Agenda

- **Background**
- **Key takeaways**
- **Impacts: editors**
- **Impacts: edits**
- **Impacts: administrations**
- **Historical trends**
- **Community feedback**
- **Recap**

Background

- Portuguese Wikipedia community decided to turn off IP editing based on the voting result, and implemented on October 4th 2020.
- Product analytics team built a [dashboard](#) to track the related metrics on Portuguese Wikipedia,
- Goal is to monitor the impact, provide quantitative information for decision making.

Wikipedia: Voting / Need to register to edit Lusophone Wikipedia

From Wikipedia, the free encyclopedia
< Wikipedia: Polls

Voting **closed** .

Summary : Need to register to edit the Portuguese

- speaking Wikipedia **Voting period** : 12:00 noon on September 4, 2020 (UTC) - 12:00 noon on October 4, 2020

Conclusion :

Question	In favor	% In favor	Against	% Against	AI
1.1. To edit the Lusophone Wikipedia pages, the user must be registered	169	71%	69	29%	
1.2. Once the proposal for question 1.1 is approved, it will not apply on the pages of the discussion domains	88	60.3%	58	39.7%	
1.3. Once the proposal in question 1.1 is approved, it will not apply on the pages of the Help domain	110	86.6%	17	13.4%	
1.4. To create articles on Wikipedia Lusophone in the main domain, the user must be registered	130	82.8%	27	17.2%	
2.1. Range blocks	77	87.5%	11	12.5%	
2.2. Script	84	96.6%	3	3.4%	
2.3. Edit filter	76	96.2%	3	3.8%	
2.4. Protections	83	93.3%	6	6.7%	
Question	Immediately	% Immediately	Gradually	% Gradua	
3. Pace of implantation	84	63.3%	48	36.4%	

Key takeaways

- Turning off IP editing does not appear to have had a significant negative impact on Portuguese WP, and we found positive impact in some areas.
- The number of registrations went up, and retention remained solid.
- The number of reverts, blocks and protected pages declined considerably.
- The total number of edits declined when bot edits and reverts are included. Without bot edits and reverted edits, the number of edits was down in Q2 and Q3 compared to last year, and was up in Q4.
- Qualitative feedback from the volunteers showed that most remain in favor of the ban.

Recommendations

- Allow Portuguese Wikipedia to continue with their current practice for now, if the volunteers want to continue.
- Validate these findings by running a similar experiment on 2 more language WPs where the volunteers are interested in trying this out. The experience of a single wiki should not be used as decisive evidence.
- Publish these findings, to help inform continued discussions across the movement about the role of IP editing.

Note: Growth features

- Portuguese WP turned on the Newcomer homepage/Suggested edits features 4 days before the wiki blocked IP editing.
- These features are presented to new editors when they register an account, and offer encouragement and mentorship to help them to make their first edits.
- On some of the following slides, we've taken the estimated impact of the Growth features into account.

Impacts: Editors

Some views in support of the ban

“

After years of voting against it, at the end of last year, I finally surrendered to the obvious, the work that vandalism does not compensate for any little improvement, without them our lives are much better, many articles that were blocked could be released, today we can leave a message to a newbie that the chance of being read is greater than for an IP

... Editors have more time to work on articles, including sources. ... The bulk of the vandalism is gone. It was the most positive change in my many years here.

– Editor 1

“

It certainly wasn't a decision we were happy to make, but my watchlist has never been so peaceful, and lately, I haven't even been able to look at it all the time like a few months ago.

IPs now have a bit of fun on the contact pages, but it's a side effect that I see no escape from.

– Editor 2

Some views in support of the ban

“My impression about the IP block, or I rather call it "obligation for account registration". It has been very positive for the community. The sheer drop in blocks and vandalism is very impressive, dropped by around 80%.

Blocking and reverting vandalism by registered accounts is much easier, we have a lot more context for their edits. We have even started unprotecting several long-term protected articles with little vandalism. Resulting in more articles that newcomers can edit.

Another very positive impact is the interaction, registered users see the messages and respond at a much higher rate than unregistered users. This means less friction and more understanding from newcomers and patrollers.

– Editor 3

“The editing became much more pleasant, much of the pressure caused by vandalism disappeared.

The level of hostility and conflict within the community has also dropped, and now I have more time to help newbies and do what I really like about the project (editing, focused maintenance, etc.).

– Editor 4

Some views against the ban

I do not agree with the ban on IPs. In my experience as a publisher, I notice that much of the vandalism on the wiki happens in plain sight, often by high users in the hierarchy, especially admin.

User bullying, gender bias, cultural and political intolerance should be considered vandalism on the wiki because it has repercussions on the pages as constant reversals, suggested elimination, etc.

In addition, on the other hand, the use of IP can serve as a tool for someone who wants to contribute, but, because of these persecutions, prefer to preserve their privacy. Finally, I do not see in a positive way a change that distances the wiki pt from the model of other wiki around the world.

– Editor 5

I think it's a mistake. A setback.

We know that Wikipedia has grown precisely because it is completely open.

There are plenty of users with the power and time to control vandalism on Wikipedia in Portuguese. In addition to other tools. Thus closing the editing by IP is more to lose than to win.

– Editor 6

Neutral about the ban

“The restriction of IPs in the main domain was important, as the number of vandalism on these pages was reduced and in the control of recent changes and in the list of my watchmen.

On the other hand, we must not forget that the possibility of anonymous content developing in the entries has also fallen, [but] has not prevented the number of accounts created from increasing, and many users have understood that it is more worth editing as registered.

– Editor 7

Recap

Pros

Active registered editors increased by 76% (+4.1k) in Q2, +98% (+5.1k) in Q3, 66% (+3.9k) in Q4

New account creations increased by 20% (+2.5k) in Q2, 26% (+3.4k) in Q3, 0% in Q4

Reverts decreased by 46.8% (-11.4k) in Q2, 43.9% (-10.3k) in Q3, 47% (-12k) in Q4.

Blocks: -86% (-8k) in Q2, -79% (-3.4k) in Q3, -76% (-3.2k) in Q4

Protected pages: -78% (-640) in Q2, -68% (-320) in Q3, -40% (-152) in Q4

Retention rate: +1.1% in Q2, +1.7% in Q3 (+0.3% from Growth)

Community sentiment from ptwiki has been welcoming. They say this has led to better governance for the wiki, guidance for newcomers and reduction in hostility and conflict on the wiki. Editors also say they now have more time to dedicate to improving article quality instead of vandalism fighting.

Inconclusive

Non-reverted content edits* decreased by 2.5% (-3.3k) in Q2 and 7.2% (-9.5k) in Q3, increased by +0.9% (+1.1k) in Q4 (+0.5% from Growth features)

Non-reverted edits* decreased by 0.91% (-1.6k) in Q2 and increased by 2% (+3.7k) in Q3, +6% (11k) in Q4 (+0.3% from Growth features)

Forecast modeling shows post-intervention was not significantly lower than prediction without intervention.

Therefore, we do not have statistical evidence of negative impact from turning off IP editing.

* Excluding bot edits
