A WORD OF INTRODUCTION

S. C. LEUNG

All who have taken any part whatsoever in sociological studies realize the significant function of statistics therein. Many are prone to think that statistics tend to weigh more heavily the quantitative rather than the qualitative. But this is not the fault of statistics, but rather our abuse of statistics. If we have a clear knowledge of statistical methods and accurate data we can examine and analyze our work and discover, at least its tendencies. This is one contribution of statistics to social enterprises. Our problem, in the Y.M.C.A., therefore, is not on the question of the need of statistics or not, but rather on what statistics to gather and how to evaluate them.

The China Movement, has once a year made up a large statistical sheet summarizing the reports of the local associations. This year we are changing the report in three essentials.

First, we are issuing the report in the form of a booklet. With the increase in the number of items reported on, and the number of associations the size of the statistical sheet has grown until it is unwieldy. This new form will be more convenient for one who wishes to read or consult the statistics as returned by the local associations.

Second, in the former sheet form, it was inconvenient to give any explanation or analysis of the data, so that one reading or studying the tables could not get much of value therefrom. This year we have added a section of interpretation and analysis of the data as returned by the local centers.

Third, besides the regular annual statistical report and its interpretation data and charts are presented to show the tendencies in our work in certain aspects from 1914-1931,

We trust that the publication of this booklet will be of assistance in bringing to the friends of the movement a better realization of our work. Further we hope that it will cause the secretaries in the local centers to realize the importance of this task, and so take effort to give accurate entries on the annual statistical forms. At the same time promptness in giving the returns at the beginning of the year is needed. The value of a Yearbook is based on accurate reporting and prompt publication. We ask for greater cooperation in the future.

We realize that the keeping of statistics and compiling reports is a very complicated and intricate task unless proper forms are available. With work as broad as that in the Y.M.C.A., complicity is unavoidable, though it does give much annoyance to the secretary. But we can reduce this trouble, by the use of uniform and complete record forms. The National Committee has already asked the cooperation of the local associations in the preparation of standard record and report forms. We again ask that secretaries assist us in this task, so that we may have adequate and yet simple methods to care for this intricate task of gathering and analyzing the statistics of our work.

The preparation of this Yearbook and the analysis of the data returned by the local associations has been carried out by Dr. Ralph M. Hogan, who has just joined the National Committee staff as Secretary for Training Work. He is also working out new forms for the recording and reporting of the activities of local associations, so that for future Yearbooks more adequate data may be available for the thorough analysis of the work of the movement in China.

THE 1931 STATISTICAL REPORT

The statistics of the work of the city Y.M.C.A.'s of China as reported by the various local centers are given in Table I. This table takes the place of the sheet report, which has become so large that it is unwieldly for desk use and few offices have enough wall space to accommodate it. Further this report goes beyond the presenting of the mere statistics—as returned by the local associations, in that an attempt is made to analyze the statistics of Table I. Besides the analysis of statistical returns, a roster of the Boards and staff of local associations and the National Committee is given. Two tables, on the work of the National Committee are included.

This section of the Yearbook is given over to the analysis of the 1931 Report. It first deals with the facts as presented for the year 1931. Secondly it makes a study of certain items using the totals for all cities as the unit over the period of 1914-1931 to note the changes in the total work with these years.

Of the 46 centers in which Y.M.C.A. work has been carried on in the past few years, some six centers either made no report, or gave such meager returns that they are not included in the table as presented here. Three of these centers are in Manchuria; namely, Mukden, Kirin, and Kaiyuan. Naturally with the situation such as it is there, one can understand that their reports are incomplete. Two other centers, Chowtsun and Yungtai have been closed during the past year. The sixth center, not reporting is the new association at Kiukiang which was still in the process of being organized at the time the reports were due.

A. Analysis of the Facts for 1931

In dealing with the statistics for 1931, we first present Table II as a summary of the Program Contacts and Hours of Work for all cities for the whole year. This table shows most concisely the volume and nature of the work of the city associations. It will pay close scrutiny. Here one is struck with the enormous number of program contact made in 1931, a total of 6,866,289 reported. Further the length of these contacts comes to a grand total of 11,985,059 hours. Each contact averages $1\frac{3}{4}$ hours.

Examination of the table in connection with the program items for Table I shows how this table was made up. For certain of the items estimates of the number or length of contact had to be made. The following are some examples. Day school students have 200 daily contacts per years of some 6 hours per day. Dormitory residents have an average of 20 days residence each, as was found in the 1930 Special Study.

