THE MONEY MARKET.

AFTER becoming slightly easier in the early part of the week, the discount market has again hardened a little, and the rate for three months' bills is now as it was last week, about $3\frac{3}{8}$ per cent. The main cause of this renewed firmness is the diminution of strength shown in the Bank return. Owing to the internal movements of notes and coin, the reserve has fallen to the extent of 1,365,0001; and, although this is only what was to be looked for at this time of the year, it has, nevertheless, tended to emphasise the fact that the amount of the reserve is not so large as, in view of the demands that will soon be made upon it, it is desirable that it should be. Some disappointment also has been experienced at finding that the dividend payments have been anticipated to a greater extent than was expected. The borrowings have certainly not been on so large a scale as at this time twelvemonth. They have amounted, however, to upwards of $3\frac{1}{4}$ millions, and to this extent the dividends released yesterday have been hypothecated. In all probability, too, the Bank will have left the open market to absorb the last issue of Treasury bills, and it does not seem likely, therefore, that the distribution of the dividends will add to the available supplies of money. That it will cause a temporary superfluity is to be expected, but in a few days that will be worked off.

There is thus less prospect now of a further drop in the market rates than there recently appeared to be, and this is satisfactory. The harvest this year happily promises well, and if it turns out as favourably as there seems reason to hope, it may be expected to give a distinct stimulus to trade. For home purposes, money is thus likely to be more needed then of late, and it is not improbable also that in the autumn gold may have to go hence to the United States. The possibility of an efflux thither is, at all events, a contingency for which it is well that we should be prepared, and from every point of view, therefore, it is greatly to be desired that the Bank should be able to add to its reserve by attracting gold from abroad. This, if the market rate is kept up, it may do, but if that declines, there is not much

ECONOMIST. THE

prospect of gold being drawn here, and we may have, as the result of the undue cheapness of money now, to suffer a sharp stringency later on.

THE GOVERNMENT AND NEW GUINEA.

THE Government were, we think, bound, whatever might be their opinion of the expediency of incorporating New Guinea in the British Empire, to repudiate the proceedings by which the colony of Queensland had purported formally to annex it. It is quite true that the Queensland authorities professed to act in the name, and subject to the approval, of the Imperial Government. But it is clear, both from what was done at the time, and from the acute disappointment which Lord Derby's renunciation of our new possession has excited in Australia, that the colonists imagined that they had succeeded in forcing the hand of the home Ministry. It is of great importance that the futility of services of this kind for compelling the ratification by the Crown, after the event, of bold strokes of policy, for which its previous authority might have been asked, should be unmistakably demonstrated. As Lord Derby pointed out on Monday, there was in this case no imminent peril to be avoided, no pressing emergency to be met, nothing to require or to justify precipitate action. Nor, again, would there have been any difficulty in communicating beforehand with Downing Street, as the telegraph would have brought back within twenty-four hours a reply to the Colonial Ministry's application for imperial sanction. The plea of urgent necessity is thus quite unsupported by the actual facts; and when that defence is once displaced, the illegality of the whole proceeding is too naked to require proof. The local autonomy of our self-governing colonies clearly does not empower them to seize or accept, either in their own name, or in that of Great Britain, extraneous territory. The colonies are not sovereign Powers: they have no international status of their own, and no delegated authority from the mother country, and they are therefore incapable of making annexations, either as prin-cipals or as agents. Nor is the case bettered by the presence and assent of a direct representative of the Crown, in the person of the governor of the colony. He is, it is true, an agent of the home Government, but an agent with a strictly limited commission, and invested only with those powers which are necessary for its discharge. The moment he steps outside his proper functions his acts are ultra vires, and altogether void.

Under these circumstances, it became the plain duty of the Government to declare the nullity of the act of so-called annexation by which the Queensland colonists assumed to set up the sovereignty of the British Crown in New Guinea. To adopt any other course would have been to disregard all the rules of constitutional theory and practice which govern matters of this kind, and to establish a most dangerous precedent. They have, however, gone further than this, and have announced through Lord Derby, that they are not

the Australian colonists, the annexation of New Guinea, Lord Darby stated the objections to such an extension of our responsibilities with characteristic acuteness and force. He pointed out that New Guinea is a very large island, of which we know very little; that there is no trustworthy evidence of any intention on the part of either France or Germany to appropriate it; that the Queensland colonists have plenty of work before them for years to come in peopling and developing their own vast territory, and that the occupation of New Guinea is avowedly meant to be only the first step towards the realisation of an ambitious policy, which contemplates the ultimate absorption in the British Empire of a large part of the Southern Pacific. He thinks that enterprises of this kind should, at any rate, be postponed until the Australian colonies are confederated into a strong and united whole, and that meanwhile the necessities of the case will be suffic ently met by a general intimation to foreign countries that England would regard the occupation of New Guinea by any other Power as an unfriendly act. This decision has been received with great dissatisfaction throughout Australasia, and we are by no means convinced of its wisdom. To begin with, it is not at all clear that by adopting the policy which the colonies are pressing on us we should materially add to our responsibilities in the Pacific, while it is almost certain that we should render the performance of them easier and more efficient. The islands of Polynesia are no longer the isolated earthly paradises which the early navi-gators visited and described. The enterprise and cupidity of civilised men have converted many of them into productive settlements, have established more or less rude commercial relations with the large majority, and have forced almost all to contribute to the stock of imported labour which is necessary for the cultivation and development of tropical countries. The change has led to gross abuses and cruelties, and the labour traffic in particular reproduces some of the worst features of the old slave trade. The result has been, that for years past Her Majesty's ships have been acting as a kind of voluntary police in this part of the world, keeping the peace and punishing crime in a summary and not ineffective fashion, but crippled in all directions by the want of an acknowledged status, and by the impossibility of dealing coercively with the subjects of other civilised states. The matter is one in which we have a paramount interest, partly because we are the greatest trading and maritime Power, partly because of the proximity of our Australian colonies, some of which, like Queensland, draw their main supplies of labour from the islands, while all are deeply concerned in the establishment of order and security throughout the Southern Pacific. Those who are familiar with the causes which brought about, and the consequences which have followed, the annexation of Fiji cannot fail to be impressed with the superior efficacy for all the purposes in view, among which the interests of the natives themselves are not the least important, of direct British sovereignty over informal British protection. The Australians have, moreover, an additional reason for desiring immediate action. In the present temper of France many of these islands, and New Guinea in particular offer an almost investigible to be the particular offer an almost irresistible temptation to the advocates of colonial expansion, and already there are rumours, notwithstanding Lord Derby's declaration to the contrary, of a French occupation of the New Hebrides. There is much force in the argument, that if we intend seriously to maintain British supremacy in this region of the world, it is far better to obviate the possibility of future misunderstanding and disagreement by entering into possession at once, than to wait till an adverse claimant has acquired for himself the title of the first occupant, and the enormous advantages incident thereto. Of course, if the Government were prepared to acquiesce in the settlement of the unappropriated islands of the Pacific by other European Powers, this would be an irrelevant argument; but it appears from Lord Derby's declarations that they are not, at least, so far as New Guinea is concerned. It will be said, however, that we have not the means to undertake so large an addition to our burdens of government and administration, and that unless we are ready and able to do the work thoroughly, we ought not to enter upon it at all. And if the mother country alone were concerned, this would, no prepared to undertake, with or without the assistance of doubt, be an insuperable objection. The fact, however,

THE ECONOMIST.

783

that Australia is the country primarily interested, makes that australia an unusually favourable one for opening the question which no English statesman has yet boldly faced, of the apportionment of the cost of the Empire among its different members and constituent parts. It is an anomaly which grows in absurdity every year that the whole burden of our vast and complicated international responsibilities should be cast upon the shoulders of the inhabitants the United Kingdom alone. The difficulty of charging the cost of a policy upon those who have no voice in determining its character and direction has hitherto proved an insurmountable obstacle to any wider distribution of our Imperial burdens. But if we extend our responsibilities for the benefit and at the request of the colonies, we may fairly call upon them to assume their share of the additional abour and expense; and when this step has once been taken, we shall be sensibly nearer a settlement of the wider question which lies beyond.

THE POWER OF, THE PAPACY.

VERY few attentive observers doubt, we imagine, that the popular English belief in the decline of the Papacy is more or less erroneous. Confidence in its Divine commission has no doubt declined pretty steadily of late years among the educated, particularly in Southern Europe and Spanish America, but then the authority of the educated has declined also, and has been replaced by the ascendancy of the multitude, who are not so disenchanted with the Papacy as their superiors. Two processes have, in fact, been going on of late years, which have almost, if not quite, compensated the Papacy for all its losses; one being the gradual disappearance of the temporal power, and the other the rise to unquestioned authority of the principle of universal suffrage. The Pope, of course, and the persons round him still sigh over the departed kingdom. It is very pleasant to rule absolutely, even in a little territory; still more pleasant to have revenue independent of subscriptions; most pleasant of all to feel that behind a spiritual authority rests direct power of earthly punishment or promotion. Still, in losing the position of King the Pope, who by rare good fortune lost no rank and no independence of secular law, gained much freedom. He and his Court ceased to care about the petty politics of Italy, ceased to fear invasion, ceased to be hable to any threat of temporal compulsion. Whatever authority the Pope retained he could exercise without fear, and it soon became apparent that he retained much. Whatever his loss of reverence among the cultivated, he had gained a new and direct leverage over States. The system of government by wide suffrage had become general, and in a wide uffrage the Pope could influence so many votes, as to give him extensive power, and power of a new kind, against reigning Governments. Under the system which prevailed from the accession of Louis XIV. to the rise of the German Empire, the Popes, to be strong, had always to keep on terms with the great Governments. If the Catholic Kings distructed the great Governments. distrusted them, or the Ministries hated them, as often happened, the Popes were weak, while they never had any power in the States recognising a non-Catholic creed. Unless the case were so grave that they could foster insurrection, there was nothing for them to do, no foothold from which to act. If, for example, Louis XIV. were impertinent, and his Minister, Louvois, defiant, what could an unhappy Pope do in France ? There was nobody, except, perhaps, a King's mistress, or the Huguenots, to whom he could appeal. When, however, the people began to rule, through a wide suffrage, and votes to be important, the Popes began to regain their strength. They could influence many votes, they could hold the balance of power between secular parties, and they could hold it with a patient persist-ence which no political party could rival. They did not die, or change their objects, or relax the pressure. Their claim to be heard being based on consciones alone, could claim to be heard, being based on conscience alone, could never be denied, never suppressed by events, never be made subservient to the will of a majority. They had only to wait in a country in which Catholics were numerous, and they must, in some momentary equality of parties, be recognised as a force. In Belgium, for example, a strongly Catholic country, in spite of perfect liberty and much scepticism, they often controlled affairs, and always acted as

the Liberal Ministry. In Germany, again, a Protestant Empire, they could guide one-third of the votes, and in no long time the Chancellor, though he was Prince Bismarck, found that, with these votes permanently hostile, he could not get along, and was compelled to agree to a compromise. It was the same in Holland and Switzerland, both non-Catholic countries, and even in Italy, where the antagonism of the Papacy will, whenever the Church is left free to intervene in elections, be very bitterly felt. Throughout Europe, in fact, and America, the Papal Court in every country controls or guides or influences part of the Assembly whose right to the ultimate sovereignty is, in theory at least, admitted, and controls it freely, for any interference does but provoke its devotees. There is no cure for the situation, for if the non-believers persecute, they do but make opposition more resolute, while if they lower suffrages, they only increase the directness and weight of the Pope's leverage. Their only course to kill his authority would be to raise the qualification for voting, which is exactly the one thing that they cannot do. Of course, the extent of the power exercised varies with the number of the sincere Catholics, but even where they are few it is great, for in every free country the parties must sometimes be pretty equal, and at that moment the Papacy, which is never weary, or feeble, or unobservant, may give success to one or the other side.

The Pope, therefore, is again a distinct force in Europe, with which Governments must reckon, and he will become a greater one as the Roman Court begins to perceive the facts. It is only slowly realising them, but the immense success in Germany, a success for which it hardly dared to hope, is making the Curia much bolder. Its recent action in Ireland, the result of which will have to be judged rather by the historian than the journalist, shows a distinct increase of independence, an inclination to take a definite and very strong line of its own. That line, as it happens, is favourable to the British Government, but it should not be judged entirely from that point of view. To estimate it fully we must imagine Ireland independent, and Mr Parnell Prime Minister, and then think what the Pope's attitude would mean. Nothing less than this, that the Pope was a formidable factor in Irish politics, who, whenever the parties approached equality, as in any free State they are certain occasionally to do, would hold the balance of power. Similarly the Pope, after years of hesitation, has commenced to act in France. In form he has only written a letter to the President, not violent, and not hostile, but in reality he has announced that if the Chamber persists in its anti-religious policy he shall throw his weight upon the reactionary side. That weight is just now small, but it is one strength of the Papacy that it can wait a year as easily as a week, and sooner or later, when the conjuncture arrives, the Pope's decision will be effective, and will be severely felt.

To judge of this power, moreover, we must remember that it operates in all countries, though not equally, and that all are becoming, as the years go on, more and more interlaced. The Pope may be powerless in France just at the moment when Germany desires him not to use his authority in German affairs, and if his condition for his quiescence is a strong hint from Berlin to Paris, the Pope becomes in Paris, in spite of local defeat, a great person. He may be defied in Mexico just when he influences an election at Washington, and if he is, he may, through Washington, seriously embarrass the temporary rulers in Mexico. At this moment, a word from the Pope in Syria might seriously tie the hands of M. Challemel Lacour, and Syria is but one of a dozen impulses which the Vatican might bring to bear in Paris. A power which exercises a certain influence in every country, and makes its influence in all tell successively upon single points, is in its relation to those points a great power, and the Pope is now rising to that position in all capitals. That this growth should be the result of an increasing spread of the most modern methods of government, and should coincide with a great spread of irreligion, is a most perplexing as well as striking fact, but that it is a fact can hardly be denied. Leo XIII. is a much more effective personage in Europe, though he is not a king, and though the higher classes deny his authority, than was Pope Innocent XI., Louis XIV's antagonist, though he was a a regulating power, moderating or baffling the desires of retained the Papal States Prince Bismarck would have

THE ECONOMIST.

forced him to yield, and quite certain that had the German Parliament not been elected by universal suffrage, the Pope could never have forced the Prince to surrender the May Laws, and so acknowledge himself defeated in the campaign of culture. The Pope is a heavy vote in every Christian State not governed by an absolute Court, and nowadays a heavy vote always secures power to those who direct it.

