Private Rice Dealers Indignant At Postponement of Opening of Business; Claim of Indemnity From Government Under Consideration.

A considerable time will still be needed before completion of preparations for transferring the Government-operated rice distribution centers to private rice shops especially establishment of a Government-operated freightage pooling machinery. Accordingly the opening of private rice shops set for March 1 will be postponed to April 1 by revising shortly the related Government Ordinance to that effect. Thereupon private rice dealers excepting those connected with the Food Corporation are strongly opposed to the contemplated postponement saying that one month's postponement would positively spell not only a breach of the public promise on the part of the Government but a matter of life or death to the registered rice dealers who would be compelled to do no business for a month more. In this connection the Tokyo-to Federation of Rice Retailors Associations composed of non-Food Corporation line rice dealers in Tokyo-to is to hold an emergency general meeting on February 17 in order to work out an appropriate counter-measure and the Federation is showing a firm stand to claim indemnity from the Government depending on an attitude to be taken by the Food Agency. On the other hand the All-Japan Rice Dealers Federation (old rice dealers) is to determine its attitude on the issue shortly at its officers' meeting and is said to follow the Tokyo-to Federation's example in all probability.

Newly-opened rice shops in Tokyo number approximately 1,400, of whom the majority are those who have changed their business. Besides, those who wished to be registered as a private rice dealer had to prepare a store, equipment and the like within last December, so that many of them borrowed a fund necessary for the change of business at a high rate of interest or disposed of the goods in which they had dealt and since then they have been jobless for three months in making preparations for the new business. Moreover, being ordered to carry rice to consumers' households for improvement of service they had to have at least two employees on the average. The Tokyo-to Rice Retailors Federation says that under these circumstances one month's postponement would give a total of damages amounting to about ¥50 million to the new rice dealers throughout the Metropolis including house rent, maintenance expenses, wages, etc.

In addition, there is left a delicate matter of feeling between the Government-operated ration centers and consumers who voted for new rice dealers. To cite a few instances, even at present some housewives are asking new rice dealers to receive rations from ration centers in

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

their place for they are reluctant to go there; some households are desiring at least to have coupons handled by new shops and some consumers are strongly opposed to the postponement saying it would be unbearable to feel awkward for another month. It is also a breach of the promise on the part of the trade, so that some members of the Tokyo-to Federation are going so far as to say that if they could not begin business as prearranged they would have no word to apologize for it and so the Food Agency should assume the responsibility as they also are prepared to commit "harakiri" (disembowelment).

Although the Food Agency has not yet officially announced the postponement a trouble is expected to rise before the opening of business, the appointed day being near at hand.

Chairman Yamada of the Tokyo-to Federation of Rice Retailors Associations says: "Approximately 40 representatives of the trade petitioned the Food Agency toward the beginning of this month and were relieved at a promise given by the Agency to begin business without fail on March 1 as scheduled. Therefore if the opening of business should be postponed it would be a severe blow spiritually as well as economically. Some members of the Tokyo-to Federation say that they might not be able to live at the present place, for they have no word to apologize to their customers. At a general meeting firery arguments are expected. Keeping close contact with the All-Japan Rice Dealers Federation we are determined to claim indemnity contingent on results".

General Affairs Bureau Chief Kiyoi of the Food Agency says: "Because of delay in making an inventory of the Food Corporation to be closed as well as necessity to establish a Government- operated freightage pooling machinery it has become difficult to let private rice shops begin business on March 1, so that against our will we have decided to postpone it to April 1. We hear of the opposite views of the trade but in these circumstances we have no other alternative then to postpone the opening of business".

Angry at
Postponement of Opening Date for "Private Operation"

Rice Retailers [Indemnity under Consideration]

The opening ~~date~~ of private rice retailers stores on 1 March has been postponed to 1 April due to considerable time required ~~for the change over~~ to settle the problem of pooling system for transportation and other expense and other problems arising out from the change over. This change in opening date will be made in the ministry's order but [One month's delay means breaking of official agreement made with the registered consumers and as for the retailers it would mean suspension of operation and ~~problem~~ matter of life & death.] is being said by all rice retailers except those who had been with the Kodan and ~~one~~ there is a move among the retailers to demand indemnity from the government.

REGISTRATION FOR WHOLESALE RICE-SHOPS STARTS ON 15TH (February)

To be voted by retail rice-shops;
about 20 shops expected to be elected.

