospers from the exercise of their parents' labour, and the rate occasionally presses with great severity in these cases. On examining the latest Education Report, we find the rate marked at 1s 3d in the £ in a parish so circumstanced. In thinly-peopled parishes, also, the rate sometimes amounts to a very heavy income tax on those who have to bear the burden. The education, of who have to bear the burden. The education, of the children in these places cannot, however, fairly be neglected. There is, indeed, in some respects, a stronger plea for its being first-rate in quality, owing to the disadvantages which the children are at by reason of difficulty of attendance where long distances have to be traversed. Education must of necessity be exceptionally expensive in places so situated. The remedy, however, which Mr Yorke proposed, namely, a three-fourths exemption of land from the rate, would not have met the difficulty. The right method of providing alleviation may probably lie rather in the extension of the area over which the school rates are levied, joined with some power of adjusting the Government grant to meet the cases of the less densely-peopled portions of the country, and above all, in the simplification of the machinery. Mr Mundella showed that he was on the right course by his remarks on this subject. He had been able, he said, to reduce the administration charges in some cases as much as 50 per cent. In towns, no doubt, there is need for a complete machinery of attendance officers, industrial schools, and the like, and for a clerk well versed in the law, able to conduct the cases of irregular attendance, or of children sent to inefficient schools, which have continually to be brought before benches of magistrates, perhaps not over willing to convict and to support the School Board in their efforts to improve the educational standard of the place. But among the quieter life of the rural districts, all this carefully-arranged system is not required. A cheaper and less elaborate method of going to work may well suffice in such parts of the country. The business of management is not really intricate when once the routine is mastered, and the Department, as Mr Mundella showed, is anxious to promote economy. The objections to Mr Yorke's proposals were clear, but the necessity of adjusting the new burden which education will impose on many districts of the country to the ability to meet the required taxation is likewise obvious. This is one of the many points in local government now earnestly pressing for consideration.

THE FIRE RISK OF THE ELECTRIC LIGHT .- When the electric light was first introduced for general lighting purposes, one of the superiorities it was generally supposed to have over gas was that its use would be attended with less risk of fire. This opinion, however, was subsequently very much shaken by the occurrence of a number of fires of which it was the cause, and it began to be feared that instead of diminishing the fire risk, the substitution of electricity for gas would really increase it. So strong has been this apprehension, that many of our fire insurance companies have been charging higher premiums for buildings on which electricity is used; but, happily, it now appears that these precautionary measures are unnecessary, and that the electric light is really, as it was at first supposed to be, superior in point of safety to gas. This, at any rate, is the result of an investigation instituted for the Phœnix Insurance Company by Mr Musgrave Heaphy, C.E., whose report on the subject concludes as follows "And now with reference to the question as to whether the electric light taken as a whole is safer or more hazardous than gas, I am of opinion—so far as conclusions can be drawn from the present knowledge of the subject—that where systematic and proper precautions are taken, there is less danger from electric lighting than from gas; but that if carelessly or ignorantly arranged, or improperly worked, serious fires may be apprehended." Mr Heaphy then proceeds to law down a number of rules upon then proceeds to lay down a number of rules, upon the observance of which in electrically lighted buildings

THE ECONOMIST.

he thinks the insurance companies ought to observe; and as it is stated that these rules have been approved of by the principal electric light companies, we may take it that the possibility of obtaining almost perfect security from fire in the use of the new light is now recognised, and that no difficulties with the insurance companies will stand in the way of its extended use.

THE LOCAL TAXATION OF SCOTLAND .- Those who are responsible for the framing of the local taxation returns of Scotland cannot be complimented on the result of their The returns certainly contain most of the labours. materials for a complete statement of the local burdens, expenditure, and debt; but they are so arranged that any one wishing, for instance, to ascertain what is the aggregate amount of the local taxation of Scotland has to wade through a series of tables, extracting items here and there, and then gathering their totals together, before he can obtain the wished-for information. In the English returns, on the contrary, clearly-arranged summary tables show almost at a glance the nature and amount of all burdens, as well as the total expenditure and debt; and if the Scotch returns are to be made generally intelligible, the same method of arrangement must be followed. The subject of local taxation is in itself so complicated, that the importing into its consideration of additional difficulties from the inefficient framing of returns cannot be too strongly deprecated. When analysed, the returns, which are for the year ended the 15th May, 1881, show the total revenue of the various local authorities of Scotland to have amounted to 4,834,7751, which was raised thus-

TRUSTEES AS SHAREHOLDERS IN COMPANIES. — The decision of the Court of Appeal in the case of the New London and Brazilian Bank against trustees who had invested trust-money in the shares of the bank, bear a character of hardship on the face of it, but the justice of the principle cannot be denied. Banks cannot go behind the facts patent to them. The trustees were registered as shareholders, and by the articles of association it was provided that the company should have "a first and paramount hen and charge, available at law and in equity, upon all the shares of any shareholder for all moneys owing to the company from him alone or jointly with any other person, and when a share is held by more persons than one, the company shall have a like lien and charge thereon in respect of all moneys so owing to them from all or any of the holders thereof alone or jointly with any other person, and in any case whether such moneys shall be payable or not." One of the trustees was a member of a firm which went into liquidation, being at the time

indebted to the bank, and the claim of the company over its shares was enforced. To have decided otherwise than that the company was entitled to its claim would have been impossible. The moral of the case is the entire unsuitability of investments of such a class for trust money.

MISSTATEMENTS IN PROSPECTUSES .- A decision given by the Court of Appeal this week should impress upon directors the necessity of thoroughly examining the statements to which they are asked to append their signatures. In 1880, the London and Staffordshire Fire Insurance Company, wishing to extend their business, decided to increase their capital; and in the prospectus issued it was stated that, according to the last balance-sheet, the company possessed surplus assets amounting to upwards of 10,000*l*. On the faith of this prospectus, a Mr Sturdy made application for 500 shares, and obtained an allotment of 150. Subsequent to the issue of the prospectus, however, the directors discovered that in the balancesheet for 1879 the outstanding losses had been underestimated, and an over-estimate made of the outstanding revenue, and that, instead of a surplus of 10,0002, there was really a considerable deficiency. In the annual report issued in June, 1881, this error was pointed out; and in the following month Mr Sturdy claimed to have his name taken off the register of the company, and the money paid for his shares refunded, on the ground that he had been induced to take the shares on the faith of a statement in the prospectus which was admitted to be incorrect. His application being re-fused, the matter came before Vice-Chancellor Bacon, who dismissed the action, apparently on the ground that there had been no fraud on the part of the directors. This decision, however, the Court of Appeal has now reversed. While acknowledging that there had not been, and could not be, any suggestion of fraud on the part of the directors, who were themselves completely misled as to the state of the accounts, their Lordships held that the fact that the directors did not know that the statement as to the surplus was untrue was no valid answer to an application to rescind a contract made on the faith of an erroneous and misleading announcement. Mr Sturdy's name has accordingly been ordered to be removed from the register, and his money returned to him; and it is difficult to see how any other judgment could have been given. There can be no doubt that the prospectus-unintentionally no doubt-completely misrepresented the then financial position of the company; and to hold a man to a contract into which he was induced to enter by a wholly erroneous statement would obviously be most inequitable. What negligence there may have been was on the part of the company, in not providing for an audit sufficiently searching to discover the errors in the accounts, and it is on the company that any penalty for that negligence ought to fall.

THE RUSSIAN WAE INDEMNITY.—The long-protracted negotiations between the Russian Government and the Porte on the subject of the payment of the war indemnity of 40,000,000l have now been brought to a conclusion. The agreement, it is stated, is that Russia is to forego all claims for interest on this debt, and to accept an annual payment of 350,000l, secured on the revenues of certain districts, in payment of the principal. By an arrangement between the Bank of Russia and the Ottoman Bank, the Russian authorities will have a certain supervision over these revenues, although the Porte has been most careful to explain that it is not a party to this arrangement, and does not recognise any right on the part of Russia to interfere with the assigned revenues. These terms are certainly most favourable to Turkey, but the question is whether she is in a position to part with even this small amount of yearly revenue.

GROWTH OF THE INDIAN TEA TRADE.—Few branches of Indian industry have been extended so rapidly of late years as the tea trade; and Great Britain is doubly interested in the result—first, because the owners of the tea estates are nearly all Englishmen; and secondly, because London is still practically the only market for Indian tea. During the financial year ended March 31

THE ECONOMIST.

last, the exports of tea from India contrasted as follows with those of the three previous years: 1881-82. 1880-81. 1 1879-80. 1878-79. lha lbs lbs

THE ITALIAN CENSUS.—The preliminary details respect-ing the Italian census, taken on the 31st December last, have now been published. The entire population, which was 26,801,154 on December 31, 1871, has in the decade increased to 28,452,639, or 1,651,485 during the ten years. Thus the growth has been 6.16 per cent., or .616 per The greatest advance has been recorded in annum. Sicily, where the growth was at the rate of 1.311 per annum, and the least in the already thinly-populated provinces of the Marches, Abruzzi, and Basilicata. In provinces of the Matches, Abruzzi, and Dasheata. In practically the same ten years the population of the United Kingdom, even taking into account retrograde Ireland, grew at the rate of 1.11 per annum, while in England and Wales the increase was as much as 1.434 per annum. In the following contrast of some of the more recent enume. the following contrast of some of the more recent enumerations, Italy is placed lower in the scale of growth than either Germany or Great Britain, though above Austria-Hungary and France :---

		Population.		Р	opula	ation.	-	% per

THE STANDARD OF VALUE IN GERMANY.

TO THE EDITOE OF THE ECONOMIST. SIR,—The ECONOMIST of the 29th April contains an article on "The Standard of Value in Germany," discussing some proposals which appeared in the Norddeutsche Allgemeine Zeitung as to the substitution of silver for small gold coins and paper money. The author of these proposals considers it important that the British public should have a correct impression of his views, and as on some points your article has not interpreted them in accordance with his intention, I trust you will allow me to explain the exact meaning of his suggestions on these points.

1. Your article does not lay sufficient stress on the fact that the operation of the new scheme is not to be confined to Germany, its object being to limit the use of gold as far as practicable, and to put a stop to the depreciation of To attain this end the author considers it necessary silver. that all important countries should abstain from the use of gold coins or paper money of a smaller value than 1l, and that the countries of the Latin Union, as well as the United States, should re-introduce the free coinage of silver. The adhesion of this country is considered a sine quia non.

2. It is contended that the adoption of the proposed plan would not lead "to a depreciation of the circulating inedium," as the new silver coins are to be of full value; it is to be provided that ten marks of the proposed new issue are to have exactly the same intrinsic value as the ten-mark gold pieces which are used at present. The fractional currency would, under these circumstances, be improved instead of being depreciated.

3. It is also denied that the effect of the proposed scheme would be the creation of two currencies, one for internal and one for foreign payments. The new silver coins would only be used for payments under 1*l*, otherwise no change would take place. It is admitted that it will be necessary from time to time to raise the rate of discount to maintain an efficient reserve of gold, but it is believed that if the new scheme were adopted such changes would be less frequent and less violent .-- I am, &c.,

ERNEST SCHUSTER.

FIRE INSURANCE.

May 13, 1882.

TO THE EDITOR OF THE ECONOMIST.

SIR,-In your remarks last week upon " Fire Insurance in 1881", you quoted returns of seven companies for that year, and in so doing, inadvertently misquoted the figures of the company doing the largest business, much to the detriment of the others.

Under the head of expenses of management you have included commission in every case but that of the North British and Mercantile. If it be added here, the expenses of that company will be 301,603l, instead of 151,000l, as stated by you, and the following will result :-

PERCENTAGE OF EXPENSES ON PREMIUMS.	
Manchester	221 271
Lancashire	
Commercial Union	29
London and Lancashire	294
Alliance	30
NUTUR DITUBLI GHU DICICULUAC	31
London	311

Referring to the severe losses sustained by many of the companies during 1881, shareholders might do well to ask their representatives what percentage of loss applies to home and what to foreign business.

Rates, no doubt, are coming down, and have already fallen, through the competition which you welcome as a healthy feature; but expenses are also increasing from the same cause, and with a double influence at work, it is not very apparent to some of the most far-seeing insurance managers that a sufficient margin is left from which to Certainly the outlook is make profit and pay dividends. serious for all those companies that have not large reserves. The interest earned by these will tide over several bad years, but when such funds do not exist, then pure fire underwriting, as at present conducted, does not promise very rosy results.

Are not too many of our offices subject to a craze for big gures? There would appear more anxiety to keep up figures? premium than a good rate of profit; and in this greed for business, the cost at which it is purchased is often ignored, while the very magnitude of the operations precludes the adequate supervision of risks without which fire insurance is simply ignorant speculation.

This is suggested by the fact that the largest companies, and those whose business is chiefly foreign, have the highest percentage of loss. The smaller, and what are called old-fashioned, offices last year, generally, have not to complain of more than the average rate; and we have very little doubt but that analysis will prove the severe losses of 1881 pertain chiefly to foreign business, or to those companies doing large foreign business, which cannot be so well supervised as home, and when the very greed for large returns tends to a neglect of that strict scrutiny of individual risks, wherein the skill of fire underwriting can be shown. A peep behind the scenes will be sufficient to convince any observer that fire underwriting to a large extent, and with a few honourable exceptions, now consists of reckless under-bidding, and a happy-go-lucky sort of rating, which trusts to the law of averages rather than to the careful appraisement of risks.

Why have not our fire underwriters the courage to come out of fields wherein year after year they have made no profits whatever? If they do not soon do this, the public will give their support to those old, strong, small offices whose rates are honestly fixed, and where the security to policy-holders is not imperilled by the risk of gigantic foreign losses.

Is it not a fact the some half-dozen of our leading companies would show better results if they were boldly to appropriate the necessary part of their large funds in hand to "get off" their foreign risks, and steadily decline the unremunerative part of this business for the future?

A smaller premium income, but smaller rate of loss and expenses, and a higher rate of profit and a larger profit in bulk, would be the effect.

Sooner or later this must come. The sooner the better for shareholders; the sooner the better for the reputations of those who aspire to be called fire underwriters, but whom some would consider more aptly described as speculators in foreign and underbidders in home business. London, May 11. X

THE ECONOMIST.

AMERICAN RAILWAYS.

THE following letter, addressed by the writer to a friend in England, has been forwarded to us. As it gives the views of one with an intimate knowledge of American railroad affairs, its statements as to the general position are valuable. But as to the soundness of the opinions it expresses with regard to the Wabash Railway in particular readers must judge for themselves :-

Wabash, St Louis, and Pacific Railway Company, Office of the Vice-President,

New York, April 25, 1882.