THE REVENUE.

The revenue returns for the past quarter are fairly satisfactory. Under all but two of the heads of receipts an increase is shown, the net result being that the collection for the three months has exceeded that of the corresponding period of last year by about 820,000l. Of this increase, 760,000l has been derived from the property and income tax, and may be taken to represent the arrears of the extra three-halfpence per pound imposed last year to meet the expense of the Egyptian Expedition. This, therefore, is an altogether exceptional item, and while it is satisfactory to see from it that the arrears have been very well got in, no inference can be drawn from it as to the probable yield of the tax during the current year. Under other heads, however, as will be seen from the following statement, there is a growth that augurs well for the Chancellor of the Exchequer :—

	Receipts for	Increase a Compared with Corre- ponding	l C s- wi	ecrease as ompared th Corres- ponding
	Quarter.	Quarter.		Quarter.
	£	£		£
Customs	4,739,000	 \$7,000

Crown lands	80,000	 		
Interest on advances	359,787	 2,729		
Miscellaneous (inclu-				
ding fee, &c., stamps)		 		134,747
Total	20,796,738	 964,729		144,747

Net increase, 819,982

In considering this table, attention will naturally be first directed to the revenue from Excise. Of late we have been accustomed to see the revenue from this source diminishing with much persistence, and according to the point of view from which this diminution has been regarded it has been welcomed or deplored. Social reformers have hailed it as evidence that success has attended the labours of the organisations that are working amongst us, energetically, if not always discreetly, in the cause of temperance, whilst to others the failing revenue has been a cause of apprehension, their fear- a very foolish fear, let it be said by the wayapparently being that a Chancellor of the Exchequer would experience great difficulty in finding other sources of income to fill up the gap. Now, however, instead of a decline there is a small increase, and those alike who mourned and who rejoiced over the past falling off should see that they have been somewhat over hasty in their conclusions. Neither of them seem to have sufficiently taken into account the state of comparative depression in which our trade has for a long time remained, and to have given, therefore, less weight than they ought to the consideration that possibly the diminished expenditure upon drink may have been owing not so much to a change of habits as to a change of circumstances. It would be rash, of course, to argue from the present increase in the Excise receipts that our drink expenditure is again on an expanding scale. It is true that in the corresponding quarter of 1882 there was an increase in the Excise revenue as compared with the previous year, and that the present augmentation is thus an increase upon But then in subsequent quarters last year an increase. the gain of the first three months was more than lost, and it remains to be seen whether our experience this year may not be the same as it was last. The figures of the past quarter, therefore, tell us nothing very definite, but they certainly do show that it is yet much too early to speak, as many have

been doing, of a decline in our drink revenues as an assured thing. Until trade distinctly improves, and the abstinence of the people has been tested in a time of prosperity, it must remain doubtful whether of late our less drinking has been a matter of choice or only of necessity.

Of the changes under the other heads of receipt little need be said. The Customs have already yielded an increase almost as great as Mr Childers, in his very cautious estimate, expected to realise during the whole of the year; but as in the case of the Excise, it is doubtful whether this growth is due to an enlargement of the purchasing power of the people, or to exceptional transactions in the past three months. From the Post Office and the Telegraphs, the Government continues to derive a larger income, and the increase in the receipts of those two departments may fairly be taken to imply that trade is becoming a little more active. That the income from stamps has fallen off would at first sight appear to be opposed to this conclusion. All who have been watching the course of the money market during the past year or two know, however, that business has recently been conducted much more on a ready money basis than formerly. People who used to give bills in settlement of their accounts now pay by cheque, and the result of this change of practice, of course, is that the amount of the payments for stamps is less in proportion to the volume of business transactions than formerly. In reality, therefore, the diminution of the receipts from stamps is not irreconcilable with an improvement of trade, such as the other items of the return appear to point to. Neither is the decline in the miscellaneous receipts, because not only is the income under that head peculiarly fluctuating, but also because the falling off now shown is less than the proportion of the decline which Mr Childers allowed for in his Budget. On the whole, therefore, while it must be remembered that the figures for any single quarter afford but a slender basis upon which to rest conclusions, the returns for the past three months are encouraging so far as they go. They hold out at least a promise of improvement, and there is good reason to believe that if the harvest this year turns out as well as is now expected that promise will be fulfilled.

THE BANK DIVIDENDS.

THUS far the bank dividends announced are scarcely up to the level of last year. In the majority of cases it is true the distribution is at the same rate as in July last. But as will be seen from the following table, there are some instances of a decline. Thus, the London and Westminster now pays at the rate of 16 per cent. as compared with 18 per cent. at this time last year, and the Union has reduced its dividend from $17\frac{7}{16}$ per cent. to 15 per cent.

From this it would appear that the margin of profit was larger during the past six months than it was in the corresponding half of 1882-the banks, that is, were not paying 50 much for their deposits, while they were getting pretty nearly as much for their discounts. No doubt, both trade and Stock Exchange speculation have been very quiet during the half-year, and this will have had some effect upon the earnings of the banks. But the real explanation of the decline in the average dividends will, we expect, be found not to be so much a restriction of business, and certainly not the comparative unremunerativeness of the business done, as the increase in the capital of the banks. At the last meeting of the London and Westminster Bank, it may be remembered the Chairman, Mr Bullen, endeavoured to prepare the shareholders for such a drop in the dividend as has occurred. In consequence of the adoption of the system of limited liability, he reminded his proprietors the capital of the bank had to be increased, and it was hardly to be expected that the earnings would increase sufficiently to admit of the payment of the same dividend upon the larger capital as had been paid upon the smaller. His remarks would have applied with almost equal force to other banks; and although some exception was taken to them at the time, they were nevertheless jndicious, and events have shown them to be justified. A diminution of dividend from this cause-and we expect to find that this is the cause to which whatever falling-off is now shown is mainly attributable-is, however, a very different thing from a reduction of dividends owing to unprofitable or restricted business. The shareholders have to remember that if the adoption of the principle of limited liability has tended slightly to diminish their returns, it has added greatly to their security, by relieving them of much of the risk to which they were formerly exposed. They have now less at stake than they had when they were individually liable to the extent of their whole fortune for the debts of the banks, and they have really nothing to complain of if they have to pay a little in the shape of slightly curtailed dividends for the relief they have obtained.

THE FINANCES OF THE UNITED STATES.

Notwithstanding the disturbing influence of the tariff alterations, the finances of the United States continue to show remarkable elasticity. For the fiscal year ending the 30th June last, the revenue was originally estimated at 83,000,000*l*. Subsequently, however, when the Tariff Act rearranging and reducing both the Customs and Excise duties was passed, it was seen that this estimate would have to be very considerably modified. The Act abolished at once the taxes previously levied upon banking capital and deposits; it provided for the reduction, on and after the 1st of May last, of the Excise duties upon tobacco, which constitute aboat one-third of the entire internal revenue; it largely reduced, as from the 1st of June, the Customs duties upon sugar, from which a very large portion of the total Customs receipts are derived, and it revised and reduced the entire Customs tariff, the reductions to come into force upon the 1st of July, Some other minor alterations are made, but those enumerated are the chief, and their effect upon the revenue of the past year was obviously twofold. Such reductions as came into force during the year directly diminished the receipts, whilst, indirectly also, the changes which were deferred till the 1st of July

tended to curtail the revenue, because the prospect of lower duties caused merchants to restrict their imports as much as possible. That the revenue would fall several millions short of the estimate was thus inevitable, and it is obvious that, unless there had been a general expansion of business sufficient to compensate for the reductions consequent upon the tariff alterations, the income of the past year would have fallen very considerably short of that of the previous twelve months. This, however, it has not done, as will be seen from the following statement :—

	Estimates,	-Actu	al	Income and	01	atlay
	1882-3.	1882-3.		1881-2.		1880-1.
	£	£		£		£
Revenue	83,000,000	 79,700,000		80,700,000		72,100,000
Expenditure	59,000,000	 53,100,000	***	51,700,000	***	52,100,000×

Surplus ... 24,000,000 ... 26,600,000 ... 29,000,000 ... 20,000,000 No very reliable estimate of the proportion of the duties remitted which would fall upon the past year has been made. Probably, however, the Treasury had to surrender not less than about five millions of income, and that in these circumstances the revenue was only one million less than in the previous year is certainly evidence of great elasticity. The expenditure, which was estimated at 59,000,000*l*, amounted, it will be observed, to only 53,100,000*l*. In the brief telegrams that have been received nothing is said as to how this great economy has been effected. In all probability, however, it will be found that a large portion of the 20,000,000l set aside for the payment of pensions has not been distributed, and opinion differs as to whether the saving under this head arises from the expenditure having been over-estimated, or from the fact that those to whom the pensions were made payable have not yet claimed them. In other words, it seems to be doubtful whether any reduction under this head represents a real saving, or only a deferring of payments. In any case, however, the result of the curtailment of the expenditure is, that, in spite of the smaller revenue, there is, instead of the anticipated surplus of 24,000,000l, an actual excess of income over expenditure of no less than 26,600,0001.

Possessed of this enormous surplus, the Secretary of the Treasury was able last year to continue his redemptions of debt on a scale which will appear enormous to those who are objecting to the reduction of our debt at the rate of five or six millions a year. During the year no less than 25,000,000/ of interest-bearing debt was called in, and it may be well to note in passing what the United States have accomplished in the way of debt-reduction since 1866, when their indebtedness had reached its highest point. Comparing the amounts of the debt, and of the annual interest charge on the 1st of July, 1866, and 1883 respectively, we have the following :--

	Total Debt.	Annual Interest Char				
Year.	£		£			
1883	310,000,000		10,300,000			
1866	537,000,000	*******	29,200,000			
Amount of reduction	227,000,000		19,100,000			
Percentage of reduc- tion	42.3%		65.5%			

By reducing the principal of their debt to the extent of 42 per cent., the United States have been able to affect a reduction of fully 65 per cent. in the annual debt charge, the reason being that the rapid repayment of principal has enabled them, from time to time, to cut down the rate of interest upon the unredeemed balance. And this is a point to which those amongst us who are objecting to the more rapid redemption of our debt would do well to direct their attention, for there can be no doubt that if we also are content to make steady efforts towards the reduction of debt, we shall be able in time to refund the outstanding balance at a lower rate of interest.

It would seem, however, that the reduction of the debt of the United States must now be effected more slowly than it has hitherto been. No doubt the reduction in the Customs and Excise duties will lead, as all such fiscal changes do lead, to an increase of consumption. But the amount of the remissions is variously estimated at from 12,000,000*l* to 15,000,000*l*, and it is hardly to be expected that the increase of consumption will at once make good all this loss. The probability, therefore, is, that in the current year the revenue will fall off considerably, while it is not improbable that the expenditure will increase. Thus, so far as can at present

THE ECONOMIST

[July 7, 1883.

be seen, there is no prospect of another such magnificent surplus as that of the past or the previous year being again realised. Nor is this to be regretted. Debt redemption, like other good things, may be carried to excess, and in the United States it certainly has been so carried. Latterly, the burden of the protective Customs duties has borne far more heavily upon the nation than the burden of its debt, and it is now much more important that the former should be lightened than the latter. Besides, the enormous amounts of surplus revenue accumulating in the Treasury have been a constant cause of disturbance to the money market, which has been alternately depleted by the drawing in of the money, and then flooded by its release. If the free balance of the Treasury is diminished, a steadier money market may be looked for, and both in itself and in its effects, therefore, the application of a large portion of the enormous Budget sur pluses of the State to the reduction of taxation rather than to the extinction of debt is to be preferred. Not that the redemption of debt should be suspended. That is not desirable. But what is certainly to be desired is, that in future it should be kept within more reasonable limits.

MR FAWCETT ON STATE SOCIALISM, AND THE HOUSES OF THE WORKING CLASSES.

An article in the current number of *Macmillan's Magazine*, of a much stouter material than the staple of such articles usually consists of, deals with the difficult subjects of State Socialism and the Nationalisation of the Land. The article is by Mr Fawcett, and is designed, as a note tells us, to form a chapter in the forthcoming edition of his "Manual of Political Economy." And if in our heading on the present occasion the reference is restricted to a part only of the subject, and the further question as to the land is omitted, it is because it is impossible to cover on this occasion the whole of that very wide surface. Even within narrower bounds, there will be the occasion for a considerable stretch of argument as to the very important subject which the article opens out.

Mr Fawcett places in the very forefront of the questions which the State as such will have to deal with before long the thorny one of the dwellings of the working classes. Had he carried his investigations among the wants of a class higher in the social scale, but frequently not better off as far as the bare receipt of income goes-that of clerks, mercantile and otherwise, of London and our larger citieshe would, we believe, have found difficulties almost as great, if not quite as pressing, which are only met in their case by the exercise of a very rigid economy. But if we restrict our attention for the moment to the requirements as to house accommodation of the working classes, it is, we agree with Mr Fawcett, almost impossible to overstate the evils arising from the condition of their dwellings, particularly in the larger towns. The first conditions of health, morality, and economy are alike impossible under the circumstances in which many have to live. The cost of better dwellings renders these in many instances absolutely unattainable. As matters stand, it is not too much to say that, even if they could be paid for, they hardly are to be found. This is an evil of increasing magnitude. The following figures, derived from the Preliminary Reports to the Census of 1881, show the increasing proportion of the population of England and Wales now inhabiting towns, as compared with the same conditions twenty years ago :--

PERCENTAGE of POPULATION of ENGLAND and WALES.

