

On November 29 was Published No. 11, Vol. III., New Series Price 8d; by post, 8½d,

THE INVESTOR'S MONTHLY MANUAL. The INVESTOR'S MONTHLY MANUAL for November gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies. New Companies and New Capital. Prices made up to November 26.

Advertisements for the next Number, to be published on December 27, must be sent, to insure insertion, on or before December 24.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the Latest Quotations for 1872 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the Names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1873 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, §c., §c. A copious Index will be added for purposes of reference.

This DOUBLE NUMBER will be published on Saturday, the 27th of December.

OFFICE-340 Strand.

MR MACIVER ON UNSEAWORTHY SHIPS.

of the opposite causes which have been specified.

loans, which are coming upon us in considerable numbers, in

large amounts, and from nations who will get the money. The

effect of these loans will, of course, be in the direction of

dear money. But they will not probably have that result very soon, because the greater part of them will not be taken

hence in coin or bullion, but will form part of the general

exchange account which this country has to settle with the rest of the world. They will form a demand, not on our

bankers' balance, but on our capital, and, therefore, their effect

will be in all likelihood greatly inferior in magnitude to that

MR PLIMSOLL is a very convenient person to argue with; he always goes the full length to which his principles should take him. He believes that unseaworthy ships are sent to sea from various causes, and that the Government should, if possible, prevent them being so sent; and he infers that Government ought to do all it can to counteract all the causes of unsoundness. He shows that ships may become unseaworthy because they are badly built, and therefore he would have Government superintend building; that they may become so b cause they are badly lengthened and altered, and therefore he would have Government superintend altering and lengthening; that they may become so because they are insufficiently or badly repaired, and therefore he would have Government superintend repair; that they may become so because they are badly stowed, and therefore he would have Government superintend stowage ; that they may become so because they are sent to sea overladen, and therefore he

would have Government superintend sending to sea so as to prevent overloading. But all his disciples are not by any means so logical ; they are apt to admit his statement of the evil with more or less of qualification, but they do not go his length and say that Government is to prevent all its causes ; they select often somewhat arbitrarily, and say that Govern-ment must interfere only with such and such causes, though these are often not the worst, and may leave the rest alone, though often they are the worst. Many persons, for example, think they can stop all overloading by a Government inspection, and wish to do it; but they do not wish to interfere with the building or fitting out of steamers, though it is probable that many more lives are lost by such bad fitting out and such bad construction than by overloading. The truth is that, for the most part, sensible men are frightened by the length to which Mr Plimsoll's arguments would take them, and by the pernicious consequences of the omnipresent action of the Government which he proposes, and so they suggest some modification satisfactory, we believe, to their own minds, but, as minds differ much, there are almost as many modifications as minds, and as some are most anxious to cmit the parts of the comprehensive plan which others most wish to retain, they may fairly be left to argue and confute one another.

But this account does not apply to Mr MacIver, one of the most distinguished of Mr Plimsoll's disciples. That gentleman addressed a letter to Saturday's Times, proposing a scheme which, if we understand it, is even more logical and thoroughgoing than that of Mr Plimsoll. It may be described as Mr Plimsoil's plan adapted to the shipowners' point of view. He says, in substance, "We shipowners are in great "fault; we have no defence to make; Mr Plimsoll has found "us out; let everything be inspected and examined by " Government ; as he says, let Government take charge of the " whole, but then, only be fair and relieve us from liability ; " at present the law makes us liable to penalties if, to our " knowledge, our ships go to sea in an unfit state, let Govern-"ment become the sole judge of fitness and relieve us from "those penalties." Some of the remarks in Mr Plimsoll's "those penalties." Some of the remarks in Mr Filmson's book are not very favourable to shipowners, and were not meant to be so; but if the plan of Mr MacIver was adopted the shipowner would be the main gainer. He would only have to pass a Government exami-nation, and would never be punished any more. As is well known, a similar line of argument was habitually made by railway companies. They lived in fear of used by railway companies. They lived in fear of the penalties of Lord Campbell's Act, and of having to pay in money for the lives of passengers killed through their fault, and they were most anxious that Government should inspect and examine, so that they might not have to pay, because the fault would then be that of the Government and not theirs. But the good sense of the public has retained the penalties on the railway companies; it has steadily refused to exempt from liabilities the person or persons at the heads of the works which have done the wrong ; and it is impossible to distinguish their case from that of the shipowners.

Mr MacIver proposes a Merchant Shipping Board-a permanent Royal Commission, as it were-with "high officials" at "good salaries," "in charge of executive departments" at the various ports, who are to regulate loading and, as we understand, outfit; to stop "the mischievous competition between different registries," by making fixed rules to regulate building; and generally to see that all the ships which go to sea were well built at first, well altered if altered, well repaired if repaired, well stowed, and not too much loaded. And we have seldom seen a suggestion from a practical man which has surprised us as much. Can Mr MacIver imagine it possible for a Government to watch all the small craft about the coast, to see that they are well stowed, that they are not overloaded, and that they are always in good repair ? Yet the evidence is that these small craft, belonging very often to the persons on board, are by far the worst of all our shipping. Or, again, can Mr MacIver think it desirable that Government should lay down iron rules that ships are to be built this way or that, and that they are not to be sent to sea unless they are so? Nothing else could be so sure to arrest all improvement in the building of ships, to drive all capital out of the trade, and to render our ships inferior to those of other nations ; whereas now, owing to our greater capital and greater readiness to make improvements, they are by far the best in the world. Mr MacIver would, perhaps, reply that he

contemplates, not the inspection of Government, but that of a mercantile board—of men practically engaged in shipping. But this is almost worse. Such a board, like a Government, must act by fixed rules; a little less, but still on the whole like a Government, it will be unwilling to change those rules, and, unlike a Government, no one will have confidence in its bona fides. It will always be said, "You do not like improve-"ment because you are large holders of unimproved articles; "you do not like plans for new ships because you are owners " of old ships which these new ones would supersede." No

" of old ships which these new ones would supersede." No doubt such allegations would usually be ungrounded, but at times they would be true, and they would be incessantly made.

Mr MacIver regards Government supervision "almost in "any form as a protection to the honest trader anxious to do "right." But this only shows that he cannot have studied the history of superintended trades; if he does so, he will find that the "honest trader" anxious to improve for the most part is hindered or prevented from doing so, and that those who do not wish to improve are effectually exempted from his competition. He says that this plan would shut out the "unfair competition" of persons "unfit" to be shipowners; but, in fact, it would hamper in the competition those most fit to be shipowners—those who wish to break through old rules and to win fortunes by doing good things in a new way.

The true remedy, we believe, is exactly the reverse of that of Mr MacIver's. We would make the liability of shipowners for the loss of life consequent on the unseaworthiness of ships far more effectual ard stringent than it now is. We do not believe that the percentage of ships which are unseaworthy, as compared with the whole number of our ships, is other than very trifling; still, such a percentage certainly exists, and we would prevent it if we can. And for this purpose we should revise two of the most faulty and doubtful parts of English law. First, as to the liability of an employer for the badness of anything, whether it be vessel, machine, or instrument, with which he engages a servant to concern himself, and which, in consequence of that badness, injures that servant. We should wish to define that liability very strictly, and to make it exceedingly severe. At present the law is very confused ;-it has been made by various judges with minds influenced by various cases, and the strong principles laid down by some have been frittered away by exceptions and limitations introduced by others. As to ships, the law appears to be in a state grossly defective. It is expressly laid down that the law of Englard does not imply "from the relation of ship-"owners and seamen any warranty that the ship is seaworthy." Thus, in a well-known case in which such unseaworthiness was alleged, Lord Campbell observed : "It seems to me that " there is no contract or duty disclosed in this count for a breach " of which the defendant is liable. In all that appears the " defendant was quite ignorant of there being any defects in the "ship, and the plaintiff himself may have examined her and "been aware of her condition. If both parties had been aware " of the unseaworthiness, it might still have been the intention " of the plaintiff to serve in her, and that in consideration " of his having to work harder he should receive higher wages. " If that were so, there being no scienter alleged, and no per-" sonal blame imputed to the defendant, if this action could be " maintained, the owner of a ship would be liable to an action " at the suit of every sailor if a plank started from accident or " neglect, so that the ship was not seaworthy, there being no "personal neglect of the owner whatever. No such action " has ever been brought, and such a declaration is quite of the " first impression; nor is there any decision, authority, or " principle which has been cited in support of such a " doctrine."

And Sir John Coleridge goes on to say: "The plaintiff "must say that in all voyages and under all circumstances "there is an implied warranty of seaworthiness as between "the owner and a sailor. It is almost sufficient to answer "this by saying that such a claim has never before been "started, for I cannot help thinking that there would have "been many cases where such a claim might have been made "if it had been thought to be well founded."

We own that we should be inclined altogether to reverse this rule. We should make the shipowners warrant the ship at the beginning of the voyage to the sailor just as he warrants her at the commencement of the risk to the underwriter. Why the law should invent a rule for the benefit of the under-

THE ECONOMIST.

writer, and not invent one for the benefit of the sailor, we | confess we cannot imagine.

Mr MacIver says, with great truth, that when ships go down in mid-ocean, and all hands are lost, no proof of unseaworthiness can be given, and no penalties imposed ; both the representatives of the sailors and the Government are then powerless. But the possibility that in some cases offences cannot be punished is no reason for not imposing penalties on such offences. Various robberies are undiscovered, but no one says that, therefore, robberies ought not to be punishable; the Great Coram street murder will most probably never be found out, but that is no reason why murder should not be a criminal offence. Mr MacIver says, that because in some cases you cannot enforce a liability on shipowners, that liability should be removed, and the Government should take it upon themselves to see that shipowners did not do what was wrong. But this would apply to all the criminal code; it would run, *mutatis mutandis*, "because " some murders cannot be discovered you should give up punish-" ing them, and, instead, annex a policeman to each man to see " that he does not murder some one else." Mr MacIver also says that in some cases the Board of Trade may make mistakes and prosecute innocent shipowners. But this also applies to all offences. The wrong man was taken up for the Great Coram Street murder, but no one proposes to change the law on that account. A clear understanding of such arguments is all which is necessary to make their fallacy certain.

Next, we would also reverse the law of England as to the liability of employers to servants for the acts of fellow-servants. This also has been made very gradually and inconsistently by various judges, and we should not like to apply it confidently to the case of shipowners. But in principle we should make the captain's knowledge of unseaworthiness the owners' act for all which relates to sailors, just as the captain's acts are now for binding the credit of the shipowner and for so many other purposes. If it is objected that this is too great a hardship upon shipowners, and that no one would engage in the trade on such terms, the excuse is that he can insure against it just as he now insures against "barratry"—another form of misconduct of masters and seamen.

And further we would make this liability real, by making it the special duty of some one officer in this case to prosecute. We want a Public Prosecutor in all departments; we admit, as in the Tichborne case, the principle of public prosecution, but we have no effectual machinery for effecting it. As a whole, it may be difficult to remedy this at once; "bit by bit" legislation is the habit of England, and we would begin by making it the special duty of some one to impose the due penalties on offending shipowners and employers.

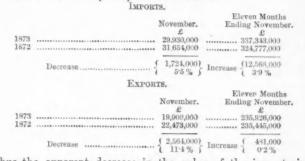

A few severe instances of enforced liability would soon clear out the few cases of gross neglect and misfeasance which now exist in our foreign trade. Experience shows that the policy of real punishment is worth five times more than attempted prevention. We do not keep a Government Inspector to watch railway trains and see that they do not break down; we make the railway companies pay heavily if their trains do break down from default, and so we would deal with shipowners.

THE BOARD OF TRADE RETURNS FOR NOVEMBER.

WE have seen few cases in which a partial and superficial view of statistics was likely to mislead more than the case which is presented by the Board of Trade Returns for last month. At first sight they appear to establish a great decline of the foreign trade. Both imports and exports show a diminution, both of quantity and value, the diminution of the exports being especially marked; and the inference has, in fact, been drawn that the foreign trade is seriously declining. But, besides involving the mistake of inferring too much from the figures of so short a period as a month, without considering whether they harmonise with other facts and the statistics for some time previously, the superficial inference appears to be hasty on other grounds. The real facts, as disclosed by an analysis of the returns, are most interesting; and, although they still point to a moderate general decline in the foreign trade, they are certainly far from proving any considerable decline, except in one or two branches.

The general values of the imports and exports for the

month and eleven months ending November, as stated in the form which we usually adopt, are as follows :--

Thus the apparent decrease in the value of the imports is about $1\frac{3}{4}$ millions and $5\frac{1}{2}$ per cent.; and in the value of the exports $2\frac{1}{2}$ millions or $11\frac{1}{2}$ per cent. If we look through the quantities—especially of the exports—it will also be found that in several of the most important manufactures the decrease ranges between 20 and 40 per cent., and is even in some cases rather more. There can be no doubt that the general course of the trade has been either stationary or moderately declining for some time, as the increase of 3.9 per cent. only in the imports for the eleven months, and 0.2 per cent. in the exports, tends to show; but what we wish to point out is, that the assumption of a farther precipitous decline commencing last month would be premature.

The first consideration we may refer to, though it may seem trivial, is really very important-at least as regards the exports; this is the circumstance that in November, 1873, there was one working day less than in the corresponding month of 1872. In November last there were five Sundays, whereas in November, 1872, there were only four; and this difference of a day being one in 26 ought to make a difference of about 4 per cent. to the disadvantage of last November in the comparison. This qualification may be of less importance as regards the imports, for these naturally fluctuate with the arrivals of ships, which may be delayed or accelerated by the weather; but as regards the exports, where the business of loading and despatching proceeds with comparative regularity, the difference of a working day is obviously of great moment. Allowing for the difference of a day, the above reduction of 11¹/₂ per cent. in the exports would not be more than $7\frac{1}{2}$ per cent., which is a rather less alarming figure.

A second consideration, as regards the exports, is the circumstance that in November, 1872, there was a considerable and exceptional increase both of quantity and value over the corresponding month of the then previous year. It is difficult to explain how these fluctuations arise, but just as it would have been improper last year to assume a great increase of trade above the average from the swollen figures of that time, so now a falling off from exceptionally large figures does not indicate a serious falling off in the average volume of trade. As regards values, the increase in November, 1872, over November, 1871, was in fact greater than the decrease which we have now been noticing. It amounted to 3,257,000l, or 17 per cent., whereas the decrease in November, 1873, as compared with 1872, as we have seen, is only 111 per cent., or, allowing for the difference of a day, only 71 per cent. On the most general view of the returns, therefore, no decline is really established by a comparison between November, 1873, and November, 1872, because of the exceptional increase in the latter month.

If we look at the quantities in detail, always keeping in mind the disadvantage caused to 1873 by the difference of a day, we shall also see that, with some exceptions, a large part, and in some cases the whole, of the present decrease is due to the exceptional increase in November, 1872. The following is a table of the decrease of the quantities of the principal exports in November, 1873, with a parallel column showing what the increase in November, 1872, had been :—

QUANTITIES of PRINCIPAL ARTICLES of EXPORT which Decreased in NOVEMBER, 1872, compared with the EXPORTS in NOVEMBER, 1873.

Woollen cloths	2.228,772	2.839.307	610.535	22.2	411.399	20.0

This table, we think, requires very little comment. respect of almost all the articles mentioned-and we have taken exactly the same articles as were mentioned in our comments last year on the November returns-it is obvicus that the present decrease must be set against a great increase the previous year. The principal exceptions are made by coal, iron and steel, woollen yarn, and worsted stuffs, which decreased in November, 1872, as compared with 1871, and have again still farther decreased. In these cases, no doubt, there has been a serious decline of our exports though of course not quite so great as the apparent one shown, and the facts also harmonise with those of the last few months. But the exceptional character of the facts in these instances makes it all the more important to notice that the facts as regards the larger bulk of our exports are different. The limitation of our inference from these facts should, however, be carefully drawn. We do not say that trade is not stationary or declining and that it is rather increasing. All we wish to point out is, that extreme conclusions from a superficial view of the November returns would be hasty-that the decline is certainly much more moderate than would appear from that view of the returns, and that the next returns may supply important corrections as to the measure of the decline. There have been so many signs lately since the reduction of the Bank rate of an incipient tendency to improvement in trade, that all the more caution must be exercised in drawing inferences from the evidently exceptional figures of last month.

Turning to the imports; the explanation of the apparent falling off-especially allowing for the fluctuations from month to month, which, as above pointed out, must never be forgotten in dealing with the imports-is even more simple and satisfactory. While the decline of some of the imports and satisfactory. While the decline of some of the imports of raw material-especially wool-is sufficiently accounted for by the very large increase in November, 1872, with which a comparison is made, the singular fact is that, contrary to what would be expected after the last deficient harvest, the aggregate decrease of the imports is almost wholly accounted for by the decreased value of the imports of food alone. The conclusion is obvious, that our general import trade must have have been fairly satisfactory; but the fact is, for many reasons, so important that we must state it in some detail. following is a table of the imports of food in November, 1873,

	Nov., 1873. £		Nov., 1872.		Increase.		Decrease.
Wheat	2,629,000		3,191,000				562,000
Barley		***	805,000	***		***	493,000
Dats			225,000		108,000		
Indian corn	307,000		784,000		***	***	477,000
Potatoes	106,000		387.000				281,000
Rice			651,000		***	***	355,000
Animals living	375,000	***	320,060		55,000		
Bacon	339,000	***	150,000	***	189,000	***	***
Butter			476,000		111,000		***
Cheese	304,000	***	212,000	***	92,000		***

2,100,000 ... 1.613,000

The total decrease of the imports, as we have seen, is 1,724,000l, so that the above decrease in articles of food, which is a fact in itself satisfactory, goes a long way to account for it. In point of fact, there is no decrease in the imports of raw material worth considering.

Some surprise will be felt, however, at the decreased imports of food, especially after the unfavourable reports of last harvest, and the fact is the more significant as there has been no increase of the imports of wheat, but, on the contrary, a large decrease in the season since the 1st of September. Without, however, going so far as to say that the reports respecting the harvest have been exaggerated, it may

be useful to recall to mind that the imports last year were very large, and that last year's harvest deficiency was aggra-vated by the failure of the potato crop, which led to a large import of potatoes. The undoubted fact is that, whatever last harvest may have been, we are not paying so large an amount for food as we did a year ago, and this circumstance is all in our favour as regards the state of the home trade. The decrease of the aggregate imports thus becomes on the whole satisfactory, when the details are analysed.

The following are the totals of wine imported and entered for home consumption respectively in the eleven months ended November 30, 1872 and 1873 :---

THE CONDEMNATION OF MARSHAL BAZAINE.

THE decision of the Court Martial at Versailles, which, so eagerly expected for a long time, has at last taken France and the world in some measure by surprise, is an event of which the political significance has been obscured by the individual interest of the personages and the dramatic picturesqueness of the situation. Not only the French themselves, with their national passion for spectacle, but the whole of civilised Europe have been impressed by the splendour of the trial, the solemnity of the issue, the dignity of the tribunal, the highly-wrought eloquence of the prosecution and the defence, the rigorous severity of the sentence, and the passionate protest of the accused. But these things, after all, are but of temporary interest and of comparatively trifling account. It is more important to examine what is the political meaning of the extraordinary trial. What dark places in the history of France during her agony of 1870 does it clear up? On what obscure problems of the future does it cast a light? These are questions better worth pondering than the disputes as to the merit of Maître Lachaud's oratory or the effect of the Marshal's oath upon the crucifix that he had not betrayed France, or the President's treatment of the recommendation to mercy, or any other of the super-ficial features of the trial on which journalists, French and English, are wasting columns of ingenious discussion and descriptive rhetoric.

