Fukuoka Regional Economic Investigation Board.

Date: 25, Aug. 1949.

430
SUBJECT: July Situation of Fish Control.

TO : Economic section, Kyushu Civil Affairs Region.

We, hereby, report on the July situation of our fish control as follows;

1. Outlines.

Under our incessant investigation, the fish control has been getting better, The shipment from the producing center now being improved. The distribute in the consuming center being increased in quantity, But on the other hand, lately the shortage of purchasing power on the consumer's side, gradual increase of shipment-in, consumer's increasing selection based on price or freshness, and retailer's ex-tinguishable profit-seeking, are rather disturbing the smooth functioning of the control. To say more concretely, now the price of fish, has been going down and in several cases, less than the official price. This is because the abnormal shipment from Nagasaki B class port to the easter side of Shimonoseki in March and April was suspended by the co-operative effort of the 4 regional E.I.B. (Osaka, Hiroshima, Takamatsu, and Tokyo) and the co-operation of the concerning administrative agents of the Government.

The catch in July decreased to one-third of that in April or May. This is because of the rainy season, Faye typhoon, and special repairing of catching boat in the summer-shortage-season. But in the end of July, small-size sardin was caught and the shipment-in in each consuming center was well matched to the plan.

As for the investigation activity of each local E.I.B. nothing specially took up. They are sincerely trying to catch up with the fluctuating situation.

2. Points of Investigation.

A. Investigation on the tail-end consuming side. Inspite of the fact of under official-price-quotation, the actual distribution in the tail-end was only about 30% of the received. Therefore, since July 6, the top priority of the investigation was put on this point.

B. Counter measures took up for fish transportation.

To exterminate illegal trade done by carrying boat, we had the special talk with all concerning agent and put the special sign on all carrying boat registered to the Nagasaki Ken Government. This has been enforced on and from July 11.

- 2 -

- C. Watch on shipment-out.
For the fulfillment of the planned shipment and enforcement of proportional shipment allocation, we checked all disproportional shipment, under the co-operation of Ken Government and the Marine Product Board.
3. Practical investigation done.
- Region;
- A. Meeting of chiefs of Foodstaff section of all local E.I.B. ---July 9. special instructions from the Central E.I.B.
Explanation of the base of the prosecution of violaters. Points of investigation considered from the tail-end distribution.
- B. Checking the investigation of the Nagasaki E.I.B. July 27--29.
Surveillance on the shipment from the producing centers. Disposition of violation cases. General affair and connection.
- C. Enlightenment and advertisement.
As one of the means of enlightenment and advertisement, we published the result of our research on the public opinion and the general situation reduced from the result of our investigation.
- D. Connection and co-operation with the other concerning government agents.
Public prosecutor's office.---July 18.
Had special talk about the base of the prosecution and the administrative counter measures of violaters. Ken Government.
In Fukuoka Ken, Ken Government canceled 17 retailer's registration according to the request of Police and E.I.B.
B. The Ken Government formed a special committee "Marine Product Control Committee" for the mutual connection of fish control.
- Local E.I.B.
The number of investigation cases in July is 435 and that of violation 93. The percentage is 20%. This is a big decrease compared with 60% rate of January to May. And specially in Oita, Under the E.I.B. proper lead, considerable quantity of processed (boiled and dried) sardin was put in the regular channel.
4. Actual status of tail-end distribution.
- A. Tendency of Violation.
For instance in Fukuoka Prefecture, under the plan the per head distribution in April is 540 momme. But according to our analysis of public opinion, the actual distribution was only 104 momme.

- 3 -

And as for the number of distribution, 10 times under the plan, but actually only 2 or 3 times. This means that 60% of fish which received by the retailer was sold illegally.

As for the price, it is gradually going down to the official price, and, sometimes under it. As already reported, the distribution was sometimes done to the outsiders.

B. Status of retailer's business.

As one of the methods for checking the reason why the retailers were liable to violate the control, we checked their business status. The cheap blue fish (near-sea fish) had occupied about 45% of all they traded. And the decrease of the quantity of the fish they received from the receiving agent were averagedly about 10%. Averagedly the quantity they traded a month was about 200 kan. Their official profit margin was about 24.1%. The transportation charge and the various taxes being reduced, They had actually about Y1,995 net loss a month. To cover this loss, they inevitably ran to the violation of the official price. If their official profit margin should be raised up to 35%, their official profit margin is about Yen 3,666 per month. And putting together the profit from trading decontrolled fish, their monthly net income is to be about Y6,000, which correspond to the official-life-standard income.

Thus it is clear that, if we put aside the real contradiction of the retailer's business and force the control, the control can never be complete.

C. Distribution price in each Ken.

As the result of our successive investigation, the retailer's price of in all places, has averagedly come very near to the official basis. And the distribution, which was only 2 or 3 times formerly, has much increased in July (7 or 8 times).

