FOR THE CHIEF:

GEO. B. NIBLOCK, Jr.
Lt Col, Infantry
Deputy Chief

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

14. Residual from the reparations items that were released from reparations control to the Japanese Government to be held in an "as is" status will be available to Japanese industry on a lease basis only without reference to this headquarters. These items will not be sold and any violation of this which comes to the attention of CARs will be reported.

15. CAS was requested at a conference with CPC to submit as soon as possible reports on the procurement status of privately owned reparation items. (All regions concerned indicated that their reports could be expected by the middle of January.)

16. Approval of requests for Occupational Force use of reparations items is being given only when submitted through normal tactical channels to this headquarters. Requests from subordinate units to CARs and transmitted by this section without reference to major commands are not being approved.

17. A visiting expert, Mr. R. B. Richardson, has arrived from the States to hold conferences with the Japanese on training within industry. Mr. Richardson will work through the ESS Labor Division in addressing labor and management organizations.

18. It is noted that the trend toward company unions and company dominated federations of unions is continuing. This strength is at the expense of a sound national union structure.

19. A national drive for higher wages is expected to develop during the next few months.

20. During the week the gold oak leaves of George C. Freeman were changed to silver.

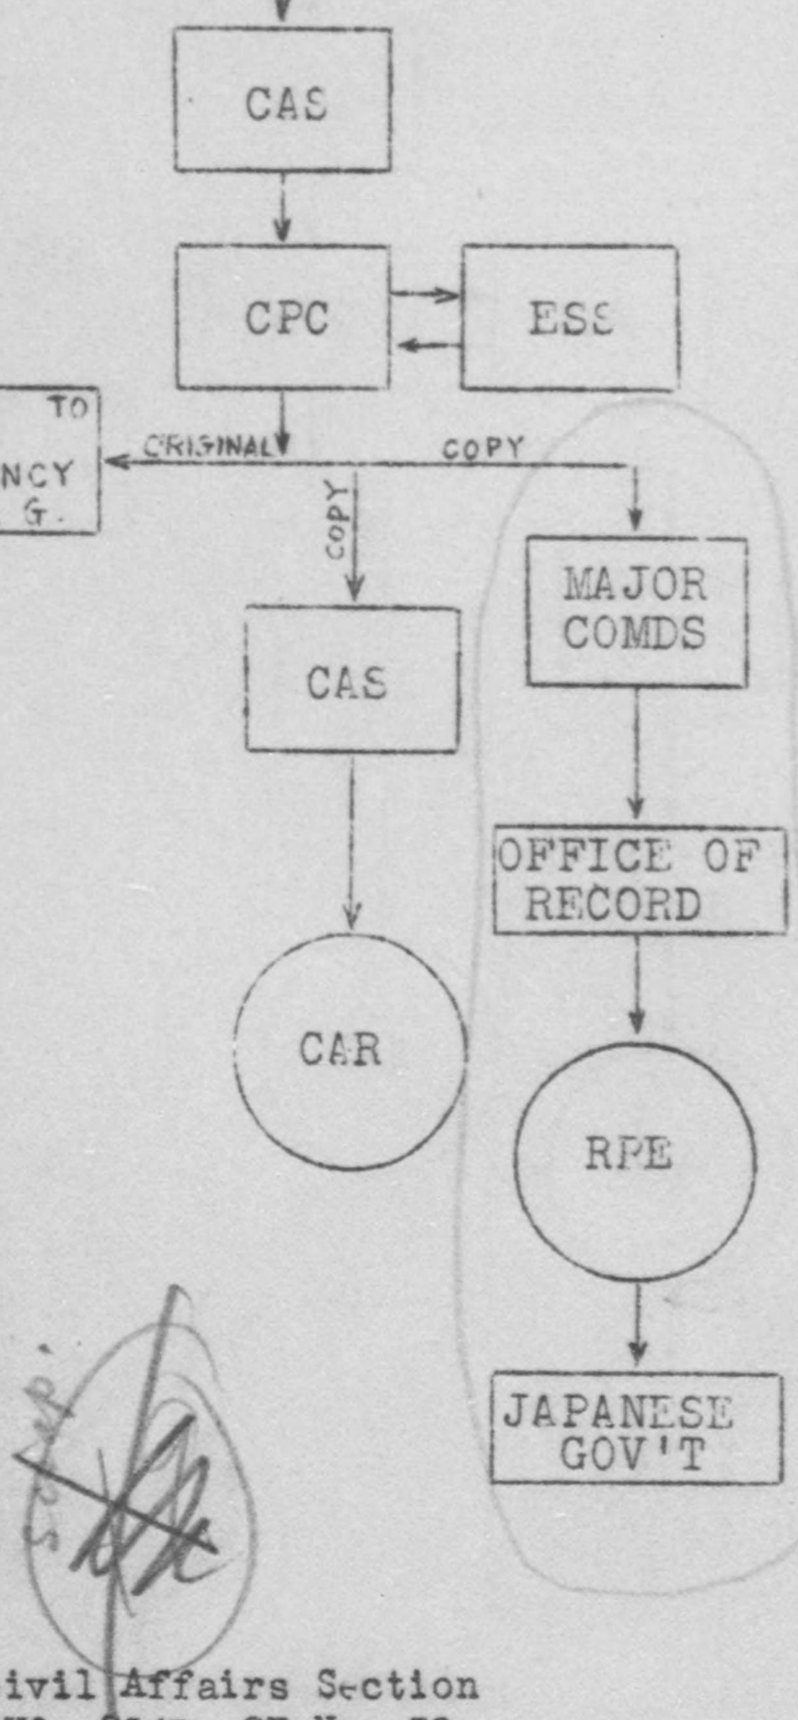
FLOW DIAGRAM OF REPARATIONS SCRAP PETITIONS



To be implemented by SCAPIN or all staff-armed

Civil Affairs Section
GHQ, SCAP, 27 Nov 50

Applications for the release of Rep. items for melt-down scrap will be submitted thru the

Japanese Government Local Liaison Office to

Civil Affairs Region who will inspect the items and make recommendations to

Civil Affairs Section who will forward the application by checknote, with their recommendations, to

CPC, who will check for availability. CPC will prepare a memo to the Japanese Government releasing items from reparations control and custody contingent on being rendered permanently unserviceable. After concurrence of ESS, the original memo will be sent to the Reparations Agency, JG, for distribution thru Japanese Channels. When arsenal items are involved, CPC will send a copy of this memo with a letter to the major commands indicating that the subject items have been released from reparation control to the status of Former Military Supplies. These items can be further released from the category of Former Military Supplies in accordance with the provisions of Operational Instructions No. 5, GHQ, SCAP, dated 10 April 1950.

The tactical forces are responsible for releasing subject items to the JG and accounting to this headquarters thru the Japan Logistical Command of such tonnage so released.

CAR will conduct surveillance over the JG to ensure the carrying out of their responsibilities in rendering the items unserviceable.

The Japanese ~~Court~~ Govt is responsible for the disabling of reparation items.

1. References:

a. Operational Directive 11, this section, subject: "Industry," dated 10 April 1950.

b. Letter, General Headquarters, Supreme Commander for the Allied Powers, file AG 387.6, dated 26 October 1950, subject: "Authorized Use of Reparations Equipment by Occupation Forces," attached as inclosure 1.