Urban population Rural population	1881. 66.6 33.4	6 m m	1861. 62·3 37·7
M	100	100	100

The figures in this table show the increasing predominance

of the urban as compared with the rural element of the population. In 1861, there were 165 dwellers in towns to 100 dwellers in rural districts; but in 1871, the number had risen to 184, and in 1881 had reached 199. And if we were to dissect the condition of matters disclosed by the Census further, it will be found not only that a larger part of our population inhabits the towns, but that it is more closely packed within the towns than it used to be. Accurate general statistics on the subject do not exist, but some inquiries which have been made support this opinion. It is much to be regretted, we may here incidentally observe, that when the Census was taken, both in 1871 and in 1881, on neither of these occasions was it thought worth while to make a close inquiry into these matters in England and Wales, though both times the Govern-ment was pressed to do so. In Scotland, the Censul inquiry was, through the care of the late Registrar-General, Mr Fitt Dundas, arranged in such a manner as to obtain this information. Mr Bright stated recently in his Rectorial address at Glasgow, that in that city 41 out of every 100 families live in a single room, and that beyond those 41, 37 out of every 100 live in two rooms. We believe that the condition of matters in England is superior to this, though very far from being what it should be.

Mr Fawcett comments on these matters, and then puts the following query : "Admitting that there can be no difference of opinion as to the desirability of the object to be attained, the question is at once suggested whether this object is likely to be promoted by erecting dwellings at the public expense? This question Mr Fawcett answers, and rightly, in the negative. The force of authority, whether Imperial or municipal, may very properly be employed to prevent unhealthy houses from being built, or even, perhaps, to prohibit houses from being inhabited when they are in so bad a sanitary condition that they are not only dangerous to their inmates, but may become centres of disease to their neighbourhood, exactly as provisions with respect to solid party walls are enforced to check the risk of fire, and dangerous and crumbling buildings which threaten the safety of passers by in crowded thoroughfares are compelled to be pulled down. But the line where judicious State interference stops lies close to these limits. To apply either money raised by the State or the local authorities to the matter is open to many and serious objections, and particularly to the very important one of being in the end no advantage to the very class it is intended to serve. Those who know the manner in which compulsory powers operate, how hardly they are apt to press in individual cases, though they may be generally administered with the utmost consideration, will be the most anxious not to extend their scope. Yet there is a point, though a thorny one, in the case of which it would seem to be difficult to avoid some form of compulsory power-and that is the acquisition of sites. Mr Fawcett's remarks on these matters remind us of a difficulty in respect of the house accomodation of the working classes which we should be glad to know how he would be disposed to deal with. Mr Fawcett refers, and with a satisfaction in which all who have any knowledge of the subject must share, to the very great efforts which many of the working classes are making to become the owners of their own dwellings. He estimates that in England alone there are more than 700,000 members of building secieties. From some knowledge of the operation of these societies we are inclined to think that this very large number does not show exactly how many persons are on the way to purchase their own houses, but that it probably includes "depositing" members-those who use the societies as a description of savings' bank, as well as those who are buying their own houses by instalments; those members who, in reality, advance a large part of the capital required, which is paid off bit by bit by the purchasing members, through a long series f small sums. The real purchasers of houses are, we believe, a good deal fewer than the total stated. Be this as it may, the numbers certainly show a steady thrift on the part numbers certainly show a steady thrift on the part of many persons, which is most desirable to encourage. But as to the point we have raised. It is desirable that in all cases the purchaser should be able to acquire the freehold of his own dwelling. But there is there not a confreehold of his own dwelling. But then, is there not a considerable number of cases in which it is not possible to do that, because the ground landlord, who may be a corporation, perhaps the civic authority of the town, is disinclined or

unable to grant more than a lease for a comparatively show term of years ! How should these cases be dealt with ? T give compulsory powers of acquisition would be a very drastic remedy. If given, at what class of dwelling should it stop! Should it include the dwelling for the workman who is paid weekly wages, and exclude that for the clerk who perhaps receives no higher a remuneration, and whose difficulties we have slightly referred to above ?

We just mention these matters as instances of the difficulties which open out the moment compulsory powers come under consideration. The particular point will no doubt be found capable of adjustment. One thing is certain, that the subject of the dwellings of the working classes will have to come under serious consideration soon, and that the existence of hindrances of the kind we have referred to, which are capable of being removed, increase the demand for more sweeping and dangerous remedies being applied.

MOVEMENTS IN THE PRICES OF COMMODITIES IN THE FIRST HALF OF 1883.

Is manufactures, and to a considerable extent in raw materials, there has in the first half of 1883 Leen a decline in prices, which, following upon the very distinct and general depression which prevailed during the final quarter of 1882, constitutes a fall of somewhat striking importance. It cannot be said, however, that food products are lower during the half-year. There are, indeed, instances where a recovery has to be recorded. Wheat and four are not cheaper, and English wheat, of which a good quality has latterly been brought to market, show better Gazette averages than was the case six, nine, or twelve months ago. Prior to last harvest, however, English wheat of an inferior quality found its way to market. Potatoes, rice, sugar, and coffee are dearer over this period; and meat, tea, and a number of other of our most important descriptions of foods are not lower, though prime mutton is cheaper than it was just after Christmas. There was early in the year a sharp rise in the price of meat, but the increasing arrivals from America, where prices are lower, and the consignments from New Zealand and other parts of Australia, have had the effect of cheapening it. A curious effect of the power of Royalty was seen during the half-year in respect to a notification that the Queen had decided that lamb should not be served at the Royal table during the season. The mortality amongst the lambs had been very great, and the price had run up to a point hitherto unexampled. But this notification was sufficient to depress the market at one time nearly 50 per cent. It was subsequently notified that this announcement was not intended for public observance, We

and the consumption extended, and prices improved. Returning to raw materials and manufactures, in which complaints concerning the unremunerative condition of prices have been so general, it is to be remarked that this has been very true, both of the iron and woollen trades, for which America is so important a market. To effect sales, English merchants have had to place themselves upon a level with American prices; and it has been, at any rate, some help to them that they have been enabled to buy wool and iron-stone cheaply. Cotton, silk, hemp, and jute are also cheap, though jute has slightly recovered from the extreme depression at the close of last year. But as important as, if not more important than, any of the productions of the country is coal; and here, at any rate, the consumption has been large, and prices, as a whole, well sustained. House coal is dearer on the twelve months; and so is South Wales steam coal, for which the demand just now is specially active. In the Northern and Midland counties, manufacturing and house fuel are comparatively in less active est; but, altogether, the coal trade contrasts favourably with the other industries of the country. The following table gives the quotations week by week of

thirty four leading commodities :

It is to be remarked that these prices do not, as a rule, deal with manufactured articles, but mainly with raw materials and food products. Out of the 34 quotations, fifteen show a fall and thirteen a rise, while six are unaltered upon the half-year. Looking back over the twelve months, it will be found that the most pronounced fall occurred in the final quarter of 1882, and that while prices are generally lower than in July last year, the depreciation in 1883 is mainly confined to manufactures.

The leading fluctuations quarter by quarter in the past twelve months are summarised below :-

		SECOND H	ALF of	1882.

BUSINESS NOTES.

which has obtained the powerful support of Mr Bright, is one with which it is impossible not to sympathise. Out of every hundred persons living in India, Mr Bright said, eighty are engaged in agriculture, and of these 80 per cent. are dependent upon the village money-lender. In the advances they obtain they are charged from 12 to 36 per cent. interest, the average rate being about 24 per cent. and having to pay such enormous rates for the money they used, it is no wonder that the ryots are constantly on the brink of ruin. To provide a remedy for this state of things, it is proposed that English capitalists should establish land banks, which would make advances to the ryots on comparatively moderate terms, and there is no doubt that banks established for this purpose elsewhere have proved successful. The venture is thus one which has example and experience to recommend it, and which holds out a fair prospect of benefiting those who engage in it, as well as those whom it is intended to serve. There is, however, one point in connection with it upon which further information is desirable. Sir W. Wedderburn believes that the money-lenders themselves would be glad to become partners in such banks, because, although they would receive a smaller return upon their capital, they would have greater security. If, however, the banks are to have only the ordinary processes of the law open to them for the recovery of their advances, the money-lenders, should they join in, will not be in a better position as regards security than they now are, and their expectation of gain is founded upon the hope of the Government agreeing to act as the agent of the banks for the recovery of their But for the Government to act as the agents of loans. money-lenders is a somewhat perilous experiment, and it is to be hoped that it will not be ventured upon until its possible consequences have been very thoroughly considered.

THE DEPRECIATION OF GRAND TRUNK SECURITIES.-It seems somewhat of an anomaly that, coincident with a really large expansion in earnings, the prices of Grand Trunk Railway of Canada issues should have fallen, instead of advancing during the half-year. The following table, however, shows that a reduction has taken place, ranging in the instance of Grand Trunk Ordinary to nearly one-third of its market value in December last, to slightly over } per cent. in the 5 per cent. Debenture stock :-

	Marke Value, June 3		Marke Value Dec. 30 1882.	Fall % on Price of Dec.		
Grand Trunk Ordinary	19					30.3
Great Western of Canada Shares	703			***		10.7
Grand Trunk 3rd Preference	45			***	-	240
Do 2nd do	891				-	8.5
Do 1st do	103		$104\frac{1}{2}$	***		14
Do 5 per cent. Debentures	1171	•••	118		-	0.4

The traffic receipts of the company have now been published to the end of June, and the increase shown is 227,391*l*, which foreshadows that a portion, at any rate, of the third preference dividend has been earned, while it may be presumed that the minimum 3 per cent. will be forth-coming on the Great Western of Canada capital-perhaps something more. This state of affairs is decidedly encourage ing, viewed from the standpoint of the financial position a year ago, and, consequently, the decline in quotations must be attributed to other causes, chief among which is the rapid growth of the company's great rival, the Canadian-Pacific Railway. It is unnecessary to recapitulate the various points at which competition will be experienced, nor At the same to offer suggestions on the subject. time, holders of the securities will do well not to lose sight of the fact that the population and resources of Canada are rapidly increasing, and that, therefore, though the traffic at present is not too much for the carrying powers of one undertaking, in the not far distant future it is possible enough that the resources of the two undertakings may be fully taxed. The one thing to be avoided is the ruinous cutting down of rates, which, unfortunately, so often takes place on American and Canadian lines. This is a subject because banks for India advocated by Sir W. Wedderburn, and should, make their opinions felt should such a hurtful

process be adopted in regard to the Canadian-Pacific. Returning to the prices above given, it will be seen that the netaring to a reduction is in Grand Trunk Ordinary, that nost importantly, that in the Third Preference being but slightly less, while the Second Preference and Great Western of Canada shares have also suffered a material fall. Neither Grand Trunk First Preference nor the Debenture Stock is very much lower, as it is considered that the earnings of the Grand Trunk system must be reduced to a very improbable extent before the interest on these issues could possibly be affected.

FAILURES IN THE UNITED KINGDOM .- The statistics of failures compiled by Mr Richard Seyd show that during the past-half-year there was, as compared with the corresponding period of 1882, a decided increase in the number of insolvencies in the wholesale branches of trade, but a diminution in the number of the failures amongst retailers. The figures for this and previous years are :----

st Half-y	ear. No.	of Failu	ires. V	Vholesa	le.	Retail.
		5,698		734		4,964
1882		5,891		620		5,271
1881		6,270		690		5,580
1880		6,662		732		5,730
1879		8,990		1,553		7,437
1878		7,516		1,327		6,189

These figures are not unsatisfactory. It is to be remembered that the probability of a much more stringent Bankruptcy Act being brought into operation before long has of late been distinctly before traders. On the part of all who felt themselves in seriously embarrassed circumstances, there must therefore have been a disposition to avail themselves of the easier conditions of the existing law, and if this had led to an increase in the number of suspensions it would not have been at all surprising. Instead of an increase, how-ever, there is a decrease, and this certainly speaks well as to the general soundness of business. That the figures in the wholesale trades have tended to increase, and those in the retail branches to diminish, is probably to be accounted for by the fact that, while the wholesale prices of commodities have been declining, there has not been anything like a corresponding fall in retail prices. The retail dealer has thus been able, in many cases, to increase his margin of profit at the time when wholesale profits were being curtailed. The increase in the wholesale failures arises largely in the various branches of the cotton, chemical, and leather trades. As to the distribution of the failures in the wholesale trades, we have the following details :-

THE SILVER COINAGE IN GERMANY .- The discussions which have taken place in the German Reichstag on the standard of value in Germany has been the subject of two articles recently in the Frankfurter Zeitung. Germany still retains a portion of its full-weighted thaler pieces in use, not so much in simpleti much in circulation as in the cash reserve of the Imperial Bank, where, according to the German arrangements, all silver in that form being legal tender, serves as well as gold for the basis of the note circulation. The recommendation now is to let it be to let it be generally known that Germany would, in getting rid of this silver, only sell every year a small quantity of the metal the object for this being a design to avoid an undue the metal, the object for this being a desire to avoid an undue depression of the market, which might be readily swamped by

on the belief that when the agreement of the Latin Union terminates, as it shortly will, other continental nations besides themselves will be likely to desire a gold coinage. The reasons which prompt Germany to act quickly in this respect are obvious; but it might be advisable for that country to ascertain first what the actual proposals of the Latin Union on the point were before taking such a step. In connection with this subject, it is worth notice that the importation of silver into Austro-Hungary was about 200,000l in the first quarter of this year, against a mere fractional amount in the corresponding period last year. Situated as Germany is, with neighbouring countries employing such different currencies from her own, any alteration in the use of silver by her would have a wide influence.