The long delay of the proceedings against the Marshal under the administration of M. Thiers, gives ground for the suspicion that the Government was not indisposed to let the painful history of the capitulation of Metz rest in the oblivion into which the later misfortunes of the country had thrown it. The accused, either with a sincere conviction of innocence-of which even though we cannot pretend to share it THE ECONOMIST.

we can understand the sincerity-or with the incapacity to comprehend the movements of public opinion and of political forces that appears so conspicuously in his character, as revealed by the trial, insisted on an investigation of the charges against him. So far, there does not seem to have be n on the part of those in power any intention to make political capital out of the trial, nor is it accurate to say that the process was demanded imperatively by the voice of the nation. But after the expulsion of M. Thiers from office the impeachment of the Marshal was made, with considerable skill, to take a foremost place in the public view. The constitution of the Council of Generals which acted as a court martial, the princely position of the President, the place chosen for the trial, fixed the eyes of the world; and, as was natural, France, thus forcibly reminded of her most shameful reverses and her most crippling loss, became excited anew with rage and once more craved greedily for a scapegost. Bazaine was primâ facie guilty, for he surrendered Metz to the enemy with an intact army of 170,000 men. He was a victim to be offered up-and, probably, in accordance with the justice of the case-to the popular indignation that had been whetted adroitly during the first three months of the rule of the Right in France. Was there an object in thus exciting the popular mind, and in elevating the trial of the Marshal to the rank of a great State proceeding ? Surely there was, and a very manifest object. The plans of the Right for the Restoration of Monarchy were rapidly ripening; the Fusion, already an accomplished fact, was soon to be proclaimed; the conflict of parties in the Assembly and before The Royalists had the country was imminent. two enemies to contend against, Republicanism and Imperialism. Their measures for the defeat of the former we are not new concerned with ; the latter, for a moment crushed by the disasters of 1870, was again making head, and required to be dealt with anew. What more simple and yet effective device than to re-open, by an inquiry into the circumstances of the capitulation of Metz, the whole story of Bonapartist mismanagement and corruption? To prove Bazaine's treason, it was supposed, would be to convict of culpable folly, if of nothing worse, the Government of which he was the chosen soldier. These speculations, though if they actually influenced the course of events we believe they must have misled those who entertained them, were at all events more reasonable than the purposes attributed to the prosecutors of the Marshal by some English critics of French affairs. That the Duc d'Aumale and the Duc de Broglie, and the whole of the party now in power in France, should labour to procure the conviction of Bazaine in order to gratify M. Gambetta and the men of September is so wild a misrepresentation, not of facts merely, but of possibilities, as to be scarce worth noticing; yet it has been seriously and repeatedly asserted, and it is involved in the assumption, which is not uncommon, that the trial at the Trianon was only a phase of the struggle between Empire and Republic. The result of the investigation has indeed gone far to fix M. Gambetta's name more firmly in the minds of his countrymen as the man who did not in the darkest hour despair of France ; but this was not, we may be certain, foreseen by the Government. Still less was it perceived that the conviction of the Marshal might ultimately open the Bonapartists a way of escaping from the memories of 1870. If Bazaine was a traitor-as the Council at Versailles has affirmed-it is more than probable that he was a traitor to the Empire as well as to France. Frenchmen were all ready in 1870 to cry out " Nous sommes trahis," and it was this cry that made the Revolution of September 4th possible. The tactics that were then used for the ruin of the Empire may at a later period be adopted for the benefit of Imperialism.

Such we apprehend to have been the moving spring of the prosecution, and such its unexpected results. The question of the Marshal's guilt or innocence does not greatly affect the political consequences of the trial, but it is an essential element in the just appreciation of the earlier history of the war. The fatal point in the indictment against Bazaine is one that no tribunal should be more competent to determine than the Council of Generals at Versailles. That he surrendered a fortress previously deemed impregnable to a besieging force very little more numerous than his own, that he capitulated at the head of the finest army France had ever put into the field, are facts that might, of course, be excused by the failure of great efforts and the

extinction of every external hope. But the Council of Generals have decided that Bazaine's surrender was not so excusable. They say—and they should know—that the negotiations with the enemy, the capitulation, and the surrender took place without the Marshal having done "all that "honour and duty prescribe." If this were so-and on the whole we must believe it-Bazaine was unquestionably guilty of treason, and his crime inflicted irreparable injuries on his country. We believe, indeed, that his was only a dull-witted blundering, not wholly malign treason. Tempted by dreams of power for his party or for himself, he staked the Grand Army of France in a tricky game. If he had won, he would have been the actual head of France probably for his lifetime. But he was pitted against skilful players, and he had neither the insight nor the coolness that alone win in such circumstances. He lost, and losing he ruined France. If he could have made greater efforts-as the verdict of the Council affirms-there was, perhaps, a remote chance that he might have prevented the downfall at Sedan; or that, later, he might have rendered the siege of Paris impossible; or that, still later, he might have compelled the raising of the siege, and, with the aid of the army of the Loire, forced the invaders to recede from France and offer favourable terms of peace. But he failed to do any of these things; and 'according to the verdict of his peers, he deliberately abstained from any adequate efforts to do them. Such conduct in a soldier is an offence that cannot be pardoned, and though the President may mitigate the severity of the sentence, France will not pardon Bazaine. In her history his name will be written as that of the man who, in her terrible trial, did more to ruin her than William of Prussia, or Moltke, or Bismarck himself.

MR STEPHEN ON PARLIAMENTARY GOVERNMENT. In his first paper on Parliamentary Government in the Contemporary Review, Mr Fitzjames Stephen, though, as usual, fresh, pungent, and original in his criticism, does not enter, properly speaking, upon the work of constructive suggestion. For this he is hardly to be blamed, inasmuch as he promises another paper, in which we may expect to find his exposition of the remedies for the evils he points out. Of course a writer must be allowed to clear the ground for his reasonings, but the separation of Mr Stephen's argument into two parts gives to the present contribution to the discussion the appearance of a plaidoyer against Parliamentary Government. This imputation Mr Stephen carefully disclaims. He starts with the assumption that "Parliamentary Government has been irrevocably established amongst us," and takes some pains to establish this proposition, which few people indeed would think seriously of denying. But having paid this tribute to the practical intelligence of those whom he addresses, he goes on to affirm that, in view of certain defects in the system, those who think they perceive those defects are bound to speak of them 'plainly and without reserve." And Mr Stephen does assuredly so speak of them, and with so much acerbity that Parliamentary Government, if it were conscious of the criticism, might well pray to be saved from such a "candid friend." With many of Mr Stephen's objections to Parliamentary Government we can entirely agree, and some of them we think may be mended; though we doubt whether we should consider the remedies that would commend themselves to Mr Stephen either effectual or wholesome. But Mr Stephen never seems to compare the working of the English system with anything but an ideal standard of excellence. Half the defects that he points out in Parliamentary Government may just as well be excrescences on any other form of Government, and, in some instances, the very same evils that he declares to be inherent in our system are to be found in despotic or presidential or oligarchical systems. What is the meaning or purpose of asserting that " if the personal "character of English politicians should ever be seriously "lowered," Parliamentary Government may be found to be a very mischievous form of rule? This surely has no special application to Parliamentary Government. Any system that throws power into the hands of persons who may be good or bad or indifferent will vary in its working with the character of the ruling persons. A good and wise Despot, a good and wise Council of Ten, a good and wise Bureaucracy, are just as liable to be succeeded or supplanted by

bad and foolish rulers of the same order as any Parliament

On the whole, indeed, it is probable that the free play of

THE ECONOMIST.

thought and action under Parliamentary Government affords better guarantee for the maintenance of a high standard of character than either absolute monarchy or oligarchy or bureaucratic institutions. The argument, so far as it goes, is effective against the constitution of human nature, but has no special point against a representative system.

The unfitness of Parliament for the ordinary business of legislation has come to be so generally understood that Mr Stephen need hardly have elaborated his argument on this point. Mr Mill has repeatedly recognised the absurdity of the existing system, and our Judges are weary of complaining of the legal confusion resulting from it. But a remedy is not so easily to be found. No doubt a council of law-makers, such as Mr Stephen, attracted no doubt by his Indian experience, suggests, would do the work of legislation well. But the difficulty would be to exclude political influences from this work. The political effect of seemingly unimportant alterations in a bill may be very considerable, and, as Mr Stephen shows, this is the mainspring of those squabbles in committee which deface the original draft of many a useful measure with inconsistent amendments. Would the country accept with unhesitating confidence the result of such discussion conducted by a nominated council in secret session ? It is at least doubtful; and so we should run a risk of losing that respect for law which the people feel when they know that it is in a certain sense their own handiwork, and which it is not certain can even be generated where law-making is the basiness of a special order. At the same time, the reservation to Parliament of a power to reject en bloc any measure that might seem to the majority to have been improperly manipulated by the Council of Legislation might perhaps suffice to satisfy the popular craving for control. We are willing to admit that an intelligent despotism might give us a much better body of law than we can hope to get under a Parliamentary system ; but then that law, however sound, would probably have less moral hold upon the people.

With regard to the interfarence of Parliament in the Executive business of the country, Mr Stephen is still more severe in his criticism, and, as it appears to us, with much less reason. His description of the development of our complex administrative machinery is very interesting, but it is not relevant to the point in issue. The absurdities, anomalies, and consequent confusion in the public offices of the country cannot be exaggerated, and are indeed almost astounding when one comes, as few men have time or interest to do, to a comprehension of them. But all this confusion arose historically in the natural process of our political development. It is a part of the price we pay for the political continuity of our institutions; and it is in no way inherent in Parliamentary government as such. If we had to give Parliamentary institutions to a new country, or to an old country that, like France, has been swept clear of all her historical machinery of Government by a revolution, we should be enabled to construct a logical and efficient system of distributing the public business easily enough. But the illogical confusion might just as well have grown up around a great historical monarchy or, it there were such an example to be found in modern Europe, a great historical Republic, either of the aristocratical or the democratical type,-around the old kingdom of France, the Republic of Venice, or the Republic of Florence. Parliamentary institutions are no further responsible for the system of which Mr Stephen complains than this, that they by their Conservative forces, which have on the whole so fortunately controlled without barring progress, have made the process of altering the constitution of our administration gradual and, above all, unapparent. So far Parliamentary Government is responsible for the defects of our administrative system; yet it is responsible by reason of a quality which has done England priceless service.

Mr Stephen's main point against Parliamentary interference with Executive work is that it has destroyed all unity in administration, and by the changes of Ministries essential to party Government, is continually bringing in untried and, indeed, untaught men to be heads of departments. As for unity in administration, that is only to be secured by some revival of real kingship, a thing which is certainly out of the range of practical suggestion, for the complexity of modern public business would make it impossible for the whole range of affairs to be grasped by any average statesman. The master's eye is the all-important guarantee for efficiency, as Mr Stephen says; but where is

[Dec. 13, 1873.

the king or vice-king who can see everywhere at once? In France, before 1870, the master's eye was supposed to scrutinise every part of the State's service; weariness came on unsuspected, and the result was neglect and disaster. We are inclined, on the whole, to believe that there must be division of labour and of responsibility in the public service. We are also convinced that in spite of the apparent absurdity of bringing in new Ministers, on the average once in every two or three years, to learn departmental work, the system has advantages that outweigh its drawbacks. Hardly any blunders in administration are so dangerous as the stagnant condition of mind into which a permanent service gets when it is placed out of the reach of contact with the outer world and with new ideas. Then routine becomes truly the master. Mr Stephen cites as a remarkable instance of the inefficiency of English administration the opinion of his father, Sir James, on leaving the Colonial Office (then united with the War Office) in 1847, that our War Departments were so badly organised that they were certain to break down in the first European war, a prediction fulfilled in the Crimean campaign. But Mr Stephen, curiously enough, forgets that for five-and-thirty years preceding, the control of the War Departments, though nominally exercised by the Secretary of State, was really wielded, without any reference to Parliament, by the Duke of Wellington. That was a purely personal régime, if ever there was one, and to it, not to Parliamentary rule, should be attributed the disaster of 1854-55.

BUSINESS NOTES.

THE NEW YORK BANKS BEFORE AND AFTER THE PANIC. —The publication of the weekly returns of the New York Associated Banks was unfortunately discontinued during the panic, but the publication was resumed for the week ending November 22, and we are accordingly enabled to see how rapid the improvement has been. The interval embraced between September 20 and November 22 is only two months, and within that time the intensity of the panic had passed, and credit had so far revived that the banks were nearly as strong as before the panic, with a daily tendency to improve. The following is the comparison :—

POSITION of NEW YORK BANKS, September 20 and November 22,

1075, compared.
September 20, November 22, Decrease, dols, dols, dols, dols,
Loans on discounts
Specie
Circulation 27,400,000 27,300,000 100,000
Deposits 195,000,000 167,900,000 30,100,000
Legal tenders
Thus the amount of specie had risen in the week ending
November 22 to an average amount only 1,300,000 dols, or
about 240,000l, less than the average in the week ending
September 20, in which the panic broke out, and the legal
tenders had risen to an amount only 3,400,000 dols, or about
623,000l, less than the former average. The principal change,
in fact, appears to be the great reduction of loans, exceeding
30,000,000 dols, and the corresponding reduction of deposits,
showing the contraction of business by which the banks had,
at last, improved their position. Putting the above state-
ment into the form required to show the proportion of reserve
to liabilities, and converting the dollar into English money at
3s 8d per dollar, the comparison would stand :
os ou per donar, the comparison would stand

Liabilities—Circulation Deposits	5,023,000		November 22 5,005,000 230,782,000		Decrease. £ 18,000 5,518,000
Total liabilities	41,323,000 £	*****	35,787,000 £	******	5,536,000 £
Reserve—Specie Legal tenders		******	3,203,000 5,665,000	*****	239,000 623,000
Total reserve	2,735,000 £	*****	8,873,900 £		862,000 £
Proportion of reserve to liabilities					

Thus the banks by November 22 had contrived to get back into a state in which the legal requirement respecting the reserve is almost fulfilled, although the actual amount of the reserve is smaller than when the panic broke out. The improvement from the lowest point touched during the panic is most material, the legal tenders, as we know from the report of the New York Bankers' Clearing-house, having fallen to less than 2,000,0007, and having risen, as above stated, by the 22nd of November to nearly 6,000,0007.

THE GROWTH OF A GREAT RAILWAY.—The reply of the Chairman of the London and North-Western Railway to the

THE ECONOMIST.

Board of Trade Circular respecting accidents, besides whatever merit it has as a contribution to the main controversy, incidentally contains a striking proof of the quick growth of railway traffic. The North-Western Company, says Mr Moon, has been compelled to anticipate the Board of Trade requirements of additional rails, sidings, and stations, to accommodate the overwhelming traffic :—

"In order to show that we have not overlooked the necessity for doubling lines and enlarging stations and appliances to meet the increasing traffic, and have not spared money for this purpose, I need only say that during the last five years the company has, on its old lines, expended more than 4,000,000l in doubling lines, enlarging stations, increasing sidings, &c., in addition to nearly 2,000,000l spent on new lines, of which the greater part was laid out to relieve the traffic of existing lines—forming altogether about $\frac{1}{2}$ th of the whole capital of the company expended in works—besides an expenditure out of annual revenue which has averaged, during the last two years, nearly 100,000l per annum, almost entirely on refuge sidings and interlocking points.

"The laying down of additional rails upon the more busy portions of the line has long had the attention of the directors; a third line was accordingly, several years ago, completed between London and Bletchley, a fourth line will shortly be opened, and, in order to continue these lines into Euston station, powers were obtained in last session to construct a duplicate tunnel for two lines of rails under Primrose hill. Plans are now preparing for further extending these two additional lines to near Northampton. A third line has recently been opened between Rugby and Nuneaton on the up side, for the goods trains, in order to facilitate the passage of the night mails. Two additional lines are already in course of construction between Stafford and Crewe, and the board are proceeding with arrangements for filling up the intermediate portions so as to complete four lines of rails over the whole distance between London and Crewe.

portions so as to complete four lines of rails over the whole distance between London and Crewe. "Carrying out the same principle, alternate railways have been in several cases constructed, such as the Whitchurch and Tattenhall, for the purpose of conveying the traffic of South Wales with Birkenhead and Chester, without passing through the busy station at Crewe, the Runcorn Bridge and its necessary approaches costing more than 500,000?, the Lancashire Union lines, which, with the doubling between Liverpool and Huyton and the new lines from near Manchester to Wigan, make duplicate communications between Liverpool, Manchester, and Wigan and the North. Several branches and tunnels, especially a tunnel of 34 miles long in Yorkshire, originally made for single lines of rails, have also been doubled to meet the public requirements.

"Many of the large stations have been rebuilt and materially enlarged to meet the increased traffic, and, as instances in point, I may mention Euston station, the area of which has been doubled. Stafford and Crewe stations have both been constructed three times, and greatly enlarged on each occasion, and we have now just settled plans for a further enlargement of Crewe, at a cost of about 100,000/.

largement of Crewe, at a cost of about 100,000/. "Lime Street station, Liverpool, has also been built three times, and we are now doubling its area at a cost of upwards of 500,000/. Manchester, Birmingham, Warrington, and many other stations have been reconstructed and enlarged in the same way at enormous cost: Carlisle, Preston, and Bolton stations are in course of being rebuilt and enlarged. Similar works have for some years past been going on, and are now being carried out on almost all parts of the line as rapidly as the state of the labour market and other circumstances will permit, and others are in contemplation.

"On this, as on all railways in the kingdom, the stations were laid out originally on what was then considered an extravagant scale, but in the great majority of cases they have now proved insufficient; and as works of different kinds naturally gathered round the stations, the task of enlarging them has become not only excessively expensive but very difficult, owing to the vested interests concerned, which frequently cannot be dealt with without Parliamentary powers, obtained after great delay. Wherever further accommodation seems desirable, we endeavour to overcome these difficulties."

In spite of all this additional expenditure the North-Western dividends have steadily augmented during the period in question, so that on balance the Company has gained by the augmented traffic in spite of the additional expenditure which has been necessary, yet the expenditure has been so liberal that this Company, at least, cannot be accused of neglecting to provide for its additional traffic. On the whole, therefore, past experience tends to show that railway companies can provide for whatever traffic is offered them, and still increase their dividends, and the Board of Trade Circular itself consequently becomes less alarming. The companies can do all that is required not only without less but with the probability of a constant augmentation in the value of their monopoly. 1503

THE HUNGABIAN LOAN .- Within the very short period of two years Hungary has issued in our market two loans of the nominal amount of 3,000,000l and 5,400,000l, and now introduces a third amounting nominally to 7,500,000/-the total being 15,900,000l, and the effective money borrowed. according to the price of issue, amounting to about 13,000.000/. Some explanation, we think, is required of the phenomenon of these rapid is ues. The representation, at first, was that money was required for public works. If so, why is not an account now given of the expenditure of the first money obtained, and an estimate made of the results? There is only too much reason to fear, from the rapidity of the issues, that the money is being used, not for new works, but to cover serious deficits ; and if this is the case, the fact ought to be stated with the utmost frankness. Hungary, it is believed, has had to contend with bad harvests, which have made a large part of the taxes figuring in the Budget estimates hopelessly irrecoverable for several years past, and hence its present financial embarrassment. All this might be no sufficient reason for not lending more to Hungary; but the opposite reasons which justify an advance should be put forward after a full statement of the actual financial position, and the public, who are invited to lend, should be furnished with ample means for judging the character of their debtor. Hungary is a constitutional state with which there is a great deal of traditional sympathy in England, and its actual debt is not excessive in proportion to the population, even allowing for its share of the debt of Austria at the date of establishing the dual arrangement; but if these issues continue, even Hungary is in danger of being discredited, like Spain, Turkey, Egypt, and other incessant borrowing countries with whose needs the London money market is only too familiar. Should it continue in this career a formidable difficulty will apparently be created for the lenders by the priority of Hungary's engagements to the joint Austro-Hungarian empire. The common expenses of the empire must be first provided, and the provision may exhaust Hungarian resources so much as to endanger the postponed creditor, whose claims will be the last to be considered. Much as we should be disposed to favour Hungary, the circumstance of three loans being issued in three yearstwo of them actually in the present year-is most discouraging; and unless the Hungarian government explains its financial position in some authoritative document accessible to those who are invited to lend it money, we should be strongly inclined to recommend intending investors to take care. In these cases, as we have often pointed out, the names of the best agents are no security that people will not lose their money, and Hungary, in its present state, certainly requires to show something more than an introduction by a good house to entitle it to borrow a shilling.