My DEAR -Referring to your letter, asking information in regard to American railway stocks, &c. The great rise in American railway securities, which

began January 1st, 1879, was legitimately based upon the return of this country to a specie basis, and upon the great prosperity incidental to unusually abundant crops, all this coming after several years of forced economies. The stimulus given to business at that time was so great that large speculative operations carried many of these securities to extravagant figures, and all business was more or less affected in a speculative way. Looking at the unprecedented prosperity, people were induced to give a higher prospective value to many of the stocks and bonds of our roads than was warranted by the amount of business, and no reaction commenced until the crop failure of 1881 became apparent. Following this came diminished profits on the railways, in consequence of a prolonged and bitter war between the competing trunk lines, a war of rates never before equalled in this country. It is probable that a large portion of through business transported by these lines during the fight paid little more, if anything, than the cost of transportation. In addition to this, the expenses of operating railways were very much increased during the year, there being an unusually severe winter and various disasters by "flood and field." When the returns of railways thus affected began to

come in, people began to reason as to the value of the bonds and stock represented upon the basis of actual earnings and profits, and the speculative or prospective basis was mostly abandoned.

Taking advantage of this adverse condition of railway business, the class of speculative operators called "bears" have worked upon the market by various devices to depress prices, selling stocks in advance which they did not own, in order to buy them in at a profit by exciting the fears of holders. The speculative movement above alluded to, and which extended to all kinds of business through-out the commercial world, having thus been checked and turned in the other direction, the markets are now halting and staggering, and people are hesitating as to whether prices have reached bottom line. The result is dulness and uncertainty; but hopes are entertained by a large majority of intelligent business people, that with abundant crops, which the season now promises, business will again assume its progressive movements; and on this expectation they found their belief in improving prices for railway securities.

If, as the year developes, these expectations are justified, many of the shares and bonds dealt in at our stock exchange are cheap at present prices; but if, on the other hand, any disappointment is met by crop failure or other disastrous visitations, prices may go even lower. At present, I am inclined to think that the hopeful view is more in accordance with the existing facts and business of the country.

One thing is pretty certain: people are now inclined to judge of the value of stocks by the actual profit-earning capacities of the railway lines. They will no longer be carried away by senseless "booms" and mere speculative anticipations.

As to Wabash, the year 1881 was particularly unfavourable. Obliged to participate in the trunk line war, and to receive prices for hauling freight which scarcely paid expenses, the net profits were reduced to a very low point, the expenses having been raised to 75 per cent., or more than 12 per cent. than in the year 1880, and making a difference of nearly \$2,000,000.

The company having been obliged to stop dividends on preferred stock and to make these facts public, its securities have consequently suffered in the public estimation.

Since the 1st of January, however, the business of our road has greatly improved, showing an advance of 35 per cent. over the corresponding period of 1881, and at least 20 per cent. upon the same mileage operated in that year. The passenger traffic especially shows a remarkable im-provement, and upon the whole I am inclined to think the business of the year will be very much more satis-factory. Some of our directors believe that the gross earnings will reach \$19,000,000 or \$20,000,000, and that a dividend will be earned upon the preferred stock; but I do not feel sanguine about this. At any rate, I am quite confident that no dividend will be paid this year. At the same time, I think the Wabash has a bright future.

The depression in our stock has been so great that, upon general principles, I should look for higher prices, but do not feel disposed to advise at present. Later in the year, when we know a little more fully what the road is doing, I will try to be more decided in my opinions .- Fraternally yours, GEOFFREY O'HARA.

week, exhibits the foll	lowing cl	ar	ge	8 :				

In Treasury accou Cash

unt	2,370,698	Circulation Private deposits Discounts	
-----	-----------	--	--

The aggregate amount of the discounts is almost unchanged, but there is an increase of 38 millions in the branches, balanced by a decrease of as much in Paris. The diminution in Paris is a consequence of the withdrawal of 50 millions by in Paris is a consequence of the withdrawal of 50 millions by the syndicate of stockbrokers from funds advanced for carrying over purchases in the settlement at the commencement of April. The money had been borrowed from bankers, and having since been reimbursed, the paper discounted at the Bank of France by bankers to procure the funds has been allowed to run off without other paper being discounted in its place. Discount in the open market is easier, but far from abundant, and the rate is firm at 3[‡]. The little ease remarked is due to dulness of trade rather than to a demand for bills. The London exchange remains steady at 25f 20c, the fluc-

tuations during the week not exceeding a centime above or below. No exports or imports of gold are noted this week. The Italian Government has withdrawn a further sum of six millions of its silver token money held by the Bank of France. The cash reserve at the Bank this week and last was composed as follows :--

Gold Silver	May 11. francs. 897,995,917 1,151,008,388	 May 4. francs. 895,603,020 1,151,030,587	
Total	2,049,004,306	 2,046,633,608	

Little business is doing on the Bourse, and prices show generally but small variations. Bank of France shares have gained a further 100f, but there has been a reaction in Suez Canal shares. Egyptian Unified bonds have held their ground fairly, the depreciation in the week amounting to only 11f 25c. Subjoined are to-day's closing prices, with the variations on the week :--

The Banque de Lyons et de la Loire, which collapsed at the same time as the Union Générale, after an even more brief career, marked with the same wild speculations, has been declared, by a judgment of the Tribunal of Commerce of Lyons, to have never had a legal existence, the provisions of the laws of 1867, which require the payment of one-fourth of the capital before a company is formally constituted, not having been observed. The founders have been condemued jointly to pay all the debts of the company, and to reimburse to the shareholders the paid-up capital, with interest at 6 per cent.

The capital for the Isthmus of Corinth ship canal has been subscribed, and applications for shares will undergo a large reduction. The Comptoir d'Escompte in Paris received applications for over 200,000 shares, the number to be issued being only 60,000. The contractors for cutting the canal engage for a fixed sum of 25 millions of frances to complete the work in three years. The capital raised is 30 millions, but interest will be paid during the period of construction, as was done with the Suez Canal. The tolls for passage through the canal are fixed at one france per ton for vessels to or from the Adriatic, and 50 centimes for vessels to or from the Mediterranean. It is estimated that the receipts from shipping will amount to five millions of frances a year.

One of the great obstacles to the development of agriculture in France is the difficulty the farmer encounters in obtaining loans on the security of his crops. The creation of agricultural credits is a problem successive Governments have endeavoured to solve, but so far without success. Under the Empire, the Crédit Agricole was established with a capital of 40 millions, under the patronage of the Government, and with certain privileges, but completely failed in the work, and after its capital and deposits had got locked up in Egyptian securities, was forced to go into liquidation. A commission was appointed in March last, comprising among its members M. Denormandi, late Governor of the Bank of France, M. Christophle, chairman of the Crédit Foncier, and suggest some remedy, and a report has now been drawn up by M. Molinari in the name of the Commission. Three questions had been put for examination : (1) Could great public establishments like the Bank of France, the Crédit Foncier, the Caisse des Depôts et Consignations, savings' banks, &c., render the required assistance to agriculture? (2) If not, should one or more special establishments be created? (3) In that case, should it be by the State, the departments, or by the communes? The Commission answers all those questions in the negative, and concludes that all that is required is to abolish the present distinction between civil and commercial matters. The agriculturists not being by law a trader, is not within the jurisdiction of the Tribunals of Commerce, and the realisation May 13, 1882.

of a pledge given is a long and tedions process. In addition, the maximum interest is 5 per cent. in civil matters, and 6 per cent. in commercial. A Bill is at present going through the French Parliament to abolish the Usury Law of 1807, limiting the rate of interest; but the Chamber of Deputies, while voting the Bill so far as it relates to commercial interests, maintains the restriction for interest in civil matters. The Senate, which has now the Bill before it, has also decided in committee on retaining the limitation to 5 per cent. for civil matters. The Commission cites the example of England and Scotland, given on the authority of the late M. Leonce de Lavergne, to show that all that is required to render loans by banks as accessible to the agriculturist as to the merchant or manufacturer is to assimilate them to traders for the performance of their engagements, and to make them subject to the same bankruptcy laws.

The treaties of commerce with Belgium, Switzerland, Spain, Portugal, and Norway and Sweden, which still await ratification by the Senate, come before that assembly to-day for discussion. Urgency has been declared, so that a single reading will suffice, otherwise it would be impossible to get the five treaties voted by the 15th, when the old conventions expire. Three of the treaties have to be ratified by the other contracting parties, and the Government has declared, in a communication to the committee of the Senate, that if not passed by the date no further extension of time will be allowed, and the General Tariff will be applied. Those countries are Italy, Holland, and Portugal, in all of which the assent of the Upper Chamber is wanting. The position of the treaty question with England is very naturally referred to in the general report presented to the French Senate on these Bills by M. Teisserence de Bort, a former Minister of Commerce. Some of the members of the committee wished to bind the French Government not to re-open negotiations with England, or if it did so, to withdraw all the concessions the French Government had agreed to when the negotiations were broken off. M. Tirard, however, refused to enter into any such engagement, but he gave the committee to understand that if negotiations were to be renewed, the overtures must come from the English Cabinet, and the French Government would then consider what reply it would make. That assurance did not, however, satisfy the Protectionists in the committee, and they voted by a majority of eight to six, one member abstaining, a clause in the report declaring that the commercial régimé which would come into operation on the 15th May must be considered as final. The Senate Committee affect to apprehend that England has a secret design of imposing duties on French productions, and remarks that the most-favoured nation clause, which France spontaneously conceded to England, and may at any moment withdraw, is a valuable arm in the hands of France, as

Accounts from all parts of France are unanimous in describing the appearance of all the crops in the ground as magnificent. The only complaint is, that the vegetation, favoured by rain and warm weather, is so luxuriant, that if not now checked by drier weather, much of the wheat will be laid before it can come to maturity. The rye is already blooming, and the other grain crops are equally forward. The weather is not less favourable for field labour than for the plants. There have been no night frosts since one on the 11th April, and the damage done by it to the fruit-trees is now admitted to be much less than was supposed. The grass crops are heavy, and the scythe will be at work before the end of the week. The promising appearance of the wheat crops has produced no effect on the corn market, which remains firm, as the supplies are short, and the stocks known to be small.

GERMANY AND AUSTRIA. VIENNA, May 8.

The assassination of Lord Frederick Cavendish and Mr Burke has caused a sensation here quite equal to that produced by the murder of the Czar Alexander II. What causes the greatest surprise is that so atrocious a crime should have been committed at the very moment when the Land League leaders had been released, and Mr Gladstone had gone as far as possible in his concessions to Ireland. Public opinion here, as it is represented by the Press, is in some measure prejudiced, because Austria, in its relations with the Czechs, is in a similar position to England, and this accounts for what I have no doubt is the mistaken belief that very severe measures of repression will be resorted to, and that Mr Gladstone will not pursue to its full extent the policy with regard to the arrears of rent which he has so recently indicated. By many, the suspension of trial by jury is considered a necessity.

On 'Change, the careful reserve of investors has continued during all the week, and even speculators have become more cautious. For this reason no definite tendency can be observed on the Stock Exchange. The price of many securities has fallen slightly, some have remained at the point at which they stood

last week, and a few have risen a trifle. Among the last must be mentioned the Karl-Ludwig Railway, the Southern Railway, be mentioned the Karl-Fludwig Italiway, the Southern Kaliway, and the Staats-bahn. The fact that the shares of the last of these rose 5 florins, notwithstanding the unpopular pro-visional contract with the Hungarian Government, must be considered surprising. The only explanation of the fact is, that the Paris group disposes over 100,000 shares, and that it has done its utmost to raise the price just now, when the fate of the railway is at stake.

There are not many countries in the world where so much importance is attached to a good harvest as in Austria-Hungary, none, in fact, except Russia and the United States. News of the crops are for this reason the great topic of con-versation here. We learn by degrees that the terrible frost and snowfall at Easter did much less harm than could at first and snowian as Easter and inten less narm than could at first have been supposed, and the reports of the growth of the crops are very favourable indeed. The sufferers were early fruit-trees and oilseed. Vines were not hurt much anywhere, and in many districts not at all. The favourable turn in the course of things was brought about by heavy rainfalls, which came in good time. In Roumania, where no rain fell, great anxieties are arising for the corn crop, on account of the extra-ordinary heat and dryness of the weather.

In the course of last week the Austrian Reichsrath debated the revision of the Customs tariff. The addition to the duties on coffee and petroleum, and the imposition of a duty on corn and flour were voted, and a great wrong has thus been done to the poorer classes of the population. The members of the Tyrol managed to have an exception made for the Southern provinces, Dalmatia, Trieste, and Southern Tyrol, which will have no duty to pay on corn and flour. This unexpected amendment was, of course, not included in the arrangement on the subject with Hungary. Negotiations with that part of the Empire must, therefore, commence afresh, and the provisional law, by which the higher duty was enforced immediately, must be prolonged.

Last Wednesday the company of shareholders of the Servian Railway was constituted in Paris. It is to be an exclusively French society, with its seat in Paris. The council of administration is to consist of ten French and six Austro-Hungarian members. The original plan of making it an Austrian society altogether was abandoned.

We learn from Constantinople that the Porte has addressed a circular to its representatives in foreign countries, containing the information that the import of silver coins no longer allowed to circulate in other European countries has been prohibited by Turkey.

In Berlin, a stockjobber has conceived the idea of founding an office, the object of which is stated to be to keep the public informed as to the real value of securities, and to advise as to what securities should be bought and which should be shunned. The founder, however, is intimately connected with stockjobbers and speculators of various kinds, and it is not likely that the public will look upon the information he may give as quite disinterested.

ITALY.

(FROM OUR OWN CORRESPONDENT.)

ROME, May 8.

All the week has been taken up at the Chamber of Deputies by the debate on the Commercial Treaty with France. There is almost no doubt at present that it will be approved. Some resolutions have been proposed in favour of the adoption of surtaxes d'entrepôt, but no vote has yet been taken. The Government has introduced a Bill to prorogue the existing commercial treaties with England, Spain, Germany, Switzer-land, &c. land, &c.

Public attention is again drawn to the question of the re-sumption of specie payments. The firm declarations made by Minister Magliani in his financial statement have increased confidence in the success of the operation. The agio on gold is gradually giving way. In March last it frequently stood at 5 per cent., whereas now it varies between $3\frac{1}{2}$ and $2\frac{1}{2}$ per cent. Mr Ellena, the able Director-General of Customs, has just published an essay, in which he shows how the financial and economical conditions of the country are such as to augur well for the well for the success of the operation. According to the last return, the quantity of bullion paid into the Treasury by the contractors for the loan of 644 million francs is 329,590,514f (or something over 13¹/₆ million pounds sterling), made up as follows:—Gold bars and non-decimal coins 53,911,074f (of which 48,944,250f have already been converted by the Roman Mint into decimal coin); decimal gold coin, 237,901,668f; decimal silver in GET FOR the second decimal coin and nondecimal silver coin, 37,777,780f; the quantity of bars and nondecimal silver coin, 37,777,7801; the quantity of bars and non-decimal coins being only about 18 per cent. of the total quan-tity of gold paid in. As some millions of francs have been brought in during the last few days, there remain yet to be paid about 12,000,000*l*, of which only 6 millions are in gold; so that there is no doubt that the hele sum will be brought so that there is no doubt that the whole sum will be brought

Out of the gold thus brought in, the Government paid last month to the National Bank a debt of 44 million francs, last month to the National Bank a debt of 44 million francs, so that when the loan is completed the gold made available to the Treasury in connection with it for the resumption of specie payments will be 400 million francs. But it is asserted on good authority that Minister Magliani is adding to this gold fund about 150 or 200 million frances of gold, which are paid into the Custom House, so that at the resumption of specie payments there may be in the Treasury at least 550 million frances gold available for the purpose. It is known that the quantity of forced paper currency is at present 940 million frances, of which it is intended that 340 millions should circulate as small State notes, and 600 millions be should circulate as small State notes, and 600 millions be redeemed. Against these the Treasury will then possess about 550 millions of gold, in addition to a certain amount of silver.

