Dear Manuel

RE: Joe Bastoni, age 45

Joe has been having difficulty keeping his weight down, since you last saw him. His BSL's are averaging 10, but have been higher on several occasions. I may need to consider starting him on Insulin.

His optometrist reported some retinal vessel changes and Joe reports an increase in floaters recently.

He has been away dealing with family issues and has not had an eye review for 3 years

GH Type 2 diabetes

Meds Diamicron, Lipitor

BP 120/80

Allergies Nil known

FH Siblings with Type 2 diabetes

Best regards,

Gerald Moreton
