Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

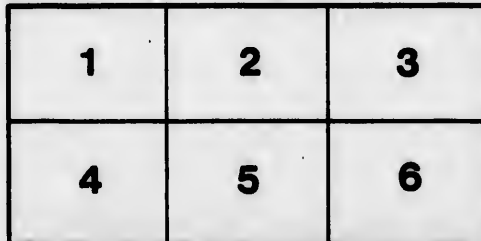

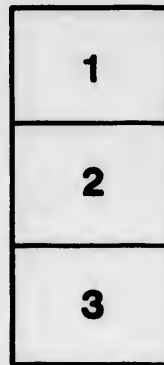

New Brunswick Museum  
Saint John

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

New Brunswick Museum  
Saint John

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

THE  
FARMER'S  
ALMANAC

FOR THE YEAR OF OUR LORD

1857

Contains the most complete and accurate  
information for the farmer, including  
the most improved methods of  
cultivation, and the most valuable  
information for the merchant and  
the public.

Calculated by HARRIS, for the year of our Lord  
1857, from Cassini's and other observations,  
including the motion of the Moon.

Containing, besides the large number of Astronomical Calculations, and  
the Farmer's Calendar, the most valuable and  
interesting facts that any other Almanac  
contains.

NEW, USEFUL AND ENTERTAINING INFORMATION

BY C. H. BELCHER.

NOVA 560714

EMBER DAYS.

March 4, 6 and 7. | September 16, 18 and 19.  
 June 3, 5 and 6. | December 16, 18 and 19.

ROGATION DAYS.

May 18, 19 and 20.

PLANETS.

MERCURY will be the Evening Star until January 31; after which it will be the Morning Star until April 9, it will then be the Evening Star until June 1, then Morning Star until July 23, then Evening Star until September 30, after it will be Morning Star to November 24, thence Evening Star until January 15, 1858.

MARS will be in its greatest Western Elongation February 25 June 24 and October 16. It will be in its greatest Eastern Elongation January 16, May 8 and September 5.

VENUS will be the Evening Star until May 8, after which it will be the Morning Star until February 11, 1858.

JUPITER will be in its greatest Eastern Elongation February 27 and in its greatest Western Elongation July 19.

SATURN will be the Evening Star until June 6, after which it will be the Morning Star to the close of the year.

JUPITER will be the Evening Star until April 12, it will then be the Morning Star until October 30, after which it will be the Evening Star.

SATURN will be the Evening Star until July 11, after which it will be the Morning Star.

ECLIPSES IN 1857.

There will be Two Eclipses this year—both of the Sun.

I. March 25. A Total Eclipse of the Sun, commencing 3h. 6m. afternoon, and ending 8h. 54m. afternoon, mean time at Halifax. It will be invisible in Nova-Scotia and New England, but will be partially seen in California, Texas, and in most of the Western States. This Eclipse will commence in Australia and end in Mexico. Its centre will pass through the Northern and Southern Pacific Oceans.

II. September 17 and 18. An Annular Eclipse of the Sun, commencing Sept. 17th, 10h. 23m. P. M., and ending Sept. 18th, 4h. 18m. A. M., mean time at Halifax. It will be invisible in all parts of America, but may be seen in the eastern part of Europe, in all the southern parts of Asia and in the north-eastern part of Africa.

DIRECTIONS FOR FINDING THE TRUE TIME.

The Sun is on the Meridian at 12 o'clock on four days only in the year. It is sometimes as much as 15 minutes before or after twelve, when its shadow strikes the noon-mark on the sundial. Thus, on the 25th January when the sun is on the noon-mark the watch must be set 12 minutes 41 seconds past twelve, which will be the true time. The practice of setting time pieces by the rising or setting of the Sun or Moon is not strictly correct, as the unevenness of the earth's surface and intervening objects, such as hills and forests near the points of rising and setting, occasion a deviation in every place from the time expressed in the Almanack, which time is adapted to a smooth level horizon. The only means of keeping correct time is by the use of a noon-mark or a meridian line.

**EXPLANATION OF THE CALENDAR PAGES.  
LEFT HAND PAGE.**

Column

- 1 and 2—Days of the Month and of the Week.
- 3 " 4—The rising and setting in *mean time* of the highest point, or of the *upper limb* of the Sun, corrected for refraction.
- 5—The Sun's declination for the same as the Equation, 6th column.
- 6—Equation of time, (or quantity by which the Sun is *slow* or *fast* of the clock at noon, apparent, not mean, time at Greenwich, or at a quarter before eight o'clock in the morning at Halifax.)
- 7—Days' length in hours and minutes.
- 8 and 9—The rising and setting of the Moon.
- 10—The time of the Moon's southing, or passing the meridian. This column also gives the time of High Water at Parrsboro', Horton, Cornwallis, Huntsport, Windsor, Newport, Truro, &c.
- 11—The symbols in this column indicate the moon's place in the Signs or Constellations of the Zodiac.

The top of the columns of each month gives the Moon's Phases, or times of New and Full Moon, and of the First and Last Quarters, or quadratures with the Sun.

THE FARMER'S CALENDAR is placed at the foot of the columns of each month.

**RIGHT HAND PAGE.**

- 1—Contains the days of the month.
  - 2—Sundays, Weather, Anniversaries, &c.
  - 3—The time of High Water at Halifax, N. S.
  - 4— " " " Pictou, N.S., and Cape Tormentine, N.B.
  - 5— " " " Annapolis, N. S.; St. John, N. B., and Portland, Maine.
  - 6— " " " St. Johns, Newfoundland,
- of that tide which immediately precedes the southing of the Moon. These four columns are computed on the supposition that the time of High Water on the days of New and Full Moon) *L'establisement du port*) is at Halifax, 7h. 30m.—at Annapolis, St. John, N. B., and Portland, 11h. 14m.—at Pictou and Cape Tormentine, 10h. and St. Johns, Newfoundland, 6h. 30m.