For 23 wards - Following the election of private retail rice-shops, the registration for wholesale rice-shops is slated to be held from (February) 15th through 21st, and in this connection, a serious election campaign for rice-shops has already been under way for the second time. Out of 32 wholesalers in Tokyo prefecture who registered for the election by the deadline of January 14th, there were one refusal and one amalgamation, making the total 30 as of February 1st (consisting of eight old Food Corporation Agents and 22 new aspirants), and one half of the total are found concentrated in the heart of the metropolis, such as Nihonbashi (eight), Kyobashi (four), Kanda (three), Koto and Shinagawa (two each) and Meguro, Setagaya, Shibuya, Nakano, Toshima, Arakawa, Itabashi, Katsushika and Taito (one each).

Because of a bond of ¥7,000,000 being required to be the candidacy, a majority of the candidates have been registered in the capacity of a corporate body. This election is to be conducted in such manner that 3300 private retail rice-shops already qualified and 850 bread-makers having one vote each, and 1900 noodle retail shops one quarter of a vote each are to cast a vote for a wholesale rice-shop of their own choosing. In the case of the metropolis however, at least 120 votes must be secured for the qualification, and therefore a big scale of election campaign has been staged in hopes of winning the favor of whole populace of Tokyo prefecture by means of newspaper ads, leaflets, posters and door-to- door visits. Above all, most serious are the campaigns within 23 wards, and therefore some of the candidates are said to have carried their campaign strategy, ~~working two in company~~, over into three Tama-guns where the rate of competition is comparatively low, because of only 2 candidates, with the dual puposes of greeting New Year by the old calender (note: New Year by the old calender which falls on February, is generally observed by village-folks) and of expressing congratulations for their success in the last election, aiming to collect votes to their account. It is expected, however, that about 20 wholesalers will be elected in Tokyo prefecture.

Meanwhile, in connection with the registration for the private retail rice-shops, the Food Section of the Tokyo pref. Office is thronged with complaints day after day by those failed in the last election saying "just by the difference of 10 votes, I was disqulified", or "please do something for me, as there was none elected in our town-district". And there are some others who resort to bringing in letters of introduction with the signatures of ward assemblymen or books carrying signatures, but the pref. office is quoted as saying that their policy was set not to approve any 'exception'.

15日から米問屋登録

業者が選挙 當選は廿軒くらい

23区

民営米屋の選挙に続いて十五日から二十一日まで米問屋の登録が行われるが、また深刻な米屋選挙第二次戦が始っている。この米問屋は一月十四日の締切日までに名乗りを上げた三十二軒のうち辞退、合併が各一軒あって一日現在、三十軒（うち旧公団事務所八、新開業二十二）だが、その半数が都心の日本橋（八）京橋（四）神田（三）に集中、二十三区内では江東、品川が各二軒のほかは目黒、世田谷、渋谷、中野、豊島、荒川、板橋、葛飾、台東の各区に一軒ずつとなっている。

立候補には七百万円の保証金がいるため、大半は法人組織で出ているが、この選挙はすでに合格した民営米屋三千三百店のほか、パン製造業者八百五十店が各一票、メン小売店千九百店が各四分の一票を持ち、自分の問屋を選ぶわけだが、都の場合最低百二十票をとらないと失格するので新聞広告、チラシ、ポスター、戸別訪問などいずれも全都内を対象にした大掛りな選挙戦を展開している。とくに二十三区内は激戦なので、立候補一軒で比較的競争率の低い三多摩へ進出、旧正月の年賀と当選祝いを兼ねて票を集める戦術に出ている都心の業者もあるという。都は当選は二十軒程度と予想している。

なお、民営米屋の登録で「十票の差で失格した」とか、「一町内に一店も合格しなかったから何とかしてくれ」などと落ちた店からの陳情が連日都食料課に殺到、中には区議の紹介や、署名簿を持ち込む連中もあるが、都では「特例」は認めない方針だといっている。

中学対抗駅伝 中央区では三日午後一時から第四回同区中学校対抗駅伝競走を催す。コースは区役所前から区内を一巡する

ECONOMIC AND SCIENTIFIC SECTION
Price and Distribution Division

Date: 1 December 1950

PRICE MEMO: Increase in Sugar Prices

Schedule of Sugar Prices
(¥ per picul of 60 Kg.)