THE AMERICAN COTTON CROP.-In its annual statement as to the condition and prospects of the United States cotton crop, the New York Financial Chronicle, of the 23rd ult., gives the following details as to acreage, &c. :-

	Acres,				
	1883.		Acres,	Inc	erease.

As to the maturity, cultivation, and condition of the plant, the conclusions reached are as follows :-- 1. As to maturity, the crop on the 1st of June was evidently a late one, and even more backward than last year's, which was also late, especially in the Atlantic States, by reason of the cold May. This year April, as a rule, was stormy, and May, until towards the close, was cool and dry. Consequently, in some of the more northern sections, the late plantings had hardly started on the 1st of June. Since that date, however, there has been a decided change in temperature and rainfall, and growth has been rapid. Still, the plant is backward, and almost everywhere smaller than at this date a year ago. 2. The cultivation up to the 1st of June was thorough and uninterrupted, rains not being so frequent as to delay farm work. Hence the general report was that the fields were then clean and free from weeds. Since early in June there has been more rain than needful, and quite decided complaints are coming up from various districts that grass is becoming troublesome. This in many cases is greatly exaggerated, and may all speedily change by a return of dry weather, checking the growth of weeds, and giving oppor-tunity for a renewal of farm work. We should not, therefore, on this occasion have referred to it, were it not for the small and slow development of later plantings in the more northern latitudes, which leaves such sections more easily injured in this way than is usual at this season. A very young cotton plant is no match for crab-grass; besides, such a plant cannot during wet weather grow the root it will so much need later on. 3. The condition of the crop now is therefore in general good, and if the rains stop we should say that with the exception of being backward (which in itself is of very little importance) the condition is very good. In the Gulf States and in Arkansas, with but few exceptions, everything looked very promising indeed at the latest mail dates. The present doubt, so far as the circumstances justify a doubt, is confined mainly to sections in the Atlantic States. 4. As to commercial fertilisers, there is no certainty with regard to the statement that their use has increased again this year, except in North Carolina. Not only has the purchase been enlarged in the aggregate, but the district taking them is being widened. Furthermore, home-made manures are all the The recommendation to act rapidly in this manner is based small farms adds greatly to the importance of this fact. time receiving more attention, and the growing number of

CHARTERING IN THE RICE TRADE. TO THE EDITOR OF THE ECONOMIST.

SIR,-The rice trade has always been one of great uncertainty and speculation. There is, however, one feature in it which seems in these days almost too absurd to be true. The custom has been to charter for the carriage of the rice a great number of Italian, Norwegian, and English sailing ships in the month of July, when positively the crop which is to be harvested in December is not yet in the ground. These vessels have to come to England to load coals at a Welsh or East coast port for Suez, Aden, Ceylon, or Bombay. Even steamers in England, with voyages engaged for America or the Black Sea, secure freights a-head, to load coals out as above, and rice home.

As might have been anticipated this year, from a failure in the rice crop, about 150 ships and steamers were unable to be loaded. The charters were cancelled at a loss of 75,000l or upwards, besides a heavy loss on the rice by the merchants, and the ships and steamers had to sail away to other ports to get homeward cargoes. Such an amount of seeking tonnage depressed freight in the Indian and other ports, and it is most probable that almost every vessel has made a disastrous voyage. Is it too much to hope that the folly of this proceeding

ish houses, will not enter again into such transactions, though for many years they have been persistently carried on ? Tonnage will be found when wanted, even though it may be for 400,000 tons of rice, or even more. Let the demand for steamers and ships arise in its natural course, when some calculations can be made as to the crop. Steamers can always be had at the same price as sailing ships, and there can be little doubt that, on the average, both merchant and shipowner will do better.

It may be said that no ship or steamer will go out unchartered home. That may be so with foreign ships, but not with ours, in these times when telegrams will always find tonnage close at hand. The enormous amount of money lost in rice during the past season is well known, and these transactions could not be carried out in all their rashness if the banks were more careful in giving their credits. The freight market is now in a depressed state, and shareholders themselves should therefore be careful that their managers do not risk their capital. If the Bremen, Hamburgh, and other rice consumers want to charter, let them do so in their own countries, with foreign tonnage, but let the same course be followed in the rice trade as in any other trades, and supply and demand as it arises regulate itself. These merchants who would take advantage of the low freights and charter now, run the risk of the price of rice being

lower, or of another failure in the crop, while the foreign shipowners and the managing owners of steamers in this country have to remember that the coal freights out are lower than ever known, and that they can only guess at what homeward freights might be next January or February, when the rice comes down to Rangoon and Moulmein for shipment .- I am, sir, yours, &c.,

Money for discount is still scarce, and will continue so for another week, until some of the capital temporarily withdrawn returns to the market in the form of dividends. All commercial paper now goes to the Bank, and only the best bankers' bills can be placed under the official rate, at 2³/₄ per cent. per annum. Notwithstanding the paper that ran off at the end of the month, there is an increase of 28 millions in the discounts at the Bank, so that the bills taken in since the previous return must have there is an increase of 28 millions in the discounts at the Bank, so that the bills taken in since the previous return must have exceeded in amount those that matured. The profits for the week also show the unusually large sum of 1,100,000f, but a part of this may be accounted for by the dividend on Rente held by the Bank. The London exchange is easier at 25f 28c, and no gold operations either way have taken place. The cash reserve to day was composed as follows :---

Gold	July 5. francs. 1,001,942,821 1,044,900,533	•••••	June 28, francs. 1,005,182,862 1,049,905,644

The issue of Treasury Bills for the current requirements of the The issue of Treasury Bills for the current requirements of the State departments, recently resumed by an increase in the rate of interest allowed from a maximum of 1 per cent., at which it had stood for two years, to 3 per cent. had been almost suspended for some years past. Under the Empire this was one of the chief resources of the floating debt, and the bills created in 1863 reached a total of 677 millions of frances, of which 310 millions were still in circulation at the end of that year. Since the establishment of the Republic, the greatest amount issued in any one year was 600 millions in 1872, but this was during the operations for the payment of the war indemnity, when the Minister of Finance required to have considerable funds at his disposal to take advantage of opportunities of purchasing foreign bills. The rate of interest allowed during those operations reached as high as $5\frac{1}{2}$ per cent. It was gradually reduced to $\frac{1}{2}$ per cent. in 1878, and at the end of that year the outstanding bills amounted to only 47 millions, and as these ran off and the public found better means of employing money, the Treasury bills in circulation at the end of 1879 fell to 34 millions only, and the total was still lower at the end of 1880. In 1881, the rate of interest was raised to 3 per cent., and in December 57 millions of bills were outstanding. But from July of that year the rate was again 1 per cent., and at the end of 1882 the total had again fallen to 3 millions. As the financial law authorises the Minister of Finance to have bills to the amount of 400 millions in circulation at once, the Treasury had a wide margin before it when it recently offered 2½ per cent. per annum for three months' deposits, and 3 per cent. for one year. The French revenue from indirect taxes does not compare

unfavourably with last year, although the too sanguine expectations formed in the Budget have not been realised. The last returns issued are for the month of May, which left a small de-The last ficit of 300,000f on the same month of 1882; but the first five months of the year gave nearly 12 millions more than last year. Compared, however, with the estimates, there was a deficit of over 8 millions in May, and of 19 millions in the five months. The Customs' duties in the five months yielded 9 millions ; Excise duties, 11 millions ; and the posts and telegraphs, 2 millions more than in 1882; but there was a loss of 11 millions in registration and succession duties and stamps. The decrease may be partly accidental, but it is also due to the diminution in the for-The decrease may be mation of new companies, sale of houses and land, &c. The increase in the Excise duties is obtained almost wholly from alcohol and tobacco, which gave together 9 millions more than last year. The Mimister of Finance counted on an increase of 8 millions—from 40 millions to 48 millions—in the produce of the tax of 3 per cent. on interests and dividends; but the first five months left a deficit of half-a-million. This raises the total of the deficit on the estimates to 23 millions at the end of May.

Obstructionists in the French Chamber are now doing their best to prevent the ratification of the new railway conventions, and have succeeded in blocking all progress with the Budget of 1884. M. Tirard presented his Ordinary estimates some months back, but deferred his Extraordinary Budget for Public Works until after the negotiations with the railway companies, as on the success of those negotiations it depended whether the Government would have to provide 500 millions or 600 millions for railways in 1884, or whether the companies would themselves find the capital and construct the railways, relieving the Government of the task. The conventions have been signed, and it was expected that they would have been voted immediately. But the railway committee in the Chamber comprises a number of members opposed to the conventions, and who would not be money could only be lent to the next the State. They have retained the conventions so long that,

THE ECONOMIST.

[July 7, 1883.

even if the reports were drawn up, they could not be now discussed in the Chamber before the prorogation, and an autumn Session will have to be held. The Minister of Finance cannot present his Extraordinary Budget until the adoption of the conventions is certain, and the Committee on the Ordinary Budget, before reporting on those estimates, is waiting to see the Extraordinary Budget. The consequence is, that the financial business of the Parliament is at a standstill, and that there is a growing conviction among the public of the incapacity of the

growing conviction among the parts. present Chamber for any useful work. Harvest prospects in France were perhaps never more en-Harvest prospects in France were perhaps never more encouraging than at the present moment. For the last three months the weather has been favourable for the succession of farm work and the maturing of the crops. Night frosts in the spring were rare, and there has since been an almost entire absence of thunderstorms. The crop of grass has been cut and the hay made and carried almost without interruption from rain, and the quality is exceptionally good. From all parts of France the wheat is described as presenting a splendid appearance. It is clean and free from blight; the only complaint heard is that the number of sheaves will be small, but where the crop is light a compensation will be found in the well-filled ears. Rye is already compensation will be found in the well-inted ears. Kye is already being cut everywhere, and within the next fortnight the wheat harvest will be general. All that is now desired is moderate heat in the meantime, as there is a danger of the grain ripening too fast; and dry weather to remove the crops. Wheat has been cut on the plateau in Algeria, and there also the crop is described as magnificent. Accounts of the prospects of the beet root crop and of the vines are most encouraging, and with only a continuance of favourable weather, the year will rank as an exceptionally good one for farmers.

The silk market has been more quiet during the week, but prices have been maintained, and, in spite of reports of weakness in London, China silks again advanced 50 centimes, but the dealings have been of limited amount. The abundance of the yield in Italy is confirmed, and prices of cocoons rule 25 per cent. lower than last year. The exports of silk stuffs in the first five months of the year amounted to only 121 millions, against 137 millions in 1882, but the diminution is due to a falling-off in the consignments to the United States, where stocks are being allowed to run low, in view of the reduction of duty from the 1st July.

The receipts of the Suez Canal in June amounted to 6,020,000f. against 4,540,282f in the same month of 1882, and 3,526,358f in The total for the first six months of each year was : 1880. 35,329,248f in 1883, 31,934,554f in 1882, and 24,567,577f in 1881

GERMANY AND AUSTRIA.

(FROM OUR OWN CORRESPONDENT.)

VIENNA, July 4.

The Prussian Upper House of the Landtag has rejected the plan of a canal from the Rhine to the Ems by 70 votes against 65, although Ministers pleaded in favour of it. Count Von Moltke, from a military point of view, prefers railways to canals, but he admits that for conveying military provisions canals may be also very valuable indeed. The reasons for the rejection of a scheme for which indeed. The reasons for the rejection of a scheme for which the political economists of Germany have during twenty years pleaded in vain are partly personal and partly general. The Silesian members, who possess great influence in the Landtag, fear that the proposed canal might damage the coal trade of Silesia by enabling Westphalia to enter into competition with the great eastern coal districts. Besides this, there is a party both in Germany and in Austria, who support the opinion that railways have rendered canals altogether useless for the future. railways have rendered canals altogether useless for the future.

The reporter of the Commission alluded to the state of things The reporter of the Commission alluded to the state of things in France, where the canals require a subvention from the Government greater than the transport charges for coals, wood, &c., upon the Prussian State Railways, which do not amount to more than two pfennigs per German mile for two hundredweight. The cost for the canal in question is valued at 46 million marks, and if the whole network of canals planned for Germany were constructed, an outlay of from 300 to 400 million marks would become necessary. As the pecuniary million marks would become necessary. As the pecuniary success of canals is by no means assured on account of the competition of railways, this enormous expense does not in the eyes

of their opponents seem justified. The yearly meeting of the representatives of the German Trades Unions was held in Stralsund last week. The aim of the association has for a long time been to support all work-people in cases of sickness and old age. But it has hitherto been so unsuccessful, that, although it was instituted more than twenty years ago, the number of representatives who assembled at Stralsund was thirty-three only, and the total number of

members whom they represented does not exceed 25,000. This proves how much the country was in need of legislation on this

Prices on the Stock Exchange are much the same as they were last week, and the money market is pretty firm, owing to the commencement of harvest business. The discounts of the German Imperial Bank had increased by 37 million marks on the 23rd June ; the circulation of notes increased by 361 millions ; coin and bullion decreased by 5½ millions. The Austro-Hunga-rian Bank's discounts increased by 7½ million florins. It is probable that money will be plentiful on the market of Vienna, because almost 100 million florins of interest have become due, 30 millions of which are on securities of the State.

A table of the prices of Austrian and Hungarian Rente during the last six months shows that the prices persistently rose during that time.

The railways of Austria and Hungary, which are guaranteed by the State, have published their accounts. These show that the subventions paid during 1882 were less than those paid during 1881. The State paid 14,266,991fl in 1881, and during 1881. The 13,853,988fl in 1882.

Yesterday a new line was opened from Innsbruck to Landeck. It extends over 73 kilometres, and forms one-half of the Arlberg Railway. The entire line from Innsbruck to Feldkirch (in the Vorarlberg) will extend over 1361 kilometres, 101 kilometres being the length of the large tunnel through the Arlberg. The Bill sanctioning this railway was passed in May, 1880, and next year the line will be opened, so that it will be completed in half the time originally considered necessary for its completion. At the end of May the tunnel was 8,374 metres long. In Hungary, a central clearing-house for railway accounts is to be instituted.