Some attempts have been made to calculate the amount of coined gold and silver which will exist in the country at the time of the resumption of specie payments. The following data may, perhaps, be considered as approximative :--

In the Treasury In the banks In the country	Gold. francs. 550,000,000 110,000,000 90,000,000	 5-frane Silver Pieces. francs. 100,000,000 15,000,000 100,000,000	 Fractional Silver Cutrency. francs. 95,000,000 51,000,000 10,000,000
	750.000.000	215.000.000	156.000.000

or a grand total of 1,121 million francs of coin, in addition to 340 millions of State notes, and 750 millions of leg 1 tender banknotes. The Government is at present taking back from France the last instalment of silver fractional currency of about 16 million france, paying for it in 5-franc silver pieces. The amount of 5-franc silver pieces coined by Italy is estimated at 3.0 million francs, of which, it is believed, about 160 or 180 millions will be out of Italy at the time of the resumption of specie payments. There is, besides, in the country a large amount of old silver money coined by past Governments, and which it would be rather difficult to estimate. The Government has lately tried to issue some small quantity of silver pieces of 50 centimes (5d), but they were immediately hoarded for the payment of Custom duties. This would have caused a scarcity of change were it not for the large quantity of heavy copper money.

Banking is making rapid progress in Italy. The situation the Italian banks on the 31st December, 1881, was as follows :-

	Popular Bank«.	Joint- Stock Banks.	Banks of Issue.	'Savings' Banks.
Number of banks	71	113	6	191*
	francs.	francs.	francs.	fr nes.

Depo its and current account	193,100,000	438,400,000	217,600,000	7.:8,900,000
Circulation		***	735,500,000	***
* Wi	35: offices.			

There are, besides, 8 institutions of credit on real property (crédit funcier); 13 institutions of agricultural credit (with a limited business), and numerous postal savings' banks, these last having 65 million francs of deposits.

last having 65 million francs of deposits. The popular banks owe their existence to the perseverant exertions of Mr Luzzatti, M.P.. by whom they have been started on the co operative principle, and who is the president of the association they have formed. They hold an annual congress, which will this year take place at Florence on the 14th inst. They are a great benefit to the middle classes, to small tradesmen, small proprietors, workmen, &c. Their rate of discount is generally from 5 to 8 per cent., the rate being somewhat higher in Southern Italy, where capital and banks are rather scarce, and usury continues to flourish. They are well-managed and sound institutions, and deserve much credit. Some of them have become important institutions in credit. Some of them have become important institutions in their respective towns. Eleven have a paid-up capital not inferior to 1 million france, and first among all is the Popular Bank in Milan, with a paid-up capital of more than 7 million francs, paying over 14 per cent. interest and dividend. The average interest and dividend paid by these banks is from 8 to 10 per cent. yearly.

It is to be regretted that there is at present no definite distinction between real banks and financial companies. Though some large institutions attend only to banking business, many companies existing under the name of banks are at the same time largely interested in, or connected with, railways, mines, building societies, cotton and silk manufactures, &c. Out of the existing 113 non-issuing "banks," 6 have not less than 10 million francs paid-up capital, 5 not less than 5 million francs,

and 25 not less than 1 million. The largest and best-managed companies present the following data:

	Cap	ital.	Value	Average Interest		
Banks.	Nominal.	Paid-up.	Nominal	Amount Paid up.	Average Value on 'Change.	and
	francs.	francs.	francs.	francs.	francs.	%

Banca Veneta, Padua Banks and Financial Cos.				137.50	305	9.20
Banca di Torino, Turin	25.000.000	12.500.000	500	250	770	16
Banca Tiberina, Rome Banca di Credito Italiano,	15,000,000	7,500,000	250	125	300	6.2
Milan	5,600,000	£00,000	500	500		6
Credito Mobiliare, Florence				400	850	10
Ban a Generale, Rome				250	605	9.10

The number and capital of banks is constantly increasing The Banca Generale has lately increased its capital from 25 to 50 million france; and some new large companies are being formed at present, as the Banca Fiorentina at Florence; the Credito Lombardo at Milan. It is said that also at Rome a new Banca Centrale, with 10 million frances capital, is to be formed. The Societa Lowedbillions of multia market at Rome in New in The Societa Immobiliare of public works at Rome is now issuing bonds at 5 per cent. net interest. According to the law on specie resumption, the Government

has determined to promote the institution of Bankers' Clearing-houses in twelve important commercial towns. The Chambers of Commerce at Genoa and Milan have already prepared the necessary regulations, and it is hoped that next June these two Clearing-houses will begin their operations. At Genoa, a plan was adopted which is pretty much the same as the London clear-ing system. On the contrary, at Milan, they intend giving to each tradesman the power of clearing at the Clearing-house person-ally, or through his clerk or banker; but this plan is rather amplicated and it is not to be same how it will work in prestice complicated, and it is yet to be seen how it will work in practice. In both Clearing-houses the *Banca Nazionale* will act as a central and common bank, as the Bank of England in London. A very old Clearing-house exists in Leghand in London. A very old Clearing-house exists in Leghand; tradesmen clear there through twelve cashiers. I have lately seen some regulations relating to it, and dated as far back as 1764, about 11 years before the establishment of the London Clearing-house. In order to promote the institution of Clearing-houses, the Government has introduced into Parliament a Bill for the detain of a constant stam duty of s contine Bill for the adoption of a constant stamp duty of 5 centimes (1d), on each cheque, the stamp laws relating to cheques being (34), on each cheque, the stamp laws relating to cheques being at present very obscure and uncertain, and cheques being some-times taxed with high proportional duties as bills of exchange. But up to the present the use of cheques is very limited, as very few people keep an account at a banker's, though great efforts are made to introduce the English though great efforts are made to introduce the English practice into Italy. The amalgamation of our two largest steam navigation

companies, the Florio and the Rubattino, under the name of Societa di Navigazione Generale Italiana, with a joint capital of 100 million francs, has been authorised by the Government. This company, which has a subvention from the State, trades This company, which has a subvention from the State, trades more especially with Egypt and India. A totally new steam navigation company has been recently authorised under the name of Societa Italians di Trasporti Marittimi, with its seat at Genoa, a capital of 16 million francs, and under the management of Mr Raggio, M.P., a great and influential manufacturer. The company proposes to have 9 large steamers, with a total tonnage of 30,000 tons, which will make regular voyages between Italy and the Plata. Three of these steamers are almost finished in Scotland and it is said they will be the are almost finished in Scotland, and it is said they will be the fastest Italian steamers This company possesses already a dockyard at Sestri, near Genoa, where two new steamers are to be built. At present there are already five companies, the steamers of which run between Genoa and the Plata-F. steamers of which run between Genoa and the Plata-F. Ferrari, with 2 steamers, while 2 are being built in England; Schiaffino, 3 steamers; Du Four and Bruzzo, with 3 steamers, besides 1 in construction at Sampierdarena, near Genoa, and 1 in England; R. Piaggio, 3 steamers; and Lavarello, the best of all, with 4 steamers, and which is paying an average interest and dividend of 11 to 13 per cent. At Bari, a new steam navigation company has been formed under the name of the *Puglia*. They possess 5 large steamers, and have 3 more in construction, making voyages between the Adriatic Sea and the African coast. P. Tassi and Co., of Milan, possess also 4 steamers, and have 1 in construction, trading with England and the Baltic Sea. None of these companies have any State subvention. For a long time past efforts have been made to start at Venice a steam navigation company, but up to the present they have been unsuccessful. It is been made to start at ventee a steam margation company, but up to the present they have been unsuccessful. It is pleasant to see that our steam shipping is increasing; but the decay of sail shipping has been rapid, as it will be seen from the following table :--

ITALIAN SHIPPING.

New manufactures are being established, especially in Northern Italy. At Venice, in addition to the steam cotton mill spoken of in my first letter (with a capital of 10,000,000f). a new company has bought an old and small glass work with the aid of English capital, in order to establish there a large manufacture of bottles and common glass. The Societa Veneta di Costruzioni, one of the best in Italy, have determined to erect in Venice new workshops for the building of railway cars and wagons. Since the Government is working the Alta Italia railways, it has been determined that all railway stock (ex. cept a certain number of locomotives) shall be built in the country. This has led to the establishment of new workshops at Milan, at Savigliano (Piedmont), and at Turin, chiefly with the aid and sometimes on account of Belgian capitalists. The Alta Italia State Railways will soon remove their central workshops at Turin, and erect quite new and large ones, fitted with the most improved tool machinery. At Milan, a company is being formed in order to establish a steam cotton mill. Cotton spinners in Italy are doing a good business, and the shares of the Cotonificio Cantoni, one of the best in the country, are at a good premium. Messrs Figari are erecting a new cotton cloth factory at Varazze, near Genoa, and they have ordered 1,200 power looms at the workshops of Mr Odero, at Sestri, by which, it is said, about 2,000 looms are made every year. At Venice, a joint-stock company is being formed, in order to establish a hemp mill at the Crocetta, near Treviso, where there is a large water power. At Turin, a joint-stock company, with 6,000,000f capital, has been constituted under the name of Societa di Miniere di Rome, for the purpose of working some copper mines in the valley of Aosta. In the same time the Stabilimento Metallurgico at Piombino is increasing its capital from 1,500,000f to 6,000,000f.

Two of our largest banks of issue, the Banco di Napoli and the Banco di Sicolia (which are not joint-stock companies, but rather charity institutions), have lowered the rate of discount from 5 per cent. to 4 per cent. Notwithstanding a warm debate in the Press, the *Banca Nazionale*, the largest of the six banks of issue, has not followed their example, keeping its rate of discount at 5 per cent., on account of the impending resumption of specie payments.

The frosts of last month have somewhat damaged the mulberry trees and the vines, chiefly in Lombardy, in the Emilia, and in Tuscany. This fact has caused a rise in the prices of silk and wine. But the damage was rather exaggerated. Rains and mild weather have very much improved our crops, and up to the present there is every hope that this year will be a rather abundant one. Next July there will be held at Groseto, in the Maremma, an international show and trial of self-binding and reaping machines. Grosseto is surrounded by extensive corn fields, where hand-work is scarce, and such implements would be a real benefit. The Government will buy the machines obtaining the first prizes. A show of hay-making machines, &c., will be opened at Padua on the 1st June. These implements are very little in use in Italy, while the steam-threshing machine of English make has already spread itself all over the country.

The Senate has approved the new Commercial Code and the scrutin de liste, which have become law.

Notices of Books.

A Review of the Position and Prophecies of the Bi-metallists. By Arthur Crump. London: Effingham Wilson, Royal By Arthur Crump. Exchange. 1882.

THE discussion on bi-metallism has now continued for some time. A good deal has been written and spoken on the subject, and many opinions have been freely expressed by those who advocate that the standard in this country should be brought into correspondence with that of the Latin Union and the United States. Mr Crump has formed in this pamphlet a useful résumé of the main events which have taken place in connection with the subject during the last few years, based on an analysis of the proceedings of the Monetary Conference in Paris of 1881. What took place at that Con-ference is certainly not likely to bring this country nearer the adortion of a double standard for the sufficient rescent that Paris adoption of a double standard, for the sufficient reason that no adequate grounds have been shown for the desirability of the change. Mr Crump has written on the subject from the sound basis of the standard now in use among us, and his remarks may be read with advantage by those who desire to study the history of the question.

Clearing-house return	101.388,000	84,262,000	94,914,000	100,982,000	102,539,000

The amount of the "other deposits," compared with the "other securities," showed in 1872, a deficiency of 5,047,859l; in 1879, an excess of 8,526,675l; in 1880, an excess of 6,432,903l; in 1881, an excess of 6,723,407l. In 1882, there is an excess of 2,877,9931.

In 1879, the market was still very quiet, and money was offered in the Stock Exchange from account to account at $1\frac{1}{2}$ per cent. per annum. The Metropolitan Board of Works loan was subscribed for three times over, but a rupee loan offered in Calcutta met with smaller success. The provisions of the Government Banking Bill were being hotly discussed.

In 1880, the Bank reserve lost 650,000*l*, and there was nearly a corresponding increase in the "other securities." The discount houses raised their deposit rates, and Bank rate generally regulated the outside market. The Whitsuntide holidays somewhat interfered with business.

In 1881, people were looking for a reduction in the Bank rate, in which, however, they were disappointed, the London market rate being already below those at other leading centres. Railway securities of all kinds were very buoyant.

The following are the principal items in the accounts of the undermentioned continental and American banks for the latest week published compared with the previous statement :--

[May 13, 1882.

DISCOUNT AND MONEY MARKET .- There has been rather less inquiry for money this week, and the Stock Exchange demands during the half-monthly settlement completed to-day have been small. Hence the market rates are the turn easier, after last week's recovery, and the supply of money has been sufficient generally, at from $2\frac{1}{4}$ up to $2\frac{3}{4}$ per cent. for floating amounts, and at $3\frac{1}{4}$ to $3\frac{1}{2}$ per cent. from account to account. There has, as was expected last week, been some substantial shipments of gold from New York to London, and as in the face of those remittances the sterling exchange has again risen, further considerable amounts are expected to follow, People are talking as though these remittances would, upon arrival, stop here; and as money is easier in the leading European centres, this would probably be the case if all the Italian loan requirements were satisfied. But, as it is, the American gold forms such a suitable means of remittance to Italy, that we shall be surprised if some of it does not go on there. Specu-lations are rife as to the continuance of the drain from America, and, undoubtedly, there must be large stores of the metal in that country to draw upon; but we should not lose sight of the fact that it is the unprecedented cheapness of money in New York at the present time which renders the export probable, and that a revival of inquiry across the Atlantic would soon arrest our supplies. Still, all things considered, the monetary outlook appears unusually settled, and a continuance of existing rates (and $\frac{3}{8}$ per cent. has covered the extreme variations for best three months' paper for nearly two months past) appears most probable under the circumstances.

In the Bank return, we see the completion of the withdrawals of gold coin for Scotland, but it has been accompanied by a return of notes to the Bank, so that the cash reserve is only less to the extent of 34,000*l*. The other deposits are larger, while the public deposits are reduced, but all the variations are upon quite a small scale.