All the calculations are made to *mean solar time*, which has superseded the old mode of reckoning by *apparent time*.

THE EPHEMERIS OF THE PRINCIPAL PLANETS—The hour of *meridian passage*, *right ascension* and *declination* of each of the principal planets is given for the 1st and 15th of each month. For any other day than the 1st and 15th of the month, apply a correction at the rate of 3m. 55.9s. per day, reckoned from the nearest given day, to be added for an earlier day—subtracted if for a later day.

Spring tides are the highest, and occur at or about Full or New Moon. Neap tides are the lowest, and occur at the first and last quarters. Ebb tide is that between high and low water, lasting, on an average, 7 1-4 hours; and Flood tide is that between low and high water, lasting about 5 1-4 hours. During strong north-westerly gales the tide rises earlier but does not rise to its usual height, while the ebb tide runs out longer and falls lower; but upon the gales abating and weather moderating they are later, higher and stronger. A south-westerly gale has a contrary effect; and an easterly gives some additional water.

No greater element of success can be introduced into the habits of a farmer, than a strict, methodical manner of conducting the business of the farm. The successful management of a farm requires a vast amount of care and attention, a close oversight; in short, an incessant watchfulness. There must be brought to the task no insignificant quantity of the most multifarious talents, and they must be steadily and sturdily exercised. The details of farm management are of the most extended and complicated character, and can be fully and successfully compassed but by the active exertion of a disciplined mind, which must call out its full resources, not for setting the systematic arrangement and prompt execution of all requirements for labor and skill. The farmer who lacks method has many places for every thing, and far too frequently places of full exposure to all changes of the weather. Orderly arrangement leads to neat arrangement, and therefrom springs the sure beginnings of refinement and rural taste, which is a way mark in the direct road to honor, usefulness, true gentility, and a happy life.

The column of the moon's southing gives the time of high water at Parraboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truss, &c.

In all the arrangements for constructing and keeping stables in order, the comfort, and consequently the health and thrift of the animal, should be kept constantly in view. Cleanliness under foot is all important to the comfort of animals. This can only be secured by a good stone or plank floor, very frequent cleanings, and a sufficiency, not superabundance, of clean dry litter. Remember, it is about as easy to throw out a cart load of fresh droppings in fifty different operations performed three times a day, as to do it once a week at one formidable and disagreeable task. A stable clean under foot is absolutely essential to a pure air. All kinds of grain fed to stock should be ground. One bushel of ground oats or corn will furnish as much nourishment as one bushel and a peck of whole grain. Two bushels of oats and one of carrots is better food for a horse than three bushels of oats; and when used for light work the proportions of carrots may be increased. With such food horses will enjoy good health and spirits, a loose hide, shining coat, and improved digestion. The carrot is equally valuable for fattening animals and for milch cows. With proper cultivation, from 600 to 1000 bushels of this valuable root can be raised on an acre.

☾ The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

AGRICULTURAL implements and machinery are receiving more attention from the public than they have formerly done, and are destined to receive far more attention than they now do. It is but a few years since the horse rake came into use; now a farmer would almost as quick think of getting his hay without a pitchfork as without a horse rake. It was at one time thought impossible to use a horse rake on any land that was not perfectly smooth and level; now a farmer would be loath to mow a meadow that is so rough that he cannot use the horse rake. If you have any meadows or old fields that are sward bound, or which bore indifferent crops of hay last season, give them a thorough harrowing as soon as the frost is out of the surface in the spring, while the ground is soft; then sow to each acre four quarts timothy seed, ten pounds red clover, five bushels wood ashes, and five bushels fresh slacked lime, all well mixed, and roll it well in. This will insure you a good crop of grass, without the labor of ploughing immediately.

☽ The column of the moon's southing gives the time of high water at Farsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

EVERY farmer has no doubt decided before this on what field to sow this or that particular crop. He only now awaits fine weather and a dry soil to commence operations. In the mean time there is work enough to do. Fences to put up, ploughs, harrows, hoes, &c., to be examined and repaired if needed; seed wheat, oats, timothy, clover, &c., should be procured now. The shortness of our sowing season makes it desirable that the farmer, above all others, should take time by the forelock. Too many neglect all preparations for spring work, and when the fine weather comes, having every thing to do in a few weeks, they are in too great a hurry to do any thing well. The best way to use muck is in mixture with yard manure. If the muck is well dried, it operates beneficially in two ways — by its own fertilizing ingredients, and by absorbing the liquid manure. It usually contains, when wet, about seven or eight times its own weight of water, and if made perfectly dry, will absorb a like amount of the drainings of the stable, cattle yard, &c. Muck may also be used with loam and turf to great advantage in forming compost heaps.

☾ The column of the moon's southing gives the time of high water at Farrisboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

**DRAINING** and manuring are the principal means which have hitherto been employed for improving the condition or composition of soils. Almost all agriculturists are now pretty well acquainted with the advantages to be derived from the above named methods of improvement, and are convinced that all judicious expenditures, either in the way of draining or of manuring, will or may be made to pay. But there is a method of improving soils, to which the attention of farmers has not been, as yet, directed. We refer to that method which consists in adding to soils those earthy substances in which they are deficient. Light sandy and gravelly soils, upon which wheat cannot be raised to any advantage, are benefited by additions of clay, peaty earth, or meadow muck, or a mixture of all in a compost with stable and barn manure. Clay soils, again, are benefited by additions of lime, sand, gravel, loamy sand, and peaty earth. Upon both these kinds of soil, and indeed upon almost every variety of soil, peat earth acts favorably. It should always form a part of any mixture which is added to a soil, if it can be had conveniently.

