HEADQUARTERS EIGHTH ARMY
United States Army
Office of the Commanding General
APO 343

A. G. 386.3 (MG-Pe 181)

SUBJECT: Stock-Piled and Instiled Materials and Supplier in Reparation Plants, Laboratories, Military Arsenals, and Naval Arsenals.

TO : Central Liaison Office, Tokyo.
(Attn: Special Procurement Board)

1. Reference is made to paragraph ten, letter this headquarters, dated 19 November 1946, subject: "Stock-piled and Installed Materials", file AG 386.3 (MG-P-12). Physical selection of specific reparation equipment has been made by a representative of Engineer Section. Headquarters Eighth Army, and the list of materials to be utilized from Reparation Plants, Laboratories, Military Arsenals and Naval Arsenals at this time is attached as inclosures one through eight.

2. Materials are to be shipped to consignee indicated on the inclosures and work should be in progress prior to 31 December 1947. If necessary, the Special Procurement Board will have the remmining transformer capacity rewired to provide sdequate current for custody and maintenance of remaining reparation items.

3. All items will be carefully and adequetely packed and marked citing nomenclature, directive number ordering removal,, and such other pertinent information as is consistent with existing instructions. One unit, complete with accessories, will be skid-mounted and packed in a single crate. The only authorized exception to these instructions is when the size or extreme weight of a single unit makes it necessary to use more than one crate to transport the unit. When an exception is made, marking will indicate the number of crates and parts involved.

4. Reports called for in reference quoted in paragraph I will include all avaiable date on capacities or ratings, phases, horsepower, and reparation inventory code numbers of all materials prepared for shipment.

BY COMMAND OF LIEUTENANT GENERAL EICHELBERGER:

R. SCHAFER
Lt. Col., AGD
Asst. Adj. Gen.

FEA

CIVIL PROPERTY CUSTODIAN
APO 500

387.6(8Feb.50)CPC/RP 25 Feb 1950

MEMORANDUM FOR: REPARATIONS AGENCY, JAPANESE GOVERNMENT

SUBJECT: Maintenance, Centralization of Machines, and Repair of Buildings in Reparations Plants

1. Reference is made to letter for Civil Property Custodian, General Headquarters, Supreme Commander for the Allied Powers, file R.A.R. No.64 (RA), 8 February 1950, subject, "Application for Encumbrance of Funds for Maintenane of Idle Reparations Machines," from Reparations Agency, Japanese Government.

2. Funds totaling ¥ 62,325,000 have been encumbered for maintenance, centralization of idle machines, and repair of buildings of reparations plants. Expenditure of these funds will be limited as follows:

a. Maintenance work will be conducted only on machines whose preservative has served its maximum usefulness and will not be performed on working surfaces of machines and equipment that are now preserved with heavy grease, light oil, or any other type of preservative which is in good condition. The following table will be used as an example for estimating cost for cleaning and preserving reparations machines:

(1) Unit: 100 point machine (such as a 6' lathe)

(2) Cost of labor: 4 men hours.....¥ 150.00

(3) Cost of material (if not furnished by Japanese Government):

Items	Quantity	Unit Price	Total
Kerosene	1 litre	¥ 16.35	¥ 16.35
Machine Oil	1 litre	55.59	55.59
Grease	1 kg	114.08	114.08
Rags	1.5 kg	31.42	47.13
Soap & others			22.85
Total			256.00

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(4) Miscellaneous (overhead) 4.00

(5) Grand Total ¥ 410.00

b. Note that in the example above, anti-corrosive paper and abrasives, such as every cloth and sandpaper, were omitted. This omission is in accordance with the desires of the Office of the Civil Property Custodian. The use of abrasives is detrimental to machined surfaces and the use of anti-corrosive paper is considered an unnecessary expense, since the preservative provides ample protection. Paper in stock which could be used to cover a machine entirely should be expended, but this, too, is an unnecessary expense and no further purchase of paper for this purpose will be made.

c. Centralization of equipment within plants will be effected primarily with a view toward reduction in the number of guards: however, centralization may also be accomplished in preference to repair of damaged buildings housing idle machines when considered more economical. Plant-to-plant consolidation will be effected only between government owned arsenals and laboratories, provided that consolidation will result in overall reduction in custody cost.