Silver is $\frac{3}{16}$ d per oz weaker—at $52\frac{1}{4}$ d. The India Council on Wednesday placed 28,46,000*l* rupees, out of the 35 lacs offered at the minimum of 1s $8\frac{1}{16}$ d per rupee, which was $\frac{1}{16}$ d lower than last week. Next week only 30 lacs will be offered. Since April 1st, 1,62,81,652 rupees have been sold, realising 1,365,340*l*.

been sold, realising 1,365,340*l*. Already, dating from last Saturday, the shipments of gold from New York for Europe have exceeded 1,000,000*l*, and a large sum is expected to leave to-morrow.

Tenders for 1,000,000*l* Birmingham Corporation $3\frac{1}{2}$ per cent. stock were opened yesterday at the Bank of England. The applications amounted to upwards of 2,000,000*l*, at prices varying from minimum (99*l*) to 102*l* 10s per cent. Tenders at 100*l* 2s received about 55 per cent. of the amount applied for, those above that price being allotted in full. The average price realised was about 100*l* 4s 3d per cent.

The Institute of Bankers notify that at their meeting on Wednesday next a paper will be read by Mr R. W. Barnett on "The National Banks of the United States of America."

The following circular, sent out to the shareholders of the Union Bank of London to-day, records a foregone conclusion :—

2 Prince's street, London, 12th May, 1882. SIE,—I am directed to inform you that a large majority of the proprietors of the bank have intimated their desire that it shall be registered as a Limited Liability Company. The directors will, at the general meeting to be held July next, propose resolutions for effecting such registration on a proper basis.—I am, Sir, your obedient servant, JOHN SEATH, Secretary.

The meeting of the largest joint-stock bank in the United Kingdom—the National Provincial Bank of England—has been held this week, and seeing that the accounts are made up to the 31st December last, it is a mistake that steps are not taken to hold the meeting earlier. All the items of the balance-sheet and profit and loss account must have been available months ago. The meeting was of a congratulatory character. The deposits held increased during the year as much as 1,732,708*l*, raising the total to the vast sum of 30,871,216*l*; and the acceptances also showed addition. The dividend was raised to 20 per cent. on the increased capital, and a substantial balance carried forward. The approaching retirement of Mr Fergusson from the joint management, after so many years of active and successful service, was referred to in fitting terms.

THE ECONOMIST.

We subjoin our usual discount quotations for paper having various periods to run, and a comparison with previous weeks :-

Money continues very cheap in New Y .rk. The National Bank of Belgium has raised its rate of

discount from 4 to $4\frac{1}{2}$ per cent. The exchanges were to-day :-

French short exchange f 25.20 or 1 per mille against us.

	exchange	m 20.44 or				
37 37	1 2		-			

New York exchange in 20.44 or 5 per mille for us. New York exchange \$4.87 at 60 days is } At 3 % interest, short \$4.90 or 6 per mille for us. The Frankfurter Zeitung gives, on the authority of an Italian paper, an estimate of the manner in which the last Italian loan was taken. England is put down for taking 3,500,0001; Germany, 2,000,0001; France, 1,500,0001; Austria, 1,000,0001; America, Australia, Sweden and Norway, Belgium, and Spain, about 1,100,0001 among them. Italy only about 1,200,0001. The main interest of these forumes is in the years amoll portion ascribed to Italy these figures is in the very small portion ascribed to Italy.

The same paper remarks that the statement of the Reichsbank of the 6th inst., while showing an increase in the advances of 55,500*l*, shows the considerable diminution in bills discounted of 904,450*l*. The reserve of notes duty free is 7,759,500*l*. At the corresponding date last year it was 8,285,0007.

The Berlin Borsen Zeitung continues to discuss the silver question, and lays it down as a principle that no arrangement can be made unless England joins. The very considerable offers about the Indian mintage appear overlooked in these remarks. The same paper remarks on our having expressed the opinion that, while it was best for this country to maintain a gold standard, silver might be best for Germany. The habits of a people and the circulation of coins of surrounding countries have a great deal to do with this question. In this country foreign coins are but seldom found in circulation. With Germany, however, the case is different. Coins from Austria, on one hand, Switzerland, France, and Belgium, will always have a tendency to circulate there. The desirability of uniformity with the surrounding countries, quite apart from the question of the principle on which a standard should be fixed, stands on a very different basis in the one country than in the other.

THE STOCK MARKETS. — While the leading departments of the Stock Exchange continue very quiet, and all the quieter because political events have absorbed so much public attention this week, the excitement in special securities has exthemed force with remarkable rapidity.

and the second part of module to	Last Friday		To-d	lay.		ove	ek's ment.
Anglo-American Brush Electric Light, 4 paid Ditto, 101 paid	154	******	271	28	******		121
Il shares	- 4 14	******	1	18		+	1
Hammond Electric Light and Power, 21 paid United Telephone, 51 paid Native Guano, 51 paid.	8		11# 17# 8#	12} 18	******	+++	31 41 21

Only a fortnight ago, Anglo-American Brush shares were 121, and the Hammond shares 41. At the same time, the recent sharp advance in Hudson's Bay shares and Mexican railway stock have more than been maintained. The following list of new companies will show what the rush of electric companies has been during the week, and we understand that many others of the same kind are in course of being hatched. Meanwhile, where there are such a host of patents, and the pickings, according to current report, have been already so large, there is likely to be a large crop of actions for infringement of patent rights. But really, who can tell that twelve months hence there may not be a patent which will eclipse all the electric lights at present before the public. That such remarks will fall upon many deaf ears there can be no doubt. But cautions at such a moment do often reach the investor, and help to confine losses to the speculators who originated the rush. The desire of most subscribers at the present day is undoubtedly to sell out quickly at a profit and subscribe again; but any attempts to sell heavily and deliver shares will certainly cause much of the existing paper profits to be written off. The investor most likely to make money by holding electric shares is he who waits till the rush is over and picks up his shares after the inevitable reaction. Present speculators are most of them bound to sell, sooner or later. Meanwhile, neither Irish nor Egyptian events have adversely affected Consols nor Egyptian stocks; nor is gas property affected by the electric mania; and prices are generally well supported.

Five more electric concerns have been brought forward this week, three being off-shoots of the "Brush" Com-pany. The Inland Steam Navigation Company of Europe, started more especially to take over the steamboat services on certain German rivers, is a company of moderate magnitude; but most of the other undertakings named below, are of small dimensions. The Corinth Canal capital has been subscribed for in Paris largely in excess of the sum required :-

	1,469,000				- 1

The corresponding total in 1881 reached 92,303,0621.

The Dutch Government have announced particulars of a proposed 3 per cent. loan for 83,000,000fl (say 6,900,000l), the proceeds to be applied as follows :- 2,500,0001 to the purchase of the Dutch section of the Antwerp and Rotterdam Railway, 415,0001 for a canal between Amster-

dam and the Merwede, a similar amount for national defence, and 2,500,000l to covering the deficits of the the Dutch East Indies. Probably not much of this loan will come here.

BRITISH GOVERNMENT SECURITIES .- The fall of which occurred in the Three per Cents. on Monday morn-ing was recovered before the close of the day, and yesterday, Consols stood at a rise of $\frac{1}{4}$ on the week. To-day, however, there has been a slight relapse upon the Egyptian news. Indian stocks are firm.

COLONIAL GOVERNMENT DEBENTURES.—Few alterations have occurred, and those of an irregular character. Canadian 4 per Cents., and South Australian 4 per Cents. are about $\frac{1}{2}$ lower, and Western Australian 4 per Cents., 1; while Cape of Good Hope 4 per Cents. have risen $\frac{1}{2}$; and New Zealand 4 per Cents., 1.

FOREIGN GOVERNMENT SECURITIES.—That a virtual revolution in Egypt should cause a rise in Egyptian stocks may appear strange; but the feeling to-day has been that matters have now gone sufficiently far to necessitate Government intervention, which would mean that the bondholders would be amply secured. The "international" dealings in Egyptian stocks have been very large during the last few days. Meanwhile, the detailed returns from the Egyptian Public Debt Office show that on the 1st inst., there was, after covering the services of the Unified Debt, 513,102*l* in hand upon that account, and 42,368*l* on account of the preference stock. For the rest, the changes in foreign stocks have not been large, and business not of an important character.

Messrs Dreyfus Brothers and Co., of Paris, enter a protest against the arrangements between Chili and the Peruvian bondholders. They say that they purchased as far back as 1869 two million tons from the Peruvian Government, payable for in advance (though how much of this guano they received is not stated), and that they shall "claim as belonging to them any guano that should be sold or delivered to third parties by the Chilian Government." We were under the impression that all proceeds of guano sales were publicly and specially hypothecated to the Peruvian bondholders, and such is the only agreement of which there is cognisance in this country.

HOME RAILWAYS. — Strange to say, although the traffic returns have not turned out well (we explained last week why the increase then observable in goods traffic was to some extent artificial), the market values of the ordinary stock have risen in various instances. Metropolitan District has advanced more than 3 per cent., upon a rumour of some arrangements being entered into with the Great Western, which system the District already touch at Ealing, and seek to compete with by various other extensions, for which Bills are now before Parliament. London and North-Western stock has attracted many inquiries. Rhymney stock is quoted 10 up on the week; Taff Vale, 7; Whitby, Redcar, and Middlesbro', $3\frac{1}{2}$; and London, Tilbury, and Southend, 2.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :--

COLONIAL RAILWAYS.—The changes this week are very slight either in Indian or Canadian securities. Grand Trunk stocks are rather weaker, owing to the reported

pushing forward of the Ontario and Quebec line.

AMERICAN RAILROAD SECURITIES. — This department has been remarkably quiet. Wabash shares are 1 higher; Ditto Preference 1 lower. Lake Shore has improved 1; Central Pacific, Ohio and Mississippi, $\frac{1}{2}$; Erie, and Philadelphia and Reading, $\frac{1}{4}$.

FOREIGN RAILWAYS. — Central Argentine Ordinary and Debenture stocks are quoted 1 higher; Dutch Rhenish shares, $\frac{1}{4}$; Great Western of Brazil,2; Mexican, 1; Northern of Buenos Ayres Guaranteed shares, $\frac{1}{4}$; the Deferred, $\frac{1}{2}$; and the Debenture stock, 1; and Varna shares $\frac{1}{4}$. Royal Sardinian shares are $\frac{1}{4}$ down. Of the obligations, Imperial Brazilian Natal have fallen $\frac{1}{2}$; Minas and Rio, $\frac{1}{2}$; and Ottoman Five per Cents., 1; but Varna are about $\frac{3}{4}$ higher.

THE ECONOMIST.

TELEGRAPHS.—Anglo-American Ordinary has given way the Preferred $\frac{1}{2}$, and Western and Brazilian, $\frac{3}{8}$; but Direct Spanish are 1/2 higher, and Direct United States, 1/8. There has been a good deal of speculation in United Telephone, which have risen about $4\frac{1}{4}$ during the week.

INSURANCE.—Marine shares are about $\frac{1}{2}$ higher, while Commercial Union have fallen $\frac{1}{2}$, and North British and Mercantile, 1.

MINES .- British mines have been rather weaker; the principal movement, however, having been a fall of 1 in Van. Of foreign undertakings, Cape Copper have risen 1, and Tharsis 1; but Indian gold mines, and foreign mines generally, are weaker.

WATERWORKS. — Chelsea stock is 1 down; East London, $1\frac{1}{2}$; and Lambeth 2; but West Middlesex New are $\frac{1}{2}$ higher.

CANALS AND DOCKS. - Birminghan Canal Stock is quoted at a rise of 1, but London and St Katharine Docks, and Suez Canal, have each given way 2.

COMMERCIAL, INDUSTRIAL, &C.—The "electric" infatuation does not yet seem to have reached its limit. Anglo-American Brush Light shares, 4l paid, are about 12 higher on the week, while the 10l paid have risen about $23\frac{1}{2}$; Electric Light and Power Generator shares are $\frac{1}{4}$ up, and Hammond Electric Light, $3\frac{1}{4}$; Brighton Aquarium, $\frac{1}{2}$; Crystal Palace Preference, 1; India-rubber Gutta-percha, $\frac{1}{2}$; Native Guano, $2\frac{1}{2}$, and Rio City Improvements, $\frac{1}{2}$; while Royal Aquarium shares are $\frac{1}{4}$ down.

CORPORATION STOCKS .- Nottingham stock is about 1/2 weaker.

FINANCIAL LAND AND INVESTMENT.—American Invest-ment Trust shows a rise of 1; Foreign and Colonial Trust, 1; Hudson's Bay, $\frac{3}{4}$; Imperial Credit, $\frac{1}{4}$; Natal Land, $\frac{1}{4}$; Railway Debenture Trust Debentures, 1; and Van Diemen's Land, 2. Australian Agricultural are down 1,

and Australian Mortgage Land, &c., $\frac{1}{4}$. GAS.—British shares are 1 higher, Cagliari, $\frac{1}{2}$; Commercial New Stock, $1\frac{1}{2}$; and South Metropolitan A, 1. But Gas Light and Coke A is 1 lower, and London 1.

IRON AND COAL.-Ebbw Vale have declined 1/4.

SHIPPING.—Cunard Steam are $\frac{1}{4}$ down.

TRAMWAYS AND OMNIBUS. — Belfast, Hull, London Street, and Nottingham are all $\frac{1}{4}$ higher; but London General Omnibus has fallen 5, and Vienna Omnibus $\frac{1}{2}$. BULLION.—The following is taken from the circular of Messrs Pixley and Abell, dated May 11th :— Gold.—The demand for gold during the week has not been so large, and consequently only 62,000l has been withdrawn from the Bank: this amount which consisted of Dutch gold coin, has been

Bank; this amount, which consisted of Dutch gold coin, has been sent to Holland. The Peninsular and Oriental steamer has also taken 56,900l to India. 35,000l in sovereigns have been sent into the Benk. The consisted have been small comprising only 14,000l the Bank. The arrivals have been small, comprising only 14,000/ from Melbourne, and 30,000/ from Lisbon. The shipments from New York have recommenced, and there is now 890,000l afloat for

New York have recommenced, and there is a rise in price, this country. Silver.—A demand on Spanish account caused a rise in price, and bars rose to 521d per oz; the order being for the time completed, a relapse has taken place, and the rate may now be quoted as 521d per oz. We have received 29,170l from the River Plate, and 18,000 from the Pacific. The Peninsular and Oriental steamers have taken 57,000l to India, and the same Company's steamers, Tanjore and Cathay, have taken 152,000l from Trieste and Venice to Bombay.

Mexican Dollars .- A few transactions have taken place, and as there have been no arrivals of any importance, the price has improved to 514d per oz.

improved to 514d per oz. Exchange on India for Banks' drafts at 60 days' sight is $18 \, 3_{16}^{+}d$ per rupee. 30 lakhs of rupees of India Council bills were offered yesterday at the Bank of England, with the following results:— On Calcutta, rs 10,25,000, average rate, 1s 8062d; Bombay, rs 18,00,000, average rate, 1s 8062d; Madras, rs 21,000, average rate, Is 8062d. Tenders at the official minimum of 1s $8_{16}^{+}d$ per rupee receive in full. 30 lakhs of rupees of these bills will be offered on the 17th inst. The latest quotations of exchange from the East are, for telegraphic transfers from Bombay and Calcutta, 1s $8_{16}^{+}d$ to $18 \, 8_{16}^{+}d$ per rupee; for Bank bills at 4 months' sight from Hong Kong, 3s $9_{16}^{+}d$ per dollar; and from Shanghai, 5s $3_{16}^{+}d$ per cent. 84_{16}^{+} to 85_{16}^{+} . NOTICES AND REPORTS.