The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

MULCHING consists in covering the surface of the ground around the roots of trees or vegetables with sea weed, fine hay, spent tan, straw, or any other litter, and may be beneficially applied to all kinds of trees, shrubs, or vegetables. By this process the moisture produced by the spring rains is retained in the ground, for the use of the root during the drought of summer. The surface is also kept in a proper state to absorb the dews and gentle rains; and being thus protected from the rays of a noonday sun, rapid evaporation is prevented. This process applied to small fruits, such as currants, raspberries, strawberries, &c. has never failed of producing a large crop. On light, gravelly soils it will insure a good crop of any kind of fruit. To secure a fine and early crop of the tomato it is only necessary to head in the plants as soon as the fruit is about the size of a cherry — this will throw the strength of the plant into the fruit, the size and quality of which are consequently greatly improved.

The column of the moon's southing gives the time of high water at Farnboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

As the growing of fruit is becoming quite an object, not only for family comfort, but also as a source of profit, too much care and attention cannot be given to young trees, in the present condition of our old lands, which have been under cultivation such a length of time. When our country was new and rich, large orchards were planted, and grew rapidly, with little care except an occasional trimming; but a great change has taken place. Long cultivation has deprived our land of its natural richness, and according to some, has robbed the soil of some of the most essential ingredients required to produce a good growth of trees. Be that as it may, a few years of experience in attempting to grow trees on an exhausted soil, will convince any one of the utter folly of attempting to raise fruit trees on such soil, without high cultivation and unremitting care and attention,—they require constant care and watchfulness to keep them in a healthy and thriving condition. No doubt much depends on having the trees properly set in the first place; but let that be done right, the tree will not flourish unless it is highly manured and otherwise cared for.

The column of the moon's southing gives the time of high water at Parrisboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

Keeping roads in good repair is an object of great importance, as is generally conceded, so long as men merely talk about the matter; but it seems otherwise when they are called upon to work, if the reluctance, shirking, and dislike to do that duty upon the public highways, may be taken as indications of the real state of sentiment existing on the subject. The indifference which many display in regard to keeping roads in good repair, and their unwillingness to do their proportion of work, have often been matter of surprise, and sometimes of philosophical speculation upon some of the dark and profound mysteries connected with human nature. We have sometimes wondered if selfishness—total absorption in one's own interest, and total indifference to the interests of others—could ever be indulged to such a degree as to become wholly blind and even suicidal. It has seemed as if no other inference was admissible, when we have seen men neglect to repair some little defect in the road near their premises, which they had to suffer from every day.

The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

THERE are many farmers who, by the continual selection of their best animals for breeding, might have a stock equal to any of the high sounding English names. Would it not be wiser, then, to keep more prominent this fact, and excite emulation in improving our stock at home than to search creation over after improved animals? Deep ploughing will not cause a large crop on poor land, without manure. Feeding a colt on hay alone, will not be likely to produce a high spirited creature from a low stock in a single generation; but let a few oats be added, preserve the best for breeders for a series of years, with other things corresponding, and you may work wonders. There undoubtedly is a great difference in the quality of stock; yet it is an old and true saying that "a bad cow may have a good calf," and when this happens take good care of it. The conclusion to be drawn from these remarks is, that from the best materials we can obtain, by the best means in our power, we should improve our stock, never forgetting that what has been done may be done again.

The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

The farmer now realizes the reward of his toil and attention. He is ready to burst into songs of gratitude to Him "who causes bread to spring out of the earth, and who loads all with blessings." Is it not labor that makes a man happy? What if we could obtain these fruits, our necessary supply of food, &c., without any exertion of our own; would not the consequences be indolence and slothfulness? Would not the soul, for want of exertion, become enfeebled and enervated? Society would, indeed, be in a wretched state. Then move on, and crowd your garners with the golden ears; fill your cellars to the brim with early blues and calicoes. Gather in the fruits of your gardens, and your orchards; let nothing be wasted and lost. Leave not your tools in the field, as the manner of some is, who do business without system or order. Some men might perhaps get along without helpmeets, but what could farmers do without their wives? Who will take the interest that a wife does in the household duties, the dairy, and a multitude of other concerns that belong to the female department? There is a partnership interest and sympathy which no woman other than a wife can feel. There is, therefore, nothing better for a farmer than a good wife!

☉ The column of the moon's southing gives the time of high water at **Parsonsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.**

There is at least one very good reason why the work of the last of the autumn months should be promptly attended to. If not seasonably performed, every thing will be transfixed with chains and bolts of frost, and four months must elapse before emancipation takes place. In any other month, what happens to be neglected, may be done in the first few days of the next; but here no allowance is usually given the tardy and neglectful farmer. Carrots, Ruta Baga, Beets, and Mangel Wurzel should be harvested, as they are never positively safe beyond the first of the month. Ample preparations should be made for shelter to domestic animals during winter. Sheds, stables, feeding racks, and troughs often save in a single winter their entire cost, by avoiding the needless consumption of food to impart warmth, and by preventing a waste of fodder under foot. A general supervision should be kept of the premises, and every preparation made for winter — loose boards on barns and fences should be nailed fast; sagging gates righted; broken windows furnished with glass; stables made secure against cold currents; and a general and particular vigilance pursued in relation to the care and management of the premises, preparatory to the arrangements for another year.

The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

WINTER is the time for farmers to think — spring, summer, and fall, to work; and the three latter seasons' labor will be to little profit, if the time of the first shall have been mispent. All the plans of next season's operations should be laid and well considered during winter. All improvements, all designs for new operations, all the work to be done, should then be considered and prepared for, so that when the time for work arrives he will have nothing to do but to "go ahead." Then he has no time to think: but if he has been wise during winter he will have no need of it. It is a pitiful sight to look at in the spring, when all nature is in an ecstasy of delight, to see a farmer flying about "like a hen with her head cut off," trying to do a thousand things at once, not knowing which to do first, running here and there in search of his rusty implements, some of which require repairs, some can't be found; the ploughing season passing away, the planting season rapidly advancing, and he not prepared for any thing. Every body, who is any body, likes to see *system* and *order* in the various operations of the farm; and even the most negligent admire and approve the practice of him who has "a place for every thing, and every thing in its place."