5. Standard of indictment.

In the special investigation, almost 60% of the investigated cases were violations. And not a small number of the violation cases could not be said really breach of the rule. This must be took into consideration, and at the same time, the indictment should be equalized in all the Kyushu area. We have decided the standard of the indictment, consulting with the Public Procurator's Office and the Police. This standard was informed to all local E.I.B.

Takayoshi Shibata

Takayoshi Shibata,
Director of Fukuoka Regional
Economic Investigation Board,

SUBJECT: Restaurant Control

TO : Commanding Officer, Kyushu Civil Affairs Region,
APO 24, Unit 5
(Attn: Economics Section)

1. Inspections were made of restaurants licensed under the Restaurant Control Law by members of this team during the month of July and 1st ten days of August. The following discrepancies were noted:

a. Licenses were issued to light meal coupon restaurants, some of which were serving as low as one meal a day. These licenses were issued so alcoholic beverages could be sold.

b. In many restaurants meals could be bought without coupons.

2. The EIB and economic police have been requested to conduct an extensive program to check all restaurants that have been issued licenses in order to eliminate blackmarketing.

3. Following is the number of licenses issued as of 31 July 1949:

	<u>Issued</u>	<u>Suspended</u>	<u>Revoked</u>
Meal Coupon Restaurant	11	0	0
Noodle Meal Coupon Restaurant	4	0	0
Hotels	394	0	0
Light Restaurants	753	0	0
Tea Rooms	125	0	0

1. The Economic Stabilization Board is authorized to release the items listed below, which are now in the custody of Kokohin Boeki Kodan, for distribution as incentive goods to workers engaged in the Chemical Fertilizer Industry.

34,245 lbs. of assorted candy
34,245 lbs. of assorted nuts

2. Packing containers will be clearly and distinctively marked according to instructions by the Economic and Scientific Section, General Headquarters, Supreme Commander for the Allied Powers, to indicate that these articles have been officially released and to distinguish them from articles used by the Occupation Forces.

3. Sales of these items will be at the official prices determined by the Price Board. These prices include commodity tax and no additional tax or import duty will be levied.

4. All necessary precautions will be taken to assure that these articles are distributed through official channels and do not appear in illegal or unauthorized transactions, and all handlers will be required to keep accurate records of all items received and distributed.

5. A report on the distribution of these items will be submitted as soon as feasible.

HEADQUARTERS
SAGA CIVIL AFFAIRS TEAM
Saga, Kyushu, Japan
APO 24 Unit 5

AJW/nk

22 July 1949
49/E/FC/#1

SUBJECT: Food Collection

THRU : Commanding Officer, Headquarters Kyushu Civil Affairs
Region, APO 24-5TO : Commanding General, Headquarters Eighth Army, APO 343
Attn: Civil Affairs Section

1. The original quota for summer crop collection in Saga Prefecture was set at 214,300 koku for wheat and 1,274,000 kan for white potatoes.

2. On 5 July 1949 an adjustment of approximately 5.9% was made resulting in a new quota of 193,900 koku for wheat and 1,083,000 kan for white potatoes.

3. Prior to publication of the adjusted quota the farmers of this prefecture, voluntarily, and without pressure by either the Japanese officials or the Civil Affairs Team, delivered 91.24% of the wheat quota and 85% of white potato quota.

4. As of 20 July 1949 the percentage of crop collection under the new quota was wheat 104.33% and 124.28% of white potatoes.

5. The "overquota" payment on wheat being set at 3 times regular quota prices for wheat and 2.25 times the price for white potatoes, the farmers who have already turned in their original quota are demanding "overquota" payment on all crops turned in over the adjusted quota.

6. The ruling of the Central Government, that "overquota" payments will only be made on crops turned in over the original quota, has made the farmers angry and their morale, which was excellent prior to the adjustment of quota, is being lowered.

7. It is the contention of the farmers, and it appears logical, that when the adjustment was made the original quota became non existent; that the only quota is the new one and "overquota" payments should be made using the adjusted quota as a basis.

BASIC: Ltr Saga CA Team, subj: "Food Collection," dtd 22 July 1949

8. The crop collection was moving smoothly and was ahead of the plan drawn up by the prefectural officials as shown in the following table.

(a) Crop collection plan for Saga, Kyushu, Japan.

Item	Date	A%	B%	Collected %	
				Old quota	New quota
Wheat and Barley	20-30 June	50	30	89.97	
	1-10 July	70	50	92.58	102.32
	11-20 July	80	60	94.2	104.33
	21-31 July	90	70		
	1-10 Aug.	100	80		
	11-20 Aug.		90		
White Potato	20-30 June	60	40	79.95	
	1-10 July	70	50	96.44	113.45
	11-20 July	80	75	106.00	124.28
	21-31 July	90	80		
	1-10 Aug.	100	90		
	11-20 Aug.		100		
21-31 Aug.					

A%: Based on good weather, transportation etc.
 B%: Based on bad weather, floods, any incidents that might prevent or delay crop collection.