STOCKS.

Argentine 9 per Cent. Treasury Bonds.—Bondholders are invited to attend a meeting called by the Bondholders' Committee, at the Council House, Moorgate street, on 16th inst., at two, to consider their position, and to authorise an agent to negotiate on their behalf with the Government of the Argentine Confederation. Egyptian Finance.—The Council of Foreign Bondholders have received the numbers of 256 bonds of the Daira Sanieh Debt, representing a nominal value of 30,000l sterling, purchased and cancelled by the Council of Direction on April 25, 1882. Japanese 9 per Cent. Customs Loan.—The numbers are pub-lished of the bonds outstanding, amounting to 100,000l, which have been drawn for payment on 1st August next. RAILWAY COMPANIES. Halesowen.—The line has been inspected by Colon el Bich, E.E., Argentine 9 per Cent. Treasury Bonds .- Bondholders are invited

Halesowen.—The line has been inspected by Colonel Rich, R.E., on behalf of the Board of Trade, and approved by him. Varna.—The delegate recently sent to Sophia with the sanction of the Bondholders' Committee. reports that he has been cordially

or the Bondholder's Committee. Reports that he has been cornally received by all the Bulgarian authorities. They entertain favour-ably the scheme which he has proposed for the purchase of the railway by the State, and have appointed a special commission to consider the same. West Flanders.—The company have declared a dividend at the rate of 9s 1d per share for the half-year, and at the rate of 5s 6d on the preference chares.

on the preference shares.

BANKS.

on the preference shares. BANKS. Bank of Constantinople.—At the general meeting held at Con-stantinople on the 29th ult, the payment of the dividend Coupon No. 10 was fixed at 16f, or 12s 10d, payable on the 10th inst. London Chartered Bank of Australia.—A dividend is recom-mended at the rate of 6 per cent. per annum; 5,000l is transferred to reserve (raising it to 85,000l), and 7.898l carried forward. National Provincial Bank of England.—The report for 1881 states that, including 37,651l brought forward, the net profits for the year amounted to 441,539l. Out of this, a dividend of 8 per cent. and a bonus of 5 per cent. have been already distributed, and it is now proposed to pay a further bonus of 7 per cent., making a total for the year of 20 per cent. The balance carried forward is 39,351l, and exclusive of this, the reserve stands at 1,278,750l. Oriental.—The directors have appointed Mr Alexander William Anderson, late chief inspector, as chief manager, in the place of Mr W. M. Anderson, deceased. ASSURANCE COMPANIES. British Equitable Assurance.—The new business of the year ended 31st January consisted of 2,112 policies, assuring 402,947l, and yielding a new annual premium of 12,064l. The amount

COLONIAL GOVERNMENT DEBENTURES. - Few alterations have occurred, and those of an irregular character. Canadian 4 per Cents., and South Australian 4 per Cents. are about $\frac{1}{2}$ lower, and Western Australian 4 per Cents., 1; while Cape of Good Hope 4 per Cents. have risen $\frac{1}{2}$; and New Zealand 4 per Cents., 1.

FOREIGN GOVERNMENT SECURITIES .- That a virtual revolution in Egypt should cause a rise in Egyptian stocks may appear strange; but the feeling to-day has been that matters have now gone sufficiently far to necessitate Government intervention, which would mean that the bondholders would be amply secured. The "international" dealings in Egyptian stocks have been very large during the last few days. Meanwhile, the detailed returns from the Egyptian Public Debt Office show that on the 1st inst., there was, after covering the services of the Unified Debt, 513,1021 in hand upon that account, and 42,3681 on account of the preference stock. For the rest, the changes in foreign stocks have not been large, and business not of an important character.

Messrs Dreyfus Brothers and Co., of Paris, enter a protest against the arrangements between Chili and the Peruvian bondholders. They say that they purchased as far back as 1869 two million tons from the Peruvian Government, payable for in advance (though how much of this guano they received is not stated), and that they shall "claim as belonging to them any guano that should be sold or delivered to third parties by the Chilian Govern-ment." We were under the impression that all proceeds of guano sales were publicly and specially hypothecated to the Peruvian bondholders, and such is the only agreement of which there is cognisance in this country.

HOME RAILWAYS. - Strange to say, although the traffic returns have not turned out well (we explained last week why the increase then observable in goods traffic was to some extent artificial), the market values of the ordinary stock have risen in various instances. Metropolitan District has advanced more than 3 per cent., upon a rumour of some arrangements being entered into with the Great Western, which system the District already touch at Ealing, and seek to compete with by various other extensions, for which Bills are now before Parliament. London and North-Western stock has attracted many inquiries. Rhymney stock is quoted 10 up on the week; Taff Vale, 7; Whitby, Redcar, and Middlesbro', $3\frac{1}{2}$; and Lon-don, Tilbury, and Southend, 2.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :--

AMERICAN RAILROAD SECURITIES. - This department has been remarkably quiet. Wabash shares are 1 higher; Ditto Preference 1 lower. Lake Shore has improved 1; Central Pacific, Ohio and Mississippi, $\frac{1}{2}$; Erie, and Philadelphia and Reading, 14.

FOREIGN RAILWAYS. - Central Argentine Ordinary and Debenture stocks are quoted 1 higher; Dutch Rhenish shares, 1/4; Great Western of Brazil, 2; Mexican, 1; Northern of Buenos Ayres Guaranteed shares, $\frac{1}{4}$; the Deferred, $\frac{1}{2}$; and the Debenture stock, 1; and Varna shares $\frac{1}{4}$. Royal Sardinian shares are $\frac{1}{4}$ down. Of the obligations, Imperial Brazilian Natal have fallen $\frac{1}{2}$; Minas and Rio, $\frac{1}{2}$; and Ottoman Five per Cents., 1; but Varna are about $\frac{3}{4}$ higher.

THE ECONOMIST.

TELEGRAPHS.—Anglo-American Ordinary has given way $\frac{1}{2}$, the Preferred $\frac{1}{2}$, and Western and Brazilian, $\frac{3}{8}$; but Direct Spanish are $\frac{1}{2}$ higher, and Direct United States, $\frac{1}{8}$. There has been a good deal of speculation in United Telephone, which have risen about $4\frac{1}{4}$ during the week.

INSURANCE.—Marine shares are about $\frac{1}{2}$ higher, while Commercial Union have fallen $\frac{1}{2}$, and North British and Mercantile, 1.

MINES .- British mines have been rather weaker; the principal movement, however, having been a fall of 1 in Van. Of foreign undertakings, Cape Copper have risen 1, and Tharsis 1; but Indian gold mines, and foreign mines generally, are weaker.

WATERWORKS. — Chelsea stock is 1 down; East London, $1\frac{1}{2}$; and Lambeth 2; but West Middlesex New are 1/2 higher.

CANALS AND DOCKS .- Birminghan Canal Stock is quoted at a rise of 1, but London and St Katharine Docks, and Suez Canal, have each given way 2.

COMMERCIAL, INDUSTRIAL, &C .- The "electric" infatuation does not yet seem to have reached its limit. Anglo-American Brush Light shares, 4l paid, are about 12 higher on the week, while the 10*l* paid have risen about $23\frac{1}{2}$; Electric Light and Power Generator shares are $\frac{1}{4}$ up, and Hammond Electric Light, $3\frac{1}{4}$; Brighton Aquarium, $\frac{1}{2}$; Crystal Palace Preference, 1; India-rubber Gutta-percha, $\frac{1}{2}$; Native Guano, $2\frac{1}{2}$, and Rio City Improvements, $\frac{1}{2}$; while Royal Aquarium shares are $\frac{1}{4}$ down.

CORPORATION STOCKS.—Nottingham stock is about $\frac{1}{2}$ weaker.

FINANCIAL LAND AND INVESTMENT.-American Investment Trust shows a rise of 1; Foreign and Colonial Trust, 1; Hudson's Bay, $\frac{3}{4}$; Imperial Credit, $\frac{1}{4}$; Natal Land, $\frac{1}{4}$; Railway Debenture Trust Debentures, 1; and Van Diemen's Land, 2. Australian Agricultural are down 1,

and Australian Mortgage Land, &c., $\frac{1}{4}$. GAS.—British shares are 1 higher, Cagliari, $\frac{1}{2}$; Commercial New Stock, $1\frac{1}{2}$; and South Metropolitan A, 1. But Gas Light and Coke A is 1 lower, and London 1.

IRON AND COAL.-Ebbw Vale have declined 1/4.

Shipping.—Cunard Steam are $\frac{1}{4}$ down.

TRAMWAYS AND OMNIBUS. — Belfast, Hull, London Street, and Nottingham are all $\frac{1}{4}$ higher; but London General Omnibus has fallen 5, and Vienna Omnibus $\frac{1}{2}$. BULLION.—The following is taken from the circular of Messrs Pixley and Abell, dated May 11th :— Gold.—The demand for gold during the week has not been so large, and consequently only 62,0001 has been withdrawn from the Bank: this amount which consisted of Dutch gold coin, has been

Bank; this amount, which consisted of Dutch gold coin, has been sent to Holland. The Peninsular and Oriental steamer has also taken 56,900l to India. 35,000l in sovereigns have been sent into the Bank. The arrivals have been small, comprising only 14,000l from Melbourne, and 30,000l from Lisbon. The shipments from New York have recommenced, and there is now 890,000l afloat for this country.

New York have recommenced, and there this country. Silver.—A demand on Spanish account caused a rise in price, and bars rose to 52¼d per oz; the order being for the time completed, a relapse has taken place, and the rate may now be quoted as 52¼d per oz. We have received 29,170l from the River Plate, and 18,000 from the Pacific. The Peninsular and Oriental steamers have taken 57,000l to India, and the same Company's steamers, Tanjore and Cathay, have taken 152,000l from Trieste and Venice to Bombay.

Mexican Dollars .- A few transactions have taken place, and as there have been no arrivals of any importance, the price has

there have been no arrivals of any importance, the price has improved to 51¼d per oz. Exchange on India for Banks' drafts at 60 days' sight is 18 $8\frac{1}{16}$ d per rupee. 30 lakhs of rupees of India Council bills were offered yesterday at the Bank of England, with the following results:— On Calcutta, rs 10,25,000, average rate, 18 8062d; Bombay, rs 18,00,000, average rate, 18 8062d; Madras, rs 21,000, average rate, 18 8062d. Tenders at the official minimum of 18 $8\frac{1}{16}$ d per rupee receive in full. 30 lakhs of rupees of these bills will be offered on the 17th inst. The latest quotations of exchange from the East are, for telegraphic transfers from Bombay and Calcutta, 18 8¼d to 18 $8\frac{1}{16}$ d per rupee; for Bank bills at 4 months' sight from Hong Kong, 38 9§d per dollar; and from Shanghai, 58 3¼d per tael. The 4½ per cent. Rupee Paper is $91\frac{5}{16}$ to $91\frac{7}{16}$, and the 4 per cent. 84§ to 85§. Quotations for Bullion.—Gold—Bar gold, fine, 77s 10¼d to

Halesowen.—The line has been inspected by Colon el Bich, R.E.,

Halesowen.-The line has been inspected by Colonel Rich, R.E., on behalf of the Board of Trade, and approved by him.

Varna.—The delegate recently sent to Sophia with the sanction of the Bondholders' Committee. reports that he has been cordially received by all the Bulgarian authorities. They entertain favour-ably the scheme which he has proposed for the purchase of the railway by the State, and have appointed a special commission to consider the sume

consider the same. West Flanders.—The company have declared a dividend at the rate of 9s 1d per share for the half-year, and at the rate of 5s 6d on the preference shares.

BANKS.

on the preference shares. BANKS. Bank of Constantinople.—At the general meeting held at Con-stantinople on the 29th ult., the payment of the dividend Coupon No. 10 was fixed at 16f, or 12s 10d, payable on the 10th inst. London Chartered Bank of Australia.—A dividend is recom-mended at the rate of 6 per cent. per annum; 5,000l is transferred to reserve (raising it to 85,000l), and 7,898l carried forward. National Provincial Bank of England.—The report for 1881 states that, including 37,651l brought forward, the net profits for the year amounted to 441,539l. Out of this, a dividend of 8 per cent. and a bonus of 5 per cent. have been already distributed, and it is now proposed to pay a further bonus of 7 per cent., making a total for the year of 20 per cent. The balance carried forward is 39,351l, and exclusive of this, the reserve stands at 1,278,750l. Oriental.—The directors have appointed Mr Alexander William Anderson, late chief inspector, as chief manager, in the place of Mr W. M. Anderson, deceased. ASSURANCE COMPANIES. British Equitable Assurance.—The new business of the year ended 31st January consisted of 2,112 policies, assuring 402,947l, and yielding a new annual premium of 12,064l. The amount

paid for death and matured claims and bonuses in the year was 71,7021.

71,7021. Guardian Fire and Life Assurance.—The directors recommend a dividend and bonus of 11 15s per share, making, with the interim dividend paid in January, 31 for the year. Law Fire.—At the meeting, a dividend was declared at the rate of 33 per cent. per annum. The sum insured in the year shows an increase over 1880 of 2,000,0001, while the premiums received have increased 4,1121, the losses paid exhibit a decrease of 3,4351, the excess of receipts over expenditure for the year being 50,6731. 50.673l.

50,6731. MISCELLANEOUS COMPANIES. Alyn Bank Coal and Cannel, Limited.—Mr R. C. Millar, of 32 India street, Edinburgh, has been appointed official liquidator. Brighton Aquarium.—Ata meeting, Messrs McMillan and Stevens and the Hon. Howe Browne ceased to be directors, and a new

and the Hon. Howe Browne ceased to be directors, and a new board was constituted, consisting of Messrs Cox and Savage (two of the original directors), and Messrs A. K. George, James Deben-ham, Thomas Kimber, J. L. Brigden, and Capt. Braithwaite. *East and West India Dock.*—The company's Bill for the con-struction of deep water docks at Tilbury, which passed the Com-mittee of the House of Commons some weeks ago, has now passed the House of Lords Committee. It is stated that the works will

now be proceeded with as rapidly as possible. Land Development Association.—A dividend has been declared at the rate of 12 per cent. per annum.

Liebig's Extract of Meat.—The directors propose a dividend of $7\frac{1}{2}$ per cent., being, together with the interim dividend of $2\frac{1}{2}$ per cent. paid in February, equal to 10 per cent. per annum, or the same as last year.

