Foreword

The National Bureau of Standards, Standards Information Services (NBS-SIS) maintains a reference collection of more than 200,000 engineering and related standards covering the activities of more than 380 U.S. technical societies, professional organizations, and trade associations; U.S. Federal and State governments; and the standards and specifications of the foreign national and international standardizing bodies.

For some time now the National Bureau of Standards has recognized a need for a one source listing of existing standards within the international community. Such a reference source, which provides easy accessibility, is open to a wide range of uses. This Index contains the standards of five international organizations, most of which are nongovernmental. However, future plans are to expand the Index to include many other international governmental organizations such as the Economic Commission for Europe (ECE), the Organization for Economic Cooperation and Development (OECD), the World Health Organization (WHO), and the International Labor Organization (ILO).

It is particularly important to world trade that better communication be developed in the standards area. Serious efforts are underway among nations and among international organizations to harmonize standards so as to provide a consistently competent body of technical specifications that will enhance world trade and not impede its flow by creating non-tariff barriers.

Index of International Standards

Sophie J. Chumas

This computer-produced Index, based on the Key-Word-In-Context (KWIC) system, contains over 2,700 standard titles of the International Organization for Standardization (ISO), the International Electrotechnical Commission (IEC), the International Commission on Rules for the Approval of Electrical Equipment (CEE), the International Special Committee on Radio Interference (CISPR), and the International Organization of Legal Metrology (OIML).

Key Words: Analyses; International Commission on Rules for the Approval of Electrical Equipment; International Electrotechnical Commission; International Organization for Standardization; International Organization of Legal Metrology; International Special Committee on Radio Interference; recommendations; specifications; standards; test methods.

1. Introduction

This Index of international standards, recommendations, test methods, analyses, and specifications, contains over 2,700 titles. It is a computer-produced Index based on the Key-Word-In-Context (KWIC) system. The standards-writing organizations represented are: the International Organization for Standardization (ISO), the International Electrotechnical Commission (IEC), the International Commission on Rules for the Approval of Electrical Equipment (CEE), the International Special Committee on Radio Interference (CISPR), and the International Organization of Legal Metrology (OIML). The standards of these international organizations have worldwide application and contribute to world progress.

The purpose of this Index is to identify existing international standards for a particular product, the characteristics or parts of products, the safety or performance of products, any related materials, vocabularies, symbols, test methods, analyses, and other aspects of standards. Criteria for inclusion are that an organization be international in scope and that it have standards published in the English language.

Many titles were editorially changed either to include another descriptive term (key word) for better subject identification or to prevent repetitious titles in the text of the Index. However, none of the titles were edited to cause any change in their meaning. Since standards titles as found in this Index are not always exact, for ordering purposes, the designation number should accompany a request. Bibliographic information is available through the Standards Information Services (NBS-SIS) of the National Bureau of Standards, the American National Standards Institute (ANSI), or the issuing organization. Ordering information for the indexed standards may be found under Section 5.

The following indexing guidelines were established for the standards in this Index:

- a. Supplements to standards were indexed only when they carried separate titles in addition to the main title.
- b. Amendments to standards were not indexed.
- c. Date of the original document was used.
- d. When the title contained a word for which

there are two spellings, both versions were usually included, e.g., aluminum, aluminium.

This source of reference, which will be updated periodically, will hopefully be of assistance to users concerned with world trade, metrication, and certification; to developing countries; to U.S. and foreign standardizers; to foreign national, regional, international, and U.S. standards bodies; to manufacturers, engineers, builders and architects; to environmentalists; to consumer-oriented organizations; and to students of the standardization discipline.

2. How to Use the KWIC Index

2.1. Index Entries

An index entry contains four items of information.

Sample Entry (Exact title of standard)

- (1) Std. for Rolling Bearings: Tolerances; Metric Series Chamfer Dimension Limits and Maximum Shaft and Housing Fillet Radius
- (2) (1972)
- (3) ISO
- (4) 582

The first item given is the title of the standard, specification, or recommendation. Generally, the key words found in the title are sufficient to identify the product or article covered; however, in some instances additional descriptive terms have been added to the title to aid in identifying the contents. Over 600 words, which are meaningless for searching purposes, do not appear as key words. Examples are: "and," "for," "general," "method," and "practice." A list of these words appears in Section 5, "Stop List." The second item denotes the year of publication. The third item is the issuing organization, identified by an acronym consisting of five letters or less. The fourth item is the standard number assigned by the organization. Items three and four make up the standard's designation number. This alphanumeric designation is always found in a column next to the right-hand margin of the Index.