Selling Price of:	Refined	Half-Refined	Crude	Brown
Kodan to Wholesaler	4,619	4,157	3,234	2,772
Wholesaler to Retailer	4,829	4,362	3,430	2,951
Retailer to Consumer	5,100	4,640	3,700	3,200

Domestic refined Beet Sugar, Manufacturer's selling price: ¥4,700 per picul

REASON FOR ACTION: The Oilstuff and Sugar Distribution Kodan is to be liquidated as of 31 March 1951. It is proposed to balance the Kodan account at that date, when its remaining inventory is transferred to the Staple Food Account of the Price Agency. World sugar prices experienced a sharp upsurge following the outbreak of the Korean war. Contracts for Cuban raw sugar, for example, which in June were being negotiated at $107 per metric ton CIF Japan, rose to a peak of $151. Although a slight decline from the peak has been experienced, deliveries in the period covered by this price action will be made at prices substantially higher than those upon which current domestic prices of sugar are based. Kodan stocks of refined sugar being carried at a book value of ¥3,395 per picul ($148 per M/T) are being supplemented by imports to cost ¥3,748 per picul ($173.50 per M/T). Half-refined sugar, carried at ¥3,016 per picul ($156 per M/T) is being replaced at ¥ 3,715 per picul ($172 per M/T). Cuban sugar which has a book value of ¥ 2,257 per picul ($104 per M/T) is now being contracted for at ¥ 3,132 per picul ($145 per M/T). To avoid converting the Kodan's present surplus of ¥406 million (as of 30 November) to a serious deficit, it is necessary to increase domestic prices of sugar to offset the increase in import costs.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

MEMORANDUM FOR RECORD 7 December 1950

SUBJECT: Present Situation of Sugar

1. Beginning in December domestic consumer prices of sugar will be increased from ¥ 4,250 per 60 KG picul to ¥ 5,100 per picul in order to pay for sugar bought at higher prices after the beginning of the Korean war. The world price of white unrefined crystal sugar (BWC) rose from £107.00 per ton prior to the Korean war to £151.00 per metric ton. World prices have declined to approximately £135.00 per ton for January deliveries of Cuban sugar. The present price is a pooled price which is accomplished through the Government kodan. The pooling takes care of the difference between producers price and domestic sugar and the price of imported sugar. It also takes care of the tax imposed on Japanese producers of sugar (Approximately ¥ 2,000 per picul, for 60 KG). Tax of ¥ 1,000 per picul is scheduled to be added to the consumer price of sugar beginning 1 April 1951. Following is the schedule of inports of sugar and the amount of the monthly carry-over:

	December	January
Carry over from last month	9,240	28,948
Imported raw crystal (BWC)	23,300	29,162
Previous Imports refined in Japan	24,200	24,200
Imported crude (not figured in Dec or Jan Rations)	18,900	22,700
Domestic purchases of Hokkaido beet	6,400	1,700
Less in handling (subtract)	270	270
Total supply	62,870	83,760
Ration distribution	33,922	40,000
Carry-over to next month	28,948	43,760

2. The above figures do not include unused sugar allocated for industrial use during the previous months (estimated at 30,000 tons) and the sugar being refined in Japan (estimated at 10,000 tons).

3. The present supply of sugar and rationing plans represent no radical increases or decreases.

INFORMATION MEMORANDUM: 23 October 1950

SUBJECT: Government Purchasing and Consumer Prices for Hokkaido White Potatoes and Japan Sweet Potatoes - 1950 Crop

The official purchasing and consumer prices for Hokkaido white potatoes and Japan sweet potatoes in the 1950 crop are as listed below:

Government Purchasing Prices (10 Kan):

Type	Ex platform or its corresponding place	Other Places
Hokkaido White Potatoes 1/		
"Danshaku" per 10 Kan (Grade I)	¥ 200	-
"Benimoru" per 10 Kan (Grade II)	¥ 160	
Sweet Potatoes		
1st Grade per 10 kan	¥ 200	¥ 190
2nd Grade per 10 kan	175	165

1/ All government purchases shall be of 25 momme or larger in size.