London Platino Brazilian Telegraph.—The net revenue is 17,1304. The directors have transferred 1,0001 from reserve fund, 17,130%. The directors have transferred 1,000% from reserve fund, making an available balance of 18,130%. The interim dividend of 2s 6d per share absorbed 4,793%, and the directors propose a final dividend of 3s per share and carry forward 7,854%, pending the collection of the debt due from the Government of Uruguay. The reserve, after the above reduction, stands at 6,714%. Of Manufacturing, Limited — Creditors must send their

Oil Varnish Manufacturing, Limited.—Creditors must send their claims by 24th inst. to Mr P. H. Baily, of 115 Cannon street, the official liquidator.

official liquidator. Union Steamship of New Zealand.—The net profit for the half-year amounted to 14,905*l*. The directors have declared an interim dividend at the rate of 8 per cent. per annum. Western and Brazilian Telegraph.—The company notify that, with the repair of the northern section of their cables in Brazil, telegraph communication is now re-established with Ceara,

Maranham, and Para. Whitehaven Iron Mines, Limited.—Vice-Chancellor Sir James Bacon has appointed Mr Tilley, of 37 Queen Victoria street, official liquidator, and also receiver on behalf of the debenture-holders in the same company.

MINING COMPANIES.

MINING COMPANIES. Mason and Barry.—The net profit on the year's working amounted to 278,183l, which added to the balance, 7,814l, brought forward from 1880, made together 285,998l, which has been appropriated by the directors as under:—Interim dividend paid August, 1881, 92,582l; credited to goodwill and leases sinking-fund, 20,000l; added to rest account, 20,000l; balance unappro-priated, 153,416l. The directors recommend a dividend of 15s per share, making a total for the year of 25s per share, leaving a balance of 14,543l to be carried forward. The amount at which the goodwill and leases are valued in the general balance-sheet was fixed by the general meeting at 1,175,820l; this amount has already been reduced by premiums received on shares, 245,310l, leaving the amount 930,510l. NEW COMPANIES AND CAPITAL.

NEW COMPANIES AND CAPITAL.

Australasian Electric Light, Power, and Storage, Limited.—Capi-tal, 255,000l, in 50,000 5l shares, and 1,000 founders' shares of the Ital, 255,0007, in 50,000 St shares, and 1,000 founders' shares of the same amount. First issue, 30,000 shares, and the founders' shares, the latter, together with 6,000 ordinary shares fully paid, being taken by the vendors, leaving 24,000 shares to be now offered. The company has been formed to acquire the right to the Brush patents in the Australian colonies, including Tasmania, New Zealand, and Fiji.

Debentures.-For the 500,000 debentures, it is understood that nine tenders only were sent in, at prices ranging from 99*l* 5s to 100*l* 1s per cent., the minimum having been fixed at par. The total amount applied for did not exceed 195,000*l*, and, of these, about 60,000*l* was below the

did not exceed 195,000*l*, and, of these, about 60,000*l* was below the minimum, so that the total allotted was under 140,000*l*. *Provincial (Brush) Electric Light and Power, Limited.*—Capital, 200,000*l*, in 5*l* shares. The company is formed to supply by the "Brush" system electricity for lighting, &c., in the counties of Hertford, Bedford, Cambridge, Buckingham, Huntingdon, Norfolk, Suffolk, and Rutland. The consideration is 30,000*l*, of which 25,000*l* is to be paid to the Anglo-American Brush Electric Light Corporation.

Scarborough and Whitby Railway.—Applications are invited for 112,660l, being the balance of the C preference shares, at par. The shares are of 10l each.

United States Rolling Stock-6 per Cent. Debentures .-The company will receive applications for 200,000*l* at the price of 103, and in sums of 50*l* and 100*l* each, repayable 1st January, 1893. It is mentioned that, while the interest on these debentures will amount to 12,000l per annum, the company's average net profits for the last five years have been 62,000l per annum.

The Commercial Times.

THE CORN TRADE.

MARK LANE, FRIDAY EVENING.

The weather has continued favourable for agriculture, which The weather has continued favourable for agriculture, which has made steady progress during the week. As always is the case, the crops have done better on some lands than on others; but, on the whole, they have so far done well—the wheat crop especially so. The recent low temperature slackened progress a little; but, according to reports from most quarters, it has not by any means done harm—rather the reverse. On the Continent, matters appear much in the same condition. The experience of the past year, however, has exemplified but too forcibly how dangerous it is at all times to rely too much upon agricultural progress. however, has exemplified but too forcibly how dangerous it is at all times to rely too much upon agricultural prospects, more parti-cularly in this country. Nevertheless, the weather and the condition of the crops must have an important legitimate influence upon the trade, and this has, during the week just closed, been per-ceptible in the more quiet bearing of the markets in many of the principal districts. The hardening of prices is checked, and any further advance is only noticeable in a few exceptions. There is not, however, any appreciable reaction, and for the moment the most general state of the wheat trade is very quiet, with prices not, nowever, any appreciable reaction, and for the moment are most general state of the wheat trade is very quiet, with prices about stationary. English wheats are delivered more sparingly, yet rather in excess of last year, and much larger than in the year preceding. Of foreign, the imports of wheat and flour into the Kingdom last week were 245,780 quarters, the exports 6,650 quarters, and the estimated fresh supplies of English and foreign available for consumption, 392,630 quarters. On the whole, quarters, and the estimated fresh supplies of English and foreign available for consumption, 392,630 quarters. On the whole, therefore, the markets were not burdened with any great weight of supply. The supplies estimated as due to arrive in the ensuing week are equally moderate. The quantity of wheat and flour on passage, 2,687,000 qrs, shows a slight decrease on the week, but is 480,000 qrs larger than at this time last year. New York outfact 480,000 qrs larger than at this time last year. New York quota-tions have declined 6d to 1s; but most of the continental markets show no appreciable change in spot values. At Mark lane, East

THE ECONOMIST.

Indian wheats have been firmest. These wheats have lately come much into favour ; and we notice for the first time that a direct Indian wheats have been indices. These wheats have lately come much into favour; and we notice for the first time that a direct shipment from India has arrived at Hamburg, and been sent thence to Berlin. Coast cargoes generally have been firm. No. 1 Californian sold at 51s 6d, Azima at 40s 6d to 41s 7¹/₂d. Nicolaieff Ghirka at 37s to 44s 3d; and to-day 45s reported bid. For arrival cargoes the demand has been slack but with a steady tone. No 1 Californian sold at 50s 9d; Polish Odessa at 47s 6d; American red winter at 51s; and Calcutta at 43s to 43s 9d. The American visible supply has decreased 300,000 bushels. Flour has sold at steady value, but not very readily. Maize imports are light, and the spot markets quiet. Forward the market closed rather dearer, several cargoes selling. Foxanian at 31s 3d, June-July shipment, and Danubian, on passage, at 30s 1¹/₂d. The quantity on the way has increased slightly, and the American visible supply by about 400,000 bushels. Barley has been dull on the spot, and closes weaker forward, the last sales being at 21s 6d for Odessa, May-June shipments, and 21s for Danubian on passage. The quantity on the way is 126,000 qrs, against 140,000 qrs last year. Beans and peas show steady value. Oats have met a dull sale. The following table estimates the home consumption of wheat

IRON AND COAL TRADES.

There is little change to report in the markets for pig iron, which remain in a state of suspense; buyers holding back, in the expectation that with the present large make prices will drop still lower, while holders, waiting to see how the demand moves, are not disposed to concede any reduction. At Glasgow, business has been very restricted, and prices have altered little, the quotation yes-terday being 475 1d as compared with 475 4d on the previous Friday.

not disposed to concede any reduction. At Glasgow, business has been very restricted, and prices have altered little, the quotation yes-terday being 47s 1d as compared with 47s 4d on the previous Friday. Our Middlesbro' correspondent telegraphs that the market there is without change. Very little business is being transacted, the nominal quotations for prompt No. 3 being 42s 10½d, makers, 43s 6d. There is no demand for forward delivery. The pig-iron trade of Durham, *Iron* states, has been dull, but makers continue to ask 43s 6d for No. 3. The crude iron business at Newcastle has been very slight this week. Cleveland No. 3 brings 45s, and No. 4 forge, 44s per ton delivered in the Tyne. The pig-iron market of Lancashire continues very depressed, but prices have been practically unchanged during the week. There is still a steady demand for pig-iron in North Staffordshire and Derbyshire, and inquiry has improved in East Worcestershire. The hematite iron market as been unchanged in tone this week, except, perhaps, a further decline in prices. In West Cumberland 53s is quoted for mixed numbers, and in North Lancashire the value of all classes is about 6d lower, rates being given at 54s for No. 1 Bessemer, 53s for No. 2, and 52s for No. 3, net, f.o.b., west coast ports. Best descriptions of Forest of Dean pig are quoted a shade under 60s, being a reduction, since the beginning of the year, of 20s per ton. The manufactured iron trade is much unsettled by the strike of ironworkers in the North, but there are no alterations in prices to record, the home consumption keeping up tolerably well, and a steady stream of orders coming in. On the whole, it may be said that there is less weakness in the finished iron market than there was a few weeks ago. The tin-plate market has slightly improved, and prices are 3d per box better at Liverpool. The industries of Birmingham are stated to be steadily improving. Hardwares, however, have a downward tendency. The Bessemer steel trade of Sheffield is

unsettled, especially for lower class qualities, but best brands are well inquired for. The composite armour-plate department is busy. Generally speaking, the steel trade of the country is languid, especially as regards rails, the average price of which has gone down to 51 los and 51 7s 6d. Steel plates, however, are pretty firm, on account of the very fair demand for them for shipbuilding purposes. Shipbuilding is still actively carried on, but fewer fresh orders are coming in. In fact, it may be said that a feeling of disappointment is beginning to make itself felt. Engine manufacturers are busy on almost every description of work. Ironfounders are tolerably well off for orders. The English coal market is, on the whole, steady, the only really dull branch being that of households. Manufacturing coals are also quieter: The steam coal trade is improving. The steam coal trade is improving.

585

THE COTTON TRADE.

LIVERPOOL.—MAY 11. Cotton has been in good demand throughout the week, at slightly easier rates at the commencement, but, with an active business latterly, the quotations of last week are generally firmly maintained. Sea Island has been in moderate demand, at steady maintrined. Sea Island has been in moderate demand, at steady prices. American continues in fair request, with rather a harden-ing tendency in the better grades. In Brazilian a large business has been done at last week's rates. Egyptian has been in exten-sive demand, and prices have advanced fully id per lb. Peruvian continues in moderate request, without change in value. For East Indian the demand has been active. Early in the week

East Indian the demand has been active. Early in the week prices were somewhat irregular, and quotations partially reduced $\frac{1}{10}$ d per lb. At the close there is a firmer tone, and to-day's revised quotations are well supported. "Futures."—American: The market is firmer, and prices are generally $\frac{3}{64}$ d per lb higher. In East Indian a considerable business has been done, and prices of most descriptions are $\frac{1}{10}$ d per lb higher. The latest transactions are—Deliveries : American, any port line. Max-June 641d, June July 6444. July August per lb higher. The latest transactions are — Deliveries: American, any port, l.m.e., May-June, $6\frac{4}{64}d$; June-July, $6\frac{4}{2}d$; July-August, $6\frac{4}{54}d$; August - September, $6\frac{2}{64}d$; September - October, $6\frac{4}{54}d$; October-November, $6\frac{2}{64}d$. Shipments : East Indian, M.G. Broach, g.g.c., April-May, Cape, $6\frac{9}{54}d$; March-April, Suez, $6\frac{3}{54}d$ - Dhollerah, g.g.c., April-May, Cape, $5\frac{1}{16}d$ - Oomrawuttee, g.f.g.f.c., March-April, Suez, $5\frac{1}{16}d$ per lb. The sales of the week amount to 75,200 bales, of which 3,740 are an expecution and 12 050 declared for expect.

are on speculation, and 12,950 declared for export. The for-warded is 13,310 bales, of which 7,820 are American, 1,950 Brazil, 430 Egyptian, and 3,110 bales Surat, which make the takings are

of the trade 71,820 bales. 12TH MAX. — The sales to-day will probably amount to about 12,000 bales, with a steady market. Saturday, the 27th, Monday, the 29th (Bank Holiday), and Tuesday, the 30th May, will be close holidays in the Cotton Market Market.

THE ECONOMIST.

[May 13, 1882.

1		Dales.
l,	A degreese of actual exports of	4,280
	A decrease of actual exports of	122,830
ľ	An increase in stock of other kinds of	194,401
H	A net increase in stock of	11,630

In speculation there is an increase of 9,890 bales. The imports this week have amounted to 78,748 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to date) is 183,000 bales, against 147,000 bales at the corresponding period last year. The actual exports have been 11,073 bales this week.

LONDON.-MAY 11.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :--

The tone of the market on the spot has been firm, with a fair amount of business transacted, but arrivals have been neglected, and are generally unchanged, American futures closing at about 16d advance.

MANCHESTER, MAY 11.

The continued strength of cotton prevents any giving way in prices, although no material increase of business has resulted. In yarns, 40's mule twist for Calcutta has been in principal demand, yarns, 40's mule twist for Calcutta has been in principal demand, in other quarters sales have been unimportant. Manufacturing yarss have again moved slowly, and the paucity of the cloth trade holds out no inducement for producers entering into any specu-lative engagements. Goods for home-trade purposes have sold more freely, and some of the smaller foreign markets also have operated to a moderate extent. For the East goods continue in small request. Offers have not been wanting generally, however, at quotations which sellers have found quite impracticable. To-day, buyers can scarcely do so well as on Tuesday, either in yarns or goods. Some business is in progress for India, but not for China or Japan. yarns or goods. Son for China or Japan.

THE WOOL TRADE.

The trade in English wools is very quiet. The business doing is more limited than during the last few weeks, and prices are in the buyers' favour.

Our Liverpool correspondents write :- The tone of our market Our Liverpool correspondents write:—Ine tone of our market may be said to show some slight improvement, but the business is still very restricted, and with the heavy supplies of East India wools for the auctions next week, probably rather less than March currency will then be established for these. Alpaca and mohair continue in favour, and excellent prices were made at an auction for some quantity of slightly damaged by fire and water, besides a few lots sound, sold by private contract. Our Bradford correspondent writes :—The past week has not

few lots sound, sold by private contract. Our Bradford correspondent writes :—The past week has not been marked by any retrograde tendency, and, indeed, if anything, business has been rather more cheerful than in the preceding week. But it is disappointing that there is no forward movement. Holders of wool both here and in the country, but especially in

the country, appear convinced that prices cannot further recede, but will most likely soon feel a stimulus from increased business.

JUTE, HEMP, AND FLAX TRADES.