According to the last news received, Austrian and Hungarian as well as German, ironworks are doing well. Extensive order were received, especially by waggon and boiler manufacturers and by bridge and ship builders.

fra	148 395 000	119,514,000	133,651,000	177,860,000	153,399,000

The amount of the "other deposits," compared with the "other securities," showed in 1873 a deficiency of 5,223,120*l*; in 1880, an excess of 7,838,253*l*; in 1881 an excess of 6,331,398*l*; in 1882, an excess of 934,426*l*. In 1883, there is a deficiency of 2,447,055*l*.

In 1880, the American and continental exchanges being for the time in our favour, bills were absorbed $\frac{7}{8}$ below Bank rate, and money was easy. There were reductions of 4,500,000*l* both in the public deposits and other securities, and the Bank reserve was reduced 500,000*l*.

In 1881, there was a decrease in the public deposits of 2,306,0651, the other deposits at the same time increasing 97,3401. The Government securities rose 880,9391, while included the turn of the half-year. The Bank rate was 12 per cent., while in the open market bills were taken at 12 per cent. The discount houses lowered their deposit rates.

In 1882, the money which was borrowed from the Bank at the end of June was still on hand, the Bank requiring the loans to be for ten days. Money was in consequence offering at a trifle over 1 per cent., while best 3 months' paper was negotiated at $2\frac{1}{8}$.

The following are the principal items in the accounts of the undermentioned continental and American banks for the latest week published compared with the previous statement :---

Converting the reichs mark at 1s; the Austrian florin at 2s; the Dutch florin at 1s 3d; and the franc and peseta at 25 per 1. American currency is reduced into English money at 4s per dollar.

DISCOUNT AND MONEY MARKET .- Although on Friday and Saturday last week (the last two days of the half-year) there was an active inquiry for short loans at the Bank of England, still it is apparent that inquiry was not so extensive as is usually found to be the case at that season. Hence the repayments out of the dividends received to-day do not come up to the average, and a larger proportion of the dividend money remains in the market. Nevertheless, it is to be remarked that in the discount market rates have not eased off so rapidly as had in some quarters been expected. The quotations current are but slightly below those current a week ago, when money was short, and any advances obtained from the Bank have involved the obligation of paying 4 per cent. for ten days. This regulation undoubtedly checked the demand at the Bank-a matter which the directors have had in view for some time past. It is a distinct advantage to the market that the quotations current should not have fallen more decidedly, for with fine holiday and harvesting weather the summer withdrawals are likely to commence soon, and it is recognised that the present ease of money is temporary. Meanwhile, the exchanges keep fairly favourable to this country-a condition of affairs that would very probably be wanting were this market to fall very appreciably. To-day, the demand for money was slack, at the rates given in our usual table.

In this week's Bank return, the alterations are exceptionally large, owing to the period covered including the turn of the half-year. The reserve has fallen over $1\frac{1}{4}$ millions, and the proportion to liabilities has declined $6\frac{1}{8}$ per

THE ECONOMIST.

[July 7, 1883.

cent. Since the return was made up, 36,000l in gold from abroad has been sent in.

Silver has been purchased to a small extent for the Mint at $50\frac{1}{2}d$ per oz, which is $\frac{1}{16}d$ higher than the price at the close of last week. Money has further cheapened in India, and the Bank of Bengal, which lowered its rate of discount to 7 per cent. last week, has again made a reduction of 1 per cent., viz., to 6 per cent. On Wednesday, the India Council disposed of 60,000 rupees in bills at 1s $7\frac{1}{16}d$ per rupee, and 26 lacs of rupees in telegraphic transfers at 1s $7\frac{1}{16}d$ per rupee. Yesterday a special allotment of 2 lacs of rupees of telegraphic transfers was made at 1s $7\frac{1}{2}d$ per rupee, and to-day there was a further allotment of 1 lac at the same price, in addition to 10,500 rupees of bills at 1s $7\frac{1}{16}d$.

Tenders were received at the Bank of England on Monday last for 1,000,000*l* in Treasury bills, the whole being allotted in 3 months' bills. Applicants at 99*l* 3s 11d, which price is equal to a discount of rather more than $3\frac{1}{4}$ per cent., receive in full. The bills replaced by the above issue sold at a discount of about $3\frac{1}{6}$ per cent.

The Frankfurter Zeitung observes that the statement of the Bank of Germany of the 30th ult. shows a demand for accommodation rather larger than usual. The bills discounted increased 2,408,000*l* on the week, and the advances 1,900,000*l*. The total requirements for accommodation, bills and advances together, in the last fortnight of the quarter, have been 6,107,000*l* this year, against 5,946,000*l* last year. The note reserve is now 5,321,500*l*, having been 10,780,000*l* the week previous, and having thus fallen 5,458,500*l* on the week.

We subjoin our usual discount quotations for paper having various periods to run, and a comparison with previous weeks.

The current allowances for deposits at call and notice are given below :---

On Wednesday the Bank of Bombay reduced its discount rate from 9 to 8 per cent.

The Bank of Bengal yesterday further reduced its discount rates from 7 to 6 per cent.

The discount quotations current in the chief continental cities are as under, market rates again showing firmness in Paris and Germany.

THE STOCK MARKETS.-Business during the week has in again been of a very lifeless character, but in several direc-

tions prices have advanced. The apprehensions at first caused by the news of the outbreak of cholera in Egypt has subsided somewhat, and this, besides affecting Egyptan securities specially, has indirectly influenced the general feeling. Money also is easy, with every appearance of becoming cheaper next week, while the weather has been favourable alike for agricultural purposes and for travelling. The stimulus given last week to Electric Lighting undertakings in connection with the Fisheries Exhibition has died out, and these securities have given way. The Bank dividends have not given general satisfaction.

BRITISH GOVERNMENT SECURITIES.— The tone has continued weak for the Three per Cents. Bank Stock has, however, advanced 2.

FOREIGN GOVERNMENT SECURITIES.—As was to be expected, Egyptian bonds have regained some of the depreciation which took place last week on the news of the outbreak of cholera. Russian stocks have further advanced, but in Turkish there has been a gradual decline. Other changes are unimportant.

The following are the changes for the week, taking the latest unofficial quotations :--

HOME RAILWAYS.—To-day the market for Home Railway stocks was dull, in consequence of the strikes in the North, but the week's record of movements is not an unfavoumble one, owing chiefly to the splendid weather. Besides the changes given below, a rise of 4 has taken place in Taf Vale, and a fall of $1\frac{1}{2}$ in North London.

The following shows the principal changes for the week in the quotations of ordinary stocks comparing the latest unofficial prices :--

AILWAYS.—Buenos Ayres Great Southern Stock is 3 higher, Central Argentine 2, Central Uruguay Shares 1, East Argentine 1, Mexican Ordinary and First Preference 1, and Minas and Rio shares 4. The Obligations have been quiet.

COLONIAL GOVERNMENT DEBENTURES .- These securities have been firm, with the exception of Western Australia 4 per Cents., which have relapsed $\frac{1}{2}$ on the announcement of the new issue.

AMERICAN RAILROAD SECURITIES .- Business has been quiet, and the movements have been solely in response to the tone at New York. This at the beginning of the week was dull, but yesterday buying of a comparatively strong character set in, and the market here was quick to follow the lead. On balance, therefore, there is an advance generally. Central of New Jersey Shares are quoted 5 higher, and other issues $\frac{1}{2}$ to 1.

BANKS.-The principal movement has been in London and Westminster, London Joint Stock, and Union of London Shares, which are $1\frac{1}{2}$, $\frac{1}{2}$, and 1 lower respectively. Anglo-Egyptian have risen 1.

MIGGELLANEOUS.—Suez Canal Shares have risen 4, Hud-son's Bay $\frac{1}{2}$, New Zealand Trust and Loan $1\frac{1}{2}$, Alliance British and Foreign Insurance 1, and British and Foreign Mathe 1. Analy 1. Such are Marine 1. Anglo-American Brush Light, 71 paid, are down 1. Royal Exchange Assurance 20, Cape Copper Mining 1. Colorado Mining 3. Anglo-American Telegraph Deferred 1. and London Transmoster 3. Deferred 1, and London Tramways 4.

BULLION, -- The following is taken from the circular of Messrs Fixley and Abell, dated July 5 :--Gold.-- A few small orders for India have absorbed all the bars that have come to hand during the week, but there has been no

demand for coin of any description, and all arrivals from Germany and Holland have been sent to the Bank, the total so disposed of being 152,000%. The Guardiana has brought 15,740% from Buenos Ayres. The Medway has taken 4,000% to the West Indies; the Shannon has taken 37,90 % to India—total, 41,900%. Silver.—A revival in the demand for the East, and also for the Mint, has not only kept our market firm, but the price has improved tad per oz; bars having been sold yesterday at 504d. The arrivals have not been very important; they comprise 50,000% from New York, and 39,000% from the River Plate. The P. and O. steamers Shannon and Assam have taken 62,000% to India. Mexican Dollars.—The amounts to hand during the week are valued at about 20,000% from New York; the market is firm at the quotation given below. The P. and O. steamer takes 27,040% to China and the Straits.

and the Straits.

Quotations for Bullion-Gold. - Bar gold, fine, 77s 9d per oz standard; bar gold, containing 20 dwts silver, 77s 101d per oz standard; Spanish doubloons, 73s 10d per oz; South American doubloons, 73s 81d per oz; United States gold coin, 76s 31d

For the corresponding period last year a dividend was declared at the same rate, and 25,000/ added to reserve. *Imperial.*—The directors recommend a dividend at the rate of 8 per cent. per annum for the past six months, placing 5,000/ to reserve and carrying forward about 4,000/.

ECONOMIST. THE

Lancashire and Yorkshire .- The directors have declared for the half-year ended 30th June the usual interim dividend of 8s per share, free of income tax.

Liverpool Commercial .- The directors have declared a dividend for the half-year ended June 20, free of income tax, at the rate of 19 per cent. per annum.

-The bank has declared a dividend for the half-Liverpool Union.

Licerpool Union.—The bank has declared a dividend for the half-year ended 30th June at the rate of 10 per cent. per annun. London Joint Stock.—The directors will declare the usual dividend of 15 per cent. per annum, carrying 15,900l to the guarantee fund, which now stands at 651,200l. London and Westminster.—The directors will declare an interim dividend of 8 per cent. for the half-year ended 30th June, on the in-creased capital of 2,800,000l, carrying forward 29,938l. The rest, or exercise fund, et al. 641, 360l

surplus fund, stands at 1,641,3600. London and Yorkshire.—The net profits for the half-year ended 30th June were 7,6350, including 2,4660 brought forward. A dividend is proposed at the rate of 5 per cent. per annum, which will leave 4,022*l* to be carried forward. At the corresponding period last year the dividend was at the same rate, but the balance carried forward was 3.448/.

was 3,448. National of Australa-ia.—The net profits for the half-year ended 31st March, including the sum brought forward, amounted to 66,158. A dividend has been paid at the rate of $12\frac{1}{2}$ per cent. per annum, together with a bonus of $1\frac{1}{2}$ per cent. per annum, leaving 10,158/ to carried forward. be

North and South Wales .- The bank has declared a dividend of 10s per share for the half-year ended 30th June, together with a bonus of 7s 6d.

North-Western .- The directors have declared an interim dividend for the six months ended June 30 at the rate of 8 per cent. per annum, free of income tax.

Union of London .- The dividend will be at the rate of 15 per cent. per annum ; and after payment of interest on the new shares 27,000/ will be carried forward.

ASSURANCE COMPANIES.

Edinburgh Life.—The company issued during the year 1,049 policies, insuring 496,224/, and yielding in new premiums 18,688/, of which 3,003/ was by single payments. The sum of 8,556/ was received in the purchase of annuities. The income was 256,335/, of which 180,226/ was from premiums, and 76,014/ from interest. The claims were 117,169/. After meeting these and other charges, 90,267/ was added to the assurance and annuity fund, which at the close of the were represented 1.707,117/. The total assets at March 31 were the year represented 1,797,1177. The total assets at March 31 were 1,951,8724. A dividend has been declared at the same rate as last

1,951,57.27. A dividend has been declared at the same rate as last year, viz., 12 per cent., free of income tax. Norwich Union Fire.—At the annual meeting a dividend of 2l per share, 12l per share paid, was declared, the total dividend paid for the past financial year making 33 per cent. The corresponding dividend for the previous twelve months was 5l per share. Realm Fire Insurance, Limited.—Mr Joseph Andrews, of Iron-

monger lane, has been appointed provisional official liquidator. Sovereign Life.—At the annual meeting it was stated that the gross receipts had increased, whilst there had been a considerable reduction in the expenditure. The claims have been 4,208/ less than in 1881. The company's property in Cannon street is increasing in value, the rentals being 1,500% over the previous year. Since the last annual meeting the property at St James's street has been sold for 23,000%, being 3,000% more than the amount at which it stood at in the company's books.

MISCELLANEOUS COMPANIES.