AN EGYPTIAN FINANCIAL MIRACLE .- A statement has been gravely made to the effect that about 7,000,000l of Egyptian Treasury Bonds have been paid since August last without any of the proceeds of the last loan having been applied to such payments; and "that the money has mostly been remitted from Egypt, and has been received by the "Government from the provinces out of their legitimate collec-"tions since September last." The fact thus described would be most interesting and remarkable if true, but is unfortunately so incredible prima facie that the Egyptian Government, if it wishes to improve its credit by the statement at all, should take care to describe the operation more minutely. The wonder, of course, is, that Egypt, being able to produce the larger part of a sum of seven millions from "the legitimate "collections of the provinces" for the purpose of paying a foreign debt within a period of three months, should ever find it necessary to borrow money abroad at all. Say that five millions are all that is meant by the word "mostly" which qualifies the statement as to the source of the seven millions, still five millions in each quarter would mean a surplus for paying foreign debts equal to twenty millions per annum; and if Egypt can find twenty millions in this manner, why seek to borrow in London and elsewhere at rates ranging from 10 to 20 per cent., and even running up, as we hear, to 30 per cent. ? Looking at the statement in another way, it is still sur-The estimate of revenue in the latest edition of the prising. Budget for 1873-74, which we criticised a short time ago, made the total about ten millions, against seven millions only in the original edition; but allowing that Egypt really has ten millions of revenue, the assertion that seven millions of that amount, or the

The Treasury has made two re-imbursements this week, 26 millions on its old debt for advances from the Bank during the war, and 10 millions on its loan of 150 millions specie to

the war, and 10 millions on its loan of 150 millions specie to aid in paying the last instalments of the Prussian indemnity. Money for discount continues abundant, and business has been active at last week's rates of $4\frac{2}{3}$ for commercial paper. Bankers' bills are placed at $4\frac{1}{2}$ to $4\frac{2}{3}$, and signatures of the haute banque at $4\frac{1}{3}$ to $4\frac{1}{4}$. In the foreign exchanges, bills on London at sight are in demand to complete contracts; short paper is unvaried, at 25f 30c to 25f 35c; but the long, which last week obtained a preference of 5 centimes. has declined to Last week obtained a preference of 5 centimes, has declined to the same level. Amsterdam is weaker, at $209\frac{1}{2}$ to $\frac{3}{4}$ short, and $208\frac{1}{3}$ to $208\frac{1}{4}$ long, the 100 floring at three months; Berlin, 369 to 370 the 100 thalers, at three months; Frankfort, 211 to 2111 the 100 florins, at three months; St Petersburg, 332 to 333 the 100 roubles, short, and 331 to 332 long, at three to 333 the 100 roubles, short, and 331 to 332 long, at three months; Madrid, long is heavy, at 512 to 513, but the short is demanded at 515 to 516 the 100 piastres, at three months. Italy is weaker, at 14 to $14\frac{1}{3}$ dis. at sight payable in paper, and $\frac{1}{4}$ to $\frac{1}{2}$ dis. in gold. There has been an inquiry for gold twenty-franc pieces for the East at 2f 50c prem. per thousand, and If 25c for ten-franc pieces.

The French Government Stocks have been remarkably steady this week, presenting only variations of a few centimes from day to day, but constantly upward. Italian Fives have

months for paying a foreign debt is astounding. The analogous operation in England would be that without having recourse to a loan about fifty millions cut of a revenue of seventy millions should be collected in a single quarter. Clearly the phrase, " the legitimate collections of the provinces," must be used in a very peculiar sense, and although it is obvious that Egypt has in fact been squeezed very hard lately to meet the Government obligations falling due, the statement that seven millions has been "mostly" so squeezed is staggering, and is not to be believed without proof. Quite apart from the light which it would throw on the financial condition of Egypt, an account of the particular resources from which the seven millions were obtained, showing how much from each resource, would be every way most interesting, and we recommend the publication of the account. We observe another statement to the effect that the Egyptian Government is about to publish n ten years' account of its actual receip's and espenditure, which is said to be highly satisfactory. That account will also be interesting, and we hope to have the opportunity of criticising it, as it is in fact such an account we have been asking for during the last few months. We should have been quite content with an account for two or three years back only, but if the Egyptian Government can give a series for ten years so much the better, as it will then be possible to explain what Egyptian progress or retrogression in finance has been for that period, and so obtain some guidance as to the means and possibilities of the future. In a letter from Mr Oppenheim, which we published, replying to our criticisms on the two varying editions of the Egyptian Budget for 1873-74, he suggested that there was nothing to prevent the Egyptian Government fabricating the accounts. The process of fabrication, however, would not be easy in a series of accounts extending over ten years, and accompanied, as it ought to be, for completeness' sake, by an annual statement of the situation of the Treasury. We therefore hope at last to have some real data on the subject of Egyptian finance, instead of the fragmentary scraps and buogets which are all that the Egyptian Government has hitherto published.

greater part of seven millions, can be made available in three

ARE "SYNDICATES" PARTNERSHIPS ?- The best attention of members of Syndicates should be given for their own sakes to the decision of Vice-Chancellor Bacon this week in the matter of the "Royal Victoria Theatre Syndicate." A Syndicate being an a-sociation of persons to carry out a specified business object, it is clear that something which has many points of resemblance to a partnership is constituted by it; and although the case in question is not one of those financial Syndicates which have grown so much of late, and whose existence is one of the future dangers of the money market, the fact that it is the first, so far as we know, bearing on the meaning of the word "Syndicate," makes it sufficiently instructive. The constitution and working of the "Syndicate," in fact, resembled closely what is known of the constitution and working of other financial Syndicates. Certain persons in 1871 were invited by circular to acquire the lease of the Victoria Theatre, and re-furnish and re-decorate it, all for 12,000*l*, with the view of afterwards selling it to a company for 40,000*l*. The receipt for the subscriptions was in the following form :--

Received from the sum of pounds, being one-half of my subscriptions towards the sum of 12,000/ for the purchase, alteration, re-decorating, and re-furnishing the above theatre, in accordance with the statements contained in our circular of the , the balance to be paid by me on or before , 1871. day of day of

A petition was now presented to have the association thus constituted declared a partnership, and wound up under the direction of the Court. It appeared that the managers of the Syndicate had entered into a contract for repairs on behalf, as they alleged, of the "partnership," and as the Company which was formed to take the property practically failed, the question of the liabilities of the Syndicate arose. The Vice-Chancellor has decided that a partnership was constituted, and that the managers of the Syndicate were the properly constituted agents of the subscribers. He proceeds, no doubt, to find additional proofs of a partnership in the fact that the subscribers acted as co-owners of the theatre, calling for accounts from the manager and the like ; but the mere circumstance of a partnership having been established in any circumstances, ought to be a warning of the danger which the members of Syndicates incur.

THE ECONOMIST.

In the absence of any official return of the state of the payments on the loan of three milliards. I subjoin an account published in the *Industrie*, for the exactitude of which I leave that journal responsible, although, from the sources of in-formation it has at its command as the organ of the Credit Foncier Company, there is every reason to believe that the details given are correct. According to that Journal the Treasury had received on the 1st December 3,144,000,000f, and a sum of 354,000,000f only remained outstanding, the total amount of the loan, including the supplement for expenses of issues, interest, &c, having been 3,498,000,000f. Deduct-ing the payment of 14f 50c per five frances of rente on sub-scribing, or 610 millions, the instalments since paid up amount to 2,544,000,000f, or an average of 160 millions per amount to 2,544,000,000f, or an average of 160 millions per month. Since the return issued by the same journal in August last the monthly payments have, however, only averaged 56 millions per month. The diminution in those payments is explained by the gradual decrease in the amount of the incluments remaining due. At present when a purchaser demands 5,000f of Five per Cent. Rente, and the stockbroker, not finding it on the market, takes 5,000f of the Loan, and pays up the last instalments, the Treasury receives only 17,500f, while the speculator who sells the scrip receives 75,000. A year ago it was just the contrary. Thus, in November, when the cash purchases of the Fives amounted to 100 millions of Rente, the Treasury received only 54 millions. lions. According to the *Industrie*, the exact amount of the Rente on which the first instalment of 14f 50c only has been paid is 7,600,000f, or a capital of 105 millions of the 354 millions still due.

The new Liquidation Bonds of the City of Paris have been quoted in the official price current since the 1st Decem-These bonds represent the 140 millions at which was fixed the indemnity to the City of Paris for the losses sus-tained in the two sieges, the city on its side undertaking to compensate private individuals for the damage suffered from the same causes. The 140 millions were all ted in nearly equal proportions to the inhabitants and to the municipality. The indemnity is to be paid by the State in 52 half annuities of 4,840,421f, or in twenty-six years, while the city engaged to discharge the claims of the inhabitants in fifteen years. As the state of the municipal funds did not permit of a provision being made for these payments in anticipation, a law of July last authorised the city to create 277,300 bonds of 500f each, producing 5 per cent. interest, and redeemable in 52 half-yearly drawings, the interest and amortisation representing the 52 half annuities of 4,840,424f. The titles are exempt from the transfer duty and the tax on interests and dividends, but pay transfer duty and the tax on interests and dividends, but pay the stamp duty of 1 per thousand. Of the 277,300 bonds, 132,300 represent the claims of private individuals, and 145,000 those of the city. The former had however the option of receiving the amount of their indemnity in the 52 half-annuities, but with few exceptions the bonds have been chosen as more easy of negotiation. The first price quoted on the 1st

December was 440f, but they have since advanced to 455f, and will no doubt reach higher rates, as at 455f they are equal to five per cent, rente at 91f with a premium of 45f on reimbursement. The 145,000f belonging to the city have been ceded to the Banque de Paris et des Pays Bas, but the price has not transpired.

The Assembly has had under discussion since Monday the Budget of 1874, but the credits for the Ministries only, and not the receipts, the Minister of Finance, M. Magne, and the Committee not being in accord on the new taxes to be adopted. I mentioned last week that the Minister and the Committee had agreed for new imposts to the amount of 93,000,000, but that the latter wished to substitute other taxes for the others demanded by M. Magne. The Committee proposed to increase the duty on salt from 100f to 200f per ton, instead of from 100f to 150f, as set down in the Government plan. Were the proposal of the Committee adopted, the duty on salt would be proposal of the Committee adopted, the duty on saft would be one penny per pound and not one franc, as erroneously printed last week. On the other hand, the Committee rejected the increase of the stamp on bills of exchange from 1f to 1f 50c per thousand. The Minister, however, refused to accept either of those changes, and the question having been referred back to the Committee that hear presided with modification it had those changes, and the question having been referred back to the Committee, that body persisted in the modification it had proposed. Neither party appears disposed to give way, and the assembly will probably have to decide. A sort of com-promise has been come to relative to the proposed tax of 5 per cent. on the tariffs of goods conveyed by slow trains. The tax has been reduced to 3 per cent., and has been extended to transports by road and canal, while goods in transit or for exportation are also to be exempt. On those conditions the tax has been adopted by the Committee, but it will only pro-duce $17\frac{1}{2}$ millions, instead of 25, as expected. The difference will be made up by a further augmentation of the duty on passenger receipts.

The revenue from the indirect taxes in the ten months of 1873 amounted to 891 millions, against 727 millions in 1872, and 620 in 1869. Compared with last year the import duties increased from 116 millions to 178; potable liquors, from 229 to 261; native sugar, from 36 to 71; and tobacco, from 218 millions to 239.

The first section of the new line of railway from Paris to Dieppe, by way of Gisors, will be open in a few days. The new route is rather a rectification of portions of the present line than a new one. The section about to be opened is only twenty miles in length, but is of considerable importance, as shorten the journey to England by Dieppe and Newit will

haven by more than an hour. The returns in the Paris Bankers' Clearing-house in Nov. amounted to 206,157,147f.

The loss of the Ville du Havre steamer produced an immediate fall of 25f, from 285f to 260f, in the price of Transatlantique shares, as it was known that the company were in part their own insurers, but 10f of the loss has since been recovered on the publication of a note from the directors. The vessel is valued in the company's books at 4,750,000f, and was insured for 3,500,000f; a sum of 1,250,000f consequently remained at the charge of the company, and will be met to the amount of 750,000f by the insurance account for the present year, and by 500,000f from the reserve of the same account, which on the 31st Dec. last amounted to 2,716,000f, and which, after the present loss has been repaired, will still remain at 2,216,000f.

The Le Creuzot ironworks company has held its meeting of shareholders, in which a report was read showing that the profits for the year amounted to 4,467,556f, of which, after de-ducting 10 per cent. for the management, and 10 per cent. for the reserve, and adding the surplus of 91,422f from the for the reserve, and adding the surplus of 91,4221 from the previous year, there remained a net balance of 3,685,467f, or more than sufficient for a dividend of 20 per cent. to the 36,000 shares. The company had decided on increasing its capital of 18 millions by one-half, rendered necessary by in-crease of basiness, the 27 millions will be then represented by 75,000 shares, the present holders receiving five new ones for three of the old; the remaining 15,000 will be issued at the rate of 600f, and are reserved for the present proprietors. An immediate dividend of 10 per cent was declared, and the rate of 600f, and are reserved for the present proprietors. An immediate dividend of 10 per cent, was declared, and the balance will be distributed in June next by a dividend of 30f to each of the 75 000 war above. to each of the 75,000 new shares.

Clearing-house return		60,628,000	80,539,000	91,643,000	105,553,000

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1863, a deficiency of 8,832,0531; in 1870, an excess of 2,622,5781; in 1871, an excess of 4,756,4691; and in 1872, a deficiency of 332,967l. In 1873, there is an excess of 819,180l.

In 1863, the 8 per cent. Bank rate was maintained, but the excited demand for money had subsided. Six months' bills were quoted at $\frac{1}{2}$ per cent. above the three months' rates. The Russian exchange, gradually raised to par by the agency of the State Bank, had fallen suddenly 10 per cent., and with it the value of the paper rouble. Denmark was making warlike preparations to defend Schleswig-Holstein.

In 1870, money was unusually abundant here on account of the continuance of the continental war. Complete failure characterised the attempt of the army of the Loire to relieve Paris.

In 1871, the bank rate was further reduced. For the time the repayments of its debt by Germany counterbalanced the instalments paid to that country by France.

In 1872, a further and generally unexpected reduction occurred in the Bank rate; the position of that institution was very strong, owing to the remarkably large amounts of notes and gold returned from circulation, and as no pressing German demands existed at the time, money was tending downwards. M. Thiers had modified his Government, but the crisis at Versailles continued.

The account of the Bank of France for the week ending December 11 shows the following changes

Dec. 11. £		Dec. 4.		Increase.		Decrease.

DISCOUNT AND MONEY MARKET .- The ease in the money market has continued since last week, although there has been a rather more steady demand, partly on account of the Stock Exchange settlement, concluded to-day, and partly in preparation for the Christmas holidays and the close of the year. On Thursday, accordingly, no surprise was felt at the reduction of the Bank rate from 5 to $4\frac{1}{2}$ per cent. Since then the open market rates have approximated more closely to the Bank rate than they have lately done, though still with a tendency to ease. This afternoon, the minimum for 2 and 3 months' Bank bills in the outside market has been no better than 4 to $4\frac{1}{4}$ per cent., and there has also been a good demand at the Bank. Money at call in English Government Securities is 4 to $4\frac{1}{2}$ per cent.

As we anticipated a fortnight ago, no accidents having happened, the Bank return published this week exhibits a material improvement in the reserve, as contrasted with only a moderate improvement last week, which was owing to the neutralising effect of the ordinary increase of the active circulation at the end of one month and the beginning of another. This week the reserve has been increased by three causes of improvement combined—an influx of gold from abroad amounting to 333,000/, a return of coin from the interior amounting to 285,000l, and a diminution of the active circulation amounting to 395,000l, making the total addition to the reserve 1,013,000%. The other changes of the week are also generally in favour of the Bank, the private securities having been diminished 579,000l, while the aggregate deposits have not materially increased-a decrease of 109,000l in the private deposits setting off to some extent an increase of 544,000l in the public deposits. The total of these public deposits has now increased to 6,815,000l, and the gradual increase of this item must quickly have the effect of strengthening the Bank at the expense of the open market.

The Continental exchanges have again been in our favour this week, and the American exchange has farther advanced to 1081.

THE STOCK MARKETS .- During the week business has been moderately active, and the half-monthly settlement has been completed without much difficulty. The reduction in the value of money has of course had some effect; but other influences, such as the introduction of important new loans by Foreign Governments, and the prevalence of black fogs throughout the City, have tended to restrict until to-day any decidedly favourable movements. The market for British Rail-way stocks has been the best feature of the week, there being with few exceptions a general advance to record therein ; but Foreign Stocks have felt the evil effects generally attendant upon the introduction of new loans. Consols have been steady in price, and some improvement continues to be shown in Colonial Government debentures. Indian Railway guaranteed stocks have likewise risen to a fair extent, the dividend payments being so near at hand. Canadian Railway securities have, however, not done so well; and, until to-day, a fractional decline was to be generally reported therein. The fluctuations in United States securities of all kinds have been rather considerable, some changes being to the advantage of holders, and others the reverse. Amongst he Government Stocks, the "1865" loan has moderately improved ; while as regards the Railroad undertakings, Erie shares, after falling nearly 3 dols, have partially recovered, New York Central shares have risen, and Atlantic and Great Western securities have relapsed in market value. Foreign Railway shares and obligations have, for the most part, fully maintained last week's quotations; and the movements in Bank shares have, as a whole, been favourable. The miscellaneous classes of securities have not attracted much attention. Telegraph undertakings, with the exception of West India and Panama, have ruled dull; and Land shares have receded, more especially Australian Agricultural. There has within the past day or two been a rather better demand for Mining ventures. There was on Monday some considerable excite-ment, owing to the failure of a Stock-broker, who had a heavy speculative account outstanding for the fall open. Today opened quietly ; but in the afternoon, when the Settlement was completed, a general improvement took place.

ENGLISH GOVERNMENT SECURITIES .- Although on Tuesday and Wednesday a slight relapse took place in the British Funds, there has, on the week, been a further fractional advance, as might have been expected from the reduction in the Bank rate of discount, and the near approach of the dividend payment on Consols. Indian Government Stocks continue quiet ; but Bank Stock has risen 1 per cent. To-day, quotations were unaltered.

COLONIAL GOVERNMENT SECURITIES. - The movement has been exclusively upward, the following having advanced :----Canada, 5 per Cent., 1; Cape of Good Hope, 41 per Cent., 1; New South Wales, 1872-98, 1/2; South Australian, 1881-90, 1; ditto, 1891-1900, 1; ditto, 1901-13, 1; Victoria, 1891, 1; ditto, 1883-5, 1/2.

FOREIGN GOVERNMENT SECURITIES .- As intimated last week, Hungary has offered a new loan in this market for pablic subscription. The issue has been moderately well received, and naturally enough the subscriptions for this and the recent Russian Loan, while it is known that other issues are in the background, have caused some relapse to be apparent in various of the more speculative descriptions of Foreign Stocks. It will be seen below that Buenos Ayres has also brought forward a new loan for sanitary purposes

Thus, Turkish, Peruvian, Hungarian, Uruguay, and the Khedive Loan have all receded to a noticeable extent. In Costa Rica Bonds a still more decided fall has taken place, In there being considerable anxiety felt and expressed with regard to the financial stability of this American Republic. On the other hand, Russian Stocks show a fair recovery from the trifling depression of last week, and Austrian and French Rentes have well maintained their ground. The Egyptian, 1868, and Turkish, 1869, Loans, have been steady almost throughout the week. Spanish Stock rose rather considerably on Monday, owing to a report that this year's divideads had been arranged for, and to the fact that the Cuban difficulty was in a fair way of settlement, but a relapse has since taken place. The rates for "continuations" in this department during the settlement were lighter than on the last occasion. To-day, quotations show a rather general improvement, the Egyptian 1868 Loan advancing as much 28 3.

The following are the changes for the week, taking the latest unoilicial quotations :-

15 5 6 Hungarian New 6 per cent. Loan.—Messrs Rothschilds invite subscriptions for 7,500,000/ 6 per cent. Treasury Bonds (153,000,000 Reichsmarks German currency, or 76,500,000 florins Austrian silver currency), redeemable at par on or before 1st December, 1878. The bonds will be divided into five series of 1,500,000/ each, and the Government reserves the idult to wohen at our model by giving six mouties' notice right to redeem at any period, by giving six mouths' notice, either the whole of the bonds, or one or more series of them to be drawn by lot. It is stated that, besides the guarantee of the State, this loan will participate in the security recently created, by which the State Domains are pledged for loans to the amount of 15,000,000/, and which also enacts that all receipts from the State Domains are, on the sales taking place, to be used in redeeming these loans. The issue price is 89 per cent.; and of the whole amount, about 6,000,000*l* is offered for subscription in London, Berlin, and Frankfort, the balance having been already placed. Both interest and principal will be payable in London in sterling, in Berlin and Frankfort at the exchange of 20.4 marks per \pounds , and in Vienna and Pesth at 10.2 florins Austrian silver currency per \pounds . The coupons will fall due on the 1st June and 1st December.