2.2. Reading the KWIC Index

The title of each standard can be found under all the significant key words which it contains. These key words are arranged alphabetically down the center of each page together with their surrounding context. Each such permuted title is assigned only one line per key word entry in the Index; therefore, titles longer than one line have been cut by the computer. This truncation is indicated by a virgule (/) at the point where the title was cut.

Sample Entry (The same title in Section 2.1., as it appears in KWIC form, edited and truncated):

imits and Maximum Shaft and Housing Fil/ Std.
for Rolling Bearings: Tolerances; Metric Series
Chamfer Dimension L ISO 582

Occasionally both ends of a title will be truncated. When this condition occurs, the virgule will be omitted. Missing portions of a title can be found by locating in the Index one or more of the title's other key words.

An entry line is read from left to right, beginning after the longest blank space in the line and ending at the designation number. If the longest blank space is not at the beginning of the line, the entry will be continued at the left hand margin of the same line.

3. List of Organizational Names and Addresses

International Commission on Rules for the Approval
of Electrical Equipment (CEE)
310 Utrechtseweg
Arnhem, Netherlands

International Electrotechnical Commission (IEC)
1, rue de Varembe
1211 Geneve 20
Switzerland/Suisse

International Organization of Legal Metrology
(OIML)
11 rue Turgot
75-Paris 9e, France

International Organization for Standardization (ISO)
1, rue de Varembe
1211 Geneve 20
Switzerland/Suisse

International Special Committee on Radio Interference
(CISPR)
1, rue de Varembe
1211 Geneve 20
Switzerland/Suisse

Secretariat: British Standards Institution (BSI)
2 Park Street
London W1Y 4AA
England

4. Availability of Standards

Standards indexed in this publication are available in the United States from the:

American National Standards Institute (ANSI)
1430 Broadway
New York, New York 10018

ANSI, as a National ISO member body, serves as the sole sales agent in the United States for foreign and international standards.

The following National standardizing bodies serve as national representatives for one another. Each acts within its own country as sole sales agent and information center for the standards of the other National standardizing bodies.

Albania: STASH, Bureau de Standardisation aupres de la Commission du Plan d'Etat de la Republique Populaire, D'Albania, Tirana

Algeria: Office National de la Propriete Industrielle, 5, rue Abou Hamou Moussa, B.P. 1021