d. Repair of buildings will be conducted only on those buildings housing dead storage equipment. The extent of repair will be limited to the minimum.

e. Funds will not be allocated to plants using 30% or more of reparations equipment. Such plants are responsible for necessary maintenance of idle machines and repair of buildings.

f. In order to economize, the various ministries concerned should appoint personnel now on reparations payrolls to supervise local labor on maintenance, centralization, and repair projects, and should utilize all available materials which were purchased with reparations funds. The use of supervisor would preclude the necessity of hiring a contractor who would have to be assured a profit for his services.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

3. Local Finance, International Trade and Industry, Education, and Transportation Ministry bureaus will be responsible for preparation of applications for maintenance, centralization of idle machines, and repair of buildings in reparations plants under their jurisdiction. Each application will include a detailed description of the project to be accomplished and a breakdown estimate of the cost involved. These applications will be submitted to the Chief of the Civil Affairs Region concerned, or to the Commander, United States Naval Forces, Far East, for plants under his surveillance, for approval prior to their implementation. The ¥ 62,325,000 encumbered, includes the cost of maintenance, centralization of equipment, and building repair projects initiated during the 1949-50 fiscal year, for which funds have not been encumbered and which are to be completed by the end of the fiscal year 1950, or within a reasonable period thereafter. No other funds will be encumbered for these projects. Of the encumbered amount, no more than ¥ 1,000,000 may be utilized toward administrative expenses.

4. It is requested that the Reparations Agency, Japanese Government, notify the appropriate Japanese Government agencies to accomplish necessary maintenance, centralization of idle machines, and repair of buildings in reparations plants at the earliest possible date, and that upon completion a cost report of each project accomplished be submitted to the Civil Property Custodian, General Headquarters, Supreme Commander for the Allied Powers.

E. C. MILLER, Jr
Colonel, Infantry
Deputy Custodian

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

PURPOSE: To Discuss Procedure for Reconciling the Authorized Use Records of GHQ SCAP with Those of Japanese Government.

1. The undersigned explained to the group that an I.B.M. listing had been prepared based on reports submitted by the Japanese Government on equipment that was in authorized use to support the Japanese Economy.

After checking this list it was determined that a large number of the items had never been officially approved according to GHQ SCAP records. The Japanese Government representatives were informed that a copy of the I.B.M. listing for Japanese Economy items would be furnished. The list would be in two parts:

(a) Items of equipment officially approved for use according to CPC records.

(b) Items of equipment for which CPC has no record of approval.

These representatives were asked to make an "on the spot" investigation at each plant having itesm listed on the "b" portion of the I.B.M. list in order to determine whether or not the items had been officially approved for authorized use. In cases where such items were in official authorized use(approval granted by M.G. Units in the early stages of the Occupation, etc.)a copy of the authorization should be furnished for each such individual item approved. They were also informed that, in cases where it was determined that the plant did not have official records to substantiate its calim that the items had been officially approved for use, a request, including economic justification therefor, should be submitted to GHQ SCAP attn: Economic & Scientific Section. Further the J.G. representatives were informed that requests for authorized use of items not formerly approved must be submitted for each individual plant and individual item within the plant in the same manner as other authorized use requests that are currently being submitted to GHQ SCAP.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

2. Since an I.B.M. listing is being submitted from which a check can be made it was decided that sixty (60) days should be sufficient time in which to complete the investigation. However, the J.G. representatives were assured that where problems arose in particular areas (i. E. Hokkaido) sufficient time would be allowed beyond the deadline date to permit submission of accurate reports. It was emphasized that it was most important that the reports submitted should be accurate even though the deadline could not be met.

3. Because of limited funds in the current reparations budget it was decided that all expense, other than the necessary governmental administration of the program, should be borne by the private companies using or desiring to use reparations equipment to facilitiate production of approved items. The I.B.M. listing contains a space for listing additional items that were in use as of 31 March 1950. Such items may be added to the I.B.M. list and this list can be used as the basic request. By using this list only a brief cover letter and economic justification must be prepared, thus reducing the expense involved in submitting request for authorized use.

