# REPORT.

The President and Directors of the LAKE SHORE & MICHIGAN SOUTHERN RAILWAY COMPANY submit to the stockholders the following report for the fiscal year ending December 31, 1879 :

## ROAD OPERATED.

Main Line—Buffalo, N. Y., to Chicago Ill.....	540.49 miles.
Eleven branches and tributary leased roads .....	637.18 "
TOTAL.....	1,177.67 miles.

This Company owns 1,024.94 miles, (although 160.07 miles are embraced in three other organizations,) and leases 152.73 miles.

Of the 540.49 miles of main line, 235.79 are double track, making the main line equal to 776.28 miles of single track; and two branches—203.78 miles—are so situated that they, with the main line, form a double line of road between Cleveland, Ohio, and Elkhart, Indiana, (101 miles east of Chicago,) making, together, 980.06 miles of track, all laid with steel rails. There are also some miles of steel rails in two branches, making in all 1,082 miles track laid with steel rails.

## CONSTRUCTION AND EQUIPMENT.

These accounts remain unchanged. Nothing was charged to them in 1879, notwithstanding an outlay of about \$150,000 for items fairly chargeable to construction, and \$300,000 paid for seven hundred new box freight cars. Of this amount \$138,915 was derived from the premium on \$882,000 first consolidated mortgage bonds, sold to pay off a like amount of bonds (of the former C. P. & A. Co.,) which matured January 1, 1880. This item is not included in the earnings on the one hand, or expenses on the other, but was applied directly to the payment for cars as stated. With this exception all outlays for improvements are included in the operating expenses.

## CAPITAL STOCK.

The Capital Stock of the Company is \$50,000,000, to-wit :

Guaranteed (10 per cent).....	5,335 Shares—\$100.....	\$ 533,500
Ordinary.....	494,665 Shares— 100.....	49,466,500
	500,000 Shares—\$100.....	\$50,000,000

Of the guaranteed stock, the claim for dividends between 1857 and 1863 has been settled on \$360,600, leaving \$172,900 still unsettled.

Dividends of 5 per cent. February 1, and 5 per cent. August 1, have been regularly paid on this stock since August 1, 1863, the date of the first dividend.

Of the ordinary stock the Company owns 2,679 shares (\$267,900,) which appears among its assets in the balance sheet.

## FUNDED DEBT.

The first mortgage debt of the Company was diminished from \$23,000,000 to \$22,750,000 by the regular contribution of \$250,000 to the Sinking Fund, which now amounts to \$2,250,000 first mortgage bonds purchased and cancelled.

The second mortgage debt was increased \$665,000, which represents the cost of \$1,732,500 first mortgage bonds, and \$1,384,700 of the capital stock of the Chicago & Canada Southern Railway Company. This purchase gives this Company the control of that Company's road. It extends from the Detroit River, at Grosse Isle, to Fayette, Ohio, a distance of 67 miles. From Fayette to Butler, an important station on our Air Line, and the eastern terminus of the Eel River Railroad, a distance of only about 35 miles, the road is graded, and this Company was not only menaced with the completion and opening of this road to Butler, but possibly its ultimate extension to Chicago as originally intended. As the opportunity occurred to obtain the virtual ownership of this road at the low cost of \$10,000 per mile, it was deemed good policy by the Board of Directors to accept it. This Company has operated that road since November 10, 1879, as agent for the Chicago & Canada Southern Railway Company, hence the earnings and expenses of that road are not included in this report. It is proper to state, however, that the earnings thus far, in the winter season, are somewhat in excess of the cost of operating.

The funded debt of this Company, December 31, 1879, amounted to \$35,915,000, an increase of \$415,000. The usual detailed table of this debt may be found on a subsequent page.

\*All now settled, with a single unimportant exception.

The amount earned for each share (\$100) of the Capital Stock, after the payment of prior fixed charges, was \$7.24, against \$5.61 in 1878, and \$3.57 in 1877.

The financial results of the ten years since consolidation are shown by the following condensed table:

It will be observed that the net earnings in 1879 were the largest in the history of the road, notwithstanding the snow blockade lasting through

January and February, followed by a bitter railroad war in May and June, during which rates dropped to figures which were unprecedented.