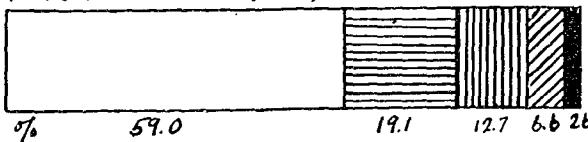

Chart I has been prepared from Table II to show the nature of the distribution of the "Output" of the Associations. Here one is struck by the fact that "educational" looms up as our largest kind of output, and that direct "religious" work is the smallest in volume. While the writer believes most fully in the broader religious educational program and feels very stronger that character building values can and do come from educational classes and physical classes or a good dormitory, yet he would urge upon all Board members and secretaries that the uniqueness of the Y.M.C.A. comes in our possessing and propagating the Christian experience as learnt from the life and teachings of Jesus.

CHART I 第壹圖表 PROGRAM OUTPUT 事業成績

Table III is a computation of the total number of hours the various personnel groups gave to Y.M.C.A. work in 1931. This table was made up by calculating the number of hours given to Y.M.C.A. work for each type of volunteers, using the 1930 special study figures as a basis of the number of hours. The hours used for each secretary and full time worker was 2,400 per years. For the paid teachers 550 hours per teacher was used, as such a figure was indicated from the 1930 Special Study. Chart II presents the facts of this table graphically.

第三表
TABLE III

青年會各分部工作者之服務時間
Hours of Service by Various Groups of Workers in the Y.M.C.A.

分部 Groups	全年時間 Total Yearly Hours	百分數 Percentage
義務員 Volunteers	297,000	19.1
中國幹事 Chinese Secretaries	633,600	40.8
西幹事 Foreign Secretary	62,400	4.0
教員 Paid Teachers	242,500	15.5
職員 Clerks	319,200	20.6
總數 Total	1,554,700	100.0

CHART II 第二圖表

From Table I, Column 41, we note the expenditures for 1931 to be \$1,087,584. Dividing this by 6,866,286, the total attendance or contacts we get \$.158 as the cost of each contact. Dividing by 11,935,059, the number of program hours we get \$.091, the cost per program hour.

On using the total number of personnel hours, 1,554,700, as the divisor we find that for each hour of work by a secretary, volunteer or other, that we get 4.4 contacts. For program hours, we find that one personnel hour yields 7.7 program hours. Using the total membership as a base, this gives an average of 189 contacts per member, and 329 program hours per member.

It would be well if each association would analyze their program output and personnel hours as has been done in above paragraph.

Table IV presents an analysis of certain of the statistics as given in Table I. Column 1 of this table denotes the three groups into which the associations are divided by the symbols I, II, and III. This grouping of the cities was done on the basis of population, staff, finances and number of members. In general, cities of Group I are those of 500,000 or more population, cities of Group II are those with 200,000 to less than 500,000 population, while III refers to those cities with less than 200,000 population. Only when the other factors concerned were of unusual bearing were the population standards violated. Hereafter, the facts for each of these three groups of cities will be given separately, as well as for the country as a whole.

The other columns are, in general, ratios of related columns of Table I. Thus in Column 2 of Table IV we have presented the number of members in each local Y. M. C. A. out of each one thousand of the population of the city concerned. The figures given in that column were obtained by dividing the figures for each city given in Column 2 of Table I by the figures in Column 11 of that table and then multiplied by 1,000 in order to make that number the unit of measurement. This gives us the permeation of membership on the same basis so that all cities may be compared directly. All of the ratios were obtained by means of a slide rule, but this is sufficiently accurate for the kind of data dealt with here.

All of the other ratios in Table IV are obtained in a similar manner from the appropriate columns of Table I. Most of these are so obvious that it is not necessary to detail here. Perhaps a word of explanation as to "participation rate" as used in columns 6 and 7 of Table IV is needed. Here the entries for each city as given in Columns 63 (total attendance at Religious Meetings) and 127 (Total attendance at Socials) of Table I were divided by the number of members for each city as given in Column 11 of Table I. Column 17 of Table IV was obtained by dividing the number in Column 54 (Total attendance at Bible Classes) by the number in Column 53 (Total Enrollment). This gives the average attendance of each Bible Class member enrolled.

Table V shows clearly that the three groups differ in a number of aspects. Perhaps size is the main difference. In this part of the analysis, the reports of 35 cities were used in most instances.