Most of the Barristers and Attorneys are Notaries Public.

**LIGHT HOUSES ON THE COAST OF NOVA-SCOTIA,  
AND ON THE  
COAST OF NEW BRUNSWICK, IN THE BAY OF FUNDY.**

*Meagher's Beach*—East side Halifax harbor. A fixed light.

*Sambro Island*—Western entrance Halifax harbor. A fixed light.

*Devil's Island*—An Octagonal Light Beacon on the S. W. point of Devil's Island, at the entrance of the eastern passage to Halifax harbor, and exhibits a *red light* on the seaward sides to distinguish it from Sambro and Meagher's Beach lights; stands forty-five feet above high-water mark; rise and fall six feet. The Tower is painted dark brown, with a white belt between the Balcony and Lantern, to distinguish it in day time.

*Cross Island*—Entrance to Lunenburg harbor. Two lights—flash light above; fixed light below.

*Liverpool*—South end of Coffin's Island. A plain revolving light.

*Fort Point Harbor Light*—at the head of Liverpool harbor, southern entrance of the River. A bright fixed light visible from all points of approach, and must be left on the larboard hand when entering the harbor.

*Port Medway*—Beacon light on Admiralty Head west side of the entrance to the Port. Building square, painted *white*, with *black square* in the centre of the seaward sides, *plain white* light forty-four feet above sea level, and stands within thirty fathoms of the shore.

*Shelburne*—McNutt's Island. Two fixed lights, one above the other.

*Barrington*—Baccara Point, east side of the entrance to Barrington Bay. A flash light of fifteen seconds.

*Yarmouth*—West side of the harbor. A plain revolving light.

*Cape Sable, Seal Island*—The first light on approaching the Bay of Fundy is on the south point of Seal Island. A plain white light, elevated about eighty feet above high-water mark, and may be seen on approaching the Island from any point of the compass. A very dangerous rock, under water, but upon which the sea always breaks, called *Blonde Rock*, lies about three and one-third miles S. by W. by compass from the Light House. Between this rock and the Island there are some dangers: the ground is rocky throughout, and large vessels, therefore, ought not to attempt passing between them.

*Brier Island*—A plain white light, situate about half a mile N. E. from the N. W. point of the Island.

*Westport*—Peter's Island at the south entrance of the east side of the Bay of Fundy. Two *WHITE LIGHTS*, placed horizontally, (to distinguish it from Brier Island Light) at an elevation of forty feet above high-water mark.

*Digby Gut Light*—On the west side of Digby Gut, from Brier Island north-eastward. This light is chiefly intended as a guide into Digby Basin. A fixed white light.

*Black Rock Light*—On the South Shore of the Bay of Fundy. A fixed light.

*Horton Bluff Light*—In the Basin of Mines, ninety-five feet above sea level high water; rise and fall forty to forty-five feet. Building square, painted white; stands sixty feet from the Bluff, and shows a *White Light*, which may be seen in clear weather over the greatest part of the Basin of Mines, (after passing Cape Blowmedon,) and

above the Five Islands and up Windsor River, until intercepted by the continuation of the Bluff to the southward of it.

*Apple River Light*—North side of the entrance to Apple River, in Chignecto or Cumberland Bay. Two fixed lights placed horizontally.

*Partridge Island River*—An Octagonal Light Beacon on the west side of the entrance to Partridge Island River, 'Paraboro', on the north side of the Basin of Mines, and exhibits a *plain white light*, at an elevation of thirty feet above high-water; rise and fall about forty-five feet; the Tower is *white*, and stands close to high-water mark on the beach. Vessels can only enter the harbor at high-water, and must lie aground on soft bottom when the tide is low.

*Eastern Beaver, or Williams' Island*—A revolving light.

*Canseau, Cranberry Island*—Two fixed lights, one above the other, west side of the Gut of Canseau. A fixed light.

*Eddy or Sand Point Light*—On Eddy or Sand Point, on the west side of the south entrance to the Strait of Canseau, distinguished by two white lights placed horizontally, twenty-five feet above the sea level. Building square, painted *white* with a *black* diamond on the seaward side.

*Guyborough Harbor Beacon*—On the west side of the entrance to the harbor, head of Chedabucto Bay. A fixed light.

*Pictou Light*—On the south-east side of the entrance to the harbor. A fixed light.

*Pictou Island Light*—On the S. E. point of the Island. Building square and painted *white*. A fixed light, fifty-two feet above high-water mark.

*Aricbat Beacon*—A Light on Point Marichi, on the east side of the southern entrance to the harbor. Building square, painted *white*. A white light thirty-four feet above the sea level.

*Louisburg*—On the east side of the entrance to the harbor. A fixed light.

*Low Point Light*—East side of Sydney, Cape Breton, harbor. A fixed light.

*Rugged Island Harbor Light*—On Gull Rock, off the entrance of the harbor. Building square, and painted *white*, exhibiting a clear fixed light at an elevation of fifty-one feet above the sea level, and is situated in latitude  $43^{\circ} 39' N.$ , and longitude  $64^{\circ} 66' W.$

*Pubnico Harbor Light*—A Beacon light on the S. E. side of the entrance to Pubnico harbor, situated on the east side of the entrance to the Bay of Fundy, about thirteen miles northerly of Cape Sable. Building square, painted *white*. A fixed-red light on the seaward side, twenty-eight feet above high-water level, (rise and fall twelve feet,) and stands fifty fathoms from low-water mark. The point of Beach is bold.

*White Head Island Light*—On the S. W. point of White Head Island. The Tower is square, painted *white*, standing seventy-five fathoms from the water's edge, with an Octagonal Iron Lantern, sixty feet above sea level at high-water; rise and fall six feet. The light is distinguished by bright flashes of *ten seconds* duration, followed by eclipses of ten seconds, displaying alternately three flashes and three eclipses in a minute. The light will not be totally obscured during the eclipses.