4. The Japanese Government will be furnished one copy of the I.B.M. list on 3 April. This copy is for Central Japanese Government use only, two additional copies for distribution to local agencies and plants will be furnished on or about 7 April.

5. A follow up conference will be held at 1400, 3 April 1950 to discuss problems in connection with implementation of the program cutlined above.

Cordia M. Roller
Chief, J.G. Property
Branch

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

TO : Mr. C.H. Roller, Chief, J.G. Property Branch, Accounts Division, CPC.

From : Mr. B. Sugiura, Chief, General Affairs Section, E.A.

SUBJECT : Confirmation of the meaning of "Authorized Use" of Reparations Equipment.

I understood that the principles instructed to J.G. by you at a conference held on April 3 were as follows, for which I hereby ask your confirmation.

1. Regardless of "prior to or after 1 January 1949, in cases where the words of "Authorized Use" are mentioned in official letters issued by local M.G. units (CAT or CAR), those should be construed to be formal "Authorized Use".

2. In border line cases where very vague expressions are used and whetherit is "Temporary Use Operation" or "Authorized Use" can not be easily judged in official letters given by occupation authorities, it is advisable to prepare requests for "Authorized Use" of them.

3. a. Prior to 1 Jan. 1949.
"Temporary Use or Operation" based on Conversion, Reconversion or Operation permits is constured to be "Authorized Use", even if those permits are issued by local M.G. units.

b. After 1 Jan. 1949.
No "Temporary Use or Operation" is construed to be "Authorized Use", excepting those cases authorized on SCAP Conversion or Reconversion Permits.

(H. Sugiura)
Chief, General Affairs Section,
Reparations Division,
Reparations Agency.

O.D. 11 MAY 27 1950

DEFINITIONS OF REPARATIONS TERMS

RESIDUAL EQUIPMENT: Machinery and equipment remaining in the 18 advance transfer arsenals after the allocation of machine tools and metal working equipment in Segment 1.

INTEGRATED FACILITIES: A complete unit, self-contained and capable of being removed as such, and operated elsewhere in a similar capacity without the major items of equipment. Examples: Iron and Steel Rolling Mills, Cranes, Power Units (i.e. the Power Plant at Kure Naval Arsenal). In the advance transfer program, integrated facilities were inventoried and evaluated as single units.

AUTHORIZED USE: SCAP was authorized to make use of industrial facilities to accomplish the objectives of the Occupation. In the early stages of the Occupation, equipment was loaned to the Occupation on a temporary basis. In some instances, equipment was needed on a more permanent basis and the term "authorized Use" came into being. Items needed by Occupation units were requested and when the Authorized Use of such equipment was granted, it was suspended from the Allocation Availability List indefinitely. Authorized Use of reparations equipment was not limited solely to the use of the Occupation Forces, in that Japanese agencies were also entitled to request equipment for use in economic rehabilitation as well as the manufacture of goods essential to the needs of the Occupation.

LOOTED PROPERTY: Looted property includes both items which were taken by force and those purchased under duress and removed to Japan while the Japanese were occupying the country from which it was taken. Looted Property is subject to restitution to the country from which it was taken. Restitution of Looted items is under the jurisdiction of GPG.

RESTITUTION: This refers to items which have been looted from other countries and brought to Japan and which are to be restored in kind from the nation from which it was taken without charge to their Reparations account.

EXEMPTED PROPERTY: Exempted Property is composed of machinery and equipment which was brought in to the arsenals, aircraft and private munitions plants by the permission of the Eighth Army after the termination of hostilities; usually after the plant was taken under custody for Reparations.

SPECIAL PURPOSE: Special purpose equipment is defined as being all buildings, machinery and equipment in primary war facilities which, by virtue of initial design, construction, or major structural change, are, as individual items, special purpose in nature and functionally limited to use in connection with combat equipment products.

SEGMENT 1: The machine tools and items of secondary working equipment inventoried under GD 5/4, Eighth Army, and evaluated on an average basis by the use of IBM tabulating equipment and allocated from the "18 arsenals" under the advance transfer program.

COPY

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

COPY

SEGMENT 2: Is composed of testing and measuring instruments which were collected into central warehouses by the Technical Intelligence Detachment and allocated and shipped from the warehouse of that organization.

