COMPILER

GENE COLLING is currently a writer-editor for the Northern Region, USDA Forest Service, in Missoula, Mont. From 1974 to September 1979 he was writer-editor for the SEAM Program. Prior to that he worked on the Custer National Forest and in the Montana State Office of the Bureau of Land Management. He received a B.S. degree in wildlife biology from South Dakota State University in 1970. He also studied journalism at South Dakota State University and at the University of Montana.

BIBLIOGRAPHY OF SEAM PUBLICATIONS

Gene Colling, Compiler

SUMMARY

The Surface Environment and Mining Program, know as SEAM, was established in 1973 to develop and apply biophysical, social, economic, and engineering information regarding mining in the West. The program completed its charter on September 30, 1979.

As a Research, Development, and Application Program, SEAM's primary concern was getting knowledge to the right users, at the right time, and in the right format. As part of that effort the information developed through SEAM has been published through many different outlets.

This bibliography contains all citations produced through the SEAM Program. Copies of the publications listed through page 12 may still be available from the authors, agencies or universities listed in the citations. Publications may also be available through libraries that usually maintain collections of professional and scientific literature related to mining and reclamation. Copies of the unpublished reports starting on page 13 are not available for general distribution.

All citations are listed in SEAMALERT and WESTFORNET bibliographic data bases. SEAMALERT is computer produced with current information derived from the technical literature as well as automated computer searches of pertinent computer files from the Department of Energy's RECON and Lockheed's DIALOG systems.

To obtain SEAMALERT information and forms, contact Mercy A. Valencia, Mine Reclamation Center, University of Arizona, 845 N. Park Avenue, Tucson, AZ 85719, phone (602) 626-4925.

Forest Service personnel may obtain copies of most publications through the WESTFORNET system by contacting WESTFORNET-Ogden, 507 25th Street, Ogden, UT 84401, phone (801) 626-3697.

1976. Aquatic biota and abiota of the Little Powder River and Antelope Creek in Thunder Basin National Grassland, Wyoming. Completion rep. Univ. Wyo., Laramie. 129 p.
- Wesche, Thomas A., and William F. McTernan.
1977. Aquatic biota and abiota of selected streams on Thunder Basin National Grassland, Wyoming. Completion rep. Water Resour. Res. Inst., Univ. Wyo., Laramie. 137 p.

- Wesche, Thomas A., Barron L. Weand, Gary W. Rosenlieb, and Lora S. Johnson.
1978. Aquatic biota and abiota of selected streams on Thunder Basin National Grass-
land, Wyoming. Completion rep. Water Resour. Res. Inst. Univ. Wyo., Laramie.
153 p.
- Whitman, Warren C.
1979. Selection and increase of perennial forbs for mine spoil reclamation in the
northern Great Plains. Final rep. N.D. State Univ., Fargo. 48 p.
- Whitworth, Regan.
1976. Direct and opportunity costs for mineral area management. SEAM report. 28 p.
- Willmuth, Waite H., and Edward J. DePuit.
1976. Effects of fertilizer rate, times of applications and season of seeding on a
mine spoil rehabilitation planting. Progr. rep. Mont. State Univ., Bozeman. 37 p.

Colling, Gene (Compiler).

1980. Bibliography of SEAM publications. USDA For. Serv. Gen. Tech. Rep. INT-88, 20 p. Intermt. For. and Range Exp. Stn., Ogden, Utah 84401.

This bibliography of publications produced through the SEAM Program 1974-1979 contains information on the biophysical, social, economic, and engineering aspects of mining in the western United States.

KEYWORDS: Bibliography, SEAM, reclamation, social-economics, engineering, mining, western United States.

THE SEAM PROGRAM

The Surface Environment and Mining Program, known as SEAM, was established by the Forest Service to research, develop, and apply new technology to help maintain a quality environment while helping meet the Nation's mineral requirements. SEAM is a partnership of researchers, land managers, mining industries, universities, and political jurisdictions at all levels.

Although the SEAM Program was assigned to the Intermountain Station, some of its research projects were administered by the Rocky Mountain and Pacific Southwest Research Stations.