MISCELLANEOUS COMPANIES. Eastern Telegraph.—For the six months ended 31st March the revenue was 328,404l, the ordinary expenses being 87,827l, and the expenditure for repairs of cable, &c., to 50,901l. After providing for interest, &c., the net balance is 116,719l. The directors have during the half-year paid an interim dividend of 2s 6d per share for the quarter ended December, 1882. They now recommend a final dividend for the year ended 31st March last of 2s 6d per share, and a bonus of 1s per share, making a total of 6 per cent. for the year. London Tramways.—The accounts for the half-year ended 30th of June, after deductions for repairs and renewals, amounting to 20,450l, show a net income of 17,278l, as against 18,789l and 15,425l for the corresponding half of 1882. This allows of a dividend of 5s per share to the ordinary shareholders, and of 12s 4d per certificate to the scripholders. South Australian Company.—The company will pay a half-yearly dividend at the rate of 8 per cent. per annum, and also a bonus at the rate of 2 per cent. per annum, free of income tax. United Discount.—The directors recommend a dividend at the rate of 6 per cent. per annum, carrying forward 4,014!. National Discount.—The directors recommend a dividend at the rate of 13 per cent. per annum, carrying forward a balance of 4,194'. Peel River Land and Mineral — The directors recommend a dividend at the rate of 13 per cent. per annum, carrying forward a balance of 4,194'. Peel River Land and Mineral — The directors recommend a dividend at the rate of 13 per cent. per annum, carrying forward a balance of 4,194'. Peel River Land and Mineral — The directors recommend a dividend at the rate of 13 per cent. per annum, carrying forward a balance of 4,194'. Peel River Land and Mineral — The directors recommend a dividend at the rate of 13 per cent. per annum, carrying forward a balance of 4,194'. Per River Land and Mineral — The directors recommend a dividend at the rate of 13 per cent. per annum the rate of

rate of 13 per cent. per annum, carrying forward a balance of 4,194/. *Peel River Land and Mineral.*—The directors recommend an interim dividend of 2½ per cent.

NEW COMPANIES AND CAPITAL

E-tates Investment and Villa Farm, Limited.-Capital, 200,000/, in N shares, of which one-half are now issued. The company is E-tates Innestment and Villa Farm, Limited.—Capital, 200,000, in 10l shares, of which one-half are now issued. The company is formed to purchase, sub-divide, and re-sell landed house property, ground rents, &c., chiefly in the metropolis and suburbs. One special object will be to provide "villa farms," the company pro-posing to divide their estates into convenient parcels of from one to four acres each. A freehold estate has been secured at Hampton, Middlesex, comprising about 172 acres for which the price to be

to rour acres each. A freehold estate has been secured at Hampton, Middlesex, comprising about 172 acres, for which the price to be paid is stated to be under 2331 per acre. Lea Bridge, Leyton, and Walthamstow Tramways.—The directors announce a second issue of 3,000 shares of 101 each at par. The company's line runs from Clapton to Epping Forest, the first section being completed and open for traffic. being completed and open for traffic.

The corresponding total in 1882 reached 73,971,5891.

Eastern Telegraph Four per Cent. Debenture Stock.—The directors are prepared to receive subscriptions for 500,000/, at the price of 95/ per 100/ stock. The present issue is made to redeem terminable debentures falling due October next, and also to provide for the cost of the Trieste-Corfur cable, and for other capital expenditure. The company's debenture stock constitutes a first charge upon the undertaking and revenue, and the total amount issued is never to exceed one-third of the paid-up share capital. The revenue for the year ended March, 1883, was 400,777*l*.

Melbourne Harbour Trust Commissioners 5 per Cent. Loan.-The National Bank of Australasia, as agents for the Commissioners of per Cent. Loan.—The receive tenders until two o'clock on the 17th inst., for 250,000/, in debentures of 100/, 500/, and 1,000/ each, the minimum price being 101/. The loan is required for the improvement of Melbourne Harbour, and is secured upon the tolls, rates, charges, &c The net revenue of the Trust during 1882 was 110,848/. &c., authorised.

Mersey Railway .- The directors invite applications for 501,880, in 201 shares, at par, forming the unissued portion of the authorised share capital. The line connects Liverpool and Birkenhead by means of a tunnel under the Mersey, and is stated to be approaching com-pletion. When finished, direct communication will be opened between the Great Northern, the Midland, and the Manchester and Sheffield Railways, on the Liverpool side, and the North-Western and Great Western on the Birkenhead side of the river. A very large local traffic is also expected.

Metropolitan Board of Works 3 per Cent. Consolidated Stock.-Tenders will be received at the Bank of England on July 12 for 1,250,000/, at the minimum price of 95²/₂ per cent., and redeemable at par on February 1, 1941, unless previously cancelled by purchase in the open market. The money is required for street improvements, artisans' dwellings, fire brigade. &c., and also for loans to the School Board, and the managers of the Metropolitan Asylum District. Interest is payable quarterly.

North Brazilian Sugar Factories, Limitel.-Subscriptions are invited for 180,000/, in Seven per Cent. Preferred Shares, of 20/each, upon which the Imperial Brazilian Government guarantees 7 per cent. interest per annum for twenty years. The company has been cent. interest per annum for twenty years. The company has been formed to carry out certain concessions for the erection and establishment of certain sugar factories in the northern provinces of Brazil. The locations of the factories have been decided upon by the Imperial Government, after examination of the several districts. The authorised share capital is 700,0004, in 25,000 pre-ferred shares of 204 each, of which it is not intended to issue more than the 300,0004, and 10,000 ordinary shares of 204 each, the whole of which have been subscribed for by the contractors. The ordinary shares receive no dividend in any year until the preferred shares of which have been subscribed for by the contractors. The offunary shares receive no dividend in any year until the preferred shares have received 7 per cent. per annum, and all surplus profits, after both classes of shares have received 7 per cent. per annum, are to be equally divided. It is intended to raise the remaining capital by the issue of debentures or debenture stock at a lower rate of interest.

the issue of debentures or debenture stock at a lower rate of interest. Santa Fe Land Company, Limited.—Capital, 875,000, in 1 thres. Messrs C. De Murrieta and Co. are authorised to receive subscrip-tions for the above shares. The company has been formed for the primary purpose of purchasing and developing valuable tracts of land in the province of Santa Fe, in the Argentine Republic, com-prising about 4,336,150 English acres. The land is stated to be well watered, and a line of railway is proposed which would pass through the company's property. It is stated that cattle and sheep farming is the industry for which the lands of the province are best suited. The purchase price to the company of the land which it is to buy has leen fixed at 1,050/ per Spanish square league—a Spanish league being equal to 6,671 English acres.

Toledo, Ann Arbor and Grand Trunk Railway of Canada-First Mortgage 6 per Cent. Gold Bonds.-Messrs John Taylor and Co., of Tokenhouse yard, will receive applications for \$600,000, part of \$1,260,000, at the price of 2021 per \$1,000 bond. The line effects a junction between the City of Toledo and the Grand Trunk system, and is stated to be 63 miles long, and to be fully completed and and is stated to be 63 miles long, and to be fully completed and

Victoria 4 per Cen⁴. Loan.—Tenders have been received amounting to about 5,162,000/, at prices ranging from the minimum of 98/108 to 100/15s. Tenders at 99/ 6s receive in full, and at 99/5s 6d about 4 per cent, of the amount emplied for the energy price was 99/108 104 per cent. of the amount applied for. The average price was 99/10s lod

Western Australia Government 4 per Cent. Debestures.—The Crom Agents invite applications for 254,0000, at a minimum price of 9610s per 1001 debenture. The loan will be in bonds of 1,000, 500, and 1007 each, and is repayable in annual instalments, commencing July, 1887. The money is principally required for railway purposes.

THE CORN TRADE.

MARK LANE, FRIDAY EVENING.

The weather has been unsettled, with occasional thunderstorms The weather has been unsettled, with occasional thunderstorms where the wheat crops are in bloom. But the reports have not, so where the wheat crops are in bloom. But the reports have not, so in indicated any zerious results; and as at intervals the tempera-iar, indicated any zerious results; and as at intervals the tempera-time has been high and forcing, progress has not been very much me has been high and forcing, progress has not been very much ime past, partly from the hopeful views held with regard to the ime past, partly from the hopeful views held with regard to the prospect of the harvest. Wheat is further influenced by the con-prospect of the harvest. Wheat is further influenced by the con-prospect of the stock of wheat on the 1st inst. is estimated as in Liverpool the stock of wheat on the 1st inst. is estimated as [20,000] qrs, against 253,500 qrs last year, and of flour, 342,800 sks, 20,000 qrs, against 253,500 qrs last year, and of flour, 342,800 sks, 20,000 grs, against 26,500 qrs last year, and of flour, 342,800 sks, 20,000 the stock of the telegrams received on Tuesday, have appreciably increased, especially from the Atlantic ports, and although the visible supply has diminished a little during the last week or two, it is about double the amount that it stood at last year at this time. In the country markets, the very moderate delivery of wheat from farmers prevents much depression in the country markets, but at the ports the weight of foreign supplies causes more depression, and where sales have been effected of any extent at all prices have ruled quite 1s per quarter lower. This has been the case at Mark Lane, and there are instances of irregular business at a larger decline, but the transactions are not currently reported. The foating cargo trade has been as dull as the spot, and the rates accented are easier in most cases, 44s has been for Aus-The weather has been unsettled, with occasional thunderstorms larger decline, but the transactions are not currently reported. The floating cargo trade has been as dull as the spot, and the rates accepted are easier in most cases, 44s has been for Aus-tralian, and 41s 6d for New Zealand off coast, accepted. For arrival: No. 2 club Calcutta was sold at 37s 9d to 38s 3d, via Canal; ordinary to good Azima, shipping or shipped, 34s 6d to 37s. Flour, influenced by the flatness in the wheat trade, and by the increased shipments from America, also droops in value. Maize on the spot has been very dull, and has further receded, American mixed to 95a and Galatz to 26s 3d. ex ship. During the week easier has been very dull, and has further receded, American mixed to 26s, and Galatz to 26s 3d, ex ship. During the week easier rates have also been taken, but to-day there was a much better market, and several cargoes sold, prices recovering 6d to 9d in round corn. The transactions included purcels now shipping at 25s 6d, July-August 26s, August 26s 6d, and September 27s. Barley in all positions is very quiet. Azoff and Odessa, for August ship-ment, sold at 21s 74d, and Danubian, prompt shipment, 22s 6d. Egyptian beans are held for dearer rates, on the possible interruption of supplies. Peas quiet, but steady in value. Oats have arrived moderately, and with prices ligher at producing ports than they are here, holders require firm prices. Good sound corn is rather dearer. The following table estimates the home consumption of wheat ince the 1st September, contrasted with 1881-2, 1880-1, and 1879-80:-

Imports.	1882-3.	1881-2.	1880-1.	1879-80.

week, and at a were yesterday quoted at 47s 6d, as compared

TRONTO

with 47s 2d on the previous Friday. At Middlesbro' also, prices are firmer, merchants now quoting 39s 6d for No. 3, while makers are holding out for 40s.

holding out for 40s. Lancashire producers of pig iron, *Iron* states, are very firm at 45s for forge, and 45s 6d for foundry qualities, less 2½ per cent, delivered equal to Manchester. There is a fair sale for pig iron in the Mid-lands, at better prices for superior brands, and at stiffer rates for lower qualities. The hematite iron market remains quiet, but there is a slight improvement on American account Prices of hematite pig are unchanged, but firm, at 50s per ton for mixed parcels of Bessemer, and 49s per ton for No. 3 forge. net, at works. There is no improvement in the Forest of Dean crude iron branch, where best classes of hematite iron are still under 60s per ton. The manu-factured iron market is unchanged, that is to say, quiet on the whole. Scotch works in the finished iron trade are still busy, but new orders are not coming in freely, and, in consequence, low prices are quoted. are not coming in freely, and, in consequence, low prices are quoted. In the north-east also consumers are holding back, in the hope that values will be lower. At Newcastle, it is difficult to get more than 6/ per ton for ship angles. Angle iron makes 5/ 12s 6d, and bars bring about 5/ 17s 6d, delivered in the Tyne, less usual commission, values will be lower. At Newcastle, it is difficult to get more than 64 per ton for ship angles. Angle iron makes 55 128 6d, and bars bring about 54 178 6d, delivered in the Tyne, less usual commission, whilst boiler plates are difficult to move at more than 71 per ton. In Durham and Cleveland, prices are very much depressed. It is reported that one firm in Durham, just on the banks of the Tees, have taken an order for plates from the Clyde at a figure that will only leave 54 15s at the works. Most of the ship plate producers, however, quote 6l, but very little work is offering. Bars, too, are weaker, and 61 15s is now taken. Angles are 57 108 to 54 128 6d ; sheets, 74 108, less 2½ per cent. In Lancashire and the Midlands, however, the manufactured iron trade looks better. In Lancashire, finished iron issteady, and the reduction of 5s per ton announced by one of the lead-ing Staffordshire houses has occasioned no little surprise, as it is quite at variance with the tendency of the market there, which has been steadily in favour of the firm attitude which has of late been taken by manufacturers. Although higher prices can scarcely be said to be ruling, there is less underselling, and buyers who have orders to give out are coming nearer in their offers to the figures asked by makers. For delivery equal to Manchester or Liverpool, prices average 6l 2s 6d to 6l 5s for bars, 6l 12s 6d to 6l 15s for hoops, 7l 12s 6d to 8l 5s for sheets. Owing to the strike in South Stafford-shire, the finished iron market of the Midlands is to some degree upset ; but deliveries under old contracts have as yet not been delayed. In East Worcestershire the improved tone in the market is maintained. A decided impetus has taken place in the demand for umarked bars, and whereas the latter were selling a few weeks ago at 6l and under, prices have now gone up to 6l 5s. There is a lull in the hardware market, chiefly owing to stock-taking; but rates keep firm. The steel trade of the north-west is fairly busy, taken as a whole, steel rails b good, and prices are maintained.

THE COTTON TRADE.

MANCHESTER, JULY 5.

MANCHESTER, JULY 5. There has been no improvement in this market since our last report. The general demand has been remarkably small, and quota-tions more or less have tended in buyers' favour. Manufacturing yarns have been little called for, and practically quotations have declined an eighth of a penny per lb on the week. Fine yarns, made from Egyptian cotton, have also moved slowly, but values remain unaltered. In bundle yarns a moderate trade is reported in forties mule for Madras. For China and Japan merchants have operated very sparingly. Continental demand has been small, and prices somewhat easier. Goods all round have been difficult to quit. Offers have been scarce, and, except in the best makes of shirtings, makers have been induced to give way from a halfpenny to three-halfpence per piece. The home trade demand still shows no signs of returning activity, and in that department of the market producers have dis-played increased anxiety to sell.