SEGMENT 3: Is composed of the Residual and Integrated Facilities remaining in the "18 Arsenals" from which allocations are being made under the advance transfer program.

COMPONENT PARTS: Parts of a machine or piece of equipment of a general nature which can be removed and utilized on other machines and equipment of a different make, design or type. Example: Electric motor.

RAW MATERIALS: Raw materials in the strict sense of the word are materials in a crude state such as iron ore although this term is often used to include materials which have been subjected to certain manufacturing processes; for instance, pig iron or bar stock. The term raw materials should never be used to include parts that have been individually processed to fit a particular operation. For instance, castings which have been ground.

SEMI-FINISHED PARTS: This term is used to include categories of material which have been partly processed for a particular machine, piece of equipment or other end product such as a rough casting that has been ground but not machined.

FINISHED PARTS: Finished parts normally referred to as parts. These have been completely machined and are ready to be assembled as a part of an end product or to be sold as replacement parts for machines already in use.

END-PRODUCT: End product is the finished product of a particular plant. The end product of one plant may be a semi-finished part of another. For instance, the end product of a foundry is castings which may be conside ed as raw materials in another plant. In many instances the plant may have more than one end product. Some of the end products may be used as parts or semi-finished parts in the operations within the same plant, while a certain amount may be sold to the public as an end product; for instance, an automobile manufacturer may also manufacture motors. A part of the motors are used in the assembly line operations of the plant but other motors are sold to other manufacturer or to the public for use as motors.

ADVANCE TRANSFER: The Advance Transfer Program was authorized by the FEC in order to furnish machinery and equipment to nations that had suffered excessively heavy war damage to their industries by reason of the Japanese aggression and occupation. The amount so delivered was not to exceed 30% in each of the categories of equipment. The four recipient nations are:

China	15%
Philippines	5%
United Kingdoms for Asiatic Colonies	5%
Netherlands for the Netherlands East Indies	5%

SCAP authorized the removal of equipment from the arsenals only with the exception of the Scientific and Technical equipment from the TID which was classified as Laboratory Equipment.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

COPY

INVENTORY: The listing of items of machinery and equipment in a plant with an identification number on the equipment corresponding to the inventory number shown in the report. The nomenclature, specifications and other characteristics of the items are shown in the inventory.

EVALUATION: This refers to the processes by which the present value of the equipment is computed and is the basis for the division of the available equipment into shares for allocation to the Allied Nations.

CATALOG: Is the summarization of certain items of information furnished to the Allied Nations. In most instances, it contains detailed information as to nomenclature, specifications and a summary as well as the value of individual items of equipment.

OIL STORAGE FACILITIES: This refers to the Oil Storage Facilities owned by the former Japanese Army and Navy and includes all above-ground tanks of over 10,000 gallons capacity and the auxiliary equipment for such tanks; also the auxiliary equipment for underground storage owned by the former Japanese Army and Navy. Technically, these fall within the category of arsenals but were not included in those made avilable for Reparations under the Advance Transfer Program.

LABORATORIES: The term laboratories refers to the laboratories of the former Japanese Army and Navy and are technically classified as arsenals. A portion of this equipment was removed to the Technical Intelligence Detachment in Tokyo and forms the basis for Segment 2 of the Advance Transfer Program. The remaining equipment was inventoried and evaluated to be included with the 70% arsenals.

70% ARSENALS: The remainder of the arsenals not included in the Advance Transfer Program which were held for the nations which did not participate in the allocations under this program.

ALLOCATIONS: The actual allotment of machinery and equipment to an Allied Nation.

REPARATIONS AND RESTITUTION DELEGATIONS: This refers to the Reparations and Restitutions Delegations of the 11 Allied Nations which make up the Far Eastern Commission. These Delegates are regularly accredited to SCAP and are located in Tokyo and are a part of RTAC.

RTAC: Reparations Technical Advisory Committee composed of a delegate from each of the 11 Allied Nations and a representative from SCAP who served as a non-voting chairman.

PRIMARY WAR FACILITIES: Plants and establishments primarily engaged in the development, manufacture, assembly, testing, repair, maintenance, or storage of combat equipment and end-products and civil aircraft, and plants and establishments building merchant vessels of over 5,000 gross tons.