Table VI presents the statistics of Column 2 (number of members per 1,000 population) of Table IV in a frequency table, divided into the three groups of cities and by "all cities". Similar tables were set up for the remaining 16 columns of Table IV but lack of space prevents their presentation here.

TABLE VI
Permeation of Membership
會員參和表

No. of Members Per 1,000 population	No. of Cities. 城市數目			
	Group I	Group II	Group III	All
每千市民中之會員數	第一組	第二組	第三組	總計

This tabulation should be carefully studied by the reader, to note the significance of the groupings. A more detailed study of the size and distribution of the work and statistics thereof, was made in the 1930 Special Study, to which the reader is referred, for an analysis of city by city distribution of work. This should be done by each city for their own statistics.

It is hoped that each local association, both board and staff will study very carefully the results presented in Table VII. While present practice is not to be accepted as a standard, yet present practice does show what, at least, can be accomplished in certain centers. Each city should note the group within which it is placed (Table IV Column 1).

Then from Table IV the accomplishment of the local association in each of the items referred to therein can be found. These figures should then be compared with the proper row in Table VII, so that the local association's rank can be noted. For example, in Table IV Column 2 we find a certain Group I city has 1.7 member per 1,000 population. On reference to Table VII, line (or row) 1, we find that this is slightly less than the median for group I cities (1.8 member per 1,000 population). This shows that the city under analysis does not come quite up to the middle in rank with cities of its groups. At this point it is necessary to study the causes for this. In the city under analysis, it happened that during 1931, it was flooded, and indeed it was a wonder that it ranked so high in its group for membership permeation. In many cases when the study of the ranking and the under-lying causes are made, it will be found possible for the local Board and staff to devise means to improve the quality and quantity of the work of their association. It is hoped that the facts presented in Table VII will challenge each and every association to analyse their own work and then to study ways and means for improving their output.

Certain facts in Table VII may well be emphasized here. In line (or row) 1 we note the difference in membership permeation between the cities of the three groups. Three-fourths of the cities in Group I, have a lower membership permeation than the lowest fourth of the cities of Group II. Yet from lines 7 and 9, we note that this is not due to lack of staff. As was pointed out in the 1930 Special Study the larger sized cities are not reaching in their membership as large a relative number as are the cities of Groups II and III. Line 6 of Table VII shows a significant difference in the size of local staffs.

Lines 13, 14, and 15 of Table VII analyse certain facts concerning the Bible Classes. Here we note that the cities of Group II are not enrolling as large a per cent of their membership as are the cities of Group I and III. This probably is a staff problem inasmuch as a number of large centers, those in Group I, have a secretary set aside for religious work, and the cities of Group III have only limited building facilities, so that the smaller staff gives proportionately more attention to direct religious work. It would seem that the cities of Group II should address themselves to this problem. From line 15 we note that the median number of times each Bible Class Member attended a Bible Class was 5.7 for the year. This would seem to indicate a very low quality of Bible Class work. Here again we note that the cities of Group II are consistently lower than the cities Groups I and III.

The reader is invited to study through Table VII and note further comparison between the cities of the three groups, inasmuch as space prevents further discussion here.

Also it is hoped that the reader will study the quality and quantity results of the work of the movement as a whole, and of his own city in particular. Each of the 100 columns in Table I would repay detailed analysis through the steps of Table IV and Table VII.

Before leaving this part of the analysis, it might be well to make a few comments on the reports as returned by the local centers. For example, we find that one city reports 471 people joining the church (through the associations' influence, if the fact is reported as called for in the blank) out of a total of 922 for all cities in 1931. Further, one city reports 24,000 of the total of 40,000 total attendance in discussion groups. Another center reports 120 of the total for all cities of 194 lecture campaigns. It may be that above figures describe the true situation in regard to the items mentioned.

There are a number of questions that might be raised as to the validity and reliability of many of the statistics returned. However, it is the plan of the City Division of the National Committee to work out more adequate and satisfactory program records which, if used by the local associations, will enable them to give accurate facts and these promptly at the end of each year. There may be some need of adding other facts to be reported on, and possibly the deletion of some of these now called for. Slowness in reporting has been the bane of this year's report. The chief sinners in this have been a few of the larger centers. It will suffice to say here that the movement in China needs ample and adequate records with sufficient analysis to bring out their real meaning, if it is to be on a satisfactory and sound educational basis, and to meet the concepts of present day religious and social work standards.