Argentina: IRAM, Instituto Argentino de Materiales, Chile 1192, Buenos Aires

xyquinoline /	Std. for Cryolite (Natural and Artificial):	Determination of Aluminium (Aluminum) Content—8 Hydro	ISO	2367
	Rec. for Meth. of Chemical Analysis of Manganese Ores -	Determination of Aluminium (Aluminum) Oxide (1963)	ISO	318
	Rec. for Chemical Analysis of Zinc Alloys—Volumetric	Determination of Aluminium (Aluminum) (1970)	ISO	1169
e Titration/	Std. for Surface Active Agents: Detergents -	Determination of Anionic-Active Matter (Direct Two Phas	ISO	2271
(1968)	Rec. for Plastics -	Determination of Apparent Density of Cellular Plastic (ISO	845
that Can Be Poured from a Specified /	Rec. for Plastics -	Determination of Apparent Density of Moulding Material	ISO	60
that Cannot Be Poured from a Specifi/	Rec. for Plastics -	Determination of Apparent Density of Moulding Material	ISO	61
(1969)	Rec. for Surface Active Agents:	Determination of Apparent Density of Pastes on Filling	ISO	1064
fore and After Compactio/	Rec. for Surface Active Agents:	Determination of Apparent Density of Washing Powders Be	ISO	697
	Rec. for Flexible Cellular Materials -	Determination of Apparent Density (1971)	ISO	1855
	Std. for Leather:	Determination of Apparent Density (1972)	ISO	2420
	Rec. for	Determination of Arsenic in Coal and Coke (1967)	ISO	601
Rec. for Meth. of Chemical Analysis of Manganese Ores -		Determination of Arsenic (1963)	ISO	317
	Rec. for Urea for Industrial Use -	Determination of Ash—Gravimetric Meth. (1970)	ISO	1594
	Std. for Glycerols for Industrial Use -	Determination of Ash—Gravimetric Meth. (1972)	ISO	2098
	Rec. for Plastics—Pvc Resins -	Determination of Ash and Sulphated-Ash (1970)	ISO	1270
ubber Industry (1969)	Rec. for	Determination of Ash Content of Carbon Black for the Ru	ISO	1125
	Rec. for	Determination of Ash in Raw Natural Rubber (1962)	ISO	247
68)	Rec. for Oilseed Residues:	Determination of Ash Insoluble in Hydrochloric Acid (19	ISO	735
71)	Rec. for Fruit and Vegetable Products -	Determination of Ash Insoluble in Hydrochloric Acid (19	ISO	763
	Rec. for	Determination of Ash of Solid Mineral Fuels (1970)	ISO	1171
(1968)	Rec. for Plastics -	Determination of Ash of Unplasticized Cellulose Acetate	ISO	872
	Rec. for Higher Alcohols for Industrial Use -	Determination of Ash (Gravimetric Meth.) (1970)	ISO	1851
	Rec. for Meat and Its Products:	Determination of Ash (1969)	ISO	936
	Rec. for Pulps -	Determination of Ash (1970)	ISO	1762
	Rec. for Paper and Board -	Determination of Ash (1971)	ISO	2144
	Std. for Cereals, Pulses and Derived Products:	Determination of Ash (1972)	ISO	2171
	Std. for Formaldehyde Solutions for Industrial Use:	Determination of Ash (1972)	ISO	2224
Rec. for Meth. of Chemical Analysis of Manganese Ores:		Determination of Barium Oxide Content (1966)	ISO	548
	Rec. for Fibre (Fiber) Building Boards:	Determination of Bending Strength (1972)	ISO	768
	Rec. for Plastics -	Determination of Boiling Water Absorption (1959)	ISO	117
	Rec. for	Determination of Boric Acid in Latex (1970)	ISO	1802
of Sin/	Std. for Textiles: Yarn from Packages—Meth. for	Determination of Breaking Load and Elongation of Same (ISO	2062
eak of Fabrics Coated with Rubber or Plastics (/	Rec. for	Determination of Breaking Strength and Elongation at Br	ISO	1421
ry (11) Ch/	Rec. for Higher Alcohols for Industrial Use -	Determination of Bromine Index in the Presence of Mercur	ISO	1848
	Rec. for Meth. for the	Determination of Bromine Index (1968)	ISO	761
	Std. for Cork—Expanded Pure Agglomerated -	Determination of Bulk Density (1972)	ISO	2189
1)	Rec. for Plastics -	Determination of Bulk Factor of Moulding Materials (196	ISO	171
	Rec. for Chemical Analysis of Zinc: Polarographic	Determination of Cadmium in Zinc (1969)	ISO	1054
(1963)	Rec. for	Determination of Caking Power of Coal by the Roga Meth.	ISO	335
complexomet/	Std. for Sodium Chloride for Industrial Use:	Determination of Calcium and Magnesium Contents—EDTA	ISO	2482
	num Oxide Primarily Used for the Production of Aluminium -	Determination of Calcium Content—Atomic Absorption Me	ISO	2069
	num Oxide Primarily Used for the Production of Aluminium -	Determination of Calcium Content—Spectrophotometric M	ISO	2070
	Rec. for Pulps:	Determination of Calcium Content (1968)	ISO	777