2. Procedure in returning equipment to dead storage is as follows:

a. Reparations equipment removed from a Japanese Ex-Army or Ex-Navy arsenal for authorized use by the Occupation Forces will be returned to the arsenal which has the required storage space and which is physically located nearest to the Occupation Force unit which is returning the equipment.

b. Reparations items removed from a privately owned facility for authorized use by the Occupation Forces will be returned to the plant from which it was taken or to a branch plant of the same company.

c. Surveillance will be exercised by Civil Affairs Regions to assure that adequate cleaning and preservative measures are accomplished by the using agencies prior to return from authorized use to dead storage. PER MR.LINK TO P.S.K. 21 November..."due to great number of Occ.Force Units in Kanto....inspections may be preformed after machinery has been ret'd to plant as instructed by HaCAR....if discrepencies noted...we must see Occ.Force Unit which has Authorized use, corrects discrepency.

MEMORANDUM FOR: REPARATIONS AGENCY, JAPANESE GOVERNMENT 7 Nov 1950

SUBJECT: Transfer of Reparations Equipment

1. Applications for authorization to transfer dead storage reparations equipment from one location to another will be submitted by the local agency of the Japanese Government Ministry concerned to the appropriate regional Civil Affairs Team for approval, with the guidance of the following:

a. Funds from the reparations budget may be expended for consolidation of reparations equipment when such consolidation will result in substantial reduction of custodial costs. Funds expended for transfer of a plant's equipment will not exceed plant's present cost of custody for six months. Applications which involve expenditure of reparations funds will include a request for approval for such expenditures. Applications requiring funds beyond the limitations of the reparations budget will not be submitted.

b. Applications to transfer reparations equipment for authorized use purposes will be included in the application for authorized use and will not be submitted independently.

c. Transfer of reparations equipment in order to vacate buildings for Japanese industry will normally be accomplished at no expense to the Japanese Government unless substantial reduction in custodial costs will be effected.

d. Consolidation of equipment within plants will be effected primarily with a view toward reduction in the number of guards; however, when considered more economical, consolidation will be accomplished in preference to repair of damaged buildings housing idle machines. Plant-to-plant consolidation will be effected only between government-owned arsenals and laboratories, privately-owned plants owned by the same company, or between privately-owned plants under separate ownership, with the consent of the owners.

e. Applications to transfer reparations equipment from one regional Civil Affairs Team area to another will be submitted to the regional Civil Affairs Team in which the equipment is presently located.

2. Within 30 days following completion of approved transfer of

1. Reference is made to:

a. Letter General Headquarters, Supreme Commander for the Allied Powers, file AG 387.6(7 Jul 49) GD, 7 July 1949, subject, "Accountability of Reparations Equipment Loaned to Occupation Forces".

b. Letter, General Headquarters, Supreme Commander for the Allied Powers, file AG 387.6(7 Jul 49)CPC/AD, 15 Dec 1949, subject, "Accountability of Reparations Equipment Loaned to Occupation Forces."