**Sea Wolf or Margarie Island Light**—Situating on the N. W. side of the Island of Cape Breton, nearly midway between Port Hood and Cheticamp harbors, and distant from Cape Breton two and a half miles. A plain *white* light. The lantern is placed on a square wooden Tower, painted white, near the centre and summit of the Island. The lantern is two hundred and ninety-eight feet above sea level—visible from all points of approach. To vessels in proximity to the Island, the light may become observed by the abrupt cliffs or sides of the Island, which may serve as a guide to tack or anchor by, as hundreds of vessels find anchorage on the S. E. side. The chief landing is near the S. W. end, in shore, where a few fishing stages and boats are kept in use during the fishing season.

**Port Hood Light**—Changed from white to red, when seen from the northern entrance, to distinguish it from Margarie and N. Canso lights.

**Iron-bound Island Light**—Off the entrance to LaHave River—a bright flash light of ten seconds duration, followed by eclipses of thirty seconds. The lantern is placed on a square wooden Tower, painted *white*, on the southern side of the Island, and is visible from all points of approach. Elevation seventy feet above sea level.

**St. Paul's Island**—A fixed light on the north-east end; and a flash light on the south-west end.

**Scattarie Island**—A revolving light on the east end of the Island.

**Gannet Rock Light**—This light is intended to warn vessels of their approach to a very dangerous range of shoals and ledges, which extend from the Old Proprietor to the Seal Islands off Machias, a distance of about twenty miles. A *WHITE Flash Light*, twenty seconds dark, and forty seconds light in each minute. Building painted in stripes, vertical, black and white.

**Machias Seal Island Lights**—Two Fixed White Lights upon the Machias Seal Islands, forty-five feet above high-water, and bearing from each other E. S. E. and W. N. W., distant about two hundred feet, by which circumstance, of two light houses at the same station, they will be immediately distinguished from all other lights upon the coast, British or American. Both buildings painted *white*. Vessels standing to the northward between these lights and the Gannet Rock should tack or haul off the moment they bring these lights into one, as they will be then not more than three-fourths of a mile from the Mun Ledges, if more than five miles to the E. of the lights.

**Head Harbor Light**—Next in order, after passing Grand Manan, and the plain White Light (American) on West Quoddy Point, is Head Harbor Light, placed on the N. E. extremity of Campo Bello, and is a guide to vessels entering the main channel to West Isles, Mooes Island, and the Inner Bay of Passamaquoddy; it enables vessels also, at all times, to enter Head Harbor. A fixed white light. Building painted *white*, with a *red* cross on it.

**Point Le Preau Lights**—Upon this projecting headland Two Lights are placed, one above the other, in the same house, and distant twenty-eight feet. Both lights can be seen from every point of the coast where they may be useful; both are fixed and white. Building painted *red* and *white*, in stripes, five feet broad each, horizontally.

**Partridge Island Light**—At the entrance of the river and harbor of St. John, N. B. A *red* and *white* light. The building painted *red* and *white* in vertical stripes.

**Beacon Light**—Within Partridge Island, and upon a spit or bar which extends about half a mile S. S. E. off Sand Point, and which dries at two-thirds ebb, stands the Beacon Tower. A fixed white light. Building painted *white* and *black*, in stripes, vertically.

**Quaco Light**—A Revolving White Light, placed on a small rock off Quaco Head, showing twice full and twice dark in a minute. The light can be seen from any quarter where a vessel can approach. Building painted *white* and *red* in horizontal stripes.

**Cape Enrage Light**—On the Point of that name in Westmoreland, nearly opposite Apple River Harbor, N. S. Building painted *white*, about 120 feet above the tide. A plain white light.

**West Quacody Light**—This is an American light, placed on the west side of the entrance into the St. Croix, by Lubec and Eastport.

**TARIFF OF DUTIES IN THE PROVINCE OF NOVA-SCOTIA.**

IN FORCE UNTIL APRIL 1, 1857.

	Duty.—Sterling.
Apples, fresh or Dried, per bbl.,	£0 4 0

Office open every day (Sundays excepted) from 4 o'clock in the morning until 8 at night.

The Mails for the United Kingdom are closed finally at Halifax every alternate *Thursday Evening* at 8 o'clock. Letters, &c., for England, which may be dropped into the box *after the hour of closing* and up to the arrival of the Packet, will be forwarded in a Bag, loose—but such letters CANNOT be PREPAID, either in money or stamps. The Royal Mail Steamers leave Boston for Halifax and Liverpool, G. B., every alternate *Wednesday*; arrive at Halifax on *Thursday evening* or very early the succeeding morning, leaving Halifax immediately after receiving the Mails.

Letters to or from England, 7½d., *prepayment, optional*;—can be prepaid by using a 6d. or two 3d. Stamps, together with *half of a threepenny Stamp* cut diagonally. Newspapers free.

Closed Mails for the United Kingdom *via United States* are made up at Halifax to meet the Steamers leaving New York for Liverpool. Letters to be specially addressed "*via New York*." Letters 10d.; Newspapers 1d. each.

The Mails for the United States *via Boston*, per Royal Mail Steamers are made up on *Tuesday Evening* of the week in which the Packet from England is due, at 8 o'clock. Should the Steamer not arrive by 6 o'clock the following morning, *supplementary Mails* will be made up. Should the Steamer from Liverpool arrive previous to Tuesday night—the Mails as heretofore will close *immediately on her arrival*.

A closed Mail for Canada is made up and forwarded at the same time in charge of the British Officer. Letters so forwarded must be specially addressed "Closed Mail for Canada; postage 7½d.;" viz.: 5d. Packet Rate, and 2½d. Colonial Rate—*prepayment optional*.

The Mails for Bermuda and the West Indies, are made up *finally* at Halifax on the *Thursday Evening* of the week in which the Royal Mail Steamer is expected to arrive from Boston, at 8 o'clock.

Letters 5d.—when posted in the interior, 3d. additional, this must be prepaid. Newspapers 1½d. each, which must be paid by Stamp.