COPY

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

COPY

SECONDARY WAR FACILITIES: Plants and establishments primarily engaged in manufacturing, repairing or maintaining major fabricated component parts, sub-assemblies, accessories, or equipment especially designed for use in the products of primary war facilities.

WAR SUPPORTING INDUSTRIES: General industry which supported the Primary and Secondary War Facilities which has peacetime as well as wartime uses.

Examples:

a. Iron and Steel Industry, producing pig, ingot and basic shapes

b. Non-ferrous Metal Industry, producing pig, ingot and basic shapes

c. The Light Metals Industry, producing alumina, primary aluminum and magnesium, rolled, drawn or extruded shapes, etc.

COMBAT EQUIPMENT AND PRODUCTS (PRIMARY WAR FACILITIES): Military End-products which may be identified as weapons, ammunition, missiles, explosives, chemical or bacterial warfare agents, ultra-short wave radio equipment (radar), naval combatant vessels, armored vehicles, or aircraft (including air frames and aircraft engines).

Ed Guard note - action

TELEPHONE ABSTRACT
TOKAI-HOKURIKU CIVIL AFFAIRS REGION
APO 710 (Nagoya, Honshu)

DATE 9 June 50

TIME	FROM	TO	SUBJECT	ACTION
1515	GHQ CAS (Mr. Woodward)	THCAR (CMG)	1. Japanese plants requesting authorized use should receive their reply within 30 days. If any plants have not received a reply within this period, they should take it up with the Japanese Governmental Agencies concerned. 2. Since the advance transfer program in completed, there will be no further direct correspondence with CPC. All correspondence relative to reparations will come through CAS. 3. Request that directives for reduction of guards be checked to determine whether they are feasible or create an undue hardship. If the latter is found to be the case, request that this section be informed. 4. The 10 electric power plant companies still remain designated as excessive concentrations of economic power. (Law 207 of 1947).---(Apparently this refers to the 9-bloc plan --no changes contemplated for the present. CMG.) 5. The Japanese Government is making a survey of non-industrial items in reparations plants. Regions will be notified when such equipment is released. 6. When items are recommended to be scrapped, a statement should be included that Civil Affairs has inspected the items concerned. C.M.G.	

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Memorandum for Mr. George

The following comments are submitted with respect to the "exceptions" noted by Mr. John Laffin, following his recent inspection.

1. (06-05) Mr. Laffin was correct in stating that plant was evaluated, but the evaluation report that I saw did not include this substation, nor was it ever included in the original inventory. Until now I have assumed that if both the inventory and the evaluation team ignored an item there was no further reason for bothering with it.

2. (06-07) This is the Tsuruga plant. I have always been in favor of moving it to Fukui, but the small custodial costs have never been sufficient justification for moving costs. Laffin says 10 are junk and will be scapped----which 10, and how about letting us know prior to their being scrapped, as a matter of record? Also what authority does he personally have to tell them to move the machines?---Finance Bureau would like to know the answer to this one too?

3. (42-02) Keeping track of EX item that can be brought into the plant at will is a little difficult----I have 99 listed as EX in my files but they may have brought in a couple of machines recently that are not yet marked--- will check the next time I visit this factory. 221 items AU, 21 in operation-----I have tried to be as lenient as possible in this respect, allowing as much as six months leeway for warious reasons, since there has been no specific time limit set by SCAP as to the length of time a machine can be out of operation and still marked AU. However if the plant expects to close in July I will take steps to see that machines are taken out of AU at the same time.

4. (42-03) I know that industrial trackage in Government Arsenals is subject to removal for reparations, but what directive made it subject to removal in private plants? We have a number of plants that are privately-owned that contain industrial trackage---a good deal of which is owned by the Railroads. Are we to exercise surveillance over all of this?

5. (42-06) "Custodians and guards belong to private company"---so what? Finance Ministry always lets out contracts to private companies for guards. Comments on this plant do not seem relevant to us.