i/	Rec. for Meth. of Chemical Analysis of Manganese Ores:	Determination of Calcium Oxide Content and Magnesium Ox	ISO	552
69)	Rec. for Potassium Hydroxide for Industrial Use:	Determination of Calcium: EDTA Complexometric Meth. (19	ISO	997
69)	Rec. for Sodium Hydroxide for Industrial Use:	Determination of Calcium; EDTA Complexometric Meth. (19	ISO	986
	Rec. for Building Materials -	Determination of Calorific Potential (1971)	ISO	1716
y the High Temperature Combustion Meth. (1967)	Rec. for	Determination of Carbon and Hydrogen in Coal and Coke B	ISO	609
y the Liebig Meth. (1967)	Rec. for	Determination of Carbon and Hydrogen in Coal and Coke B	ISO	625
	Rec. for Vulcanized Rubber -	Determination of Carbon Black—Pyrolytic Meth. (1971)	ISO	1408
c. for Sodium and Potassium Silicates for Industrial Use -		Determination of Carbon Dioxide Content Expressed as So	ISO	1691
ric Meth. (1969)	Rec. for	Determination of Carbon Dioxide in Coal by the Gravimet	ISO	925
	Rec. for Meth. of Chemical Analysis of Manganese Ores -	Determination of Carbon Dioxide (1963)	ISO	314
oxylamine Meth. (1972)	Std. for Essential Oils -	Determination of Carbonyl Compounds Content—Free Hydr	ISO	1271
chloride Po/	Rec. for Higher Alcohols for Industrial Use -	Determination of Carbonyl Compounds (Hydroxylammonium C	ISO	1847
ties (1972)	Std. for Ropes -	Determination of Certain Physical and Mechanical Proper	ISO	2307
contact with Che/	Rec. for Plastics—Rec. Pract. for the	Determination of Change of Mechanical Properties After	ISO	462
(1972)	Std. for Sodium Hydrogen Carbonate for Industria/	Determination of Chloride Content—Mercurimetric Meth.	ISO	2201
(1973)	Std. for Sodium Chlorate for Industrial Use:	Determination of Chloride Content—Mercurimetric Meth.	ISO	2463
(1973)	Std. for Potassium Sulphate for Industrial Use:	Determination of Chloride Content—Mercurimetric Meth.	ISO	2488
	Rec. for Meat and Its Products -	Determination of Chloride Content (1970)	ISO	1841
eth. (1973/	Std. for Sodium Carbonate for Industrial Use:	Determination of Chloride Content: Volhard Volumetric M	ISO	742
eth. (1973/	Std. for Sodium Hydroxide for Industrial Use:	Determination of Chloride Content: Volhard Volumetric M	ISO	981
eth (19/	Rec. for Potassium Hydroxide for Industrial Use:	Determination of Chloride Content: Volhard Volumetric M	ISO	992
	Rec. for Analysis of Soap:	Determination of Chlorides (1965)	ISO	457
Mixture (1967)	Rec. for	Determination of Chlorine in Coal and Coke Using Eschka	ISO	587
re Combustion Meth. (1963)	Rec. for	Determination of Chlorine in Coal by the High Temperatu	ISO	352
d Copolymers (1970)	Rec. for Plastics -	Determination of Chlorine in Vinyl Chloride Polymers an	ISO	1158
ing Diphenylcarbaid/	Std. for Aluminium and Its Alloys -	Determination of Chromium—Spectrophotometric Meth. Us	ISO	2298
	Rec. for Meth. O6 Chemical Analysis of Manganese Ores:	Determination of Chromium Content (1967)	ISO	619
	Rec. for Essential Oils -	Determination of Cineole Content (1970)	ISO	1202
	Rec. for	Determination of Coagulum Content of Latex (1968)	ISO	706
Rec. for Meth. of Chemical Analysis of Manganese Ores -		Determination of Cobalt (1963)	ISO	316
	Rec. for Spices and Condiments:	Determination of Cold Water Soluble Extract (1969)	ISO	941
	Std. for Petroleum Products -	Determination of Colour (Color) (1972)	ISO	2049
Rec. for Meth. of Chemical Analysis of Manganese Ores:		Determination of Combined Water Content (1966)	ISO	549
under Constant Deflection at Low Temperatures (/	Rec. for	Determination of Compression Set of Vulcanized Rubbers	ISO	1653
ion at Normal and High Temp/	Rec. for Vulcanized Rubbers:	Determination of Compression Set Under Constant Deflect	ISO	815
	Std. for Flexible Cellular Materials -	Determination of Compression (1972)	ISO	1856
67)	Rec. for Plastics -	Determination of Compressive Properties of Plastics (19	ISO	604
	Std. for Petroleum Products: Lubricating Grease -	Determination of Cone Penetration (1972)	ISO	2137
meth. (1/	Std. for Potassium Sulphate for Industrial Use:	Determination of Content—Barium Sulphate Gravimetric	ISO	2487
um Tetra/	Rec. for Potassium Chloride for Industrial Use -	Determination of Content—Gravimetric Meth. as Potassi	ISO	2051
um Tetra/	Std. for Potassium Sulphate for Industrial Use:	Determination of Content—Gravimetric Meth. as Potassi	ISO	2485