TRADE

LEATHER

The demand for leather has not been active during the week, but this is partly accounted for by the stock-taking which is customary with many houses at midsummer. The trade, however, is fair, and a steady consumption continues, late prices being well maintained. There is no especial scarcity of any article.

THE WOOL TRADE.

No improvement can be reported in the demand for wool. At the country fairs now being held prices are higher than can be realised

here. Our Bradford correspondent reports as follows :---"Our market is still inactive, and prices of English wool are barely sustained. Under these cases staplers are becoming more careful in taking up their usual clips in the country, and farmers show a reluctance to part with their wool at prices sufficiently low to meet this market. There is a moderate consumptive inquiry for fine-haired work but der with their woor at prices sumiciently low to meet this market. There is a moderate consumptive inquiry for fine-haired wools, but deep grown lustre staples are much neglected. In the foreign yarn trade, buyers operate from hand to mouth, there being no buoyancy in quotations, and therefore no inducement to anticipate. Some few descriptions of lustre yarns (including mohair) and carded yarns for knitting purposes receive some attention. In Botany spinnings for the home trade a great many spinners are extremely basy. The piece trade is somewhat improving, especially in the home branch. Worsted cashmeres and worsted coatings are increasing in public favour.

Our Liverpool correspondents write :-- "The business here during this week has been again rather less interesting, but the quotations of the most current descriptions of foreign clothing wool are nomially maintained in the retail sales effected for both home consum-tion and exportation. Nothing has been reported in alpaca, but some fair quantity of mohair has been taken by customers at alightly better prices."

JUTE, HEMP, AND FLAX TRADES.

There has again been an absence of business in Manila hemp. The price of which, however, remains very firm, and the quotations in Manila keeps high. Receipts for the week ending 30th June were 5,000 bales, against 11,000 bales in 1882.

On Wednesday, 355 bales, by auction, were bought in at 56/ to 60/ for Quilot. Of 1,896 bales other kinds, a few sold: Suna t12/ to 18/; Ceylon Sunn, 22/ 10s; Godavery, 17/ 10s per ton. Reports of the flax crops on the Continent and Ireland are generally favourable. Rain is wanted in some quarters. The Dundee

market continues quiet, and there have been some arrivals. Yaras

steady. No change for the better has transpired in the jute market. The low prices fail to stimulate speculative demand, and the manufac-turers hold large supplies of last season's jute. The landed stock in London at the end of June was very heavy, viz., 17,150 tons. A few sales are reported, including new crop, August to October shipment, at 15/ 5s, and 1882-3 crop due, at 9/ 5s to 12/ 5s per ton for London.

COLONIAL AND FOREIGN PRODUCE MARKET. FOR REPORT OF THIS DAY'S MARKET SEE "POSTSCRIPT."

MINCING LANE, FRIDAY.

SUGAR.—The market is dull, with prices unchanged. Importers of refining West India do not press sales in view of the present reduced stock. Crystallised, however, is plentiful, and at public sale on Tuesday a good deal was bought in. Several parels low brown sugar have changed hands, in some cases at easier rates. No alteration reported in beet, and there are sellers for prompt ship-ment, and also in the last three months, at current quotations. It is too early in the year to report upon prospects of future supply. The ment, and also in the last three months, at current quotations. It is too early in the year to report upon prospects of future supply. The American market is inactive, and the Liverpool transactions have been of moderate extent. In London, the business of West India to yesterday was 692 casks and about 6,600 bags, partly by auction. Crystallised : Demerara, 26s to 28s; Jamaica, 25s; washed Trinidal, 25s 6d to 26s 6d. A few lots Barbadoes went at 19s to 23s, and privately, St Vincent sold at 18s to 18s 3d. A floating cargo of 600 casks St Kitt's, off the coast, at 20s 4½d; also one of 330 casks 208 barrels at 19s 3d per cwt for the U.K. The landings of sugar in the four chief ports of the United Kingdom last month were 25,600 tons, against 22,800 tons delivered. During the first six months of the year the deliveries for home use were estimated at about 451,000 tons, against 417,000 tons in 1882, and about the latter amount in 1881 to same date. IMPORTS and DELIVERIES of SUGAR to June 30, with STOCKS on hard.

at 25s. Concrete. -255 bags Natal were bought in at 18s to 19s. Concrete. - A steady business has been done in pieces and crystals, Refined. - A steady business has been done in pieces and crystals, Refined. - A steady business has been medium quantities of the and in the Clyde, at firm rates. Here medium quantities of the former are most in demand. Dry goods about the same as last former are most in demand. Dry goods about the same as last former are most in demand. Berg codes, 29s to 31s, with moderate quoted, including titlers at 28s Cd; cubes, 29s to 31s, with moderate transactions. Sales reported in fine French loaves at 26s to 26s 6d per cwt, f.o.b., prompt shipment. Beet Sugar has been rather unsettled : new, Oct. to Dec., 20s 3d to 20s 4dd per cwt, f.o.b. RUM.-A steady market, with reported sales of the

208 4jd per cwt, f.o.b. RUM.-A steady market, with reported sales of about 300 pun-cheons West India : Demerara, 1s 7 jd to 1s 8d ; hogsheads and barrels, is 8d to 1s 10d per gallon respectively. Imports of Jamaica show a considerable decrease, and the stock is about 2,300 puncheons less than at the same date last year.

than at the same date last year. COOL-There were not any public sales on Tuesday, and only 500 bags Grenada declared for next week. The trade have taken very limited supplies by private contract, but the market continues frm. A few parcels Guayaquil sold at 80s to 82s 6d ; Ariba, 102s 6d to

Were chiefly withdrawn Some Mysore sold at 80s to 52s of 3 Artos, 102s of to 50s; greyish and low middling, 51s to 52s of 28s. 4626 bags foreign descriptions partly found buyers: 105 barrels 80 bags plantation 200 bags.

are very low in price. About 18,000 packages China have been brought to public sale. Fine congou sold up to 2s per lb by private contract. London deliveries of tea in June were 15,488,000 lbs, against 16,166,000 lbs in 1882, the stock in the United Kingdom at the close being 124,676,000 lbs, against 125,319,000 lbs. Java sold by auction as follows : pekoe, 11 d to 1s 9 d; broken, 1s 1 d to 1s 8 d; Ceylon pekoe, 1s 0 d to 1s 3 d; very fine, 1s 7 d. Including these descriptions, the supply of Indian during the week has been about 4,000 packages. 4,000 packages.

4,000 packages. RICE.—As the shipments from Burmah to Europe are progressing on a much smaller scale than of late the market is firmer. Two cargoes Rangoon off the coast, about 2,200 tons, sold at 7s 104d for near continental ports. A steamer cargo of 2,200 tons due at Malta at 8s 3d for France. Two cargoes, about 1,800 tons, April-May ship-ment, at 8s 44d and 8s 6d, open charter; one of 1,130 tons Necrancie Arracan, at 8s, open charter ; one of 1,138 tons Bassein, off the coast, at 7s 74d for Bremen. The exports from Rangoon and other Burmese ports to Europe from the 1st January to latest date still show an excess of about 43,000 tons compared with last year. A good busi-ness has been done in Liverpool during the past week. SAGO continues inactive. 1,720 bags by auction part sold at barely previous rates : fair to good small, 13s 6d to 14s 6d per cwt. TAPIOCA.—The large deliveries do not make any impression upon the stock, which is exceptionally heavy, and the market over sup-

previous rates : fair to good small, 13s 6d to 14s 6d per cwt. TAPIOCA.—The large deliveries do not make any impression upon the stock, which is exceptionally heavy, and the market over sup-plied. 4,737 bags by auction rather less than half sold at lower rates : Singapore flake, 14d to 14d; one lot very fine, 24d per lb. Pearl : seed, 13s 3d to 13s 6d; medium, 13s 6d to 14s per cwt. PEPFER.—Privately, business in Singapore black at lower rates, viz., 6§d to 61d per lb. 703 bags Penang by auction chiefly sold : fair Acheen, 53d. 240 bags Singapore taken out, 6§d to 63d. 448 bags Trang part sold : fair, 53d. 671 bags good Alleppy and Mala-bar out, 64d to 7d. 100 bags broken black sold at 35d to 4d. WHITE PEPFER.—There have not been any public sales of Singa-pore. 200 bags London made sold without reserve : at 94d to 93d; broken, low, 73d to 94d per lb. PIMENTO has declined 46d to 5d per lb. 1,665 bags, two-thirds sold : low, 24d to 25d; fair, 23d to 25d; good, 25d to 3d. GINGER.—Cochin is 2s to 3s lower. 580 cases 202 bags, about two-thirds sold : small cut, 49s 6d to 50s; small and medium, 53s 6d to 54s; medium, 61s; fair bold, 70s 6d to 71s 6d; good bold, 81s; fine selected, 91s 6d to 97s; part cut, 55s to 56s; good bold rough, 53s; ends and small cut, 47s 6d. 689 barrels Jamaica partly sold : low, 55s to 59s; good ordinary to middling, 65s to 72s; good to fine bold, 80s to 100s per cwt. MACE.—9 packages Penang part sold at 1s 3d to 1s 4d for low.

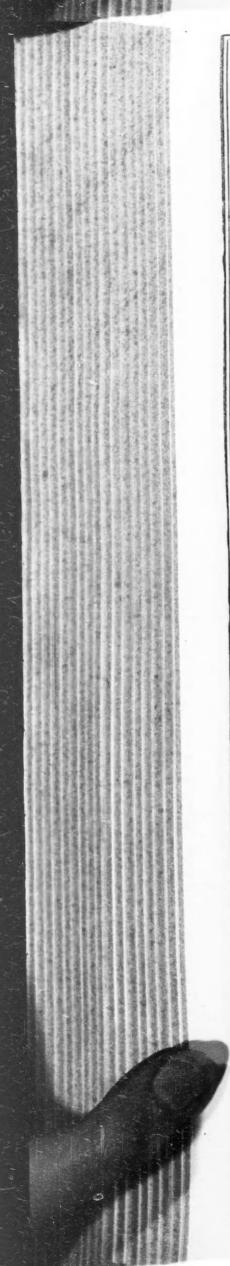

MACE.—9 packages Penang part sold at 1s 3d to 1s 4d for low. Fair withdrawn, 1s 8d per lb. CLOVES.—938 bales Zanzibar part sold at id decline : common to fair, 65d to 7d ; a few small lots good, 7id to 7id. 18 cases Penang taken out, 1s 8d to 1s 10d.

INDIGO.—Of the 7,040 chests declared for further sale, 861 chests are withdrawn. The assortment includes 2,021 chests Bengal, 960 Oude, 2,058 Kurpah, and 882 chests Madras.

OTHER DRYSALTERY GOODS.—The gambier is dull, with sales at a further decline, latterly at 25s to 25s 6d. Imports of turmeric have been small, and the stock is reduced to 970 tons. Bengal has advanced to 20s; 283 cases China galls withdrawn at 63s, Cutch has been firm. 9,449 packages myrabolanes part sold at 6s 6d to 9s per cwt.

DRUGS.—Aloes steady. Balsan Peru very little doing. Bark, in last Tuesday's public sale, only about 400 packages South American sold at valuation, whilst of East India cinchona, fully 1,600 packsold at valuation, whilst of least India cinchona, fully 1,000 pack-ages, at rather cheaper rates, have changed hands. Camphor, about 90 cases China sold at 60e, being also cheaper. Cardamoms firmly held. Castor-oil extremely quiet. Gum olibanum 1s to 2s easier. Ipccicuanha, musk, and rhubarb steady. Oil of peppermint, H. G. Hotchkiss, importers raised their price to 12s 31. Opium, more doing, and quotations fully 6d dearer. INDIA-RUBBER is dull and lower. METALS.—A fair extent of business has been transacted, but the

INDIA-BUBBER is dull and lower. METALS.—A fair extent of business has been transacted, but the markets were inactive yesterday, Sales in imported tin at 94/ to 94/ 7s 6d sharp cash. Yesterday at 93/ 10s to 93/ 15s, or lower than at any time during the week. Deliveries are steady, and the London stock is 5,890 tons. The visible supply on the 1st inst. there and in Holland was about 13,350 tons. Some of the markets for finished iron exhibited rather more steadiness. Fig is rather better, with an active demand. Shipments continue large, and from the Clyde nearly 90,000 tons over last year. The most recent sales are at 43s 8d to 43s 9d. At Middlesbro'. No. 3 quoted 39s 3d to 39s 6d per ton. Silesian spelter unchanged. Of the 140 tons sheet zinc, rolled at the London mills, by auction yesterday, 40 tons sold at 18/ 5s, being the previous value. Lead dull. Quicksilver steady at the quotations. A telegram from Valparaiso, dated July 3, advises the charters of copper for thefortnight as 1,700 tons, including 650 tons for the United Kingdom. Sales of Chili, g.o.b., at 63/ 10s to 63/ 15s, and yesterday at 63/ 10s pr ton cash. LINSEED. – A quiet feeling pervades the market, but quotations are nearly the same as last week : Calcutta, ex ship, 40s 6d; via Canal, 40s 9d to 41s; July to September, via Cape, 41s 9d to 42s; Bombay, per steamer to Hull, 42s 6d to 42s 9d, July-August. A steamer cargo of 6,200 qrs Azov near sold at 40s 9d per quarter for the United Kingdom. Exports from Calcutta to London for the second half of June, 8,300 tons, against 6,800 tons in 1882; but the supply afloat is considerably less. ¹ OILS.—Sales in olive have been of a retail character, at about late prices. Cocoa-nut dull, and easier for Cevion, viz. 33/ 10s : present

supply afloat is considerably less. OILS.—Sales in olive have been of a retail character, at about late prices. Cocoa-nut dull, and easier for Ceylon, viz., 33/10s; present shipments quoted about 10s less. No alteration in Cochin. Palm slow. English brown rape oil shows a rather heavy fall. On the spot, 29/10s to 29/15s; July and August the same. Last four months, 29/10s. Linseed lower, but now steady. On the spot, 19/15s to 20/. July to August, 20/10s to 20/12s 6d; last four months, 21/. Exports from Hull for the week, 395 tons, against 188 tons in 1882. Pale seal scarce, and held at 37/. Crude sperm remains at 70/ ner tun. per tun.