9. The above reflects the willingness of the farmers to make early crop delivery but all indications are that if "over-quota" payment is not made, using the adjusted quota as a basis, this endeavor on the part of the farmer will be discontinued and will seriously hamper future crop collections. This will break down the spirit that has been built up in this prefecture and hamper the Economic Recovery Program.

10. Gun chiefs and farmers have protested to the Prefectural Officials and this team against the injustice of this ruling. All are of the opinion that the Central Government has taken an unjust and unfair stand, which has resulted in penalizing the farmer who has made complete early delivery. This stand will result in a loss of faith in the government, by the farmers.

11. It was the understanding of the farmers that the re-adjustment of quota would compensate them for the low grade of wheat harvested this year. Due to adverse weather conditions a very small amount of Grade 1 wheat was harvested, most of the

**JASIC: Ltr Saga CA Team, subj: "Food Collection," dtd 22
July 1949**

crops turned in were Grades two and three. This resulted in a loss of income to the farmer caused by conditions over which he had no control. By making the "overquota" payment on the readjusted quota, as has been the understanding, this income will be materially increased. This will give the farmer a fair return on his labor and act as an incentive to continue the splendid cooperation they have given to the crop collection programs.

12. It is recommended by this team that such action be taken to remedy this situation as is deemed necessary; that the Central Government be advised to consider the adjusted quota as the only existing quota; and that over quota payments be made according to crops turned in over and above this new quota, which is the only official quota that can justifiably be used as a basis for computation.

1st Ind

HRM/blh

KYUSHU CIVIL AFFAIRS REGION, HQ & HQ DET, APO 24-5, 27 July 1949

TO: Commanding Officer, Saga Civil Affairs Team, APO 24-5

1. Returned.

2. Protest contained in basic letter has been made on several occasions by various teams, particularly Saga, and has been repeatedly answered by SCAP Natural Resources Section.

3. SCAP Natural Resources Section not only sanctions, but to a large extent is responsible for, the attitude taken by the Central Government in this matter. SCAP Natural Resources Section feels that pre-planting quotas are the official quotas of food which the Japanese Government must collect and that any failure to meet this amount increases the burden upon the American taxpayers. Reductions in this official quota are made only as an emergency measure to meet unexpected crop losses which absolutely prevent farmers from meeting the original quota. For this reason, SCAP does not believe the Central Government should pay bonuses to those farmers who are not serious victims of the emergency, and who have been able to turn in more than the reduced quota but not more than the original official quota. If this were permitted, it would encourage prefectures and farmers to claim great emergency losses, in order to collect overquota bonuses for turn-in in excess of decreased quotas, whereas the whole reason for reduced quotas is the prefectural insistence that farmers cannot possibly turn in more than the reduced quota.

4. The fact that prefectures continue to make in excess of 100% turn-in of quotas despite the fact that the above policy has been in effect for more than two years should allay all fears that this policy will disrupt efficient crop collection.

5. It is believed that if close investigation is made, attempts to brand this policy unjust, unfair and as penalizing the farmer, may be traced to those same elements which have always sought to distort every action of the Government and Occupation Forces and, in particular, to disrupt maximum crop collection.

BY ORDER OF COLONEL HILTON:

HENRY E. RAINBOLT, JR.

HEADQUARTERS
NAGASAKI CIVIL AFFAIRS TEAM
Nagasaki, Kyushu, Japan

WRC/tk

APO 24-5
18 July 1949430
SUBJECT: Sweet Potato RiceTO : Commanding Officer, Kyushu Civil Affairs Region,
Hq & Hq Det, APO 24-5

1. On 16 July 1949, the Natural Resources Officer of this team visited the farm of Mr. T. Umesaki of Fukuda Machi Isahaya City, in answer to a request to observe control production of rice from sweet potatoes. The originator of the process, Mr. Umesaki, began experimenting with the possibility of processing sweet potatoes into rice 6 months ago as an out growth of noodle production in which he has been engaged for 3 years. Impetus was added by the monotony of a steady noodle diet when rice was not available.

2. The process necessitates the use of four machines, all of which are available in Japan today, with modifications which are to be patented by Mr. Umesaki as the originator and inventor. The basic machines used are: potato crusher, press, flour mill, and a noodle-maker.

3. For clarity, the process will be outlined in five steps in this report. These steps are: preparation, grinding, pressing, milling, and final processing. The process is as follows:

4. Preparation: This step involves complete preparation of the sweet potatoes for the next step. The potatoes are thoroughly scrubbed and sorted. Only good, solid, un-tainted potatoes are used for the process. After washing and sorting, the selected sweet potatoes are peeled and washed again. The potatoes are then ready for grinding.