2. Procedure and criteria for the use of reparations equipment by the Occupation Forces are as follows:

a. Occupation Forces having a justifiable requirement for equipment located in reparations plants may conduct such inspections of the equipment as are deemed necessary by competent authority. Arrangements for inspection of reparations items will be made with the local Regional Civil Affairs Team. No inspection of reparations plants will be conducted without clearance from the Regional Civil Affairs Team.

b. Requests for the use of reparations items by Occupation Forces will be submitted through normal military channels to General Headquarters, Supreme Commander for the Allied Powers. Requests will fully identify the item requested by complete inventory number and nomenclature.

c. Accountability records of reparations equipment approved for use will be maintained as directed in references 1a and 1b above.

MEMORANDUM FOR: REPARATIONS AGENCY, JAPANESE GOVERNMENT

SUBJECT: Transfer of Reparations Equipment

1. Applications for authorization to transfer dead storage reparations equipment from one location to another will be submitted by the local agency of the Japanese Government Ministry concerned to the appropriate regional Civil Affairs Team for approval, with the guidance of the following:

a. Funds from the reparations budget may be expended for consolidation of reparations equipment when such consolidation will result in substantial reduction of custodial costs. Funds expended for transfer of a plant's equipment will not exceed plant's present cost of custody for six months. Applications which involve expenditure of reparations funds will include a request for approval for such expenditure. Applications requiring funds beyond the limitations of the reparations budget will not be submitted.

b. Applications to transfer reparations equipment for authorized use purposes will be included in the application for authorized use and will not be submitted independently.

c. Transfer of reparations equipment in order to vacate buildings for Japanese industry will normally be accomplished at no expense to the Japanese Government unless substantial reduction in custodial costs will be effected.

d. Consolidation of equipment within plants will be effected primarily with a view toward reduction in the number of guards; however, when considered more economical, consolidation will be accomplished in preference to repair of damaged buildings housing idle machines. Plant-to-plant consolidation will be effected only between government-owned arsenals and laboratories, privately-owned plants owned by the same company, or between privately-owned plants under separate ownership, with the consent of the owners.

e. Applications to transfer reparations equipment from one regional Civil Affairs Team area to another will be submitted to the regional Civil Affairs Team in which the equipment is presently located.

2. Within 30 days following completion of approved transfer of

MEMORANDUM FOR: REPARATIONS AGENCY, JAPANESE GOVERNMENT

SUBJECT : Reduction of Custodial Personnel at Reparations Plants

1. Reference is made to:

a. Directive No.3 (SCAPIN 47), 22 September 1945, no subject Office of the SCAP

b. Memorandum for Japanese Government, file AG 004 20 Jan 46, ESS/GD,SCAPIN 629 20 January 1946, subject,"Custody Control and Protective Maintenance of Japanese Aircraft Plants, Ars enal and Laboratories"

c. Memorandum for Japanese Government, file AG387.6 (20 Sep 46) ESS/IN,SCAPIN 1219 20 September 1946, subject, "Responsibilities of Imperial Japanese Government for Preservation and Care of Plant's Equipment and Records Taken into Custody for Reparations Purpose by the SCAP."

2. It is directed that all custodians and assistant custodians on Japanese Givernment payroll at reparations plants be discharged, effective immediately.

3. It is also directed that privately owned plants under reparations custody be relieved of the current obligation which makes retention of custodians at reparations plants mandatory.

4. Custodial inventories and records heretofore maintanied by plant custodians will be maintained in the case of non operation plants by the regional or prefectural Jap.Gov't agency concerned which will have original records available at each plant in the custody of the chief guards and in the case of operating planys, b ythe managenent concerned. Theresponsibility for keeping all such documents

custody for reparations purpose by the SCAP.

2. It is directed that all custodians and assistant custodians on Japanese Givernment payroll at reparations plants be discharged, effective immediately.

3. It is also directed that privately owned plants under reparations custody be relieved of the current obligation which makes retention of custodians at reparations plants mandatory.

4. Custodial inventories and records heretofore maintanied by plant custodians will be maintained in the case of non operation plants by the regional or prefectural Jap.Gov't agency concerned which will have original records available at each plant in the custody of the chief guards and in the case of operating planys by the managenent concerned. Theresponsibility for keeping all such documents secure, coordinated, current, accurate properly authenticated and readily available within wach plant for examination by inspectors representating the SCAP will continue to rest with the Jap Gov't.

5. Generally there is an excess in the number of guards at reparations plants. This is due among others, to the following reasons:

a. The criteria which have been established and applied in the past weree not generally adequate in determining the mini mum number of guards consi dent with actual security requirement at individual plants, and with the realities of public finance.

Tokuzo Hanaki

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 445013

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 77501

b. Reparations funds in payment for excess guards have been used in a number of cases both as an indirect government subsidy to assist private plants and as a social measure for employment relief

c. Reductions in plant areas under reparations custody effected through consolidation and or scrapping of equipment and subsequent release of land and buildings have not always been accompanied by appropriate reductions in guard personnel and in other custodial costs, as had been intended and made feasible by such reductions.