Buenos Ayres 6 per cent. Stering Loan .- Messrs Baring Brothers and Co., have been empowered by the Government of the province of Buenos Ayres to issue a loan for 2,040,800/ nominal, in bonds of 500/ and 100/ each. The coupons will be payable by this firm on the 1st April and 1st October; and

THE ECONOMIST.

the principal by a 1 per cent. premium accumulative, sinking-fund, to be applied half-yearly from the 1st Oct., 1874, to drawings at par. The object of the loan is to effect sanitary improvements, more particularly in the drainage, of the City of Buenos Ayres; and the price of issue is $89\frac{1}{2}$ per cent., payable over a period of seven months.

ENGLISH RAILWAYS .- There has again been a very general improvement in the market values of Home Railway stocks. Although during the arrangement of the halfmonthly settlement there was a temporary relapse in quota-tions, "contangoes" ruling unusually high, there has since been renewed buoyancy, and purchases have been already made to a fair extent for the new "account." The reduction in the Bank rate of discount has again stimulated speculative operations for a rise, and it was this decided tendency of the market that caused the rates for "continuations" on Wednesday to be so high. On Saturday last a very fair improvement took place, and on Monday, owing to the unexpected failure of the broker above mentioned, prices further advanced amidst a scene of much excitement. During Tuesday, Wednesday, and Thursday, as has already been stated, less buoyancy was visible, and the dense fogs prevailing in the City, added to the rise in the price of coal, without doubt had their effect. Still, upon the week the variations in prices, aided by a revival during the past two days, have been decidedly upward. Great Eastern, Great Northern "A," Luncashire and Yorkshire, Manchester and Sheffield, South-Eastern Deferred, North-Eastern, North-Western, and Brighton, all exhibit changes of a very favourable character. The traffic returns of the week have shown a moderate increase. M-tropolitan Stock has been exceptionally weak, and North British has, until to-day, shown little vitality; but during some weeks pre-viously this Stock experienced a marked recovery. To-day, the Railway market opened in but slight animation, and remained without feature during the morning. In the afternoon, however, there was a considerable demand for all descriptions of Stock, and prices then advanced up to the close. London and Brighton, and Chatham Preference rose $1\frac{3}{4}$; North British, $1\frac{1}{2}$; Great Eastern, $1\frac{1}{8}$; Great Northern A, Chatham and Dover, North Western, North Eastern, and South Eastern Deferred, 1; and other Stocks, $\frac{1}{4}$ to $\frac{3}{4}$. Metropolitan and Metropolitan District were, however, exceptionally lower.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :-

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Dec. 6 to 894,254l, being an increase of 72,4221 on the corresponding week of last year. The aggregate receipts for the half-year to date are now 21,317,494l, being an increase of 1,551,604l on the corresponding period of last year. The increases for the week are at as high a rate as any during the half-year, and the usual falling off of traffic towards Christmas is scarcely apparent. The principal increases for the week have been :--Midland, 9,5621; North-Eastern, 9,1791; London and North-Western, 9,1061; Great Western, 7,0381; Great Northern, 6,0401; Great Eastern, 5,3761.

JOINT STOCK BANKS .- There is little change in these values on balance, the following having advanced :--Provincial of Ireland, 2; London and County, 1; Midland, 1; Consolidated, $\frac{1}{8}$; Agra, $\frac{1}{4}$; Anglo-Australian, $\frac{1}{2}$; Bank of South Australia, 1; National of Australasia, $\frac{1}{4}$. On the other side, London and South-Western have declined $\frac{1}{2}$; City, $\frac{1}{2}$; Anglo-Hungarian, $\frac{1}{2}$; Bank of Constantinople, $\frac{1}{2}$; Chartered of India, Australia, and China, $\frac{1}{2}$; Chartered Mercantile of India, London, and China, $\frac{1}{2}$; London Bank of Mexico and South America, 1.

TELEGRAPHS .- The Eastern lines have improved a little during the week, Indo-European having advanced 1; Eastern, $\frac{1}{4}$; Eastern Extension, $\frac{1}{8}$; West India and Panama have also advanced $\frac{1}{2}$; Hooper's Works, $\frac{1}{4}$. On the other side, Anglo-American have fallen $\frac{1}{2}$; Brazilian Submarine, $\frac{1}{4}$; Cuba, $\frac{1}{4}$; Mediterranean Extension, $\frac{1}{4}$; Reuter's, $\frac{1}{2}$.

MINES .- British mining shares have been dull, the movement being adverse, with such exceptions as Tin Croft, a rise of 1; Wheal Grenville, 1; Wheal Seton have fallen 5; West Seton, $2\frac{1}{2}$; West Chiverton, $\frac{1}{2}$; Wheal Mary Ann, 1; Devon Great Consols, $\frac{1}{2}$. In the foreign market, Flagstaff has Great Consols, $\frac{1}{2}$. In the foreign market, riggs and has advanced $\frac{3}{4}$; Last Chance, $\frac{1}{2}$; New Quebrada, $\frac{1}{4}$; Rio Tinto, $\frac{1}{4}$; Chontales, $\frac{1}{8}$; Vancouver Coal, $\frac{1}{4}$. On the other side, Panulcillo Copper have declined $\frac{1}{4}$; Sierra Buttes, $\frac{1}{4}$; Scottish Australian, New, 1/8.

THE ECONOMIST.

[Dec. 13, 1873.

MISCELLANEOUS .- There has been comparatively little movement in these securities this week. The following are higher :--Share Investment Trust, 1; Spanish National Lands, 1; Nantyglo and Blaina Iron, 5; Eobw Vale Steel, $\frac{1}{2}$; Credit Foncier of Mauritius and Fore Street Warehouse, each $\frac{1}{3}$; Fairbairn's Engineering and Millwall Ironworks, each $\frac{1}{4}$; Trust Agency of Australia, 1 paid, $\frac{1}{8}$; North British, 1; Mercantile and Marine Insurance, each $\frac{1}{8}$; Commercial Union, i. In tramways there has been a rise in Dublin, Lisbon, and London of a $\frac{1}{4}$, and in Madras of $\frac{1}{2}$; Italian Irrigation Guaranteed Bonds. 1; and Phosphate Sombrero, $\frac{1}{4}$. The Gularanteed Bonds. 1; and Phosphate Somorero, $\frac{1}{4}$. The following are depressed:—Railway Debenture Trust, $\frac{1}{4}$; ditto Share, $\frac{1}{2}$; Copper Miners of England, $\frac{1}{2}$; Ifton Rhyn Colliernes and Pelsall Coal, each 1; City of London Real Property, 1; International Financial, $\frac{1}{8}$; Australian Agri-culture, 4; Peel River Land, 1; Van Diemen's Land, $\frac{1}{2}$; British Indian Tea, $\frac{1}{4}$; North Metropolitan Tramways, $\frac{1}{4}$; French Asphalte Company, 1; National Safe Deposit, 1; and Phosphate Sewage, 1.

BULLION .- The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake on the transactions in bullion during the week :---

Gold.—With the exception of a small order for Holland, the only exports during the past week have been 10,600/ to America and 25,000/ exports during the past week have been 10,600/ to America and 25,000/ to Alexandria; these amounts consisted of sovereigns withdrawn from the Bank. On the other hand, bars, to the value of 305,000/, have been purchased by that establishment; and unless the German demand should revive, the sums now near at band from Japan, Alexandra, and elsewhere, will also be sent in. The Illimani has brought 46,880/ from the Brazils, and the P. and O. steamer 26,580/ from Bon.bay. Silver.—The amounts to hand during the week have been but small;

They have come chiefly from New York, and the total is about 74,300/. The price has slightly improved during the last day or two, and may now be quoted at 5816 d per ez. standard. Mexican dollars are firm at the last quotation of 565d per oz. The amounts received during the past few ders have have never limited

amounts received during the past few days have been very limited. Exchange on India for Banks' Drafts at 60 days' sight is ls 9∦d per Rupee.

According to the Gazette return of this evening, the movement in the precious metals during the week ended Dec. 10, has been as follows :-Gold-import, 200,9751; export, 121,5801. Silver-import, 159,1231; export, 144,9551. Gold value 13,000/ has been withdrawn from the Bank to-day, principally for Belgium.

COURSE OF THE EXCHANGES.

NOTICES AND REPORTS.

STOCKS.

New Granada Bonds .- At the meeting of bondbolders reso-New Granada Bonds.—At the meeting or bondbolders reso-lutions were passed for the abandonment of the proposed Colombian Land Company, and it was decided that the moneys now in the hands of Messrs Baring, in London, shall be applied to the redemption of the Colombian Bonds issued in virtue of that Convention by drawing at par. Egyptian Finance.—The Times of the 12th inst. contained

some interesting details relative to Egyptian finance, and the following is an extract therefrom :--

It appears that on the 5th inst. nearly 2,000,000l of Treasury Bonds, issued by the Egyptian Government about 18 months ago, fell due and were all payable in London. They had been negotiated by Messrs Oppenheim, Nephew, and Co. at the time, and were domiciled with their agents. The amount had been remitted by the Egyptian Govern-Oppendism, sectors, and that been remitted by the Egyptian Govern-their agents. The amount had been remitted by the Egyptian Govern-ment through various firms, who had to pay the money to Messra Oppenheim's agents, the latter issuing their checks for payment to the holders of the Treasury Bonds on the same day, having been instructed not to make use of the three days' grace. It is understood that the amount did not come from proceeds of the recent loan, and likewise that although an estimated total of about 7,900,000/ of these Egyptian that although an estimated total of about 7,000,0000' of these Egyptian Treasury Bonds had been paid in London since August last, none of the proceeds of the loan have been applied to such payments. The money has mostly been remitted from Egypt and has been received by the Go-vernment from the provinces out of their legitimate collections since September last. This explains the large shipments of gold lately made there for England and France, at a season when usually gold is sent to that country for purchases of cotton and other produce. The reasen for the Egyptian Government not having drawn the means for meeting their engagements this year from the proceeds of the recent loan, is extheir engrgements this year from the proceeds of the recent loan, is ex-plained to have been as follows:—The contractors for that loan have paid the Government in all till now 12,000,000/, but only 3,000,000/ in eash, and the rest in Treasury Bonds maturing next year, the Egyptian Government hav ng conceded that right to them. The rate of discount at which the Government agreed to receive the bonds was a favourable one for the contractors, who consequently handed in the longest they could find. Thus the Government, while liquidating later engagements, had to provide, from other resources, for those falling due in September, October, November, and December, and were at times somewhat per-plexed. The Minister of Finance applied to the contractors, who refused to assist him, and blamed the Government for not having adapted their arrangements to their wants. The contractors have prevailed upon the arrangements to their wants. The contractors have prevailed upon the Khedive's Ministers to make up a strict account of receipts and ex-penditure for the last ten years, which is said to be highly satisfactory, and will be published shortly. The last instalment of 500,000/ due for reimbursement of the Egyptian Railway Loan on the 5th of January next, is also on its way to this country. That loan was originally for 3,000,000/. It was centracted for in 1865 by Messrs Oppenheim, and issued in 1866 by Messrs Fruhling and Goschen. On the 5th January, 1874 it will be contract of off 1874, it will be entirely paid off. RAILWAY COMPANIES.

American Railroad Interest Payments.—Messrs Morton, Rose and Co. announce that the coupons on the 6 per cent. First Mortgage Gold Bonds of the Union Pacific Railroad, the 7 and St Paul Railroad, and the 6 per cent Prince Edward Island, due on the 1st January next, will be paid at their per cent. banking house.

banking house. Bombay, Baroda, and Central India:—The net earnings for the past half-year amount to 144,912/, or at the rate of 4/0s 6d per cent. An exceptional outlay has been incurred by the restoration of three bridges on the line, and but for the expenditure on these, the net earnings would have been at the rate of 4/11s 6d per cent.

Cornwall Minerals Railway 6 per cent. Preference.—Subscriptions are invited for 50,000 in 6 per cent. 100/ Preference shares, being part of the entire preference capital of 375,000. The price of issue is par, or, reckoning accrued interest and discount on prepayments, 96l 5s per share. The works are

stated to have been actively proceeded with. Furness.—At a special meeting the following resolutions were agreed to:—I. "That the directors be empowered to raise by mortgage, or debenture stock, 333,000/, under the powers of the Furness Railway Act, 1872." 2. "That the directors be authorised to convert into 41 per cent. perpetual preference stock the 170,000/5 per cent. redeemable preferential stock of the company; also the 750 20/ 5 per cent. redeemable preference shares D, and the 250 20/ 4_2 per cent. redeemable preference shares D, late Whitehaven and Furness Junction Railway capital."

Grand Trunk of Canada.-The President is unable to return from Canada in time for the pro forma meeting on the 18th

From Canada in time for the pro-formal meeting on the 18th inst., which has been further adjourned till January. Great Indian Peninsula.—The revenue account shows that the gross earnings for the half-year ended 30th June amounted to 1,068,292/, against 1,066,638/ for the corresponding period of 1872; and the expenditure to 600,982/, against 607,736/ in 1872. A net profit is shown amounting to 467,309/, against 458 901/last year which with the net amount (65.365/) con-1872. A net profit is shown amounting to 407,3039, against 458,901l last year, which, with the net amount (65,365l) contributed to the special funds during the half-year, is at the rate of 4l 19s 2d per cent. on the capital expended. The reduction in the expenditure is due to the diminution in the number of train miles run, and the permanent way and works

THE ECONOMIST.

have been kept in thorough repair at a cost of 96/18s 8d per mile, as compared with 105/10s 3d per mile in 1872. The receipts on the share capital amounted on the 30th June to 14,469,172/, on 5 per cent. debenture bonds to 1,304,250/, the cash receipts on 4 per cent. debenture stock, 2,475,556/, and the premiums on stocks and shares deposited with Govern-ment as capital not bearing interest, 229,602/, making a total of 23,478,582/. The expenditure amounted to 21,601,581/, and balance of stores account to 1,383,101/, leaving an unexpended balance of 493,900% 1,278 miles were opened for traffic, of which 326 miles were double and 952 single lines; 2,103,723 train miles were run during the half-year, against 2,374,441 in the same period of 1872, being a reduction of 270,718 miles. Through communication between Bombay and Madras has been established by the opening of the viaduct over the river Kistnah on the 9th Oct. last. Hango's Railway (Finland) 5 per Cent. Debentures.—Messrs J.

and A. Scrimgcour are authorised by Messrs Forbes, Forbes, and Co. to offer for public subscription 700,000l of the above debentures at 75l per 100l. This railway, which is now completed, and was opened for traffic on the Sth October, is 93 pleted, and was opened for traffic on the Sth October, is 93 miles in length, connecting the port and harbour of Hango, in Finland, with the State line to St Petersburg. Its importance is described by the following extract from a letter of the *Times'* correspondent at Berlin:—"In all probability the Bay of Hango will be made the principal port of Russia in the Baltic. It is, in fact, better fitted for such ε purpose than any other harbour north or south of St Petersburg. With a *minimum* depth of 30 feet, and a roadstead entirely open to the roll of depth of 50 feet, and a roadstead entirely open to the roll of the western sea, it is seldom frozen to an extent that prevents vessels from coming close in shore. The anchorage, too, is ex-cellent." The dividends are payable in London, and the prin-cipal by a sinking fund in 85 years. The company has valu-able privileges, but no state guarantee.

Kursk-Charkow-Azow.— The numbers of bonds drawn for redemption at par on the 1st March have been published. Louth and East Coast.—The share list will be closed on Saturday next for London, and on the following Monday for

the country. Ottoman.—It is announced that the Company have received from the Turkish Government mandats on Constantinople and bills, in payment of the guarantee for 1872, amounting to about 85,000/.

Ottoman-Smyrna to Aidin .- Holders of drawn bonds who are prepared to accept payment of the same -40l in cash and the balance (60l) by a debenture for 100l, bearing interest from the 1st ult.—can receive the same by sending their bonds to the Company's offices on or before the 16th inst.

BANKS.

BANKS. London Chartered of Australia,—A disposable balance is shown for the half-year of 49,104/, out of which a dividend has been declared at the rate of 8 per cent. per annum, free of income tax, and the balance of 9,104/ carried forward. It is stated that the profits of the half-year exceeded those of the corresponding period of 1872 by 2.949/. London and River Plate.—A dividend is recommended of 7 per cent. for the half-year ended 30th September, making, with the

interim payment in June, a total of 12 per cent. per annum. 10,000/ is added to reserve, and 8,941/ carried forward. The deposits on the 30th September were 2,805,600/.

ASSURANCE COMPANIES.

Gresham Life Assurance.—At the annual meeting it was stated that the new premiums for the year were 44,338/; that the annual income amounted to 453,314/; and the realised assets to 1,886,993/; and a bonus of 57,000/ was declared divisible.

MISCELLANEOUS COMPANIES.

Amoor River Navigation.—The numbers are announced of 60 bonds, amounting to 6,000/, of the issue of 210,000/ Six per Cent. Bonds, which will be paid off at par, on and after the 1st proximo, at Messrs J. Henry Schröder and Co.'s. Barbadoes Gas, Limited.—Capital, 100,000/, in 20,000 shares of 5/ each; 14,000 of which are now offered to the public.

The company is formed to acquire and carry out the concession for lighting with gas the island of Barbadoes; and it is proposed to commence by lighting the City of Bridgetown (for which the company has already secured the right), stated to contain upwards of 10,000 houses and many important public buildings. The maximum rate chargeable to private consumers is fixed at 15s per 1,000 cubic feet, and for street lamps about 6/ 5s per annum. The authorities are to have the power to purchase the works at any time after fifteen years, from 1st January, 1875, at 20 years' purchase at 6 per cent. on the capital expended. The works are to be completed by June, 1875.

Buenos Ayres National Tramways .- The working for the first 9 months of the present year shows a loss of 2,7811; and it is stated that the passenger receipts have been very disappoint-ing, and that the profits expected from the carriage of mer-chandise have been delusive. The company is stated, however, to have no liabilities, sufficient profits are anticipated to cover debenture interest; and as the city is increasing in size the

profits of the company may be expected to increase without a

corresponding enlargement of expenditure. Ceylon Company.—The high prices realised enable the direc-tors to replace the amounts drawn from the reserve of undivided profits to pay the two last dividends, and warrant their recommending an interim dividend of $3\frac{1}{2}$ per cent., being at the rate of 6 per cent. per annum plus the amount post-poned in June. The crop now being gathered will, it is poned in June. The crop now being gathered will, it is stated, be small, but prices are expected to compensate the deficiency: and favourable reports as to the tea and cinchona cultivation.

City of Buenos Ayres Tramways, Limited—6 per Cent. Deben-ture Stock.—The directors invite tenders for 95,000l in 6 per Cent. Perpetual Debenture Stock, being a first charge upon the net revenue, which already amounts to 34,000l per annum. The object of the issue is to purchase a further 114 miles of tramway. The advertisement will be found in our adver-

tisement columns. Ebbw Vale Steel, Iron, and Coal.-An interim dividend at the rate of 5 per cent. per annum has been declared payable on and after 1st prox.

and after 1st prox. Italian Irrigation.—It is announced that coupons due 1st January will be received at the office, No. 7 Crosby square, on or before the 15th inst., and that the drawing for 1873 will take place on the 17th inst. Lebong Tea.—An interim dividend at the rate of 10 per cent.

per annum has been announced.

Madras Tramways .- Interest during construction will be

matches the rate of 8 per cent, per annum. Manchester Corporation 4 per Cent, Stock.—The Corporation of Manchester invite applications for "a limited amount" of their Perpetual 4 per Cent. Consolidated Stock, secured upon the entire rateable property in that city. The stock will be issued in any amount divisible by 10!; with interest payable on the 24th June and 24th December in Manchester, London, Edinburgh, and other leading cities.