The market for Manila hemp has advanced about 1*l* since last Friday, the statistical position being strong. Sales for arrival at 47*l* to 47*l* 10s, according to date of shipment, with some brown at 45*l*. The latest business on the spot included 1,000 bales at 45*l* to 45*l* 10s per ton for fair roping, but holders now demand higher rates. Consumers are barely supplied. The telegram advises the receipts for the week ending the 6th instant at 8,000 bales bales.

bales. There has not been any new feature to notice in jute. About 5,000 bales of the present season's crop sold to arrive, the latest trans-actions including H 1/3, May-June, per steamer, at 131 100 c. f. and i., Dundee. Prices of manufactured goods remain low, but there has been some increase of demand. By telegram from Calcutta, first marks quoted 131 5s to 131 10s; new crop, 151 to 151 5s to Dundee: steamers 15s per ton more. Freights, 55s to 60s 151 5s, to Dundee; steamers 15s per ton more. Freights, 55s to 60s per ton. To-day, 1,000 bales Gohox, June-July, sold for Dundee, via Cape, at 13/ 2s 6d, c. f. and i., being lower.

COLONIAL AND FOREIGN PRODUCE MARKETS. FOR REPORT OF THIS DAY'S MARKET SEE "POSTSCRIPT." MINCING LANE, FRIDAY. SUGAR.—The position of this market has not changed, the tone

SUGAR.—The position of this market has not changed, the tone being rather quiet. Importers of West Indian accepting 3d to 6d lower rates, the refiners have taken moderate supplies. There are a good many cargoes off the coast, but several of these have sold for ports in the United Kingdom. Low brown kinds remain firm in the absence of speculation. The Board of Trade Returns show an excess upon the imports into this kingdom to the end of April, amounting to nearly 43,000 tons, and the esti-mated stock in the four chief ports by latest return was 47,000 tons larger than last year. The business in West India to yesterday, including the parcels by auction, was 1,655 casks, about 4,500 barrels and bags. Refining kinds, 20s to 22s 6d; crystallised, 26s to 29s, one lot 30s per cwt. Beet is inactive, and the quota-tion nominal. tion nominal. IMPORTS and DELIVERIES of SUGAR to May 6, with STOCKS on hand.

THE ECONOMIST.

Java.-269 baskets 291 bags brought 26s 6d for good dry white. Floating Cargoes.-One of about 440 tons Java at 26s 3d, and yesterday, one of 2,500 baskets, No. 151, at 26s 6d. A small cargo of Trinidad at 21s, and one of 350 casks 50 barrels grocery Porto of Trinidad at 218, and one of 500 cases 50 carrens grocery Porto Rico, off the coast, at 24s 3d; a cargo of Porto Rico, about 600 tons, at 22s 6d, all for the United Kingdom. *Refined.*—Quotations during the early part of the week showed a partial reduction of 3d to 6d, but the demand has since improved,

Represe.—Quotations during the early part of the week showed a partial reduction of 3d to 6d, but the demand has since improved, and this fall partly recovered. No change in French loaves. The Clyde market has been active, with firmer prices. Rum.—Heavy landings have caused a further increase in the stock here. The market is quiet, and in order to realise, lower rates would result. Few transactions have been reported this week, and quotations are therefore partly nominal. CocoA.—A better feeling prevails, and with the very moderate supply at public sale, holders have obtained firm prices; indeed, 1,146 bags Grenada went rather dearer on Tuesday, finding buyers at 57s to 63s for common to middling, and 64s to 70s 6d for fair to good. 271 bags Trinidad sold steadily, at 71s 6d to 77s; low at 66s 6d, and good at 79s to 83s. 384 bags other West India part sold at 54s to 55s for Jamaica. 1,549 bags Guayaquil partly sold : Ariba at 68s to 71s. Also several parcels by private contract, including good to fine, at 76s to 80s, with Machala at 58s 6d to 61s. 269 bags Caraccas withdrawn, at 88s. 270 bags African, at 58s to 60s per cwt. 60s per cwt.

60s per cwt. COFFEE.—In this market prices show irregularity, and are still unsettled, the decline during the week being often 1s to 2s per cwt. Fine qualities generally and colory plantation Ceylon sup-port their previous value. Of the latter, 1,019 casks 92 barrels 252 bags found buyers: grey and pale, 59s to 65s; middling greyish, 66s to 69s; middling dull to colory, 70s to 74s; good middling to good, 75s to 83s 6d; fine, 85s to 91s; bold, 92s to 106s; bold grey and palish, 71s to 83s. Of 1,253 cases 9,175 bags East India the bulk found buyers: pale and mixed small, 61s to 65s; low middling to middling greyish, 66s to 72s; middling to good middling, 73s to 83s; good to fine, 85s to 92s; very fine, including bold, 95s to 107s, a few lots, 110s 6d to 115s. Mysore : bold, 109s 6d to 122s; medium, 92s 6d to 106s. 174 half-bales Mocha were bought in at 106s to 108s, a few selling at 105s 6d for Mocha were bought in at 106s to 108s, a few selling at 105s 6d for mixed small berry, and 102s 6d for very low. 10 casks 404 barrels mixed small berry, and 102s 6d for very low. 10 casks 404 barrels 396 bags Jamaica partly sold: ordinary to good ordinary bold, 37s to 41s; fine ordinary, 42s to 48s; greenish, 51s to 57s; low middling pale and grey to middling, 64s to 74s. 7,171 bags foreign about two-thirds sold—Guatimala: ordinary to good ordinary, 47s to 49s; fine ordinary, 50s to 55s; grey, 55s 6d to 62s 6d; good, 66s; a few superior and colory, 74s 6d to 78s. Costa Rica: fine ordinary to low middling palish, 50s to 58s; middling greyish to colory, 59s to 69s; good, 72s to 75s. Savanilla: 49s 6d to 53s 6d; good, 62s 6d to 63s. A eergo of 4,500 bags fully fair to good Channel Rio sold at 36s for a near port. The Dutch sale will be held on the 16th inst., to comprise 97,500 bags Java.

TEA.-Prices continue depressed, and the importers show a desire to realise as the stock continues very large, and the first steamer with new season's congou from China is expected to arrive towards with new season's congou from China is expected to arrive towards the end of next month. Nothing of interest has transpired by private contract. The public sales of China have amounted to about 22,000 packages. Very common to good common congou, 4¹/₄d to 6d; Shantams, 4¹/₄d to 4²/₄d; siftings, 4d to 4¹/₄d. In other grades, little change occurred. The supply of Indian by auction during the week has been 13,000 packages, and former quotations have not been quite maintained for some of the medium classes. Cevion tea. 11¹/₄d to 1s 1²/₄d nor lb. Ceylon tea, 11¹/₂d to 1s 1^s/₄d per lb. BICE.—Cargoes of Burmah for arrival have fallen 1¹/₂d on last

week's rates, at which a few sold, including one of 1,700 tons June-August sailing, at 7s 6d, open charter, basis Rangoon. Other transactions not officially reported. About 1,300 tons Port Canning, Marsh to April 10 to 20 to 20 to 20 tons Port Canning, March to April sailing, at 6s 9d to 7s 3d ex ship terms. About 30,000 bags sold on the spot; white Bengal, 9s 9d to 10s; Askoolie, 7s 4¹/₂d; Madras, 7s 9d; Rangoon, 7s; Port Canning, 6s 9d to 7s 6d per cwt. Shipments from Burmah to Europe 491,000 tons, the largest on record. Considerable sales have been made in cleaned rice at stondy rates.

cleaned rice at steady rates. SAGO is in limited demand, but former rates maintained. 949 bags by auction partly found buyers: fair to very very good small grain, 15s 3d to 16s; and part of 108 bags bold grain at 18s per cwt, the latter being dearer.

SAGO FLOUR.—356 bags common Singapore sold "without reserve" at 11s 9d per cwt. TAFIOCA.—Of 1,827 bags Singapore, a portion consisting of sea-damaged found buyers. 221 bags pearl tapicca sold at 14s 3d per cwt for modium cwt for medium.

BLACK PEPPER.—West Coast Penang, being scarce, has sold at the high price of 5^{*}/₂d. The market generally has been rather quiet. 1,048 bags Singapore by auction sold at 5^{*}/₂d; a few lots, 5^{*}/₂d. 25^{*}/₂ how loss singapore by auction sold at 5^{*}/₂d; a few lots, the high price of 5³/₂d. The market generation of the high price of 5³/₂d. The market generation withdrawn, 48 bags Aleppy sold at 5³/₂d to 5³/₂d. 252 bags low greyish and dusty Malabar withdrawn. 48 bags Aleppy sold at 5³/₂d to 5³/₂d. 100 tons Singapore sold to arrive at 5³/₂d to 5³/₂d per lb. WHITE PEPPER is firmer. On the spot business done for arrival at 8d to 8³/₂d. Of 292 bags by auction, 200 bags sold at 8d per lb. NUTMEGS.—54 cases Penang by auction were chiefly bought in, being held at higher rates. A few sold, including 83's and 82's at 2s 5d; 88's, mouldy, at 2s 4d; low, 1s 6d per lb. MACE.—23 cases Penang partly sold at 1s 4d to 1s 5d for mid-

dling dull red, and 1s 3d for part mouldy. The rest withdrawn at

and g duit red, and is ou for part monthy. The rest withdrawn at is 6d to 1s 8d per lb. CLOVES.--6 cases good Penang were bought in at 2s, and 40 bags very low Amboyna at 114d. Zanzibar easier, 9fd to 9fd being accepted for fair by private contract. 528 bales by auction were chiefly bought in, a few lots good selling at 10d per lb. 62 bags Penang clove stems sold at 2fd per lb.

GINGER.-149 cases 38 bags Cochin partly sold at uneven prices : washed, 47s to 54s; small, 40s to 44s 6d; broken and ends, 34s to washed, 478 to 548; small, 408 to 448 6d; broken and ends, 348 to 378 6d; part scraped and rather rough: medium, 538 to 548; small and medium, 438 to 438 6d; small and broken, 388 6d to 398. 114 cases of last year's import sold "without reserve" at 458 to 478 for good rough and part scraped. 211 barrels new crop Jamaica sold at full rates: low and ordinary, 578 to 638; the remainder at 658 to 968, according to quality. 440 bags African withdrawn at 328 per cwt.

PIMENTO is slow, and 1,547 bags by auction only partly found buyers at 3½d to 3¾d per lb for low to good, being easier rates. SALTPETRE.—The market continues flat. Fine Bengal on the spot nominal at 21s 3d to 21s 6d. 200 tons have sold to arrive at

20s 6d to 20s 7¹/₂d per cwt. SHELLAC is firmer. Part of 610 chests, by auction, sold at rather higher rates; also a few parcels by private contract. Second orange, 99s to 102s 6d; A C garnet, 89s; fine button, 105s per cwt.

per cwt. OTHEE DRYSALTERY GOODS.—At rather lower rates, several sales of gambier reported latterly at 19s 9d on the spot and 20s 6d to arrive. Of 477 boxes by auction a few realised 34s 6d to 35s for slabs. Bengal turmeric has sold privately at 13s 6d. 844 bags Cochin bulbs, by auction, at 10s 6d to 11s 3d. There is more inquiry for Teneriffe cochineal at late low quotations. Good to fine lump plumbago has sold at 21s to 23s 6d per cwt. DRUGS.—Cape aloes very scarce, and much wanted. Balsam Peru still commands an extreme price. Bark, East Indian and South American, moderate business doing at steady prices. Camphor, with new arrivals, easier. Cardamoms neglected. Gum olibanum steady. Ipecacuanha and rhubarb quiet. Musk still

Musk still olibanum steady. Ipecacuanha and rhubarb quiet. Musk still very dear. Oil of peppermint firmly held. Opium little doing. CHEMICALS.—Rather more inquiry, and prices have varied but

slightly during the week.

slightly during the week. INDIA-RUBBER is less readily saleable at current high rates. METALS.—Speculative descriptions have advanced, especially imported tin, which yesterday ruled 3*l* above the closing prices of last week—viz., 96*l* 5s to 96*l* 10s cash, and fourteen days. At the close less demand prevailed. Sales for delivery during the year at 95*l* 15s to 96*l*. English steady at the quotations. Spelter con-tinues depressed. 120 tons sheet zinc rolled at the London markets, by auction, partly sold at 20*l*, being 5s lower. The demand for lead does not improve, and quotations keep very low. Quicksilver as before. The market for copper shows more steadi-ness, with an advance of 2*l* 10s to 3*l* upon Chili. Yesterday, g.o.b. sold at 67*l* to 67*l* 5s cash, and fourteen days. Australian and British dearer. There have not been any movements of importance to notice in the iron market. Scotch pig in steady demand at 47s to 47s 2d per ton cash. Stock in Glasgow, 634,000 tons. Shipments to 47s 2d per ton cash. Stock in Glasgow, 634,000 tons. Shipments

to 478 2d per ton cash. Stock in Giasgow, 034,000 tons. Shipments last week, 11,300 tons. SPIRITS TURPENTINE.—Deliveries are small, being 765 barrels last week, the supply afloat and stock of 10,000 barrels being far below average. Some realisations have led to lower prices. American, 41s 6d to 42s; last four months, 32s 6d to 33s per cwt. PETROLEUM OIL has advanced \$d to \$d\$, with a steady demand. This morning's quotations are: on the spot, 5\$d to 6d; June, the same. last four months, 6\$d to 6d\$ der gallon. Visible supply

same; last four months, 6[‡]/₄ to 6[‡]/₄ der gallon. Visible supply very large, being 258,070 barrels as regards this port. Orts.—Common fish oils are inactive, but firm at the quotations.

OILS.—Common fish oils are inactive, but firm at the quotations. Sperm fully supports the previous value, crude having sold at 75*l* per tun. In olive oils few transactions reported, and prices keep very low—viz., 38*l* to 39*l* 10s per tun for current qualities. Cocoa-nut dull in all positions. Palm firm, with a small stock, and all kinds have realised higher prices. English brown rape steady at the late slight improvement. To-day, the value is 28*l* 28 6d to 28*l* 5s in all positions. The market for linseed oil has been quiet. On the spot, 24*l* 10s (barrels, 6d more); May to August, 24*l* 17s 6d to 25*l*; last four months, 24*l* 12s 6d to 24*l* 15s per ton. Luxserp.—A quiet tone has prevailed in this market, with prices

to 25t; last four months, 24t 12s 6d to 24t 15s per ton. LINSEED.—A quiet tone has prevailed in this market, with prices hardly so firm as last quoted. Calcutta near at hand, 45s 9d to 46s; vid Cape, 46s 6d to 46s 9d. Sales of Black Sea on passage at 43s 6d to 44s per quarter for the United Kingdom. No reported sales in Bombay seed. The supply of the latter afloat for this country is still near large

country is still very large. TALLOW.—With the present light stock, a return to low prices seems impossible. The market is supplied from the public sales. Petersburg nominal, at 56s to 57s per cwt.

Petersburg nominal, at 50s to 57s per cwt. TOBACCO.—There has been very little inquiry during the past week for any class of American tobacco, and the sales effected have been upon a very limited scale. Prices continue firm for all grades, owing to the expected small import this season. Substitutes have only been in moderate demand.