Letters are forwarded *via Bermuda* for Chagres and the Pacific, Chili and Peru, Havanna, Honduras, Laguyra, Mexico, Venezuela, and the British and Foreign West India Islands.

Postage to Foreign West Indies, *five pence* when posted at Halifax: 3d. additional when posted in the interior—*must be prepaid*. Newspapers 1½d each to be *prepaid by Stamp at the time of Posting*.

The Mails for Newfoundland, (and Cape Breton during the Summer months,) are made up at Halifax, *once a month*, during the months of December, January, February and March; and *once a*

fortnight during the months of April, May, June, July, August, September, October and November, closing finally on the Thursday Evening of the week in which the Royal Mail Steamer is expected to arrive from Boston.—Postage 5d.; when posted in the interior 3d. additional. Newspapers 1½d each, which must be paid by Stamp at the time of Posting.

The Mails for St. Pierre and Miquelon are forwarded to Sydney, C. B., from whence they are despatched by the French Packet during the summer months, and from Halifax direct in the winter months. Letters 5d. packet rate, and 3d. inland, *prepayment, optional.*

Letters posted in any Town within the Province for delivery in the same Town, are liable to a rate of *one penny* for every ¼ oz.

For Dartmouth, *daily*—postage 1d.

For Musquodoboit Harbor, every Tuesday morning, at 9 o'clock.

Return Mail due on Monday afternoon at 5 o'clock.

For Prospect, on Saturday afternoon, at 2 o'clock. Return Mail due on Saturday morning, at 11 o'clock.

For Ketch Harbor and Sambro, on Friday evening at 10 o'clock. Return Mail due on Saturday.

All letters are charged by weight, and a uniform rate of postage of 3d. on a letter not exceeding half an ounce in weight has been established throughout British North America. To any part of the United States 6d.; to Oregon and California, 9d., *prepayment optional.*

Newspapers *pass free* to any part of the Province, British North America and the United States when sent by *land Mail*—to be put up in covers open at the ends.

Printed Circulars, Prices Current, Handbills, and other printed matter of a like description, put up in covers open at the ends, and without any written communication, may be sent from any part of the Province to any place within the same, as well as through Nova-Scotia, at the rate of *one penny* per oz.—*prepayment optional*, except when addressed to the United States, in which case the postage must be *prepaid*.

Pamphlets, Magazines, Periodicals, or Books, bound or unbound, done up in covers open at the ends, unaccompanied by any written communication, may be transmitted as above mentioned through the Mail in this Province: not exceeding 2 oz., in weight—free; 2 oz. and not 3, 1d; 3oz and not 4, 1½d; 4 oz. and not 5, 2d; adding ½d. for every additional oz. up to 48 oz., beyond which weight they cannot be sent by Mail.

British reprints of copyright works from the United States, by *land mail* or *steamer*, charged letter postage.

The Postage on Books from Great Britain to Nova-Scotia, or *vice versa*, is at the rate of 7½d. currency, if not exceeding ½ lb.; exceeding ½ lb. and not exceeding 1 lb., 1s 3d.; and so on adding 1s. 3d. for every additional pound or fraction of a pound. One book package may contain separate Books, Publications, Almanacks, and Maps and Paper, Parchment or Vellum; the latter three materials may be written or printed on—the package may contain the name and address of the sender. Rollers may accompany prints and maps, and markers may be sent with books. No letter must be sent with or written on a book package, and no such package must exceed *two feet* in length, width or depth. The postage must in all cases be *prepaid* by Stamps.

✉ Letters intended to be *Registered*, must be posted half an hour previous to the closing of the particular mail by which they are to be forwarded, and the *postage*, as well as the registration fee, must be *prepaid*.

Letters *prepaid by Stamps*, and dropped into the Letter Box any time during the night, and up to 5 o'clock, A. M., will be forwarded by the mails despatched same morning.

When the Mails from England arrive before 9, P. M., they are delivered the same evening, and after that hour, at 7 next morning.

All other mails arriving before 7 P. M., will be delivered the same evening,—if after that hour and before 8, at 6 o'clock,—and if after 8, at 7 o'clock the following morning.

The Postmaster-General is not liable for the loss of any letter or packet, unless such loss should arise from his own default.

Land Mails made up at Halifax at 8 o'clock, P. M.

**EXPLANATION OF SIGNALS,**

*Made on the Ship Staff at Citadel Hill, when vessels are seen from the Citadel, or reported from an Out Post.*

One ball close up, 1 sq. rigged.	A Pendant under a ball 6 sq rigged.
One ball half hoisted, 2 do.	do. over a ball, 7 do.
Two balls close, 3 do.	do. under 2 balls close, 8 do.
Two balls separated, 4 do.	do. between 2 balls, 9 do.
A Pendant of any col. 5 do.	A flag of any color, 10 or more do.

The above Balls, &c., are hoisted at the east or west yard-arm, according to the *quarter* the vessel first appears in.

When vessels are reported from an Out Post, the following signals are shown under the Yard-Arm as repeats :

For a square rigged vessel, two balls of a size, one at the outer, the other at the inner halliard, close up.

A Ship or Barque, a large ball at the end of the yard, with a small one at the inner halliard.

A Brig, a small ball at the end of the yard, and a large one at the inner halliard.

A Brigantine, a cross close up at the outer halliard.

Two or more do., a cross half hoisted.

A Schooner, a cross close up at the inner halliard.

An upper yard having been added to the Ship Staff, it will be used exclusively to designate Steam Vessels, thus:

One ball E. or W. indicates a Steam Vessel repeated in that quarter.

A small ball out and a large one in, a Branch Packet or Merchant Vessel.

A large ball out and a small one in, a Man-of-war Steamer, or Royal Mail Steamer.

Numbers will be indicated as directed from the lower yard.

The lower yard is now used for sailing vessels only.

When the description of vessel in sight is ascertained from the Citadel, the following descriptive colors will be hoisted at the mast head:

A Union Jack, a Flag Ship.