Montrotier Asphalte and Cement Concrete Paving, Limited,-Montroller Asphalle and Cement Concrete Facing, Limited, — vice-Chancellor Sir James Bacon has appointed Mr James Cooper, of the firm of Johnstone, Cooper, Wintle, and Evans, joint liquidator with Mr Frederick Benjamin. Nantyglo and Blaina Ironworks.—At the adjourned meeting the supplementary report was received, but not adopted; the projection of the present directors was acreed to: and also

resignation of the present directors was agreed to; and also the election of a new board on the 7th prox., to which date the meeting was further adjourned.

Swansea and Neath Colliery, Limited.—Capital, 200,000/, in shares of 10/ each, of which 15,000 are now offered for sub-scription. It is proposed to purchase for 59,000/ in cash, 20,000/ in shares, the Brynwilach colliery, in the parish of Llangafelach, to take a lease of the Llettyrafel estate in the parish of Cadoxton, and an assignment of the leases of ad-ionizing properties. The first monitored cotate is short for joining properties. The first-mentioned estate is about five miles from Swansea, is stated to be 610 acres in extent, and is connected with the Swansea Canal by a private railway, and wil. also be accessible by a projected branch of the Great Western Railway. The other estate is within six miles of Britonferry, and is stated to comprise 700 freehold acres. The colliery is already provided with plant and machinery. United Limmer and Vorwohle Rock Asphalte.—The gross sales

during the financial year are stated to have amounted to 42,997, against 36,485/ in the previous year, but the profit has not been so large, owing to the rise in wages and cost of working. The net profit is 8,636/, out of which it is proposed to pay a dividend of 6s per share, or 3 per cent., and to set aside the balance (2,980/) as the nucleus of a fund for recouping the purchase money paid for the properties in Germany.

Wire Tramway, Limited .- The Vice-Chancellor Malins has appointed Mr James Ford (James and F. Ford) and Mr Samuel C. Fox official liquidators.

MINING COMPANIES

Brynmawr Coal and Iron, Limited.-Capital, 200,000l, of which 100,000l will be handed over to the vendors in paidup shares as part payment of the purchase money; and they also receive in part payment 50,000*l* in 5 per cent. mortgage debentures. Subscriptions are now invited for 2,500 fully paid 10/ shares, constituting part of $100,000l\,\rm A$ Preference shares, of which the balance has already been subscribed. The undertaking is established to purchase and work, as one concern, the collieries and ironworks principally owned by the late Mr John Payne, which consist of the Tiller and Milfrain collieries, iron and tin-plate works, and a limestone quarry.

Connorree Musing, Limited.—Creditors are required to send particulars of their claims by the 15th of January to Mr. Thomas Baker, of Dublin, the official liquidator.

Santander Iron Ore, Limited .- Capital, 80,0001, in 101 shares, which have been subscribed for privately. It is intended to acquire and work iron ore mines in Spain, and contracts have already been made for some important groups of mines near the Bay of Santander.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The large arrivals of foreign wheat have operated in favour of buyers this week, and there was in many instances a falling off in prices at last Saturday's provincial markets, which has not since been recovered. The arrival of so much grain is, no doubt, due to the hastened forwarding from America, and that being so can only temporarily affect the markets, but the effect is strong enough to induce great caution in buying. Prices have been steady at New York all the week for flour, and there has been a slight rise in corn, showing that the weakness here is not immediately due to the state of American markets, but in fact to a rather more than ordinary restriction of purchases even for the season of the year, and to a tion of purchases even for the season of the year, and to a temporary excess of supply. It is only secondary qualities too of home-grown wheat which have yielded, the finer corn maintains its value Prices are also steady on the continent, although there has not been any substantial advance, and there, as here, buying is small. Business has been much interfered with this week owing to the previlence of fog, which in Mark large for two or three days interfered with the Mark lane, for two or three days, interfered with the examination of samples, and which was so dense on the river as to prevent the landing of wheat from the ships. Oats and barley are only in moderate demand, and prices without distinct change. Flour is slightly dearer at Liverpool, but elsewhere there is no alteration in price.

With a money market which has ceased to check the free course of purchases, the value of cotton has yet declined during the week, and the cause seems to be, on one side, the large receip's now arriving at American ports, and, on the other, a contracting market for cotton goods in the East. The American raw material bas again been weakest in price, but Surats and other descriptions also show depression on the week. At Manchester stocks are accumulating, and concessions have been made rather more freely by producers, little business resulting however. The Board of Trade figures show a considerable falling off in the exports of cotton goods for the past eleven months, compared with the corresponding period last year, but, as Messrs Ellison's statistics show that the consumption of raw material has increased, it may be in-ferred that the home demand has made up for deficient foreign requirements ; further, as, according to the same authority, the continental consumption of raw cotton has fallen off, while in this country it has increased, there is no evidence to show that foreigners are dispensing with our manufactures to any extent.

Prices for colonial wools have not alterel during the week, and there has been a fair demand. In the North cheaper money appears to be producing some effect, but prices for the home clip are not lower, both farmers and staplers holding very tenaciously, so that the real aspect of the markets is not altered. As regards yarns, the same cause tends to restrict purchases, particularly from abroad. Foreign merchants look for a cheaper market shortly, and strive to press it down now beyond what ruling prices for wool will allow. The market for cloths and piece goods is small, and trade quiet both at Leeds and Bradford. The absence of American buyers from the latter particularly tends to make business almost nominal, so far as export is concerned.

Except in South Staffordshire, prices in the iron trade have tended further downwards during the week, but in that district both finished and pig iron are still-firm, though there are many irregularities in the price of Staffordshire coal. In the north of England orders are not numerous, but some tem-porary demand for pig iron has been experienced; rails, however, are little inquired for, and prices are weak. The coal trade of South Wales appears likely to be steady during the winter, and a revived activity in the demand for and produc-tion of iron is looked for at the beginning of the year. A plan for regulating the wages of operatives in the iron-making districts of South Staffordshire and the North of England on a definite sliding scale is being discussed, and as a reduction is possible shortly, another cause of uncertainty is added to the confusion in present prospects.

A full half of the business week has been interfered with by the immovable mists which have hung about the city, and the the immovable mists which have hung about the city, and the produce markets, especially where the display of samples is necessary, have been very inactive. Sugar is firm, and there is rather better inquiry for refined. The public sales of coffee have been repeatedly postponed, but prices show again an advance with an active demand. Cocoa is firm though few sales are reported. There is a steady tone in the tea market, the recent depression continuing to disappear gradually. sales of rice, both on the spot and in floating cargoes, have been large. The advices at the beginning of last month from the rice-growing districts of Rangoon and Bassoin were favourable as recards the growing cross, but stocks were low. favourable as regards the growing crops, but stocks were low. The Bengal deficiency had not made itself apparent in those markets, but the demand on that account will no doubt make the season a most profitable one for the Burmese growers. The condition of the crop, strange to say, is expected to depend on a less plentiful supply of rain, Bengal having suffered entirely from the want of that moisture which has fallen rather too heavily on the neighbouring district. A strong demand has continued for jute at full prices, and sales have been considerable. Tallow is steady at a slight decline. A small business at unaltered quotations has taken place in foreign copper; for tin, both Straits and Banca, demand is active at a considerable advance.

EXTRACTS FROM TRADE CIRCULARS.

(From Messrs Ellison and Co.'s Monthly Cotton Report, dated Liverpool, Dec. 9.)-Our last report was issued on the 10.h November, since which the general tone of the market has been quietly steady, with sundry fluctuations in prices, resulting in a decline of about $\frac{\pi}{16}$ d per lb in American from the rates current a month ago, but no change in long staples, and an advance of {d to {d per lb in Surats upon the pre-viously exceptionally depressed prices. An increased business has been done in arrivals, and after numerous intermediate fluctuations prices close about $\frac{1}{16}d$ to $\frac{1}{5}d$ per lb higher than the rates current a month since. Quietness has been the ruling feature of the Manchester market. Except for certain qualities of shirtings suitable for China, the demand has been of a slow and retail character throughout the month. The improved state of monetary affairs has had a good effect upon the market, but this has been almost counterbalanced by the unfavourable influence of the discouraging news from

THE ECONOMIST.

Calcutta. The aggregate business done has scarcely equalled the rate of production, and the stocks of some classes of goods are larger than they were a month since. The ac-cumulation, however, has not been very important, and most producers are still working to order; some, indeed, are engaged for some weeks to come. The final quotations for yarns show very little change from the rates current a month ago. Printers are 1¹/₂d to 3d per piece lower. Shirtings are 1¹/₂d lower for some sorts, and 1¹/₂d higher for others. Jacconetts and T cloths are slightly lower. The tone at the close is quiet but not depressed, and, as a rule, producers refuse to make any further concession in price, as they think that cotton has touched a price below which there will be no further decline, except of a very temporary character. Home consumption-The deliveries to home consumers since the opening of the year reached 3,053,000 bales, against 3,002,000 bales last year, weighing 1,166,246,000 lbs, against 1,068,712,000 lbs, the average weight being 382 lbs, and 356 lbs respectively. Con-tinental consumption—The deliveries were 1,876,998 bales, or 39,104 bales per week. Last year the deliveries were 1,984,119 bales, or 41,336 per week. Prospects—As respects supply, everything will depend upon the outturn of the American crop. Ten days ago there was a general leaning towards the minimum figure, but the heavy receipts of the past week have produced a reaction in favour of 34 millions, and this is at present the most popular estimate. From other sources than America the aggregate supplies for the coming year promise to be fully as large as, if not larger than, those of the year just closing. From India the accounts are very favourable, and as more old cotton than usual was retained in the interior at the close of last season, we may look for much larger shipments in **1874** than in 1873, provided prices do not decline. With an **American** crop of only 3³/₄ million bales, or 180,000 bales less With an than last year, it would at first sight appear that we might reasonably expect an important advance upon present prices, seeing that they are from $\frac{3}{4}$ d to 1d per lb below the average of last season, but a closer examination of the figures does not If American consumers take as much as they did last year there will still remain 2,164,000 bales, against 2,175,000 bales in 1872-3 for shipment to Europe. We do not think, therefore, that because we may not get more cotton this season than we got last, prices ought to advance to last season's average. Everyone now admits that the high prices current between October and March last-93d to 103d for middling Upland-were brought about by mistaken views as to the extent of the crop, and were, therefore, quite unjustifiable. When the error was and were, therefore, quite unjustifiable. When the error was discovered prices rapidly receded, and the average for the second half of the season was only $8\frac{7}{8}$ d per lb for middling Upland, against an average of $9\frac{7}{8}$ d for the first half. So far as we can see at present we consider 8d to $8\frac{1}{2}$ d safe, and $8\frac{1}{2}$ d to 9d not extravagant, provided the American crop does not exceed 33 million bales.

(From Messrs W. Nicol and Co.'s Cotton Circular, dated Bombay, Nov. 15.)—There has been some activity throughout the week, and the sales aggregate about 2,700 candies. As yet the business in new cotton for forward delivery had been but small, but this week it has assumed larger proportions. Transactions in new Hingunghat have been insignificant, and it appears probable that but a very small quantity will be shipped before the New Year. The receipts of the week amount Supper Source for the view Fear. The receipts of the week amount to 6,852 bales, against 2,860 bales at the same time last year. Exports are 4,638, against 1,197, while the quantity affoat in the harbour is 5,990, against 2,461 bales. Our estimated stock is about 22,000, against 26,000 bales.

(From Messrs Jackson and Till's Monthly Rice Circular, dated Dec. 5.)—Since the date of our previous circular, the telegraphic advices from India regarding the impending famine have daily assumed a more serious shape. The effect this news has had upon our market has been most severe, forcing up prices from day to day 3d to 6d per cwt, resulting in the enormous advance during the month of 2s to 2s 6d per cwt upon cargoes near at hand, and 3s per cwt on more dis-tant sailing cargoes. Bengal and Madras rice have participated in the extreme advance, the former description especially being likely to be in the shortest supply during the ensuing season owing to the locality of the drought, and may yet show a considerably further rise. The price of new crop Rangoon rice for spring shipment opened first at 9s 10½ dto 10s per cwt, and gradually advanced up to 11s 04 per ert. cwt, and gradually advanced up to 11s 9d per cwt, Bassein and Necrancie selling at 3d to 6d per cwt less, the advance being about half that of old crop, it having been in less favour with speculators, owing to the prevailing doubt of its export being permitted next season. The hesitation displayed on the part of the Viceroy to prohibit the export of rice from India is a policy which, on mature consideration, all must applaud. As we briefly noticed in our last circular, one of, if not the most important feature bearing upon our European markets, will be the some from which the the mine events in the second seco the source from which the other rice-consuming countries will draw their supplies, who have hitherto traded almost entirely from Calcutta. Take Mauritius, Bourbon, Colombo, and Australia in the East, and the West Indies and parts of America

to the West, theiral consumption amounts to nearly 400,000 tons. Barely one-tenth of this aggregate can be reckoned on during next year for shipment from Calcutta, 400,000 tons. and should these markets be thrown entirely upon the Burmah ports, aided only by the stocks which our home and continental depots can spare, the value of rice for next season may advance far beyond any limit we can at present conceive. The present value of old crop Rangoon is 11s 6d to 12s 9d per cwt, according to date of sailing. Table Bengal 15s to 17s, and Madras 12s 6d to 13s. The business done during the month has been far larger than at any previous period within memory, sales and re-sales reaching to about 220,000 tons. During the last few days a decided reaction from the late highest point has set in, mainly attributable to the arrival of some few ships off coast earlier than was expected, and being in that position unfavourable for speculation, the alternative of selling at spot value or storing had to be decided, the former course reducing the value materially, as, so far, the actual consumptive outlet has not kept pace with the tide of speculative demand. We look, however, later on for a steady maintenance of high rates. The quantity now affoat for Europe is 79,110 tons, against 99,969 tons last year, the stock here being 37,331 tons, against 25.208 tons.

(From Messrs Matthew Clark and Co.'s Wine Circular, dated Dec. 9.)-During the past month there has been a fair trade doing in wines for actual wants, and to some extent for future requirements, the decided rise in value in producing countries having stimulated dealers to anticipate demand, and more business would probably have been done but for the high rate of money; as this has now fallen to 5 per cent., we look for increased activity in our wine market. The brandy market here has remained quiet, under the combined influence of the dearness of money and the state of political affairs in France. The export duty of 5 per cent. on wines, which was announced as about being levied in Spain, has been reduced to 1 per cent., and will not be levied until 1st January next.

THE COTTON TRADE.

LIVERPOOL .- DECEMBER 11.

The cotton market on the spot has been depressed through-out the week, and quotations of almost every description are lowered. For Sea Island the demand has been limited, at former rates; in other long staples a large business has been done at steady prices. American continues to be pressed for sale, and has further declined about $\frac{1}{2}d$ per lb. Brazil is dull of sale, and some descriptions show a decline of $\frac{1}{2}d$ per lb. Egyptian has been in fair demand, but is freely offered, and the white descriptions are ¹/₃d per lb lower. West Indian has been in moderate request, but values remain unchanged. Rough stapled Peruvian is firm, but soft kinds are neglected and rather lower. African has given way ¹/₃d to ¹/₄d per lb. East Indian has been less inquired for, but holders generally do not press sales, and quotations can only be reduced a partial 1d per lb. Bengal continues in fair demand at firm prices.

In cotton to arrive and for future delivery the transactions are still numerous, but at lower rates, and, though firmer to-day, prices have given way about $\frac{1}{3}$ d per lb in the week. The quotations are :--Shipment-American, any port, G.O.C. Nov., $\frac{8}{4}$ d; Nov. by steamer, $8\frac{1}{3}$ d; Dec.-Jan., $8\frac{1}{3}$ d; Jan.-Feb., $\frac{8}{3}\frac{1}{3}$ d; Jan.-Feb., $\frac{8}{3}\frac{1}{3}$ d; Jan.-Feb., $\frac{8}{3}\frac{1}{3}$ d; Dec.-San., $\frac{8}{3}\frac{1}{3}$ d; Jan.-Feb., $\frac{8}{3}\frac{1}{3}\frac{1}{3}$ d; Jan.-Feb., $\frac{8}{3}\frac{1}$ quotations are :—Sinpment—American, any port, G.O.C. Nov., $\$_{14}^{+}$; Nov. by steamer, $\$_{15}^{+}$ d; Dec.-Jan., $\$_{15}^{-}$ d; Jan.-Feb., $\$_{15}^{+}$ d; Feb.-March, $\$_{18}^{-}$ d; L.M.C. Nov., $\$_{15}^{+}$ d; Texas, G.O.C. Nov., $\$_{18}^{+}$ d; Orleans, G.O.C. Dec.-Jan, $\$_{16}^{+}$ d; Dec.-Jan., sailing vessel, $\$_{14}^{+}$ d.—Delivery: Any port, G.O.C. Feb.-March, $\$_{14}^{+}$; March-April, $\$_{15}^{+}$ d; L.M.C. Dec., $\$_{15}^{+}$ d per lb. The sales of the week, including forwarded, amount to 65,000 bales, of which 2,260 are on speculation, and 8,300 declared for export, leaving 55,040 bales to the trade. Drec 12 —The sales to day will probably amount to fully

DEC. 12 .- The sales to-day will probably amount to fully 12,000 bales, with a firm market.

Friday, the 26th, and Saturday. 27th inst., and Thursday, the 1st January, will be close holidays in the cotton market. PRICES CURRENT.

THE ECONOMIST.

[Dec. 13, 1873.

MISCELLANEOUS .- There has been comparatively little movement in these securities this week. The following are higher :--Share Investment Trust, 1; Spanish National Lands, 1; Nantyglo and Blaina Iron, 5; Eobw Vale Steel, 1/2; Credit Foncier of Mauritius and Fore Street Warehouse, each $\frac{1}{2}$; Fairbairn's Engineering and Millwall Ironworks, each $\frac{1}{4}$; Trust Agency of Australia, 1 paid, $\frac{1}{8}$; North British, 1; Mercantile and Marine Insurance, each $\frac{1}{8}$; Commercial Union, ; Merchant Shipping, 21; Peninsular and Oriental Steam, In tramways there has been a rise in Dublin, Lisbon, 1. In tramways there has been a rise in Dublin, Lisbon, and London of a $\frac{1}{4}$, and in Madras of $\frac{1}{2}$; Italian Irrigation Guaranteed Bonds, 1; and Phosphate Sombrero, $\frac{1}{4}$. The following are depressed:—Railway Debenture Trust, $\frac{1}{4}$; ditto Share, $\frac{1}{2}$; Copper Miners of England, $\frac{1}{2}$; Ifton Rhyn Colliernes and Pelsall Coal, each 1; City of London Real Property, 1; International Financial, $\frac{1}{8}$; Australian Agri-culture, 4; Peel River Land, 1; Van Diemen's Land, $\frac{1}{2}$; French Asphalte Company, 1; National Safe Deposit, 1; and Phosphate Sewage 1.

and Phosphate Sewage, ¹/₄. BULLION.—The following is taken from the circular of

Messrs Pixley, Abell, Langley, and Blake on the transactions

Messrs Pixley, Abell, Langley, and Blake on the transactions in bullion during the week :— Gold.—With the exception of a small order for Holland, the only exports during the past week have been 10,600/ to America and 25,000/ to Alexandria; these amounts consisted of sovereigns withdrawn from the Bank. On the other hand, bars, to the value of 305,000/, have been purchased by that establishment; and unless the German demand should revive, the sums now near at hand from Japan, Alexandria, and elsewhere, will also be sent in. The Illimani has brought 46,880/ from the Brazils, and the P. and O. steamer 26,580/ from Bombay. Silver.—The amounts to hand during the week have been but small ; they have come chiefly from New York, and the total is about 74,300/. The price has slightly improved during the last day or two, and may now be quoted at 58,180 per ez. standard. Mexican dollars are firm at the last quotation of 56¹/₂ per ez. The amounts received during the past few days have been very limited.

amounts received during the past few days have been very limited. Exchange on India for Banks' Drafts at 60 days' sight is 18 9 d per Rupee.

According to the Gazette return of this evening, the movement in the precious metals during the week ended Dec. 10, has been as follows :-Gold-import, 200,975l; export, 121,580l. Silver-import, 159,123l; export, 144,955l. Gold value 13,000l has been withdrawn from the Bank to-day, principally for Belgium.