Consumer Prices:

Type	Large Consuming Area 2/ Per 10 kg.	Per 10 Kan	Other Areas Per 10 kg.	Per 10 kan
Hokkaido White Potatoes 3/				
"Danshaku"	¥ 80	-¥ 300.00	¥ 65	¥ 243.75
"Benimaru"	65	243.75	50	187.50
Sweet Potatoes				
1st Grade	¥ 80	¥ 300.00	¥ 65	¥ 243.75
2nd Grade	75	281.25	60	225.00

2/ Large consuming areas are defined as follows:

Tokyo Metropolis	25 Wards of Tokyo	Musashino city
Kanagawa Pref.	Yokohama city	Kawasaki city
Aichi Pref.	Nagoya city	
Kyoto Pref.	Kyoto city	
Osaka Pref.	Osaka city	
Hyogo Pref.	Kobe city (defined as Nada, Fukiai, Minato, Minato-Higashi, Hyogo, Hayashida, Suma and Tarumi Wards of former Kobe city)	

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

	Amagasaki, Nishinomiya and Ashiya Cities
Hiroshima Pref.	Hiroshima Pref.
Fukuoka Pref.	Fukuoka, Moji, Yawata, Ogura, Wakamatsu, and Kokura Cities

3/ White Potatoes harvested on and after 1 December 1950, which are to be distributed in Hokkaido, will bear a consumer price of ¥ 90 per 10 kg. or ¥ 337.50 per 10 kan for both "Denshoku" and "Benimaru" types

REASON FOR ACTION: The Hokkaido crop of white potatoes and the Japan crop of sweet potatoes are now being harvested. The Japanese Government had a 1950 potato purchasing program of 400 million kan. Of this amount 80 million kan were allotted to the Japan Proper white potato crop; however, only 170,000 kan were sold to the Government under this purchasing plan. The Government is now prepared to purchase 25 million kan of white potatoes in Hokkaido and 150 million kan of sweet potatoes in Japan Proper; however, the Price Agency believes that the farmers will offer quantities of potatoes substantially below these figures for sale to the Government. The Japanese Government is committed to purchase a portion of the potato crop in order to offer a support to farmers who have grown potatoes if they care to avail themselves of this outlet. A deficit is expected on this program, and about 1.7 billion yen are budgeted to take care of the loss. A small deficit was sustained on the Japan Proper white potato purchases and it is estimated that the total deficit will amount to 1.3 billion yen, if the programmed amount of potatoes is sold to the Government. Any reduction is quantity sold will reduce the amount of the deficit. Supporting data for this position are available on request. This is a continuation of the transition to decontrol of the 1951 potato crop.

SUPPLIES OF PETROLEUM PRODUCTS FOR JAPANESE FISHERIES

A Press Conference Statement
Made on 6 October 1950
by
Mr W. C. Herrington
Chief, Fisheries Division
Natural Resources Section

Petroleum products together with cotton and manila fiber make up the principal materials which must be imported for use of the Japanese fishermen. Petroleum is purchased and imported into Japan with funds made available by the United States for the rehabilitation of the Japanese economy. Amounts of such products allocated to fisheries have increased progressively since the Surrender until in 1950 they are greater than the amount used by Japanese fishermen operating before the war.

Even though more petroleum has been made available to the fishermen, numerous petitions for higher allocations have been filed by fishermen's groups. This situation arises from the fact that during the past 10 years, in spite of the war and its aftereffects, more and more Japanese fishing boats have had engines installed, so that the total horsepower of the fishing fleet now is about 70 percent greater than in 1939.

In spite of the increased horsepower of the modern Japanese fleet, however, over-all production has not increased. In many instances the growth in the size of the motorized fleet has resulted in overfishing the coastal fishery resources. Under such conditions, further increases in fishing intensity would serve primarily to heighten the competion between boats for the limited amount of fish available, resulting in higher costs without a commensurate rise in returns to the fishermen. In addition catches during succeeding years would decrease because of depletion of the fish populations.

During the past year, there has been a considerable increase in the number of petitions for additional petroleum. To answer these requests, the Natural Resources Section has prepared the following statement with regard to increased allocations of petroleum:

Statement Regarding Petroleum Allocations

"1. Allocation of petroleum products sufficient to meet the requirements of the fisheries will within the limits of supplies available in Japan be approved in the following cases:

a. Where sustained or increased fishing effort will result in maintaining or enlarging production without overfishing the resource.

b. Where overfished resources have been protected adequately against continued overfishing by (1) enactment and enforcement of effective conservation regulations such as reduction in the number of boats,

COPY

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(2) limitation of the fishing season or catch, or (3) other suitable measures.