POSTSCRIPT. FRIDAT EVENING. SUGAR.—Including the public sales of West India, 382 casks sold, making 2,124 casks for the week, besides 500 to 600 casks Barbadoes. A cargo of Cuba at 22s 6d for the United Kingdom. 2,200 bags Mauritius sold by auction at 25s to 27s for g.ainy, and 20s 6d to 24s for syrups. 396 bags Penang at 18s to 23s 6d for

brown and grey and 26s 6d for grainy white. 269 baskets native sold at 14s to 14s 9d. 813 bags Bengal at 16s to 22s for brown and yellow Dumma.

COFFEE .- 817 casks 340 barrels and bags plantation Ceylon only part sold at irregular prices, and a small proportion of 764 cases 4,380 bags East India at lower rates, excepting for finest. Of 185 barrels 145 bags Jamaica a few lots only sold at easier rates. 1,253 bags Guatimala and Costa Rica part sold at previous quotations.

bags Guatimala and Costa Rica part sold at previous quotations.
360 bags Manila withdrawn.
RICE.—A cargo of 1,030 tons Rangoon, March, 7s 6d; two at
7s 7ld; June-July, 7s 7ld, open charter.
METALS.—Chili copper, 66l 10s to 67l, firm. Tin, 96l 15s to 97l.
23,000 slabs Banca declared for sale at Rotterdam on the 31st inst.
Scotch pig-iron closed at 47s 1d per ton.
OILS.—163 casks common palm, by auction, out at 32l to 32l 10s.
TALLOW.—At the public sales, 1,439 casks Australian chiefly met
with buyers at 6d to 1s advance, and the quotations are raised in accordance. Petersburg, 47s. Town advanced 1s 6d, viz., to 43s 6d per cwt.

ADDITIONAL NOTICES. TEA.—Messrs J. C. Sillar and Co. report:—The market remains very dull, and sales of sound common Shantam congous are still reported at 4½ d per lb. Several parcels of new season's "Province leaf" congous have arrived this week per P. and O., M. M., and other steamers. The last sales we heard of were at 1s 3d per lb. The teag are great and have not lost the frequency in such and in such as

other steamers. The last sales we heard of were at 1s 3d per lb. The teas are sweet, and have not lost the freshness usual in such cases. Some of the chops, however, are reported to be old season's teas marked season 1882-1883. About 200 packages of Ceylon teas were offered at the public sales on Thursday, and found buyers at 104d for fannings, up to 1s 14d per lb for orange pekces. METALS.—The metal markets have shown much more strength this week, and an advance has taken place in both copper and tin. Copper has advanced to 66l 10s to 66l 15s, and the market strong, and a good deal has changed hands. Tin.—There are now buyers of this metal at 96l 10s cash price, although the business doing is not large. There is no change to report in other things.

METROPOLITAN CATTLE MARKET.

METROPOLITAN CATTLE MARKET. THURSDAY, May 12.—The trade to-day showed no fresh feature of importance. Beasts sold slowly, but at steady prices; sheep and lambs were well held, and calves were in fair request at steady prices. The following are the quotations per 8 lbs to sink the offal :—Inferior beasts, 4s to 4s 6d; second quality, 4s 6d to 5s; prime large oxen, 5s 6d to 5s 8d; prime Scots, 5s 8d to 5s 10d; inferior sheep, 5s 0d to 5s 6d; second quality, 5s 6d to 6s 0d; prime coarse woolled, 6s to 6s 2d; prime Southdowns, 6s 4d to

6s 6d; large coarse calves, 5s 4d to 6s; prime small ditto, 6s to 6s 4d; large hogs, 4s 6d to 5s 0d; small porkers, 5s 0d to 5s 4d; lambs, 7s 6s to 8s 6d.

METROPOLITAN MEAT MARKET.

THURSDAY, May 12.—There was a moderate supply of meat on offer to-day, and the trade was steady, at the following quotations: Beef, 3s to 5s 2d; mutton, 3s 6d to 6s; lamb, 7s 4d to 8s; veal, 5s to 5s 6d; and pork, 3s 8d to 4s 8d per 8 lbs.

FORTY-NINTH ANNUAL REPORT OF THE

NATIONAL PROVINCIAL BANK OF ENGLAND, LIMITED.

MAY 11TH, 1882.

Subscribed Capital, £12,037,500.

CAPITAL-Paid, £2,036,250; Uncalled, £1,976,250; Reserve Liability, £8,025,000-£12,037,500. RESERVE FUND, £1,278,750.

NUMBER OF SHAREHOLDERS, 6,493.

The Most Honourable the Marquess of AILESBURY. CHARLES BARCLAY, Esq. GEORGE HANBURY FIELD, Esq. JOHN OLIVER HANSON, Esq.

DIRECTORS.

DUNCAN MACDONALD, Esq. HENRY PAULL, Esq. JOHN STEWART, Esq. Sir JAMES SIBBALD DAVID SCOTT, Bart.

RICHARD BLANEY WADE, Esq. ROBERT WIGRAM, Esq. GEORGE FORBES MALCOLMSON, Esq. Hon. ELIOT THOMAS YORKE.

JOINT GENERAL MANAGERS-ROBERT FERGUSSON, THOMAS GEORGE ROBINSON, and FREDERICK CHURCHWARD. SOLICITORS-CHARLES NORRIS WILDE, Esq., and ERNEST JAMES WILDE, Esq.

RICHARD BLANEY WADE, Esq., in the Chair.

The Directors have pleasure in submitting to the share-holders the following statement of accounts for the year 1881, viz. :--

Balance of undivided profits from 31st December, 1880 Net profits for the year 1881, after making provision for bad and doubtful debts, rebate on bills discounted, &c. £ s d 37,651 3 0 403,889 3 2 441,539 6 2

				000 000	0	0	411,000	U	-
Less dividend	of 4 p	er cent.	paid in July, 1881	 £79,200		0			
	4		January, 1882	 81,450	0	0			
Less bonus	5			 99,000	0	0			
	7	-	payable in July, 1882 .	 142,537	10	0			
						-	402,187	10	0

39,351 16 2 The profits of the past year enable the Directors to recom-mend that a bonus of 7 per cent. for the half-year ending 31st December last be now declared, payable in July next. This, with the dividends and bonus, already paid, make the total distribution 20 per cent. for the year 1881, free of income tax. The balance of £39,351 16s 2d carried forward to the year 1882, with the reserve fund of £1,278,750, makes the rest or undivided

profits at 31st December, 1881, £1,318,101 16s 2d. The reserve fund, £1,278,750 (wholly invested in Government securities), shows an increase of £145,716 during the year 1881, as stated hereunder, viz. :--£

Amount at 31st December, 1880 Premiums on new shares since received		
	 -	-

1,278,750 0 0

The average of the published rates of the Bank of England for the year 1881 was £4 0s 10¹/₂d, as compared with £2 15s 2d for the year 1880.

The Directors report with deep regret the death of Mr Edward Atkinson, who for a great number of years rendered most important and valuable services to the Bank in the varied capacities of Inspector, General Manager, and Honorary

varied capacities of Inspector, General Manager, and Honorary Director. The Directors, in anticipation of the early retirement of Mr Fergusson, after thirty-seven years' service in the Bank, con-sidering the importance of having a successor ready to fill the vacancy that will then take place, have appointed Mr Church-ward, who has been for many years Manager of the Bute Docks Branch at Cardiff, to be a Joint-General Manager. The following Directors go out of office by rotation, but, being eligible for re-election, offer themselves accordingly, viz.

viz. :-

The Most Hon. the Marquess of Ailesbury.

Henry Paull, Esq. Richard Blaney Wade, Esq.

In conformity with the provisions of the Act, it will be requisite for the shareholders to elect Auditors and vote their remuneration. Mr Edwin Waterhouse, of the firm of Messrs Price, Waterhouse, and Co., and Mr Roderick Mackay, of the firm of Messrs R. Mackay and Co., offer themselves for re-election.

PROSP THE Company has been formed to carry on in the several Colonies of Austra-lasia, viz., Victoria, New Sonth Wales, South Australia, Qucenaland, Western Australia, New Zealand, Tasmania, and Fiji, the business of supplying and of enabling its Licensees to supply Electricity for the purpose of Electric Lighting, Motive Power, Chemical Decomposition, and other applications for which it is suitable. The Company has acquired, as described below, the exclusive right to the Brush and Lane-Fox systems in these Colonies, but is not bound to the use of any particular invention. It has acquired the Brush and Lane-Fox systems because of their proved practical value, and it will endeavour to secure the best system of Electric Storage. The excellence of the "Brush" system of Electric Lighting is acknowledged not only for the brilliancy, steadiness, and uniformity of the Light, but also for its great economy. Under the Brush system, any number of Arc Lamps from 1 to 40, each of 2,000-candle power, or any number form 1 to 12, each of 6,000-candle power, or a single light of 50,000 or more candle-power, can be produced from a single dynamo-machine. The connecting wires may be extended over circuits of many miles; thus from one centre g large district can be economically lighted. By the last dovernment Report of the Sonth Kensington Museum it appear

from a single dynamo-machine. The connecting wires may be extended over circuits of many miles; thus from one centre g large district can be economically lighted. By the last Government Report of the South Kensington Museum, it appears that with an outlay of less than £1,000 for machinery and plant for 16 " Brush" Are Lights of 2,000 nominal candle-power each, after deducting all expenses, coal, and wages, the saving over Gas for the Nine Months has been at the rate of £425 168 dd per anum. For the last twelve months a considerable area of the streets of the City of London has been lighted by electricity. It appears from a report in the Times that at a recent meeting of the Court of Common Council, the Chairman of the Court of Sewers stated that of the three electric-lighting systems now being tried experimentally in the City, that of the Brush was about the same price as gas, whilst the other two were respectively twice the cost, and nearly four times the cost. But compared with the new effective system of gas-lighting in Fleet Street, the Brush was less than a quarter the cost. For domestic lighting, the "Lane-Fox" system of Incandescent Lamps has given excellent results; from 18 to 100 lamps can be worked from one Brush-dynamo, every lamp being capable of acting separately without affecting the others.

given excellent results, from 18 to 100 lamps can be worked from one Brush-dynamo, every lamp being capable of acting separately without affecting the others. The Company takes over from the Vendors an agreement with the eminent manufacturing firm of Messrs. Latimer, Clark, Muirhead, and Co., whereby they undertake to manufacture Brush and Lane-Fox plant and apparatus at cost price, the firm depending for their profit on a division of the net profit realised by the Company on the sale of such apparatus, less certain amounts for Royalties. This arrangement saves the locking-up of capital, and obviates the necessity of the Company engaging a manufacturing staff, and undertaking the erection or purchase of extensive buildings, plant, and machinery. The Vendors also make over certain optional rights they possess to a new necumulator, which has not yet been practically tried, but which is believed to be of considerable value. The Anglo-American Brush Electric Light Corporation, Limited, London, paid a dividend of 12; per cent. out of the manufacturing profits of the first year (1831) of their operations, after deducting 10 per cent. for depreciation of plant and machinery, the whole of the expenses of forming the Company, and carrying forward £2,934 189 4), besides carrying the sum of £99,500, received for sale of concessions, &., to the Reserve Fund. The £10 paid-up Shares of the Company are now quoted at about £38, and the £4 paid-up Shares at £18. The Shares of the Hammond Company, which has purchased from the Anglo-American Com-pany licences to use the patents in some parts of the United Kingdom, are quoted at about £8, with £2 108 paid up, and the Shares of other Companies, which have acquired rights from the parent Company, are at a considerable premium. From the foregoing, the prospects of this Company may be gathered. It will start, not as a mere licensee, but as the exclusive owner in Australasia of all the izbats to the Brush and Lane-Fox inventions. There are circumstances in connection with these Colon

when contrasted with the population. The comparative coolness and purity of the atmosphere insured by the Electric Light will be especially appreciated in Anstralia, where the heat of Gas renders its use most objectionable during the hot season. The lighting of Railway Trains by a method so much cooler, simpler, and more agreeable than those at present employed, will insure its general adoption ; while for Railway-stations, Factories, Clubs, Theatres, Docks, and Intercolonial Steamers, its general use is only a question of time.

PROSPECTUS. In Mines electricity will prove invaluable, not only because it gives new facili-ties for working from the increase of 1 ght, but also from its being applicable as a motive power for haulage. The great extent of these wealthy industries in the Australas'an Colon'es opens a wide field for the profitable development of the Comp my's business. In respect to cost, the Electric Light will start with advantage, for the price of me in the Colonie is your much huber then in with advantage.

the Australasian Colonies opens a wide field for the profitable development of the Compury's busines. In respect to cost, the Electric Light will start with advantage, for the price of gas in the Colonies is very much higher than in England. This Company, it is believed, will be in a position to do in Australia what the Anglo-American Company has done and is doing here. It will supply plant and enter into direct contracts on its own account, and as the value of its system becomes known, will sell licence after licence to governing bodies and local com-panies, for rights over districts within its vast territory. By reference to the enclosed list of customers, which includes the Admiralty, the War Department, the Committee of Council on Education, the Corcoration of the City of London, the Great Western Railway, the Great Eastern Railway, and many others, it will be seen that already 3,000 "Brash " lights are in daily use in England, and the numbers are constantly augmenting, both here and on the Continent. The Vendors are the Brush Electric Light and Power Company of Australasia,

and many others, it will be seen that already 3,000 "Brush "lights are in daily nse in England, and the numbers are constantly angmenting, both here and on the Continent. The Vendors are the Brush Electric Light and Power Company of Australasia, Limited (a Company privately subscribed to acquire the Brush Patents for the above Colonies), who are also the promoters, and pay all preliminary expenses of this Company up to allotment. The principal inventions of Mr. Brush have already been patented in Victoria, New South Wales, New Zealand, and South Australia, and those of Mr. Lane-Fox in Victoria and New South Wales. These patents and the right to apply for similar patents in the remaining Australa-ian Colonies, and for patents in respect of the inventions of Mr. Brush for a Heflector and a Governor, and for certain recent subsidiary inventions of Mr. Lane-Fox, together with all other improvements to which the Anglo-American Brush Light Corporation, Limited, may become entitled under existing agreements with those gentlemen respectively. Nave been acquired by the vendors to this Company, and will be transferred. Is-structions have already becan given to the Patent Agents for application to be made in the remaining Australian Colonies and Tasmania and New Zealand for the inventions so already patented as above. The consideration to the Vendors for their rights and for paying all expesses attending the formation of this Company up to the allotment of the shares is 245,000 in cash, 230,000 in fully paid-up shares, and the Founders' shares. Up and cease to exist. The Vendors have acquired or entered into the following Agreements, viz :-An Agreement, dated the 18th day of April, 1882, between Sigismund Cohnè, of the one part, and Sir Julius Vogel, of the other part; an Agreement, dated the 3th day of May, 1882, and made between the Anglo-American Brush Electric Light for orporation, Limited, of the one part, and Sir Julius Vogel, of the other part; two Agreements, dated respectively the 6th and 9th days of May, 1882,

pany's Solicitors. In the event of no allotment being made, the deposit paid on application for Shares will be returned in full. Prospectuses and Forms of Application for Shares'can be obtained at the Offices, and from the Bankers, Brokers, and Solicitors of the Company. London, 11th May, 1882.