New Granada Bonds .- At the meeting of bondbolders resolutions were passed for the abandonment of the proposed Colombian Land Company, and it was decided that the Colombian Land Company, and it was decided that the moneys now in the hands of Messrs Baring, in London, shall be applied to the redemption of the Colombian Bonds issued

in virtue of that Convention by drawing at par. Egyptian Finance.—The Times of the 12th inst. contained some interesting details relative to Egyptian finance, and the following is an extract therefrom :

Treasury Bonds had been paid in London since August last, none of the proceeds of the loan have been applied to such payments. The money has mostly been remitted from Egypt and has been received by the Go-vernment from the provinces out of their legitimate collections since September last. This explains the large shipments of gold lately made there for England and France, at a season when usually gold is sent to that country for purchases of cotton and other produce. The reason for the Egyptian Government not having drawn the means for meeting their engagements this year from the proceeds of the recent loan, is ex-plained to have been as follows:...The contractors for that laan have plained to have been as follows:--The contractors for that loan have paid the Government in all till now 12,000,000/, but only 3,000,000/ in cash, and the rest in Treasury Bonds maturing next year, the Egyptian Government hav ng conceded that right to them. The rate of discount Government having conceded that right to them. The rate of obscular at which the Government agreed to receive the bonds was a favourable one for the contractors, who consequently handed in the longest they could find. Thus the Government, while liquidating later engagements, had to provide, from other resources, for those falling due in September, October, November, and December, and were at times somewhat per-plexed. The Minister of Finance applied to the contractors, who refused the consist bins and blowed the Government for met derive adouted their to assist him, and blamed the Government for not -having adapted their arrangements to their wants. The contractors have prevailed upon the arrangements to their wants. The contractors have prevailed upon the Khedive's Ministers to make up a strict account of receipts and ex-penditure for the last ten years, which is said to be highly satisfactory, and will be published shortly. The last instalment of 500,000/ due for reimbursement of the Egyptian Railway Loan on the 5th of January next, is also on its way to this country. That loan was originally for 3,000,000/. It was centracted for in 1865 by Messrs Oppenheim, and issued in 1866 by Messrs Fruhling and Goschen. On the 5th January, 1874, it will be entirely noid off. 1874, it will be entirely paid off. RAILWAY COMPANIES.

American Railroad Interest Payments .- Messrs Morton, Rose and Co. announce that the coupons on the 6 per cent. First Mortgage Gold Bonds of the Union Pacific Railroad, the 7 per cent. First Mortgage Sterling Bonds of the Milwaukie and St Paul Railroad, and the 6 per cent Prince Edward Island, due on the 1st January next, will be paid at their per cent. banking house.

Bombay, Earoda, and Central India:—The net earnings for ne past half-year amount to 144,919/, or at the rate 4/08 6d per cent. An exceptional outlay has been incurred the past half-year of 4/ 0s 6d per cent. by the restoration of three bridges on the line, and but for the expenditure on these, the net earnings would have been at the rate of 4/11s 6d per cent.

Cornwall Minerals Railway 6 per cent, Preference,-Subscrip-tions are invited for 50,000/ in 6 per cent, 100/ Preference shares, being part of the entire preference capital of 375,000/. The price of issue is par, or, reckoning accrued interest and discount on prepayments, 967 5s per share. The works are The works are stated to have been actively proceeded with.

stated to have been actively proceeded with. Furness.—At a special meeting the following resolutions were agreed to :—1. "That the directors be empowered to raise by mortgage, or debenture stock, 333,000/, under the powers of the Furness Railway Act, 1872." 2. "That the directors be authorised to convert into $4\frac{1}{2}$ per cent. perpetual preference stock the 170,000/5 per cent. redeemable preferential stock of the company ; also the 750 20/5 per cent. redeemable preference shares D, and the 250 20/4 $\frac{1}{2}$ per cent. redeemable preference shares D, late Whitehaven and Furness Junction Railway capital." Grand Trank of Canada.—The President is unable to return from Canada m time for the pro forma meeting on the 18th

from Canada in time for the pro forma meeting on the 18th inst., which has been further adjourned till January. Great Indian Peninsula.—The revenue account shows that the

gross earnings for the half-year ended 30th June amounted to 1,068,292/, against 1,066,638/ for the corresponding period of 1872; and the expenditure to 600,982/, against 607,736/ in 1872. A net profit is shown amounting to 467,309/, against 458,901/ last year, which, with the net amount $(65,365\ell)$ contributed to the special funds during the half-year, is at the rate of 4l 19s 2d per cent. on the capital expended. The reduction in the expenditure is due to the diminution in the number of train miles run, and the permanent way and works

THE ECONOMIST.

have been kept in thorough repair at a cost of 96/18s 8d per mile, as compared with 105/10s 3d per mile in 1872. The receipts on the share capital amounted on the 30th June to 14,469,172/, on 5 per cent. debenture bonds to 1,304,250/, the cash receipts on 4 per cent. debenture stock, 2,475,556l, and the premiums on stocks and shares deposited with Govern-ment as capital not bearing interest, 229,602/, making a total of 23,478,582/. The expenditure amounted to 21,601,581/, and balance of stores account to 1,383,101/, leaving an unexpended balance of 493,900/. 1,278 miles were opened for traffic, of which 326 miles were double and 952 single lines; 2,103,723 train miles were run during the half-year, against 2,374,441 in the same period of 1872, being a reduction of 270,718 miles. Through communication between Bombay and Madras has been established by the opening of the viaduct over the river

been established by the opening of the viaduct over the river Kistnah on the 9th Oct. last. Hango's Railway (Finland) 5 per Cent. Debentures.—Messrs J. and A. Scrimgcour are authorised by Messrs Forbes, Forbes, and Co. to offer for public subscription 700,000l of the above debentures at 75l per 100l. This railway, which is now comdebentures at 75*l* per 100*l*. This railway, which is now com-pleted, and was opened for traffic on the 8th October, is 93 miles in length, connecting the port and harbour of Hango, in Finland, with the State line to St Petersburg. Its importance is described by the following extract from a letter of the *Times'* correspondent at Berlin:—" In all probability the Bay of Hango will be made the principal port of Russia in the Baltic. It is, in fact, better fitted for such *e*, purpose than any other harbour north or south of St Petersburg. With a *minimum* doubt of 30 feet and *a*, readstead entirely open to the roll of depth of 30 feet, and a roadstead entirely open to the roll of the western sea, it is seldom frozen to an extent that prevents vessels from coming close in shore. The anchorage, too, is exvessels from coming close in shore. The anchorage, too, is ex-cellent." The dividends are payable in London, and the prin-cipal by a sinking fund in 85 years. The company has valuable privileges, but no state guarantee. Kursk-Charkow-Azow.— The numbers of bonds drawn for

redemption at par on the 1st March have been published. Louth and East Coast.—The share list will be closed on Saturday next for London, and on the following Monday for

the country. Ottoman.—It is announced that the Company have received from the Turkish Government mandats on Constantinople and bills, in payment of the guarantee for 1872, amounting to about 85,000.

Ottoman-Smyrna to Aidm .- Holders of drawn bonds who are prepared to accept payment of the same -40l in cash and the balance (60l) by a debenture for 100l, bearing interest from the 1st ult.—can receive the same by sending their bonds to the Company's offices on or before the 16th inst.

BANKS.

London Chartered of Australia.—A disposable balance is shown for the half-year of 49,104/, out of which a dividend has been declared at the rate of 8 per cent. per annum, free of income tax, and the balance of 9,104/ carried forward. It is stated that the profits of the half-year exceeded those of the corresponding period of 1872 by 2,949l. London and River Plate.—A dividend is recommended of 7 per

cent. for the half-year ended 30th September, making, with the interim payment in June, a total of 12 per cent. per annum. 10,000/ is added to reserve, and 8,941/ carried forward. The deposits on the 30th September were 2,805,600l.

ASSURANCE COMPANIES. Gresham Life Assurance.—At the annual meeting it was stated that the new premiums for the year were 44,338l; that the annual income amounted to 453,314l; and the realised assets to 1,886,993l; and a bonus of 57,000l was declared divisible.

MISCELLANEOUS COMPANIES.

Amoor River Navigation.—The numbers are announced of 60 bonds, amounting to 6,000/, of the issue of 210,000/ Six per Cent. Bonds, which will be paid off at par, on and after the 1st proximo, at Messrs J. Henry Schröder and Co.'s.

Barbadoes Gas, Limited.—Capital, 100,000/, in 20,000 shares of 5/ each; 14,000 of which are now offered to the public. The company is formed to acquire and carry out the conces sion for lighting with gas the island of Barbadoes; and it is proposed to commence by lighting the City of Bridgetown (for which the company has already secured the right), stated to contain upwards of 10,000 houses and many important public buildings. The maximum rate chargeable to private conpaone bunnings. The maximum rate chargeable to private con-sumers is fixed at 15s per 1,000 cubic feet, and for street lamps about 67 5s per annum. The authorities are to have the power to purchase the works at any time after fifteen years, from 1st January, 1875, at 20 years' purchase at 6 per cent. on the capital expended. The works are to be completed by June, 1875.

Buenos Ayres National Tramways,-The working for the first 9 months of the present year shows a loss of 2,7811; and it is stated that the passenger receipts have been very disappoint-ing, and that the profits expected from the carriage of mer-chandise have been delusive. The company is stated, however, to have no liabilities, sufficient profits are anticipated to cover debenture interest; and as the city is increasing in size the

profits of the company may be expected to increase without a corresponding enlargement of expenditure.

Ceylon Company .- The high prices realised enable the directors to replace the amounts drawn from the reserve of un-divided profits to pay the two last dividends, and warrant their recommending an interim dividend of 3½ per cent, being at the rate of 6 per cent. per annum plus the amount post-poned in June. The crop now being gathered will, it is stated, be small, but prices are expected to compensate the deficiency: and favourable reports as to the tea and aincher environment.

cinchona cultivation. City of Buenos Agres Tramways, Limited—6 per Cent. Deben-ture Stock.—The directors invite tenders for 95,000l in 6 per Cent. Perpetual Debenture Stock, being a first charge upon the net revenue, which already amounts to 34,000/ per annum. The object of the issue is to purchase a further 114 miles of tramway. The advertisement will be found in our adver-

Ebbw Vale Steel, Iron, and Coal.—An interim dividend at the rate of 5 per cent. per annum has been declared payable on and after 1st prox.

Italian Irrivation.—It is announced that coupons due 1st January will be received at the office, No. 7 Crosby square, on or before the 15th inst., and that the drawing for 1873 will take place on the 17th inst.

Lebong Tea .- An interim dividend at the rate of 10 per cent. per annum has been announced. Madras Tramways.—Interest during construction will be

Madras Tranways.—Interest during construction will be paid at the rate of 8 per cent. per annum. Manchester Corporation 4 per Cent. Stock.—The Corporation of Manchester invite applications for "a limited amount" of their Perpetual 4 per Cent. Consolidated Stock, secured upon the entire rateable property in that city. The stock will be issued in any amount divisible by 10!; with interest payable on the 24th June and 24th December in Manchester, London, Ediphyrich and other leading cities.

the 24th June and 24th December in Manchester, London, Edinburgh, and other leading cities. Montrotier Asphalte and Cement Concrete Paving, Limited.—Vice-Chancellor Sir James Bacon has appointed Mr James Cooper, of the firm of Johnstone, Cooper, Wintle, and Evans, joint liquidator with Mr Frederick Benjamin. Nantyglo and Blaina Ironworks.—At the adjourned meeting the supplementary report was received, but not adopted; the resignation of the present directors was agreed to: and also

resignation of the present directors was agreed to; and also the election of a new board on the 7th prox., to which date the meeting was further adjourned.

meeting was further adjourned. Swansea and Neath Colliery, Limited.—Capital. 200,000/, in shares of 10/ each, of which 15,000 are now offered for sub-scription. It is proposed to purchase for 59,000/ in cash, 20,000/ in shares, the Brynwilach colliery, in the parish of Llangafelach, to take a lease of the Llettyrafel estate in the parish of Cadoxton, and an assignment of the leases of ad-joining properties. The first-mentioned estate is about five miles from Swansea, is stated to be 610 acres in extent, and is connected with the Swansea Canal by a private railway, and wilconnected with the Swansea Canal by a projected branch of the Great Western also be accessible by a projected branch of the Great Western Railway. The other estate is within six miles of Britonferry, and is stated to comprise 700 freehold acres. The colliery is already provided with plant and machinery.

already provided with plant and machinery. United Limmer and Vorwohle Rock Asphalte.—The gross sales during the financial year are stated to have amounted to 42,997l, against 36,485l in the previous year, but the profit has not been so large, owing to the rise in wages and cost of working. The net profit is 8,636l, out of which it is proposed to pay a dividend of 6s per share, or 3 per cent., and to set aside the balance (2,980l) as the nucleus of a fund for recoup-ing the nurphase money neid for the properties in Comments. ing the purchase money paid for the properties in Germany.

Wire Tranway, Limited.—The Vice-Chancellor Malins has appointed Mr James Ford (James and F. Ford) and Mr Samuel C. Fox official liquidators.

MINING COMPANIES

MINING COMPANIES Brynmawr Coal and Iron, Limited.—Capital, 200,000l, of which 100,000l will be handed over to the vendors in paid-ur shares as part payment of the purchase money; and they also receive in part payment 50,000l in 5 per cent. mortgage debentures. Subscriptions are now invited for 2,500 fully paid 10l shares, constituting part of 100,000l A Preference shares, of which the balance has already been subscribed. The undertaking is established to purchase and work, as one concern, the collieries and ironworks principally work, as one concern, the collieries and ironworks principally owned by the late Mr John Payne, which consist of the Tiller, and Milfrain collieries, iron and tin-plate works, and a limestone quarry.

Connorree Mining, Limited.-Creditors are required to send articulars of their claims by the 15th of January to Mr. Thomas Baker, of Dublin, the official liquidator.

Santander Iron Ore, Limited .- Capital, 80,000/, in 10/ shares, which have been subscribed for privately. It is intended to acquire and work iron ore mines in Spain, and contracts have already been made for some important groups of mines near the Bay of Santander.

THE ECONOMIST.

Dec. 13, 1873.

[CONTINUED FROM PAGE 1511.]

Welsh Freehold Coal and Iron, Limited.-Capital, 155,000/, in 51 shares. Subscriptions are invited for 14,503 unallotted shares. The present issue is to enable the sinking of "shafts to win deep seams, build coke ovens, and a still greater number of cottages," for the purpose of more fully developing the property.

West Fedw Mining, Limited .- Creditors are required to send articulars of their claims to Mr. J. J. Pyne, of Manchester, the liquidator, by the 31st inst.

Yorke Peninsula .- A petition has been presented to the Court of Chancery for confirming the resolution authorising the reduction of the capital from 150,000/ to 75,000/.

The Commercial Cimes.

POST OFFICE ANNOUNCEMENTS.

POST OFFICE ANNOUNCEMENTS. Commencing in January next, the mail packets leaving Southamp on for the Cape of Gcod Hope will call at Plymouth to embark a supplemen-tary mail. The ordinary mails will be made up at the Post Office as usual, and embarked at Southampton, but letters, &c, posted or received in London in time for despatch the same evening will be sent in the supplementary mail. All correspondence intended to be forwarded by the Cape mail packets will be forwarded to London, as at present. Postmasters who send letters to Plymouth by cross post, will for-ward to that port such correspondence as is posted too late to reach London before the despatch of the supplementary mail, but in time to Ward to that port such correspondence as is posted too late to reach London before the despatch of the supplementary mail, but in time to be put on board at Plymo th. The packets will sail soon after the arrival of the North mail. Only one homeward packet from the Cape in each month will, in future, call at Ascension, viz., that which is ap-pointed to leave Table Bay after the arrival of the last packet in the month despatched from Southampton.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The large arrivals of foreign wheat have operated in favour of buyers this week, and there was in many instances a falling off in prices at last Saturday's provincial markets, which has not since been recovered. The arrival of so much grain is, no doubt, due to the hastened forwarding from America, and that being so can only temporarily affect the markets, but the effect is strong enough to induce great caution in buying. Prices have been steady at New York all the week for flour, and there has been a slight rise in corn, showing that the weakness here is not immediately due to the state of American markets, but in fact to a rather more than ordinary restriction of purchases even for the season of the year, and to a temporary excess of supply. It is only secondary qualities too of home-grown wheat which have yielded, the finer corn maintains its value Prices are also steady on the continent, although there has not been any substantial advance, and there, as here, buying is small. Business has been much interfered with this week owing to the prevalence of fog, which in Mark lane, for two or three days, interfered with the examina-tion of samples, and which was so dense on the river as to prevent the landing of wheat from the ships. Oats and barley are only in moderate demand, and prices without distinct change. Flour is slightly dearer at Liverpool, but elsewhere there is no alteration in price.

With a money market which has ceased to check the free course of purchases, the value of cotton has yet declined during the week, and the cause seems to be, on one side, the large receip's now arriving at American ports, and, on the other, a contracting market for cotton goods in the East. The American raw material has again been weakest in price, but Surats and other descriptions also show depression on the week. At Manchester stocks are accumulating, and con-cessions have been made rather more freely by producers, little business resulting however. The Board of Trade figures show a considerable falling off in the exports of cotton goods for the past eleven months, compared with the corresponding period last year, but, as Messrs Ellison's statistics show that the consumption of raw material has increased, it may be inferred that the home demand has made up for deficient foreign requirements; further, as, according to the same authority, the continental consumption of raw cotton has fallen off, while in this country it has increased, there is no evidence to show that foreigners are dispensing with our manufactures to any extent.

Prices for colonial wools have not altere I during the week, and there has been a fair demand. In the North cheaper money appears to be producing some effect, but prices for the home clip are not lower, both farmers and staplers holding very tenaciously, so that the real aspect of the markets is not altered. As regards yarns, the same cause tends to restrict purchases, particularly from abroad. Foreign mcrehants look for a cheaper market shortly, and strive to press it down now beyond what ruling prices for wool will allow. The market for cloths and piece goods is small, and trade quiet both at Leeds and Bradford. The absence of American buyers from the latter particularly tends to make business almost nominal, so far as export is concerned.

Except in South Staffordshire, prices in the iron trade have tended further downwards during the week, but in that district both finished and pig iron are still firm, though there are many irregularities in the price of Staffordshire coal. In the north of England orders are not numerous, but some temporary demand for pig iron has been experienced ; rails, however, are little inquired for, and prices are weak. The coal trade of South Wales appears likely to be steady during the winter, and a revived activity in the demand for and production of iron is looked for at the beginning of the year. A plan for regulating the wages of operatives in the iron-making districts of South Staffordshire and the North of England on a definite sliding scale is being discussed, and as a reduction is possible shortly, another cause of uncertainty is added to the

confusion in present prospects. A full half of the business week has been interfered with by the immovable mists which have hung about the city, and the produce markets, especially where the display of samples is produce markets, especially where the display of samples is necessary, have been very inactive. Sugar is firm, and there is rather better inquiry for refined. The public sales of coffee have been repeatedly postponed, but prices show again an advance with an active demand. Cocoa is firm though few sales are reported. There is a steady tone in the tea market, the precent depression continuing to disappear gradually. sales of rice, both on the spot and in floating cargoes, have been large. The advices at the beginning of last month from the rice-growing districts of Rangoon and Bassoin were favourable as regards the growing crops, but stocks were low. The Bengal deficiency had not made itself apparent in those markets, but the demand on that account will no doubt make the season a most profitable one for the Burmese growers. The condition of the crop, strange to say, is expected to depend on a less plentiful supply of rain, Bengal having suffered pend on a less plentiful supply of ran, Bengal having suffered entirely from the want of that moisture which has fallen rather too heavily on the neighbouring district. A strong demand has continued for jute at full prices, and sales have been considerable. Tallow is steady at a slight decline. A small business at unaltered quotations has taken place in foreign copper; for tin, both Straits and Banea, demand is active at a considerable advance.

EXTRACTS FROM TRADE CIRCULARS.