6. (42-11) In spite of Mr. Laffin's instructions to the contrary the company will, under existing regulations, ask us for permission to move machinery first, and then move it after receiving the permission. (OD 11, par 3 b 5)

7. (42-15) "Operating on letter from Capt Medallia, 90th MG, 19 Apr 46, stating that plant did not need reconversion permit to operate". That is correct but it might help to add that Capt Medallia was backed up by Hqs., 8th Army (2 Aug 46, 2nd Ind fr Hq 8th Army to CG 1st Corps "The continued operation of the Fujikoshi Kozai Kogyo K.K., Toyama plant, is authorized.")

E.F.J.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

22 May 1950

Memo to: 1. Mr. Jordan
2. Mr. Jouard

The following exceptions were noted by Mr. John Laffin in a conference with undersigned on 19 May 50, upon completion of reparations inspections in Toyama and Fukui prefectures. It is requested that any comments or explanations be returned in writing.

06-05 -- Mikuni Kogyo. Plant evaluated, but whole substation comprised of 3 transformers and 3 panels not numbered. (Plant never in operation, according to officials. CPC will determine status).

06-07 -- Dispersal of Maizuru Naval Arsenal. Now have 33 machines. 10 are junk and will be scripped. Remainder will be moved to Fukui, and Tokai-Hokuriku Civil Affairs Region will be notified of numbers and new location.

42-02 -- Kureha Kogyo. EX items not marked. 221 items AU; 21 in operation. Company in financial difficulty; expects to close by July.

42-03 -- Kureha Kogyo. Approximately 300 feet of industrial trackage removed latter part of last year. (Laffin ordered it returned).

42-06 -- All equipment concentrated from 1st Tokyo Military Arsenal (984 items). Custodian and guards belong to private company. Salaries ¥63,700/ month.

42-11 -- Toa Gosei Kagaku, Takaoka. Company wants to scrap 125 of present cells and move 198 cells to 42-09. (Laffin advised to request AU on 198 items, and move and notify Tokai-Hokuriku Civil Affairs Region).

42-15 -- Fujikoshi Kozai, Toyama. Operating on letter from Capt. N. Medallia, 90th M.G., dated 19 April 1946, stating that plant did not need reconversion permit to start operation.

42-16 -- Tateyama Jukogyo. Transformer not numbered and plant dirty.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

To : General Headquarters, Supreme Commander for the Allied Powers.

From : Reparations Agency, Tokyo.

Subject: Submittance of Disposition Plan of Equipment Released to the Japanese Government Located in Former Japanese Army and Navy Arsenals.

RAR No. 98 (MS) 17 February 1950.

1. Reference:

SCAP Memorandum File 387.6 CPC/RP, dated 23 Jan. 1950, subject: "Centralization and Release of Reparations Facilities".

2. The Reparations Agency hereby submits to your Headquarters a disposition plan of equipment released to the Japanese Government located in former Japanese Army and Navy arsenals which was prepared by the Finance Ministry.

3. It is requested that your most favorable consideration be given to this proposed plan.

For Director, Reparations Division:

(H. Sugiura)
Chief of General Affairs Section,
Reparations Division,
Reparations Agency.

I
Disposition Plan of Equipment released
to the Japanese Government Located in
Former Japanese Army and Navy Arsenals.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

16 February, 1950.

To : General Headquarters, Supreme Commander for the Allied Powers.

From : Ministry of Finance, Japanese Government.

Thru : Reparations Agency.

Subject: Disposition of Equipment released to the Japanese Gonvernment located in Former Japanese Army and Navy Arsenals.

1. Reference is made to File 387.6 CPC/RP, dated 23 January, 1950, subject: "Centralization and Release of Reparations Facilities."

2. The equipment not covered by Par. 2a and 2b of the above mentioned memorandum will be disposed of as follows:

(a) Melt down scrap.
All those machines falling into the following categories will be disposed of as melt down scrap.

(1) Machines the major parts of which are missing or broken.

(2) Machines badly war damaged, worn, or burnt and economically non-repairable.

(3) Single purpose machines not usable in the peace time economy.

(4) Non-removable equipment.

(b) The equipment classified as melt down scrap will be disposed of by Ministry of Finance at the earliest practicable date. 80 percent in weight of all the equipment released from the 18 arsenals is expected to be scrapped down. (Exact quantity of this now under investigation.)