6. Changes in operating status of reparations plants occur from time to time, requiring, in most instances changes in number of guard personnel. Thus, a fully operating plant which currently is permitted no guards paid out of reparations funds, will require an appropriate complement of guards as soon as operation ceases; whereas a plant which is presently idle well, from the time it beging operation, be subject to a reduction or elimination of guard personnel who are paid out of reparations funds.

7. Effective immediately, appropriate changes in the number of guard personnel for rep rations plant s as required by changes in operating status of plants or as otherwise required or justified, will be accomplished with the guidance of the following principal and criteria:

a. Criteria heretofore used in determining the number of guard posts required for reparations plants will be revised to include consideration of all factors that affect security, or make maintenance of security difficult, at individual plants. Therefore, in addition to considering the total items of inventoried machinery and equipment at a plant, the total point values represented by them, and the total floorspace of the plant, consideration will also be given to the following:

(1) The nature and value of the plant reparations equipment.

(2) The number, disposition, type and condition of the buildings containing reparations equipment

(3) The size and character of plant area or areas under custody and the nature of protective inclosure, if any.

7. Effective immediately, appropriate changes in the number of guard personnel for rep rations plant s as required by changes in operating status of plants or as otherwise required or justified, will be accomplished with the guidance of the following principal and criteria:

(a) Criteria heretofore used in determining the number of guard posts required for reparations plants will be revised to include consideration pf all factors that affect security, or make maintenance of security difficult, at individual plants. Therefore, in addition to considering the total items of inventoried machinery and equipment at a plant, the total point values represented by them, and the total floorspace of the plant, consideration will also be given to the following:

(1) The nature and value of the plant reparations equipment.

(2) The number, disposition, type and condition of the buildings containing reparations equipment

(3) The size and character of plant area or areas under custody and the nature of protective inclosure, if any.

(4) The existence of firms, institutions, or installations adjacent to plant which constitute a potential fire hazared , such as saw mills, woodworking plants, etc

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 77503

(5) The existence of undersirable social conditions and forces and of non-law-abiding grops in areas adjacent to a reparations plant such as widespread unemployment, poverty and social unrest, pirates, thieves operating in gange, etc.

(6) Any other factor that has pertinent relation to the security of a plant.

b. In determining the number of guards to be employed at non-operating plants, the following will be used as a guide:

(1) In the case of nonoperating government owned arsenals, Table 1 attached as Inclosere 1 which is based on the 24-hours shift system, and which lists the maximum number of guards on alert duty night and day, atall times. This maximum may be lowered where the arsenal concerned is able to make mutual, cooperative arrangements with guards of a plant or plants located within, or immediately adjacent to its compound.

(2) In the case of nonoperating private plants, the maximum numberof guards to be employed out of reparations funds for alert duty night and day at all times, will be three guards per guards post required plus an adequate number of relief guards. Relief guards are normallylimited to one per six guards or fraction thereof employed for a 24hour period. Thus the transfer of funds by the Japanese Government to the owner of a nonoperative private reparations plant for the employemnt of guards for two guard posts should enable that owner to employ 7 guards and on the 8 hour shift system, time, night and dayat all times. This maxmum may lowered where the plant is very small and or has resident guards.

c. Operating reparations plants must share the custody costs with the Jap Gov't . The following principles will govern the payment od guards gor iperating plants from reparations funds

(1) Where 30% or more of the equipment of a reparations plant is in use, the plant will pay for all guards necessary for adequate security.

(2) Where less than 30% of the equipment is in use, but where the items in use are key items of the central facility or facilities of the plant., that plant will be regarded as using more than 30% of the equipment, and will pay for all guards necessary to the security of the reparations facility.

should enable that owner to employ 7 guards and on the 8 hour shift system, time, night and dayat all times. This maxmum may lowered where the plant is very small and or has resident guards.

c. Operating reparations plants must share the custody costs with the Jap Gov't . The following principles will govern the payment od guards gor iperating plants from reparations funds

(1) Where 30% or more of the equipment of a reparations plant is in use, the plant will pay for all guards necessary for adequate security.

(2) Where less than 30% of the equipment is in use, but where the items in use are key items of the central facility or facilities of the plant., that plant will be regarded as using more than 30% of the equipment and will pay for all guards necessary to the security of the reparations facility.

(3) Where less than 30% of the equipment is in use, the using agency will not pay for all guards but must share in the cost of custody in direct proportion to the amount of equipment used less than 30% (Example: A plant 15% in operation requiring 20 guards would pay for 10 guards) except where, on the basis of the criteria as listed in Par 7a the employment of additional guards paid from reparations funds is justified.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(4) Where a plant which is in 30%, or more than 30%, operation has a nonoperating main plant or a disposal area located in a completely separate geographical area, such a main plant or dispersal area will be treated as an independent plant, and provided with an appropriate complement of guards paid out of reparations funds. However where the nonoperarting main plant or dispersal area of all operating plant is located in the same custodial area, or adjacent thereto, no guards paid out of reparations funds will be furnished, exceptwhere, as in the case of some private plants, the nonoperating plant is und r separate ownership or where the nonoperatingplant has a considerable amount of reperations equipment occupying an extensive floor area, and or consists of a number of widely separate buildings, or otherwise should under criteria as listed in Par 7a, be supplied guards from reparations funds.