Do. with a red Pendant over it, a two decker.

Do. with a blue Pendant over it, a Frigate.

Do. with a blue and white Pendant over it, a Ship or Barque rigged Sloop-of-War.

Do. with a white Pendant over it, a Brig rigged Sloop-of-War.

Do. with a red and white Pendant over it, a Schooner or Cutter-of-War.

A white Pendant, with two blue crosses, a Transport, or a vessel with troops on board—if a Man-of-war, the Union under.

A white Pendant, with a blue ball, a Steamer—if a Man-of-War, the Union under.

A red Flag pierced white, Royal Mail Steam Packet from England.

A blue and red Flag crossed white, ditto. from Boston.

A white and blue Pendant, do., from St. Johns, Newfoundland.

A white and red Pendant, do., from Bermuda.

A blue Pendant, a ship.

A blue and white Pendant, a Barque.

A red Pendant, a Brig.

A red and white Pendant, a Brigantine.

A white Pendant, a Sloop or Schooner.

A blue and white Flag horizontally divided, a Foreign or Neutral Fleet.

A white and blue Pendant vertically divided, a Foreign or Neutral Man-of-war.

A blue Flag, a Foreign or Neutral Merchantman.

When an English Packet arrives between Evening and Morning gun fire, a red triangular flag will be kept flying at the mast head from 7 till 8 o'clock.

**EXPLANATION OF SIGNALS—Made on the Ensign Staff, to denote the Port from whence Vessels are arriving from.**

A red Flag, from Great Britain.

A red and white Flag vertically divided, red next the mast, the Mediterranean.

### MEDICAL ADVISERS.

Daniel McNeil Parker, M. D.; Lewis Johnston, M. D., *Esqrs.*  
SECRETARY, Matthew H. Richey, *Esq.*

Agencies in every British Colony. Its Colonial Branches are not mere adjuncts to the business of a Home Office, but form part of its entire and original scheme, commanding the constant attention of those connected with its management.

First division of Profits made in 1854. Bonus, 2 per cent. per annum. Future Divisions every five years.

The Accumulated Fund amounted, as at 25th May, 1855, to £192,323 3s. The Annual Revenue had, at the same date, reached £67,451 12s. 10d.

Every information regarding the Company and the principles and practice of Life Assurance may be obtained by application at Head Office, Halifax, or to any of the following gentlemen, viz. :—

The Hon. A. G. Archibald, *Truro*; James Crichton, *Esq., Pictou*;  
Amos B. Chandler, *Esq., Pugwash*; R. B. Dickey, *Esq., Amherst*;  
Joseph Allison, *Esq., Windsor*; T. W. Harris, *Esq., Kentville*;

THE ASTONISHMENT AND DELIGHT OF THE WORLD!

**REDDING'S RUSSIA SALVE.**  
**PRICE, 25 CENTS PER BOX.**

*Thirty years' experience in America, together with the highest antiquity of which Russian history boasts, has fully established this excellent Family Remedy, for the cure of*

Cuts, Burns, Scalds, Flesh Wounds, Chilblains, Boils, Felons, Erysipelas, Cancers, Piles, Salt Rheum, Sprains, Bruises, Injuries by Splinters, Ringworm, Warts, Eruptions, Frost Bitten parts of the body, Old Sores, Chapped Lips, Chapped Hands, Excoriations of the Body, Roughness of the Skin;

and it takes out inflammation at once; it heals and soothes whilst it restores the complexion and the tone of the skin, ranking foremost among the indispensable articles which

every family should have in the house.

The Nurse, the Belle, and the Beau, alike

regard it as necessary at the Toilet. Nor

does the sturdy common sense of the Farmer, the Mechanic, the Soldier and the Sailor,

neglect it. It is true these are slow to

adopt a foreign remedy, but when once they

have done so and proved its efficacy, they are reluctant to abandon it, and this is *common sense*. Certificates

from every class in the American community can be brought forward, but the Proprietors are content with the following, which originally appeared in the Christian Watchman and Reflector, unsolicited. Read what the paper says:

"We were recently amused on hearing a child hardly old enough to talk, and who had just received the merest scratch on his finger, inquiring for the Russia Salve of persons who had never seen the article. We had ourselves supposed it was one of the numerous humbugs and catch-pennies of the day, but have been mistaken. We learn that Rev. W. Collier, a most estimable Baptist clergyman, with whom we are well acquainted, and who has now been dead for some ten years, was presented with a recipe for its manufacture, by a native of Russia. Mr. C., in his walks among the poor, while a city missionary in Boston, often applied it and found that remarkable cures were effected. At length, so extensive was the demand, he was compelled to charge a small price for the article in order to meet the expense which was incurred. We have just seen a box of the ointment that was put up by him some twenty years ago, which is still just as fresh as ever. We have not written the foregoing for any selfish purpose, but to express our confidence in the excellence of Redding's Russia Salve, for wounds and burns."

The above Salve is put up in large sized metal boxes, with an engraved wrapper, without which, none are genuine. REDDING & Co., Proprietors, No. 8 State Street, Boston. Sold wholesale in Nova-Scotia, by G. E. MORTON & Co., Halifax, and by dealers in medicines every where.

**STAR**  
**LIFE ASSURANCE SOCIETY,**  
**OF LONDON.**

Founded, 1843.

**CAPITAL, £100,000 STERLING.**

**NOTICE.**

The privilege offered to Assurers in the Star Life Office, are highly advantageous. Ninety per cent., or nine-tenths of the profits (ascertained every fifth year) are allotted to the holders of Policies; which may be applied in the reduction of the future annual premium, or be added to the sum insured, as a bonus.

Thirty days are allowed for the payment of the premium from the date of its becoming due.

All claims are paid within fifty days of their being allowed by the Board, and disputed claims referred to arbitration.

The dividend declared in 1848 was 62 per cent. on the premium paid, the largest bonus ever given by any Company having agencies in this country.