TALLOW.—There has not been any feature to notice in the market during the week, as a 1,150 casks of colonial are advertised for public sale to day. Shipments of Australian in June, 2,700 casks. MESSES COLCHESTER and WOOLNER give the following :-

NORTH BRAZILIAN SUGAR FACTORIES LIMITED.

NORTH BRAZILIAN SUGAR FACTORIES LIMITED; Genismen,-I have the honour to acknowledge the receipt of your letter of the means, in which you enclose the Prospectus of an issue of £300,000 in Fre-tersi Shares of your Company. In reply thereto, and in compliance with your request, I hereby declare that the statements in the Prospectus relative to the authority of the Company to arry on is coperations in the Empire of Brazil and to the guarantee of interest at special Berezes. Buch interest will accrue from the date of each pay-metric bares. Buch interest will accrue from the date of each pay-metric to the Company's Bankers. Take declare that the statement relative to the payment of interest by the statorise to call ap is 2163,125. The remaining capital is to be raised from time to time in accordance with the statorise to call ap is 2163,125. The remaining capital is to the fail communications which the Im-parial Government Uncrease, and the official communications which the Im-parial Government Will make to this Legation in respect thereof. I have the honour to be, Gentlemen, Your obcient Serverst, PENEDO, Brasilian Minister in London. The Korth Braziliar Sugar Factories, Limited, has been formed for the pur-panet of company of the to the company to the purpon the stating out Company to the to the company to the purpon the statement will be the tore be company. The Korth Braziliar Sugar Factories, Limited, has been formed for the purpon purponent company of the tore to the payment of the purpon the statement of the purponent of the pu

PENEDO, Brazilian Minister in London pas of carrying out Concessions granted by the Imperial Government o-Brail for the Erection and Establishment of Central Sugar Factories in thatf

The object of the Factories is to collect the sugar factories in terms Impire. The object of the Factories is to collect the sugar tanks produced on several planations at given points and there treat it by the best known appliances. By the present system employed in Brazil the canes are treated on each plan-iand by intervent system employed in the canes is wasted. The inspiral Brazilian Government, awars from their official information of canaire sugar industry, decided after mature consideration to encourage the the planations waste in the primitive mode of dealing with the valuable and evaluations of Central Sugar Factories, by this and other Companies, to which remanancies to the Sugar Factory Companies, is also advantageous to the summary of the Sugar Factory Companies, is also advantageous to the

The great success of the Central Sugar Factories established in Brazil has been demonstrated by the large amount of their net earnings, as appears from he "Anglo-Brazilian Times" of 9th August, 1392, and the "Jornal do Com-nercio" of 26th August, 1892, viz :--The Companhia Agricola de Campos Sugar Factory, which crushed 25,602 tons of Canes, earne i a net profit for the year 1831 of ... £13,431 (Being over 103, per ton net profit.) been de the "A mercio

The Quissaman Sugar Factory, which crushel 62,793 tons of Canes,

The Quissaman Sugar Factory, which crushel 62,703 tons of Canes, Earned a net profit for the year 1831 of £31,247 (B ing about 10s, per ton net profit.) From the accompanying reports of Messrs Sir Charles Fox and Sons and Messrs Fawcet, Preston, and C., it will be seen that the specified capacity of the Company's factories will suffice to grind 3,850 tons of sugar canes per day of 24 hours, but taking only 16 hours per day as the operiod for crushing, and 120 days for the duration of the crop, the weight of sugar canes crushed during that period each year wou'd be 308,000 tons, upon which, taking the average profit of 10s per ton, the rate shown by the returns of the above factories in actual operation, there would result a profit from the Company's factories of 2154,000 per annum, or equal to over 14 per cent. on their entire cost, but this percentage shoul 1 be considerably increased by the improved machinery and means of transport of the sugar canes * hich the Company will possess. The Company has been authorised to carry on its operations in the Empire of

means of transport of the sugar cance s hich the Company will possess. The Company has been authorised to carry on its operations in the Empire of Brasil by Imperial Decree No. 8,582, 17th February, 1863, and all the concessions acquired by this Company enjoy the privileges granted by Imperial Decree No. 8,357 of the 24th Deccember, 1891, which, among other things, includes the right of expropriating t.e necessary land for the purposes of the several fac-tories, together with the use of the timber and other material existing in the various districts on the national lands which may be required for the construc-tion of the works.

tion of the works. By the terms of the same Decree, the Imperial Government of Brasil pays interest on the authorised Capital expended during the construction of the works from the dates of its payment into the Company's Bankers. After the Shareholders have received a dividend of 9 per cent. per annum, one-half of the excess over 9 per cent. will then revert to the Government until such time as any amount advanced on account of the guarantee shall have been repaid. It is not, however, anticipated that the Government will be called upon to pay the guarantee beyond the time necessary for the construction of the works, the earnings as above estimated amounting to so much more than the guaranteed interest that the amount to be repaid will be comparatively small. The Imperial Decreas contain the usual provision for the formation of a special

The Imperial Decrees contain the usual provision for the formation of a special fund for advances to sugar planters and suppliers of canes (if required by them) on the security of their crops. The concessions acquired by the Company are for the construction of 15 central sugar factories in the districts, and of the capacities undermentioned,

The Company's Agent and Consulting Engineers report that, in each of these districts (the position of which is shown on the accompanying map) canes are already produced in very much greater quantities than will meet the full capa-bilities of the Factories. Contracts have been made with upwards of 100 planters for an ample supply of canes for the factories which will be first erected upon conditions very favourable to the Company.

The climate and soil of the Northern Provinces of Brazil in which the above districts are situated are particularly suitable for the growth of sugar canes. The locations of the factories have been decided upon by the Imperial Government, after careful examination of the several districts, regard being had to the quantity of canes produced and the facilities for its transportation. The plans of the eight factories to be first erected have been approved by the Imperial Government.

The authorised share capital of the Company is £700,000, divided into £500,000 in 25,000 Preferred shares of £20 each (of which it is not intended to issue more than the £300,000 herein referred to) and £200,000 in 10,000 Ordinary shares of £20 each (the whole of which have been subscribed for by the contractors). The ordinary shares receive no dividend in any year until the preferred shares have received 7 per cent. per ennum.

All surplus profits, after both classes of shares have received 7 per cent. per annum dividend, are to be divided, half to the holders of preferred shares and half to the ordinary shareholders. It is intended to raise the remaining capital required for the purposes of the company by the issue of debentures or debenture stock at a lower rate of interest, for which the balance of guarantee-interest-wis., £35,362 10s is reserved.

London, 5th Ju y, 1863. FORM OF APPLICATION. To the Directors of THE NORTH BRAZILIAN SUGAR FACTORIES, Limits GENTLEMEN, Having paid to your Bankers, Messrs the sum of pounds, being £1 per share on 7 per cent preferred shares of £20 each of your Company, I request you to allot ms that number of preferred shares, and I hereby agree to accept the same (or any smaller number that may be allotted to me), and to pay the balance due increase you to place my name on the regist. rof members in respect of the shares allotted to m.

Seeing that the p.eferred shares now for subscription enjoy the advantages

1. Participation in the interest guaranteed by the Imperial Govern-

Participation in the interest guaranteed by the imperation of the interest guaranteed by the imperation of the second participation of the second partipation of the second participation of the second partipation o

profits after 7 per cent. has been paid on the ordinary capital (the estimated dividend exceeding 14 per cent, on both the preferred and ordinary capital),
 the Directors feel themselves justified in stating that the preferred shares now for subscription possess unusual advantages in the sound character of the undertaking, and in the prospect of highly remunerative dividends.
 Contracts have been entered into between Messrs Red, Bowen, and Co., of London and Pernambuco, and the Company, for the transfer of the above concessions—which have been so transferred to the Company free from all encumbrances—tor the complete construction and equipment of the 15 Factories, with Land, Rai ways, and other accessories, and the payment of the as all expenses, for the sum of £1,059,250. These Contracts provide for eight of the Factories being comp eted by Slat March, 1895, and the remaining Factories within 18 months after the approval by the Government of the detailed plans for them, and the authority is given to raise the Capital relating thereto.
 Where no allotment is made, the deposit will be returned; and if a smaller number of shares be allotted than applied for, the surplus of the deposit will be applied to the payment be not duly paid, the allotment will be liable to cancellation, and payments previously made to forfeiture.
 Application will be made in due course for a quotation of the Preferred Fhaves in the Official List of the Stock Exchange.

CONSOLIDATED CONSOLIDATED URUGUAY BIX PER CENT. LOAN OF 1871. A Meeting of Holders of Bonde of the above Loan is convened by the Council of Foreign Bondholders, at the request of numercus Bonholders, to be held at the Cannon street Hotel, on Monday, 16th July, at 3 p.m., to appoint a Committee of Bondholders to act in conjunction with the Council, and to consider any scheme which may be submitted for the arrange-ment of the Debt. In order to +ave the time of the Bondholders they are requested to bring with them their names and addresses written on a slip of paper. HYDE CLARKE, Secretary. Council House, 17 Moorgate street, London, E.C., 6th July, 1863. MO THE HOLDERS OF URUGUAY

OTHE HOLDERS OF CONFEDERATE STATES OF AMERICA STERLING AND DOLLAR BONDS. TO

11112 HOLDIARS OF AMERICA STERLING AND DOLLAR BONDS.
Since the last mitting of the Bondholders much attention has been given to the condition and sentiment of the States which incurred this debt, and it is believed that the Bonth is gradually awakening to the isoportance of arranging it on the ground that the restoration of their credit is an imperative preliminary to the development of their vast resources.
All efforts towards a settlement must, however, prove fortile until the Bondholders are represented by a body authorized to deal with their collective interests, the first step towards which is to call in the Bonds for exchange for certificates. To accomplish this, the following gentlemen (with power to add to their number) have consented to act as trustees: The Bight Hon. Lord Penzance, Hon. Theo. C. Brace, M.P., J. E. Gorst, Esq., Q.C., M.P., J. B. Martin, Esq., and Robt. Stewart, Esq.
By the conditions of the Trustees are empowered to ne Certificate) the Trustees are empowered to the discretion of the Trustees.

19	19		1861	
"he	present loan	will be app	lied in carr	ying out

The present loan will be applied in carrying out the recommendations contained in a report of Sir John Coode, C. E., who visited Melb arrue in 1878, and make a thorough inspect in of the port. Since receipt of the abave-named report the Com-missioners have added largely to the what face ecommed dich at Melbourne, have removed an entasive reef of rock which ran accross the river there, have considerably deep ned the river by means of dredging from Me bourne to Hobson's Bay, have constructed roads and sheds, have deepened the channels from the bay to the piers at Williams-town and Sandridge, so as to admit of the large coming atenanes berthing thereat, and have obtained a dredging, steam tugs and barges built for the purposes of the trust has reached no less a ann than £111674. for the purposes of sam than £111,674.

cost of the dredgers, steam tugs and barges built for the purposes of the trust has reached no less a sam than £11674.
The completion of the works proposed will considerably increase the revenue, and reclaim a large quantity of valuable land.
Tenders will be received at the National Bank of Astraasis, 149, Leadenhall Street, not later than 20 clock p.m. on Tuesday, 17th July, 1853, where and when they will be opened in presence of such of the applicants as may attend.
The lean will be allotted to the highest bidders, but no tender will be accepted at less than £101 for very £100 in debentures, the price including acrued interest from the first instant, making the minimum equal to par.
Tenders at a price including a fraction of a shilling other than sixpence will not be preferentially accepted, and should the equivalent tenders exceed the amount to be allotted, a pro rate distribution will be required as follows, viz. 5 per cent. as application, so much on allotment as to leave 80 per cent. unpaid, and the balance on Tuescay, the 18th September, 1833.
Allotment Letters will be excle any eable for debentures when the payments have been duily made.
A flock Exchange quotation will be applied for inthe usaal way.
Forms of Tender may be obtained at the undermentioned Banks, where also copies of Acts and specimens of Debentures can be insure ted.
The NATIONAL BANK OF AUSTRALASIA, 119, Leadenhall Street, EC:

PROSPECTUS.

110 Cannon str.et, L ndon, E.C. PROSPECTUS. This Company has been formed for the purchase, sub-division and re-sale of land, and also houses, shops, ground rents, and other similar properties, thereby enabling the Shareholders to participate in the large profits derivable therefrom; for, while it is at present difficult to obtain an absolutely safe security of an improving nature, yielding more than 4 per cert., experience has shown that the profit to be derived from the careful selection, sub-division, and re-sale of land and house property yields a very large percentage to the i.vestor. The Company will deal only with solid invest-ments of the safest class, and chiefly in the metropol's and the suburbs. One of the special objects of the Company will be to most the wants of a large and increasing class of persons seeking suburban residences, with more and attached to them than is usual, by providing what are known as " Villa Farms." The practice of most Land Companes hitherto has been to sub-divide their estates into the smallest possible plots. This Company re-pees to deal with its suburban estates somewhat differently, by dividing them into convenient parcels of from one to four acree such, thus insoring a quicker realisation than by the usual method. The Company's arrangements will enable a person desiring to posses a suburban residence, with land auflicient for garden, orchard, and, the special objects of the Company will be the subtrant for the state of the state in the suburban residence, with land sufficient for garden, orchard, and the obtain it readily at a very moderate sub-

An opticate, to obtain it reachy at a very moderate exet. Another special object of the Company will be the purchase of freehold and leasehold house property, with a view to its improvement in value by con-version into shops.