(5) Integrated facility plants such as custic soda plants, iron and steel plants, shipbuilding plants, precision bearing plants, machine tool plants, etc. which are in operation , and which have a key facility, or an important part of a key facility or facilities in operation, will pay for all guards.

(6) The fact that an operating plant is paying for all or part of the guards does not excuse such plants from maintaining adequate security

(7) A report of the actual number of gaurds to be paid from reparations funds for each plant under reparations custody will be submitted not later that 15 June 1950 by prefectural and regional Jap Gov't agencies of the Ministries of Finance, International Trade & Industries , Transportation, and Eduvation to the Regional Civil Affairs Team concerned for approval. Report will also list information for each plant as follows:

a. Plant Code Number
b. Plant name and address
c. Number of guards paid from reparations funds as of 30 days after the date of this memorandum
d. No. of guards paid by operating plant funds as of 30 days after the date of this memorandum.
e. No. of custodial personnel paid from reparations funds as of 1 April 1950.
f. No. of custodial personnel paid by operating plant funds as of 1 April 1950.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 77501/3

or part of the guards does not excuse such plants from maintaining adequate security

(7) A report of the actual number of gaurds to be paid from reparations funds for each plant under reparations custody will be submitted not later that 15 June 1950 by prefectural and regional Jap Gov't agencies of the Ministries of Finance, International Trade & Industries, Transportation, and Eduvation to the Regional Civil Affairs Team concerned for approval. Report will also list information for each plant as follows:

a. Plant Code Number
b. Plant name and address
c. Number of guards paid from reparations funds as of 30 days after the date of this memorandum
d. No. of guards paid by operating plant funds as of 30 days after the date of this memorandum.
e. No. of custodial personnel paid from reparations funds as of 1 April 1950.
f. No. of custodial personnel paid by operating plant funds as of 1 April 1950.

Mr Jones

instruction

HEADQUARTERS
KANTO CIVIL AFFAIRS REGION
APO 500

INSTRUCTIONS

Make on-the-spot inspections of Shipyards in your prefecture according to sheets attached.

1. Shipbuilding is a restricted industry.

2. All steel vessels require a SCAP permit. Wooden vessels under 100 g/t, do not require a SCAP permit, wooden vessels 100 g/t and over require a SCAP permit. (Show number of SCAPIN carrying permit - company must have the SCAPIN in order to begin work.)

3. Ordinary repairs to vessels of any size do not require a permit. List number of vessels and their tonnage which are under repair, as well as new construction.

4. Please return completed check sheets as inspections are made; attn: Mr. J. W. Jones, Economics Section.

Reparations Instruction file

DEFINITIONS OF REPARATIONS TERMS

RESIDUAL EQUIPMENT: Machinery and equipment remaining in the 18 advance transfer arsenals after the allocation of machine tools and metal working equipment in Segment 1.

INTEGRATED FACILITIES: A complete unit, self-contained and capable of being removed as such, and operated elsewhere in a similar capacity without the major items of equipment. Examples: Iron and Steel Rolling Mills, Cranes, Power Units (i.e. the Power Plant at Kure Naval Arsenal). In the advance transfer program, integrated facilities were inventoried and evaluated as single units.

AUTHORIZED USE: SCAP was authorized to make use of industrial facilities to accomplish the objectives of the Occupation. In the early stages of the Occupation, equipment was loaned to the Occupation on a temporary basis. In some instances, equipment was needed on a more permanent basis and the term "authorized Use" came into being. Items needed by Occupation units were requested and when the Authorized Use of such equipment was granted, it was suspended from the Allocation Availability List indefinitely. Authorized Use of reparations equipment was not limited solely to the use of the Occupation Forces, in that Japanese agencies were also entitled to request equipment for use in economic rehabilitation as well as the manufacture of goods essential to the needs of the Occupation.

LOOTED PROPERTY: Looted property includes both items which were taken by force and those purchased under duress and removed to Japan while the Japanese were occupying the country from which it was taken. Looted Property is subject to restitution to the country from which it was taken. Restitution of Looted items is under the jurisdiction of CPC.

RESTITUTION: This refers to items which have been looted from other countries and brought to Japan and which are to be restored in kind from the nation from which it was taken without charge to their Reparations account.

EXEMPTED PROPERTY: Exempted Property is composed of machinery and equipment which was brought in to the arsenals, aircraft and private munitions plants by the permission of the Eighth Army after the termination of hostilities; usually after the plant was taken under custody for Reparations.

SPECIAL PURPOSE: Special purpose equipment is defined as being all buildings, machinery and equipment in primary war facilities which, by virtue of initial design, construction, or major structural change, are, as individual items, special purpose in nature and functionally limited to use in connection with combat equipment products.

SEGMENT 1: The machine tools and items of secondary working equipment inventoried under OD 5/4, Eighth Army, and evaluated on an average basis by the use of IBM tabulating equipment and allocated from the "18 arsenals" under the advance transfer program.

(8)

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

COPY

SEGMENT 2: Is composed of testing and measuring instruments which were collected into central warehouses by the Technical Intelligence Detachment and allocated and shipped from the warehouse of that organization.