(c) It is proposed that all other equipment released to the Japanese Government will be retained in as "as is" condition by Ministry of Finance on expenses other than the reparations

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

budget and will be subject to temporary use permission for the time being when requests are received from prospective applicants indicating that a great need exists for such equipment. Priority of permission will be given to enterprises the products of which are contributable to the economic recovery of Japan.

(d) Classification of the released equipment of the 17 arsenals except Sagami Arsenal (~~18-20~~ 17-19) into categories of Par. 2a and 2c and centralization plan of the equipment falling under Par. 2c will be completed by the end of next March. The released equipment of Sagami Arsenal (~~18-22~~ 18-21) will be consolidated in an adequate place as quick as possible and then classified into melt down scrap and others to be retained.

(e) The Au machines as of 25 January, 1950, will be left as they are.

(f) Machines which are in use by permission of the Civil Affairs and upon which application for use has been made to SCAP will be left as they are pending final decision by SCAP.

APO 500

387.6 (2 Jun 1950) CPC/RP 2 Jun 1950

MEMORANDUM FOR: REPARATION AGENCY, JAPANESE GOVERNMENT

SUBJECT: Reduction of Custodial Personnel at Reparations Plants

1. Reference is made to:

a. Directive Number 3 (SCAPIN 47), 22 September 1945, no subject, office of the supreme commander for the Allied Powers

b. Memorandum for Japanese Government, file AG 004(20 Jan 46) ESS/GD, SCAPIN 629, 20 January 1946, subject,"Custody, Control and Protective Maintenance of Japanese Aircraft Plants, Arsenals and Laboratories"

c. Memorandum for Japanese Government, file AG 387.6 (20 Sep 46) ESS/IN, SCAPIN 1219, 20 September 1946, subject, "Responsibilities of Imperial Japanese Government for Preservation and Care of Plant's Equipment and Records Taken into Custody for Reparations Purposes by the Supreme Commander for the Allied Powers."

2. It is directed that all custodians and assistant custodians of Japanese Government payroll at reparations plants be discharged, effective immediately.

3. It is also directed that privately owned plants under reparations custody be relieved of the current obligation which makes retention of custodians at reparations plants mandatory.

4. Custodial inventories and records heretofore maintained by plant custodians will be maintained in the case of non operating plants, by the regional or prefectural Japanese Government agency concerned, which will have original records available at each plant in the custody of the chief guard; and in the case of operating plants, by the management concerned. The responsibility for keeping all such documents secure, coordinated, current, accurate, properly authenticated, and readily available within each plant for examination by inspectors representing the Supreme Commander for the Allied Powers will continue to rest with the Japanese Government.

5. Generally, thereis an excess in the number of guards at reparations plants. This is due, among others, to the following reasons:

a. The criteria which have been established and applied in the past were not generally adequate in determining the minimum number of guards consistent with actual security requirements at individual plant, and with the realities of public finance.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

b. Reparations funds in payment for excess guards have been used in a number of cases both as an indirect government subsidy to assist private plants, and as a social measure for unemployment relief.

c. Reductions in plant areas under reparations custody effected through consolidation and/or scrapping of equipment and subsequent release of land buildings have not always been accompanied by appropriate reductions in guard personnel, and in other custodial costs, as had been intended and made feasible by such reductions.

6. Changes in operating status of reparations plants occur from time to time, requiring, in most instances, changes in number of guard personnel. Thus, a fully operating plant which currently is permitted no guards paid out of reparations fumds, will require an appropriate complement of guards as soon as operation ceases; whereas a plant which is presently idle will, from the time it begins operation, be subject to a reduction or elimination of guard personnel who are paid out of reparations funds.

7. Effective immediately, appropriate changes in the number of guard personnel for reparations plants as required by changes in operating status of plants, or as otherwise required or justified, will be accomplished with the guidance of the following principles and criteria:

a. Criteria heretofore used in determining the number of guard posts required for reparations plants will be revised to include consideration of all factors that affect security, or make maintenance of security difficult, at individual plants. Therefore, in addition to considering the total items of inventoried machinery and equipment at a plant, the total point values represented by them, and the total floor space of the plant, consideration will also be given to the following:

(1) The nature and value of the plant reparations equipment

(2) The number, disposition, type and condition of the buildings containing reparations equipment