This Society is chiefly, but not exclusively, devoted to the Assurance of the lives of members of the Wesleyan Methodist Societies, and of the hearers and friends of that connexion. Assurances however, have been, and may be effected upon all assurable lives. Nothing need be said upon the propriety of persons assuring their lives for the benefit of their families and friends, when so many proofs are furnished by the experience of every day life. The advantages of a Respectable Company, with a large Capital and dividing handsome profits, are too obvious to need any comment.

All necessary Blanks and Pamphlets and every information furnished gratis, by the Society's Agent or Medical Examiner.

SECOND EDITION. Corrected to 1855.

FOR SALE AT ALL THE CITY BOOKSTORES.

With the lines of proposed RAILWAYS through the Province laid down, and also the Routes and Stations of TELEGRAPH LINE.

This is the largest and only correct Map published of the Province. It has been revised and corrected, and the new Counties and Townships formed since its first publication accurately laid down, together with the lines of proposed RAILWAYS through the Province, and the routes and stations of the TELEGRAPH LINE. And may be had, mounted on cloth and rollers, colored and varnished, for the Office, the Library or Hall, 22s. 6d.; and on cloth, colored, in neat case, for the Pocket for Travelling, 18s. 9d.; and on blue paper, same as a chart, 8s. 9d.

C. H. BELCHER, *Publisher.*

### OPINIONS OF THE PRESS.

"We notice with much pleasure the appearance of a second Edition of BELCHER'S MAP OF NOVA-SCOTIA. This Map, originally compiled in 1834 from actual surveys, by William McKay, has now been revised, and corrections down to the present year have been carefully introduced. We observe that the projected lines of Railway are marked out, and the routes and stations of the Telegraph Line are also indicated. A late Edition of a correct Map is one of the most desirable possessions. We bespeak, therefore, a speedy and extensive sale for Belcher's Map of Nova-Scotia."—[Provincial Wesleyan.

"BELCHER'S MAP OF NOVA-SCOTIA.—Good Office-Maps of our own Province have, for some years past, been in great demand; but we have not this want to complain of any longer, now that a second Edition of Belcher's excellent Map is in the market. This is a great improvement upon the old one. Errors which must have been all but unavoidable at the time the Map of 1834 was published, and which became more apparent as the interior of the country came to be better known, have in this Map been, for the most part, carefully corrected. Not the least valuable of the many additions made, is the laying down of the several lines of Railway lately surveyed, and the courses of the Telegraph lines and the marking out of localities where the Telegraph office is situated. The corrections and improvements reflect much credit on the draughtsman, and must have cost him no small amount of labor. The execution of the work is, in the highest degree, admirable."—[Acadian Recorder.

"BELCHER'S MAP OF NOVA-SCOTIA.—A second edition of which has just been published, is a work that should be in every house in the Province. Besides being correct, it is on a much larger scale than any other Map of the same kind, being 5 feet 2 inches by 2 feet; and as set forth in the advertisement which appears in another column, it has been revised and corrected, and the new Counties and Townships formed since its first publication, accurately laid down, together with the proposed Railways through the Province, and the routes and stations of the Telegraph line."—[British Colonist.

"BELCHER'S MAP OF NOVA-SCOTIA.—A copy of the second edition of this very superior Map, corrected to October, 1855, has been received. At the present important epoch in our Province, when even the most skeptical cannot fail to be convinced that this country is turning the corner beyond which lies the fair way of Provincial prosperity, such a reference as the one before us is invaluable. In addition to the boundaries, &c. of the several Counties of Nova-Scotia proper, and the routes of the Railway already projected, it includes the Island of Cape Breton and the proposed improvements in that interesting locality, all of which have been compiled from the most careful surveys and the latest arrangements. No person interested in the country who can afford the cost, should be without a copy. William McKay, of this City, is the Draughtsman; William Neale & Co., London, are the engravers; and this Map, the result of their united labors, may be purchased at all the Bookstores in Halifax."—[Morning Chronicle.

# BELCHER'S FARMER'S ALMANACK,

FOR THE YEAR OF OUR LORD

1857,

FOR SALE AT ALL THE CITY BOOKSTORES.

O. H. BELCHER.

## OPINIONS OF THE PRESS.

"BELCHER'S ALMANACK.—This indispensable Annual has just been issued from the press. It is neatly got up, and its pages are filled with the usual amount of useful knowledge. Interleaved copies, nicely bound in embossed cloth, are just the thing for Counting-rooms and Parlors."—*Morning Chronicle*.

"BELCHER'S FARMER'S ALMANACK.—This old favorite comes out in a style well calculated to sustain its long standing reputation."—*Acadian Recorder*.

"BELCHER'S FARMER'S ALMANACK has been received. It more than sustains the high character of its predecessors for its graphical notices and correctness of information. The bound and interleaved copies contain a beautiful engraving."—*Presbyterian Witness*.

"Our thanks are due to the publisher of Belcher's Farmer's Almanack for a copy of his Annual, bound and interleaved. This Almanack has been so long before the public as the best publication of the kind, that commendation appears superfluous. As a business directory, a calendar and book of reference for all matters relating to Provincial Affairs, it is unsurpassed, and this year we notice many useful improvements. No family or counting-house should be without one. It may be procured at all the bookstores throughout the city and country."—*British Colonist*.

"BELCHER'S FARMER'S ALMANACK.—A copy of this carefully compiled Annual has been laid upon our table. It is enough to say of it that it sustains its character for excellence. It is, in our opinion, decidedly the best Almanack that issues from the Nova-Scotia press, and we cheerfully recommend it as such to our readers. The bound and interleaved copies contain a beautiful engraving."—*Provincial Witness*.

• • The bound and interleaved copies will contain a highly finished Engraving of "A RAILROAD SCENE."

W. Grant, Jr., Bookseller and Stationer, 59 George Street, Halifax, will promptly attend to all orders for the above Almanack.