The following condensed tables show the freight and passenger business for the entire ten years—1870-1879 :

The freight business in 1879, as compared with 1878, shows the following results :

Increase in tonnage, 1,442,849 tons .....	23.7 per cent
Increase in tons one mile, 392,955,614.....	29.3 per cent.
Decrease in rate per ton per mile, cent., .092.....	12.5 per cent.
Increase in freight earnings, \$1,239,309.....	12.3 per cent.

The number of tons moved one mile in 1879 as compared with 1877, shows the extraordinary increase of *sixty per cent.*

The following table illustrates vividly the marvellous increase in production of the great West, and of the freight business of this Road ; and shows also the constantly diminishing rate at which the public has been served.

Passenger earnings for the year show an increase of \$80,610, coupled with a decrease of passenger train mileage of 62,000 miles.

### OPERATING EXPENSES.

The road was operated in 1879 for 58½ per cent. of the earnings, the lowest percentage ever reached. This included all outlay, as nothing was charged to construction or equipment. Besides the additions to the property already mentioned, there was included in the operating expenses the cost of 9,500 tons steel rails, increasing the number of miles of track laid with steel from 1,002 to 1,082.

### CONCLUSION.

The year under review completes the first decade of the existence of this Company. The management congratulates the stockholders upon the late decided improvement of business, following the long period (six years) of depression. The abundant harvest of last year, following the liquidation of the preceding years, and the practical settlement of the financial policy of the nation, produced a general feeling of confidence in "better times," and has been followed by an increased business activity all over the land, which, it is believed, is substantially permanent in its character.

The management takes this occasion to record the faithful and energetic service of the officers and agents having charge of the Company's affairs.

WILLIAM H. VANDERBILT,

*President.*

Cleveland, May 5th, 1880.

*l* To May 31—five months.

*m* Opened January 19, 1852, and run as a wide gauge railroad to December 7, 1853. The attempt to narrow the gauge was followed by the "Erie War," which closed the road two months to February 1, 1854, on which day the first train passed from Buffalo to Erie over a uniform gauge.

*n* Opened Buffalo to State Line February 22, 1852.

*o* The Buffalo & State Line and the Erie and Northeast Railroad Companies were operated as one road from November 19, 1853, to May 15, 1867, under a contract, when they were formally consolidated, taking the name of "Buffalo & Erie Railroad."

*p* Seven Months, to August 1. Merged into Lake Shore & Michigan Southern.

*q* Begins June 1, Chicago to Erie: August 1, Chicago to Buffalo.

*r* Five months to May 31, 1859—Consolidation with Lake Shore Railway.

*s* 1856, the last of the first twenty years, the earnings reached their maximum, (\$6,251,323), when the revulsion of 1857 came.

*t* 1873 was the summit year of the second twenty years, the earnings reaching \$19,414,509, more than treble the earnings of 1856.

# HISTORY.

(Third Paper.)

---

By C. P. LELAND.

---

The annual reports for 1877 and 1878 contained a condensed history of the different companies embraced in the present organization. It may not be generally known that a determined effort was made to build a railroad substantially on the present line of the L. S. & M. S. in Ohio, fifteen years before the opening of the Cleveland & Toledo, or the Cleveland, Painesville & Ashtabula, now embraced in the L. S. & M. S. As a forerunner of the present corporation, it is deemed appropriate to give a permanent record to a sketch of the rise and fall of

## THE OHIO RAILROAD COMPANY.

This company was organized at a residence in Painesville, in April, 1836, to build a railroad from the Pennsylvania State line, through the northern tier of counties of Ohio to the Maumee River, at Manhattan, then a paper city rival of Toledo, now part of it.

STEPHENSONS ROCKET

In 1825, the year in which Stephenson made his triumphant trial trip with the Rocket, on the Liverpool & Manchester Railway, Col. Clinton, a civil engineer, announced his project for the Great Western Railway from New York to the Mississippi River, a distance of 1,050 miles, at an estimated cost of \$15,000,000.

Soon after another and a rival project was put forth to build a railroad on piles—ten feet apart, on which were to be placed planks nine by three inches, edgewise, which supplied the tracks. No iron to be used except the bolts and nuts necessary to fasten the planks to the piles. This road—1,050

miles—was to cost less than one million dollars! Here is the estimate made by the projector :

Right of way.....	\$532,800
Lease of mills to saw planks.....	1,850
Getting out posts.....	31,400
Bolts and nuts.....	211,200
Leveling posts and laying rails (planks).....	62,800
Setting posts and piles.....	31,400
Sawing.....	35,500
<b>TOTAL.....</b>	<b>\$906,950</b>

Strange as it may seem, this unique plan, with the addition of a light strap iron rail, was adopted by the Ohio Railroad Company.

