HERMITAGE GARDENS
DAFFODILS

EDWIN C. POWELL

ROCKVILLE, R. F. D. 2

MARYLAND

HERMITAGE GARDENS are located at Aspen, Md., 7 miles north of the Md.—D. C. line on the Brookville (Seventh Street) Pike; route 97 out of Washington and from Baltimore through Ellicott City to Olney, then south on route 97 about 5½ miles.

A display of the popular varieties is maintained during the blooming season from late March to early May. Visitors are cordially invited to see it, as well as the gardens in which are growing more than 400 varieties and thousands of unnamed seedlings.

Plant Daffodils in early September, if possible, as they make root growth in early fall, but they may be planted at any time after digging in July until the ground freezes. In a mixed border plant three or more bulbs of a variety 6 to 8 inches apart and 4 to 5 inches deep, according to size of bulb and character of soil—deeper in light than in heavy soils. Leedsii's, white Trumpets, Poets, and bicolors produce the finest flowers when grown in partial shade.

Figures in parentheses following name indicate the relative season of bloom, 1 being earliest, and 6 latest. Orders accepted subject to crop and previous sale. If any variety is sold out I will substitute a variety of similar character and value unless the purchaser instructs otherwise.

*Come in! A welcome waits
Within our gates.
Our garden is your haven
As it is ours.
Taste of its leaven, Drink of its sweets;
Gather the peace of flowers.*

CHARLES HANSON TOWNE.