5. Grinding: A Japanese potato crusher is used for this step. The machine is a copper cylinder, on a shaft, so constructed that hundreds of small, sharp, needle-like studs project from it, and placed over a wooden container so placed

BASIC: Ltr Hq Nagasaki Civ Aff Team, APO 24-5, 18 July 1949
subj: "Sweet Potato Rice"

as to catch all of the grindings. In producing sweet potato rice, the wooden receptacle is filled approximately, 1/4 full of water. A wooden frame is placed over the top of the crusher to direct the potatoes toward the cylinder. As the potatoes are crushed into fiber, they fall into the water in the wooden receptacle. At this time, the starch and sweetness of the potatoes are drawn off into the water. After crushing, the pulpy mass is mixed in order to recombine the starch with the pulp. After remixing, the water is drained off and the potatoes are ready to be pressed.

6. Pressing: The machine used in the inventor's process for this stage is a screw type, hand operated press. Masses of drained pulp are wrapped in several layers of cloth and placed in a hollow cylinder with ventilated sides, constructed of bamboo, and a round pressure plate is placed on top to equalize the pressure. The pressure exerted almost completely expels all water remaining in the mass. The sweetness drains off with the water, but the starch remains combined with the pulp. The pressed fiber must now be completely dried before the next step.

7. Milling: After the potatoes have passed through the pressing stage and have been completely dried, they are run through a power driven flour mill.

8. Final Processing: The flour is mixed with enough water to make a mass of approximately the same texture as plastic wood or partly dried putty. This mass is run through a modified noodle maker which puts divisions on the noodle like strips, the length of a rice grain apart. The noodles are dropped from the noodle maker into a metal container in which they are shaken to break the noodle strips into grain like pieces. After shaking, the particles are screened through a 1/8 inch mesh screen to further break them apart and to remove any large masses. A fine screen is used next to separate any flour or broken grains. These screening and shaking steps also further bind the grains together and make them less likely to break. The completely formed sweet potato rice grains are then steamed for 2 minutes and dried thoroughly. When dried, the sweet potato rice is ready to be bagged and sold.

9. Using the present production line operated by two men, approximately one half of one 66 pound bushel of sweet

BASIC: Ltr Hq Nagasaki Civ Aff Team, APO 24-5, 18 July 1949
subj: "Sweet Potato Rice"

potato rice can be produced in one working day. The inventor Mr. Umesaki, stated that by reorganizing the present set up, a production level of 2 bags of sweet potato rice can be attained by 2 men per day. He further stated that by mechanizing the process and using about 20 people, 100 bags per day could be produced.

10. 100 kilograms of sweet potatoes will yield approximately 31 kilograms of sweet potato rice. The price of 100 kilograms of sweet potatoes is considerably lower than that of 31 kilograms of rice. Although no estimate has been made to date of the cost of processing sweet potatoes into sweet potato rice, it is entirely possible that the cost of finished sweet potato rice might be very close to that of rice. A major reason given by the inventor of the process for his experiments was an endeavor to bridge the gap when rice is not readily available with a satisfactory substitute.

11. As sweet potatoes do not normally last long in prolonged storage, it has been necessary to use them soon after harvesting. By processing them into sweet potato rice, many causes of spoilage of fresh stored sweet potatoes would be eliminated.

12. Extended use of this processed product might possibly eliminate to a great extent the necessity of rice imports, and at the same time give the Japanese people an increased supply of a food which they desire, instead of a food, such as sweet potatoes, which they do not favor highly.

SUBJECT: Floods, Soil Erosion and Droughts

THROUGH: Commanding Officer, Kyushu Civil Affairs Region, AFPO 24-5
ATTN: Economics Section

TO : Commanding General, I Corps, AFPO 301

1. The area of agricultural land eroded, silted or otherwise taken out of production by floods:

	<u>1946</u>	<u>1947</u>	<u>1948</u>
Eroded	195.7 cho	105.0 cho	67.0 cho
Silted	782.8 "	420.1 "	268.8 "
Otherwise	978.5 "	525.1 "	334.8 "

2. The estimated loss as a result of flood and/or drought in the number of koku or kan of the following staple foods:

Rice	22,955.4 koku	14,507.9 koku	10,559.0 koku
Wheat	48,100.6 "	20,046.3 "	26,543.6 "
W. Potatoes	294,059 kan	147,029 kan	588,118 kan
S. "	3,143,520 "	2,567,905 "	3,816,130 "
Barley	25,141.0 koku	9,052.3 koku	31,369.6 koku

3. Extent of effect of denudation of forest land on soil erosion.

Generally speaking, most of the erosional effects of served today are the direct outgrowth of wartime over-production. Thus wartime damage is gradually coming under control and it's effects can be eradicated by an efficient reforestation program.

The amount of land seriously effected by erosion is shown in the table below:

Encl 14

BASIU: Ltr, Hi Fukuoka Civil Affairs Team, File 430, subj: "Floods
Soil Erosion and Droughts", dtd 15 Jul 49.

	<u>1946</u>	<u>1947</u>	<u>1948</u>
New Forest Erosion	2,831 cho	35 cho	59 cho
Spread of Old Forest Erosion	97 "	6 "	13 "

4. In some areas of this prefecture encroachment of the river flood plains have decreased the amount of arable lands. This can be traced back to the denudation of the forest uplands during the war years

In almost all instances of the above, it is the increased deposition of material in the river bed proper that has brought on a forced flooding of the adjacent lands.