B. Comparison of the Work of 1931 with Previous Years

In Table VIII are presented selected items from Annual Statistical Reports covering the period of 1914 to 1931 inclusive. The reason for choosing 1914 for the earliest date was that at the time the table was compiled the earlier records were not available. However for an understanding of the present status of the work in China this date gives all data needed.

Practically all the items reported on this table are shown in graphic form in Charts III to VIII. These charts show so clearly the trend of work during this period that detailed discussion thereof is almost superfluous. Each chart shows somewhat the same characteristic. All show a steady increase from 1914 to 1922, then a decline, to 1927 and since 1927 an increase in all except free school enrollment. For an analysis of the period of 1920-1929 inclusive in terms of relatives the reader is referred to the 1930 Special Study Report.

To those who have followed the many phased revolutionary movement in China, it is easily understood why the decline of 1922-1927 came. But what is almost unconceivable under the still unsettled conditions is the steady rise in the amount of work during the past few years. The income and expenditures for current work in 1931 exceeds that of any previous year in the associations history. 1931 hereafter will be notable in that the local

associations' budgets passed the \$1,000,000.00 point for the first time in the history of the Y.M.C.A. Besides this over \$100,000. was raised for new buildings. The increase in membership is second in amount of acceleration of the items given in the six charts. But the movement is still only 68% of the way to its high membership mark of 1922. It is hoped that 1932 and 1933 will see increased results here.

In Bible Classes, there has been a steady increase the past few years. In many cities the life problem discussion groups are in reality serving the purpose of Bible Study groups and their results should be added to the Bible Study work. It is very important that this phase of our program be carefully considered in the program work of the next few years, especially in the light of the conception of the whole Y.M.C.A. program as a character education process.

It is very interesting that the peaks in the Christian decision curve (1918, 1922, 1928 and 1931) coincide with certain visits of Sherwood Eddy. This would indicate that these Christian decisions were obtained on the basis of an evangelistical appeal, rather than the educational approach of the Bible Class method. That is, the Y.M.C.A. in China, has not as yet put its program on a real religious education basis.

The Popular Education Movement which in 1924 reached its climax had a slight rise in 1928 over the loss of 1927, but since then has declined. While the function of the Y.M.C.A. in this task is mainly that of propaganda, it is possible that here we need to make a renewed effort, with, perhaps, new techniques to interest local communities in the spread of literary.

It is hoped that in future yearbooks more careful analytical studies of other phases of the association work may be presented. Any organization as large as our movement should make, at least, an annual inventory; a continuous survey is better. This should be a practice of future yearbooks. Time and space permit of no further analysis in this first year book.

The report for 1931 shows progress. It gives us hope, as we gird ourselves for the difficult and challenging days ahead. May God give us the will and power to carry this work to increasing efficiency that his Kingdom may come on earth.

吾人希望此後年刊中之分析研究之記錄中，更能記載比較詳細之青年會事工。無論何種機關，其運動工作有若青年會之巨者，至少應創制一每年繼續之詳細調查。以後每年之年刊希望能實行辦到此事。至於他項分析，則限於本刊篇幅，不克一一縷舉也。

一九三一年之一切一切皆表示進步。似此實足鼓勵吾等磨勵精神以備應付將來之種種困難。願上帝賜吾人以意志與能力，進行此項事工，增進效率以實現天國於地上。

一次，一九三一年將來必因此點而深印人心之中。除此之外，又有募捐之十萬元建築費。會員增加率居六圖表中之第二項。但此項運動僅及一九二三年最高標準之百分之六十八。吾人希望一九三二及一九三三年能增高數目結果。

公民教育運動一項，以一九二四年為最高度，一九二八年則較降落之一九二七年略見起色，然自是即逐步降落矣。青年會對於此項事工多賴宣傳之效力，吾人因此或須計劃新式宣傳方法，多備文字以廣佈社會之中。

至於查經班則近年中亦逐步漸有起色。有數處市會，組織人生問題之小組研究，其實際則係變像之查經班，故其成績亦宜歸併於查經班中。最重要者，則由吾人此項程序之形勢而觀，關於以後數年之程序事工，須詳細討論，尤須注意者，即青年會須有整個事工為人格教育之觀念。