The charter was extremely liberal, bestowing upon the company banking privileges, which were utilized, as will be painfully remembered by the surviving business men of that day, for the emission of three or four hundred thousand dollars of bills. As if this were not enough, the company had the benefit of the so-called "Ohio plunder law," under which the State was forced to become a partner to the extent of fifty per cent. of the amount of capital stock subscribed and paid in by any railroad, turnpike, or canal company. As the term "paid in" was construed with extreme liberality, a subscriber to stock could pay therefor with a deed of his lot or farm *at his own valuation*. After going through this form, gathering in a lot of so-called assets, the officers of the company would certify to the Auditor of State that so much stock had been subscribed and paid in, and demand State bonds to the extent of one-half the sum so subscribed and paid in. Of course, the larger this sum the more bonds the State had to issue.

So many schemes and projects were started under the extraordinary stimulus afforded by this law, it was foreseen that the bond mill at Columbus would break down under the demand from all sections of the State, hence the law was repealed before a very large amount was issued.\*

The Ohio Railroad Company, however, got in its work (on the subscription book) early. Seven men, who could probably have raised with difficulty \$25,000, subscribed to the capital stock of this road to the extent of \$600,000 without the slightest hesitation, and received \$219,000 in State bonds—a dead loss to the State.

*The State issued bonds to	
Turnpike companies.....	\$1,637,500
Canal companies.....	377,500
Railroad companies.....	682,000
<b>Total.....</b>	<b>\$2,697,000</b>

These bonds and the currency issued by the company constituted nearly, if not quite, all the means for the prosecution of the work. Serious disagreements as to the best way to raise money broke out in the Board of Directors. One plan was to purchase flour with the company's notes, ship it to New York for sale, and to use the avails as a redemption fund for the notes and for exchange, which soon was worth ten per cent. premium.

In 1836, the route east of Cleveland was surveyed and located. Then the Directors, possibly influenced by private interests, quarreled as to where to begin the work. One party insisted that the section between Fremont and the Maumee River be constructed first, while another as strenuously insisted on beginning at Cleveland, and proceeding eastward. The former plan prevailed, and the first pile was driven at Fremont, near the present L. S. & M. S. station, June 19, 1839.

### PROPOSED PLAN AND COST OF CONSTRUCTION.

As already stated, this road was to be built upon piles or posts. These posts were 12 to 16 inches in diameter, and 7 to 28 feet long, to accommodate the inequalities in the surface of the ground. They were driven ten feet apart, and as the road was to be double track, there were four rows, or 2,112 piles per mile. Upon these piles were placed longitudinally chestnut planks or sills. Then came the cross ties, six feet apart, requiring for both tracks 1,760 per mile. On these were placed the stringers or wooden rails, 8x8. Last of all came the iron ribbon, for it was little more than that, as the estimate provided for but twenty-five tons per mile of double track road. That the piles were well driven is attested by the fact that many of them may be seen to-day at different points along the line. The prices in the estimated cost of the road are interesting: Iron, \$80 per ton; spikes, 9 cents per pound; white oak ties, 20 cents each; timber, \$7.00 to \$8.00 per thousand feet.

The Chief Engineer, Cyrus Williams, estimated the cost of the entire road, 177 miles, double track, at \$2,653,676, about \$16,000 per mile.

About one-third of the road between Cleveland and Toledo was built ready for the strap rail, but the company succumbed to the hard times which followed the wild speculative era of 1836, and in 1843 operations ceased before a single train had been placed upon the track. The child of the feverish speculative era of '36 died from exhaustion, while its progenitors were quarreling as to the best method of rearing it. The whole scheme was generally regarded as visionary and wild, yet only ten years afterwards (1853) the Cleve-

land & Toledo Railroad was opened, and was a brilliant success from the start. Had the Directors of the Ohio Railroad Company pushed on a little farther, laid forty or fifty miles of track, and placed trains on it, thus forming a basis for selling the Company's bonds, it can hardly be doubted that their road would now form a part of the Lake Shore & Michigan Southern Railway.

The writer is indebted to Clark Waggoner, Esq., of Toledo, for nearly all the material furnished for this sketch.