There are no accurate figures available on the above damage at the present time.

THRU : Commanding Officer, Headquarters Kyushu Civil Affairs Region,
APO 24-5
TO : Commanding General, Headquarters I Corps, APO 301

In compliance with the letter from Headquarters I Corps, APO 301, dated June 23, 1949, subject: "Study on Soil Erosion", the following report is submitted:

1. The area of agricultural land eroded, silted or otherwise taken out of production by floods.

Name of year	Area of agricultural land eroded, silted by floods	Area of land taken out of production by floods
1946	111 <u>cho</u>
1947	253 <u>cho</u> 1 <u>tan</u>
1948	3,583 <u>cho</u> 1 <u>tan</u>	14 <u>cho</u> 9 <u>tan</u>

2. The estimated loss as a result of flood and or drought, in the number of koku of the following staple foods.

Name of fiscal year	Rice	Wheat & Barley	Sweet potatoes	White potatoes
1946 by flood	3,432 <u>koku</u> <u>koku</u> <u>kan</u> <u>kan</u>
by drought	2,059 "
1947 by flood	1,701 "	3,008 "	52,260 "
by drought	2,266 "
1948 by flood	106,001 "	8,753 "	689,113 "	141,944 "
by drought	1,994 "	11,491 "

3. To what extent did the denuding of forests effect soil erosion?

Name of fiscal year	Government owned forest		Private owned forest		Total	
	Area of cutting	Soil erosion	Area of cutting	Soil erosion	Area of cutting	Soil erosion
1946	510 <u>cho</u>	3,242 <u>cho</u>	3,752 <u>cho</u>
1947	652 "	3,072 "	5 <u>cho</u>	3,724 "	5 <u>cho</u>
1948	579 "	4.5 <u>cho</u>	3,100 "	133 "	3,679 "	137 " 5 <u>tan</u>
TOTAL	1,741 "	4.5 "	9,414 "	138 "	11,155 "	142 " 5 "

BASIC: Ltr Hq Saga Civil Affairs Team, subj: "Report on Study on Soil Erosion", dtd 15 Jul 49.

4. Any other factors which have contributed to soil erosion or flooding.

a. Rainfall situation in the last few years.

(1) Judging from the recent records, there were abnormally continued rainfalls in these years.

b. The banks and dikes of rivers were left in poor conditions due to insufficient material.

c. Reclamation programs of forest lands have been carried out, but due to lack of fund, proper steps could not be taken causing erosion flooding to a certain extent.

SUBJECT: Report on Soil Erosion in Miyazaki Prefecture

TO : Commanding General, Headquarters I Corps, APO 301

1. In compliance with AG letter 403-BA, Headquarters I Corps, dated 23 June 1949 the following report is submitted.

2. The area of land eroded, silted or otherwise taken out of production by flood is as follows:

	<u>1946</u>	<u>1947</u>	<u>1948</u>
<u>Paddy Fields</u>			
Washed away or silted	1,135 cho	187 cho	469 cho
By floods	175 "	37 "	89 "

	<u>1946</u>	<u>1947</u>	<u>1948</u>
<u>Upland Fields</u>			
Washed away or silted	334 cho	3 cho	150 cho
By floods	56 "	1 "	31 "

3. The estimated loss of staple food as the result of flood and drought are as follows:

	<u>1946</u>	<u>1947</u>	<u>1948</u>
Rice	65,000	86,000	5,800
Wheat & Barley	150,960	40,404	1,332
Sweet Potatoes	43,914	97,143	1,250
White Potatoes	3,917	602	433

All the above figures are Brown Rice Koku.

4. Through indiscriminate cutting of forest the erosion in the prefecture has been increased considerably.

5. In 1946 there were two typhoons, 1947 there was a drought and 1948 some districts were damaged by both drought and floods.

KAGOSHIMA CIVIL AFFAIRS TEAM
KAGOSHIMA, KYUSHU, JAPAN

CGB/en

APC 970
14 July 1949

612
607

SUBJECT: Study on Soil Erosion

THRU: Commanding Officer
Kyushu Civil Affairs Region
APO 24-6

TO: Commanding General
Headquarters I Corps
APO 301

1. In compliance with I Corps ltr AG 403-BA dtd 23 June 49, subject as above, the following information is submitted.

2. Flooding and soil erosion steadily are becoming more serious in Kagoshima where 70% of the soil is volcanic ash and extremely susceptible to washing.

3. Unwise selection of land to be reclaimed, prior to the establishment of the new qualification standards last January, contributed its measure to the problem. So, too, did clear cutting and over-cutting.

4. However, in the opinion of this headquarters, the accumulated neglect of flood control facilities, terracing projects, levees, water gates, dams, irrigation and drainage ditches, is the primary contributing cause of the prefecture's snowballing losses.

Extreme dryness in 1946 and 1947 permitted a temporary break in the steady upward damage trend.