尚有一有趣味之事，則為圖表上表示參加立志作基督徒之曲線最高點，如一九一八、一九二三、一九二八及一九三一等四年，其曲線皆同一線道，而亦為艾迪博士來華佈道之時。由此點而觀，乃知立志入教之成績，則佈道工作實較愈於查經班方法多矣。質言之，則中國青年會之程序中，實尚未實行以宗教教育為基本也。

之趨勢者，則吾人此處敢置一言，即中國之青年會運動，頗宜有一全備適宜之記錄，且有充分之分析，以闡明其真意。

乙 一九三一年之事工與以前各年之比較

第八表乃選錄一九一四年至一九三一之每年統計報告中數項事件。所以擇定自一九一四為開始標準者，乃由於其以前之記錄漸失效用之故。然為研究中國全國事工之現在情形，此項記錄細則已頗够用。

第八表之各項目大都詳列於第三至第八之六種圖表中。六圖中已將各事工之趨勢表列清楚，勿庸再為詳解。各表所示大都為相似情形。大都自一九一四年至一九二三年表示逐漸興盛之勢，隨即衰落至一九二七年止。自一九二七年起，除義務學校外，其他各項則又逐步興盛。至一九二〇年至一九二九年之一個時期之分析，則詳列於一九三〇年之特別研究中，請讀者參閱之。

自中國革命之各方面情形觀之而知一九二三年至一九二七年衰落之故。但近數年在國家局勢未定之下，而其事工乃逐步增加其量數，則為一幾不可解之疑問。一九三年各項隨時工作之收支之巨，乃超過中國青年會歷史上之記載。市會預算案超過一百萬元之數，實為青年會歷史記載之第

七。一望而知此項工作欠佳。第一等城之此項數目則常低於第一等及第二等城市。

此外吾人由第七表之一二三等城市事項所可研究之點甚夥，惜本刊篇幅有限，姑不一一縷述，請讀者細心檢閱之可也。

尙有一希望，則請各市會對於該會各事工之質量兩項與他市會逐一比較，特別注意及之。第一表之一百欄各項皆由第四表及第七表分析而出。

吾人此處尙擬略事品評各市會之報告。例如有一市報告在一九三一年中，由該會引導加入教會乃有四百七十一人之多，而全國各市會之總總乃僅九百二十二人。另一會報告則謂該市四萬到會參加之人數中，乃有二萬四千參加分組討論會。另一市會則謂其演講總數為一百二十次，而全國各市會演講之總次數為一百九十四次。以上數目在各該項之下，或係實際情形。

關於各市會報告之精確及可靠事項，吾人擬提及之間題甚多。協會市會組近擬計畫一較適當之記錄方式，使各市會將每年各項會務能迅而速準地記錄其上。此項記錄方式上或須增加他項事項，亦有數項須減去者。本年年刊最大之阻礙，即係各市會之報告寄交太遲。其中最遲者反屬數個最大之市會。設吾人以青年會果為一滿意健康之教育機關，且為宗教及交誼之工作標準以應付今日

分之八。）由此而知此城在其他一等城之成績中，尙未能列入中等地位也。事實類於此者，則須從速攷察其致病之源。然從事實上攷之，則此城於一九三一年中正有水災爲患，然其每千人民之會員率，尙有如是之高，則其成績實可驚矣。然自另一方面觀之，察攷及比較此項等級之高低及其致病之源，則董事幹事庶可設法改良其事務及事工以圖補救。吾人希望利用此表，可以激動各市會董幹同人，分析各項事工，而設法以改良其貢獻。

第七表尙有數事吾人當特別注意之。由第一排橫看而知各等城市之會員率。其中四分之三之一等城市之會員率，猶低於二等城市之第四等以下。從第七與第九排觀之，而知並非由於幹事缺少之故。由一九三〇年特別研究觀之，其第一等城市之會員率乃不及二三等城市之高。第七表第六排則明示各會幹事部之大小焉。

第七表之第十三、十四、十五三排乃各市會查經班之統計。吾人比較閱之而知，第二等城市報名參加查經者乃不及第一第三等城之多。其故或係由於幹事部問題；蓋第一等市會有專門宗教部幹事；第三等市會由於範圍狹小，偏重會所利益設備事項，其幹事部雖小，乃能直接注重宗教事工。由此觀之，則第二等城即知所以改進之道矣。自第十五排觀之，每年查經班會員到會次數爲五零十分之