(From Messrs Ellison and Co.'s Monthly Cotton Report, dated Liverpool, Dec. 9.)—Our last report was issued on the 10th November, since which the general tone of the market has been quietly steady, with sundry fluctuations in prices, resulting in a decline of about $\frac{1}{16}$ d per lb in American from the rates current a month ago, but no change in long staples, and an advance of kd to kd per lb in Surats upon the pre-viously exceptionally depressed prices. An increased business has been done in arrivals, and after numerous intermediate fluctuations prices close about $\frac{1}{16}$ d b $\frac{1}{3}$ d per lb higher than the rates current a month since. Quietness has been the ruling feature of the Manchester market. Except for certain qualities of shirtings suitable for China, the demand has been of a slow and ratail character throughout the month. of a slow and retail character throughout the month. The improved state of monetary affairs has had a good effect upon the market, but this has been almost counterbalanced by the unfavourable influence of the discouraging news from

THE ECONOMIST.

Calcutta. The aggregate business done has scarcely equalled the rate of production, and the stocks of some classes of goods are larger than they were a month since. The ac-cumulation, however, has not been very important, and most for some weeks to come. The final quotations for yarns show very little change from the rates current a month ago. very little change from the rates current a month ago. Printers are 1½d to 3d per piece lower. Shirtings are 1½d lower for some sorts, and 1½d higher for others. Jacconetts and T cloths are slightly lower. The tone at the close is quiet but not depressed, and, as a rule, producers refuse to make any further concession in price, as they think that cotton has touched a price below which there will be no further decline accent of a rary temperature decreated. further decline, except of a very temporary character. Home consumption-The deliveries to home consumers since the opening of the year reached 3,053,000 bales, against 3,002,000 bales last year, weighing 1,166,246,000 lbs, against 1,068,712,000 lbs, the average weight being 382 lbs, and 356 lbs respectively. Con-tinental consumption—The deliveries were 1,876,998 bales, or 39,104 bales per week. Last year the deliveries were 1,984,119 bales, or 41,336 per week. Prospects—As respects supply, everything will depend upon the outturn of the American crop. Ten days ago there was a general leaning towards the minimum figure, but the heavy receipts of the past week have produced a reaction in favour of 33 millions, and this is at present the most popular estimate. From other sources than America the aggregate supplies for the coming year promise to be fully as large as, if not larger than, those of the year just closing. From India the accounts are very favourable, and as more old cotton than usual was retained in the interior at the close of last season, we may look for much larger shipments in 1874 than in 1873, provided prices do not decline. With an American crop of only $3\frac{3}{4}$ million bales, or 180,000 bales less than last year, it would at first sight appear that we might reasonably expect an important advance upon present prices, seeing that they are from $\frac{3}{4}$ d to 1d per lb below the average of seeing that they are from 40 to 10 per 10 below the average of last season, but a closer examination of the figures does not warrant the anticipation of any permanent material advance. If American consumers take as much as they did last year there will still remain 2,164,000 bales, against 2,175,000 bales in 1872-3 for shipment to Europe. We do not think, there-fore the because as may not get more extent this season than in 1872-3 for shipment to Europe. We do not think, there-fore, that because we may not get more cotton this season than we got last, prices ought to advance to last season's average. Everyone now admits that the high prices current between October and March last-94d to 108d for middling Upland-were tober and March last— $9\frac{3}{4}$ d to $10\frac{3}{2}$ d for middling Upland—were brought about by mistaken views as to the extent of the crop, and were, therefore, quite unjustifiable. When the error was discovered prices rapidly receded, and the average for the second half of the season was only $8\frac{2}{3}$ d per lb for middling Upland, against an average of $9\frac{2}{3}$ d for the first half. So far as we can see at present we consider 8d to $8\frac{1}{2}$ d safe, and $8\frac{1}{2}$ d to 10^{-1} middling 10^{-1} middl 9d not extravagant, provided the American crop does not exceed 3³/₄ million bale

(From Messrs W. Nicol and Co.'s Cotton Circular, dated Bombay, Nov. 15.)—There has been some activity throughout the week, and the sales aggregate about 2,700 candies. As yet the business in new cotton for forward delivery had been but small, but this week it has assumed larger proportions. Transactions in new Hingunghåt have been insignificant, and it appears probable that but a very small quantity will be shipped before the New Year. The receipts of the week amount to 6,852 bales, against 2,860 bales at the same time last year. Exports are 4,638, against 1,197, while the quantity afloat in the harbour is 5,990, against 2,461 bales. Our estimated stock is about 22,000, against 26,000 bales.

(From Messrs Jackson and Till's Monthly Rice Circular, dated Dec. 5.)—Since the date of our previous circular, the telegraphic advices from India regarding the impending famine have daily assumed a more serious shape. The effect this news has had upon our market has been most severe, forcing up prices from day to day 3d to 6d per cwt, resulting in the enormous advance during the month of 2s to 2s 6d per ewt upon cargoes near at hand, and 3s per cwt on more distant sailing cargoes. Bengal and Madras rice have participated in the extreme advance, the former description especially being likely to be in the shortest supply during the ensuing season owing to the locality of the drought, and may yet show a considerably further rise. The price of new crop Rangoon rice for spring shipment opened first at 9s 10½d to 10s per cwt, and gradually advanced up to 11s 9d per cwt, Bassein and Necrancie selling at 3d to 6d per cwt less, the advance being about half that of old crop, it] having been in less favour with speculators, owing to the prevailing doubt of its export being permitted next season. The hesitation displayed on the part of the Viceroy to prohibit the export of rice from India is a policy which, on mature consideration, all must applaud. As we briefly noticed in our last circular, one of, if not the most important feature bearing upon our European markets, will be the source from which the other rice-consuming countries will draw their supplies, who have hitherto traded almost entirely from Calcutta. Take Mauritius. Bourbon, Colombo, and Australia in the East, and the West Indies and parts of America

to the West, their and consumption amounts to nearly 400,000 tons. Barely one-tenth of this aggregate can be reckoned on during next year for shipment from Calcutta, and should these markets be thrown entirely upon the Burmah ports, aided only by the stocks which our home and continental depots can spare, the value of rice for next season may advance far beyond any limit we can at present conceive. The present value of old crop Rangoon is 11s 6d to 12s 9d per ewt, according to date of sailing. Table Bengal 15s to 17s, and Madras 12s 6d to 13s. The business done during the month has been far larger than at any previous period within memory, sales and re-sales reaching to about 220,000 tons. During the last few days a decided reaction from the late highest point has set in, mainly attributable to the arrival of some few ships off coast earlier than was expected, and being in that position unfavourable for speculation, the alternative of selling at spot value or storing had to be decided, the former course reducing the value materially, as, so far, the actual consumptive outlet has not kept pace with the tide of speculative demand. We look, however, later on for a steady maintenance of high rates. The quantity now affoat for Europe is 79,110 tons, against 99,969 tons last year, the stock here being 37,331 tons, against 25.208 tons.

(From Messrs Matthew Clark and Co.'s Wine Circular, dated Dec. 9.)—During the past month there has been a fair trade doing in wines for actual wants, and to some extent for future requirements, the decided rise in value in producing countries having stimulated dealers to anticipate demand, and more business would probably have been done but for the high rate of money; as this has now fallen to 5 per cent., we look for increased activity in our wine market. The brandy market here has remained quiet, under the combined influence of the dearness of money and the state of political affairs in France. The export duty of 5 per cent. on wines, which was announced as about being levied in Spain, has been reduced to 1 per cent., and will not be levied until 1st January next.

THE COTTON TRADE.

LIVERPOOL .- DECEMBER 11.

The cotton market on the spot has been depressed throughout the week, and quotations of almost every description are lowered. For Sea Island the demand has been limited, at former rates; in other long staples a large business has been done at steady prices. American continues to be pressed for sale, and has further declined about $\frac{1}{4}$ d per lb. Brazil is dull of sale, and some descriptions show a decline of $\frac{1}{4}$ d per lb. Egyptian has been in fair demand, but is freely offered, and the white descriptions are $\frac{1}{5}$ d per lb lower. West Indian has been in moderate request, but values remain unchanged. Rough stapled Peruvian is firm, but soft kinds are neglected and rather lower. African has given way $\frac{1}{5}$ d to $\frac{1}{4}$ d per lb. East Indian has been less inquired for, but holders generally do not press sales, and quotations can only be reduced a partial $\frac{1}{5}$ d per lb. Bengal continues in fair demand at firm prices.

In cotton to arrive and for future delivery the transactions are still numerous, but at lower rates, and, though firmer today, prices have given way about $\frac{1}{8}$ d per lb in the week. The quotations are :—Shipment—American, any port, G.O.C. Nov., $\$_{14}^{*}$; Nov. by steamer, $\$_{15}^{*}$ d; Dec.-Jan., $\$_{15}^{*}$ d; Jan.-Feb, $\$_{15}^{*}$ d; Feb.-March, $\$_{16}^{*}$ d; L.M.C. Nov., $\$_{16}^{*}$ d; Texas, G.O.C. Nov., $\$_{16}^{*}$ d; Orleans, G.O.C. Dec.-Jan, $\$_{17}^{*}$ d; Dec.-Jan., sailing vessel, $\$_{24}^{*}$ d.—Delivery : Any port, G.O.C. Feb.-March, $\$_{24}^{*}$ d; March-April, $\$_{16}^{*}$ d; L.M.C. Dec., $\$_{16}^{*}$ d per lb. The sales of the week, including forwarded, amount to 55000 balos of which 2600 are on screenlytion and 8300

The sales of the week, including forwarded, amount to 65,000 bales, of which 2,260 are on speculation, and 8,300 declared for export, leaving 55,040 bales to the trade.

DEC. 12.—The sales to-day will probably amount to fully 12.000 bales, with a firm market.

Friday, the 26th, and Saturday. 27th inst., and Thursday, the 1st January, will be close holidays in the cotton market. PRICES CURRENT.

NEW YORK. The annexed is from Messrs Neill Brothers and Co.'s Cotton Circular, dated December 5 :-

American markets opened firmly at $\frac{1}{2}d$, a $\frac{1}{4}d$ advance on last Wednesday's prices, but for the first few days the large re-ceipts had a depressing influence, and prices declined steadily till Tuesday, when the bottom was reached at New Orleans, Mobile, and Charleston. These markets have since regained $\frac{1}{2}d$, $\frac{1}{4}d$, and $\frac{1}{4}d$ respectively, whereas at other points there was no rally till yesterday. Compared with last week, the closing prices show a net decline of $\frac{1}{4}d$ at New Orleans and Savannah, $\frac{1}{4}d$ at Galveston, $\frac{1}{4}d$ at Charleston and New York, and $\frac{3}{4}d$ at Mobile. Future deliveries at New York have varied during the week, rising and falling from day to day. The re-American markets opened firmly at 1d, a 1d advance on last during the week, rising and falling from day to day. The re-

RECEIPTS.—Aided by higher rivers (our despatch of Satur-day last mentioned that they had risen), and attracted by higher prices, the receipts at the Gulf ports have sprung up from their recent average of about 55,000 bales to 79,000 for this week, and thus, without any material increase on the Atlantic, the weekly total is raised to 155,000 bales. But the Atlantic, the weekly total is raised to 155,000 bales. But the total receipts at the Gulf ports are still largely behind those of last year at same date, as will be seen by the following state-ment: — Total for 1873 to date, 1,137,000; ditto 1872, 1,257,000. Exports, like receipts, have been on a large scale during the week, amounting to 100,000 bales, against 83,000 bet mere but the total till data still 74 000 bales, against 83,000 last year, but the total till date is still 74,000 bales short of last

AMERICAN CONSUMPTION .- We have heard so much of an AMERICAN CONSUMPTION.—We have heard so much of an extensive stoppage of work, or reduction of hours of labour in the American cotton mills, that on a superficial view, a heavy reduction of consumption would be anticipated, and yet we find that very little reduction has occurred in the takings of American spinners even during the actual financial difficulties of the past three months. They have taken from the ports 245,000 bales in 1873, and 264,000 bales in 1872. It is, however, probable that less than usual may have been taken overland in consequence of the yellow fever at Memphis, but, after making every allowance for this, the extent of these but, after making every allowance for this, the extent of these takings is surprising when we consider the monetary crisis, which has been chronic during much of the time referred to. The truth is, doubtless, that spinners, owing to the inferiority and dearness of the past crop, began the present season with very small stocks, and hungry for the new crop—and finding that they have been able to buy it at about 14e versus 18e last year, and of very superior quality, they have considered it prudent to buy a little ahead of their wants, and the wealthier corporations may even have laid in some stock. It has been thought that the enforced stagnation of trade of these few months will be followed by an unusually active spring trade, for which manufacturers will be preparing from the 1st January, and this view gathers increased force from the fact that already cable despatches advise increased activity on the part of northern spinners, and some resumption of full time working. We find it, indeed, very hard to believe that with a reduction of three to five cents per lb in the price of cotton, and this for a better quality, consumption will be materially reduced at a time when the whole West is obtaining unusually good prices for an enormous supply of breadstuffs, provisions, &c. We think, therefore, that this element—reduced consump-tion in America—may be almost left out of the calculation so long as prices there are relatively so cheap.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Dec. 11 .- Our market still remains quiet and few classes of yarn or cloth are in inquiry. In cloth shirtings suitable for China are in moderate demand, though even in this cloth limited quantities only are required. In the finer reeds of printers there is also some little doing. In yarn there is a fair inquiry for coarse numbers for export, but in 30's and upwards there is little doing. For the home trade the buying is still of the most trivial description, the large

LEEDS .- Prices are firm, but inquiry small and nonspeculative. Manufacturers are firm in their quotations, and for fancy goods are well provided with orders for some time.

ROCHDALE.—Flannel goods as well as the raw material remain firm in prices, with small stocks. Little demand pre-vails in the markets.

BELFAST .- Flax has continued very firm in price during the week, and the advance quoted has been fully maintained. Yarns—A better feeling exists, and transactions have been on a larger scale. Linens, bleached and finished—Although not so active as last week, still a fair amount of business has been done. Prices have not been remunerative.

NOTTINGHAM.—In the lace trade there is still a want of animation. The demand for lace yarns is quiet, and prices are about the same as heretofore. The hosiery trade is fairly active for the time of the year, manufacturers being engaged in executing orders for the spring, and there is rather more

doing for shipping. DUNDEE.—During the past week business has continued quiet, notwithstanding the reduction of the bank rate to 5 per cent. There seems to be a feeling of greater confidence gain-ing ground, however, which, if continued, will probably soon lead to a return of activity in the various departments of our There has been considerable excitement in the jute trade. market during the past week, and a large amount of business has been doing at advancing prices. There is a rather better inquiry for Jute goods. The demand for lineus continues on a very moderate scale, and manufacturers are not very fully supplied with orders.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK-NOVEMBER 28.

There has been a further advance in flour and grain during the past week, the result mainly of speculation based on the detention of supplies in the Eric Canal by snow and ice, and yet there has been a steady export demand for wheat and corn and a large business in flour. The demand for flour is quite general. Supplies are very moderate in the hands of dealers and bakers, and they have shown more disposition to secure supplies in advance of their immediate wants, but the principal demand has been for export to London. To-day there was some further advance, but less buoyancy of tone, owing to free offerings by Western millers for early delivery by rail. The wheat market has shown a more decided advance than flour. The stock is light, and there is disproportionate expense in getting supplies forward by rail; at the same time shippers will pay relatively more for wheat than flour. To-day there was a further advance, and prices are 20c to 22c advance upon the lowest prices in October. Indian corn has also been in speculative demand, and has sold at an advance which has seriously reduced the business for export. The receipts at the Western markets continue to show a consider-able falling off. To-day there was a further advance and an active market. Rye has been more saleable. Barley has brought a decided advance. Oats have been less buoyant than any other article coming under the above head.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

The heavy arrivals of foreign grain noticed last Friday, caused some depression in the early part of this week, and in the principal importing markets of the kingdom wheat suffered a partial decline of 1s; maize, 9d to 1s; and oats, 3d to 6d per quarter; but imports having since moderated, the markets have become firmer, the decline being pretty well recovered. At Mark lane the small supply of English wheat was taken off slowly, at barely previous rates. The early sales of American were at 1s per quarter reduction, but the more recent transactions show better prices, and all other descriptions of

Beans fully support the late advance, both on the spot and Beans fully support the late advance, both on the spot and for arrival. Peas still sell in very moderate quantity only, but the small supplies available give firmness to quotations. Oats have been purchased sparingly, and at the opening undried Swedish were rather easier; but receipts having since fallen off, the market was stronger at the close. During the last day or two maize has been in demand in all positions, and price bays view 2, are a from the receipts lowest and prices have risen 2s per qr. from the previous lowest

The annexed statement shows the imports of grain into and exports from the United Kingdom during the week ended Dec. 6 and since the beginning of the season (Sept. 1) :---

COLONIAL AND FOREIGN PRODUCE MARKETS TRANSACTIONS OF THE WEEK. FOR REPORT OF THIS DAY'S MARKETS SEE POSTSCRIPT

FOR REFORT OF THIS DAY'S MARKETS SER POSTCEPET. MINCING LANE, FRIDAY MORNING. SUGAR.—The market is firm, but the dense fog during the hast three days has so interfored with business, that nearly all the public sales de-clared have been withdrawn. Of West India 798 casks have sold at steady rates for refining sorts. A landed cargo of 470 casks Trinidad at 23a 6d. There is some demand for brown deteriotions, the sales including further purcels of Jaggery, with some low Manila and Stam. Crystalised Demerara is steady. The purcels withdrawn are advertised for sale this day. Deliveries do not fall off, being still very large, Official returns for the eleven months show that dury had been paid upon 66,400 tons more sugar than to same date in 1872. The stock in the United Kingdom at the latest date was about 101,000 tons, against 147,000 tons in 1872, and 103,600 tons in 1871 at the sale e date.  Stress
 Maaritius.—Small sales reported chiefly in low brown sorts.
 Madras.—Further business has been done in Jaggery, at 17s to 17s 3d. Last week 230 tons grainy ditto sold at 18s 6d.
 Manila, §v.—By private contract 7,000 bags gool clayed at 22s.
 10,781 mats 104 bags Cebu by auction were taken in and atterwards sold at 18s 6d.
 6,162 mats 188 bags soft low brown from Eankok at

sold at 188 6.4. 6, 452 mais 185 bags sold low blown from Dankok at 195. Other Foreign.—300 casks Cuba by private contract, at 208 34. Beet Sugar.—Fino French crystals have been sold for delivery at 288 6d to 298 3d, Lo.5.; Australian at 228 3d. Befined.—There has not been any change in prices here, and the business of the week is limited en account of the protracted darkness of the weather. Clyde crushed firmer. Motasses.—No sales reported. COFFER.—The upward course of the market continues without inhermption, stocks having further decreased; but the effect of extremely high prices upon the consumption has yet to be e.m. Official returns for eleven months show an increase of only 250 tens in the total deliveries of coffee for the kingdom, while the imports were 8,870 tens harger. Later advices from Colombo estimate the total crop as 30,000 tons at the outside. Sales of some importance have been effected during the past week, including several cargoes of Brazl and St Domingo, prrticulars net given. Plantation Ceylon coups at 114s to 1218 for 115s; fine native Ceylon to arrive, 1088 6d. At auction 302 casks 65 barrels 195 bags plantation Ceylon found bayers at 117s to 1218

THE ECONOMIST.

for pale and grey to good bold and small berry in proportion. 380 cases 1,401 bags East India : pale Mysore, 114s to 119s ; Naidoobatum, 123s; native sorts, 108s to 109s ; pea berry, 118s to 122s. 20 barrels 266 barrels Jamaica of the new crop : ordinary to fine ordinary 105s 6d to 108s 6d. 2,423 bags foreign : Costa Rica, 109s 6d to 116s 6d ; St Domingo : ordinary, 103s to 103s 6d ; and a parcel of washed Rio at 113s to 113s 6d per cwt.

COCOA.—A few parcels of colonial were disposed of last week by private contract, but the demand soon abated, and these sorts are again dull. Guayaquil steady, with sales at 47s to 54s. 1,020 bags by anction on Tuesday were mostly taken in at 45s to 55s; a few lots sold at 44s 6d to 48s per ewt. 48 bags Grenada withdrawn.