"2. Increases in the allocation of petroleum products for fisheries will not be approved where there is evidence of continued overfishing caused by lack of adequate conservation regulations or effective enforcement of such regulations.

a. Higher allocations in such cases would serve primarily to encourage continued and increasing overfishing. Under such conditions, fish production over the full year could not be increased materially by additional fising effort made possible by more petroleum while fishing costs would be maintained and increased. Furthermore, the catches during succeeding years would be seriously reduced. This would only aggravate the economic and financial problem presently confronting these fisheries.

b. Petroleum brought into Japan is paid for out of United States appropriations. There can be ro justification for increasing the use of such products where increases will serve primarily to intensify Japan's already serious overfishing problem.

"3. To obtain increases in petroleum allocations the Japanese Fisheries Agency must submit satisfactory evidence that the requested increases meet the conditions specified under item 1 above."

Field checks made by members of Natural Resources Section have shown that under the conditions specified in this statement a number of fisheries, such as these for mackerel and tuna, probably will qualify for increases in allocation of petroleum. However, the Fisheries Agency has not yet submitted specific requests for such increases together with supporting data.

The Pirector of the Fisheries Agency has informed me that the Agency agrees with these principles for allocation of petroleum and will cooperate fully in putting them into effect.

DISPOSITION FORM

FILE NO. KE 333 SUBJECT: [illegible] Carriers on Trains

TO: Deputy Chief KaCAR FROM: Econ Section DATE: 31 Jul 50 COMMENT NO.1

1. Concurrently with the development of the Korean War there has been a large increase in black marketing of rice, coupled with increase in black market price.

2. The upping of price and its probable maintenance at a high level by black market brokers will undoubtedly tend to induce hoarding by the people who will ascribe the high price to scarcity of supply.

3. One of the common means of bringing black market rice to the metropolitan areas is for gangs of "carriers" under boss supervision to go to producing areas and bring rice back by train.

4. It is requested that KaCAR-DACs traveling by train, advise station masters to arrange for police to raid trains whenever they note undue use of the train by these carriers.

5. This is best done by having your interpreter present your card to a station master with the request that he contact police at once and arrange for police to raid train at next feasible point.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Extract: NRS Weekly Summary #249, 16-22 July 1950

Specifications for Government Purchase of 1950 White Potatoes and Disposition Thereof a/

Food Agency,
Ministry of Agriculture and Forestry
July 8, 1950

In accordance with the resolution adopted at the Cabinet Meeting on January 9, 1950, subject: 'Re: Continuance of Government Purchase of 1950 Potatoes', as well as with the Instructions No. 1,501-SHOKURYO, dated: February 27, 1950, subject: 'List for Dealing with 1950 Potatoes', the Government shall purchase the potatoes from the producers on request and distribute the same among consumers. The following are the specifications pertaining thereto.

Descriptions

1. Time of Government Purchase:

Beginning: July 21, 1950
Ending: September 30, 1950

2. Purchasing places:

Purchasing places shall be the places designated by the government (Local food office chiefs shall be authorized to designate the purchasing places with respect to collecting places in producing regions, the nearest railway stations, or other places similar thereto, in accordance with the established base taking into account the production, shipping, etc.)

3. Purchasing price:

Standard of quantity of one piece shall be 25 momme, and purchasing prices shall be as follows:

Variety	The nearest railway stations or other similar thereto	Other places
Danshaku	¥200	¥190
Benimaru	¥160	¥150

4. Purchasing plan:

Monthly purchasing plan shall be instructed by the Minister of Agriculture and Forestry in accordance with monthly plan for distribution of potatoes for food use established otherwise. Respective prefectural governors, chiefs of food offices, and headmen of cities, towns,

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

or villages shall map out the monthly purchasing plan (or 10-day period purchasing plan, if necessary) and give notice thereof to the producers and shall induce the producers to ship their potatoes according to the established plan.

5. Distributing agencies and distributing methods:

(1) These potatoes purchased by the government shall be sold to the Potato Bureau of the Food Distribution Kodan at the respective purchasing places stated above.