Index of International Standards

umetric/	Rec. for Potassium Chloride for Industrial Use -	Determination of Content—Sodium Tetrphenylborate Vol	ISO	2052
umetric /	Std. for Potassium Sulphate for Industrial Use:	Determination of Content—Sodium Tetrphenylborate Vol	ISO	2486
	Rec. for Chemical Analysis of Zinc Alloys -	Determination of Copper by Electrolysis (1971)	ISO	1976
	chemical Analysis of Aluminum and Its Alloys: Electrolytic	Determination of Copper in Aluminium Alloy (Content Gre	ISO	796
d and Unvulcanized) (1970)	Rec. for	Determination of Copper in Compounded Rubber (Vulcaniz	ISO	1396
	chemical Analysis of Magnesium and Its Alloys: Photometric	Determination of Copper (Oxalyldihydrazide Meth. Applic	ISO	794
	alysis of Aluminium (Aluminum) and Its Alloys: Photometric	Determination of Copper (Oxalyldihydrazide Meth. Applic	ISO	795
	Rec. for Meth. of Chemical Analysis of Manganese Ores -	Determination of Copper (1963)	ISO	322
	Rec. for Pulps:	Determination of Copper (1968)	ISO	778
	Rec. for Chemical Analysis of Zinc: Spectrophotometric	Determination of Copper (1969)	ISO	1053
	Rec. for Raw-Rubber and Rubber Latex -	Determination of Copper (1971)	ISO	1654
	Std. for Ebonite:	Determination of Cross Breaking Strength (1972)	ISO	2473
970)	Std. for Ebonite:	Determination of Crushing Strength (1972)	ISO	2474
	Rec. for	Determination of Crystallizing Point—General Meth. (1	ISO	1392
	Phenol: Ortho, Meta, and Para Cresol for Industrial Use -	Determination of Crystallizing Point (1971)	ISO	1901
	ta Cresol, Cresylic Acid and Xylenols for Industrial Use -	Determination of Density at 20 °C (1971)	ISO	1903
	Std. for Purified Glycerol for Industrial Use -	Determination of Density at 20 °C (1972)	ISO	2099
	Rec. for Meth. for the	Determination of Density of Latex (1968)	ISO	705
	Rec. for Meth. for the	Determination of Density of Liquids at 20 °C (1968)	ISO	758
	c. for Sodium and Potassium Silicates for Industrial Use -	Determination of Density of Samples in Solution—Meth.	ISO	1687
	Rec. for Fibre (Fiber) Building Boards:	Determination of Density (1968)	ISO	819
	Rec. for Particle Boards:	Determination of Density (1968)	ISO	822
	Rec. for Oilseed Residues:	Determination of Diethyl Ether Extract (1968)	ISO	736
bjected to Laundering Near the Boiling Point (1/	Rec. for	Determination of Dimensional Change in Woven Fabrics Su	ISO	675
e Conditit/	Std. for Machine Made Textile Floor Coverings:	Determination of Dimensional Changes in Varying Moistur	ISO	2551
	Rec. for Particle Boards:	Determination of Dimensions of Test Pieces (1968)	ISO	821
	Std. for Fibre (Fiber) Building Boards:	Determination of Dimensions of Test Pieces (1972)	ISO	766
	Rec. for Raw Natural Rubber	Determination of Dirt (1971)	ISO	249
	Rec. for Cresylic Acid and Xylenols for Industrial Use -	Determination of Distillation Range (1971)	ISO	1906
	Rec. for Higher Alcohols for Industrial Use -	Determination of Distillation Yield (1970)	ISO	1845
	Std. for Petroleum Products—Lubricating Grease -	Determination of Dropping Point (1972)	ISO	2176
	c. for Sodium and Potassium Silicates for Industrial Use -	Determination of Dry Matter—Gravimetric Meth. (1970)	ISO	1688
973)	Std. for Glucose Syrup:	Determination of Dry Matter—Refractive Index Meth. (1	ISO	1743
	Rec. for Pulps:	Determination of Dry Matter Content (1967)	ISO	638
th.) (1970)	Rec. for Glucose Syrup -	Determination of Dry Matter of Moisture (Vacuum Oven Me	ISO	1742
	Std. for Natural Rubber Latex -	Determination of Dry Rubber Content (1972)	ISO	126
	lastics—Aqueous Dispersions of Polymers and Copolymers -	Determination of Dry Solids Content at 105 °C (1970	ISO	1625
	d. for Sodium and Potassium Silicates for Industrial Use -	Determination of Dynamic Viscosity (1972)	ISO	2123
y Velocity Area Meth. (1/	Rec. for Collection of Data for	Determination of Errors in Measurement of Liquid Flow B	ISO	1088
or Essential Oils—Estimation of Free Alcohols Content by	Rec. for	Determination of Ester Value After Acetylation (1971)	ISO	1241
of Essential Oils (1968)	Rec. for	Determination of Ester Value and Calculation of Content	ISO	709
zed Cellulose Acetate (1971)	Rec. for Plastics -	Determination of Ethyl Ether Soluble Matter in Plastici	ISO	1875