For this year's staggering loss the near-record rainfall naturally was the primary cause. The Kagoshima City weather bureau reports that the "rainy season" (10 June - 10 July) precipitation of 1208 mm was the highest in 30 years. (The 50-year average for this 30-day period is 474 mm.)

Jul 77

612
507

14 Jul 49

SUBJECT: Study on Soil Erosion

5. Aware of the acute need of large scale rebuilding, Kagoshima last year requested the national government for ¥700,000,000 for high priority public works projects; it got ¥60,000,000 or 8.5% of minimum estimated needs.

6. Present needs, which can be blamed directly to the inadequate programs of preceding years, have almost tripled and it seems safe to predict they will go still higher in the future unless vigorous action is taken this year.

7. The prefectural engineering department points out that concrete river retaining walls washed out in the record typhoon of 1945 have never been replaced.

8. Each year the engineers submit plans and estimates and each year their budget requests are rejected.

9. Each year the villagers make patches of bamboo matting, stones and mud and each year the patches are washed out, the breaks are enlarged and the area of damage is more widespread.

10. The prefectural land department lists major post-war agricultural land damage as follows in chobu:

	<u>1945</u>	<u>1946</u>	<u>1947</u>	<u>1948</u>	<u>1949</u>
Washed away or silted	500.5	318.4	142	793.5	3878
Rehabilitated	132.5	743	254.8	400.6	
Out of production at year's end	386.5	143.4	28.2	395.6	

11. It will be noted that by the end of 1947, all but 28 chobu of damaged agricultural areas had been restored to production but that extremely serious setbacks were suffered in 1948 and 1949.

12. Major crop losses by flood damage alone follow:
(Potatoes in kan; all others in koku)

612
507
SUBJECT: Study on Soil Erosion

14 Jul 49

	1946	1947	1948	1949
Rice	95,656	2,200	42,760	178,000
Mugi	191,182	33,800	2,700	116,872
Other Grain	71,628	7,100	20,307	5,458
Sweet Potato	1,096,100	33,800	1,426,325	35,374,855
White Potato	771,913	15,000	125,000	261,503

This year's sweet potato damage will be sharply cut by replanting of damaged areas. Above losses do not include damage by wind, salt spray or insects.

13. The only recent major drought damage was in 1947 when rice losses were set at 40,880 koku, other grains 76,200 koku and sweet potatoes 21,860,000 kan.

14. Rehabilitation of denuded forest land is an exceedingly slow and costly proposition usually involving retaining wall construction and terracing. In this field the denuded area has spread steadily: (cho)

	1946	1947	1948	1949
Cut Area	5,874	9,932	9,818	*9,480
Reforested Area	4,183	6,786	12,657	*9,790
Total Denuded	876	924	953	1,125
Rehabilitated	7.9	28.9	36.4	*13

*Prefectural plan

15. Since 1945, 8259 chobu of pasture land, airfields, and drill grounds and 4244 chobu of upland forest have been reclaimed.

16. A total of approximately 30,000 chobu of land has been purchased for reclamation and forestry officials declare at least 7000 chobu of this should never have been taken.

17. A major public works program is recommended for the repair of past damages and for the minimization of future losses.

RESTAURANT CONTROL

1. References

- a. General Headquarters, Supreme Commander for the Allied Powers, Economic and Scientific Section, Price and Distribution Division, PD Enforcement Memorandum No. 19, 23 May 1949, subject: "Restaurant Control."
- b. General Headquarters, Supreme Commander for the Allied Powers, Economic and Scientific Section, Price and Distribution Division, PD Enforcement Memorandum No. 20, 27 May 1949, subject: "United Nations Nationals and Economic Laws."

2. Many restrictions to restaurant operation were liberalized by Diet Law 52 of 1949 (reference la, inclosure 1), which authorized the reopening of so-called light restaurants. The law provides for a licensing procedure for all restaurants which, if enforced, will result in better control of eating establishments.

3. The control of restaurants and particularly the prohibition against serving staple foods in any eating establishment except a licensed meal coupon restaurant, is an integral part of the program aimed at keeping staple foods in ration channels, thereby making a maximum amount of food available to the general consumer.

4. The new restaurant control law became effective 7 May 1949, however, a sixty days extension of the previous licensing procedure was permitted to enable restaurants to comply with the new licensing requirements. At the expiration of the interim period (7 July 1949), an intensive and continuing enforcement program, coordinated by the Economic Investigation Board, will be undertaken by the police, procurators, Ministry of Agriculture and Forestry, prefectural governors and other interested officials.

5. The success of the program depends on:

- a. Continuing and decisive action by the autonomous police and National Rural Police in exercising constant surveillance to ensure that unlicensed restaurants are not permitted to operate and that licensed restaurants operate within their license and strictly observe regulations restricting the serving of staple foods.

- b. Prompt use of the license revocation provisions of the restaurant control law by the prefectural governor.