SEGMENT 3: Is composed of the Residual and Integrated Facilities remaining in the "18 Arsenals" from which allocations are being made under the advance transfer program.

COMPONENT PARTS: Parts of a machine or piece of equipment of a general nature which can be removed and utilized on other machines and equipment of a different make, design or type. Example: Electric motor.

RAW MATERIALS: Raw materials in the strict sense of the word are materials in a crude state such as iron ore although this term is often used to include materials which have been subjected to certain manufacturing processes; for instance, pig iron or bar stock. The term raw materials should never be used to include parts that have been individually processed to fit a particular operation. For instance, castings which have been ground.

SEMI-FINISHED PARTS: This term is used to include categories of material which have been partly processed for a particular machine, piece of equipment or other end product such as a rough casting that has been ground but not machined.

FINISHED PARTS: Finished parts normally referred to as parts. These have been completely machined and are ready to be assembled as a part of an end product or to be sold as replacement parts for machines already in use.

END-PRODUCT: End product is the finished product of a particular plant. The end product of one plant may be a semi-finished part of another. For instance, the end product of a foundry is castings which may be considered as raw materials in another plant. In many instances the plant may have more than one end product. Some of the end products may be used as parts or semi-finished parts in the operations within the same plant, while a certain amount may be sold to the public as an end product; for instance, an automobile manufacturer may also manufacture motors. A part of the motors are used in the assembly line operations of the plant but other motors are sold to other manufacturer or to the public for use as motors.

ADVANCE TRANSFER: The Advance Transfer Program was authorized by the FEC in order to furnish machinery and equipment to nations that had suffered excessively heavy war damage to their industries by reason of the Japanese aggression and occupation. The amount so delivered was not to exceed 30% in each of the categories of equipment. The four recipient nations are:

China	15%
Philippines	5%
United Kingdoms for Asiatic Colonies	5%
Netherlands for the Netherlands East Indies	5%

SCAP authorized the removal of equipment from the arsenals only with the exception of the Scientific and Technical equipment from the TID which was classified as Laboratory Equipment.

INVENTORY: The listing of items of machinery and equipment in a plant with an identification number on the equipment corresponding to the inventory number shown in the report. The nomenclature, specifications and other characteristics of the items are shown in the inventory.

EVALUATION: This refers to the processes by which the present value of the equipment is computed and is the basis for the division of the available equipment into shares for allocation to the Allied Nations.

CATALOG: Is the summarization of certain items of information furnished to the Allied Nations. In most instances, it contains detailed information as to nomenclature, specifications and a summary as well as the value of individual items of equipment.

OIL STORAGE FACILITIES: This refers to the Oil Storage Facilities owned by the former Japanese Army and Navy and includes all above-ground tanks of over 10,000 gallons capacity and the auxiliary equipment for such tanks; also the auxiliary equipment for underground storage owned by the former Japanese Army and Navy. Technically, these fall within the category of arsenals but were not included in those made avilable for Reparations under the Advance Transfer Program.

LABORATORIES: The term laboratories refers to the laboratories of the former Japanese Army and Navy and are technically classified as arsenals. A portion of this equipment was removed to the Technical Intelligence Detachment in Tokyo and forms the basis for Segment 2 of the Advance Transfer Program. The remaining equipment was inventoried and evaluated to be included with the 70% arsenals.

70% ARSENALS: The remainder of the arsenals not included in the Advance Transfer Program which were held for the nations which did not participate in the allocations under this program.

ALLOCATIONS: The actual allotment of machinery and equipment to an Allied Nation.

REPARATIONS AND RESTITUTION DELEGATIONS: This refers to the Reparations and Restitutions Delegations of the 11 Allied Nations which make up the Far Eastern Commission. These Delegates are regularly accredited to SCAP and are located in Tokyo and are a part of RTAC.

RTAC: Reparations Technical Advisory Committee composed of a delegate from each of the 11 Allied Nations and a representative from SCAP who served as a non-voting chairman.

PRIMARY WAR FACILITIES: Plants and establishments primarily engaged in the development, manufacture, assembly, testing, repair, maintenance, or storage of combat equipment and end-products and civil aircraft, and plants and establishments building merchant vessels of over 5,000 gross tons.

COPY

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

COPY

SECONDARY WAR FACILITIES: Plants and establishments primarily engaged in manufacturing, repairing or maintaining major fabricated component parts, sub-assemblies, accessories, or equipment especially designed for use in the products of primary war facilities.

WAR SUPPORTING INDUSTRIES: General industry which supported the Primary and Secondary War Facilities which has peacetime as well as wartime uses.

Examples:

a. Iron and Steel Industry, producing pig, ingot and basic shapes

b. Non-ferrous Metal Industry, producing pig, ingot and basic shapes

c. The Light Metals Industry, producing alumina, primary aluminum and magnesium, rolled, drawn or extruded shapes, etc.

COMBAT EQUIPMENT END PRODUCTS (PRIMARY WAR FACILITIES): Military End-products which may be identified as weapons, ammunition, missiles, explosives, chemical or bacterial warfare agents, ultra-short wave radio equipment (radar), naval combatant vessels, armored vehicles, or aircraft (including air frames and aircraft engines).