	Rec. for Spices and Condiments:	Determination of Extraceous Matter (1969)	ISO	927
	Rec. for Milk -	Determination of Fat Content (Reference Meth.) (1970)	ISO	1211
	Rec. for Cheese and Its Processed Products -	Determination of Fat Content (Reference Meth.) (1970)	ISO	1735
	Rec. for Dried Milk -	Determination of Fat Content (Reference Meth.) (1970)	ISO	1736
	Rec. for Evaporated Milk and Sweetened Condensed Milk -	Determination of Fat Content (Reference Meth.) (1970)	ISO	1737
	Std. for Whey Cheese:	Determination of Fat Content (Reference Meth.) (1972)	ISO	1854
	Std. for Cream:	Determination of Fat Content (Reference Meth.) (1972)	ISO	2450
f Individual Fibres (Fibers) (1962)	Rec. for	Determination of Fibre Length by Measuring the Length O	ISO	270
meametric Meth. (1972)	Std. for	Determination of Fineness of Flax Fibres (Fibers)—Per	ISO	2370
	Rec. for Paints and Varnishes -	Determination of Fineness of Grind (1971)	ISO	1524
r Pelletized Carbon Black for Use in the Rubber Industry -	Rec. for the	Determination of Fines Content (1970)	ISO	1435
ics in the Form of Film (1970)	Rec. for Plastics -	Determination of Flammability and Burning Rate of Plast	ISO	1326
1970)	Rec. for Paints and Varnishes -	Determination of Flammability Of: in the Form of Bars (ISO	1210
(1972)	Std. for Plastics -	Determination of Flashpoint (Closed Cup Meth.) (1971)	ISO	1523
	Std. for Paints and Varnishes:	Determination of Flexural Properties of Rigid Plastics	ISO	178
	std. for Aluminium (Aluminum) Fluoride for Industrial Use:	Determination of Flow Time by Use of a Flow Cup (1972)	ISO	2431
inter Meth./	Rec. for Cryolite (Natural and Artificial) -	Determination of Fluorine Content—Modified Willard—	ISO	2362
hanol (1968)	Rec. for Analysis of Soaps:	Determination of Fluorine Content: Modified Willard—W	ISO	1693
	Std. for Formaldehyde Solutions for Industrial Use:	Determination of Foreign Matter of Low Solubility in Et	ISO	673
	Rec. for	Determination of Formaldehyde Content (1972)	ISO	2227
	Std. for Ammonium Nitrate for Industrial Use:	Determination of Forms of Sulphur in Coal (1960)	ISO	157
e Acetate (1969)	Rec. for Plastics:	Determination of Free Acidity—Volumetric Meth. (1972)	ISO	2364
Phenol—Formaldehyde Mouldings (19/	Std. for Analysis of Soap:	Determination of Free Acidity of Unplasticized Cellulos	ISO	1061
	Std. for Meat and Its Products -	Determination of Free Ammonia and Ammonium Compounds in	ISO	120
mouldings (1959)	Rec. for Plastics -	Determination of Free Caustic Alkali (1973)	ISO	456
)	Rec. for	Determination of Free Fat Content (1973)	ISO	1444
	Rec. for	Determination of Free Phenols in Phenol—Formaldehyde	ISO	119
	Rec. for the Analysis of Soaps:	Determination of Freezing Point of Essential Oils (1969	ISO	1041
ric Bomb Meth. and Calcul/	Rec. for Solid Mineral Fuels -	Determination of Fusibility of Fuel Ash (1967)	ISO	540
urimetric M/	Std. for Sodium Chloride for Industrial Use:	Determination of Glycerol (1969)	ISO	1066
Hardness (85 to 100 IRHD) (1971)	Rec. for	Determination of Gross Calorific Value by the Calorimet	ISO	1928
hardness (10 to 35 IRHD) (1971)	Rec. for	Determination of Halogens, Expressed as Chlorine—Merc	ISO	2481
	Rec. for	Determination of Hardness of Vulcanized Rubbers of High	ISO	1400
	Rec. for	Determination of Hardness of Vulcanized Rubbers of Low	ISO	1818
	Rec. for Synthetic Rubber Latexes -	Determination of Hardness of Vulcanized Rubbers (1968)	ISO	48
ples (1973)	Std. for Iron Ores:	Determination of High Speed Mechanical Stability (1971)	ISO	2006
	Rec. for Meth. of Chemical Analysis of Manganese Ores -	Determination of Hygroscopic Moisture in Analytical Sam	ISO	2596
	Rec. for Plastics—Pvc Resins -	Determination of Hygroscopic Moisture (1963)	ISO	310
	Rec. for Oleaginous Seeds:	Determination of Impurities and Foreign Matter (1970)	ISO	1265
Extinguishing Thermosetting of (196/	Rec. for Plastics -	Determination of Impurities (1968)	ISO	658
ans of a Durometer (Shore Hardness) /	Rec. for Plastics -	Determination of Incandescence Resistance of Rigid Self	ISO	181
	Rec. for Crude Vegetable Oils and Fats:	Determination of Indentation Hardness of Plastics by Me	ISO	868
	Rec. for Animal Fats:	Determination of Insoluble Impurities (1968)	ISO	663
		Determination of Insoluble Impurities (1969)	ISO	932

