[Translate this page](#)

[Structured Commons](#) [About](#) [Get involved](#) [GLAM](#) [Development](#) [Discussion](#)

The project **Structured Data on Wikimedia Commons** (2017–19) converts the free media files on Wikimedia Commons to a structured and machine-readable format, so that they become easier to view, search, edit, organize and re-use. To achieve that, the Commons backend is migrated to [Wikibase](#), the same technology as used for [Wikidata](#).

Other languages: [Deutsch](#) • [English](#) • [Türkçe](#) • [dansk](#) • [español](#) • [euskara](#) • [français](#) • [galego](#) • [italiano](#) • [polski](#) • [português do Brasil](#) • [čeština](#) • [беларуская \(тарашкевіца\)](#) • [русский](#) • [српски / srpski](#) • [українська](#) • [العربية](#) • [বাংলা](#) • [中文](#) • [日本語](#)

Latest updates

New features:

- It is now possible to add multilingual captions and Depicts statements to files on Wikimedia Commons.
- See [Commons:File captions](#) and [Commons:Depicts](#) for documentation. This documentation is work in progress, and your help is welcome.

Other updates:

- [GLAM pilot projects](#) are in progress.
- How should structured data about Commons files be modeled? Input is collected in this [table for Wikidata properties](#). Some already exist, some still need creating.
- Help collect interesting Commons files, as input for the data modelling process! Continuous input is welcome.
- There is a [Structured Commons community focus group](#), for Commons and Wikidata contributors

Enter search term

Stay up-to-date:

- [Subscribe to the newsletter](#)
- [Previous newsletter editions](#)
- Read the log of the last IRC office hour, which took place [Thursday 18 July 2019](#).
- Ask questions to the team in the next IRC office hour: to be announced in [#wikimedia-office](#) [webchat](#)

The background of the slide is a reproduction of the painting 'The Last Judgement' by Jan Brueghel the Elder. The painting depicts a chaotic scene of the final day of the world. In the upper portion, figures are shown ascending towards heaven, while the lower portion is dominated by a dark, fiery hell where the damned are being tormented. The central text is overlaid on this scene.

Introducing ... the ISA game

Play to add information, descriptions or details to images on Wikimedia Commons

ISA is a fun game aimed at enhancing the metadata of images that have been contributed to Wikimedia Commons via the various Wiki Loves competitions. It is a pilot project for **Structured Data on Commons**.

To celebrate 5 years of **Wiki Loves Africa**, ISA was built to describe in detail all visual aspects of images that have been contributed to the Wiki Loves Africa contests. It has been specifically modelled to be useful to *all* of the Wiki Loves X competitions, and beyond. The tool is aimed to increase the usefulness of **Wiki Loves X** images to illustrate concepts across the Wikimedia projects.

ISA is both an acronym for *Information Structured Acceleration*, and a chiShona language word for 'put' or 'place'.

Generic properties [\[edit source \]](#)

The properties below apply to all types of files.

Property / Aliases	Currently exists on Wikidata as	Data type	Qualifiers	Remarks
Depicts / Manifestation of / Digital representation of	depicts (P180)	Item	See below	Same property for things 'depicted' in an audio file. It is actually more 'manifestation of' or 'digital representation of'
Depicted place		Item		To be included in 'Depicts' in general?
Depicted event		Item		For instance, for photos of a specific festival, a play, a musical performance. To be included in 'Depicts' in general?
Depicted date	date depicted (P2913)	Time		
Depicted period		Item		where a specific date cannot be given; compare time period (P2348) , set in period (P2408)
Date of file creation / Scan date	inception (P571) (maybe a more specific subproperty is warranted)	Time		
Source website	No, to be created	Item		The Wikidata item of the website where the file was taken from, e.g. YouTube, Flickr, Europeana, a museum's website
Source URL	Probably to be created. There is reference URL (P854) (reference URL) but that is for references specifically	URL		The specific URL where the file was found on the source website
Institution's media file identifier	No, to be created (probably 1 identifier property per institution)	Identifier		For institutions whose media repositories have unique and persistent identifiers for individual media files. Not to be confused with identifiers for creative works.

https://commons.wikimedia.org/wiki/Commons:Structured_data/Properties_table

The screenshot shows the Wikidata page for the property **copyright status** (P6216). The page includes a navigation bar with 'Property', 'Discussion', and 'View history' tabs. Below the title, there is a description: 'copyright status for intellectual creations like works of art, publications, software, etc.' and an 'edit' button. A table lists the property in various languages:

Language	Label	Description	Also known as
English	copyright status	copyright status for intellectual creations like works of art, publications, software, etc.	
Dutch	auteursrechtenstatus	juridische status van een (kunst)werk, publicatie, software enz. qua intellectueel eigendom	copyrightstatus
German	Urheberrechtsstatus	No description defined	urheberrechtlicher Status
French	statut des droits d'auteur	statut des droits d'auteur pour une création intellectuelle ou artistique	

Below the table, there is a section for 'Data type' which is set to 'Item'. A sidebar on the left contains various navigation links such as 'Main page', 'Community portal', and 'Tools'.

Property for indicating copyright of creative works: [P6216](#) [Copyright status](#)

Already [used](#) on more than 300,000 creative works on Wikidata

Two possible values

- Public domain
- Copyrighted

(Each work can have multiple of these, and also both values combined)

To be qualified (enhanced) with additional information

WORK IN PROGRESS!

Help:Copyrights on Wikidata

<https://www.wikidata.org/wiki/Help:Copyrights>