Items needed by Occupation units were requested and when the Authorized Use of such equipment was granted, it was suspended from the Allocation Availability List indefinitely. Authorized Use of reparations equipment was not limited solely to the use of the Occupation Forces, in that Japanese agencies were also entitled to request equipment for use in economic rehabilitation as well as the manufacture of goods essential to the needs of the Occupation.

LOOTED PROPERTY: Looted property includes both items which were taken by force and those purchased under duress and removed to Japan while the Japanese were occupying the country from which it was taken. Looted Property is subject to restitution to the country from which it was taken. Restitution of Looted items is under the jurisdiction of CPC.

RESTITUTION: This refers to items which have been looted from other countries and brought to Japan and which are to be restored in kind from the nation from which it was taken whithout charge to their Reparations account.

EXEMPTED PROPERTY: Exempted Property is composed of machinery and equipment which was brought in to the arsenals, aircraft and private munitions plants by the permission of the Eighth Army after the termination of hostilities; usually after the plant was taken under custody for Reparations.

SPECIAL PURPOSE: Special purpose equipment is defined as being all buildings, machinery and equipment in primary war facilities which, by virtue of initial design, construction, or major structural change, are, as individual items, special purpose in nature and functionally limited to use in connection with combat equipment products.

SEGMENT 1: The machine tools and items of secondary working equipment inventoried under OD S/4, Eighth Army, and evaluated on an average basis by the use of IBM tabulating equipment and allocated from the "18 arsenals" under the advance transfer program.

COPY

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

- - - -

SEGMENT A: Is composed of testing and measuring instruments which were collected into central warehouses by the Technical Intelligence Detachment and allocated and shipped from the warehouse of that organization.

SEGMENT B: Is composed of the Residual and Integrated Facilities remaining in the "18 Arsenals" from which allocations are being made under the advance transfer program.

COMPONENT PARTS: Parts of a machine or piece of equipment of a general nature which can be removed and utilized on other machines and equipment of a different make, design or type. Example: Electric motor.

RAW MATERIALS: Raw materials in the strict sense of the word are materials in a crude state such as iron ore although this term is often used to include materials which have been subjected to certain manufacturing processes; for instance, pig iron or bar stock. The term raw materials should never be used to include parts that have been individually processed to fit a particular operation. For instance, castings which have been ground.

SEMI-FINISHED PARTS: This term is used to include categories of material which have been partly processed for a particular machine, piece of equipment or other end product such as a rough casting that has been ground but not machined.

FINISHED PARTS: Finished parts normally referred to as parts. These have been completely machined and are ready to be assembled as a part of an end product or to be sold as replacement parts for machines already in use.

END-PRODUCT: End product is the finished product of a particular plant. The end product of one plant may be a semi-finished part of another. For instance, the end product of a foundry is castings which may be considered as raw materials in another plant. In many instances the plant may have more than one end product. Some of the end products may be used as parts or semi-finished parts in the operations within the same plant, while a certain amount may be sold to the public as an end product; for instance, an automobile manufacturer may also manufacture motors. A part of the motors are used in the assembly line operations of the plant but other motors are sold to other manufacturer or to the public for use as motors.

ADVANCE TRANSFER: The Advance Transfer Program was authorized by the FEC in order to furnish machinery and equipment to nations that had suffered excessively heavy war damage to their industries by reason of the Japanese aggression and occupation. The amount so delivered was not to exceed 30% in each of the categories of equipment. The four recipient nations are:

China	15%
Philippines	5%
United Kingdoms for Asiatic Colonies	5%
Netherlands for the Netherlands East Indies	5%

SCAP authorized the removal of equipment from the arsenals only with the exception of the Scientific and Technical equipment from the TID which was classified as Laboratory Equipment.

COPY

COPY

INVENTORY: The listing of items of machinery and equipment in a plant with an identification number on the equipment corresponding to the inventory number shown in the report. The nomenclature, specifications and other characteristics of the items are shown in the inventory.

EVALUATION: This refers to the processes by which the present value of the equipment is computed and is the basis for the division of the available equipment into shares for allocation to the Allied Nations.

CATALOG: Is the summarization of certain items of information furnished to the Allied Nations. In most instances, it contains detailed information as to nomenclature, specifications and a summary as well as the value of individual items of equipment.

OIL STORAGE FACILITIES: This refers to the Oil Storage Facilities owned by the former Japanese Army and Navy and includes all above-ground tanks of over 10,000 gallons capacity and the auxiliary equipment for such tanks; also the auxiliary equipment for underground storage owned by the former Japanese Army and Navy. Technically, these fall within the category of arsenals but were not included in those made available for Reparations under the Advance Transfer Program.

LABORATORIES: The term laboratories refers to the laboratories of the former Japanese Army and Navy and are technically classified as arsenals. A portion of this equipment was removed to the Technical Intelligence Detachment in Tokyo and forms the basis for Segment 2 of the Advance Transfer Program. The remaining equipment was inventoried and evaluated to be included with the 70% arsenals.

70% ARSENALS: The remainder of the arsenals not included in the Advance Transfer Program which were held for the nations which did not participate in the allocations under this program.

ALLOCATIONS: The actual allotment of machinery and equipment to an Allied Nation.