6. Chiefs of civil affairs teams will exercise surveillance over the administration and enforcement of restaurant controls by the prefectural governors, the mayors of cities, the head men of villages and towns, local offices of the Staple Food Kodan, Grocery Kodan, the Economic Investigation Board, the police and the procurators to ensure that:

'Operational Directive No. 36 Hq. Eighth Army, 6 July 1949, cont'd'

a. Police conduct a continuous campaign to prevent the sale or service of staple foods by restaurants not licensed to do so.

b. Autonomous police, particularly in large cities, report proposed plans for enforcement as well as actual accomplishments.

c. Police, procurators, Economic Investigation Board and all other enforcement and administrative agencies coordinate their activities in the restaurant enforcement program through the Prefectural Economic Investigation Committee as provided for in Section IV B, inclosure 4, of reference 1a.

d. Prefectural governors take immediate action to revoke licenses of violators and of establishments which do not turn in sufficient coupons as provided in paragraph 2b and c, of reference 1a.

e. United Nations Nationals violating restaurant controls are apprehended and prosecuted in accordance with reference 1b. It is important that prefectural governors understand that the restaurant licensing procedure similarly applies to United Nations Nationals and that revocation of a prefecture-issued license is the prerogative of the governor irrespective of the nationality of the holder.

7. A report of progress will be submitted under appropriate heading in the monthly civil affairs activities report, Annex D, to include:

a. Japanese operation, enforcement and state of compliance with restaurant control laws.

b. A summary of reports received from law enforcement agencies (paragraph 7b above) to include the number of licenses issued, suspended, and revoked in the preceding month.

8. Recission:

Operational Directive 61, this headquarters, 23 August 1947, subject: "Restaurant Control," as amended.

1. Reference is made to letter to the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, file 430(10 June 49)ESS/PD, PDF-100, dated 10 June 1949, subject: "Release of Imported Raw Materials Needed for Manufacture of Baby Food B (Biscuits)." (inclosure 1).

2. The reference letter releases the following amounts of imported food in your area for the manufacture of baby food biscuits (inclosure 2):

<u>Commodity</u>	<u>Kilograms</u>
Ice-cream Mix Paste	95,678
Ice-cream Mix Powder	251,007
Powdered Skim Milk	216,488
Imported Sugar	692,242

3. The baby food biscuits will be distributed to infants 1 to 5 years of age through the Staple Food Distribution Kodan at the official price as set by the price board. Distribution will be made during the period July through December 1949, on a voluntary basis with an equivalent amount being subtracted from the regular staple food ration. The subtraction rate from the staple food ration is 410 grams per 450 grams of manufactured biscuits.

4. Surveillance will be exercised in accordance with Operational Directive number 22, this headquarters, dated 21 April 1949, subject: "Food Distribution."

AGMGRP 430

27 June 1949

SUBJECT: Release of Imported Canned Goods

TO: Commanding General
I Corps
APO 301

1. Reference is made to letter to the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, file 430(31 May 49)ESS/PD, PDF-93, dated 31 May 1949, subject: "Release of Imported Canned Goods," (inclosure 1).

2. The reference letter releases 236,600 kilograms of imported powdered skim milk to be distributed during the period June through August in your area. The rate of distribution is 25 grams per capita per day for 75 days to all nurseries throughout Japan. 19,140 kilograms of imported spices (Class H canned food) will be distributed to factories in your area to be reprocessed with indigenous spices into curry powder. The finished product will be distributed at the rate of 34 grams per household in the following cities:

<u>City</u>	<u>Curry Powder</u>
Tokyo	52,700 kgs
Yokohama	10,200 "
Osaka	19,040 "
Kobe	7,750 "

1,310 kilograms of imported assorted spices to be used in the processing of sausages are released in your area. The finished product will be distributed at the rate of 20 moume per person. Detailed allocation plans are attached as inclosure 2.

SUBJECT: Staple Food Distribution

THRU : Commanding Officer, Kyushu Military Government Region,
Headquarters and Headquarters Detachment, APO 24 Unit 5

TO : Commanding General, Headquarters Eighth Army, APO 343

1. In compliance with paragraph three, letter Headquarters Eighth Army, AGMGEP 430, dated 6 June 1949, the following information is submitted.

2. Report on staple food allocated to process cakes, from October 1948 to present date.

<u>Date Allocated</u>	<u>Kind</u>	<u>Amount</u>	<u>Destination</u>
2 Oct 48	Buck flour	1,694 kg	Kumamoto Ken Bakery Association
2 Oct 48	Cracked rice	135	"
2 Oct 48	Flour (made out of cracked wheat)	175.5	"
30 Oct 48	Corn meal	8,250	Aso Food Manufactory
30 Oct 48	Millet	50	"
17 Dec 48	Flour(wheat)	2,650.990	Tameki Hongo Representative of Bakery
5 Feb 49	Corn	8,400	Aso Food Manufactory
21 Apr 49	Horse Bean	100	"
15 May 49	Millet	600	"
14 Jun 49	Horse Bean	2,385	"

3. All above listed were not fit for ration due to degeneration or spoilage by rain leakage or insufficient drying. Having obtained confirmed certificate by food inspector they were distributed to factories which have special process facilities to make cake. The products are being distributed to factory workers.