The Potato Bureau shall sell these potatoes consumed by the consumers in the same regions to the Distribution Business Bureau or to the actual consumers at the said places and with respect to these potatoes to be transported to a long distance, the Potato Bureau shall transport the same to the designated place and then sell the same thereat.

(2) Potatoes distributed for food use shall be handled by the distributing stations at the lowest level under the supervision of the Food Distribution Kodan.

(3) Method of distribution of potatoes for food use shall be made by means of purchasing pass-books as ever, but some steps shall be taken so that consumers may be allowed as far as possible to purchase at any time like.

6. Consumers' price:

Consumers' prices shall be discriminated as follows according to the size of consuming areas:

	Danshaku		Beinasu	
	per 10 kg	per 10 kan	per 10 kg	per 10 kan
Great consuming centers	¥80.00	¥300.00	¥65.00	¥243.75
Other areas	¥65.00	¥243.75	¥50.00	¥187.50

Note:

Great consuming centers are as follows:

Tokyo-Yokohama Area
Nagoya City
Kyoto-Osaka-Kobe Area
Hiroshima City
Fukuoka City and Northern Kyushu Area

Particulars are shown in the attached table.

a/ As to the case of potatoes from Hokkaido, the specifications shall otherwise be established.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

COPY

Date : 15 August, 1950.

25 Shokuryo No. 6794

Subject: Concerning food ration to the personnel of the National Police Reserve.

To : Chiefs of the Food Offices.

From : Director of the Foods Agency.

The National Police Reserve Ordinance has been promulgated at this time. In case where the application for the staple food ration to the personnel of the Police Reserve is submitted to you by the Chief of the Headquarters of Police Reserve in your area, ration staple foods by delivering staple food special purchase coupon A for the time being and sell the corresponding amount of staple foods to the Food Distribution Kodan after the close liaison with the Chief of the Headquarters of National Rural Police (Chief of Education Section) of your Prefecture (Do, To or Fu).

Moreover, standard ration amount per day per capita has not been decided but the standard amount will be 525 polished rice gramme (about 3.7 go) for the present, and rice and barley and wheat products will be appropriated if circumstances allow.

25 Shokuryo No. 6794

Subject : Concerning food ration to the personnel of the National Police Reserve.

To : Governor of T, Do, Fu or prefecture.

From : Director of the Foods Agency

As regards the aforesaid subject, notification as the annexed copy has been sent to the Chief of the Food Office. It is desired that you will understand this and ration food other than staple foods such as sugar and oil without fail after the close liaison with the Chief of the Headquarters of National Rural Police of your Prefecture (Do, To, or Fu).

As regards sugar, 10 gram per day per capita as standard from the allocation for necessaries is to be rationed for the present.

As regards oil, oil ration coupon of 3.5 gramme per day per capita as standard is to be delivered and oil is to be rationed using the remaining amount of general family ration and others. In case where there is no remaining amount, divert oil for general family ration and others for the time being and the application for allocation for replenishing the amount is to be made to this agency.

Remarks: The cost of controlled items are estimated by the official prices and that of the decontrolled items by the latest wholesale market prices.

2) Procurement of provisions

In order to secure the necessary amount of food, it is appropriate to contract with the suppliers specified in the list per attached, who have high reliability and sufficient competency for the work. It is desirable to let two or more suppliers of the same item to furnish

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

COPY

alternately for a week each, for the purpose of eliminating monopoly and stimulate competion among them in supplying the food. Judging from the menu for a week previously shown them, each supplier knows the amount of food he should supply, and thus can make arrangements to collect the necessary amount with confidence. The number of the suppliers in the list are enough for the smooth operation of supply.

3) Supply of coal

The amount of coal needed for cooking is roughly estimated at 5 tons a month, although it must be decided upon according to the size of the boiler. Competitive bidding by the listed coal-suppliers is desirable.

4) Kitchen personnel

a.	Chief cook	1
	Clerk	5 (including two nutrition experts)
	Cook	5 (including two nutrition experts)
	Assistant cook	51
b.	Boiler-man	2
	Assistant boiler-man	2

PRICE AND DISTRIBUTION DIVISION
Food Branch

25 May 1950

MEMO FOR: The Record

SUBJECT: Substitute Rice Storage Program

1. The 1949 substitute rice storage program was completed on 30 April 1950 with the storage of 850,000 metric tons of indigenous rice. This rice will be released for distribution during the period June through October and will permit the maintenance of the staple ration with a rice component of 55% during the summer months. This amount of rice in the ration will have a significant effect on keeping the blackmarket price of rice at a low level, thus reducing the inflationary pressures of a poor-quality ration.