Rum .- Transactions have been small, including some Berbice at 2s7d per proof gallon.

per proof gallon. TEA.—The public sales have been small, and the market is firm. Buyers have, however, taken only moderate supplies, the weather, with the approach of Christmas, interrupting the usual course of business. 5,504 packages by aution went at about former rates to a slight reducby the packages by at the went at about former rates to a single reduc-tion upon young Hyson. Of Indian tea, 4,779 packages sold, and generally at firm prices. Duty payments on tea in the kingdom during the eleven months were 3,302,000 lbs more than in 1872; but the exports during the same period show a decrease of 6,345,000 lbs.

Rice.—There has not been any change in the position of the market. Prices of cargoes continue irregular. The Rice Brokers' Circular reports eight cargoes as having sold, Rangoon at 11s 6d off the coast or near at hand; December shipment 13s. Necrancie, 12s $4\frac{1}{2}d$. New rice for at hand; December shipment 13s. Necrancie, 12s 44d. New rice for spring shipment has seld upon higher terms, the latest sale being on the basis 12s to 12s 6d for Rangoon. Several contracts have been made in other kinds for arrival, including Madras at 12s 6d to 12s 9d; Bengal at 138 9d to 15s; Ballam at 12s 3d to 12s 9d. An arrived cargo of Bassein sold at 11s $7\frac{1}{2}d$. On the spot Rangoon has brought 11s 9d to 11s 9d; old Bengal 11s 6d per cwt.

SAGO.—3,059 bags small grain, by auction, were taken in. A portion sold at and afterwards from 16s to 17s 9d per cwt. SAGO FLOUR.-Further business has been done in Singapore at 15s 6d.

1,790 bags at public sale yesterday were withdrawn.

BLACK PEPPER.—The market is firm, although without animation. BLACK PEPPER.—The market is firm, although without animation. 90 tons Penang reported sold, to arrive, at $7_{16}^{+}d$. At auction yesterday, the sound portion of 907 bags bags Singapore was withdrawn : sea damaged selling on previous terms. 750 bags Penang about two-thirds sold at $7_{16}^{+}d$ per lb for West Coast. 489 bags Saigon withdrawn at 8d per lb per Ib

WHITE PEPPER is dull. 737 bags Singapore by auction about half sold at $10\frac{2}{8}$ d to 11d for dull and mixed small to fair. 462 bags Penang were chiefly taken in; a few lots selling at $10\frac{2}{8}$ d per lb, being a decline of id per 1b.

OTHER SPICES.—At the public sales 67 packages Dutch, chiefly low and shrivelled limed, sold at 1s 3d to 1s 10d; sound, about 80 to the pound, a: 2s 11d to 3s. 10 cases make found buyers as follows:— Ordinary to middling Penang and Singapore, 3s 4d to 3s 10d; broken and chips, 2s 10d. Cloves are firmer. A few parcels of Zanzibar sold privately at is 3d to 1s 2d and some to expire at 1s 4d. 4f below Ordinary to middling Penang and Singapore, 3s 4d to 3s 10d; broken and chips, 2s 10d. Cloves are firmer. A few parcels of Zanzibar sold privately at is 3d to 1s $3\frac{1}{2}d$, and some to arrive at 1s 4d. 46 bales good quality by auction, at 1s $3\frac{3}{2}d$. 60 bags Amboyna were taken in at 1s 4d. During the week business in the latter at 1s $2\frac{1}{2}d$ to 1s $3\frac{1}{2}d$. Penang, 1s $8\frac{1}{2}d$ to 1s 9d per 1b. 60 bales cinnamon sold at a reduc-tion of 3d to 6d upon the last quarterly sale prices. 128 packages chips at $3\frac{1}{2}d$ to $4\frac{1}{2}d$; bark, &c., $2\frac{3}{2}d$ per 1b. 200 cases cassia lignea were withdrawn. 140 bales cassia vera sold at 60s to 61s per cwt for good. 112 barrels Jamaica ginger brought 67s to 70s per cwt for sound of

ordinary quality. Pimento is quiet. SALTPETRE.—The market is firmer. Reported business for the week, 150 tons Bengal to arrive at 25s to 25s 6d per cwt, usual terms. No sales made on the spot.

COCHINEAL .- The sales have been deferred until this day in consequence of the fog.

quence of the log. OTHER DRYSALTERY GOODS.—A few transactions are reported in Gambier at 24s. 489 bales by auction were taken in at 24s 3d 'o 24s 6d. 200 boxes Cutch sold at 20s for good. Some parcels lac dye by

200 boxes cluch and at 205 for good, come parents are type by auction found buyers. Safflower without business. SHELLAC.—A further recovery in prices has occurred, and the market is very firm. By private contract sales of fine orange up to 10/15s. Other sorts in proportion. A C garnet 9/ 2s 9d to 9/5s; ditto to arrive at 8/ 15s per cwt. 54 chests offered by auction were there in taken in.

METALS .- The leading feature in this week's business has been a strong demand for tin, which shows a considerable recovery on recent depressed quotations. Statements of a deficiency in the production, and the relatively small supplies afloat to Holland, have partly in-fluenced this movement. Straits has sold at 120/ to 121/10s on the spot for delivery and to arrive; Banca at 118/ to 119/ eash; Australian, 117/ to 118/; English, 120/ to 121/ 10s. During the week a large quantity to 118/; English, 120/ to 121/10s. During the week a large quantity has changed hands. Some few sales reported in spelter, the latest at 26/15s for Silesian of common quality. At the usual public sale of sheet zinc, rolled at the London mills, 140 tons sold at 30/2s 6d; one lot, 30/5s for assorted gauges, part without reserve. There will not be any more offered this year. Quicksilver, 19/15s to 20/. Lead firm at the late advance, up to 24/5s for the best soft English. Copper has been

dull, with prices rather lower. Chili, 82/ to 82/ 10s, and higher in pro-portion for the best brands. Australian, 91/ to 93/. Scotch pig iron quiet, Latest sales at 105s to 105s 3d per ton cash.

JUTE .- The demand continues rather active for the reasons already given, viz., diminished shipments and the uncertainty as to the produc-tion next season on account of the rice famine. To these may be added symptoms of improvement in the demand for manufactured goods in Dundee, During the week the sales for arrival are again large. On the spot about 10,000 bales. Range of prices afloat 14i 5s to 21s 15s per ton. The next public sales are postponed until the 16th inst.

HEMP .- A few sales are reported at 41/ 10s to 41/ 15s per ton for fair roping.

LINSEED.—The market has been active, a large business in Calcutta to arrive, at 63s 3d to 63s 6d, and 64s demanded for late shipments, at which 200 tons sold. Price ex ship 62s 9d to 63s. Several cargoes of Black Sea off the coast sold at 59s 6d to 60s. A cargo per steamer at 578 9d for the c. ntinent. Bombay seed for spring shippent with sales at 638 9d. November and December shipments 648 9d per quarter.

315 30 101 models and December shipments 648 9d per quarter. Ons.—Olive steady, with sales at full rates. Megadore, 41/ to 41/10s; Malagar, 43/ 10s. Fish oils unaltered. Buyers of colonial sperm at 92/ to 93/. Pale seal quoted 34/ 10s. East India, 26/ to 26/ 10s per tun. Transactions in palm have been limited. Lagos, 35/. Cocon-nut active, with large sales at higher rates. Ceylon, 35/; for arrival, 35/ 10s to 36/ paid. 500 tons Cochin have sold at 38/ to 38/ 10s for fair and 40/ per tun demanded for fine quality. The market for linseed oil has been quiet with rather easier rates accepted, viz. 29/ 15s to 30/ on the spot. First four months quoted 30/ 10s. English brown rape has risen in price to 33/ 15s, and 1/ more for the next four months. A reaction subsequently occurred. This morning's means the more is 222/ and 34/ to 34/ 10s January to March. Renext four months. A reaction subsequently occurrent the apprice on the spot is 33/; and 34/ to 34/ 10s January to March, fined quoted 35/ to 35/ 10s. Foreign, 35/ 10s to 36/ per tun. Re

PETROLEUM —A large quantity sold during the week at 1s 0_3^2 d for American retined; January to March 1s 1_4^2 d per gallon. Deliveries last week 5,348 barrels, against 2,042 barrels in 1872.

SPIRITS TURPENTINE in steady domand at 31s to 31s 3d American. For delivery dull, at 31s 6d to 32s per cwt.

Tallow.—The supply of Colonial and South American is ample. Prices of Petersburg have varied but slightly during the week, and the market is now rather quiet. New, 40s 3d; December the same; January to March, 40s 9d; March, 41s 6d; April to June, 41s 6d por cwt.

POSTSCRIPT.

FRIDAT EVENING.

SUGAR.—The market is firm. A rather large business reported in West Indua, viz., 1,010 casks, making 2,349 casks for the week. Crystallised Demorara by auction sold at 29s to 32-. 181 casks 57 barrels Porto Rico were partly sold at 30s to 32s for fine grocery. 244 cases 891 bags Maroim v vere bought in at 193 6d to 24s. Privately 850 baskets Penang at 17s 6d.

COFFEE .- There have not been any public sales to-day but further business. RICE .- To-day a cargo of Rangoon, Dec. sailing, sold at 13s 3d

per cwt. SPICES .- No change.

SALTPETRE firm but quiet.

Cocurseat.—The sales to day comprised 1,685 bags, and nearly 700 sold without material change in prices.

SHELLAC .- 150 chests part sold, including fine orange, at 10/ 17s 6d per cwt.

DRYSALTERY GOODS. 5,000 boxes cutch were taken in, but since part sold at 20s 3d for time. 500 bags Madras turmeric taken in at 15s 6d. 269 cases lac dye sold at 1s to 1s 3d for good to fine marks, and 5d to 63d per lb for thers. METALS.—Tin firm. Other sorts quiet. Copper especially.

METALS.—11n hrm. Other sorts quiet. Copper especially. OILS.—263 casks cocoa-nut by auction were taken in. TALLOW.—At auction 121 casks 57 cases Australian, 590 casks sold— fair to good mutton at 41s to 42s 3d, and fair to good beef at 37s 6d to 39s. 224 pipes South American beef sold at 40s; two lots, 39s. 48 casks North American taken in at 38s 6d.

ADDITIONAL NOTICES.

GREEN FRUIT .- The report of Messrs Keeling and Hunt states that owing to the thick weather arrivals of oranges have been short, and higher prices realised. Lemons much improved in value, particularly those of fine quality. Black Spanish nuts and Barcelona nuts cleared Walnuts dull. A slight improvement in demand for Almeria grapes. Brazil nuts nearly all cleared from first hands. Coker nuts in request.

DRY FRUIT .-- Currants, while showing a slight fall, do not show a Valencias are cheaper, and fair dealt in. Muscatels sell slowly, corresponding increase in business. Valencias quantity selling. Sultanas hardly dealt in. quantity selling. prices asked being too high, and the season having closed.

COLONIAL WOOL -Owing to the fog, sales have not been able to be held either on Tuesday or Wednesday; they, consequently, will close on Saturday, instead of to-day. The attendance of buyers is less numerous, and prices generally rather weak.

HEMP.-Russiau remains very quiet, but more business doing this week in Manilua, at rather higher prices.

THE ECONOMIST.

SLK.-Very little doing during the week, the fog preventing people from seeing the silk. Prices nominally the same.

TOBACCO.—There has been little doing in the market during the past week owing to the unfavourable state of the weather; there is an evi-dent inclination on the part of home trade buyers to secure any parcels with substance and quality, of which there is but a limited quantity in the last import. Experters show here desire to expert hot quantity in the last import. Exporters show here desire to operate, but the supply of suitable qualities is but small. In segar tobacco and sub-

METALS.—Operations have been conducted but slowly, and the total business of the week has been below the average. Copper has proved heavy, the demand having been unusually small, but prices have not receded very materially. Iron keeps steady in value and quiet in domand. Tin has been in better request, and a good deal has been sold domand. at improving prices; the advance in straits is 4/ a ton; spelter and lead steady; t'n plates again dearer.

lead steady; i'm plates again dearer. LEATHER.—During the past week there has been no change in the leather market. The demand is limited as usual at this season, and at Leadenhall on Tuesday there was scarcely anything doing, the dense fog which prevailed in the city on that day and since having almost entirely suspended business. No change can be quoted in prices.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 8.—The total imports of foreign stock into London last week consisted of 5,620 head. In the corresponding week last year we received 5,572; in 1871, 10,475; in 1870, 12,070; in 1869, 7,453; and in 1868, 2,897 head.

1455; and in 1868, 2,897 head. In the cattle trade to-day there has been no feature of importance. The supply of stock has been about the average, but as usual there has been a marked prependerance of secondary qualities. English beasts have been fairly represented, and there has been an increased number from Scotland. The demand has been great at about the rates current on Monday last, the best Scots and crosses selling at 6s 2d to 6s 4d per 8 lbs. From Lincolnshire, Leicestershire, and Northampton-bies we available the state of the second construction of European chemical theory of European chemical theory of European chemical theory of European chemical theory of European chemical chemical theory of European chemical theory of European chemical theory of European chemical theory of European chemical chemical theory of European chemical theory of European chemical theory of European chemical c shire we received about 1,850; from other parts of England about 350; from Scotland about 200; and from Ireland about 500 head. The foreign side of the market has been much less freely supplied, only about 700 Dutch having been received. Business has been progressing slowly at about late quotations. For the best Downs and half-breds 6s 8d to 6s 10d per 8 lbs has been paid. Calves have been in moderate supply and fair received on former terms. Pick have been disposed of supply and fair request, on former terms. Pigs have been disposed of at about late prices.

THE ECONOMIST.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmo-sphere of large towns, and by their process, which is patented, is cheaper than White Lead. It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an analgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved *> be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zine is stamped-

"HUBBUCK'S, LONDON, PATENT." THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET. "For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in hea th. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapor."—Journ BULL September 14, 1859 paints

TRELOAR AND SONS' NEW PREMISES,

THE BARBADOS GAS COMPANY

<text>

OPTICES-12 Q near Victoria street, London, E.C. This Company is established to acquire and carry out the concession for lighting with gas the Island of Barta-dos, West Indies. The Company has already acquired the right, by special Act of the Barbados Legislature, to commence operations in the first instance in the flourish-ing eity of Bridgetown, containing (according to the census of 1871) a population of 45,587 inhabitants. The Act of Parliament grants the exclusive right to the Company of supplying gas to Bridgetown for the period of fitteen years from the 17th June, 1873. The Provincial Government being very desirous for the introduction of gas, have conceded most favourable terms, and the inhabi-tarts are canceled most favourable terms, and the inhabi-merator of fittings which can hereafter to adapted for gas. Bridgetown is a place of considerable importance, having mywords of 10,000 houses and many inportant public build-mes, see. The people are active and enterprising, and the Directors have every reason to believe that the con-sumption of gas will be excensive and general. The city is compared and flat, and the streets are well suited for the commical distribution of gas.

economical distribution of gas. The Act requires that the works are to be completed by June, 1875, and provides that the maximum rate chargeable for gas to private consumers is fixed at 158 pc 1,000 endle feet, which compares very favourably with the cost of oil. The price to be paid for the lighting of street lamps is equivalent to 4.6 55 per annum.

The price to be paid for the lighting of street lamps is equivalent to 46 ås per annua. The works may be purchased by the Anthorities, if they so desire, at any till e after the end of fifteen years from the last January, 1875, at a price anounting of wenty years' purchase, at 6 per cent, on the capital expended. A favourable preliminary arrangement has been entered into for the purchase, for the sum of 21,600, of saliable hand on the waterside on which to creat the Works, to which is attached a valuable wharf in Carlisic Bay. By this means the coals and materials of the Company will be discharged direct into their stores, thereby avoiding indischarged direct into their stores, thereby avoiding indischarged direct into their stores, thereby avoiding invitous for the advantages of gas, are willing to show their interest in the Company by taking one-fourth of the purchase money in shares. It has been ascertained that coal from England, even at the present exceptionally light rates, can be cellvered at Dridgetown at about 36s per ton, and the cost will, of course, he lessend when the inevitable reduction in ex-signing prices takes pince. It is believed, however, that a supply of suitable coal may be procured from Nova Scotia at a considerably lower rate, and negotiations are in pro-gress towards this object. There is every propert of a ready sale, at good prices, of all the residual products of the coal, and they are expected to form an important liften by the sugar planters for fuel in substitution for the coal now used, which, wing prices the spirit work is a consistive by the sugar planters for the is parks utilited, outer by the sugar planters for the is parks utilited, outer operations very serious conflagrations amongsi the plantations, and is not so clean as coke.

as coke. Sugar growing being the principal trade of the Island, there is little doubt that the demand for tar and anamo-nincal liquor will exceed the supply. The spent line will also be in great request for agricultural purposes. The following quotations will farnish some cridence of the prosperity of foreign and English Gas Companies:-Amount Present Paid Drive

MANCHESTER CORPORATION CONSOLIDATED STOCK.

INTERET AT £4 PER CENT, PER ANNUM.

(Authorised by Act of Parliament, 35 and 36 Vict., cap. XXXI.)

The Corporation of Manchester give notice, that they are prepared to receive a limited amount of money on account of the purchase of their new Consolidated Stock, which will bear interest at the rate of four pounds per centum per annum, payable half-yearly on the 24th June and 24th December. The Consolidated Stock is by Act of Parliament (35 and 36 Vic., cap. 31) made "a charge upon the City Rate, and all landed and other property vested in or belonging to the Corporation or which may be acquired by them."

and 36 Vie., eap. 31) made "a charge upon the City Rate, and all harded and other property vested in or belonging to the Corporation or which may be acquired by them." The City Rate is not limited in amount, and the security for this Stock is, therefore, not only the whole of the property vested in or belonging to the Corporation, but in fact the whole of the property within the City of Manchester, the rateable annual value of which now exceeds two millions sterling. Certificates under the Common Seal of the Corpora-tion for the amount of Stock held will be issued, and will bear thereon the Certificate of the Town Clerk that the amount issued is within the borrowing powers of the Corporation as authorised by Act of Parlianent. The Stock will be issued in any amount divisible by all official charges. Thus an investor of £100 each, or twenty of £50 each. The Stock will bear a fixed and unalterable rate of four per cent. haterest in perpetaity; and the interest or dividend warrants will be issued from the City Treasurer's office, and will be payable in cash at the Manchester and Liverpool District Bank in Manchester and Liverpool, and at all their Brancles; and also at the Bank of Messrs smith, Payne, and Smiths, in London. Such varmats will also be payable by the Bank of Scotland, Edinburgh; behast, National Provincial Bank of Messrs smith, Payne, and Smiths, in London. Such varmats will also the payable by the Bank of Scotland, Edinburgh; behast, rest of the and of a cot and find facili-ties wi I thus be given to investors, and in point of con-vent nee the stock will be equal, if not superior, to any other form of security. Amounts may be paid at once and direct to the City Trasurer, who will give an interim receipt, to be after-wards exchanged for the Stock Certificate, and the interest will accent from the date of payment.—By order, ____OSEPH HERON, Town Clerk. Town Hall, Manchester, Dec. 11, 1873.

Town Hall, Manchester, Dec. 11, 1873. BUENOS AYRES 6 PER CENT. STERLING LOAN FOR £2,040,800. Messrs BAKING BROTHERS and CO. are authorised by Senor Don Manuel A. Aguirre, duly empowered for fluat purpose by the Government of the province of Buenos Ayres, to receive applications for £2,040,800 Bonds of the Province of Buenos Ayres, bearing interest at the rate of six per cent, per annum from the 1st October, 1873, payable by half-yearly dividend warrants, at the counting-house of Messrs Baring Brothers and Co. in London, on the 1st April and 1st October of each year. The Bonds will be in amounts of £500 and £100 each. A sinking fund of one per cent, per annum on the principal of the Loan will be applied by half-yearly drawings, together with the interest on all Bonds paid off, to the redemption of the Loan at par. The Bonds drawn for reimbursement will cease to bear interest from the date when they become payable, and will be paid off at the Bonds at the counting-house of Messrs : a ring Brothers and Co. The first drawing will take place so that the Bonds drawn will be repaid on 1st October, 1874. The Government of Buenos Ayres reserves the right to increase the amount of the sinking fund at any time it may deem expedient.

increase the annount of the similar fund at any time it may deem expedient. The Bonds and Dividends of this Loan will be exempt from any present or future taxation in Buenos Ayres, This Loan is issued for the purposes stated in the annexed memorandum, furnished by Don Manuel A.