Index of International Standards

te (1970)	Rec. for Plastics -	Determination of Insoluble Particles in Cellulose Aceta	ISO	1598
e Photometric Meth. /	Std. for Magnesium and Its Alloys -	Determination of Insoluble Zirconium Alizarin Sulphonat	ISO	2354
inium Oxide Primarily Used for the Production of Aluminium:		Determination of Iron Content-1,10-Phenanthroline P	ISO	805
ometric Me/	Rec. for Cryolite (Natural and Artificial) -	Determination of Iron Content-1,10 Phenanthroline Pho	ISO	1694
std. for Aluminium (Aluminum) Fluoride for Industrial Use:		Determination of Iron Content-1,10 Phenanthroline Pho	ISO	2368
pectrophot/	Rec. for Phosphoric Acid for Industrial Use -	Determination of Iron Content-2, 2'-Bipyridyl S	ISO	849
olyphosphate and Sodium Pyrophosphate for Industrial Use -		Determination of Iron Content-2, 2'-Bipyridyl S	ISO	852
otometric Meth. (1970/)	Rec. for Urea for Industrial Use -	Determination of Iron Content-2,2'-Bipyridyl pH	ISO	1595
omet/	Std. for Formaldehyde Solutions for Industrial Use:	Determination of Iron Content-2,2' Bipyridyl Phot	ISO	2226
otometric Meth/	Rec. for Formic Acid for Industrial Use -	Determination of Iron Content: 2, 2'-Bipyridyl pH	ISO	1707
otometric Meth/	Rec. for Nitric Acid for Industrial Use -	Determination of Iron Content: 2, 2'-Bipyridyl pH	ISO	1982
ctrophoto/	Rec. for Hydrochloric Acid for Industrial Use:	Determination of Iron Content: 2,2'-Bipyridyl Spe	ISO	909