析，多係根據三十五市會報告之事實。其每等市會之各項數目及關於各會之他項事件皆列表中。

第六表乃第四表第二欄（每千名人民之會員率）之重見表，用「所有城市」劃分為三等城市。

第四表之其餘十六欄，亦有同樣之統計表，惜為篇幅所限故付厥如。

第七表乃以某種量度總結以上各表，此種量度即為統計學中之「中點數」（即各項量數或價值之中和數）及上十五點（乃中點數之前四分之一）及下十五點（乃中點數之後十五點）等是也。

以上各表讀者須詳細檢閱，以觀各等市會之顯著區別。至於更詳細之記錄，記載市會各項之大小及工作統計等，則有一九三〇年之特別研究，專為城市之分析而作，望讀者參閱之。

其他之一希望，則請各市會董事及幹事特別注意研究第七表之各項總結數目。目前之實行事工固不足以稱為標準，然多數之市會則頗可達到此項標準地位，各市會尤請注意各市在表中分等之地位（見第四表）。

由第四表可以見到各市會之各項成績。此項成績數目與第七表互觀比較，則知各市會之成績等次。例如第三表第二欄中有某一等城市，其每千人民會員率僅一零十分之七，在第七表第一排中。吾人看出此第一等城市尙微有不及中點數者。查第二等城之中點數為每千人民會員率為一零十

以下之人民者。其有例外者，則係由於其他項原素特別超出應有狀態之故。以下之分析，其每一等城市之事項，必分別表出，以示區別。

其他各欄則爲第一表各欄之普通比率。即如第四表第二欄爲各市會每一千人民中之會員數是也。其所得數目乃以是表第二欄之數除第一表第二欄之數，再用一千乘之，即以其數爲各量度之標準單位。所得此數即示吾等以各市人民中之會員率，以此單位爲準則，則各城之會員率比較數即可一望而知。以上數目係用滑尺（科學儀器用以計算數目者）推算而得，此項推算法，用於此表中亦頗稱精確矣。

第四表之其他各欄之數，亦以第一欄用表之各相同之方法推算而得。其他各細則，此處亦勿庸贅述。至於第四表中之第六七兩欄，所謂「參加率」一項，須於此處略加銓釋。第一表中所記六十三欄之各城參加宗教聚會總數，及二百二十七欄之各城交誼會參加總數，乃係用第一表第二欄之數目所除而得。第二表第十七欄之數目乃由第五十三欄之報名參加總數除第五十四欄查經班參加實數所得。其所得數目乃表明每查經班之報名參加者，實行參加之平均數。

第五表（見第二五頁）保明示三等市會之情形頗多區別。其大小則爲一顯著之區別。此處之分

於每種義務員給予青年會工作時間所算計而得，其數目乃以一九三〇年特別研究項下所計之時間數目爲根據。每一幹事及專任員工作者所用之時間爲每年二千四百小時。受薪之教員則每名每年五百五十小時，此項數目亦由一九三〇年特別研究項下察出。第二圖表即根據此表而作。

自第一表第四十一項下吾人而知一九三一年全年之開支爲一百零八萬七千五百八十四元正。此數用六百八十六萬六千二百八十九項接觸除之，所得者爲一角五分八厘，即每項接觸之費用。又用一千一百九十三萬五千零五十九程序小時除之，即得九分一厘，即每一小時之程序用費。

吾人用人員小時之數目一百五十五萬四千七百爲數以除之，則知每一幹事或義務員或其他人員每一小時工作可得四零十分之四之接觸。以求程序時間則知每一人員每一小時可得七零十分之七之程序時間。

設每市會皆以此法分析其程序之貢獻，則必有所得。

第四表（見第二二頁）乃分析第一表之統計之確定。本表第一欄乃將市會分爲一二三計三等。此項分等乃根據於各市會城市之人民之多寡，幹事部之大小，經濟之寬窄，及會員之數目而定。普通第一等市會，其人民數約在五十萬以上。第二等市會，其人民數約在二十萬以上。第三等則在二十萬

吾人進行一九三二年之統計，第二項乃將第三表（見英文報告第七頁）作爲全年各市會各項事工之「程序接觸及時間」之總計。此表乃據實開列各市會事工之性質及數量。若詳細檢閱此表，必有相當之代價。吾人讀之必將驚異，蓋程序接觸之數目乃多至六百八十六萬六千二百八十九種。且其用爲接觸之時間，乃多至一千一百九十三萬五千零五十九小時，平均每一接觸費時約一點三刻鐘。吾人若檢閱此表及第一表之程序項目，即知此表如何構成。因欲確定項目之故，乃有接觸之數目及長度之估計。以下略舉數例以明之。譬如日校，每一學生每年乃有一百日之接觸，每日爲六小時。宿舍寓客平均每人每年約爲二十日，檢閱一九三〇年特別研究項下即知。