 FOOD SERVICE BULLETIN

15 June 1949

NUMBER

1

This is the first of a series of Food Service Bulletins to emanate from the Office of the Eighth Army Quartermaster, purpose of which is to disseminate authoritative data and information relating to the food service program and to establish administrative and operational procedures of general application. The Bulletin should be brought to the attention of Food Service personnel by means of supervisors' scheduled conferences and/or the mess stewards daily council. Additional numbers will be published from time to time as subject matter becomes appropriate. A copy of this publication will be kept on file in each mess and food service supervisor's office.

FOOD POISONING

1. The coming of summer will increase the hazard of food poisoning, as the warm weather accelerates the growth of certain bacteria identified with food poisoning epidemics. These bacteria can be controlled by observance of good food handling procedure. Of major importance in summer time, are the following phases of mess hall sanitation:

a. Prevention of food contamination.

(1) Eliminate the fly from the kitchen. The most effective fly control measures are fly proof screening and a DDT solution sprayed on walls, ceilings, screens, et cetera. Post Engineer teams will spray the mess halls as often as necessary. Have fly swatters immediately available to eliminate that occasional fly which manages to get by the screen door.

(2) Boils, pimples, and sinus infections are sometimes caused by the same bacteria that grow in food and produce food poisoning epidemics; hence, persons with such afflictions should not be allowed to handle food.

b. Prevent growth of bacteria in food.

(1) Refrigeration. Exposure for period of a few hours at room temperature can turn a slightly contaminated food into a poisonous substance. Keep items to be served cold under refrigeration as long as possible. Leftovers should be returned to the refrigerator immediately. Hot

foods, however, should be first cooled to room temperature to avoid overloading of the refrigeration machinery. The refrigerator must be immaculate and proper temperature maintained at all times. Stored foods should be stacked to permit air circulation.

- (2) Cream fillings, custards, and like materials are very favorable media for bacterial growth and should not appear on the summer menu. Foods requiring mayonnaise, such as deviled eggs, minced meats, and sandwich mixtures, are also favorable to the growth of germs and must be carefully handled and provided maximum refrigeration. If any of the ingredients are leftovers, remember the rule that leftovers should be consumed within twenty-four (24) hours.

2. The Army scheme of continuous inspection insures delivery of wholesome food products. It is the responsibility of Food Service personnel to keep the food wholesome and free from contamination during storage, preparation, and serving. Only such food should be served. Don't violate regulations by obtaining those luscious appearing, but probably highly contaminated, strawberries and other tempting fruits available on the Japanese market.

9 June 1949

SUBJECT: Release of Imported Molasses for Yeast Production

TO : Commanding General
 I Corps
 APO 301

1. Reference is made to letter to the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, file 436(3 June 49)ESS/PD, PDF-97, dated 3 June 1949, subject: "Release of Imported Molasses for Yeast Production," (inclosure 1).

2. The reference letter releases imported molasses to the following factories in your area for yeast production:

<u>Name of Factory</u>	<u>Molasses (Kgs.)</u>	<u>Yeast Production (lbs)</u>
Nitto Kogyo K.K., Moji Plant, Fukuoka	195,070	214,577
Nippon Hakko Kogyo K.K., Moji Plant, Fukuoka	292,736	322,010

3. The rate of production is 1,100 pounds of yeast per one metric ton of molasses when the sugar content is 50%.

4. Distribution will be made by the Staple Food Management Bureau at the official price of ¥7,250 per one metric ton of molasses of 50% sugar content rate. An increase or decrease of ¥100 to the official price may be made with every 1% variance of the sugar content rate.

5. Surveillance will be exercised in accordance with Operational Directive number 22, this headquarters, dated 21 April 1949, subject: "Food Distribution."

SUBJECT: Staple Food Distribution

TO: Commanding General
 I Corps
 APO 301

1. Reference is made to Operational Directive number 22, this headquarters, dated 21 April 1949, subject: "Food Distribution."

2. The following extract taken from a recent communication from the Supreme Commander for the Allied Powers is forwarded for your information.

"1. The matter of sale and transportation of commodities processed from staple foods, as defined in the Food Management Control Law, has been discussed with the Ministry of Agriculture and Forestry. It is anticipated that such commodities will soon be subject to substantially the same transportation and sales controls as staple foods now are.

"2. As a result of the action taken by General Headquarters, Supreme Commander for the Allied Powers, and discussions with the Ministry of Agriculture and Forestry, it is hoped that allocations of staple foods for the production of cakes will be eliminated."

3. It is requested that evidence of any allocations of staple foods for the production of cakes, etc., by the prefectural governments of local food offices after October 1948, be brought to the attention of this headquarters. The Ministry of Agriculture and Forestry has stated that no such allocations have been made since that time.

BY COMMAND OF LIEUTENANT GENERAL WALKER:
