

# Creative Commons Licenses Mapping

4 combined elements make it possible to structure 6 distinct Creative Commons licenses accessible according to 3 complementary layers. In addition, 2 tools enable works to be released into the public domain.

**CC0 ("CC ZÉRO")** – Work dedicated to the public domain

By using this tool, you explicitly renounce the copyright you own on your original work, for the whole world & unconditionally. You thus place it in the public domain.

**PUBLIC DOMAIN MARK** – Work already copyright-free

The work is already free of known copyright restrictions, worldwide. This is the "normal" status of a work 70 years after the death of its creator (in the United States of America).

Cartography in Ledger format (A3 EU paper format), under public domain (CC0), available in PDF and editable versions : <https://grouan.fr/2023/10/23/creative-commons-certification-unit3-cartographie-des-licences-cc/>

**ATTRIBUTION – BY**

Reference to authorship. All licenses include this condition, as it relates to inalienable, imprescriptible and perpetual moral rights.

**NON COMMERCIAL – NC**

You may not make any use that is primarily for commercial advantage of this work or its component parts, or for monetary compensation.

**NO Derivatives – ND**

If you adapt or modify the work, or create from an element that composes it, you are not authorized to distribute or make available your derivative work.

**SHARE ALIKE – SA**  
or COPYLEFT

If you adapt or modify the work, or create from an element of it, you must distribute your derivative work under the same license as the original work.