第一圖表（見英文第一八頁）乃根據第二表作成，乃示明青年會所貢獻者之性質。讀此圖表，吾人又將驚異，蓋青年會之最大供獻乃爲教育事項，而宗教事工則爲最小者。作者確知宗教教育固應釋爲廣義，人格之健設及培養固皆由於教育班，體育班，及良好之寄宿舍等，特同時作者向吾董事及幹事全工不能已於言者，蓋青年會之存在及統一，乃在於吾人之主有及宣傳從基督之生命及教訓所獲得之基督徒經驗也。

第三表（見第二九頁）乃表示一九三二年各項人員團體給予青年會之工作之時間。此表乃根據

一九三一年統計報告

中國全國各市會事工皆由各分區報告，茲立其統計如第一表（見第一頁第一表）此項表格即為以前之單張統計報告，因其過大，桌上不便放置，且有多數之辦公室無適當地點張掛，故改作書冊式。表中所記內容，超過各市會寄來之統計報告，故擬試為分析第一表超出之事項。除分析第一表格事項之外，另有一題名錄，專記各地市會及協會之董事會委姓名。本年刊中之此一部分專為分析一九三一年之報告。其第一次乃記述一九三一年之各項事實。第二項乃以各市會數項記錄之總數為一單位，以研究一九一四至一九三一數年來會務之變遷趨勢。

數年來青年會工作之四十六個市會中有六市會，或無報告，或其報告之事項不在第一表範圍之內。六市會之三乃屬東北區者如奉天、吉林、開原是也。此三會因目前發生之意外變化，其報告當然不能完備。其他二會如周村及永泰乃數年前早經停頓者，其第六會即九江新會，其無報告之故，乃因目下尙在進行組織之中也。

甲 一九三一年事實之分析

一九三一年統計報告

其價值亦無從估計。本年自從侯博士到協會來服務，我們就決意請他擔任這項工作；並本其經驗和眼光，對於本屆報告，加以分析和說明。這是我們希望中認為改良的第二點。

第三，本年書冊式之統計報告中，除本年全年各項目之統計及評論估價外，另有圖表，指明一九一四年以來若干種會務之趨勢。我們希望這是第三點改良。

此外，這一小冊印行之後，我們對於全國市會各同工，有兩個希望。

一，統計的價值在於準確，所以希望各市會能登記準確的統計。同時，望各市會同工能在每年之首，即將編成之報告寄來協會；如是，協會便能早日發刊全國市會統計年報。準確和準時是本項年報的價值之兩種來源，希望各市會同工協力贊助。

二，統計本是一種複難紛亂的工作，複難當然不可避免，而紛亂却大可設法減少；其減少的辦法，即希望各市會與協會合作，擬定一種全國劃一的會務統計冊；這樣，工作上可以極其完備，而手續上則可減去紛亂。這一項想必各市會同工，都願贊助。

一九三一年市會統計年報導言

梁小初

統計的效用，凡曾治社會學者，無不知道。雖然有人以爲統計很容易引人重量而輕質，但這不是統計本身之過錯，乃是吾人誤解和濫用統計之結果。假如吾人對於統計的項目有清晰的認識，同時又有準確的登記，再把結果加以審查和比較，至少能够將各項工作的趨勢表示出來。這是統計對於社會事業一個重要的貢獻。故此吾人的問題，不是應否統計，乃是統計甚麼和怎樣統計。

我們青年會的事工，本來每年根據各市會的報告，有一種統計圖表印行發表。今年因侯感恩先生參加協會工作，他對於統計學是專家，故此將本屆統計報告特別整理得工緻。這一次並且還有三個特點，茲略述如后。

第一，協會每年印行的市會成績統計報告，所用爲圖表式，現因每年項目逐漸增多，故篇幅亦隨之增大；因其太大，所以不適於用；自本年起，此項圖表式的統計報告，乃一變而爲書冊式，各同工放置桌前，隨手翻閱，想必很是便利；我們希望這是本年統計報告之一種改良點。

第二，以前圖表式之統計報告，因篇幅所限，除項目之外，關於統計之結果，不能再加以分析說明，
