DECLASSIFIED E.O. 12958 SECTION 5.402/NRDS NO. 1

To The Shikoku Military Government

Written application regarding the exclusion from the
Reparation Plants.

1. Name of factory under custody:

Sanuki Iron Works

2. Location:

502-Banchi, Oaza-Enza, Enza-mura, Kagawa-gun,
Kagawa-ken.

3. Name of the Machine:

Lathe

4. Number of the Inventory:

17-6 (2) - 1

5. Number of the Machine:

1

6. Current Use:

For manufacturing the turbine pumps and wood-working
machines.

7. Reason for the Exclusion application:

The works is the machine manufacturing factory which
was specially designated by the Commerce and Industrial
Dep't and is endeavoring in manufacturing the turbine
pump and wood working machines. As the plants in the
works are considerably broken, the available machines
are very little. In such conditions the withdrawal of
the above mentioned machine as reparation will certainly
obstruct the manufacturing.

I hereby beg you to exclude it from the Scope of reparation.

From the Sanuki Iron Works
502, Oaza-Enza, Enza-mura,
Kagawa-gun, Kagawa-ken.

1. Present purpose

The machines are used to repair railroad cars and railroad facilities also to improve and mend Army Freight Cars.

1. Reason to omit confiscation---As the next list, the 24 reparation machines are now entirely, used to repair railroad cars and railroad facilities, also to repair and imprave Army Freight Cars. As there are no other machines of these types confiscation would impede the repair work of the factory and other various works to such on extent that operation of the railroad would be practically impossible. We therefore, in respect to undermentioned list, entreat that these machines be omitted from reparation. The comparative percentage of reparation machinery meet that of machines owned by Tadotsu Repair Shop is as follows.

a) Drill

Classification	Quantity	%	Quantity used for engine repair	Quantity used for repair carriage, freight car.	Quantity used for railway facility repair.
machines that are owned by Transportation Gov.	32	70%	21	46%	5 11% 6 13%

SUBJECT: Dispersed Machinery Located in Osaka Prefecture

TO: Commanding Officer
Kagawa Mil Govt Team
APO 317

1. There is located in Osaka Prefecture a considerable amount of machinery and equipment dispersed from other prefectures. For confirmation purposes, the Osaka Mil Govt Team would like to secure a list of all machinery and equipment dispersed from your prefecture which is now located in Osaka prefecture. It will be necessary for this team to know the name and address of each dispersal site, the code numbers of all machines located at each installation, the classification of all machines, and the name and code number of the reparations installation in your prefecture from which the machines originally came.

2. Since this letter is being sent to all military government teams, it is possible that your particular prefecture may not have any reparations machinery and equipment dispersed to Osaka Prefecture. In that event, it is requested that a negative report be furnished.

To: Commanding Officer, Kagawa Military Government.

Subject: Written application of the reparation machinery.

In accordance with the notified report, the application for exception of Ono Branch Workshop, Kure Naval Factory is hereunder presented.

Osamu Akutagawa

Director, Shikoku Railway Division.

DECLASSIFIED E.O. 12958 SECTION 3-402/NNDG NO. 170010

Applications for exception of Reparation Machinery

1. Name of custody works.
Government, Railway Tadotsu Repair Shop.
Shikoku Railway Div. workshop.

2. Location Tadotsu Nakatado-gun Kagawa-ken.

3. Name of machinery and Inventory No.
Name of machinery Inventory No.

Remarks

Radial drilling machine.	17-7(9)-1	Belonged to Ono Branch workshop, Kure Naval workshop.
Lathe	17-7(9)-2	Same
Lathe	17-7(9)-3	Same

4. Quantity.

3

5. Present purpose.

Repair railroad cars and railroad maintenance.

6. Reason for omit confiscation.

a) Radial drilling machine 17-7(9)-1.

That drill is used for drilling large plates & angle irons, for construction of stations & harbour facilities, as there are no other drill of such kind, it will be of great loss if it is removed.

b) Lathe 17-7(9)-2

That machine is now using for cutting driving wheel axle of engine, leading and trailing wheel axle, axle of tender and large parts, the efficiency will be greatly reduced about 80 % and after the removal, working efficiency will be greatly reduced.

c) Little lathe 17-7(9)-3

The machine is not being used owing to short of parts, and journal consumption, but after repairing we intend to use it to cuttools and small pins.