(3) The size and charactoer of plant area or areas under custody, and the nature of protective inclosure, if any

(4) The existence of firms, institutions, or installations adjacent to plant which constitute a potential fire hazard, such as saw mills, woodworking plants, etc

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(5) The existence of undesirable social conditions and forces, and of non-law-abiding groups, in areas adjacent to a reparations plant, such as widespread unemployment, poverty and social unrest, pirates, thieves operating in gangs, etc

(6) Any other factor that has pertinent relation to the security of a plant.

b. In determining the number of guards to be employed at non-operating plants, the following willbe used as a guide:

(1) In the case of non operating government-owned arsenals, Table 1, attached as Inclosure 1, which is based on the 24-hour shift system, and which lists the maximum number of guards to be employed in oreder to provide a given number of guards on alert duty night and day, at all times. This maximum may be lowered where the arsenal concerned is able to make mutual, cooperative arrangements with guards of a plant or plants located within, or immediately adjacent to its compound.

(2) In the case of nonoperating private plants, the maximum number of guards to be employed out of reparations funds for alert duty night and day, at all times, will be three guards per guard post required, plus an adequate number of relief guards. Relief guards are normally limitted tc one per six guards or fraction thereof employed for a 24 hour period. Thus, the transfer of funds by the Japanese Government to the owner of a non-operative private reparations plant for the employment of guards for two guard posts should enable that owner to employ seven guards, and on the 8-hour shift system, to have a minimum of two guards on alert duty at any time, night and day, at all times. This maximum may be lowered where the plant is very small, and/or has resident guards.

c. Operating reparations plants must share the custody costs with the Japanese Government. The following principles will govern the payment of guards for operating plants from reparations funds:

(1) Where 30 % or more of the equipment of a reparations plant is in use, the plant will pay for all guards necessary for adequate security.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(2) Where less than 30% of the equipment is in use, but where the items in use are key items of the central facility or facilites of the plant, that plant will be regarded as using more than 30% of the equipment, and will pay for all guards necessary to the secubity of the reparations facility.

(3) Where less than 30% of the equipment is in use, the using agency will not pay for all guards, but must share in the cost of custody in direct propertion to the amount of equipment used less than 30% (Example: A plant 15% in operation requiring 20 guards would pay for 10 guards.), except where, on the basis of the criteria as listed in Par 7a, the employment of additional guards paid from reparations funds is justfied.

(4) Where a plant which is in 30%, or more than 30%, operation, has a nonoperating main plant, or a dispersal area located in a completely separate geographical area, such a main plant or dispersal area will be treated as an independent plant, and provided with an appropriate complement of guards paid out of reparations funds. However, where the nonoperating main plant or dispersal area of an operating plant is located in the same custodial area, or adjacent thereto, no guards paid out of reparations funds will be furnished, except where, as in the case of some private plants, the nonoperating plant is under separate ownership, or where the nonoperating plant has a considerable amount of reparations equipment occupying an extensive floor area, and/or consists of a number of widely separate buildings, or otherwise should, under criteria as listed in Par 7a, be supplied guards from reparations funds.

(5) Integrated facility plants, such as caustic soda plants, iron and steel plants, shipbuilding plants, precision bearing plants, machine tool plants,etc, which are in operation, and which have a key facility, or an important part of a key facility or facilities in operation, will pay for all guards.

(6) The fact that an operating plant is paying for all or part of the guards does not excuse such plants from maintaining adequate security.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

387.6 (2 Jun 1950) CPC/RP
subj: Reduction of Custodial Personnel at Reparations Plants

8. A report of the actual number of guards to be paid from reparations funds for each plant under reparations custody will be submitted not later than 15 June 1950 by prefectural and regional Japanese Government agencies of the Ministries of Finance, International Trade and Industry, Transportation, and Education to the Regional Civil Affairs Team concerned for approval. Report will also list information for each plant as follows:

a. Plant code number

b. Plant name and address

c. Number of guards paid from reparations funds as of thirty days after the date of this memorandum

d. Number of guards paid by operating plant funds as of thirty days after the date of this memorandum

e. Number of custodial personnel paid from reparations funds as of 1 April 1950

f. Number of custodial personnel paid by operating plant funds as of 1 April 1950.