ature Distillation of Bro/	Rec. for Determination of the	Yields of Tar, Water, Gas and Coke Residue by Low Tempe	ISO	647
ders Used for Anaesthetic and Resuscitation Pur/	Rec. for Determination of the	Yoke Type Valve Connections for Small Medical Gas Cylin	ISO	407
	ly Used for the Production of Aluminium—Determination of	Zinc—Atomic Absorption Meth. (1971)	/M Oxide Primari	ISO
	al Analysis of Magnesium and Its Alloys—Determination of	Zinc—Volumetric Meth. (1970)	Rec. for Chemic	ISO
a/	of Aluminium (Aluminium) and Its Alloys—Determination of	Zinc—Volumetric Meth. (1970)	/ for Chemical Analysis	ISO
	Rec. for Composition of Magnesium Aluminium (Aluminium)	Zinc Alloy Castings and Mechanical Properties of Sand C	ISO	121
	Rec. for Composition of Magnesium Aluminium (Aluminium)	Zinc Alloy Ingots for Casting Purposes (1959)	ISO	122
1971)	Rec. for	Zinc Alloy Ingots (1963)	ISO	301
uminium) (1970)	Rec. for Chemical Analysis of	Zinc Alloys—Determination of Copper by Electrolysis (ISO	1976
	Rec. for Chemical Analysis of	Zinc Alloys—Volumetric Determination of Aluminium (Al	ISO	1169
	Rec. for Classification of Copper Nickel	Zinc Alloys (1965)	ISO	430
	for Composition of Wrought Magnesium Aluminium (Aluminium)	Zinc Alloys (1966)	Rec.	ISO
dmium in That Containing C/	Std. for Chemical Analysis of	Zinc Alloys: Polarographic Determination of Lead and Ca	ISO	2576
against Corrosion (1971)	Rec. for Metal Spraying of	Zinc and Aluminium for the Protection of Iron and Steel	ISO	2063
of Tin (1970)	Rec. for Chemical Analysis of	Zinc and Its Alloys—Spectrophotometric Determination	ISO	1570
f Iron (1969)	Rec. for Chemical Analysis of	Zinc and Its Alloys: Spectrophotometric Determination O	ISO	1055
and Zinc Tetrahydroxochromate (1970)	Rec. for	Zinc Chromate Pigments—Basic Zinc Potassium Chromate	ISO	1249
	ly Used for the Production of Aluminium—Determination of	Zinc Content—Pan Photometric Meth. (1971)	/E Primari	ISO
	oys: Gravimetric Determination of Zinc in Aluminum Alloys	(Zinc Content Between 0.50 and 6.5%) (1968)	/Nd Its All	ISO
s: Determination of Zinc Content (Polarographic Meth., for	Rec. for Chemical Analysis of	Zinc Content from 0.005 to 0.1% Inclusive) (1967)	/Ore	ISO
of Chemical Analysis of Manganese Ores: Determination of	Rec. for Chemical Analysis of	Zinc Content (1966)	Rec. for Meth	ISO
of Aluminium and Its Alloys: Gravimetric Determination of	Rec. for	Zinc in Aluminum Alloys (Zinc Content Between 0.50 and	ISO	798
	Rec. for	Zinc Ingots (1968)	ISO	752
	Rec. for Electroplated Coatings of	Zinc on Iron and Steel (1971)	ISO	2081
	Rec. for	Zinc Oxide for Paints (1962)	ISO	275
1970)	Rec. for Dental	Zinc Phosphate Cement (1970)	ISO	1566
972)	Rec. for Zinc Chromate Pigments—Basic	Zinc Potassium Chromate and Zinc Tetrahydroxochromate (ISO	1249
	Std. for Magnesium	Zinc Zirconium Alloy Castings—Chemical Composition (1	ISO	2119
f Magnesium and Its Alloys: Polarographic Determination of	Rec. for Chemical Analysis of	Zinc (Content Between 0.1 and 4%) (1968)	/L Analysis O	ISO
alysis of Zinc: Polarographic Determination of Cadmium in	Rec. for Chemical Analysis of	Zinc (1969)	Rec. for Chemical a	ISO
1968)	Rec. for Chemical Analysis of	Zinc: Photometric Determination of Iron (1968)	ISO	714
	Rec. for Chemical Analysis of	Zinc: Polarographic Determination of Lead and Cadmium (ISO	713
	Rec. for Chemical Analysis of	Zinc: Polarographic Determination of Lead (1968)	ISO	715
	Rec. for Chemical Analysis of	Zinc: Spectrophotometric Determination of Copper (1969)	ISO	1053
for Magnesium and Its Alloys—Determination of Insoluble	Std. for Magnesium Zinc	Zirconium Alizarin Sulphonate Photometric Meth. (1972)	ISO	2354
sis of Magnesium and Its Alloys—Determination of Soluble	Rec. for Magnesium Zinc	Zirconium Alloy Castings—Chemical Composition (1972)	ISO	2119
r Magnesium and Its Alloys—Determination of —Containing	Rec. for Selection of Tolerance	Zirconium (Alizarin Sulphonate Photometric Meth.) (1970)	ISO	1178
		Zirconium, Rare Earths, Thorium and Silver—Periodate	ISO	2353
		Zones for General Purposes (1970)	ISO	1829

15. SUPPLEMENTARY NOTES			
<p>16. ABSTRACT (A 200-word or less factual summary of most significant information. If document includes a significant bibliography or literature survey, mention it here.)</p> <p>This computer-produced Index, based on the Key-Word-In-Context (KWIC) system, contains over 2,700 standards titles of the International Organization for Standardization (ISO), the International Electrotechnical Commission (IEC), the International Commission on Rules for the Approval of Electrical Equipment (CEE), the International Special Committee on Radio Interference (CISPR), and the International Organization of Legal Metrology (OIML).</p>			
<p>17. KEY WORDS (six to twelve entries; alphabetical order; capitalize only the first letter of the first key word unless a proper name; separated by semicolons) Analyses; International Commission on Rules for the Approval of Electrical Equipment; International Electrotechnical Commission; International Organization for Standardization; International Organization of Legal Metrology; International Special Committee on Radio Interference; recommendations; specifications; standards; test methods.</p>
