~~UNCLASSIFIED~~

The first month of operation for HML-167 was a period of intense dedication on the part of the individuals, and a period of great productivity from the squadron as a unit. Operating with only 11 aircraft, 10 pilots and an average of 55 enlisted men, HML-167 flew a total of 1,785 sorties and accomplished 694 tasks, while recording 566.5 flight hours during April 1968. In addition, it carried 1,225 passengers and 3 Medevacs. 88,100 rounds of 7.62mm ammunition and 592 2.75 inch rockets were expended, resulting in 19 structures destroyed, 30 damaged, 4 confirmed KBA, and 2 possible KBA.

HML-167 and VMO-2 aircraft and pilots flew together on many missions and continued to fulfill the same commitments previously assigned to VMO-2. HML-167 gunships and slicks were utilized for a wide variety of missions during the month, among which were: armed escort of transport helicopters carrying troops and supplies, medevac escort, visual reconnaissance, TAC(A), fire suppression, search and destroy operations, photographic reconnaissance, APD (Airborne Personnel Detector), night "Firefly" patrols, and VIP transport.

The squadron took an active part in Operation BALLARD VALLEY, a largescale Marine operation southwest of Danang. It escorted troop lifts, resupply, and medevacs. On 29 April, due to an enemy offensive expected on 1 May, the operation was halted. HML-167 escorted the troop extract until darkness and continued the next day in order to return the troops to positions offering security to the Danang area.

HML-167 aircraft and personnel continued to operate in support of ROK Marines. Support missions included VIP, air liason, medevac, and resupply escort. In many instances the resupply aircraft received fire, and were assisted by the HML-167 gunships in suppressing it.

The squadron had its first accident during April, as a gunship crashed and burned during a search and destroy mission as a result of direct enemy action. The crew and pilots were killed in the crash which occurred about 13 miles southwest of Danang.

The squadron personnel worked many hours in organizing their departments, in addition to the many flight hours recorded. As the squadron grows and becomes a more efficient working unit, its output will increase tremendously. The squadron morale is high, and, as there should be in a new organization, the "Espirit De Corps" is spreading throughout.