2. This program of releasing imported cereals in exchange for the storage of indigenous rice has been expanded from 217,500 tons during the 1946 rice year, to 523,000 in 1947, 800,000 tons in 1948 and 850,000 in 1949. The success of the rice exchange program has been amply demonstrated during the past three years by the distribution of this stored rice during the summer months when rice stocks are normally low. Through the use of this technique it was possible to maintain a better balance between rice and other cereals in the diet.

3. Storage of 1949 rice by prefectures as completed on 30 April is as follows:

(Unit: Metric Tons)

Prefecture	Amount
Hokkaido	43,000
Aomori	12,600
Iwate	13,600
Miyagi	20,000

Kanto Liaison & Coordination Office

Japanese Government

KLO No. 702 13 April 1950

TO : Chief, Kanto Civil Affairs Region
(Att'n : Economic Section)

FROM : Kanto Liaison & Coordination Office

SUBJECT: Handling Procedures of Waste Rice Etc.

Submitted herewith for information is the content of notification issued by the Food Agency, Japanese Government to Prefectural Governors under date of 10 April 1950, file No. 25 Shyokuryo 2894.

KANTO
Liaison & Coordination Office

K. Imajō for
K. Narita Director

(G. Takizawa, officer in charge)

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

~~Plan for~~ Handling Precedures of Waste Rice Etc.

31 March, 1950

Purchasing Section
Food Agency

1. Rice to be purchased.

Brown rice under the fifth grade (hereinafter referred to as "waste brown rice") and immatured rice shall be purchased. The standard and the inspection methods shall be otherwise determined.

2. Purchasing price.

The purchasing price shall be lower than the controlled selling price for producers which is otherwise to be determined. Such purchasing price shall be decided by the chief of a food office according to the qualities, by taking into account the opinion based on the consultation between the producer and the consumer, and by grading waste rice and immatured rice.

3. Methods of purchasing.

(1) Any producer who intends to sell waste rice and immatured rice shall apply to that effect to the designated collecting agency under the provision of Article 5 of the Food Management Law Enforcement Ordinance.

(2) Any collecting agency shall sum up the applied quantities stated above in (1), and when a decision was made on consumers, uses, selling prices and quanitties after the consultation with the consumers who want to purchase or an organization thereof, the cellecting agency shall submit to the chief of a food office an application for sale stating the quantity wanted to be sold, desired selling price, use and quantities by producers, and a copy of application for purchase by consumer together with an application by prefectural governor.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(3) Waste rice and immatured rice to be purchased shall be limited to those to be used for the following purposes:

(a) Brewing ("miso", "shoyu", malt, mixed liquor):

(b) Food processing (additional ration to laborer, school lunch, relief of the needy):

(c) Feeds:

(d) Other purposes deemed especially nacessary.

In the use stated in the preceding paragraph there shall not be involved any use in restaurants or eating houses for business purpose nor shall any be involved to be available for are in the production of sushi or confection for general open sale.

(4) The chief of a food office shall, upon receipt of an application for sale, confirm the consumers, prices, uses, quantities etc., and if he deems that such are appropriate, he shall purchase and inform collecting agency concerned, food inspecting official, consumer etc. of that effect.

(5) Any food inspecting official informed of the information stated in the preceding paragraph shall keep a contract with the collecting agency and purchase after the confirmation of quantities by producers. The purchasing method in the case of an ordinary food delivery shall be applicable.

4. Measures to be taken after the purchase.

Waste rice and immatured rice shall be sold immediately after the purchase to the consumers determined deforehand.

5. Selling price.

The selling price shall be the purchasing price plus the price datermined otherwise.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

6. Others.

(1) Waste rice and immatured rice purchased and sold under these measures shall be handled out of the frame of delivery and sale allocations.

(2) The chief of a food office shall submit a report every month on purchase and sale of waste rice and immatured rice to the chief of the Purchasing Section, Food Agency, in accordance with the form attached hereto.

(3) It is, of course, stipulated in the proyisions of Food Management Law that any person can never sell the waste rice and inwatured rice except through the channel of the government.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013