REPARATIONS AND RESTITUTION DELEGATIONS: This refers to the Reparations and Restitutions Delegations of the 11 Allied Nations which make up the Far Eastern Commission. These Delegates are regularly accredited to SCAP and are located in Tokyo and are a part of SCAP.

STAG: Reparations Technical Advisory Committee composed of a delegate from each of the 11 Allied Nations and a representative from SCAP who served as a non-voting chairman.

PRIMARY WAR FACILITIES: Plants and establishments primarily engaged in the development, manufacture, assembly, testing, repair, maintenance, or storage of combat equipment and end-products and civil aircraft, and plants and establishments building merchant vessels of over 5,000 gross tons.

COPY

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

COPY

SECONDARY WAR FACILITIES: Plants and establishments primarily engaged in manufacturing, repairing or maintaining major fabricated component parts, sub-assemblies, accessories, or equipment especially designed for use in the products of primary war facilities.

WAR SUPPORTING INDUSTRIES: General industry which supported the Primary and Secondary War Facilities which has peacetime as well as wartime uses.

Examples:

a. Iron and Steel Industry, producing pig, ingot and basic shapes

b. Non-ferrous Metal Industry, producing pig, ingot and basic shapes

c. The Light Metals Industry, producing alumina, primary aluminum and magnesium, rolled, drawn or extruded shapes, etc.

COMBAT EQUIPMENT AND PRODUCTS (PRIMARY WAR FACILITIES): Military End-products which may be identified as weapons, ammunition, missiles, explosives, chemical or bacterial warfare agents, ultra-short wave radio equipment (radar), naval combatant vessels, armored vehicles, or aircraft (including air frames and aircraft engines).

Subject : Disposition of Equipment released to the Japanese Government located in Former Japanese Army and Navy Arsenals.

1. Reference is made to File 387.6 CPC/RP, dated 23 January, 1950, subject: "Centralization and Release of Reparations Facilities."

2. The equipment not covered by Par. 2a and 2b of the above mentioned memorandum will be disposed of as follows:

(a) Melt down scrap.
All those machines falling into the following catagories will be disposed of as melt down scrap.

(1) Machines the major parts of which are missing or broken.

(2) Machines badly war damaged, worn, or burnt and economically non-repairable.

(3) Single purpose machines not usable in the peace time economy.

(4) Non-removable equipment.

(b) The equipment classified as melt down scrap will be disposed of by Ministry of Finance at the earliest practicable date. 80 percent in weight of all the equipment released from the 18 arsenals is expected to be scrapped down. (Exact quantity of this now under investigation.)

(c) It is proposed that all other equipment released to the Japanese Government will be retained in as "as is" condition by Ministry of Finance on expenses other than the reparations

budget and will be subject to temporary use permission for the time being when requests are received from prospective applicants indicating that a great need exists for such equipment. Priority of permission will be given to enterprises the products of which are contributable to the economic recovery of Japan.

(d) Classification of the released equipment of the 17 arsenals except Sagami Arsenal (19-18) into categories of Par. 2a and 2c and centralization plan of the equipment falling under Par. 2c will be completed by the end of next March. The released equipment of Sagami Arsenal (19-18) will be consolidated in an adequate place as quick as possible and then classified into melt down scrap and others to be retained.

(e) The Au machines as of 25 January, 1950, will be left as they are.

(f) Machines which are in use by permission of the Civil Affairs and upon which application for use has been made to SCAP will be left as they are pending final decision by SCAP.

31 March 1951

MEMORANDUM FOR RECORD

SUBJECT: Distribution & Industry Surveillance, Chiba

1. Distribution:

a. Staple Food:

A total of seven wholesalers, only one of which belongs to the Kodan group, have been licensed. Transportation costs to 31 designated receiving points in 13 Guns will be paid by MAF, while additional transport within those areas will be the responsibility of individual w/s. Some concern was expressed for possible distribution delays in remote areas. No instructions relative to surveillance over the liquidation of the Kodan have been received locally.

b. Fertilizer:

Prefectural officials attribute current shortages of calcium super-phosphate to speculative hoarding by manufacturers and dealers. The Prefectural Economic Bureau, however, is of the opinion that shortages result from coincidental demands throughout Japan. Indications point to the fact that some farmers have sufficient stocks on hand to meet immediate needs.

2. Economic Bureau:

Carrier control activity continued at low ebb during the month, accounting for the arrest of 47 violators, in possession of 4,100 kg of rice. Bureau officials consider the newly established consumer complaint office a success.

3. Commerce and Industry:

The problem of lending financial assistence to small and medium enterprisers is being solved (partially) by a prefectural appropriation of 40 million yen to the Chiba Branch, Central Bank of Commerce & Industry, in addition to a 10 million yen appropriation to the credit security association, and through the central government's credit insurance system. Construction of the Kawasaki Steel Company's plant in Chiba has been begun. Upon completion in 1954, this plant is expected to employ some 15,000 workers, about half of whom will be recruited locally. In addition to Kawasaki Steel and dependent industries businesses, a new harbor capable of handling ocean-going vessels up to 10,000 tons and an industrial highway from Tokyo are planned.
